A Chronicle of Cambridge News from 1888, by Mike Petty

The 'Chronicle of Cambridge News' index records information on more than 100 aspects of Cambridge life, including health, transport, politics, local government, education, war, planning and religion.

In 1988 I was commissioned to produce the Cambridge Evening News centenary picture book and decided to take the opportunity to index headline stories for Cambridge topics from 1888.

I went through each of the newspaper cuttings file maintained by the Cambridgeshire Collection at Cambridge Central Library. I also scanned the 'Review of the Year' and 'Peeps From the Past' articles in the Cambridge News and the 'From our old files' in the Cambridge Independent Press. When there were years without such a record I went through the papers themselves.

This has been supplemented by stories that I carried in my 'Looking Back' column in the Cambridge News covering the years 1897-1914, 1922-1939, 1947-1964 & 1972-1989. For these I have scanned files of the Cambridge Daily News, Cambridge Independent Press or Cambridgeshire Weekly News.

I have supplemented this by additional indexing with the intention of completing the entire century at which time I hope to edit and publish this file formally. However I am now sharing it in draft form

I have included the date that story appeared in the original newspaper in the form YY-MM-DD or 'CDN 20.5.1904'. I may well have full copies of the stories summarised. A reference in [] relates to handwritten notes, a copy of which are held in the Cambridgeshire Collection.

The Cambridgeshire Collection at Cambridge Central Library has maintained newspaper cuttings files on 850 topics since 1958. They are far more comprehensive than this summary.

There will inevitably be mistakes, please let me know of those that you spot and I will correct them.

It is made available in the hope that it may assist your research. Please make use of it what you may. Please remember where it came from.

A Chronicle of Cambridge News

c.02 : Events, Royal visits etc

Queen Elizabeth II visits Guildhall, 1955

107.53

headlines

It is little known that the Master of Trinity College has the prerogative of remaining covered in the presence of the Sovereign and on one occasion when Queen Victoria visited Cambridge he kept his hat on. The Queen apparently did not notice the circumstances and he began to feel uncomfortable. At length he said; "Your Majesty has perhaps wondered that I should be so far lacking in respect, but Lord Kingsale in Ireland, Lord Forester in England and the Master of Trinity have a right to keep their hats on in the presence of their Sovereign". "Quite so – ahem – but not in the presence of a lady" was the Queen's freezing reply. CDN 20.5.1904

Many columns have been devoted to the first volume of biography of King Edward VII whose last year of training was spent in Cambridge where he hunted and played tennis. One phase of undergraduate recreation which he especially favoured was the A.D.C. At the club's premises in Jesus Lane the Prince was an appreciative spectator of the farces and extravaganzas to which their programmes were confined and his favour secured the club a fuller academic recognition than it had enjoyed before. Later he accepted the office of Honorary President and revisited from time to time, presiding in 1880 at the Club's 25th birthday c25 03 09

1861 On a certain day 49 years ago several undergraduates while walking along the Madingley Road were overtaken by a heavy rainstorm. They were not provided with any protection against such weather and there was every likelihood they would be thoroughly drenched. An old lady living in one of the brick-built cottages noticed their plight and they gladly took the opportunity to wait in her dwelling until the violence of the storm had abated. Before they left the kindly old dame insisted upon one of the young men accepting the loan of her umbrella. It was returned the next day with a substantial gift in recognition of her kindness. That undergraduate afterwards became King Edward VII 10 05 13h

1894 Duke of York honorary degree [NI.2.17]

1897 celebrate Queen Victoria's Diamond Jubilee include dinner to old folks on Parker's Piece, largest witnessed in Cambridge [1.8,MPP.]

1897 After the lapse of close upon a month the committee appointed to carry out the celebration of the Great Jubilee (of Queen Victoria) in Cambridge have definitely decided upon a single scheme. The course adopted has the effect of putting out of court our scheme for the establishment of a system of private and swimming baths as a Jubilee undertaking. But considering the remarkable unanimity of opinion on the subject we feel sure that the project will be only temporarily waived. Indeed having regard to the the absolute necessity in the town we pledge ourselves to revive the matter at the first convenient opportunity. Very little difficulty would be experienced in floating a company to carry out a scheme so universally deemed desirable. (Editorial) c1897 04 10

1897 The Queen Victoria's Jubilee Free Dinner Committee, having placed their fund for feeding the aged on a satisfactory footing, have determined to give a free tea to the children of Cambridge between the ages of 7 and 14. It is fitting that the children of the town, the inheritors of the wonderful empire that has been built up and its future guardians, should have indelibly impressed on their minds the greatest landmark in modern English history – Editorial c1897 06 04

1897 A good number of people are attending the fete on Midsummer Common. In that part of the enclosure nearest Maid's Causeway, shooting galleries, stalls, cocoanut shies and one of Thurston's steam roundabouts were gathered and kept matters lively. During the afternoon a fancy dress bicycle carnival took place, handsome prizes were awarded for the best costumes. The first prize for the ladies, a diamond and ruby crescent brooch, was awarded to Miss L. Unwin of Newnham who, with helmet, breastplate, shield and trident made a dignified Britannia. Miss

Unwin will also receive the silver "King of the Road" lamp and baby bell given by the Humber Cycle Supply Co c1897 06 06

1897 Cambridge will have its bonfire on Jubilee night and from the nature of the site we shall have it all to ourselves. Midsummer Common is to be the venue, and as that is about the flattest part of Cambridge there is not much prospect of its being seen beyond the limits of the town, although should the fire be a big one and the night fairly dark, the glow in the sky ought to be seen all over the fen country. One of the most interesting experiments will be that of the search-light on Ely cathedral. The great shaft of light sent out by the search-light, first in one direction and then another, should send a message not only to Cambridge, but over a great portion of East Anglia – editorial c1897 06 19

1897 Providence set the seal of approval on the absolutely flawless celebration of Queen Victoria's Jubilee. Cambridge Market-place presented a particularly attractive spectacle with the Guildhall illuminated and the long lines of coloured lamps; above all with the moving masses of eager folk, who had come out in the best of tempers to be amused. One or two cranky people pretended to be shocked at the extreme naughtiness of letting off a few squibs, which was not to be compared with the imprudence of running heavy 'busses through the narrow and crowded Cury and Market-hill. A remarkably beautiful sunset was succeeded by the exquisite Jubilee twilight mingling into the dawn of the longest day; and in Cambridge, as elsewhere, everybody who went to bed - and most folks sought that sensible repose – did so with high hopes of the morrow 1897 06 23

1897 The festivities in Cambridge (for Victoria's Jubilee) were inaugurated on Monday evening with a cyclists' lantern parade and a more successful commencement it would have been difficult to suggest. Over a hundred cyclists attended by far the greater portion being in costume or having their machines decorated. The cyclists assembled in the Priory Grounds, Newmarket-road. A large crowd gathered in the neighbourhood and hailed with applause the decorated machines as they approached. The first prize for the best decorated machine was awarded to Mr Dunn who had made his machine represent the Indian jungle. A deer's head was shown from the front of the machine in the middle of grasses and evergreen, while behind, monkeys sported among the ferns and vegetation. Mr Dunn himself was attired in the garb of a hunter c1897 06 24

1897 One of the most interesting events of the Jubilee week was the dinner to 1,000 aged people of Cambridge which took place on Parker's Piece. From 10 a.m. an army of helpers 400 strong, all as busy as bees, were engaged in preparing the tents, two in number, for the expected guests. The old people began to arrive very early, with beaming faces and expectant eyes. "It's not the dinner so much", said an old lady of some 75 summers, "it's taking part in the Jubilee dinner and meeting with all the others". Gowns of antique stuff, redolent of sweet lavender, that had lain by for years protected against the ravages of mother, were brought out in honour of the occasion. One old gentleman had hunted up a pair of white jean trousers that he went courting in 50 years ago c1897 06 26

1897 It is a matter of satisfaction that the subscriptions which have been received by the Jubilee Dinner Committee were sufficient to give a tea to some 4,000 school children of Cambridge between the ages of seven and 12. A mug and plate was provided for each child, and the plates when they sat down were furnished with bread and butter and two lumps of cake. Once in the enclosure they were each presented with a medal commemorating the Jubilee. Until tea commenced the enclosure was a perfect babel with the childrens' chatter. Far more children than expected came, and some of the school teachers had written their own tickets. Not a few of the children attending were obviously either over or under the age which had been decided. All were soon provided for and the committee were able to keep replenishing the tables. As they finished tea the children left the tables, and, shouting, romped and danced to the band's music. The sight was enough to set the milk of human kindness surging through the heart of the most misguided misanthrope c1897 06 26

1897 Here and there among the little folk : impressions of an onlooker. The five immense tents pitched on Parker's Piece were crammed with youngsters full of the restless energy of youth. What a sight it was to see them come dancing down the various roads leading to Parker's Piece, swarming over the iron fences, racing across the greensward, and roguishly crying the policemen on duty in the vicinity of the feast. Not one could walk sedately or cease from whistling for very joy. The desertion of teachers, the near approach of the end of the Jubilee holiday, everything was forgotten in the delight of the children's day c1897 06 29

1897 In commemoration of the Great Jubilee of her Majesty, a meat tea was provided for poor married couples residing in the East Ward of Chesterton. A field belonging to Mr R.H. Lord on Scotland-road was secured for the occasion. Some 500 adults sat down to the meat tea which consisted of rounds of beef, legs of mutton and hams.. The meat had been admirably cooked in the kitchens of Clare College. After tea the men were supplied with tobacco, tobacco boxes and pipes and snuff and snuff boxes while strawberries were provided for the women c1897 06 30

1898 Lord Kitchener Honorary Degree & Freedom of Cambridge; people hurt in crust; carried back head downwards [1898 11 24, 1898 11 28, Rev Yr, 24 03 06] 57 12 14c and more memories – 57 12 28

1898 There was but little crush as the stream of mourners poured from all quarters of the town into Great St Mary's Church for the Memorial Service to Mr Gladstone. A subdued calm seem to fall like a veil over the centre of Cambridge as the bell tolled forth its tale of loss to the nation, and a hush, as it were, of the chamber of death seemed even to spread itself over the busy market place. Quietly the people filed into the Church and stepped into the first empty pew; none stopping to haggle for a seat. Even as the doors were being closed, as the last bars of the echoing National Anthem waned to silence, latecomers yet found room in one or other of the galleries, and no one was turned from the Church CDN 1898 05 28

1898 Great crowds had been assembling outside Great St Mary's and the railings before the Senate House with the exception of a pathway of about five yards which the police were endeavouring to keep clear for those attending the honorary degree ceremony for Lord Kitchener. It was evidence that the constables were having hard work in keeping the crowds from encroaching. At length the looked-for rush took place and such was the force that the police were quite powerless to check it. A general scramble to get upon the railings ensued when without the slightest warning the railings suddenly gave way and fell outwards carrying many unfortunate persons to the ground with them. The solidity of this great piece of ironwork is well known and it is wonderful that more were not seriously injured. CDN 1898 11 24

1898 The members of her family share with Queen Victoria a dislike to all unnecessary fuss and show. The Empress Frederick paid a visit to Cambridge yesterday, took a drive through the streets and left, but hardly anybody knew we had had a Royal visitor. So much of the lives of those who are in this high station is of necessity lived in public that one can well understand how glad they are to avoid, in as far as it is possible, the observation of the crowd. Cambridge would gladly have done her honour but it is a matter for satisfaction that the Empress's own will in regard to her visit was carried out so faithfully CDN 1898 12 13

1899 Today, Queen Victoria attains her 80th birthday, and British subjects in all parts of her Majesty's dominions are celebrating the occasion. Cambridge has not attempted anything in the nature of a public demonstration. This was not to be expected, but Cambridge is none the less loyal on that account, and there are in almost all parts of the town, outward and visible signs of rejoicing. Numerous Union Jacks and other national emblems are displayed in the principal thoroughfares, and the church bells have all been rung in honour of the event. At the Roman Catholic Church the national anthem was chimed between 12 and 1 o'clock, and the ringing of the bells may be expected to continue at intervals throughout the day c1899 05 24

1899 H.R.H. the Prince of Wales is visiting his old University this evening. His arrival by the express from St Pancras was witness by a moderately large crowd, which was not particularly enthusiastic in its reception. The Master of Trinity received him as he stepped from the train. The Prince raised his hat in acknowledgement and then looked round expectantly at the line of spectators. No cheer, however, was raised until he was being driven away in an open carriage
1899 06 21

1900 The King of Sweden and Norway will doubtless carry away with him many pleasant reminiscences of his visit to Cambridge. The object of King Oscar's visit, as the guest of the Master of Trinity, was quite a private one. The University however were unwilling that the occasion should be allowed to pass without doing honour to their illustrious visitor, and it was resolved to confer upon the King the honorary degree of Doctor in Law. A large crowd gathered around the Senate House. The galleries were thronged with undergraduates and the floor of the house given up to ladies whose summer dresses contributed materially to the brightness of the scene CDN 1900 05 14

1901 mourning for death of Queen Victoria; Addenbrooke's Hospital propose a new wing as memorial (plans abandoned 1904) 01 02 12 [1.11.01 05 06 Rev Yr,1.17]

1901 The melancholy news, which everyone knew could not be long delayed, of the death of Queen Victoria, was received in Cambridge in this brief announcement: - "The Queen passed away at 6.30". The Cambridge Daily News gave publicity to the melancholy event to those who in Cambridge were waiting with anxiety for the latest intelligence, and almost immediately telegrams were posted at the University Union Society and at the Guildhall. The tolling of bells at many of the churches and college chapels also served to spread the sad news and this morning the borough bore a complete aspect of mourning for the loss of our beloved Queen. Royal Standards are flying half-mast and black ties and other emblems of mourning are being worn by members of the University and the townsmen CDN 1901 01 23

1901 With the solemnities and ceremonies accustomed on like occasions, His Majesty King Edward VII was proclaimed by the University of Cambridge in succession to Victoria, the Well-Beloved. This morning, while the minute bell was mournfully tolling, while black shutters were up at almost every shop window and flags were at half-mast, crowds of scarlet-robed Doctors, sedate Dons and vivacious undergraduates were hurrying towards the Senate House to take part in the ceremony of a lifetime – to proclaim Edward VII King CDN 1901 01 26

1901 Amid every sign of loyalty and with great enthusiasm, Cambridge publicly and impressively proclaimed King Edward VII. The unusual attraction naturally brought a vast crowd together, winding their way to the Guildhall which was accessible to all who presented themselves for admission and the building was soon crowded with a throng of sightseers, the majority being in deep mourning c01 01 26

1901 The Mayor of Cambridge called a meeting to consider a memorial to Queen Victoria. The large hall of the Guildhall was prepared but there were scarcely a dozen people present and as they appeared lost in the hall, a move was made to the Aldermen's Parlour. The Mayor said it was a very great disappointment to him; he had written letters, placed advertisements and issued handbills. The memory of her Majesty would remain with all of her subjects but they wished for a visible memorial by which future generations might see how deeply Queen Victorian reigned in the lives and affections of her subjects c01 05 11

1902 Coronation celebrations - 87 meetings needed to organise it; suggestion of erecting a clock tower opposed [Rev Yr]

1902 The startling and unwelcome intelligence that the Coronation of King Edward VII had been postponed, owing to him having to undergo an operation, created a great sensation in Cambridge. Those who first heard were incredulous and treated the matter as a mere rumour. Scores of enquiries were received at the News by telephone. Crowds assembled round the type-

written announcements that were displayed and turned away with expressions of mingled astonishment and pain. CDN 1902 06 24

1902 Never before has Cambridge Corn Exchange been the scene of such a curious sight as when a distribution was made of the large quantity of food intended to form part of the feast to the old folks in celebration of the Coronation. When the news of its postponement was received the cooking of the food had already begun. Several hundred of the poorest inhabitants gathered outside the front gates of the Corn Exchange as quickly as their too-evident infirmities would allow them. Quite a number wrapped quantities of fruit tart in grimy newspapers that could hardly have improved their semi-liquid contents CDN 1902 06 27

1902 As soon as the King's illness was announced volumes of telegrams commenced to pour into the Cambridge office. On Tuesday no fewer than 350 telegrams were waiting to come through from London and the abnormal pressure was kept up until Friday. Press wires, commercial wires and private telegrams increased at such a rate that in order to cope with them employees from the postal department were drafted into the telegraph department. Even then it was only by working at very high pressure, and working overtime, that the staff were able to get through their task. c02 07 01

1902 An alarming report was widely current in Cambridge that his Majesty had succumbed to his operation. One credulous tradesman actually put a shutter up on the strength of an absolutely unofficial report to that effect, which was posted on a shop window adjacent to the office of the Cambridge Independent Press. The tradesman was Mr C.S. Addison who is indignant at being credited with the responsibility of making the erroneous announcement. He had absolutely nothing to do with the report except that he gave permission to the Independent Press to exhibit upon his shop front any intelligence that might come to hand. The announcement caused much pain and indignation & ought not to be made except on the receipt of official news & certainly not upon the strength of a mere rumour. c02 07 03

1902 Now his Majesty is on the high road to recovery many places are holding the festivities arranged in celebration of the Coronation. Out of sympathy for King Edward these were postponed and now while the bright summer days and long mild evenings are at their best the committees are taking the wise course of holding the jubilations rather than wait until a later stage in the year when there is a greater chance of unfavourable weather. Unfortunately St John's ward, Cherry Hinton picked upon early closing day and any shop employee will say that this is practically synonymous with rain. Nevertheless the festivities must be written of as a success. CDN 1902 07 18

1902 The problem of the general servant is with us always. The tyranny of the domestic, her varying moods and fluctuating caprices seemingly know no end. Her demands have gradually become more peremptory and extensive for some years past and housekeepers have become painfully familiar with Sundays off, evenings out, cycles in the kitchen and swains in constant evidence. The Cambridge autocrats of the kitchen are now going a step further; the very latest request is a week's holiday at the Coronation. It is not stated whether the majority of them propose attending the Abbey c02 07 23

1902 The people of Old Cherryhinton participated in festivities in celebration of the Coronation. They took the form of sports and a tea, besides various minor amusements, while music entered largely into the scheme of pleasure. 900 people availed themselves of the opportunity to take tea which took place in a large erection constructed of canvas under trees in a meadow. Beside this temporary tea-room stood a traction engine with steam up but it was not attached to any bread-cutting arrangement such as might have been necessary to cope with the extraordinary demand. It was used to boil water for the tea. CDN 1902 07 28

1902 The venerable University town can have scarcely witness such a scene as animated gaiety as on Coronation Day. Street after street was bright with flags and blazing in a brave show of scarlet and white and blue. Visitors poured in by road and rail, in vehicles and on foot until it

seemed as though the population of Cambridgeshire must have drifted en masse into the town and left the surrounding country empty and desolate. To and fro through the narrow streets, laughing, talking and singing the gay crowds eddied and swirled CDN 1902 08 11

1902 Yesterday young Cambridge celebrated the coronation of King Edward VII. Half of Parker's Piece was covered with twelve tents and soon the happy throng was taking tea to the strains of music furnished by the Cambridge Police Band. Over 800 gallons of tea were brewed, roughly 6,400 pints. For 6,000 children the quantity was abundant. The Mayor distributed commemorative medals which will doubtless remain treasured possessions for many a year. The centre tent contained a large number of people who were present at Queen Victoria's Coronation CDN 1902 09 05

1902 The Mayor of Cambridge, Alderman Kett made a tour of sixteen schools for the purpose of distributing Coronation medals to the infant scholars. It had been suggested that they should also be given a tea in the tents on Parker's Piece but it was felt that little mites of four could hardly be expected to walk to and from the Piece and it was more advisable to provide tea for them at the various schoolrooms. At East Road school tea had to be provided for 250 infants and the cutting up of the large quantity of bread and cake entailed several hours of work for the teachers. CDN 1902 09 06

1903 The visit of General Sir John French will remain memorable for his reception by all sections of the inhabitants. The famous cavalry leader was sought after, first at the railway station when he arrived and later when he proceeded to the Guildhall where he received the freedom of the Borough. Lord Kitchener's is the first name on the roll of Cambridge Freemen and it's fitting that the name of General French should follow his illustrious Commander in the South African war. Many who have already been presented with the freedom have served under him and learned to admire him as an ideal commander who never asked them to do what he was not prepared to do himself. c03 01 23

1904 British Association opened by Prime Minister Balfour, Corn Exchange 1904 Rev Yr

1904 bust of Queen Victoria unveiled in Guildhall [Rev Yr]

1904 King opens Downing Street museums; windows overlooking parade route offered at 5/- (25p) a head, drop to 1/- (05p) as no takers; in event Royal party travel in closed carriages due to weather [04 03 01 Rev Yr, 3.21, 3.19]

1904 All Cambridge united in welcoming King Edward VII and Queen Alexandra to open the new University buildings known as the Sedgwick Museum, the Squire Law Library, Botanical and Medical Schools in Downing Street. Cambridge University has never stagnated but kept pace with the demands of the time. Newer universities have their place in the general scheme of things but they can never supplant our ancient university of Cambridge, nor her twin sister on the banks of the Isis. With the increasing spread of education their prosperity increases. c04 03 01

1904 The Royal visit to Cambridge was followed by an undergraduate 'rag' which caused wanton destruction of public and private property even though a large body of police, including mounted men, were on duty. One policeman guarding the proctors was singled out for a little 'baiting'. As they surged around he took out his baton which was immediately snatched from his hand. Now unprotected the affair seemed likely to develop into a serious disturbance but mounted policemen began to harry the crowd who fled before the horsemen. Many youths annoyed the riders by throwing crackers near their horses. One animal was so startled by an explosion that it threw its rider and careered across Parker's Piece. c04 03 02

1904 Owing to the enormous demands for the C.D.N. souvenir of the Royal Visit to Cambridge the whole edition was sold out less than an hour after publication. Now in response to enormous requests a second edition is ready. It contains a full report of the proceedings together with special articles on previous royal visits, King Edward's undergraduate days etc. It has photographs of the new Downing Street buildings reproduced from the series of pictures specially

taken by J. Palmer Clarke for presentation to the King. Printed on superior paper and being of a convenient size it is an admirable memento of the auspicious and historic occasion. c04 03 03
1904 At the death of Queen Victoria, a little more than three years ago, the Mayor of Cambridge started a subscription to provide a memorial. Plans for a substantial improvement at the hospital had to be abandoned but they agreed to procure a bust of the Queen from Thomas Brock. It was a magnificent work of art by one of the leading sculptors of their generation which the Corporation would always treasure. It would be an ornament to the Guildhall and retain an honourable position in that building as long as it lasted and then take a more distinguished position in more sumptuous surroundings. 1904 06 16

1905 The King was involved in an exciting scene at the conclusion of racing at Newmarket. Within a few minutes of the finish of the last race a steady stream of traffic poured from the Heath townwards, and in the dozens of vehicles of all sorts and description was the royal equipage. The vagaries of a motor car caused a sudden halt and although the driver of the King's carriage pulled up promptly the horse pulling one behind struck the King a sharp blow in the back with its head. His Majesty, though naturally startled and shaken was not at all injured. 05 05 20a
1905 Nelson Day in Cambridge was marked by flags and on Sunday references to his life and death were made in many of the churches. On Saturday evening a partially successful attempt at a rag was made by a number of University and town youths, thus amply justifying the Mayor's decision not to promote any public demonstration which might have provided the necessary excitement for a serious disturbance. 05 10 23a

1905 Because a hundred years ago Horatio Nelson won the Battle of Trafalgar, the youths of Cambridge, University and town, united in a 'rag' in which the destruction of property was a necessary element. Two constables were mauled by the mob, one at the Parsonage Street fire and the other at the Park Parade fire, but are little the worse for the rough handling they received. A tram was stormed by a large number of undergraduates; dozens of them clambered on to the vehicle until it was a black mass of struggling beings. But despite the heavy load the horse managed to crawl along. 05 10 23b-c

1906 painting of Queen Victoria unveiled (removed from Council Chamber in 1930) [06 01 01 Rev Yr, 30 07 19]

1906 The King concluded his visit to the Earl of Sandwich at Hinchbrook Park and drove in his motor car to Newmarket. On his way through Cambridge the royal car was purposely driven more slowly than usual which enabled many people to catch a glimpse of His Majesty. He proceeded to Sir Ernest Cassel's house, Moulton Paddocks, where a Japanese garden with rustic bridges and dwarf trees has been recently added. 06 07 03a

1906 Mammoth Show magnificent exhibition – 06 08 06

1906 The King had an excellent day's sport on the famous partridge grounds at Chippenham Park, which Sir Ernest Cassel has leased. Birds were numerous and strong on the wing. His Majesty rode on his pony from point to point and displayed his usual precision of aim. The bag included 669 partridges, 88 pheasants and 82 hares. 06 10 15

1907 Last week one of His Majesty's motors passing through Ely ran over and killed a dog owned by Mr A. Feast. Mr G.M. Hall brought the matter before the King who, with his customary generosity, has forwarded Mr Feast £5. This is characteristic of his Majesty and is only one of many incidents which have done so much to endear him to his people. 07 01 30

1907 The autoclycus of the gutter shouts unintelligent jargon to a street comrade and calls it Esperanto. But when a picturesque figure from the Swiss Canton appeared in the street the impudence of the street Arab was silenced. He was impressed by the tight green breeches and head capped by genuine Alpine hat. A Turk and Indians in national costume add considerably to the effect of this new kind of circus. 07 08 12a

1907 All other events in Cambridge have been dwarfed in comparison with the third International Esperanto Congress which has brought money into the town when trade was at its lowest ebb. It was hoped the University might have bestowed an honorary degree upon Dr Zamenhof, the Warsaw genius, but apart from a formal reception at the Fitzwilliam Museum it has generally stood aloof from the movement. 07 08 17a

1907 Members of the Esperanto Congress visited the New Theatre to watch a performance of 'Bardell kontrau Pickwick'. Dickens wrote for his own people, little dreaming it would be performed through a tongue understandable to all. 'Pickwick' was played by 'O.B' – Oscar Browning of King's College – who, attired in a green swallow-tailed coat, might have come direct from a Cruickshank illustration. 08 08 15

1907 The Cambridge Police Athletic Society festival was attended by a large crowd, including many Esperantists. Dr Zamenhof presented an Esperanto Cup for the policeman who has performed the most efficient ambulance work to Sergt Gates for his action in saving the life of a man who had taken poison. 07 08 16

1907 Magdalene welcomes member English Royal Family as undergraduate for first time – Prince Leopold of Battenberg – 07 09 30b

1907 King Alphonso and Queen Victoria of Spain visited Prince Leopold of Battenberg who is studying at Magdalene College. Their Majesties toured in motor cars, Prince Leopold, clad as a typical undergraduate in blue lounge suit, brown boots and cloth cap, sat backing the chauffeur while the King was in the dress of an English gentleman playing a ceremonious call and the Queen wore a mauve dress almost covered with a sable coat. 07 11 11

1908 Her Majesty the Queen, accompanied by the Dowager Empress of Russia, passed through Cambridge station, where a small group of spectators had gathered. Elaborate arrangements had been taken and Inspector Baker and several constables were in attendance, in addition to the Station Master and other officials. There was no demonstration but a kindly act on the part of the Queen was noticed: she waved her hand once or twice to the persons on the platform as the train proceeded without stopping to Six Mile Bottom. 08 04 11

1908 Much anxiety was occasioned at Newmarket owing to the non-appearance of the Royal motor car in which Queen Alexandra and the Emperor of Russian were travelling. One absurd report was that Anarchists were to blame. Cyclists went out as search parties and Supt Winters set off in a private car in search of the Royals. The chauffeur had taken a wrong turning and the Queens were lost for the better part of an hour as the car threaded the maze of country lanes around Fordham. A burst tyre caused further delay and they were nearly an hour late. 08 04 13

1908 The King motored from Bucking Palace to St Pancras and left by the 5.7 train for Newmarket. A special saloon had been attached for his use and tea was already laid. At Cambridge the Royal saloon was detached and was run as a special to Newmarket which was reached shortly before seven. His Majesty subsequently motored to Moulton Paddocks and dined with Sir Edward Cassell. He will motor back on Friday. 08 05 06a, 50 10 14

1909 Darwin celebration finished 09 07 10 TT

1909 Prince Henry of Battenberg opened a sale of work in aid of the funds for providing a properly-equipped Children's Ward at Addenbrooke's Hospital. There has been one in the past but some years ago it was done away with as the Hospital' income was not sufficient. Children have not been entirely neglected: urgent cases have been taken in but the staff felt handicapped without a bright, sunny ward where the injured and diseased little ones might be given a fair chance of recovery. 09 05 07 p5

1910 King in Cambridge – brief stop station - 10 01 14h

1910 Many in Cambridge had left home before the news of the Death of King Edward VII was known but in an hour or two there were signs of mourning everywhere. Many of the tradespeople

draped their shutters, blinds were drawn at private residences, church bells were tolled and flags hoisted half-mast on the public buildings. During the morning when the streets were filled with crowds of country people from the surrounding villages it was almost the exception to find anyone without some note of black in their attire 10 05 13c & d

1910 With fitting ceremonial Prince George Frederick Ernest Albert was proclaimed to the University, the Borough and County of Cambridge, King of Great Britain and Ireland and Dominions beyond the Seas and Emperor of India, in succession to Edward VII. In the Guildhall the Mayor and Corporation assembled in the Large Room with the benign countenance of Queen Victoria looking down on them from the wall to acclaim her grandson as King George V 10 05 13e-g i j

1910 On a certain day 49 years ago several undergraduates while walking along the Madingley Road were overtaken by a heavy rainstorm. They were not provided with any protection against such weather and there was every likelihood they would be thoroughly drenched. An old lady living in one of the brick-built cottages noticed their plight and they gladly took the opportunity to wait in her dwelling until the violence of the storm had abated. Before they left the kindly old dame insisted upon one of the young men accepting the loan of her umbrella. It was returned the next day with a substantial gift in recognition of her kindness. That undergraduate afterwards became King Edward VII 10 05 13h

1910 Col Theodore Roosevelt, ex-President of the United States of America, was awarded an Honorary Degree in the Senate House. He arrived by train from London and was driven to Pembroke Lodge where he lunched with the Vice-Chancellor and 100 friends. Afterwards he was made an Honorary Member of the Union Society. Only Oliver Wendell Holmes, Lord Kitchen and Mr Waterhouse, the architect of the Union building had received this honour before him. The whole visit was very quietly carried out owing to the death of King Edward VII 10 05 27a

1910 A public meeting agreed that the best Cambridge memorial to King Edward VII would be an extension to Addenbrooke's Hospital. At present there was a small ward where only eight infants could be accommodated and the outpatients department did more harm than good as people suffering from infectious diseases had to wait in company with others, increasing infection. The boiler needed replacement and there was need for a new room for X-ray apparatus as well as a new lift. There should also be a bust of the late King to be displayed in the Guildhall alongside that of his mother, Queen Victoria. 10 10 21e & f

1911 Coronation celebrations : electric searchlight on Castle Hill; no drunkenness, include variety entertainment & fireworks on Parker's Piece [MPP.53, 11 05 06 TT]

1911 The Coronation of King George V and Queen Mary at Westminster Abbey was attended by scenes unprecedented in the history of the Empire. In Cambridge a strong wind struggled wildly with noble flags and dainty decorations alike. Immense crowds of people walked round the streets and endorsed the judges' choice of Stetchford Dairies' premises as having the premier decorative scheme. The Dorothy Café was a very fine second best 11 06 23 & a, b, c

1914 King's Visit - Six thousand schoolchildren will next Thursday line the streets .Although visit is to the Leys School. King will proceed to the school via Newmarket Road, East Road, Lensfield Road and Trumpington Road. Upon arrival will be received by a guard of honour and met by headmaster and members of the governing body. Will view memorial South African War, inspect the gymnasium, swimming baths, science buildings, etc 14 04 24 CIPof 14 05 01

1914 King in Cambridge for foundation stone Moulton chapel Leys school – photos – 14 05 01b

1914 Crowds of children lined Newmarket Road to see the King make his way to the Leys School. The vice-chairman of the Education Committee rode along the route on his bicycle to see the children looking happy and not at all tired. The NSPCC inspector was also on duty. A kindly

gentleman was standing outside the Jolly Butchers entertaining the children with a cockatoo. The little ones laughed very heartily as the comical bird flapped its wings and laid down the law with its beak whilst conversing with its master. Presently a large Daimler car was seen. "Here comes the King" shouted someone and the shrilling cheering and waving of flags told those at Page's Corner that his Majesty had come 14 04 01d

1914 Appeals for people to decorate their houses along the King's route to the Leys School were effective. Along Newmarket Road and East Road houses vary in size but an elaborate display of flags and bunting had been arranged. The favourite plan was a Union Jack hung from the bedroom window or bunting arranged along the window ledges, busin3esses were tastefully embellished while scores of streamers were hung across the road with a tremendous banner inscribed 'Cambridge Working Men's Club'. Many of the side streets made good displays 14 05 01e

1914 Two petitions were thrown at the King's car as he made his way to the Leys School, one landed on top of the car, the other struck the chauffeur in the face. That the King would be in a closed car was obviously not anticipated. Very few people observed the actions of the suffragettes, so quietly were they carried out. The petitions begged the King to reconsider his refusal to receive Mrs Pankhurst's deputation. 14 05 01f

1914 The King's car slowed down near Bottisham Vicarage where the schoolchildren had assembled. Bugler Bowers, of the Boy Scouts, gave the signal of the King's approach and the children sang the National Anthem. The well-known house, 'The Swan' was beautifully decorated and the church flag floated proudly in the breeze from the tower. Quite a crowd of people from adjacent villages lined the road towards Cambridge 14 05 01g

1914 Royal Visit - Prince Arthur of Connaught opened the new School of Physiology erected on the Downing Street site by the Worshipful Company of Drapers at a cost of £23,500. 14 06 12 CIPof

1914 Uganda n Prince Joseph (cousin of the King of Uganda), and Stanislaus Muganys (one of the three Regents during the minority of the young King) welcomed to Cambridge. Bishop Hanlon (the first Vicar Apostolic of Uganda), who accompanied the Prince and the Regent to Cambridge, preached at Sunday evening's service at the Church of Our Lady and the English Martyrs to a large congregation. Outside the Church, large numbers of townspeople assembled in order to get a glimpse of the visitors, who wore their picturesque native robes. 14 06 12 CIPof

1919 Princes at dinner. — The Old Persian tercentenary dinner was held in the Perse School Hall on Friday evening, the Bishop of Woolwich presiding. He was supported by Prince Albert, Prince Henry and others. The toast of "The King" having been honoured, the Bishop of Woolwich submitted "The Royal Family." Prince Albert, replying, said: "My brother and I feel at present like two simple minnows among a number of Tritons in a sea of knowledge." He congratulated the school on the prominent position it had taken in the pioneer work of modern education, "due, in so large a measure, to the brilliant and energetic efforts of Dr Rouse (headmaster) and his colleagues". "Your war record," he went on is one you may well be proud of. Your losses have been I fear heavy, and with you I mourn the brave men from your school who have given their lives for country and Empire 19 11 12 CIPof

1922 His Royal Highness the Duke of York unveiled the War memorial which has been erected in Cambridge. The ceremony was attended by thousands of people and was of a deeply impressive nature. It was raining heavily as the Prince mounted the platform for the unveiling ceremony. The band played the opening bar of the hymn "O God, our help in ages past" to the accompaniment of rain drumming on hundreds of umbrellas. A few minutes later the rain ceased and the rest of the ceremony was carried though amid brilliant sunshine. The Prince pulled a rope which released the drapery revealing the bronze figure of an infantryman c22 07 04

1922 Before a large assembly at the Senate House his Royal Highness, the Duke of York, K.G. had the degree of Doctor of Law conferred on him by the Chancellor of the University, the Earl of Balfour. When the Duke of York was conducted by the Esquire Bedell to his position before the Chancellor, a storm of applause broke from the audience, which, led from the gallery, soon

developed into a cheer. The Orator said; "Our Duke lives - as we read every day in the Press - a life of toil and thought for his people. We hope that in Cambridge, at least, he feels free from toil and anxiety and is here with pleasure and freedom of mind" c22 07 07

1922 When the new King unveiled the War Memorial – 36 12 12

1922 The return of the Cambridge Mammoth Show to its old time variety and importance will recall to many minds the last occasion of its so presenting itself to the public. The gloom which rested over the Bank Holiday and show in 1914 will never be forgotten by those who experienced it. The megaphone calls in all parts of the ground for postmen to repair to their duty at once told the tale that war was regarded as inevitable, and that the mobilisation notices were to go out. On the following Friday Cambridge suddenly found itself an armed camp, through the arrival on mobilisation of the Sixth Division. One remembers the sight of the humble little shopkeepers on Newmarket-road coming out to greet the tired artillerymen and make offerings of fruit, sweets and cigarettes and the great wave of united purpose and offer of service which swept over Cambridge c22 08 08

1925 In Cambridge, as throughout the country, the sad tidings of the death of the Queen Mother were received with feelings of profound sorrow. The flags on the University buildings, colleges, churches, municipal buildings were half-masted, and at various places of entertainment the audiences, on hearing the news announced, stood in silence while the National Anthem was played. The Mayor moved a vote of sympathy with their Majesties King George V and the Queen on the loss of their mother. To every Englishman the name of Alexandra has stood for love and sympathy c25 11 24

1930 The King, who celebrated the 20th anniversary of his accession to the throne today, attended racing at Newmarket this afternoon. He motored from Buckingham Palace during the ceremony of changing the guard and large crowds cheered as his car left. But only a few people noticed his arrival on the Heath. The King spent some moments at the new electric totalisator before proceeding to the grandstand. He will remain at Newmarket for the whole of the Spring Meeting. 30 05 06

1931 Ghandi came to Cambridge, Oct 1931 42 08 15a

1932 The Prince of Wales landed in his red Puss Moth monoplane at Marshall's aerodrome. He jumped hatless from the plane, then donned a boater and drove to the Leys School where he opened the new squash courts and sports ground. On his return he was assisted into his raincoat in preparation for a lofty flight in search of a favourable wind before he stepped into his monoplane, soared gracefully aloft and headed for London. 32 06 22a [2.3]

1932 The Duke and Duchess of York opened Papworth Village Settlement's Women's Hospital which provides accommodation with the personal appurtenances of a private bed-sitting room so that each of the 62 patients may enjoy cheerful, colourful surroundings in her fight for health. Then they journeyed on to Addenbrooke's Hospital to open a new wing for children. 32 07 15a & b (Queen Mother's first visit) [6.1]

1932 The visit of Her Majesty, Queen Mary, was kept a close secret and her car was temporarily held up near Northampton Street traffic lights. But the news quickly spread. Later she visited the Fitzwilliam Museum where she consented to be photographed under the picture of Cambridge that she had presented. 32 07 15g

1932 H.R.H. Prince George toured the Pye Radio Works where 1,500 hands produce 4,000 radio receivers a week. This is the first time a factory engaged in Britain's newest and most progressive industry has been honoured by a Royal visit. The operatives gave him a rousing reception – the girls were especially enthusiastic: it was a wonderful study to observe their varying expressions as he passed through the workshops. "Oh, he's lovely" was the general verdict and every detail of his dress, appearance and manner have furnished a fruitful topic of conversation in Cambridge homes 32 11 18a

1934 Queen Mary & Duchess of York visit Cambridge Tapestry Company & Woolston's antique shop [6.2,1.6] Thousands of people lined both side of St Andrew's Street when the Queen and Duchess of York paid a private visit to Mr Woolston's antique shop where the Queen chose several tiny ivory objects for her famous doll's house. She also inspected the Cambridge Tapestry Company's premises in Thompson's Lane where they watched the women workers actually engaged at the canvas and saw the tapestry panelling now being made for Lord Fairhaven, depicting his seat at Anglesey Abbey. 34 01 08

1934 The Queen paid another visit to Cambridge when she inspected two antique shops and called at a café on King's Parade. The large crowd who had been waiting was surprised when a small blue car drew up and she stepped out. The Royal limousine had broken down on the Ely Road and Mr Percy Titmous, a brewer's manager, had stopped to offer assistance. He then drove her to Cambridge. The Queen was intensely amused at the somewhat unexpectedness of her arrival and at the little adventure which had befallen her, he said 34 01 29 [1.7, 34 02 02]

1934 Another interesting part in the Queen's visit to Cambridge was played by Mr Walter Riddy, proprietor of the St Andrew's Road Garage, Chesterton. After the Royal car had broken down and the Queen had been driven by Mr Percy Titmous, he received a telephone message requesting the hire of a Daimler saloon at short notice. He changed out of his working clothes and drove to Mr Roe's shop in St Andrew's Street to take the Queen to the Copper Kettle Café and then on to Exning. There she invited him to remain for lunch but he had another engagement and could not accept. 59 01 30

1934 Percy Titmous has become famous as a result of driving the Queen to Cambridge after her breakdown. The news spread very quickly and soon pressmen, news agencies and even film companies were hot on his track. One wanted a film specially for America, but he did not feel inclined to do so. He had wanted to slip away unobserved but had not thought to cover the number plate of his car and it was easy to telephone the Council offices to get his name. 34 02 03

1934 The fame of Mr Percy Titmous, the Cambridge man who gave the Queen a 'lift', has spread to the United States of America and did the News Editors lap it up! The New York Herald-Tribune headlined the story 'Percy Titmous Plays Launcelot to Queen Mary in Dire Distress! Motorized Knight Comes Upon His Liege Lady in Broken Down Limousine and Wheels His Trusty Sedan About in Dash for Cambridge Town' 34 02 10, 34 02 17

1934 Thousands greeted the King and Queen when they made their way to the new University Library. Washing and cooking alike was forgotten in hundreds of homes as women formed a great part of the crowds which were thickest in Trinity Street where undergraduates in cap and gown added to the number. Of all the wonderful products of man's skill in art and labour the Library must rank of one of the most inspiring and peculiarly permanent of our national institutions and with while clouds scudding over its lofty tower this unique building occupied the centre of a delightful scene. An exceptionally good film of the visit, taken by Gaumont especially for the Victoria Cinema will be shown next week. 34 10 22 & 25

1934 King's visits to Cambridge – 34 10 20

1935 Her Majesty, Queen Mary, paid a surprise visit to Cambridge to purchase some antiques for her collection. So informal was the visit that even the police were not told she was coming and did not know she was in the town until her car was recognised. Officers then proceeded to

Stanley Woolston's antique shop in St Andrew's Street where there was soon a crowd of about 1,000 people. Motor cars parked nearby were removed and for some time bewildered drivers were inquiring the whereabouts of their vehicles. The Queen visiting all 16 rooms and bought a number of choice specimens of china, glass a furniture which were placed gently in her car. 35 01 23a (subsequently becomes a regular visitor) [35 01 25 CIPof 1.5]

1935 One of the most memorable features of the Jubilee celebrations for King George V will be a retrospect of the reign which has been prepared by Prof Harold Temperley for broadcasting. He calls it a radio dramatic and historical drama. He was assisted in his research in the Royal Archives by Miss Sybil Crowe, a former student of Girton and the gifted and artistic producer was by Lawrence Gilliam formerly of Peterhouse. Both were formerly his pupils. 35 05 04a

1935 Cambridge was decorated for the Jubilee celebrations of King George V. The gayest part covered the main shopping centre where everyone had apparently tried to do better than his neighbour. One of the most original efforts was seen in a grocery shop where a number of eggs had been dyed red and blue and made with some white-shelled eggs into the shape of the Union Jack. A music and cake shop, neighbours, had joined together to produce an effective display with lengths of red white and blue silk draped across the front of their premises while a gay display outside an insurance office attracted a great deal of attention 35 07 07a

1935 In the evening of Jubilee Day the King's speech was relayed by means of loud speakers on Jesus Green. It came through with great clarity and was listened to with rapt attention by many thousands of people. The relay was carried out by Messrs Morley and Duke by means of amplifiers installed near Jesus Green Swimming Bath. Afterwards Josephine's Ladies Gipsy Ban played for dancing 35 05 07b

1936 death of the King, the funeral train driven by Cambridge drivers passes through station [36 01 28 TT]

1936 abdication : the streets are empty for radio broadcast [1.4]

1936 The Queen motored over from Sandringham to visit Mr Stanley Woolston's antique store where she purchased specimens of needlework and some ivories to add to her collection. As word spread the police had a hard time keeping back the ever-increasing throng of sightseers. It was noticed that one of the tyres of the royal car was a little deflated and an RAC Scout was called in to blow it up again. The Queen also visited the Cambridge Tapestry Company in Thompson's Lane where she saw one piece of tapestry that was being repaired. It had been stolen by thieves who were forced to abandon it in a wood where it had been affected by the weather and some children had also mutilated it 36 01 15a

1936 The news of the death of our beloved King came to the people of Cambridge by means of the wireless. The late afternoon bulletins prepared listeners for the worst and a solemn vigil began. In hundreds of homes families sat by the fireside waiting anxiously for the quarter-hourly bulletins which were given by the BBC. It was if the whole nation were waiting at the King's bedside. At the Dorothy Café, where the Fulbourn Mental Hospital Staff dance was in progress, the news of the King's death was learned at half-past-twelve. At once the dance was terminated. 36 01 21

1936 The late King George first came to Cambridge as Duke of York in 1894 when he received an Honorary Degree. As King he stayed at Trinity College while inspecting the army manoeuvres in 1912 during which he met a column of troops on the march near Whittlesford and sat on his horse for nearly half an hour waiting for them to pass. He refused to allow them to be stopped in order to give him passage. Earlier he had dismounted to talk to an old soldier at

Linton. His final recent visit was at the opening of the new University Library, 36 01 21c, 36 01 25 TT

1936 Long before the royal train carrying the dead King was due to leave Wolferton, thousands had assembled at vantage points along the railway route to London line to pay their final homage. Every few yards little knots of people stood in reverent silence. Hundred lined the platform as the funeral train steamed slowly into Cambridge station. 'Charlotte' the parrot, King George's inseparable companion, was on the train. It had been carried to the station in a covered cage, placed on the knees of a royal servant in a royal shooting brake. 36 01 23a & d

1936 Several thousand packed Cambridge Market Hill where from a special platform draped in purple the new King Edward VII was proclaimed. But proceedings were interrupted by the appearance overhead of an aeroplane and as a result of the noise from the engine the Mayor (Ald Wing) had to pause. Undergraduates crowded outside the Senate House where the University ceremony was held. Many of them had cameras and four or five, determined to get a good view of the ceremony, climbed into the huge bowl which stands on a pedestal in the court. 36 01 23c

1936 Queen Mary paid a surprise visit to Ely and spent an hour in the Cathedral. A man and his wife in the Cathedral noticed Her Majesty without being immediately aware of her identity. He remarked, however, on her 'likeness to the Queen' and the next moment was astonished to receive a gracious 'Good morning' from Her Majesty. Although she had mingled unnoticed with other visitors the news soon spread and there was a large crowd outside the West Door when her maroon Daimler left for Newmarket Jockey Club 36 08 24a (photo 36 08 25)

1936 There was an enormous demand for copies of the CDN containing official news of the King's Abdication. The first edition was on sale within minutes of the Speaker's historic announcement in the House of Commons. It contained a three-column sketch of the new King and Queen and an appreciation of 'Edward – the Man' together with pictures recalling his visits to Cambridgeshire. The Night Final contained many other interesting details about the crisis. Hours after this London papers were still being sold in the streets that contained only a brief announcement in the Stop Press columns 36 12 10 & b-e.

1936 The depressing fog hung over Cambridge like a gloomy portent of the sad news to come as people awaited the King's decision. Thursday afternoon (early closing day) brought shut shops and deserted streets to add to the atmosphere of depression. The usual football matches were in progress but the topic of conversation was about the Abdication crisis. The first to hear the news was the group gathered in the offices of the CDN awaiting the News Agency 'snap' messages. Shortly after three-thirty it came. Soon after the poster 'The King's Decision – Official' brought people into the streets eager for the latest news 36 12 10f

1936 All Cambridge listened to the farewell message broadcast by Prince Edward from Windsor Castle. At the Theatre Cinema an announcement was made that the feature film would be interrupted for the relaying of the speech by courtesy of the BBC. Just before ten the curtains over the screen were lowered. When they were drawn back a large receiving set was seen in the centre of the stage with a single spot-light shining on it. The lights were dimmed. A tense, almost painful silence fell on the audience. Suddenly it was broken. Sir John Reith was heard. 'This is Windsor Castle – His Royal Highness, Prince Edward' 36 12 12a

1936 King Edward VIII has abdicated. As Prince of Wales he came to Cambridge in June 1921 to receive an honorary degree and inspect Boy Scouts and Girl Guides. More than 5,000 children lined the route so they could catch a glimpse of 'Prince Charming' as he was called in those days. His last visit in June 1932 was to inspect the Leys School. There have been visits to the County, he opened Sawston Village College in July 1930 and reviewed the Royal Air Force at Duxford in 1935 36 12 10d

1937 Her Majesty Queen Elizabeth paid her first visit to Cambridge since her accession. Together with Queen Mary she made a number of purchases from Mr S. Woolston's antique shop. Although a private trip, word had got about and despite the drizzling rain a crowd gathered to cheer the two Queens when they arrived from Sandringham. Police had to institute a single-line traffic system to allow vehicles to pass the crush of people who surged round, cheering enthusiastically, when they departed en route to Exning for lunch. It was Queen Mary's fourth visit to the shop 37 01 16 ,6.3]

1937 Remarkably fine silken embroideries have been prepared for the embellishment of the thrones to be used at the Coronation of their Majesties King George VI and Queen Elizabeth. The King's throne is adorned with the Royal Arms while the Queen's also carried her newly-granted Bowes Lyon arms. The Cambridge Tapestry Company was entrusted with the work of embroidering the backs of the thrones. All the preliminary drawings on linen were made in Cambridge and the work was completed at the company's premises at Ickleford, near Hitchin 37 05 10

1937 Cambridge celebrated the coronation of King George VI with a decorated vehicle display on Midsummer Common. The entries hardly reached the standard of the Jubilee procession and the crowds did not seem to be quite so thick, but the right spirit was present. Modern decorations in the shape of coloured electric bulbs and weatherproof materials were utilised to the full with triple garlands spanning Market Hill and central streets. The war memorial and the colleges were bathed with floodlighting 37 05 12b

1937 Coronation programme – 37 05 11a

1937 Coronation Celebration rejoicing – 37 05 12a

1937 At the Coronation celebrations one small tent attracted probably more interest than any other with the possible exception of the tea tent. It contained a Pye television apparatus and during the afternoon many availed themselves of the opportunity of seeing the actual Coronation procession taking place. Although Cambridge is almost out of range of Alexandra Palace, everything came through very well. Almost the only interference was experienced when the motor racing was being held in the area only a few yards away 37 05 12b

1937 Crown Prince of Japan visits Cambridge – 37 05 18

1937 The King of Egypt arrived in Cambridge on the first visit he has paid to the town. He had been expected at Clare College at about six o'clock but was late as he'd waited for His mother, the Queen, who'd booked a suite at the University Arms Hotel. The King strolled about Regent Street and visited Barbara Fuller's dog shop where he purchased a wire fox terrier puppy which he played with in the college. Very few people knew of his visit which was to meet Egyptian students. About twenty were introduced to him, many being members of the Pharaohs Club. 37 06 01b

1945 Royal Shopper. — People who happened to be in St. Andrew's Street about noon yesterday had the pleasure of seeing Queen Mary, who paid a private shopping visit to Mr. Stanley Woolston's antique shop. Before Her Majesty arrived, there was only a handful or more people in the vicinity of the shop, but as her car drew up outside, the crowd rapidly grew and people pressed forward to catch a glimpse of the distinguished visitor, Queen Mary, who attended by Lady Cynthia Colville, from Sandringham, wore a pretty powder blue frock, a white coat with a large white fur collar and a small white hat. She wore pearl and diamond earrings. As Her Majesty re-entered the car later, the cheers and clapping went up from the crowds, and many people ran behind the car to get a last view of her as she drove for Exning. 45 08 24 CIPof; Queen Mary re-enters car after shopping visit to St Andrew's Street – CDN 1945 08 24

1945 Two young Ethiopian Princes, both direct descendants of the Emperor, paid a private visit to Cambridge on Saturday, when they were guests of the Vice-Chancellor. The Royal visitors were Prince Sachie Salassie, the 15-year-old son of the Emperor, and Prince Alexander Desta, aged 11, a son of the Emperor's daughter. They arrived at Trinity at midday, where they were received by Mr. A. Marcos, a third year Ethiopian student at the college, before meeting the Vice-Chancellor at Emmanuel and going on to lunch at the University Arms Hotel. Another relative Princess Aida, sister of Prince Alexander, will be coming to Cambridge to study at Newnham 45 09 07 CIPof

1946 Queen & Queen Mother visit Woolston's antique shop, only Queen's second visit – 46 01 28

1946 St John Ambulance association exhibition opened by Queen Mary of Yugoslavia – 46 07 02

1947 Visiting Cambridge today to attend a celebration associated with age - the 400th anniversary of the foundation of Trinity College - the King and Queen were greeted early by youth, represented by 6,000 Cambridge schoolchildren who cheered wildly as their Majesties drove along Station Road on the first stage of their journey. In several shop windows in the centre of town goods had been replaced a few minutes before the King and Queen passed, by assistants, etc, and the blue-frosted staff of Messrs Boots had a grandstand view from large packing boxes placed in the front entrance c47 06 03 [6.7]

1947 Although the Royal visit to Trinity College was mainly a University affair the women of Cambridge had an opportunity of seeing the Queen, aptly described during the recent Royal tour as British womanhood's ambassadress. The question, a natural one, many of the women were asking was "What was the Queen wearing". The Mayoress (Mrs F. Doggett) had the experience of waiting on the Queen almost throughout the day. She said that both the King and Queen asked many questions about the fen floods showing a real interest and sympathy in the difficulties of the

flood victims. She was impressed by the Queen's great charm. "She was untiring and knew just what to say to everybody", she observed c47 06 04

1947 Many people unable to be in their homes listened to the broadcast of the Royal Wedding in Cambridge cinemas, all of which were thrown open for the purpose, free of charge. The biggest audience is reported from the Central Cinema who estimated the total as being in the neighbourhood of 500. The sound equipment at the Regal broke down at the last minute and the small queue which had formed there was diverted to the New Theatre opposite, where a set had been hastily brought from his home and installed in the foyer by the Manager and the thrilling, impressive and historic service of the wedding of H.R.H. Princess Elizabeth, future Queen of England and Lieut. Mountbatten, Duke of Edinburgh, was heard by a number of people. Messrs Miller and Sons, Sidney Street, to meet many requests from customers, televised the proceedings in one of their studios, which was packed c47 11 20

1948 Queen Mother & Queen Mary visit Woolston's antique shop with Margaret [6.8]

1948 The Queen came to join in the celebration of the 500th anniversary of the foundation of Queens' college, Cambridge. Exactly on time the Royal car was seen coming round the last curve in the road from Hauxton and only the strong arms of the members of the Cambridge Police Force prevented the crowd from surging into the road. But even they were not strong enough to hold the crowd back once the car had stopped and within a few seconds it was completely surrounded so that Her Majesty, even if she decided otherwise, was forced to remain in the car 48 06 05 [6.9]

1948 Queen becomes first woman in history of receive Cambridge University degree, lunch at Christ's, visits Newnham & Girton [6.10]

1948 Queen Mary took Cambridge by surprise today when she visited the town on one of her private visits to Mr Stanley Woolston's antique store. At precisely noon the car containing the Queen slid into the kerb outside the shop. It was not her own car, however, but the Ely police patrol car. The green Daimler in which the Queen had been travelling developed a slight defect at Lt Thetford and Her Majesty transferred to the police patrol car following the Royal car. 1948 When the Queen stood before the Vice Chancellor in Cambridge Senate House today to receive the Honorary Degree of Doctor of Law she was not only a Queen receiving an Honour but also a symbol of the passing of a 700-years-old "tradition" in the university. For, during the whole of the University's history no Queen - and no other woman - has ever before had a degree conferred upon her, because until the recent changes in the statutes giving women full membership the conferring of such an honour was not possible. As the Queen entered the Senate House there was a burst of cheering and clapping. Her scarlet Doctor's robes and her black velvet doctor's cap, made a charming ensemble with the Cambridge blue shade of her dress c48 10 21

1948 As the Queen left Girton College yesterday evening, following her visit there, many students gathered in the drive made appropriate if unorthodox use of the gowns they now wear as symbols of their recently won rights to be full members of the University. They took off their gowns and waved them in farewell to the Royal lady, who in the morning had symbolised those new rights as she received in the Senate House the first degree to be conferred upon a woman in University history c48 10 22

1949 The Queen, Queen Mary and Princess Margaret arrived in Cambridge by road from Sandringham to visit Mr Stanley Woolston's antique shop in St Andrew's street. They were welcomed by an unusually large "arrival" crowd which had started gathering about half-an-hour earlier. The concentration of police in the area had a magnetising effect. The Queen wore a dress and coat of rich purple, with matching felt hat and sling-back skin shoes, and silver grey fox furs. The hat was trimmed with veiling and small purple flowers. The crowd swelled steadily until

there were several hundreds lining both sides of the pavements. The Queen was chatting when she walked from the shop to the car, and those nearest were honoured with the lovely, charming well-known smile 49 01 17 [6.11]

1949 Princess Margaret was present at the last night of the Footlights Review. Efforts had been made to keep the visit as private as possible. The two front rows of seats at the Arts Theatre remained conspicuously empty in a packed house. All faces craned towards the entrance as while the overture was playing the Royal party entered. The audience was on its feet in a second, and there was a spontaneous burst of clapping and a real cheer. The Princess, a petite girlish figure, looking serious and rather shy, was dressed with the utmost simplicity in an evening gown of deep pink tulle. She seemed to thoroughly enjoy the show c49 06 10

1951 Festival of Britain

1951 King grants City Status, King & Queen visit in April, met by Mayor (Capt Taylor of CDN) & celebrate 500th anniversary Kings & completion replacement stained glass window 51 04 27 [6.12]

1951 Honorary Degree for Princess Royal 51 07 02

1951 The Queen visited the Royal Show; her route took her through Grantchester where villagers welcomed the Royal car with a number of Union Jacks which hung from houses and hedgerows, and even the petrol pumps of a garage. Princess Margaret travelled as far as Baldock where she turned back because she had developed a bad headache. The town clerk's daughter, Rosalind Swift, who was to have presented Princess Margaret with a bouquet, handed it to the Queen who said she would see that it reached the princess. Obtaining one of the best views was a small patient from Addenbrooke's Hospital, Terence Harley who has unfortunately lost his hearing and the Queen's words to him were written down by his nurse 51 07 05

1951 The Queen and Princess Margaret came to Cambridge on a private visit to their favourite local antique shop. They came by road from Sandringham and the Royal car was half-an-hour later than expected. It was held up for five minutes in a traffic jam in King Street. The sight of uniformed and plain clothed police in the vicinity of Mr Stanley Woolston's shop drew a crowd to the spot and there were well over a hundred people-mostly women with shopping baskets – waiting when the Royal car drew into the kerb c51 02 09

1951 A Royal welcome greeted the King and Queen when they arrived for their visit to King's College chapel thanksgiving service for its restoration and the replacement of windows removed for safety during the war. The car flying the Royal standard drew up to the city boundary at Newmarket Road. Many mothers from nearby houses brought their children along with little flags and some enterprising onlookers climbed on to one of Marshall's buildings to get a bird's eye view. Carried away by their enthusiasm many toddlers continued to cheer and wave small Union Jacks long after the Royal party had passed c51 04 27

1951 The news that the King has been advised to take a complete rest was received in Cambridge with deep concern, because it raises the question "Will the King be able to visit the city, as arranged on July 5th?" His majesty had agreed not only to come for the Royal Show but to pay a short visit to the Guildhall in connection with the city's new status. All of us hope that the King will not have to add Cambridge to the list of cancelled engagements. In the meantime letters inviting a number of people to attend at the Guildhall have gone out from the Town Clerk c51 06 08

1952 With traditional pageantry Queen Elizabeth II was proclaimed from the steps of Cambridge Guildhall and inside and outside the Senate House on Friday morning. Some inkling of the news of the King's death had reached one or two people in Cambridge before the BBC announcement. As the news began to spread small groups of incredulous people stood discussing it in the streets. By mid-day Cambridge had become a city of flags. Gas Company men excavating in Park Terrace expressed their sympathy by fixing a Union Jack at half-mast from the

ropes surrounding the hole they had made in the road. At Pye Ltd's factory the machinery was stopped so that all the 2,000 employees could hear the announcement over the internal loud-speaker system by Mr L.W. Jones, Words Director. c52 02 08

1952 Long before the arrival of the ten-coach funeral train bearing the body of King George VI, large crowds had gathered at the main vantage points along the line at Ely to pay their homage. At the station crossing hundreds of people assembled on both sides, whilst lines of traffic extended for some distance. Heads were bared as the train rolled smoothly through the station. Workmen who had given up part of their dinner hour and American servicemen were amongst the crowds. At the little village station of Waterbeach about 100 housewives, farmworkers and children gathered. A crowd of more than 800 people lined the marshalling yards on either side of Mill Road bridge, Cambridge. The long black funeral coach, with all its windows blacked out passed exactly on time. Queen Elizabeth II gazed pensively out of a carriage window as the train passed a group of railwaymen standing caps off near Hills Road bridge. c52 02 14 52 02 06, 52 02 09, 52 92 11

1952 There are happy memories of King George VI's undergraduate days at Trinity college, Cambridge in 1919-20 when with his brother he sojourned at "Southacre" in Latham Road. In 1922 he unveiled the war memorial in Hills Road and attended the Royal Show at Trumpington & in 1932 he opened the new wing for children and private patients at Addenbrooke's Hospital. His last visit was last year when he attended the Service of Thanksgiving at King's College. c 52 02 14

1952 As the King's funeral procession was winding its slow way through London's streets, hundreds of Cambridge people at similar services in the city joined in Britain's mourning for her late Sovereign. City and County combined at Great St Mary's church where a separate University service was held later. About a thousand people filled the church. Most of the men wore black ties. The scarlet robes of City aldermen provided the one touch of colour; even the gilt of the maces was subdued by a draping of black. The service was relayed to an overflow gathering in the Guildhall. A crowd of some 300 people gathered on the Market Place for the two minute's silence. As the maroon exploded men removed their hats and heads were lowered. c52 02 15

1952 The visit to the University of Cambridge by the Duke of Edinburgh was enriched and enlivened by the reception which the young consort received at every stage of his tour. It was a "dusk and darkness" tour but the car's interior lighting was on and the crowds had a clear view of the slim, fair-haired Duke. The outstanding items in the programme were the conferment of the Honorary Degree of Doctor of Law upon the Duke at the Senate House, his opening of the new laboratory at the University Engineering Department and his visit to the University Union where he was made an honorary member. The Duke left a happy memory of an unassuming young man with a ready smile and a keen and intelligent interest in all that he saw. c52 11 14

1953 Queen Elizabeth the Queen Mother, accompanied by Princess Margaret, paid a surprise visit to Cambridge to call at Mr Stanley Woolston's antique shop in St Andrew's Street. News of their coming was a secret, but a handful of people appreciated the significance of the 'No Waiting' signs & when the sleek Royal car drew up a crowd of about 200 had been attracted to the scene. The Queen Mother, fresh and charming as ever, returned the cheers of the crowd with a smile and a friendly nod. Princess Margaret, demure, attractive and smiling followed her mother into the shop which has now enjoyed Royal patronage for a great many years. 53 01 20

1953 Bad weather delayed the Royal Car when Queen Elizabeth the Queen Mother came to Cambridge to visit depots where clothing is being stored for East Coast flood victims. She visited the hangar on Madingley Road in which is stacked some 400 tons of clothing sent by post, road and rail from all parts of the country. There she watched undergraduates unloading lorries, saw the clothing being sorted and then went to the canteen where she accepted a beaker of tea, declining sugar. Then she walked into the open to see the Soya boilers used to provide hot meals.

During part of the time in the shed Her Majesty was under the glare of television cameras which were recording the proceedings. c53 02 14

1953 Amid the nation-wide sorrow at the death of Queen Mary, the sadness of the people of Cambridge is of a deeper and more personal nature. For this City has known her not only as a gracious lady but also as a charming, friendly and human personality. For more than 20 years she came at frequent intervals to call at Mr Stanley Woolston's antique shop and the people of Cambridge came to accept it as a normal part of the city's life. But the news was sufficient to cause a flutter of excitement and to attract a crowd to St Andrew's Street to demonstrate their affection. c53 03 24 [3.12]

1953 Marshal Tito paid a surprise visit to Cambridge; police took stringent security measures and many people were surprised to see a fleet of a dozen cars, escorted by police patrolmen on motor-cycles, sweeping along the streets. It was not until late in the afternoon when it became known that the distinguished visitor was the Yugoslav President. At the University Library Special Branch detectives screened all visitors in the most stringent security measures ever undertaken on the visit of a foreign statesman. He then visited the Engineering Department and Downing College. 53 03 19

1953 King Hussein of Jordan had a flight in a helicopter, saw the beauty of King's College Chapel and had dinner at Trinity college during a short visit to Cambridge. His first engagement was a visit to the Bourn works of Pest Control Ltd and as his car covered the last mile to the entrance it was escorted by a crop-spraying helicopter keeping pace 50 feet overhead. News that the locust threat in his own country has become very grave increased the importance of a demonstration of methods employed in the destruction of the pest 53 03 21

1953 With a rosy glow reflected on the windows of Great St Mary's church, a University, City and County congregation paid their last respects to her late Majesty, Queen Mary. While the beautiful gaunt notes of the Dead March in Saul rang through the pillared church there was a silence so complete, so moving as to be perhaps the loveliest and most memorable part of Cambridge people's memorial to the late Queen. Then led by the Mayor and Corporation the congregation melted out into the brightness of a fine March day. 53 03 25

1953 Flags fluttering in the breeze, decorations in traditional colours lining the streets, special shop window displays – these are but a few of the features which have given the city of Cambridge the Coronation look. The city centre, already a scene of gaiety and colour, heralds the approach of next Tuesday's great event. In roads radiating from the centre, decorations to shops and other buildings are being arranged. The majority of householders prefer to wait a little longer. For them D-Day, with the 'D' standing for Decoration – will be some time this weekend. The cost of decorations is an important consideration for many and consequently the emphasis is on effect rather than on elaboration. c53 05 28

1953 In cold, blustery weather the City of Cambridge put on a brave show in celebration of the Coronation Day of Queen Elizabeth II. Despite the almost wintry conditions the extensive and varied programme was carried through practically unchanged. Everything testified to the magnificent spirit of the occasion and the unanimous desire of the people of Cambridge to make their contribution to the world-wide acknowledgement of this great day. For much of the time it was a matter of celebrating briefly and then dashing for shelter under the trees or in marquees from another downpour c53 06 02

1953 Coronation shown on 4 foot screens in Guildhall, motorists asked to keep away so as not to make interference 53 05 09

1954 A crowd of about 100, including a fair sprinkling of undergraduates, saw Queen Elizabeth the Queen Mother and Princess Margaret arrive at Stanley Woolston's antique shop in St Andrew's Street, Cambridge on one of the private shopping visits which they so often make while at Sandringham. The Royal Party remained inside for an hour and during this time one of the biggest crowds to be seen had collected. The pavements on both sides of the street were a

solid mass of people and shop assistants took up vantage positions in windows overlooking the scene. The mid-day meal must have been late in many homes judging by the number of housewives with heavily-laden shopping baskets who stood in the crowd. 54 01 13

1955 Queen of Jordan visits Girton college [55 06 23]

1955 King Feisal of Iraq paid a private visit to Cambridge as the guest of the Vice-Chancellor of the University. He arrived late because of fog and after lunching at Christ's College visited the Wren Library at Trinity and the Fitzwilliam Museum. He then travelled to Marshall's airfield where he displayed keen interest in a Venom IV jet aircraft and the Comet jet and Viscount turboprop airliners. In the Royal party was Mr Tariq Al Askari who was at Cambridge as a student 55 10 12b

1955 A tremendous welcome greeted the Queen as she arrived at Cambridge station. Crowds had been waiting in the rain for over two hours and school children were tired of the delay. The glass roof of the station platform sprang a leak and a man was sent aloft to cover it with green waterproof. Exactly on time the train drew in and Her Majesty stepped gracefully onto the platform. The women onlookers gasped as they took in the details of her dress, a fitting emerald green coat with black fur collar, green hat and black handbag. 55 10 20a

1955 A crowd of several thousands massed in Cambridge Market Place as the Royal procession moved slowly towards the Guildhall. The Queen looked radiant as the Mayor (Ald E. Halnan) presented her with an Electryte Cardiograph adapted by a local firm to monitor the heart of her thoroughbred racehorses. She thanked him warmly saying "this ingenious machine will be put to good use". Then she made an appearance on the balcony, waving to the crowd who cheered back. 55 10 20b

1955 There was heavy rain as the Queen and Duke of Edinburgh. arrived for the ceremonial opening of the new Veterinary School where a batch of undergraduates lay down their gowns in a Sir Walter Raleigh act. The Queen was much taken and amused but her private detective, fearing that Her Majesty might trip on the loose gowns, asked for them to be taken up. But a loud cheer greeted the her smile at the gesture. 55 10 21a & b

1956 Crowds several hundred strong massed to see the Queen Mother and Princess Margaret as they visited Stanley Woolston's antique shop in Cambridge. As news of the surprise visit spread hundreds of girls from shops and offices set out to cheer the Royal visitors. Police fought to keep the road clear but every time they cleared a space another group of women moved in. The Queen Mother expressed concern about the future of the business – he must leave by June because of building plans for the site – saying "We want to know where we can come and visit you". 56 01 18

1956 Many people who joined the large crowd outside Mr Stanley Woolston's antique shop did not know who they were waiting for but were quite willing to tag on the end. The minutes ticked by and a group of shop assistants who were due back on duty and had missed their lunch in the hope of seeing the Royal visitors had to leave. The tension was made worse by the frequent appearance of the chauffeur who carefully stowed small packages away in the boot of a maroon limousine. When the Queen Mother and Princess Margaret finally appeared it was a wonder they were not crushed. Within two minutes the street was deserted. 56 01 20a

1956 The Duchess of Gloucester visited Cambridge to open the Red Cross Society Bazaar. There were nearly 100 people waiting as her train arrived at the station but her progress to the Guildhall by car went almost unnoticed. Even at the Market Place there were few more than the usual afternoon shoppers to see her welcomed by Lady Spens and the Mayor, Counc. C.E. Ridgeon. She toured the stalls and met Mr P.J. North, a Red Cross member for 50 years. 56 11 29c

1957 Queen Elizabeth the Queen Mother opened a new wing at Homerton, a women's training college which prepares students for teaching in primary and secondary schools. She walked along

the main entrance driveway passing groups of pretty girl students making a gay sight in their brightly-coloured cotton frocks. 57 05 29 & a [6.13]

1957 Two groups of Cambridge people, one small and ageing, the other large and young will always carry vivid and happy memories of Princess Margaret's visit. One are the happy band who are passing away their 'twilight years' in the comfort and beauty of Langdon House, which she officially opened. The other are the young families who live on the new housing estate at Arbury Road where the foundation stone of a new church was laid. The Princess came into their midst, laughing, joking and chatting with them, radiating her charm and personality wherever she went. 57 08 01c & d & e & f

1958 Princess Margaret was described as a person who could 'blend approachability with majesty in a wonderful way' when she received an Honorary Degree in the Senate House. Looking radiant and beautiful, dressed in a brilliant mauve velvet coat, she was given a rousing welcome by thousands of cheering schoolchildren as she drove from the station. Later she opened the new Chemical Laboratories in Lensfield Road 58 11 06 & abc, 58 11 07 & bc

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Queen Elizabeth the Queen Mother opened Angel Court, the new extension to Trinity College built to ease the student accommodation problem. She travelled by normal passenger train and was fifteen minutes early arriving at the college where she showed interest in some of the ancient pottery discovered during excavation work. Later a crowd of several thousand people gave her a rousing send-off as her special launch left the forecourt of the Pike and Eel at Chesterton to take her to watch the May Races on the River Cam 60 06 08 & a [6.14]

1961 The Queen Mother opened the new Erasmus Building at Queens' College designed by Sir Basil Spence and West House, a new block of classrooms and living accommodation at the Leys School. By joining it on to the existing range of squash and fives courts opened by the Prince of Wales in 1932 it has created an attractive court with a fine view of Coe Fen and the River Cam. Now all boys can move into a study after two years in the common room. There is a penthouse for two bachelor masters which could provide accommodation for nursing staff in the event of an epidemic. 61 06 05 & a, 61 06 06 & a & [8.13]

1961 Queen Mother visits Royal Show by helicopter – 61 07 06

1962 The Queen arrived in Cambridge to a fanfare of trumpets and over 2,000 people stood in the biting wind to welcome her as she opened the new Addenbrooke's Hospital. With Miss M.M. Puddicombe, the hospital matron, she walked past a line of nurses to the marquee where the ceremony was held before touring various wards speaking to patients. Later the Queen visited King's College chapel to see the newly-installed Rubens painting and toured the Papworth Village Settlement 62 05 28 & a 62 05 29a

1963 Princess Margaret and the Earl of Snowdon came to Cambridge to watch television cameras and electronic equipment being made at the Pye factory, St Andrews Road. A small industrial closed circuit television camera was trained on them when Lord Snowdon asked to have a go. The Princess then focussed it on a group of press photographers. A great burst of cheering went up when Lord Snowdon went over to attractive Mrs Jean Keeble who was working on a television assembly line. "I was absolutely thrilled", she said. Later they took a voyage on the Cam on Viscountess Bury 63 07 24 & a

- 1970 Prince Charles awarded BA, maiden speech at Union Society on technological advance, Lord Mountbatten present – 70 05 13
- 1973 Queen Elizabeth, the Queen Mother, relaxed and obviously enjoying her visit to Wesley House, Cambridge, delayed part of her programme to talk to more members of the college than planned. The six-year-old daughter of the Senior Tutor - Rosemary Skinner - showed a marked reluctance to hand over a posy of flowers to the Queen Mother, but the three-year-old son of the college students' chairman decided to make his own impromptu and unscheduled offering of a potato crisp. And watched by the Lord Lieutenant, the university's divinity professors and a host of other dignitaries young John Oglesby persisted and all the assembled guests had to wait their turn. The queen Mother, in a grandmotherly way, accepted his gift with thanks and a brief chat 73 06 14
- 1973 Queen Mother visits Leys school [4.12,6.19]
- 1973 Duke of Edinburgh opens Churchill archives centre [73 07 26]
- 1975 The Queen Mother opened the new £½-million extension of the Fitzwilliam Museum. The Royal visitor, dressed in a pale-blue turquoise coloured outfit, paused several times to smile and wave to the crowd before being introduced to Museum staff by Prof Jaffe. She had a good look at the £2½ million collection of Cambridge plate on display and after tea she was driven to a waiting helicopter on the playing fields of St John's college 75 07 22 [6.20]
- 1975 Hundreds of people crowded around the entrance to the Senate House to watch Prince Charles arrive in academic cap & gown to collect his MA Degree. They waited patiently for 20 minutes when he emerged again after the ceremony. But the formal schedule of his procession was broken when Mrs Phyllis Hepburn, a friend from his student days, hailed him from the crowd. The Prince turned and stopped to chat with her. She said he used to come to her home in Millington Road to play in a string quartet 75 08 02

1975 Princess Anne, making her first official visit to Cambridge, insisted on an impromptu chat with some of the thousands of sight-seers who thronged the city centre Lion Yard shopping centre. An estimated 10,000 people packed the Market Square and stood eight deep each side of Petty Cury as she walked into the new shopping centre. She stopped to talk to the delighted shop girls who were crowding their doorways and also to the eager shoppers who pressed forward to get a closer look at her. She explained: "I am not a complete stranger here because I have been shown around the university and city unofficially by two previous students who are both fans of the old city" c75 12 05

1975 Large crowds turned out to see Princess Anne wherever she went in Cambridge during her visit yesterday. Inevitably the criticisms that have been voiced about the architecture of the Lion Yard were referred to during the formal speeches. The city council's Labour leader, Coun Peter Wright, spoke of the 'dissension' which still existed over the complex. And Princess Anne, who declared herself a "VI – that means very independent" observer of the architectural scene, said she would report back on the project to two "former students" at Cambridge University when she returned to London c75 12 06

1976 Prince Philip is now the strongest contender for the Chancellorship of the University. Informed sources have disclosed that Prince Charles was offered the post but turned it down because of his naval commitments with HMS Bronington. Lord Ramsey, former Archbishop of Canterbury, is thought to have declined the invitation while Mr Selwyn Lloyd, recently retired speaker of the House of Commons, is still regarded by many dons as too close contemporary politics to command unanimous support. Prince Philip has for many years maintained a close formal and informal interest in Cambridge and has seen Cambridge life from the student viewpoint through unannounced visits while Prince Charles was up at Trinity c76 02 12

1976 Prince Edward bids farewell to Cambridge – interview 86 06 27a & b

1976 Princess Margaret whisked around Cambridge on a brisk visit. At the Arbury Estate many local people stood out in the rain to welcome her. The royal party then left for Langdon House, which she had opened during the previous visit where she met Mrs Francis Aldrich, the longest-serving member of staff. By now she was 15 minutes ahead of schedule for her visit to the University Clinical Medical School. "It threw us into panic stations" said the Secretary, Mr J.P. Howe c76 10 30 visits Good Shepherd, Langdon House etc [76 10 29]

1977 Duke of Edinburgh succeeds Adrian as Chancellor of University [77 05 18]

1977 Duke of Edinburgh opens University Music School [77 10 12]

1977 Thousands of people attended Cambridge's main jubilee celebrations – rustic games, music, a river boat procession and fireworks – on Midsummer Common. For the women there was a supermarket trolley race won by a team from Robert Sayles. Rain dampened the start of the carnival but large crowds gathered to watch the jubilee games and the procession of decorated motor boats which followed. The evening was rounded off by a fireworks display and there were cheers when the final set piece spelling out "ER II rules OK" was lit. At Thriplow a "Royal Show" included smashing the Royal Doulton, donkey rides from Anne's Riding Stables and a "Royal Free Hospital" blindfold stretcher obstacle race. 77 06 07

Jubilee celebrations include pole race, supermarket trolley race, fireworks, beacon lit Castle Hill, civic procession, Arbury carnival procession [4.1]

1978 Queen Mother visits Girton college [6.21]

1978 Princess Anne was mobbed by student demonstrators when she arrived at the Cambridge Union Society Rag charity debate. She was held up outside the door by demonstrators sitting in her path and screaming abuse. They were protesting that the motion "The woman's place is in the harem" was sexist" and none of the abuse was directed personally against the princess. Nearly 150 demonstrators representing a variety of student groups including Gay Cambridge, Anarchists

and Men Against Sexism picketed all entrances to the building. Other guests ran the gauntlet, Derek Nimmo was spat on and Robert Morley was catcalled and buffeted. c78 03 10

1978 Prince Charles parried questions on his success with women when he spoke at the Cambridge Union. "I often think my best way out is to announce my engagement to Gladys Thrumm. The wedding presents would arrive and then I would call it all off and then I could be free to go about and see all sorts of people", he said. He was presented with a bath plug mounted on a wooden shield which came from the rooms he occupied when a student at Trinity College. It was signed by Mrs Florence Moore who cleaned the rooms and was in the audience. c78 11 10

1979 Princess Margaret made an unscheduled walk to one of Cambridge's oldest churches, St Peter's on Castle Hill. It followed her visit the University's Gallery of Modern Art at Kettle's Yard, which was opened by Prince Charles in his undergraduate days. She saw a model of the proposed extensions which if approved would double the exhibition space and provide refreshment facilities for the public. Later, at her own request, she saw a class of medical students at work in the University Department of Physiology. 79 05 15

1979 Prince Charles opens Cambridge Consultants building [79 08 02]

1980 Duke of Edinburgh opens Lion Yard law courts, visits Library [80 02 27]

1981 Newmarket millionaire David Robinson today announced he had given an extra £1 million to the college he founded. The news came shortly before the Queen and Prince Philip arrived in Cambridge to formally open it. But Mr Robinson did not attend the ceremony as he did not feel up to it. He is very frail. But 2,500 employees of the Cambridge University Press took tea with the Queen after she opened their new Edinburgh Building. 81 05 29, 30

1981 The Royal Wedding had millions glued to their television sets but in side streets and back gardens revellers found a variety of ways to toast Charles and Diana throughout the rest of the day. In De Freville Avenue residents sealed off two streets and several hundred tucked in to tea, at Impington children of Station Road held their 'street party' indoors – the village hall had been booked in case of bad weather. Tea at Home Close old people's home at Fulbourn was a very English affair with handbell ringers and croquet on the lawn. 81 07 30b

1981 Flo Moore was back at work at 4 am today as a char-lady at Trinity College after three dazzling days that took her from Buckingham Palace to St Paul's and then the television studios. They were guests at the Royal Wedding and saw all the ceremonial but, she said "All I want to do now is put a bag over my head like they do to Bernie's parking meters when they're out of order": her husband empties parking meters for the city council. 81 07 30a

1982 Duke of Edinburgh makes first helicopter landing on Parkers Piece [82 05 19]

1982 When the Queen Mother opened St Paul's Church of England Primary School, Cambridge, she went from class to class, looking over the shoulders of the children as they continued their work. Three infant classes showed her their Captain Cook project, their dressing-up clothes, demonstrated how a canon works and gave an impromptu music lesson. Some were too busy to talk; one hurried busily up to the teacher with a problem: "I have to do his braces for the loo", she told the Queen Mother. "Oh that's much more important", she replied. 82 01 29a

1983 Fleet Street's royalty watchers were out in force as Prince Edward started his studies at Cambridge University. Television crews, reporters and cameramen from almost every national newspaper were permitted inside the grounds of Jesus College for the Prince's arrival. Amongst them was the Sun photographer Arthur Edwards who outraged the Palace with his 'bikini pictures' of the Princess of Wales before the birth of Prince William. 83 10 03 p10, 83 01 18

1983 Jesus College could be turned into a fortress to stop reporters pestering Prince Edward and his fellow students. One student found a reporter sitting on her bed when she returned to her room and two undergraduates have been asked to pass on information. One photographer has been caught with a long-range lens on the fourth floor of a carpark. He had been trying to spy on the rooms of Edward's fellow undergraduate who will be playing the leading lady opposite the Prince in 'The Crucible' 83 11 07 p5

1984 The Queen gave her royal seal of approval to Cambridge's multi-million pound Grafton Centre when she unveiled a plaque to mark its official opening. Cheering crowds queued for hours to glimpse her. A fanfare performed by the 20-piece orchestra from the Manor School greeted the royal party. After the opening the queen spoke to many of the children and shop staff. 84 05 16 p12

1984 Hundreds of people turned out to greet the Queen when she unveiled a plaque at the opening of the multi-million pound Grafton Centre. Earlier she met youngsters at the ITek technology centre and made blind teenager Maria Freeman's day by stopping to chat with her as she typed on a special machine invented by the manager, David Battison. Both Queen and the Duke of Edinburgh planted trees at Emmanuel College to mark its 400th anniversary, though Philip quipped "I'm the kiss of death as far as tree planting is concerned" 84 05 17 p9

1984 Astonished shoppers saw Prince Edward sipping champagne in Kings Parade and shouting at young people dancing on the roof of a taxi. It was his off-beat way of letting people know about the charity show he is producing for the University Rag Week. But his elaborate publicity stunt almost flopped when he failed to find the old London taxi he needed. So he asked the News for help and as a result Londoner Maurice Hamilton made a special trip to Cambridge with his cab. 84 03 03

1985 An aircraft carrying the Princess of Wales made a dramatic touchdown in Cambridge in a blinding snowstorm. Diana, wearing a red coat, stepped from the plane to a freshly-cleared patch of runway. Then her driver battled through traffic-clogged city streets to get the snow Princess to Peterhouse where she was met by flag-waving students who braved the appalling weather and saw a demonstration of research work into cot deaths. 85 02 08

1985 Princess of Wales visits Foundation for study of infant diseases [85 02 09]

1985 The Prime Minister of China, Mr Zhao Ziyang, came on a whistle stop tour of Cambridge – but found it so tiring he had to leave after lunch. It began with a formal welcome at the University Senate House where Chinese students gathered to meet him and he was presented with a book by the Vice-Chancellor. He then went to the School of Oriental Studies where he met Prof Joseph Needham, a world authority on China, and presented the department with 3,000 valuable volumes. But he decided to miss a visit to the Science Park. 85 06 8a

1985 Princess Anne, Prince Edward and Prince Philip all together at Jesus College – 85 06 14b & c

1986 Prince Edward battles to save Cambridge Youth Theatre – 86 06 12a

1986 Clown Prince Edward had a right royal audience as he trod the Cambridge boards for the last time as an undergraduate. To the amazement and delight of the Arts Theatre audience, his brother Prince Charles, cousin Lady Sarah Armstrong-Jones and Prince Andrew's fiancée Sarah Ferguson, made a surprise visit to the comic show. They watched him caper through comic sketches, musical numbers and songs with the rest of the Cambridge University Light Entertainment Society cast then spent 45 minutes backstage before leaving for London 86 06 16

1986 The bunting was out and champagne corks popped as Sarah Ferguson and the new Duke of York tied the Royal Knot. Everyone from Brownies to Cambridge office workers were in the mood for a patriotic fling. At Addenbrooke's Hospital there was a festive air as celebrations started in every ward and elsewhere dances and even a mock wedding reception were the order of

the day. Flags were strung across Roselea in Impington where one of several street parities went with a regal swing. 86 07 24a & b

1987 Queen distributes Maundy money, Ely Cathedral – 87 04 16

1987 The Queen Mother became just another Cambridge tourist for a few moments – and won cheers from a waiting crowd. She paused on the famous Mathematical Bridge to wave to a convoy of four punts chained together as they passed gracefully along the Cam. She was visiting Queens' College to mark the restoration of the President's Lodge, the only half-timbered college building in Cambridge. Lunch – at a college which is now health-conscious in its cuisine – was melon and king prawns, then chicken and truffles. 87 07 23

Enid Portor at Folk Museum

headlines

1897 Sometime in the course of Tuesday night a desperately determined attempt was made to obtain entrance to the Fitzwilliam Museum. which in its invaluable pictures, its gems, and its magnificent collection of articles of ancient and modern art would, if successfully broken into, yield a rich harvest to intelligent burglars. A place so full of objects of art and interest is of course well guarded, and well prepared for the visits of disciples of Bill Sykes. So the unwelcome ones found who made the attempt on Tuesday night, for after trying two doors and five windows, and using no small amount of violence they had to relinquish their efforts and go empty away. So far as we have been able to gather this is the first attempt which has been made to forcibly break into the Museum in the course of its history c1897 08 18

1905 Cambridge rating committee considered the University's Sedgwick Geological Museum. As it was a memorial and not a commercial speculation some difficulties arose. It had cost more than required for business purposes with materials of the very best character, thicker walls and a good deal of superfluous work. There could be no other tenant. The land had been purchased from Downing College at an exorbitant rate - £6,800 per acre. Then there were the specimen cases, should they be considered in the valuation. A museum without cases was no more a museum than a factory was complete without its machinery. 05 01 06

1907 An extraordinary University report recommends the Director of the Fitzwilliam Museum should be present at least three hours a day when it was open, keeping a diary recording his hours to be placed before the Syndicate. It was an indignity - but all other professors had to make similar returns. His salary should be decreased from £300 to £250 and the money used to pay for another member of staff. This valued his time at seven-and-sixpence an hour compared to ten shillings for an Assistant 07 06 20

1908 Fitzwilliam Museum statue of Duke of Devonshire unveiled – 08 05 13

1910 The foundation stone of the first block of the new Museum of Archaeology and Ethnology at the corner of Downing Street and Tennis Court Road was laid by the Baroness Von Hugel whose husband is the curator. The ceremony was a very quiet one and the proceedings were very brief because of the death of the King. In a cavity under the stone was placed a bottle containing a couple of newspapers and a number of current coins of the realm. 10 05 20

1910 Two undergraduates were charged with stealing three surveying instruments, the property of Professor McKenny Hughes, curator of the University Geological Museum. A glass case had been broken open and two instruments taken. They had later been found in the students' pockets and their fingerprints were on the glass. The lads said "We had a bet of £5 that some instruments could not be got". The Professor told the court he wished to offer no evidence: it was a matter that could be dealt with by the Vice Chancellor 10 12 09a

1911 Undergraduates charged theft from Geological Museum – 11 01 20i & 20j

1914 The Financial Board have been negotiating with the Master and Fellows of Peterhouse for the purchase of the site, nearly two acres, adjoining the Fitzwilliam Museum known as Grove Lodge, and they now recommend its purchase for £12,000. They further suggest that only one-half of this sum be taken from the Marlay bequest of £80,000 the balance being charged to the fund from the sale of Mr. Marlay's house, known as St. Katharine's Lodge, Regent's Park. 14 02 27 CIPof

1914 W.B. Redfarn Milton Hall museum includes gloves worn by Cromwell and King Charles II, Cromwell's snuff box & spectacles and pieces of armour from every century 14 06 04 p7

1924 Fitzwilliam Museum Marlay Galleries open : Charles Brinsley Marlay, d 1912, greatest benefactor since foundation; Grove Lodge property adjacent Fitzwilliam purchased from Peterhouse & extension built [62 06 14]

1928 Cambridge University has lost yet another distinguished son, by the death of Baron von Hugel, founder of the University Catholic Association. In 1883 he was appointed curator of the Museum of Archaeology, to which he had presented a unique collection of Fiji war instruments. Then commenced a period of service which will never be forgotten. He raised the money required for a new building and played a prominent part in the collection of local antiques, carrying out

extensive excavations at Girton. During the War the Baron took charge of the Belgian refugees in Cambridge and received a medal. c28 08 14

1931 Fitzwilliam Museum Courtauld gallery opened [31 04 RevYr]

1932 The visit of Her Majesty, Queen Mary, was kept a close secret and her car was temporarily held up near Northampton Street traffic lights. But the news quickly spread. Later she visited the Fitzwilliam Museum where she consented to be photographed under the picture of Cambridge that she had presented. 32 07 15g

1932 Residents in Little St Mary's Lane narrowly escaped injury when the chimney-stack of the Museum of Classical Archaeology was struck by lightning. Its extensive double glass roof was completely wrecked and two plaster casts of classical figures were slightly damaged. One brick struck the floor with such force that it rebounded on to the base of a model, which it chipped. 32 08 26i

1933 Sir – in my old curiosity shop in Trumpington Street I have formed a museum of prison, punishment and other interesting relics, many of which have come from our old Cambridge prisons. They include the clothes, mask, pistol and spurs of Dick Turpin which were left at the Three Tuns Inn, Castle Hill, on the eve of January 12th 1739. I would welcome any items connected with village punishment or an old police uniform with the beaver top hat – E. Rutter 33 09 14

1934 Councillor Peck suggests Folk Museum [34 11 03 TT]

1934 Mr E. Rutter of the 'Olde Curiosity Shoppe', Trumpington Street, has purchased a razor which belonged to King George III. It will be added to his other 200 interesting relics that include a Bible dated 1633 which has covers worked in needlework by King Charles I's wife and a pair of very fine silk stockings bearing the royal crown, which were worn by Queen Victoria. He also has a warrant issued by Oliver Cromwell and a cockade worn by Lord Nelson. He attempted to buy the Eton flogging book but that sold for the remarkable sum of £450. 34 01 06

1934 Two of W.B. Redfern's collection of Cromwellian relics have returned to Cambridge. A pair of grey gauntlets and a pair of spectacles in their original fish skin case which belonged to Oliver Cromwell were purchased by Edwin Rutter and added to his museum at the Old Curiosity Shop on Trumpington Street. 34 06 30 [34 06 30 TT, 34 11 17]

1934 Oliver Cromwell's hat is to stay in Cambridge. When put up for auction last April it was withdrawn at £25. But now it has been purchased by Mr E. Rutter of Ye Olde Curiosity Shop and Museum, Trumpington Street. The hat has a very large flat brim and tapering crown. It has been handed down through several generations of the Constable family who ran a very old established hat maker's business where Cromwell left the hat when he was up at Sidney Sussex College. It will be placed alongside other Cromwell relics including his gauntlet gloves and spectacles. 34 11 17c

1934 Scott Polar Research Institute opened 34 11 16

1935 A folk museum may be established in the old White Horse Inn following a meeting called by Cambridge Rotary Club. It should be a town and county museum for objects of local interest. Dr Palmer offered some of the items which had accumulated in the attic of a house where his ancestors had lived for 300 years. This was only the beginning: the ideal folk museum should be in the open, a space in which old cottages, smithies, a windmill and other things could be shown. 35 10 28 & a

1936 Fitzwilliam Museum extension to open [36 05 09 TT]

1936 The new Folk Museum which is to be opened in Cambridge shortly will not be filled with glass cases containing stuffed birds. The rooms will be authentically furnished – one visitor to the bar-parlour even asked for a pint of bitter. It was unfortunate that the front of the old White Horse Inn had been modernised 25 years ago, but interesting old beams were revealed after the interior walls had been stripped of many layers of paper. A modern fireplace had been removed and electricity installed. They now need everyday objects, craftsmen's tools, toys and an old smock, Mr Saville Peck told Rotarians. 36 09 23

1936 Folk Museum receive toll board from cottage at Clayhithe – 36 10 07

1936 The Cambridge and County Folk Museum at the old 'White Horse Inn' was opened in the presence of a large company. It would become a clearing house of information on local matters in a town where there is more information about Papua than Pampisford. The Corporation had handed over its old measures, the steelyard used at Stourbridge Fair and the High Constable's stave while the Public Library had loaned portraits and caricatures to give a human touch to the museum. Miss Catherine Parsons has accepted the position of honorary curator with Reginald Lambeth as custodian. 36 11 04b & c

Keynes – CDN 1945 06 15. 1973 conveyance to City council [5]

1947 The annual report of the Fitzwilliam Museum begins by recording "the nine most dangerous and difficult years of its history. The collections had to be packed and removed in 1939 to places of safety as remote as Wales and Cornwall where they remained until they could be gradually be brought back to Cambridge six years later. The Museum itself and those of its possessions too frail to be moved had meanwhile to be protected. By the Spring of 1940 the museum reopened with the first of more than 40 exhibitions arranged during the war, although deprived of all the fit younger members of staff. By 1944 the Museum had more visitors than in 1937 or 1938. The Museum had finally to be restored to order before members of the staff away on National Service had returned. c47 08 18

1950 Cambridge councillors decided not to take over Abbey House and assume responsibility for its future after the Folk Museum had raised £2,000 to effect the transfer of the Museum there from the old White Horse Inn. The house contains some very fine rooms suitable for display of exhibits but would mean they had to rehouse the families now living there. There was no doubt that in ordinary time the council would have been able to take the Museum over but it could not take on anything at the present time because they are so hard up c50 10 23

1951 Whipple Museum opened : Robert Whipple, chairman Cambridge Instrument Co amassed extensive antiquarian collection scientific instruments & books, gave to University 1945 with money [51 05 08, 4.5]

1951 The Whipple Museum of the History of Science was opened by the Vice Chancellor. The collection was presented to the University in 1944 and was stored in boxes in the Fitzwilliam Museum until 1948. It was at first proposed to create a museum in the former Shorts Factory on Madingley Road, but this was rendered unusable after Pye's fire. The present premises in Corn Exchange Street became available in May last year and it has at last been possible to show a large part of the collection. Amongst the guests was Mr Robert S. Whipple, the founder of the collection c51 05 10

1953 Mr Robert Stewart Whipple has died at his home in London, at the age of 82. In 1898 he became private assistant to Horace Darwin, the founder of the Cambridge Scientific Instrument Company, later becoming a joint managing director until his retirement in 1935. Noted for his studies of the history, development and manufacture of scientific instruments he presented his large and varied collection of instruments and books to the University of Cambridge. This formed the nucleus of the Whipple Museum of the History of Science that opened in 1954 c53 12 19

1955 A new room for exhibitions and storage of water colour paintings was opened at the Fitzwilliam Museum. It consists of a gallery and a small reference library for the benefit of serious students of art. It was largely funded by a gift of £10,000 from the executors of the late Walford Graham Robertson who was one of the greatest collectors of the work of William Blake and gave the museum six important works by him which are now on show 55 05 06a

1956 The Fitzwilliam Museum which strikes visitors by the carpets on its floors and the flowers in its rooms, has now newly decorated its Lower Marlay Gallery with pastel shades of pale mauve and yellow for the ceilings and white for the walls. The museum's porcelain which used to stand on the extensive landings at the top of the stairs is now seen to better advantage. 56 08 23c

1958 A little two-bedroomed cottage should be built for Enid Porter, the Curator of the Folk Museum, councillors agreed. The five-bedroomed flat they'd allocated as emergency accommodation was condemned property; it was just a mass of corrugated iron which spoils the

beauty of Northampton Street. It would be an insult to offer it to her and should be used to relieve the housing problem for a larger family 58 07 25a

1959 Folk Museum objects 'thrown away' – Lambeth; Folk Museum objects discarded – 59 04 25b

1959 Dr David Diringer has established a unique Alphabet Museum in the back garden of his home in St Barnabas Road. What looks like an extra-large garden workshop contains a treasure house of the alphabets of the word and all forms of writing, the result of 35 years of research. Dr Diringer, whose subject is Semitic Epigraphy, hopes to hold seminars there in the study of alphabets and writing. 59 05 23, 59 06 10

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 The Alphabet Museum in Dr David Diringer's St Barnabas Road garden is unique. Somewhere in the world there had to be repository devoted to all the means man has used to communicate his ideas by written language. The fact that it should be placed in a back garden of a house in an ordinary residential street is really neither surprising nor unusual. Hundreds of scholars have visited and sent specimens since it opened a year ago. One day it may expand and be adopted by the University. 60 08 02

1961 Cambridge Folk Museum has been closed for the last nine months while various alterations and extensions have taken place. Several major improvements have been made as part of a programme that started four years ago. First the building was re-roofed, then a house was erected for the resident curator, Miss Enid Porter. This meant the old house at no.3 Castle Street became available for museum use. It has been redecorated, the staircases widened and a new system of oil heating installed 61 12 21a

1964 Contents of Ely museum, collected by Vernon Cross in Ye Olde Tea Rooms and Museum to be auctioned. Building ransacked by Littleport Rioters in 1816. It was restored by his father in 1905 when the collection was started – photos – 64 03 28

1964 A turf-digging tool and a fork used for harvesting were among the fenland tools bought for the Folk Museum at the sale of antiquities from Vernon Cross's 'Ye Olde Tea Rooms' at Ely. The curator, Miss Enid Porter, was among the crowd of buyers. She also obtained two Doulton spirit barrels and an 18th-century digester. Plaster moulds from old Ely houses, an unusual type of frying pan and a 19th-century knife cleaner were also purchased 64 04 16

- 1972 Donovan sings at opening sculptures by David Wynne [72 05 17]
1972 Michael Jaffe takes over from David Piper at Fitzwilliam [72 11 08]
1972 The Cambridge & County Folk Museum is run on a shoestring, but thanks to its indefatigable curator, Miss Enid Porter, it has become a model of what a people's museum should be - intimate, quaint and compact. That the museum so ably embraces the local community's way of life is due, undoubtedly, to the skill and reputation of its curator, who is acknowledged as an expert on East Anglian folk lore and witchcraft and is particularly renowned for her understanding of fenland. Miss Porter is a powerhouse of activity since coming to Cambridge in 1947 she has created an invaluable display of bygones and bric-a-brac. When it is remembered that she does it on £3,000 a year the scale and depth of the exhibition is nothing short of miraculous c72 09 02
- 1973 Abbey House - no endowment, impossible to upkeep so given City Council, needs £30,000 repairs [78 01 03]
1973 Lord Fairhaven bequests £1.4M works art, Fitzwilliam - finest since Marlay [73 05 03]
1973 Jim Ede leaves Cambridge giving collection to Cambridge University [3.1]
- 1974 One of Cambridge's finest medieval buildings, the Abbey House in Abbey Road, was formally presented to the city council as a gift from the Cambridge Folk Museum. The house was originally given to the museum in 1946 by the first Lord Fairhaven who had hoped it would be an enlarged Folk Museum. But the curator, Miss Enid Porter, said he had come to realise the building was just not suitable and the museum did not have the resources to keep the house in good repair c74 01 06
- 1975 The Queen Mother opened the new £½-million extension of the Fitzwilliam Museum. The Royal visitor, dressed in a pale-blue turquoise coloured outfit, paused several times to smile and wave to the crowd before being introduced to Museum staff by Prof Jaffe. She had a good look at the £2½ million collection of Cambridge plate on display and after tea she was driven to a waiting helicopter on the playing fields of St John's college c75 07 25 [4.14,6.20]
1975 Folk Museum closed due illness curator & no deputy, (Enid retires 1976) [75 08 04]
1975 An appeal for £30,000 has been launched to convert the old Cheddar's Lane Pumping Station into a technology museum. The existing pumping station provides a centrepiece for the museum, representing technological developments during the 19th century. Single storey extensions with galleries to house exhibits are being built at the Riverside split-level site. A special gallery may be designed to enable children of all ages to participate in the building of working models. The museum began in 1968 when the old pumping station was replaced by an electric plant c75 03 21
- 1976 At Cambridge Museum of Technology there is no indication that the old Cheddar's Lane sewage station off Newmarket Road, is now a museum. The place looks a shambles surrounded as it is by knee-high weeds and forbidding "Keep Out" signs. Go there; don't be put off by the

haphazard arrangement of exhibits and ask the helpful attendants when you fail to understand. A computer in a museum? An electron microscope – both are on display in this potentially breathtaking exhibition. I can't help but suspect that when the lease runs out the museum is going to be transformed into a profitable block of riverside flats. But I hope this does not happen c76 07 18

1976 The curator of the Cambridge Folk Museum, Miss Enid Porter, is retiring this week because of ill-health, after running it single-handed for about 29 years. At the moment she is in hospital and the museum is closed. Since she took charge of the museum in 1947 its popularity and size have grown considerably. It was started following an exhibition of folk items by the Women's Institute in 1936. Cambridge Rotarians launched an appeal for a folk museum and eventually the present premises in Castle Street were acquired. Miss Porter has been a prolific author, writing books on Cambridgeshire folklore and customs and contributing articles to regional magazines 76 12 07

1977 A thief only got £5 for an original Constable – because an art dealer thought it was a poor copy of the one in the Fitzwilliam Museum across the road. But it WAS the one across the road, and the dealer only discovered that when he read about the theft in his morning paper. He dashed to his office, checked the painting and discovered it was the original. And while he was checking it the police walked in on a routine enquiry. So he handed it over. The picture was grubby and finger-marked because the thief had shopped it around five or six other dealers in Cambridge. c77 11 13

1977 Cambridge City Council is to think again about plans to sell the mid 17th-century Abbey House in Abbey Road. The Folk Museum Trustees had given the ancient house to the city council only four years ago in the hope they would look after it. Coun Warren said: "It is shameful if the council is now considering selling the house and keeping the money itself." Coun John Powley said that money to repair the property was limited and the best course would be to sell it to the person living there and let him carry out repair work costing thousands of pounds. 77 11 17

1978 A recent move to sell the Abbey House, Cambridge to its long-standing tenant, retired Professor Peter Danckwerts, raised eyebrows among people who know the history of the place. It was bought for the Folk Museum by Lord Fairhaven in 1945. No endowment was made and the museum found it impossible to keep up the house. It was given to the city in 1973 and the city has found it an embarrassment ever since, spending little on repairs. But a former Mayor and chairman of the Cambridge Preservation Society threatened to take the city council to court if it was sold c78 02 04

1982 One of the most unusual removal jobs has started in Cambridge. A specialist team from Leeds has been brought in to transport hundreds of plaster casts of statues from Ancient Greece and Rome ranging from a giant statue of Hercules to replicas of the Elgin marbles. They are the pride and joy of the University's Museum of Classical Archaeology which is moving from its old home in Little St Mary's Lane to a purpose-built gallery in the new Classics faculty on the Sidgwick site. 82 07 21

1984 Prince Charles opened new Archaeology gallery [84 05 01]

1984 Enid Porter ran the Cambridge Folk Museum single-handed from 1947 for 30 years and the impressive collection now it now houses museum was largely as a result of her endeavour. She took the entrance money, arranged exhibitions and cleaned the museum. In 1968 she had not had a pay rise for 15 years; her wages were £8 a week at a time when comparable jobs were paying £1,500 a year. Richard Wilson, the current curator said "She was a marvellous lively woman who gave her life to the museum" 84 01 19 p6

1986 Folk Museum celebrate 50th anniversary – Tom Doig – 86 12 18

1987 City councillors have stepped in to stave off the shock closure of the Cambridge Folk Museum which is celebrating its 50th anniversary. They decided to give an immediate grant to help it over its financial crisis for the next six months after its curator, Tom Doig, told how it received little income and there were no private financial resources. Councillors are also rethinking proposals to treble the Museum's rent to £12,000 a year. 87 04 25

1987 Princess Margaret at Fitzwilliam Museum – 87 09 31

1988 Cambridge & County Folk Museum is facing a cash crisis. Curator Tom Doig says the situation is so desperate he may have to close the 500-year-old museum in Castle Street before Christmas. The County Council has refused any funding and the City has cut its grant, meaning he can no longer afford to pay staff.. The Mayor said is it outrageous that they can't find the money to keep it going The museum is of great importance as an educational resource and it would be a tragedy if it were to close 88 08 13, 88 08 17, 88 08 17a

1989 Tom Doig has done a very good job as curator of the Cambridge and County Folk Museum for the past five years despite little encouragement and many difficulties. The little museum is a most marvellous means of encouraging a sense of community and plays a central role in teaching young people about their area. Yet it is desperately poorly financed, scandalously cramped and largely failing to exploit its potential. I hope whoever inherits Tom's unenviable task at the museum will also show his enthusiasm and refusal to be cast down by difficulties. Never before has the public been more interested and enthralled by local history. And never has the need for a dramatic re-appraisal of this very valuable museum been more needed – Christopher South 89 01 27a

headlines

David Mordecai left school in 1839 and obtained a situation as 'reader' to the Cambridge Chronicle and Cambridge Independent Press newspapers. In 1864 he joined Fred Metcalfe in the founding of the Cambridge Express which was the only penny weekly paper in Cambridge for a number of years. The Cambridge Chronicle, which was regarded as the official Conservative organ, refused to consider reducing their price so some members of the party acquired the Express. It subsequently merged into the Cambridgeshire Weekly News 11 01 27d

Mr H.C. Bruce of New Fletton, Peterborough has written to say: "I have always had a warm spot for the Cambridge Daily News. It has had some rough passages and I like to think I helped it through one. When the 'Cambridge Gazette' started their new plant in St Tibbs' Row they also came out with a fine new yellow cart with rubber tyres. Every time we went out with our tall red cart with iron tyres and poor old mare they could beat us, because they had a fast trotter. They got to the newsagents first for some time and our returns began to increase, but with a little ingenuity on the round at night we managed to get and keep the lead. I got those papers to the agents before the 'Gazette' and had less returns to parcel up for waste paper" c48 06 04

Frederick W. Metcalfe was head of the printing and publishing firm of Metcalfe & Son on the corner of Green Street which at one time produced most of the publications emanating from Cambridge. Soon after he joined the firm the Cambridge Express was started and he had charge of this popular newspaper until his father's death when it was purchased by the Conservative party. He ran a local troupe of Christy Minstrels including the finest voices amongst the senior members of college choirs. It had a very successful career for several seasons and visited all the principal towns in the area 13 11 28 p7 CIP

1898 Kilner v Taylor: action by Kilner brothers, proprietor of Cambridge Daily News since death of their father, to restrain William Farrow Taylor, former manager of the paper, from trespassing upon the office and interfering with the business. They had given Taylor notice in lieu of salary. Taylor said had agreement with Dr Kilner to be co-proprietor. He had been carrying on business as printer and publisher of 'The Free Lance' newspaper at Bury and proposed to start CDN. Kilner had advanced him the money. This should be treated as mortgage and repaid CDN 1898 05 19

1898 Readers of the "Cambridge Daily News" will have noticed that for many weeks past the amount of news gathered by our reporters has been so great that to insert the whole in any one edition is quite impossible. Under these circumstances a further enlargement of the paper has become necessary and accordingly we have put down a new type of machine by Messrs Dawson and sons which will print a sheet giving seven, eight or nine columns to the page. This is the fourth machine supplied by them. The three others, although in constant use, are well capable of doing their work (two are more than 10 years old) and are a credit to English workmanship. We hope in a very short time to give our readers the advantages which the laying down of this machine has rendered possible CDN 1898 11 26

1898 Important notice. In connection with an attempt to force upon the public a scheme for promoting a second daily paper for Cambridge, most dishonourable and dastardly tactics have been adopted towards this Journal. The matter is to come before a legal tribunal and a shocking conspiracy will then be revealed to the public. Public or private enterprise we gladly welcome, whether it be in journalism or any other calling. If amateur pressmen have several thousands to throw away - for that is what it means - we do not at all object. But let the fight be fair and square CDN 1898 09 15

1898 The Cambridge Daily News has made arrangements with the Edison-Bell Phonographs Company Ltd to supply photographs to the readers of the Cambridge Daily News on such easily fulfilled conditions that no reader need be without a photograph - whether he needs it in his business or by his hearth. This phonograph is no toy - it is a perfected machine, endorsed with the power of receiving, retaining, and emitting the human voice. The machine and equipment we suggest cost you seven guineas for the Standard Phonograph and four records selected from the list, together with eight blank cylinders for correspondence purposes or for making home records and a carrying case. Machines sent, carriage paid, upon receipt of the subjoined order and a guinea c1898 09 25

1899 Cambridgeshire and Eastern Counties Weekly Gazette – Cambridgeshire Collection has microfilm

1899 However poor the local newspaper its files are the best source of information as to what has taken place in the district. It is only in the British Museum that files of the newspapers are preserved as a matter of course. In places where there are free libraries a good deal is done but very often the files are incomplete and in some cases the importance of preserving these records is not realised as it ought to be. County councils should undertake the work of filing these newspapers, of binding the volumes and keeping them in a place ready of access by the public 1899 01 04

1899 Mr J.W. Iliffe told the annual staff dinner of the C.D.N. that he remembered when the Daily News was a puny infant and they were looking forward to the enterprise justifying itself. What Cambridge would be without its Daily News he really could not venture to think. When he

first knew this borough they were satisfied with news coming out once a week in several papers, and they thought they were fairly up to date, and progressing satisfactorily, but they had no idea that any daily paper could survive. It was Mr Taylor's proud lot to start the venture, and prove not only that a daily paper could live, but that it could achieve a magnificent success c1899 02 05

1899 The result of the boat race was awaited with the greatest interest in Cambridge. The news that Cambridge had won was received at the office of the Cambridge Daily News within two minutes of the finish and in less than three minutes the Special Edition of the C.D.N. containing the welcome intelligence was selling on the streets. Needless to say, everybody was delighted that the Light Blues had been victorious c1899 05 23

1900 An action for libel was brought by Mr W.E. Humphreys, proprietor of the "Cambridge Magazine" against Mr H.D. Catling, proprietor of "The Cantab" with the "Cambridge Gazette" company as co-defendants. Mr Humphreys said he was asked to contribute to "The Cantab" and it was arranged that if the paper was a success he should receive a quarter of the profits, but he received no profit at all. There was a verbal agreement by which he was to buy "The Cantab" for £10 but it fell through and he resolved to start the Cambridge Magazine CDN 1900 01 18

1900 A debate at New Chesterton Institute was told that while at the beginning of the century. Cambridge could only boast one weekly paper, they now had something like half-a-dozen weeklies and two dailies. During the past few years the Press generally had lost its influence for good upon the public. He did not think in recent years that editors had improved (Laughter). One sometimes heard that editors were "got at" and that sometimes big prices fetched extravagant leaders. There was too much reporting of police-court cases and inquests and they could do with a little less of the tragedy. The minds of the young were being poisoned by these things CDN 1900 03 29

1900 Two years ago the 'Cambridge Gazette' was brought into being. Its sponsors made a great fuss about it. At last, they said, Cambridge has got a daily newspaper that is worthy of it – an eight page paper with innumerable editions, up to date in every respect. A halfpenny weekly newspaper was also started with a loss on every copy sold. Not only were they bound to fail, but they deserved to fail – and they have failed. The CDN has now beaten off two attacks and our regret is that we cannot say of the second failure as we did in 1892 of the first – that it was a highly respectable sheet CDN 1900 10 08

1900 Just a week ago publication of the 'Cambridge Gazette' was suspended. This morning an extraordinary meeting of shareholders was held to consider that the company should be wound-up voluntarily. The Secretary of the company was not present and it was stated that he had gone to Manchester. The bank overdraft was stated to be £2,200 and the company was hopelessly beyond retrieval. The affairs are to be wound up as speedily as possible c00 10 12

1900 Most of the Cambridge pressmen assembled to do honour to one of their number, Mr Charles Kent, who after a 12 year's service with the 'Cambridge Chronicle' as editor, is shortly to sever his connection with Cambridge journalism. Time was when one journalist fraternising with another of a rival paper was suspected of disloyalty to his own paper. All that had passed away and journalists could now meet on the most friendly terms and still be whole-heartedly loyal to their own papers. In bringing about this spirit Mr Kent had done a great deal. He was presented with an illuminated address CDN 1900 12 17

1902 The 'Cambridge Express' charges the police with having supplied the CDN with information and refusing to give it to the other newspapers. This is unfair. The CDN gathered its own news in its own way, without any help from the police at all. We telegraphed to Cork for a report of the hearing before magistrates which gave the probable date of arrival of the suspect in Cambridge. Three reporters were stationed along the railway. One at Gamlingay saw detective Marsh and the prisoner in a compartment, entered the carriage and rode with them, thus securing the information. CDN 1902 01 15

1902 The Cambridge Gazette Company has been wound up. As the business had proved so unprofitable the daily and weekly papers had been discontinued but a number of hands were

engaged in jobbing printing work. Liquidators discharged them and proceeded to realise the assets. They had arranged the sale of the printing plant, machinery and effects in January 1901 but had no funds to meet the claims of the creditors or shareholders. There was no object in delaying the winding up further. CDN 1902 05 15

1902 The Cambridgeshire Weekly News is acknowledged to be the Cambridgeshire County Journal and possesses an unrivalled circulation and standing throughout the County. It gives the fullest, most accurate and most attractive reports of any newspaper. It contains a carefully-compiled summary of home and foreign news, a bright and attractive London letter written by a journalist of great ability and an illustrated ladies' letter devoted to the newest modes and fashions – Advert CDN 1902 06 13

1902 The Ipswich Journal has ceased to exist. No newspaper can be produced for a penny per copy without a considerable advertisement revenue and while sales have increased the income from advertisements has as steadily diminished. Few things more vividly illustrate the change over the past 50 years. A paper once a week can no longer satisfy the needs of the busy people in our chief centres of population & unless news is “served hot” it fails to interest them. So the daily paper has become indispensable. However much we may regret the disappearance of weekly journals the inexorable law of change must be accepted. Businessmen are realising that in the matter of advertising there is a great gulf between the weekly and daily newspaper. CDN 1902 08 02

1902 The proprietors of the CDN also publish the “Ely Weekly Guardian” and is represented in Ely by a reporter who devotes his whole time to our service. Messrs Sharman and Co publish the “City of Ely Standard” which competes in the surrounding district. During the past few months large quantities of news have been taken from the CDN and published in their paper. Now we have received a letter from Mr A. Sharman to say he has requested his staff to refrain from “scissors and paste” in future. CDN 1902 10 11

1902 On October 30th the CDN published a full list of creditors in a bankruptcy case and paid at the usual rate charged by the Bankruptcy Court. The following day a portion of our list was copied, without permission, by the Cambridge Independent Press and Cambridge Chronicle. We are determined to put a stop to the unacknowledged appropriation of our news by rival journals and both have now issued apologies. The C.D.N. is the only paper in Cambridge which maintains a staff sufficiently large to deal properly with events and it is intolerable that our rivals should supplement their deficiencies by taking from our columns without permission the news they cannot obtain for themselves. CDN 1902 11 12

1903 Cambridge Daily News battle to attend meetings of Cambridge Borough education committee [04 01 02 RevYr]

1903 CDN editor H. Stanley Jones succeeded by Rough Brookes until 1918 [TT 43 07 31]

1903/4 Table Talk feature starts in Cambridge Daily News [54 07 17]

1904 Owing to the enormous demands for the C.D.N. souvenir of the Royal Visit to Cambridge the whole edition was sold out less than an hour after publication. Now in response to enormous requests a second edition is ready. It contains a full report of the proceedings together with special articles on previous royal visits, King Edward's undergraduate days etc. It has photographs of the new Downing Street buildings reproduced from the series of pictures specially taken by J. Palmer Clarke for presentation to the King. Printed on superior paper and being of a convenient size it is an admirable memento of the auspicious and historic occasion. c04 03 03

1904 The ‘Eastern Morning Gazette’, a Conservative organ published at Norwich for the last 12 months, has ceased publication. An editorial states this is not due to the hopelessness of the political situation but to other causes, it will be remembered that the price was recently reduced from a penny to a halfpenny. The ‘Norfolk Evening Standard’ will continue to chronicle all the

news of the day with its customary impartiality, to shape and guide public opinion and to champion the Conservative cause. c04 01 30

1904 CDN run out of all except file copies as so many people write in for copies of the paper which report proceedings of the British Association meeting held in Cambridge [04 08 27 TT]

1904 reporter chairs football meeting as nobody else would [04.09.10]

1904 Some explanation is due to the people who surrounded our offices last night to secure copies of our special edition which we promised for half-past-nine but was not published until an hour later. We had ordered from the Press Association a series of private wires to be dispatched as the Prime Minister's speech was being delivered. But such was the wretched state of the telegraphic arrangements that hardly one of the messages reached Cambridge in under an hour. It is as well that the Post Office is a Government department for any private trader who was so lamentably incompetent would soon find himself in the Bankruptcy Court. 1904 11 14

1905 A CDN reporter had occasion to send a telegraph message from the Swaffham Prior post office to this paper; he then began to return to Cambridge by cycle; after a leisurely ride he found had beaten the wire. This was an annoyance, bearing in mind the reputed speed of electricity. It appears the message had first to be despatched to Ely where it had to wait before being transmitted to London, from which it was retransmitted to Cambridge. It arrived one-and-a-half hours after being sent! 05 03 17

1905 Owing to the enormous demand for the current issue of the 'Cambridgeshire Weekly News', the entire edition was sold out on the day of issue, and we regret that we are not able to supply the numerous orders that continue to arrive. To avoid disappointment in future, place a definite order with your newsagent. The 'Weekly News' is the best local weekly paper: sale exceeds 10,000 copies 05 05 06a

1905 With the next issue of the 'Cambridgeshire Weekly News' will be presented an art supplement containing photographs of the late Bishop of Ely and his successor. Both have been specially taken by Messrs. Scott and Wilkinson and are remarkable likenesses. They will be printed on specially prepared art paper in a style suitable for framing. Much disappointment will be saved if those who desire a copy will let their newsagents know without delay. Only a certain number will be printed and the issue will not be repeated. 05 08 19a

1905 The Cambridgeshire Weekly News has a larger reporting staff than any newspaper within a radius of 50 miles and is enabled to give accounts of all local happenings at first hand. It is non-party and non-sectarian, reporting Conservative and Liberal functions and church and chapel events with strict impartiality. It also publishes a first rate serial story together with columns of Friendly Society, Photographic and Agricultural notes. The guaranteed weekly sale is over 10,000 copies. 05 10 07

1905 Last night a man was seen careering around the floor at a Covent Garden Ball in a suit made of sateen upon which pages of the CDN was printed. It was made by Mr A.W. Smith of King's Parade to the order of an old University man. The same trader made a similar order two years ago but the material was then white. On this occasion it was pink. 05 12 09c

1906 Beekeepers Association circulate Table Talk article to raise funds [06 04 19]

1906 German newspaper editors visit Cambridge – 06 06 27

1907 Cambridge pressmen assembled at the Sidar Hotel to bid farewell to Mr D.T. Nisbet who is severing his connection with the C.D.N. having secured an important appointment on the 'Midland Evening News'. He was handed a silver cigarette case, a fountain pen and a writer's wallet. In reply he spoke of the good feeling existing between local journalists who, though professional rivals, were personal friends. 07 03 23

1907 Cambridge Daily News sued for libel – 07 05 11

1907 Cambridge Chronicle – new company set up to acquire it – A.T. Naylor secretary – 07 09 18

1908 press banned from performance of suffrage play at Victoria Assembly Rooms [08 04 25 TT]

1908 Cambridge was badly hoaxed last night about the result of the Wolverhampton election. Inside the CDN the editor was waiting the news when the noise of cheering penetrated the office, but that was no unusual for the crowds waiting outside frequently engage in shouts. When the official message came through Mr Taylor proceeded outside to find nobody there. Practical jokers had already caused a card to be printed with fictitious figures and left outside the News office. If they aimed at creating a sensation, they have succeeded, causing fits of depression among members of the Liberal party 08 05 06

1908 The personality of Mr Winston Churchill looms so large in the minds of Cambridge politicians that a crowd of about 3,000 waited patiently outside the offices of the CDN to await the result of the Dundee election, where he was returned as a Liberal MP. When one section of the crowd raised a cheer, the opposing section retaliated. It was a great delight to hear an undergraduate, perched on the shoulder of his friends, declaim against Churchill as a turncoat and hear him answered by one of the Liberal turn of mind. Dundee election night will not soon be forgotten 08 05 11

1908 The solid form of type representing the news page of the CDN was removed from the printing machine to allow for additions to be made to the late edition when the iron band which holds it together snapped and what had been nicely-arranged columns of print was a shapeless heap upon the floor. That is “printer’s pie”, the worst catastrophe that can befall a newspaper. Not a moment was wasted: it was quickly gathered up, every available man being set to the task. There was no flurry and exactly 40 minutes later it was on the machine. CWN 08 07 17 p5

1909 Cambridge Express ceases, is acquired by Cambridgeshire Weekly News [09 04 02 CIPof3]

1909 “Cambridge Independent Press cut up reports appearing in Cambridge Daily News, added fresh cross-headings & made slight alterations, then published [49 03 26]

1909 CDN chooses not to report juvenile court cases under Children’s Act 1908 [09 07 17 TT]

1909 The Cambridgeshire Weekly News has acquired that valuable and old-established journal ‘The Cambridge Express’ and will henceforth be known as the ‘Cambridgeshire Weekly News and Express’. It will be enlarged to 12 pages making it one of the largest and best weekly papers in the United Kingdom. We shall continue to give full reports of all local events, uninfluenced by political or sectarian bias. Our advertisers will receive the benefit of the Weekly News regular sale of 11,000 as well as the circulation hitherto enjoyed by the ‘Cambridge Express’ CWN 09 03 26

1909 The only complaint we have received at the combined issue of the Cambridgeshire Weekly News and Cambridge Express is that it is now too large. We have the largest staff of reporters within 50 miles of Cambridge and shall report all Conservative gatherings with a completeness that cannot be approached by any other journal. However we will devote equal space to the doings of the opposite party. We shall not hesitate to speak out where local government is concerned and the fact that we are not tied to the strings of any sect or party will enable us to do this with greater fearlessness and independence. CWN 09 04 09

1909 Cambridge Free Library has acquired at auction a somewhat badly bound volume of Cambridge newspapers which are unique. They start as ‘The Huntingdon, Bedford, Cambridge and Peterborough Gazette’ of 15 April 1818 but change title to ‘The Cambridge Independent Press’. The purchase shows the happy understanding between the University and Town Libraries both of which were anxious it should not pass into private hands. They agreed the Borough

Library should have the first chance but that if the price were too high then the University would bid. CWN 09 06 04

1909 Before last June newspapers were received in Swavesey through the railway or by post. They had to be fetched from the station or came by the midday delivery and few people indulged in the luxury of a daily paper. Then W.F. Gleaves of High Street became agent for the 'Daily Mail' and later supplied all newspapers. Daily papers are now delivered immediately after receipt by the 8.25 train and certain London dailies arrive earlier. Under the old arrangement postal or railway charges had to be added to the cost of the paper. Now even in Elsworth, six miles distant, papers are delivered for face value CWN 09 07 30

1929 Mr George Sharman, of March, the head of a well-known Isle of Ely family, was killed through falling in front of an express train at March railway station. He founded the ‘Cambridgeshire Times’ series of newspapers in 1872 and was actively concerned with the management for many years, two of his sons subsequently taking over the reins. Recently he took over an estate and land agent’s business. Several years ago he had a seizure while waiting on the March station platform and fell on the line but was not seriously injured. A widow, five sons and a daughter are left to mourn their loss. c29 02 03

1929 The Cambridge Daily News has entered its fifth decade. Times and newspapers have changed since 1888 when the late William Farrow Taylor undismayed by the shoal of gloomy predictions, ventured the first local evening news sheet on the streets of Cambridge. Like every

successful paper it has changed with the times. But changes in make-up have not been more radical than those in the personnel of the staff. We have two representatives of the commercial department who have been with us from the beginning year and several on the mechanical side. But there are none in the editorial department who can go back to the time of Mr G. W. Townsend; he treasures a clock with an inscription recording eight years on the C.D.N. terminating in 1897 when he moved to the East Anglian Daily Times. 29 11 16

1929 A Cambridge Daily News van driver was travelling towards Huntingdon when he attempted to pass a stationary Vauxhall drawn up at the side of the road. His Singer van skidded on the greasy surface, zig-zagged over the road for a distance and then ran on to the grass. It struck a telegraph pole and one side of the body was torn completely off and the windscreen shattered. The van continued on its way tearing through a hedge and over the surface of a stubble field. In all it skidded for nearly 100 yards but did not turn over. The driver, apart from grazes, was unhurt. 29 11 22

1930 Cambridge Chronicle leaves 9 Market Hill after 168 years [4.17]

1930 Today the CDN publishes a 16-page paper for the first time in its 42-years' history. This is because of the demands on our space by national and local advertisers for their Christmas shopping announcements and affords evidence of their confidence of the paper as an advertising medium. There is an enormous response each day to our Christmas Pages Advertisement Competition. 30 12 12a

1931 first edition of Varsity produced [1.16]

1931 In October 1930 the first of a series of 'Who is it?' pictures appeared in the CDN. Now we are celebrating the anniversary by giving readers a different type of puzzle to solve. Our picture shows the rear view of a group of our office staff and five shillings will be awarded to the person who can spot the greatest number or give the best general account of the group as a whole. 31 10 02a

1931 Cambridge Daily News staff – details of picture of their backs – 31 10 09a

1931 death Frank Piggott, doyen Cambridge journalists, Oct [5.3]

1931 death G.P. Hawkins, chairman Chronicle Board of Directors, Dec [4.19]

1933 Cambridge Daily News makes news : death of Fred Wicks, with paper since inception [1.17]

1933 starts 'old Cambridge' feature using photographs [1.18]

1933 puts news on front page from September [1.20]

1933 starts new printing presses [1.3]

1933 When the Cambridge Daily News was founded in 1888 it was produced in premises in Camden Place. All who pass the Theatre Buildings will see we are taking over the premises vacated by D.J. Scott, the photographer The present site, once an arcade of shops and offices in the passage leading between the New Theatre and Scott and Wilkinson, was acquired in 1901-2. Now we are expanding with new presses to enable a 24-page weekly paper, modern Linotype plate casting machinery and a larger photo-engraving department. We have also introduced a fleet of efficient delivery vans 33 02 14a & b

1933 death Robert Donald, chairman Directors CDN – 33 02 17a

1933 Master printers and new CDN machinery – 33 04 26

1933 Charles Wilkins took up journalism at an early age. He worked on the Huntingdonshire Post before moving to the editorial side of the Cambridgeshire Times. He became managing editor of the Cambridge Chronicle and in 1921 he was appointed its managing director. Mr Wilkins was secretary of the Isle of Ely Amateur Football Association and took a prominent part

in the Conservative cause and the Catholic Church. He leaves a widow and a family of nine, six sons and three daughters. 33 08 02

1933 C.T. Wilkins, editor Cambridge Chronicle death – 33 08 02, 33 08 05

1933 Anderson (Andy) Broom was keenly interested from a boy in amateur photography and became the first Press photographer in Cambridge, having been for 20 years on the staff of the Cambridge Chronicle. Before that he worked for 37 years with the firm of Flavell and Ellis, decorators. He was member of St Giles' parish dramatic society and an athlete, chiefly engaged in cycling and skating. 33 09 12

1933 The make-up of the Cambridge Daily News is being completely re-modelled and in future the front page will be devoted to the main news of the day instead of small pre-paid advertisements. The London Letter will appear daily, with weekly motoring notes, fashion and household features and book reviews. A new super Crabtree press will allow of larger papers and turn out copies at up to 40,000 an hour. 33 09 30 33 10 02

1933 CDN new presses launched – 33 10 05

1933 Making of photographic blocks by CDN Engraving department manager – 33 12 06

1934 Cambridge Chronicle is incorporated into the Cambridge Independent Press and printed on Cambridge Daily News offices [1.2]

1934 notes on weeklies since 1890's TT 2.6.34 [2.2]

1934 Charles Gent, who has died aged 80, was one of the oldest newspaper men in the country. Half his life was spent in the service of the Cambridge Daily News which he joined about 18 months after it was started in 1888. He did sterling work as advertising manager and was well respected until his retirement. As a youth he had started in the 'Sherborne Journal' and at the age of 21 was appointed editor and publisher of the 'Poole Telegram', a paper run specially in the interest of the local Liberal candidate. When the Cambridge Association of West Country folk was formed, he became one of the first members. 34 12 31

1934 CDN newspaper van collision – photo - 34 12 13

1935 G.W. Townsend was one of the first editors of the CDN in its early days; afterwards went to East Anglian Daily Times 35 11 02a [2.4]

1935 The finest Chinese actor of today, Mr Mei Lan-fang, who has to have a three-strong bodyguard to protect him from kidnappers, visited the Festival Theatre. He granted the News his first interview ever to an English newspaper as Chinese actors have a genuine dislike of publicity in every shape and form. Since Mr Mei could not speak English, and the reporter knew no Chinese, the conversation was conducted through an interpreter. He is actually a female impersonator for in China women do not take part in classical drama. 35 06 08

1935 Sid Moon, the CDN cartoonist for six years, is leaving to take up a similar appointment on the 'Sunday Despatch'. Speaking in a dual capacity as editor and as 'Uncle Robin' (of the Robin Fellowship), Mr Morley Stuart said Mr Moon had produced cartoons which were full of clever ideas but never objectionable and expressed regret that the special Robin Goodfellow cartoon characters he had created had no 'gone back into the inkwell' 35 07 27 [2.3]

1936 Cambridgeshire Regiment, Major Digby takes command, is University correspondent of CDN specialising in sport and drama – 36 05 15c & d

1936 Friday Post and Mid-Week Post creditors meeting – 36 07 03

1936 Reflecting on his 45-year career at the CDN Robert Cleaver remembered when there had been no linotypes but every line had been set by hand – laboriously and painfully slow. The paper was printed only one side at a time, and not folded at all – and the speed about 1,000 an hour! Change had come gradually but the real push and progress had been since Mr Taylor had taken charge. He had transformed the news sheets from their rather dull appearance to a production of which they might justly feel proud. 36 07 20 & a

1936 There was an enormous demand for copies of the CDN containing official news of the King's Abdication. The first edition was on sale within minutes of the Speaker's historic announcement in the House of Commons. It contained a three-column sketch of the new King and Queen and an appreciation of 'Edward – the Man' together with pictures recalling his visits to Cambridgeshire. The Night Final contained many other interesting details about the crisis. Hours after this London papers were still being sold in the streets that contained only a brief announcement in the Stop Press columns 36 12 10 & b-e

1936 The depressing fog hung over Cambridge like a gloomy portent of the sad news to come as people awaited the King's decision. Thursday afternoon (early closing day) brought shut shops and deserted streets to add to the atmosphere of depression. The usual football matches were in progress but the topic of conversation was about the Abdication crisis. The first to hear the news was the group gathered in the offices of the CDN awaiting the News Agency 'snap' messages. Shortly after three-thirty it came. Soon after the poster 'The King's Decision – Official' brought people into the streets eager for the latest news 36 12 10f

1937 Ronald Searle becomes cartoonist of CDN [4.20]

1937 'The Cam' magazine edited in 1937 by Reginald Spalding after coming down from Clare; have appreciation of town but closed after six issues due financial difficulties – 67 05 18 37 01 02b [7.2]

1937 The Cambridge Town Magazine, 'The Cam' comes to an end this month with its sixth number. It had hoped to give readers a better appreciation of the town, take an interest in current affairs and emphasise the importance of local trade. But there was a meagre response and it has not been a financial success. The final issue has an article on Cambridge in the '90s, the benefactors of Addenbrooke's Hospital and Cambridge post office. Illustrations include a drawing by H.M. Brock 'Start of the Mays' and a sketch of Ald Mrs Keynes 37 06 05

1937 The News made history by holding the first Cambridge and County Press Ball at the Dorothy Café where a gay crowd, some 300 strong, danced, supped and had a really good time. There were two bands – Percy Cowell's and Percy Read's - providing a continuous programme of music for waltzes, waltzes and the 'Paul Jones' with spot prizes given by local firms. Two tasty suppers were followed by a midnight cabaret with star turn Tommy Fields (Gracie's brother) who did a spot of female impersonation. His pleasant smile and India rubber legs will be long remembered. 37 02 23 & e – photo – 37 02 20

1937 Microfilm will bring the library resources of the world to the desk of an individual scholar, a Cambridge conference was told. The prodigious daily flood of newspapers can be compressed photographically into little rolls of microfilm making them perpetually 'in print' while censuses, birth and death records and correspondence can be duplicated. The technology is still being developed and will take much longer than expected, but a satisfactory reading machine should cost about as much as a portable typewriter 37 09 27

1937 Journalist H.G. Hodder told Rotarians he'd started his career at the CDN. He'd reported on the birth of the St Neots quads and on the death of King George V when he was one of 60 reporters crowded into the Feathers at Dersingham waiting for the news. He'd been accused of overdoing the 1937 floods but it was a good story at a rather quiet time and imaginations were stretched slightly. However it meant that the Government did begin to think what might happen in the Fens unless protection is improved 37 10 27

1938 CDN celebrate 50th anniversary, a large souvenir supplement causes problems for the newsboys who have to deliver it [5,7,5.8]

1938 CDN Jubilee supplement, May 1938. Contents

CDN staff 20 years ago – 38 05 31z

1938 Morley Stuart, editor of the CDN, said news of events outside Cambridge came from the Press Association over a wonderful instrument known as a Creed. It was received in Morse code being punched out by a system of dots on to strips of paper which were fed into a machine which automatically transcribed them into typescript on sheets of paper. They had long reports of local meetings and councils; sportsmen were well catered for and ladies not forgotten. Due attention was paid to children in the weekly paper 38 01 27a & b

1938 James Wentworth Day, who has made a reputation in Fleet Street, strongly criticised the sensationalising tendency of the national Press. "The present trend towards the invasion of privacy is scandalous", he told a Cambridge journalists meeting. He got his early training at the C.D.N. where he started at a pound a week and owed a debt of gratitude to Morley Stuart, the editor, who fired him for attempting one boisterous night to set fire to the New Theatre. Next day he joined the 'Cambridge Chronicle' and supplemented his income by writing advertisements for Joshua Taylor. Afterwards he got a job on the 'Daily Express' 38 04 04a

1938 Mr H.G. Morris had been chief reporter of the CDN for nearly 30 years. In 1911 he was sent out on his push bicycle to collect news of the Army manoeuvres and afterwards Lord Kitchener said his reports were so well done there was hardly any need to publish the usual blue and white papers issued each day. Captain Taylor said Mr Morris need not worry about the future from the financial side. The News appreciated his energy and sound work over the years and the least they could do was to make his future safe and secure. They hoped that, freed from the worries of newspaper life, his health would improve 38 05 07b

1938 Cambridge Daily News jubilee – Capt Taylor reminisces about early days and foundation of paper – 38 06 04 & 4a

1938 Captain Taylor, Managing Director of the CDN, spoke of the many features of newspaper working which are creating financial difficulties. They are paying a very high price for paper and metal prices had risen due to the re-armament programme. With new complicated modern printing machinery they needed much more skilled operators. But a man in one union would not do the work of a man in another one. Unions had done a great deal of good but must not be virtual dictators of the industry. There was no cure to the evils they were suffering and he hoped no diminution in the supply of their life blood, sales and advertising. 38 11 02, a

1939 H.G. Morris, former chief report on CDN, covered 1912 army manoeuvres – 39 02 20a [2.5]

1939 difficulties of running a paper in Wartime - local news scarce world news subject to censorship, blackout causes problems [2.6,2.7,2.8]

1939 If war came some kind of press censorship would be inevitable, the Home Secretary told the Newspaper Society dinner. Retiring President, Captain A.C. Taylor, Managing Director of the CDN, said the provincial newspaper editor was very discrete and trustworthy but must make a true and faithful record of events as they take place. Only a free Press, unfettered by Government

interference, can be looked upon as a true Press, and a faithful record of everyday affairs 39 05 03b

1939 The Black Out exercise went off satisfactorily but I hope next time it won't be on a Thursday night because the hours between twelve and four are very busy ones in a newspaper office where there are a series of weekly titles to be made up and printed ready for Friday morning publication. Our own difficulty was increased by the fact that the printers work under glass roofs. We did our best to meet the emergency and the bulk of the work was done before midnight. But the last page or two had to be put together under one small light, suitably shaded. I have never seen pages made up so quickly before – 39 07 15

1939 CDN reduced to four pages due war conditions – 39 09 04a

1939 People think that war is good for newspapers because of increased sales, when every day brings fresh sensations, success or disaster on land, sea or the air. But it brings a crop of trouble: rising price of newsprint and the blackout adding to difficulties of distribution. Censorship was not to conceal the truth from the public but to prevent information getting into the hands of the enemy. Local news had to be sent to London to be censored but foreign stories arrived at the CDN over a private wire ready for publication. They were able to give later news than the London evening papers as they had to come on the afternoon train which often took two hours. There was terrible unemployment amongst journalists over 30. They were a reserved occupation and could not enrol in any of the services 39 11 22a

1940 CDN gets on 30% of normal newsprint due to war, cuts back to 8 small pages instead of 4 large ones & reduces reports [2.9] 40 04 20b

1940 John William Scott manager CDN photographic & engraving department; worked at Scott & Wilkinson and did occasional photographic work for CDN; also official police photographer. When CDN reorganised in 1929 was asked to form and take control of the Photographic and Engraving Department – 40 06 04

1941 CDN increases price to 1½ d due costs – 41 06 24b

1941 Censorship – facts raiders must not know – 41 06 05

1942 50 years of linotype operation [2.10]

1942 Fred Rayner lino-type operator at CDN – details of changes etc – 42 03 07a – memories – 42 04 15

1942 18,000 miles.—A correspondent (Says Watchman), writing of the Cambridge Independent Press, says: An old lady, in pre-war days, bought a copy of the "Independent" 'every week, and after reading it she loaned it to four neighbours. Later on the paper was sent to a son in Newcastle, who then forwarded it to a brother at Plymouth. From Plymouth it went to a brother in Melbourne, in Australia, who then sent it to a brother in Canada. The itinerary or programme was carried out weekly for several years, and according to the correspondent, each copy of the "Independent" must have travelled quite 18,000 miles 42 06 26 CIPof

1942 Soldiers read CDN in desert – photo – 42 09 23

1943 Japanese authorities refuse to allow letters to prisoners of war unless they are typed; CDN offer to help with typing [2.11]

1943 Table Talk column in CDN celebrates 25 years [2.12]

1943 Fifty years with local Papers. - For nearly 50 years associated with the Cambridge newspapers, Mr. C.R.Vincent has died at Malvern at the age of 85. It was only two months ago that he relinquished his association with the "Cambridge Daily News" and "Independent Press," and past and present members of the staff joined warmly in a presentation to him on that occasion. Formerly engaged on clerical work with the Post Office Savings Bank Department in London., Mr. Vincent was obliged by health reasons .to give up his duties. He came down to

Cambridgeshire and established his home in Swavesey, becoming, in 1898, village correspondent. In 1922 he was appointed to take charge of village correspondence at the head office of the newspapers. With over 70 villages in the county, his training in the Civil Service came in remarkably useful. It was his duty to keep a record of every paragraph sent in, and it was his proud boast that he could always turn up any item at will. Mr. Vincent gave a helping hand to Uncle Robin in the early days of the Robin Fellowship, and he was affectionately known in the office as "Uncle Cyril." 43 12 24 CIPof [1.1] 43 12 18

1944 CDN publisher, C. Maile celebrates 50 years – memories – front office was at extreme end of arcade facing the street; on one side entrance to Theatre Royal and on other entrance to kindergarten school when New Theatre wanted old office as refreshment buffet for stalls the front was moved to present editorial offices. Later moved right up to St Andrew's Street in place of Alphonso Smith's boot shop and Scott & Wilkinson's photographic establishment. Helped publish Victoria Diamond supplement. Appointed published in 1913 and has remained. Remembers when 'Weekly' printed four pages a time on the old Wharfedale press when copies had to be 'knocked up' and counted out in dozens. During General Strike of 1926 CDN produced a single morning sheet which circulated widely. Delivery of weekly paper provided problem in absence of trains and buses and with only one horse and cart for town delivery. Managed with help of Bim Hodder and his sports car, the Herts and Beds Bacon Company and a hired lorry – 44 01 29

1944 CDN celebrates 200 years of publication of a weekly newspaper – detailed history – 44 02 29-29e

1944 Cambridge Chronicle passing – [TT 44 05 13]

1946 W.M. Stuart leaves after 16 years at CDN, chief reporter 1938. Was air raid warden who wrote 'Now it can be told' article [TT 46 03 30]

1946 CDN dinner to welcome home staff from war – if history of what was done in University laboratories is ever written – but will not as scientists so modest; no accommodation for returning men as lodgings taken by Civil Service; memories of W.L. Reynolds – 46 12 31& a

1947 paper restrictions mean only 8 pages daily, had gown to 12 on alternate days [2.20]

1947 further Government restrictions on newsprint to save dollars, CDN reduces circulation by 20% rather than cut number of pages [2.21]

1947 W.L. Reynolds cashier CDN retires after 43 years; memories of founder [TT 47 01 04]

1947 There will be a warm welcome for "Varsity Handbook", the Undergraduate's Guide to Cambridge, produced and published by "Varsity". This is a brand new publication, printed on good paper and contains a mass of information of interest and value to University men. Much of the material has never been collected before. For the first time, for instance, a full detailed list of the 180 odd University societies is published. And then "One Man's Opinion" contains some frank advice - possibly a little too frank - for the Freshman on a variety of matters c47 10 13

1948 To the dinner held at the University Arms Hotel in celebration of the Diamond Jubilee of the Cambridge Daily News" there came as guests those who formed the happiest possible combination of the "family" and delighted friends. University, town and county joined in tributes to our paper, tributes, too, which made mention of accuracy, good taste and kindness. The Mayor, (Coun G.F. Hickson) said: "We all feel very strongly that the prosperity of the local Press, even if it sometimes goes by the affectionate name of the "local rag", is a feature of our life today. I think it must gain the admiration of us all in the way the C.D.N. does succeed in giving a fair deal to everyone in the restricted space at its disposal" c48 05 27

1949 last "Table Talk" by Morley Stuart, 6th August, H.H.Higgins takes over [2.23,9.5]

- 1949 death of Jack Maile, 56 years with CDN [CDN 49 09 30 p4]
- 1949 It is with deep regret we record the death of Mr Morley Stuart, editor of the CDN for 31 years. On the Cambridge Independent Press being acquired by the Cambridge Weekly News in 1912 he took over the editorship in addition to working as assistant editor of the CDN. He used to recall how he would receive a caller who wanted to see the editor of the CDN, and then on being called over subsequently to Llandaff Chambers where the CIP offices were situated, he would find himself confronted by the same caller wishing to see the editor of that paper c49 09 22 [3.1]
- 1949 B50 bomber crash not mentioned on front page of CDN [4.8]
- 1950 more newsprint so CDN goes up to 16 pages three times a week once more hit by newsprint shortage in August [3.9]
- 1950 stresses its election policy : “an independent line ... equal fairness” [3.3]
- 1950 CDN prints Farmer & Stockbreeder during London compositors strike [3.10]
- 1950 Captain Taylor, Managing Director appointed Mayor - it proves a momentous years during which Cambridge granted the title of ‘City’ [3.6,3.8] was son of late William Farrow Taylor, founder CDN, managing director CDN & director of other companies [CDN 50 03 16 p7] Biography [CDN 50 05 25 p6]. Biography of his wife [CDN 50 06 05 p5]
- 1950 death R. Cleaver, formerly overseer CDN [CDN 50 12 16 p7]
- 1950 “there are three speeches: one prepared the night before, one delivered & one press report next day” [TT 50 05 20]
- 1951 raise price by ½d to 2d (1p) [3.13]
- 1951 The News ‘Motoring’ column was started and first written by Brian Lister in 1955. He went of to make one of the very famous names in sports-racing cars, the Lister-Jaguar, which, driven by the late Archie Scott-Brown and tuned by Don Moore of Cambridge Place, dominated the racing scene. Rodney Tibbs took over the column in 1957. 81 01 13b
- 1952 CDN appeal for radios for Addenbrooke’s raises £6,500 in 3 weeks [3.15,3.20]
- 1952 Robin Goodfellow club hands over 1,000,000 penny since 1929 [3.16]
- 1952 CDN prints American newspaper Brigade Cavalcade for Mildenhall air base [4.10]
- 1952 Keith Clarke appointed News Editor & Chief Reporter in place of S.J.Amyes [3.18]
- 1952 Sidney Moon, brilliant international cartoonist for Sunday Despatch, formerly worked CDN [CDN 52 01 26]
- 1952 The CDN has added, for one week only, a new publication to the list of eight newspapers which it currently prints each week – an American newspaper. “Brigade Cavalcade” was produced to mark the first anniversary in the U.K. of the 32nd Antiaircraft Artillery Brigade of the U.S. Army. Its editorial offices are a battered war-time hutment overlooking the huge aircraft runway at Beck Row. After a lifetime of spelling English in an orthodox manner it was difficult for our printers to set words like honour and colour without the ‘u’, and the practised fingers of a linotype operator rebelled against copy which insists that programme should shed its last two letters. CDN c 8.2.1952
- 1952 death H.G. (Bim) Hodder 2½ years sub-editor & book reviewer [CDN 52 09]
- 1953 CDN launch appeal for money to restore bells of Gt St Mary’s church [4.11]
- 1953 fire in CDN front office [4.12]
- 1953 Granta banned for publishing a blasphemous poem but Gadfly issued instead (the name of a magazine which was banned 65 years ago giving Granta its start [7.1])
- 1954 defends itself against anti-Labour bias [4.13]
- 1954 death W.A. Howlett, CDN printer [3.21]
- 1954 Alfred Leonard, 42 years CDN [CDN 54 11 08]

- 1955 CDN appeals for radios for Papworth Hospital (raise £5,000) [4.15,5.10]
1955 newsboys outing to New Theatre [4.14]
1955 The Cambridge Express Printing Company has been acquired by W. Heffer & Sons. The 'Express' works have a long history. At one time they published a weekly newspaper which was eventually incorporated with the 'Cambridge Weekly News' which in turn amalgamated with the 'Cambridge Independent Press and Chronicle'. 55 09 10e
- 1957 CDN starts "America Letter" [5.13]
1957 'Footballer of the Year', Tom Finney, has been signed to write for the popular 'Cambridge Daily News Football and Sports Review' each Saturday evening. He has been capped 67 times since 1946 and is one of the most versatile forwards of the post-war period. Tom was offered a huge sum to sign for an Italian team but declined, saying he was happy to remain with Preston North End for whom he scored 22 goals last season. He knows the game inside out and will present a lively commentary on the soccer scene each week. Do not miss them. 57 08 19
1957 Retirement W. Kingsnorth, linotype operator 51 years, CDN – 57 09 25b
1957 CDN editor lectures – 57 10 18d
- 1958 CDN launch appeal for Edwinstowe [5.16]
1958 death of Captain Taylor's wife [5.17]
- 1959 CDN sale of ordinary shares for sum in excess of £400,000 to Lord Iliffe; CDN is owned by Greyfriars press which through Associated Iliffe Press is owned by Kelly's Directories, Kellys is Amalgamated Press subsidiary. Sum is very large appreciation over Grayfriars original investment of 1930s, part of streamlining of Amalgamated Press which acquired by Daily Mirror group at beginning year [5.11,12.1]
- 1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date*
- 1960 The Cambridge Sporting and General News Service is one of the oldest news agencies in the country. It was founded in 1859 by James Drake Digby as 'The University and Sandringham Intelligence Service' and was the originator of the Royal Court system of reporting now adopted by the Press Association and Exchange Telegraph Company. In its office is a label showing that in 1906 King Edward VII personally sent three braces of pheasants from a royal shoot to James Newton Digby. The agency is now lead by E.A. January who took over after the war. It covers sport and news from the University, town and surrounding district. 60 01 02
1960 University 'Image' magazine launched 60 03 25a
- 1961 Captain A.C. Taylor retired after 40 years as Managing Director of the CDN, the paper established by his father in 1888. He is widely engaged in public service having been elected to both county and city councils and was Mayor when Cambridge became a city in 1951. He is chairman of the Ministry of Labour Rehabilitation Committee and keenly interested in sport, ploughing and farming. His successor as Managing Director is Mr A.J.H. Durham who like the Chairman of the Board, Lord Iliffe, is a graduate of Cambridge University 61 01 02b [5.11,7.7]
61 05 05a
- 1961 Cambridge Review 200th issue, founded 1879 – history 61 03 04
1961 A cocktail party was held at St John's College to celebrate the 2,000th issue of 'The Cambridge Review'. It was founded in Trinity College in 1879 and has appeared every week in full term without interruption for strikes and wars. Its price – sixpence – has not changed at all because the circulation has always been small. The current edition has the usual content of articles, correspondence, book and theatre reviews 61 03 13a

1962 CDN move to new offices on Newmarket Rd, paper size increases due to new machinery & local news prominent on front page [5.21,5.23]

1962 Cambridge Evening News new building on Newmarket Road – supplement – 62 05 08 also a

1962 At the modern Cambridge Daily News building on Newmarket Road each reporter has his own desk with a spring loaded device which allows his typewriter to be swung out of sight at a touch of the fingertips. There is a telephone kiosk built into the corner of the room which is used for confidential calls or those coming from a long distance which require quiet surroundings for easy listening. Typists in the copytaking room transcribe telephoned stories while national news and photographs sent by wire or radio are received in the teleprinter room 62 05 08b

Producing the pictures – 62 05 08d, composition of pages – 62 05 08e, foundry – 08f, printing works – 08g, machine produces 40,000 copies hourly – 08h, despatch – 08i, transport – 08j

1962 changes name to Cambridge News on 1st Oct, people associated Daily with morning paper [12.5]

1962 Cambridge Daily News moved from St Andrew's Street to Newmarket Road – 62 04 16c

1962 Down Your Street articles by Eric Dimock start with Castle Street – 62 11 15a

1963 Cambridge News new offices on corner St Andrew's Street marks transfer of business from office in New Theatre Building – 63 12 31a [12.]

1964 Horace H. Higgins, joined the CDN as a senior reporter in 1921 and became editor on the death of Morley Stuart in 1950, guiding it through many changes since it came into the ownership of Lord Iliffe. He was also the principal drama critic and was present at the opening of both the Festival and Arts Theatres. He launched funds to supply radios for Addenbrooke's and Papworth Hospitals and for improvement the Red Cross Society's 'Edwinstowe'. He is succeeded as editor by Mr N. Keith Whetstone from the Coventry Evening Telegraph. 64 02 20a

1964 Bring back the sunshine with a bright new colourful deep-woven Axminster or Wilton carpet from the Co-operative House, Burleigh Street. Laurie & McConnal or Peak's Furnishers where you can save up to one pound per square yard. [A three-page advertising feature printed in colour on 8th April, the first time colour was used extensively in the News] 64 04 08a-c

1964 Avalon furniture – two-page colour advertisement – 64 09 24a-b

1964 Cambridge News wins 1964 Newspaper Design Award for evening newspapers; acquired by Lord Iliffe five years ago; he built new works and offices on Newmarket Road which opened April 1962 with printing plant of the latest design. New headline type, old five-column pages gave way to present six – 64 11 07

1964 CIP new look - 4 page Picture Parade, page 2 devoted women readers [12.8]

1964 Granta magazine charity show to raise finance, includes Jimmy Edwards, Bernard Braden, Thora Hird, Peter Cook, Frankie Howerd and David Frost, the ex-editor. 64 11 02d

1964 Birds Eye orange juice advertisement with colour for juice- 16 11 20

1964 Double-page colour advertisement – 64 11 27h

1965 CIP acquire St Neots Advertiser & Hunts & Beds Advertiser News, total circulation 28,000 copies covering 7 counties [12.9]

1965 Reuters news agency monitors Russia from Green End House, Royston – feature – 65 04 08e

1969 CN new offices, Market St replacing St Andrews Street [7.8,15.2]]

1969 2 extra rotary presses & 2 folders; 54,000 copies each night [15.4,7.9]

1969 makes evening paper history by including full colour pictures less than 24 hours after taken; film flown to Coventry & printed pages driven back in fleet of vans – 69 03 13, 13b [15.1]

- 1969 title changes to Cambridge Evening News to emphasise fact that it an evening paper [15.3]
1969 Cambridge News changes title to Cambridge Evening News – 69 08 26 (old) 69 09 01, 02a; change names on vans – 69 09 02a
1969 Capt A.C. Taylor, managing director of CDN for 40 years; his father William Farrow Taylor founded paper in 1888; he became manager in 1919; was acquired by Lord Iliffe in 1959 – 69 11 11
1969 Railwaymen deliver newspapers overnight – feature – 69 11 18a & b
- 1970(?) new regional edition, reports from area no longer confined to centre pages but displayed throughout news section [15.5]
1970 Keith Whetstone, editor of Cambridge Evening News – profile – 70 06 20
1970 Jim Smith, machine room manager of Cambridge News for 37 years retires – 70 07 04
1970 Cambridge News curtails number of editions due power strike – molten metal used to cast type will quickly solidify – 70 12 12
- 1971 “flyover extension starts [15.6]
1971 Shilling Paper revived, died nearly year ago after student anarchists gained control editorial production, strident voice and extremist politics offended [15.7]
1971 Ernest Blows retires after 57 years, joined CDN 1914 when circulation 7,000 copies which delivered by horse and cart, now daily circulation 51,000, 4 editions covering 1,500 square miles [15.8]
1971 Cambridge Chronicle microfilm could make money for city [71 09 24]
1971 Cambridge News sales top 50,000 for first time – 71 07 16
1971 Ernest Blows joined CEN in 1914 when circulation was 7,000 copies delivered by horse and cart; now sells more than 51,000 with four editions covering 1,500 square miles – 71 12 23
- 1972 Stop Press, student magazine launched challenging Varsity; negotiates merger [8.17,15.9]
1972 Cambridge News starts installs new conveyor system to speed packing time – 72 02 10b
1972 Cambridge News juggles with power cuts to get the paper out – describes printing process etc – 72 02 17
1972 uncertainty power supply due miners strike changes format [15.11]
1972 NGA problems [15.13]
- 1973 record CEN, 64 pages includes 20 page classified advertising centre section [15.14]
1973 Spicers aid Varsity which threatened with collapse [15.15]
1973 merger Varsity & Stop Press continues [15.16]
1973 editorial dispute curtails CEN [16.2]
1973 2 days disruption by journalists [16.4]
1973 15 pages of adverts, 1 page of news [16.5]
1973 newsprint shortage restricts number of pages [16.7]
1973 disputes NUJ, CEN is 1p tonight; settle 3-day dispute, stop again [16.7]
1973 Durham president East Anglian Newspaper Society, chairman Evening Newspaper Advertising Bureau [16.6]
1973 Sara Payne CEN women’s page editor named Britain’s regional wine & food writer for 1972 [16.3]
1973 Varsity appears for last time, first published Jan 1931 by William Farquah who sold to friend for £100, post-war Harry Newman founded published wrote & promoted it; used pre-war title to get newsprint when supply rationed. Brash with Trans-Atlantic headline styling &

verve. 21st birthday March 1968; 6,000 buy it. Prince Charles, David Frost, Jonathan Miller etc wrote, Anthony Armstrong Jones photo'd [15.17, 16.1]

1973 Shilling Paper to reappear with 2 issues this term, in past maintained extreme left image [8.10]

1974 99% accuracy record [16.8]

1974 disputes [16.9,16.13]

1974 CEN fails to publish for 1st time in 86 years due NGA dispute caused by NUJ sanctions [16.15]

1974 Chris South column begins twice weekly [16.10]

1974 CEN new printing press units arrive [16.12]

1974 Stop Press cash shortage, last week failed to appear [16.14]

1974 Today sees the first issue of a talking newspaper in Cambridge. Carried on tape cassettes it will be issued to 30 blind, elderly and infirm people and will provide a service of news based on material appearing in the C.E.N. Pye radio provided £1,500 worth of tape recorders to launch the project and the Vice Chancellor has offered University recording facilities. The "Talking News" was originated by Mrs D.M.C. Matthews of the Blantyre Home for the Blind in Glisson Rd and is now administered by a special trust c74 09 30 [16.11]

1975 Robert Iliffe succeeds uncle as Chairman proprietors CEN [8.3]

1975 Stop Press cash problems [8.11]

1975 own Crier, free newspaper, starts [10.1]

1975 see additional Rushbridger story

1975 Romsey Town News started by community - opportunity to speak & coalesce [14.1]

1975 Frank & Babs Munns, well-known to numerous city centre newspaper buyers, have retired from their Market Passage newsagents. They have been in the business for 45 years. His family started in Newnham, one of only two wholesalers in Cambridge of Sunday newspapers. They started their first business in Castle Street and moved to Market Passage 14 years ago. Over the years there has been a big increase in the number of continental magazines people want to buy. Italians from as far afield as Bedford come to their shop for periodicals in their own language c75 09 05

1976 Rodney Tibbs best provincial science writer [8.12]

1976 CIP 12,000th issue [8.14]

1976 CEN increases printing units from 6 to 10 [8.16]

1977 CIP becomes first di-litho paper in Britain [8.7]

1977 CEN becomes first daily newspaper printed in UK by direct lithography, faster & step on road to photo composition; had toured Scandinavia & USA before deciding [8.6,8.18]

1977 CEN wins newspaper Design award for best sports pages in evening paper category [9.1]

1977 Stop Press stopped, financial problems [8.17]

1977 Printing technology is moving fast and regional newspapers are consistently in the forefront of developments. By concentrating on one major aspect the Cambridge Evening News has more than kept pace. The use of hot metal in printing is giving way to photography & we are the first in the country to print our papers by the Di-Litho method, enabling us to modernise and adapt our dated but sturdy and still efficient presses, improving the quality of reproduction in our publications and making working conditions easier and cleaner for staff. It is an indication of our confidence in the future that we intend to move to photocomposition, stage by stage, until completion in about a year's time. c77 04 22

1978 3 CEN journalists in British Press Awards, Jedrej News photographer of year [9.2]

1978 The Cambridge Evening News has achieved a feat unprecedented among provincial newspapers by winning three awards in British journalism's most important honours list, the British Press Awards. Chief amongst the News winners is cameraman Tony Jedrej who has won the title of News Photographer of the Year for a picture of a gunman and woman hostage at Ickleton. Reporter Alan Rushbridger receives a commendation in the Young Journalist of the Year class for articles on Cambridge Symphony Orchestra and a punk rock group while Assistant Editor John Alexander is commended in the Provincial Journalist of the Year class. c.78 02 03

1978 He used to stand at the corner of Trinity Street and Green Street in Cambridge, touting his wares. Every few minutes he would break out into a chant which sounded something like "Toodle-oddle-aidie-ar". One day I couldn't stand it any longer – not knowing what it meant. So I went up and asked him. "Two o'clock late London", he said, not so much as raising an eyebrow. "Paper, sir?" Every community, in every day and age, has its 'characters', even if there never seem to be quite as many about as there once were. Today busker Jerry Bol happily makes an exhibition of himself as a one-man band, while 'Snowy' Farr and his menagerie delight thousands of people with their weekly Saturday appearances. c78 02 10

1978 The News decided to celebrate its 90th birthday by doing something light-hearted and invited 90 members of the Mid-Anglia population to pose for a photograph that would show a cross-section of the diverse community it seeks to serve. People who might never meet in everyday life found themselves jumbled together on the Shire Hall lawns for a photograph. Boxer and bank manager, actress and agronomist, proctor and postman became neighbours in a marvellous mixture. There was even a dog and a rabbit to represent readers' fondness for household pets. Aqualung diver Bob Kirby was driven to taking ice from the champagne buckets in a desperate attempt to keep cool. c78 06 02 [9.9]

1979 CEN fails to publish, NGA claim re new technology over laser plate-maker [9.4]

1979 NUJ stage 7 week pay claim strike, paper run on skeleton staff [9.8]

1979 Cambridge Review centenary issue [9.6]

1979 Stop Press rescued by business consortium [9.7]

1980 CEN not published for 7 weeks due NGA national pay claim [9.10]

1980 CEN uses linotype for last time, now new photo-composition new typeface Times Roman, have introduced laser plate-making [9.11,9.13]

1980 Granta aim transform into regular international quarterly [9.12]

1980 The News and its sister newspapers are back in production after a seven-week national pay-and-hours dispute which resulted in the loss of 1.75 million copies. The dispute was over wages. The National Graphical Association wanted a flat £80 a week basic and a 37½ hour week. The employers' side offered £75 a week and a reduced working week by 1982. A union official welcomed the agreement and said he was pleased that at Cambridge they had had none of the agro of other newspapers around the country. 80 05 13b

1981 CIP issued for last time on 29th January, new Weekly News series of free newspapers launched [9.14]

1982 journalists 11 day stoppage due redundancy plans [9.15]

1982 Ten thousand copies of the Cambridge student newspaper "Stop Press" have rolled off the presses of the News, the first time it has been printed in the city. With the introduction of direct-image camera and laser printmakers student journalists hope it will save them £150 an issue and enable it to be distributed earlier than before. "Stop Press", a 12-page tabloid-style paper was set up by Cambridge Students Union in the mid 1960s as a radical campaigning alternative to the established student paper, "Varsity", which subsequently folded. 82 01 16

1982 Cambridge newsagent Bob Truelove has an easier working day now his newspaper delivery boys and girls have been computerised. Once he had to get up with the lark to start marking up the morning newspapers for his delivery team. Now the computer delivers a daily print-out for each of the rounds showing which papers have to be delivered to each house. It is the same story in the evening when the News arrives. The Cifer computer, which was installed by Bob Dear of Glisson Road, has been specially programmed so no technical skills are needed to operate it. 82 02 25

1983 estate agents dramatically increase advertising, 20 page Property section; advertising had switched to Town Crier during 1980 strike [9.16,10.1]

1983 The 'News' has pioneered a number of new technologies in the newspaper industry. A few years ago its composing rooms looked like a factory, dealing with molten lead, burning gas and tons of heavy metal. Now it resembles a carpeted office with two products of the modern age, lasers and computers, at the heart of the process. More technology could be employed but with several editions to produce every day there is no time to stop to introduce it. 83 01 25b

1984 CEN editor "some people have accused us of going downmarket ... but we're not here to paddle prejudices on social or political issues" [10.2]

1984 CEN not published due industrial dispute [10.4]

1984 Attack of Verbals published 'left-wing propaganda rubbish' [10.3]

1984 A new village industry is booming in Cambridgeshire – compiling village chronicles. It is the result of a major project at the Cambridgeshire Collection which has indexed the village news appearing in the Cambridge Chronicle newspaper between 1770 and 1899. Now these stories are being transcribed and published in a series of village 'Chronicles'. The first was compiled for Stretham and others have followed for Littleport, Barrington and Swavesey with more in the pipeline. 84 01 05 p14

1984 A security man delivering wages to the Cambridge News offices in Newmarket Road was confronted by two armed men wearing balaclavas as he stepped out of a lift on the second floor of the building. They pressed a chloroform-soaked rag on his face before taking a black security bag containing wages of over £8,000. The men, who were wearing boiler suits, then walked calmly down the stairs and out of the front door. 84 03 15 p1

1985 Town Crier taken over by Morgan Grampian group [10.5]

1985 Huntingdon & St Ives Weekly News produced

1985 Lord Iliffe, former chairman CEN, retires from board, strong personal connection with paper [10.7]

1985 Lewis Todd was resident cartoonist of the CDN 30 years ago, following in the footsteps of Ronald Searle and Sid Moon who went on to Fleet Street. He is best-remembered for his composite drawings of cricket and football teams. He enjoyed a long career as an artist with the Ministry of Agriculture but now has an exhibition of his oil paintings of Cambridge scenes including a view of the Roman Catholic Church which makes it look like a Van Gogh structure. 85 07 24a

1986 Town Crier move to new offices in Cambridge [10.10]

1986 Royston Weekly News revived [10.11]

1986 The Cambridge-based Mason's News Service has won a unique contract to produce a new Chinese newspaper – the first to be published outside China. They will be responsible for the editing, design and printing of the English-language paper which is published by the Peking-based 'Economic Daily', the country's most influential newspaper. It will contain a digest of the main news stories in China as well as articles written specifically for European readers 86 05 02a

1986 The Talking Newspaper has been compiled for the past 12 years by a team of committed people to give visually-handicapped people information to enable them to participate in the normal day-to-day chat that we all indulge in. Without it the blind can feel isolated. The three team editors incorporate many of their own interests in the arts and animal life in an hour-long tape containing a mixture of news culled from local sources, features and information such as death notices and forthcoming events. The newspaper has its own recording studio at Chesterton Hospital and is distributed through the free mailing service offered by the Post Office 86 12 24

1987 Ian Richard succeeds Tony Durham as CEN MD – 87 02 02

1987 The 'News' has entered the computer age. Now reporters' typewriters have been replaced by computer screens and their stories are transmitted electronically to the sub-editors who check for mistakes, write headlines and determine what type-size it should be printed. This is done on screen before being sent electronically to be photo-set. When each page is finished it is made into a metal plate using lasers and is ready for printing. If all goes smoothly a story can take just half an hour to go through the entire system 87 02 16a & b

1987 Trumpington newsagent Bert Truelove is celebrating half a century in the trade – and he is only 57. He started selling papers in his father's Stapleford shop in 1937 when he was so small that he had to stand on a box to see the customers. After the war the family came to Trumpington and battled through years of austerity when a shortage of papers meant demand for copies of the News often succeeded supplies. It is a different picture now with a boom in sales. New technology ensures he gets the papers on time. He has not forgotten the paper boys and girls who have helped him over the years: they have been invited to a disco in the village hall. 87 02 27a

1987 Colin Moule succeeds Gordon Richards as editor Weekly News series – 87 03 12

1988 Cambridge Weekly News judged best free weekly 88 09 22

1988 Cambridge Evening News centenary year reviewed – 88 12 29b

1988 Mike Petty and Cambridge News centenary book – 88 05 28a 88 06 01a

1988 Loker and Co. Cambridge newsagents since 1861, is to close as a result of sweeping changes in newspaper and magazine wholesaling. Moved from corner of East Road and School House Lane in 1977 – 88 06 02

1988 Computers are the key weapon in the 'News' battle against deadlines. Previously crucial minutes were lost while journalists' stories were re-set into type by other staff. Now writing and typesetting can be done by one person. The process begins at 7.30 am each day. The newsdesk – run by the news editor, the assistant news editor, the chief reporter and an editorial assistant – decide on the best stories and brief the 15 reporters based in Newmarket Road and another eight in district officers. Stories flood in from every source imaginable and more than 100 press releases and letters are received each day 88 09 10 & a

1988 Seven newspapers in Cambridgeshire belonging to the Sharman family are to be sold, but the jobs of all 220 staff are safe. The titles, which include the Hunts Post, Ely Standard and Cambridgeshire Times will be bought by Thomson Regional Newspapers subject to referral to the Monopolies and Mergers Commission. Other titles included in the deal are the Peterborough, Wisbech and Kings Lynn Standards and the Rutland and South Lincs Classified. The news comes just a week after the funeral of the former managing director, Charles Sharman. 88 12 16

1989 CEN gets permission to move presses to Milton c89 06 08

1989 Work has begun to turn the CEN into the most advanced newspaper in East Anglia. By 1991 the News will be printed on a full-colour German press, the first in Britain, at a state-of-the-art press complex at Milton. It will include a paper store, press hall, four storey administration and engineering support block and a despatch area. A separate building will allow the company to service its own vehicles. Editorial, advertising, circulation and administration teams will remain at the head office in Newmarket Road. 89 10 27

1989 Yattendon Investment Trust, owners of the CEN & CWN buy Hertfordshire newspaper group – 89 04 21

1989 Cambridge Newspapers order new web-offset full-colour press to be located at a new printing complex at Milton – 89 04 27

1990 ` ‘Over the Bridge’ community magazine for Romsey to close after 100th issue - 90 11 23a

1991 Rodney Tibbs retires after 42 years at CEN – 91 02 04a

1992 Cambridge News new high-tech printing complex at Milton official opening [Rev]

2007 starts a morning edition from 21st May – CEN 19.05.2007

2007 Cambridge News wins Daily Newspaper of the Year award, Jan [Rev]

2012 Yatterndon Group sell Iliffe News & Media to Local World, a newly-formed media group. CN 22.11.2012 p2

ADDITIONAL STORIES

‘Grapevine’, May 1980

CEN one of 4 papers owned by Cambridge Newspapers Ltd; this in turn owned by Coventry Newspapers Ltd, which in its turn is owned by the ultimate Holding company Yattendon Investment Trust Ltd this owned & run for benefit of Iliffe family; head Lord Iliffe, 2nd Baron of Yattendon, a prominent member of landed classes in Midlands; was educated at Clare college present running of companies in hands of Baron’s nephew R.P.R. Iliffe, Eton & Oxford ... 3rd of 4 directors is A.J.H. Durham deputy chairman & managing director; has day-to-day control over running of company; senior committee member of Newspaper Society & past president. 1979 was paid £17,671 as highest-paid director Cambridge Newspapers very wealthy company particularly in comparison other provincial newspapers. 1977 had turnover of £4M. pre-tax profit £529,000 Cambridgeshire Weekly News started by W.F. Taylor in conjunction CDN, changed name as absorbed other papers, becoming CWN & Express, CIP & Weekly News, & CIP & Ch [12.3]

1975 News had healthy circulation of more than 50,000 in Cambridge & surrounding towns & provided Iliffe family proprietors with healthy profit. The figures for 1980-81 by contrast will show the paper to have made a loss of more than £500,000 having already shown a deficit of around £200,000 in 1979-80. The circulation has dropped in one year from 50,059 to 47,109. The main thing to have changed since 1975 is the flood of media into the area once monopolised by the Cambridge paper. Householders in Cambridge now have 3 weekly free sheets. From spring they will be able to listen to BBC Radio Cambridgeshire. In addition most people have commercial station Also free sheets in Hunts, St Neots & Saffron Walden where CEN has district offices. Free papers undercut advertising rates of News by up to 70p a centimetre & have duly reaped the benefits. Virtually all the estate agents deserted the CEN during the provincial journalists strike of 1978/9 & have never come back. Their business was worth £300,000 a year. They now advertise in the Town Crier which circulates in 71,000 Cambridge homes. News now responded by launching 5 of its weekly series of papers as free sheets with a combined circulation of 130,000. 5.9.1981 [13]

M.J.Petty. A Chronicle of Cambridge News 1888 -

c.06

c.06 - auctioneers, house prices etc

containing five pictures of residences which he wishes to dispose of. The illustrations are excellently printed on art paper and the whole production is a credit to the agency. CDN 1901 05 02

1907 'The Cambridge and District Property Register' published by Hockey, estate agents, comprises a list of 200 houses to be let or for sale. They vary in price from £75 to £2,500 with rents from £14 to £100. There is also a list of shops and business premises including seven lodging-houses. With several excellent coloured views this register is a very creditable production 07 09 04a

1908 The sale of the estate of Mr R.R. Rowe, late Borough Surveyor, includes a block of property mid-way between the station and the Post Office which would be suitable for the erection of a college, church, hotel or other business purposes. The residence known as Park

House on Parkside, together with houses in Fitzroy Street, King Street and French's Road are also offered in the largest sale held in Cambridge for some long time. 08 02 25 & a & 29

1909 Harry William Wallis, auctioneer, said he taken over the business from his father in 1907 and paid off his debts. As well as the ordinary business of auctioneer he also bought furniture which he sold at his weekly auction sales. He got into difficulties after a man offered him very cheap bicycles for sale for auction but then had not supplied them. Amongst those to which he owed money was a bedstead make in Dudley, a furniture dealer from Bethnal Green, a cabinet-maker from Hackney and P.A. Stevenson a Cambridge outfitter CWN 09 11 26

1910 William Hockey was the founder of the well-known auctioneering firm based in Bene't Street. As the agent for the De Freville Estate he had much to do with the development and planning of that part of New Chesterton which has rapidly become of so much importance. He also held an important and confidential position at Trinity College, where he was highly regarded, and was Secretary of the Excelsior Building Society. For the past 20 years he was a very well-known and popular figure in the business life of Cambridge. 10 05 13k

1911 In their report on the state of the property market in Cambridgeshire Messrs Rutter and Company say business has been disappointing during 1910. Only a small amount of property has changed hands in Cambridge for investment but with properties for occupation there had been a very fair demand at satisfactory prices. This has been caused by the scarcity of medium-sized available houses to rent. They have had a number of letters from buyers intimating that they intend to wait until the question of taxation has been straightened out. Prices for farms have been well maintained but the present harvest has been a poor one and the market must feel the effect 11 01 13e

1912 Arthur Tress Grain, founder of firm of auctioneers & estate agents – funeral – 12 04 26d
1912 The Mart in King Street has been constructed Mr J. Winship, the well-known auctioneer who has transformed what was originally a bare and ill-lighted bottling store into a fine salesroom. Soon 'The Mart' in 16-inch gold lettering will form a fitting crown to the red and gold colour scheme of the front of the premises. It is intended for the sale of furniture with a large skylight and powerful gas burners, adequate ventilation and heating. From the rostrum the auctioneer can easily see buyers and no serious bidder will fail to catch his eye 12 12 20b

1913 Mr J. Winship junior conducted his first furniture sale at The Mart, the splendid new auction rooms in King Street. They would conduct the business on business lines. They would have a sale when there was anything to sell and would not buy stuff to sell again. Furniture not sold would be stored and insured against fire free of cost and as the place was heated throughout by hot water pipes, the furniture would be kept in good condition. 13 02 28 CIP

1913 Messrs Hockey, the well-known Cambridge house agents testified that the owner of no.15 Lyndewode Road had asked them to sell her house. They sent particulars to 26 clients including Mr Neal who asked them to establish the lowest price, which was £1,000. Later the owner said she had sold it privately and disputed payment of their commission, offering three guineas instead. Hockey's agreed, providing it was not sold to Mr Neal. But he had bought it for £900 13 03 21 p5 CIP

1925 We regret to announce the death of Alderman W.T. See. He entered the office of the late Mr James Catling, auctioneer valuer, house and estate agent, with whom he served for 25 years. He gave up his work and devoted himself to music and became well-known as a teacher or organ and piano playing. He was conductor for many years of the Cambridge Choral Society. About

three years ago he re-entered business life, going into partnership with Mr P. Freeman, under the name of Messrs See & freeman, estate agents, Alexandra Street, Cambridge c25 03 10

1926 An article in "Country Life" relates to the house, no.21 Madingley Road Cambridge in a choice spot beside the Backs which is included in an auction sale. "Everyone knows that building is costly, but there will be curiosity as to how as much as £6,000 could be spent in building a house in which the chief accommodation consisted of only six bedroom. Some four years ago an American laid out that sum on the house which is he now vacating. The auctioneer have orders to treat on the basis of market value, not cost, so someone will get a bargain" c26 10 02

1928 What is probably the largest single deal in Cambridge business property ever known has just been completed. A well-known local young man has purchased property with frontages in Market Hill, Petty Cury and Sidney Street and this will be developed by a company consisting of Cambridge people. It includes premises occupied by the Craft Shoe Company, the Cambridge Chronicle offices and printing works and Boots the chemist. As Messrs Boots recently secured a large amount of property in Petty Cury and Sidney Street it would appear that big changes will be seen in this part of town when both sites are developed. c28 10 31

1931 Douglas January began (he died 1978) [1.4]

1934 The Perne Road Estate. Charming modern houses from £400 freehold. Every house contains entrance hall, drawing room, kitchen, dining room, three bedrooms, bathroom, separate W.C., H. & C. Water. Room for car. Small deposit (£25). Terms from 13/2 (65p) per week. Over 40 already sold. Drivers, Estate Agents – advertisement. 34 10 13

1935 Henry Philip Chalk was one of the best-known and respected auctioneers. He started business in Cambridge in 1880 as an agricultural auctioneer and valuer. Beside the stock sale which he conducted at the 'Earl of Derby' he attended the opening of the Cambridge Borough Market in 1885 at the same time as Mr A.T. Grain. In Linton he had a member of the parish council from its inception and chairman since 1907, a foundation manager of the church school and churchwarden for 54 years. In his younger days he was well-known as a fast bowler and represented Cambridgeshire at cricket 35 10 31a

1936 Cambridge – and indeed the whole of East Anglia – has lost one of its best-known and popular auctioneers by the death of Mr A.L. Rutter. He had carried on business as auctioneer, estate agent and surveyor in Cambridge ever since he left St Catharine's College in 1898. He held office in several professional institutions and was at one time a warden at St Botolph's church where his funeral will be held. 36 08 22c

1937 Douglas L. January started 1st Jan 1937 [NS3.2]

1937 Sidney Gordon Clark, antique dealer of Collins & Clark, dies – 37 01 13b

1937 The death occurred with tragic suddenness at the Gog Magog Golf Club of Percy William Gray, 65, who collapsed while practicing for a round. The club was immediately closed for the day. He was a member of the well-known auctioneer and estate agent firm, Gray, Son and Cook and was director of the Cambridge Waterworks and Gas Light Companies. In his younger days he played cricket, hockey, golf, rugby and 'soccer' and continued to hold various offices including President of the Cricket Association. He married Miss Strange, daughter of the Chesterton boat builder. 37 04 19

1938 Arthur Rutter auctioneers and estate agents Cambridge branch sold to staff – 38 12 31

1939 No.7 Petty Cury, comprising a double-fronted shop in the occupation of Messrs Lipton, the upper floors providing part of the bedroom accommodation of the Lion Hotel was offered for sale by auction. Shop property in the heart of the shopping centre of Cambridge seldom came to market by public auction and formed an excellent purchase for occupation, speculation or investment. It would be very difficult to find a much better investment. Demand was especially keen in Cambridge where the best shopping area was limited owing the centre being 'horseshoed' by college buildings. But it failed to reach its reserve and was withdrawn at £11,750 (about £650,000 today) 39 02 23a

1939 James Starr, a builder who was developing a building estate near Cambridge was approached by the Criterion Publicity Service about preparing a brochure describing the houses for sale. They would supply him with 250 copies free of charge, but had the right to obtain advertisements and retain the profits. But later they wanted £15 for printing blocks so Starr told them he would have nothing to do with the scheme. However they claimed £150 for breach of contract. 39 11 29a

1948 The many friends of Mr Robert William Bell, auctioneer and estate agent, will learn with regret of his death. He came to Cambridge 35 years ago and became recognised as one of the best auctioneers in Cambs. He was particularly well known not only on account of his business, in which he had a great many connections with agriculture, but also because of his preaching activities in most of the Baptist chapels in the area. Mr Bell loved horses and was a familiar sight in days gone by with his horse and gig, which he reluctantly gave up when motor cars became the fashion c48 04 22

1954 Watson's estate agents founded about 1880, opened in Cambridge 1954 – history – 71 11 23

1959 The 'average' young couple, where the husband is earning £700 a year, should have no difficulty in the Cambridge of today in finding or building a house for themselves. If they have the kind of status that satisfies bank managers they can get financial help from the building societies up to about 95% of the purchase price of £2,250. Many people have a car nowadays which means a distance of seven miles is no serious obstacle and they can enjoy the advantages of living in the country. They would derive little benefit from renting a house: on the rare occasion that unfurnished accommodation does become available it would equal the loan repayments on a house of their own 59 12 30c

1961 'The Willows', a six and a half acre piece of land at Cam Road, was one of the few building sites left in Cambridge. It was just a mile from the city centre with outline planning permission for the building of 200 flats in six blocks ranging from two to 15 storeys. The proposed new trunk road and bridge linking Chesterton and Newmarket road will pass the site. But it failed to reach the reserve price and was withdrawn from auction at £50,000 61 05 27

1962 King Street poultry mart held its last Christmas sale. It has existed for nearly 50 years and now the auctioneer Claude Kirkup and clerk, Alfred Harding will retire. Mr Kirkup, a well-known figure, has dealt with about 1,000 chickens, turkeys and geese this week alone. He started in the mart in 1918 and was joined by Mr Harding in 1922. The site was purchased recently by Jesus College 62 12 22

1965 Westley & Huff, estate agents partnership dissolved; formed in 1951 65 04 02a [1.1]

1965 Two and three-quarter acres of freehold building land at Grange Road with planning permission for 60 flats and 67 garages sold for £26,000 an acre at auction. Building of high-class

flats will start 'almost immediately'. This was probably the best piece of land ever made available for this type of development in Cambridge, said Douglas January & Partners 65 03 27b

1966 Catling Brady & Bliss formed - James Catling started as auctioneer & estate agent 1871, Brady joined 1895, Bliss 1959 [1.3]

1967 new partnership between Grain & Chalk of Chatteris & A.T.Grain & Sons; become Cheffins, Grain & Chalk [1.2]

1969 Edward Storey Foundation Trust sell 5 lots city centre land for £ 521,000 as want rebuild Shelley Row almshouses [1.6,1.7]

1969 Sale city centre property including Arts Cinema, Miller's Music, Eaden Lilley warehouse, Jarrolds – 69 07 02

1971 council paying equivalent of £ 300,000 an acre for parts of Lion Yard site, University want over £770,000 for 1,165 square yards of land entrance new car park [1.9]

1971 Catling Brady and Bliss celebrate centenary; started by James Catling in Free School Lane; Brady joined 1895, Bliss in 1959 – 71 07 07

1971 Watson's estate agents founded about 1880, opened in Cambridge 1954 – history – 71 11 23

1972 Kingston Street terrace house needing great repair fetched £3,050, leaves auctioneers gasping - year ago £1,500 [1.10]

1972 terrace house without bath, Halifax road £9,000 [1.13]

1972 Millington Road 3-bed house sells £26,250, £10,000 more than year ago [1.11]

1972 Grantchester Meadows semi sells for record price - £25,600 [1.14]

1972 Wilderspin Close neo-Georgian house doubles in year - £11,950 to £25,000 [1.12]

1973 house prices fall to new low, well below 18 months ago [2.2]

1973 Coleridge Road house prices :

1930s £450

1946 £2,000

1955 £2,500

1965 £4,000

1970 £5,000

1973 £10,000 [2.3]

1973 Crisps, Kings Parade bought by Kings College for £ 120,000 [2.4]

1974 city centre sit including Arts Cinema, Millers & part of Eaden Lilley auction, withdrawn at £687,500 (bought 1969 by David Robinson for £230,000 [1.5]

1974 Coral Estate, 1© acre site Coldham's Lane sold for almost £100,000 for £ industrial use [2.5]

1974 When Cyril Brady started in a Cambridge estate agents and valuers a new semi-detached house in the city sold for £425 cash or you could rent it for 14s.9d. a week. Now those same houses run to five figures and rent comes out at around £40 a month, unfurnished. The figures reflect the changes in the 41 years that Mr Brady has been in partnership which has been running under the name of Catling, Brady and Bliss since 1969 c74 01 14

1977 One of the most striking features in the property market has been the resurgence of interest in the small terraced city house in the Romsey Town area. Fifteen years ago one could have bought a two up, two down, for about £1,350. By 1967 the price was £2,200 rising to £5,500

by 1972 and is now £8,500 – and increase of 530 per cent. In De Freville Avenue a semi which cost £3,000 in 1962 is now £15,000, and in Queen Edith's Way the figures are £3,350 and £14,500. A post-war semi in Cherry Hinton has risen from £10,000 to £15,000 in the five years from 1972. c77 04 24

1978 County Council want sell 16 acres housing land off Northfields Avenue as has adequate for its needs, expects £0.5 million [2.6]

1978 house prices rocketing by £1,000 a month; 3-bed pre-war semi which £12,500 at Christmas now (June) worth £17,500 [11]

1978 One of Cambridge's most successful businessmen, Mr Douglas January has died. He built up an estate agent's enterprise from modest beginnings in 1937 to one of the largest in Cambridge, with branch offices in the main market towns in the area. He was also widely known in other community fields and was responsible for the successful fund-raising drive behind the launch of the Cambridge sports hall. He was President of the Cambridge Golf Union & Amateur Boxing Club and local sports clubs eagerly sought his patronage. c78 11 21

1979 building land equivalent £ 100,000 an acre [2.7]

1980 One of the biggest private houses & the last commercial farm in Cambridge is up for sale. Rectory Farm on Madingley Road, built 16 years ago, is regarded as an outstanding neo-Georgian design with five reception rooms, six bedrooms, two bathrooms and a swimming pool. It is set in three acres of mature gardens & could fetch around £250,000 80 07 12 [2.8]

1981 £130,000 an acre paid for 3.5 acre site Coleridge area; previous record £80,000 acre, Gilbert Rd [2.9]

1983 land Pound Hill sold equivalent of £560,000 an acre [2.10]

1983 Cambridge is close to the top of the house prices league with prices for terraced house comparable to those in parts of Greater London. A three-bed roomed post war terrace in a very desirable area can be as high as £45,000 compared to £21,000 in Ipswich, £31,500 in Brighton or £30,000 in Oxford 83 04 07 p13

1985 "little under £30,000" [2.11]

1986 Prices of terraced houses in the Cambridge area have gone up by 25 per cent in a year and now average £36,346. Flats and maisonettes have risen 20 per cent to £28,885, while semi-detached houses are up 14.2 per cent at £40,700. But detached homes have increased by only 5.2 per cent to £58,927. First-time buyers are borrowing around £28,600 on incomes of about £10,960. Funds are easily available and people still consider that buying a house is probably one of the best investments they can make, says the Halifax Building Society 86 01 30b [2.12]

1986 average price Cambridge now £57,000 [2.13]

1986 "spiralling house prices drive out city buyers" [2.14]

1987 city land tops £700-£750,000 an acre (? industrial) [2.15]

1987 Januarys taken over by Black Horse [NS2.7]

1987 Cambridge's oldest firm of solicitors, Francis & co which was founded in 1789, is to merge with Norwich-based Mills and Reeve to become one of the largest practices outside London. The move follows the merger of leading local accountants Chater & Myhill with Peat Marwick, the UK's leading accountancy practice. And it takes place during a period of extraordinary upheaval in estate agency which has seen the acquisition or merger of many firms

including Ekins, Mullucks, Hunters, Gray Cook, Regent Estates and Watsons. Almost all of them have been absorbed by insurance groups or building societies. 87 03 27a

1987 Estate agents, Cheffins Grain and Chalk are to merge with agricultural specialists Comins to form a new company. They will open a residential sales office in Soham and Cheffins will expand its Cambridge Machinery Sale. The merger occurs at a time of continuing turmoil within the estate agency business as national institutions take advantage of new rules to move on to the property scene. At least nine local agents have been involved in takeovers by banks, building societies or insurance companies. 87 05 20

1987 More than 500 Christmas turkeys, chicken and geese went under the hammer at Cambridge's turkey auction. Prices for turkeys from 62-83p per lb while chickens fetched 62-72p lb. The biggest seller was a king-sized 35lb stag turkey. 87 12 22

1988 Drivers estate agents change name to Cornerstone [CEN 12.8.88]

1988 Hunters Estate Agency to change to Wm H.Brown from Feb 1989, was set up 1984, merged with Brown 1986 [CEN 30.12.88]

1989 Arnolds estate agency renamed Halifax Property Services, was founded 1974, acquired 1988 [CEN 27.2.89]

1989 Clark Turner estate agent office sold Town and Country [CEN 11.5.89]

1989 solicitors Winter Wilkinson closes due house market slump - opened June 1987 CEN 25.10.89

1990

Cambridge's most luxurious flat is one of three penthouses in a new block called The Oast House at Pinehurst South off Grange Road. It has three bedrooms with a spiral staircase leading to a striking room like a Kentish oasthouse with a 25-foot ceiling and glass doors on to a roof garden. It will have all the luxury fittings expected including a video surveillance system. The Cambridge-based developer Nigel Grimshaw says "Nothing approaching it has ever been offered in Cambridge". The developers have produced a 52-page book listing its attributes 90 03 28a, b

1990 Desmond January retires after 50 years in estate agency; houses that sold for £750 in 1938 now make £120,000 – profile – 90 04 10b

1990 Southacre Park, Chaucer Road, site of mansion in 1880 which housed royal princes Albert & Henry while undergraduates now developed into luxury houses - 90 04 28c

1889 severe thunderstorm causes extensive damage [2.5]

1891 wall at Hyde Park corner blows down in gale, girl killed [2.2]

1894 serious floods [4.18,1.5]

1895 great frost lasted from January to March unbroken except for very brief thaws; from Jan 18 to 25 were snowstorms, floods & north-west gales; frosts of 15 to 20 degrees turned hundreds

of acres of flooded land into skating rinks; for 2 months was possible to skate from Cambridge to Grantchester or Ely. Three fields at Newnham flooded & electric lights allowed skaters to flock there in evenings; ice carnivals & skating races on river from Bottisham Lock to Ely [5]

1896 East Road school hit by lightning. July [1.11]

1896 earthquake felt in Cambridge, December [1.12]

1899 Can the meteorologists tell what has happened to the English climate? Last summer was hot, but the extraordinary protracted heat was set down as a meteorological eccentricity that was not likely to be repeated. Yet this summer the thermometer has been dancing between 80 and 90. If this happens another year it will be necessary to take counsel as to whether England should not adopt Indian usages. The mid-day siesta may come into vogue. But the weather is a fickle thing. One day it is oppressively hot, the next day it is delightfully cool. One summer it is the weather of the tropics; the next may be distinctly suggestive of the arctic circle c1899 07 16

1905 The other evening a large expanse of the north eastern sky was suffered with a rosy glow which waxed and waned in intensity. The light extended upwards from the horizon in a broad band and illuminated the edge of a thick bank of cloud towards the left of the moon. It is believed to be the Aurora Borealis, the famous northern light, though others felt it was caused by the moon shining through falling snow. 05 11 18c [2.13]

1906 Last night's gale was one of the most severe within living memory. Great damage was done all over Cambridge. On Newmarket Road a tall chimney at the brickworks began to sway violently and then fell with a tremendous crash. The large trees at the Backs suffered considerably; five were uprooted and blown into Queen's Road. During the morning numbers of poor people were busily engaged in taking away the portions they could carry for firewood. Two children took away a branch of considerable weight using a pair of wheels taken from a perambulator 06 01 06e

1906 The extraordinary weather was experienced in all its bewildering variety. Thunder, lightning, hail, snow and a hurricane provided a new experience. Many pedestrians were blown over by the wind which swept over the mill at Chippenham with such suddenness that before the sails could be adjusted, the top of the mill was blown off. The storm travelled at a remarkable pace. It took less than an hour to travel from Leicester to Cambridge. 06 02 09c

1906 For four days Cambridge has vainly been endeavouring to live in a temperature rising above 90 degrees in the shade, 125 in the sun. The first day of September was as hot as the last day of August and even now the heat shows little diminution. Nobody remembers such a succession of tropical heats so late in the season. The weather is in a curiously topsy-turvy condition 06 09 03 & a

1906 Such a Christmas as has just been experienced in Cambridge occurs but few times within a lifetime. A good old-fashioned Christmas when the brightly-blazing Yule log, or its modern equivalent, is necessary to counteract the efforts of King Frost is as a rule so old-fashioned that it seems to have existed only in the picturesque imaginations of the novelist and pictorial artist. So also is the Christmas-card Christmas with the country covered with the white mantle of snow. Yet the festival of 1906 has been remarkable for both 06 12 27

1906 Cambridge byelaws compel a householder to remove the snow from the path in front of his habitation, which provides an opportunity for out-of-works to earn an honest copper. One rang the bell of a corner house and informed the occupier that he had swept the snow from his path. Obviously the only thing to be done was to pay the man for his labour. But when he rang the bell of the adjoining house with many feet of frontage there was no answer: the occupants had gone away for Christmas but not drawn their blinds. Love's labour lost indeed! 06 12 29c

1907 In such a cold spell undergraduate etiquette is apt to go by the board. It is an unwritten law that no junior member of the University should, on pain of merciless chaffing, appear in academical dress plus an overcoat. The idea of cap and gown and gloves was simply horrifying. Yet both these laws have been broken with impunity. One young man appeared in public with cap, gown, overcoat and a pair of very aggressive yellow-brown gloves. 07 01 26a

1907 On Midsummer night the thermometer in a Cambridge hotel yard registered one degree less than on Christmas night! The weather has lately been enough to move one to despair – snow and hail fell in Scotland for nearly an hour until the mountains were mantled in white. Truly the gods must be offended. But while the hatters and tailors are lamenting over the lack of orders for straw hats and summer suits, the mackintosh merchant waxes fat on the proceeds of his sales. 07 06 29b

1907 What extraordinary weather we are experiencing! It reached its climax on September 25th when the hottest day of the year was reported and those on holidays are getting interest for delaying the spending of their annual vacation. The appearance of gardens is not synonymous with autumn, Strawberries are now providing a good crop, whilst roses are doing very well. 07 09 30b

1908 Ancient inhabitants rack their brains in vain for a parallel to the extraordinary weather of the past fortnight, bringing in its train a record crop of influenza. The changes from 20 degrees of frost to a damp muggy air and then back again have caused the National Skating Association to rearrange the Championships which took place at Lingay Fen in almost perfect conditions. The ice was hard and entries above average. 08 01 17b

1908 heavy snow April [2.15]

1908 A house in Castle Street was struck by lightning during a heavy thunderstorm which caused tremendous damaged and rendered it uninhabitable. A brick chimney stack fell with an appalling crash into the bedrooms beneath, which have been completely wrecked. It is a semi-detached residence of three storeys and reputed to be the highest inhabited point in Cambridge. CWN 08 06 05 p5 [2.17]

1910 A hurricane with winds of 80 mph caused considerable damage. Hoardings in Belmont Place, King Street, belonging to the Billposting Company were unable to withstand the onslaught of the wind and fell while a large elm tree opposite Trinity Fellows' Garden was bespoiled of its top. At Ely Cathedral a window depicting St John the Baptist was damaged; the apostle's head was blown out but falling upon the lawn, the glass was not broken. At St Ives the wind blew down the home signal on the railway line and caught the gable end of Mr Holloway's music shop in Bridge Street, blowing off four yards of tiles. CWN 10 02 25a & b

1911 The dry weather has led to great scarcity of water in many parts and if the drought continues the Army planned manoeuvres might be abandoned. The brooks and ponds in many places are completely dry, rivers are running lower than in living memory and farmers are at their wits' end to know how to provide water for their cattle. Water trains will soon have to be organised though unfortunately some of the worst villages on the clay hills of Huntingdonshire are remote from the railways. However at most seaside places nearly every room is occupied and the summer of 1911 will be long remembered as the best on record by boarding-house keepers 11 08 18m

1911 The longest drought since 1887 has happily come to an end and heavy rains have reduced the torrid heat. In Cambridge the hottest day was August 9th when the temperature was 95 degrees in the shade. Messrs Pain's records go back 43 years and the only other record of that figure was on 15th August 1876. During violent thunderstorms lightning set fire to farm buildings at Friday Bridge but the brigade was powerless as there was no water to put it out. 11 08 25a

1911 A most welcome break in the long-sustained drought came when the first really wet day for months was hailed with the joy and gladness with which people generally welcome fine weather. Rain fell all day, having a marvellous effect in clearing the air and bringing down the temperature. It was like stepping from blazing August to chill gloomy November. Normally everyone would have been dismal and depressed. But everybody has been thoroughly saturated with sunshine and turned to the mud and drizzle with positive delight, splashing through puddles with utmost cheerfulness. This year has been the driest on record. 11 09 15g

1911 Break in drought – 11 09 23

1912 April a record drought but only 5 rainless days in August [2.14]

1914 serious floods - worse since 1879 [2.24]

1914 Storm and Floods. responsible for considerable damage to telegraph and telephone wires. The heavy downpour of rain and the blinding snowstorm late at night found the weak spots in an enormous number of house roofs in Cambridge, and the exceptional downpour swelled the stream of the Cam until the water flowed over the banks. The greater part of Midsummer Common was covered with water and the paths were impassable. Boathouse and boathouse yards were flooded and military men who were billeted in the boathouses were seriously inconvenienced. In several instances they were compelled to seek billets elsewhere. Thousands of acres of land in and around Cambridge were flooded. 14 12 25 CIPof

1914 Heavy snow fell but melted quickly causing floods greater than in 1912. In Cambridge thousands of acres were submerged, Sheep's Green was like an inland sea and a sheet of water extended from Victoria Bridge over Midsummer Common. At Jesus Sluice the river was rushing through the lock like a mill race and there was barely a foot of difference between the levels of the water at the weir. Some of the military horses and wagons on Butt's Green had to be moved out of the reach of the water. Along the Backs the tennis lawns at Trinity College, where part of the First Eastern Hospital stood in the autumn, was submerged. The telegraph service was completely suspended as wires gave way under the combined pressure of wind and snow. Water forced itself into the junction boxes of the Cambridge Electric Supply Company's main across Jesus Green and sections of the town were without electricity supply. The whole of the valley of the Granta from Newnham to Shelford was extensively flooded. All the skating meadows at Newnham were covered and the University Bathing Sheds were completely cut off. At Grantchester the road by the Orchard Tea Gardens was submerged and near the mill water rushed across the road, knee deep. Considerable damage was done to the road surface, large quantities of metal being washed away. Two organ grinders coming from Trumpington were conversing in broken English over the number of miles they would have to go round to avoid a ducking

1916 heavy snow, snow ploughs needed, soldiers snowball fight Parkers Piece [2.25]

1916 floods Sheep's Green, Coe Fen etc, boathouses rise from water [2.26]

1916 March blizzards. The wind, which had been boisterous during the day, developed into a heavy gale, accompanied by snow. A good deal of damage was done to telegraph and telephone wires, trees were uprooted. On Tuesday morning the ground was covered with snow. Trains were late owing to wires being down. Rain set in during the day, but towards the close of the afternoon this turned to snow. The wind, too, increased in violence until it was blowing quite a hurricane. Huge trees gave way before the violence of the wind, chimney pots and slates came crashing down, whilst many fences collapsed. The Corporation workmen had to be called out to assist in clearing away fallen trees, and to assist the police in warning vehicles. Several pedestrians had narrow escapes. Among the many trees which fell was the famous plane tree in the Catholic Rectory grounds, which has been visited by arboriculturists from all over the world. 16 03 29 CIPof

1916 In the wake of the blizzard – photo feature – clearing trees – 16 04 05

1917 Highest flood between Jesus Lock and Baitsbite Lock was 1917 when nearly two feet water over office floor; river bank broke Brandon Creek and flooded fen around Southery which quickly cleared water at Abbey Road – H.C. Banham – 46 03 02b, 46 03 09a

1918 highest floods since 1879, April [1.9]

1918 Floods.—the severe weather and the thaw had further detrimental effects upon the trees at the Backs of the Colleges and our riverside walks. Many old familiar arboreal friends have been dismembered, notably the veteran weeping willow on the south-west side of Trinity College Bridge. The floods which followed the thaw rose to a considerable height and considerable damage is now seen to have been done to the river banks at Sheep's Green. Part of the trouble here is said to have been caused through the flood gates at the Apron being out of repair 18 01 30 CIPof

A great flood - higher level than has been recorded since the great storm of August 3, 1879 Miles of country were under water on Wednesday; roads and paths were rendered impassable to foot passengers, the ferries at Cambridge were stopped, low-lying houses and premises near the river were flooded and the water was up to the permanent way of the railway between Chesterton and Waterbeach. The river has shown more frequent tendencies to flood of late years than, formerly - one cause is said to be the clearing-out of ditches and water courses by War Agricultural Committees 18 04 24 CIPof

1919 Serious Floods.—Not for many years has the County of. Cambridge been visited by floods of such magnitude or of so serious a nature as those experienced within the last ten days. Thousands of] acres are under water, and at Cambridge the water rose at one time to within six inches of the height reached by the memorable flood of 1879. At Ely the river touched a depth beyond any previously attained within the memory of the oldest inhabitants. It is good news to hear that since Sunday the water has been steadily falling. A serious break in the river bank midway between Waterbeach and Upware last Wednesday resulted in the disastrous flooding of hundreds of acres of low-lying land in the vicinity, the temporary isolation of several farms and cottages and considerable damage to stacks. On Tuesday night ... above the banks at Waterbeach Fen where the break in the river bank occurred, and farmers took prompt steps to remove their stock to safety, but on Wednesday morning a break occurred, and the breach rapidly becoming wider, the water poured through. Farm buildings and cottages were surrounded, and the Inhabitants in some cases were forced to seek shelter in the village. All Wednesday farm workers and other helpers from Waterbeach and district worked up to their knees in water, but the gap widened, and it was found necessary to sink two barges in the breach. Thousands of sandbags were requisitioned and by this means the hole was filled and the inflow of water at this spot checked. Men have been employed night and day in "cradging" along the banks and strengthening the places where any water was found overflowing, this also being done on the Stretham bank of the Old West 19 02 26 CIPof [1.14]

1919 Magistrate Summoned. — At the Cambridge Borough Court, a County magistrate living in Hills Road, Cambridge, was summoned that, as occupier of premises, he did not as soon as conveniently may be after the cessation of a fall of snow, remove or cause to be removed from the footway and pavement all snow on such footway and pavement. He did not appear, but sent a letter to the Bench explaining that he only had one domestic, and could not call on her to clear the snow away. An odd man, who was called, wanted art extravagant sum for removing it. The Mayor said the case was a proper one for the police to bring before the court. It was a considerable comfort to the public if every householder cleared away the snow from his own frontage. He warned the public that cases of this kind would be dealt with more severely in the future, but as this was the first of the kind to come before the Bench this year, they had decided to dismiss it on payment of costs. 19 02 06 CIPof

1920 Cowper Road houses struck by lightning, June [2.18]

1921 intense heat causes fires, including Midsummer Common, July & August; 14 months of drought [1.17,4.10]

1921 Bateman Street houses struck by lightning, July [2.16]

1922 wettest July since 1865 [1.18]

1926 floods on Coe Fen & Sheeps Green, February [1.20]

1926 Earthquake shocks of unusual severity were felt on Sunday morning. In Cambridge occupants were awakened by the rattle of windows, crockery and furniture. Two residents in West Road were aroused from sleep by the oscillation of their beds; a lofty wardrobe continued to shake and its contents to rattle for some time. Railwaymen on night duty said the telegraph poles rattled and the windows of signal cabins shook. Several residents of Huntingdon felt three tremors c26 08 16

1927 snow began Christmas day & led to most complete stoppage of road & rail traffic since coming of motor car [1.13]

1928 gale damages Fred Hiams residence Grange Road, Jan [2.20]

1928 The great gale which swept the country blew down trees, damaged roofs and caused damage. The most serious loss is the removal of the roof of the grandstand on the Cambridge Town Football Club's ground. The cross at St Barnabas church was carried away but no person was injured in its fall. Hoardings on the LNER Railway's property near Cambridge station have been razed to the ground and the line was blocked by a signal that was blown down near Waterbeach. At Trinity College the famous 'Sedgwick Elm' in the Fellows' Garden was partly blown down. At Ely two large sheets of lead were lifted on the roof of the cathedral nave and a huge chicken shed in Lynn Road was completely demolished. c28 11 20 [1.21]

1929 Lent races postponed[1.10,5]]

1929 For the first time since 1895 there was skating on the River Cam. A thick sheet of ice powered with white snow, stretched unbroken from Silver Street to the electric light works. It was too inviting to be resisted and several skating parties took advantage of it. Many undergraduates took to the ice in front of King's College and at Quayside a man was seen cycling on the slippery surface. However the ice bore and he neither came off nor went in. At Silver Street it was possible to cross to the mill on the ice but below Jesus Lock, where the dredges is at work, the ice was broken up by the flow and black pools and crevices had appeared in the thin surface. c29 02 16

1929 All Cambridge seemed to be skating or carrying skates this morning and there is something like five inches of ice on many parts of the Granta. Eight hardy spirits took the plunge at the Town Bathing Sheds though it took nearly half an hour to break the ice. There have been bathers ever since the front began and many of them have hardly missed a day. The cold was so severe that the comb stuck in the head of one of them who was doing his hair. But the Open Flying Mile Straight Race, fixed to take place at Cowbit Wash, near Spalding, was abandoned after the Skating Association reported that it was not possible to provide a straight mile course to conform with the conditions. c20 02 17

1929 Sir: Quite a number of people took advantage of the frozen river last weekend to skate to Ely and among them were three Newnham girls. It is 34 years since last such a journey was possible. There was only one day's skating on the river in 1901. It was February 1895 that the river last admitted skating to Ely and I and two friends undertook the journey. On arrival it was

suggested we continue to Denver Sluice but after two miles the ice was very bad, so we returned. I wonder how many have ever succeeded in it, a distance of 72 miles there and back. I am fond of skating and have been to Ely five times – ‘Septuagenarian’ – CDN 22.2.1929

1930 worst gale in living memory brings down trees, January [1.25]

1930 Seven deaths have been reported from various parts of the country and no break is expected in the heat wave. In Cambridge temperatures of 88 degrees were recorded in the shade, two lower than yesterday. A girl in green striped pyjamas was seen in one of the main thoroughfares, an extreme symptom of the heat wave that holds the town in its grip. There was an outbreak of open-necked shirts whilst those who were less courageous fingered the tight damp bands that had once been collars and wondered whether respectability was worth while. At midnight there were bathing parties by the banks of the Cam 30 08 28 [2.1]

1931 Grafton Street house struck by lightning [2.19]

1931 It was a very gentle earthquake in Cambridge: suddenly in the silence of a calm and tranquil night there came a mysterious, slow, oscillatory motion, quickening and increasing in intensity. It seemed as if a giant hand had seized the bed and was shaking it, gently but with irresistible might. A washstand was overturned at Comberton but houses were rocked at Ely where some of the foundations were heard to crack. At St Ives people sought refuge on the Market Hill and could not be induced to return to bed. 31 06 12c & d & e

1931 Cambridge earthquake 30 years ago – memories – 64 04 23

1932 succession of meteorites, August [1.2]

1933 Does the present succession of mild Januaries suggest something in the nature of a change in climate? Today amateur gardeners have standard and rambler roses in full bloom, primroses blooming in clumps, stocks, polyanthus – indeed a show of flowers usually retarded by frost until spring. 33 01 06

1933 The mildness of the winter has given gardeners something to talk about. Even the frost has failed to kill off all the roses and some were in full bloom at Cottenham with the first snowdrops flowering between the standards. Flowers gathered before the frost set in and put into water have a more powerful scent than usual. But are these the first roses of summer or the last? 33 02 11b

1934 fish 2 inches long rain on Market Hill, March [1.1]

1935 Cambridge goes white – snow complaints – 35 01 28

1935 The hamlets of Pymore and Oxloade suffered severely by the visitation of a hail storm, the worst in living memory. It stripped slates and tiles from the roofs of houses and smashed windows. Scarcely a residence escaped and numerous cases of ten, twelve and even fourteen windows being broken in one house were reported. Holy Trinity church and day school had the entire side windows smashed and both Methodist chapels suffered badly. The LNER signal box had nine windows broken and the roof damaged. Hundreds of birds and small animals were killed. 35 09 23b

1936 Damaged houses, a blocked road and wrecked telephone wires marked the route of the great storm through Cambridge and district. The first ominous rumblings were heard comparatively early but not until the crowds began to pour out of the cinemas after the last performance did the rain stream down and great flashes of forked lightning rend the sky. Cambridge seemed to be almost surrounded by thunderstorms, for sheets of light flashed on the horizon at every point of the compass 36 06 20

1936 Thick fog invaded Romsey Town hours before it reached Huntingdon Road. Once it settled it did so in earnest and visibility was practically nil. Buses were reduced to trailing through the streets on the heels of the conductors and even they could not see their way properly: one stopped himself just in time from leading a No.106 into the pit on Newmarket Road. Where conditions were not quite so bad drivers 'convoyed' and as many as six buses were seen in single file. One conductor walked from Cambridge to Ely, leading his bus – and did the journey in 4½ hours 36 12 10a

1938 aurora borealis seen [2.3]

1938 earthquake felt, June [2.4]

1938 After many hours of continuous snow-fall 400 men commenced work on the gigantic task of clearing a path for road traffic and pedestrians and six snow ploughs were brought into use. The three new motor ploughs were a great success and buses were able to keep to schedule exceptionally well. But everything is disorganised at the post office: some of the mail trains are arriving late and it looks as if letter deliveries will have to be pushed right up to Christmas Day. A large crowd skated on a flooded meadow at Newham but at Milton Sewage Farm the ice was too thickly coated with snow. 38 12 22 & a

1939 Huntingdon Road house struck by lightning [2.21]

1939 After many hours of continuous snowfall — the longest, if not the deepest, fall for many years—a partial thaw set in. In Cambridge 400 men were employed (during the fall of snow) to clear a path for road traffic and pedestrians, and six snow ploughs were brought into use. 38 12 23 CIPof

1939 George Pearson of Fen Road Milton said he was about to milk his cows when the whole yard suddenly lit up and he noticed a brilliant white light moving across the sky. There were no flames coming from it; it was something like an electric light. Then there was a boom like thunder – he thought the I.R.A. was trying to blow up the bridge. The meteor was also seen by Mr Ketch of Corporation Terrace, Cheddars Lane; a blue light followed by a red glow passed over him with a whizzing noise and afterwards came an explosion. 39 02 20 39 02 24 CIPof

1940 Heavy fall of snow on Hauxton Rd, Jan 1940 – photo – 40 02 08

1947 heavy snow, German prisoners of war employed clearing streets extensive flooding, March

1947 The work of clearing Cambridge streets of snow is costing £500 a day. Every available lorry and a labour force in the region of 400 men is engaged in the task. There is a generally held view in the town that the snow clearers are doing a hard job very well. Meanwhile there has been an almost cheerful acceptance of the inconveniences. For the second morning in succession, most of Cambridge walked to work today - strange sight in the normally bicycle-crowded streets c47 03 10

1948 What is thought to be the biggest earth tremor in East Anglia since 1757 occurred in the King's Lynn, Bury St Edmunds, Mildenhall and Cambridge area last Friday. Observers distinctly felt it. In some places it was accompanied by a rumbling noise. A Cambridge resident said; "I distinctly felt a 'bubbling' movement and heard a slight rumbling noise while sitting in the living room after tea. I took no further notice, however, thinking it may have been a passing bus or heavy vehicle" c48 06 03

1952 For Cambridge 1951 was again a "very wet year". Ald F. Dogget said the figure of 27.57 inches was well above the average. There were only 150 days without rain. It was an exceptionally wet Spring and gardeners will remember we had only six fine week-ends during

that period. The heaviest fall was on August 6th and during a thunderstorm on July 30th. The longest spell of fine weather lasted for 13 consecutive days between May 27th and June 9th. In the county Lt-Col Thornhill of Manor House, Boxworth, said it was the wettest year since 1937 c52 01 09

1953 Queen Mother visits WVS clothing depot dealing with East Coast floods [1.24]

1954 A large meteorite is believed to have been seen over Cambridge. Following reports that an explosion, thought to have been due to a meteorite smashing into the earth's atmosphere, had rocked Dieppe about 160 miles from Cambridge, several members of the City Police Force have claimed to have seen the object. P.C. R. Barlow, on duty in Drummer Street described 'a meteorite of exceptional size, oval-shaped and green in colour' falling in a south-east direction. Other policemen claim to have seen the flash as it apparently struck the earth. c54 01 07

1954 Parts of the river Cam were frozen over this morning after a night of extremely cold conditions. The maximum temperature yesterday was 31 degrees F. but last night it dropped to 18 degrees. The severe weather had caused all previous output records to be broken at the Cambridge Gas Works. c54 01 27

1956 1" rain in 20 minutes floods basements [4.1]

1956 Cambridgeshire was hit by the second arctic spell over the weekend. Snow, ice and biting winds brought treacherous conditions to many of the roads, but no major accidents were reported. Last night the temperature dropped to 18 degrees, at 9am today it was 25.7. The Waterworks Company dealt with over 1,000 burst pipes over the last cold spell and expect there will be many more when the pipes thaw out after the present freeze-up. 56 02 20a

1958 snow blocks roads worse than 1947, February 58 02 26b & c [2.6]

1959 flooding, January [2.72.27]

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 Many roads were flooded following a torrential downpour. Policemen with red warning lights patrolled parts of Queen's Road which was covered to a depth of 18-inches in parts and the roadway at Chesterton Hall Crescent was also under water. Wilberforce Road was the most seriously affected where water poured off a nearby playing field and fences were pulled up to divert the flow away from houses. The Wheatsheaf Inn at Harlton and a cottage at Barton Road Haslingfield were also inundated. This has been one of the wettest years recorded in Cambridge. 60 11 02b

1961 It is going to be even colder than it was during most of the Christmas freeze-up when ice on the Cam trapped several swans in the water. On Christmas morning fire appliances went to St Giles' church where a small fire severely damaged an electric motor in the organ. They were also called to Avery's scale makers premises in Regent Street and at Joseph Lucas on Newmarket Road where pipes in the ceilings burst and flooded the premises. The Waterworks Company dealt with 30 burst pipes on Christmas Day 61 12 27 61 12 30

1962 Many Cambridgeshire villages are without electricity as eight inches of snow dislocated traffic and communications. Engineers had difficulties getting to the trouble through road blocks, fallen telephone wires and diversions. Snow ploughs have been working on the roads throughout the night. Railways have been badly affected with a drift between Shepreth and Royston making

only single line traffic possible. It was the coldest night in Cambridgeshire since February 1917

[4.2]

1962 Supplies of salt are fast running out at Cambridge grocery shops as people adopt a ‘do-it-yourself’ policy towards clearing away the snow from their doorsteps. In two of the largest stores stocks of block or crushed cooking salt are negligible. But there is still plenty at the Corporation store yard in Mill Road despite a considerable amount being used on the streets. Hard-packed frozen snow still prevails on all roads and overnight fog reduced visibility. One result of the snow-up in Royston was the postponement of the meeting of the Urban Council 62 10 03

1962 Hundreds of building workers have been laid off because of the severe freeze-up. Many have taken temporary jobs with the City Council as snow cleaners; so far 250 extra men have been put on to help the 50 regular council workmen. In addition 46 extra lorries have been hired with 10 bulldozers and two crawler shovels. Gangs are working 24 hours a day gritting and sanding the roads. The cost of all the extra work will be ‘pretty heavy’ 62 01 03a

1962 great blanket of snow, 24¢ frost, December [2.8,2.9]

1962 The fog which came down over the Cambridge area was blown here from London by a twelve-knot wind, says meteorologists. London, having its first clear day since Monday was like an oasis surrounded by a slowly-clearing fog belt though mainline trains were still meeting long delays and London Airport was closed. The number of sudden deaths in the capital has now reached 106. Conditions were still grim in East Anglia with temperatures remaining well below zero and part of the River Cam froze between Pye’s Bridge and Garret Hostel Lane. 62 12 05 & 07

1963 People travelling to work were delayed after three buses were put out of action with frozen fuel pipes. Sunshine encouraged many skaters on the River Cam along the Backs where ice is two-inches thick but the Met Office warns there is no sign of a break in the very cold weather. Snow and ice has brought outside work on building sites to a standstill though many firms are keeping on men to help with snow clearing. Demand for coal has shot up as have the number of telephone calls with people ringing up to say they are suffering from the acute weather conditions – 63 01 03 Cambridge shops dim lights to conserve power 63 01 14 63 01 15

1963 Seven-foot drifts block county, 400 workmen fight to keep traffic moving – 63 01 01

1963 Cambridge’s new radio-telescope at Lord’s Bridge will be the most advanced in its field. Three giant reflector dishes, two fixed and one moveable, will receive radio signals from the universe. The mobile aerial will travel on a half-mile length of rail at a speed of one mile an hour. Prof Martin Ryle said that ten years ago nobody could have dreamed about this type of radio telescope. It was unique in the world today. The millions of copper needles launched into space by the Americans would not affect its working at present, but might well do so in the future. 63 05 22a

1963 People in Kings Hedges Road thought a bomb had dropped in the street when a thunderbolt hit no.39 and shattered the windows of houses hundreds of yards away. After crashing through the house it flashed along electricity cables the length of the street. All the pipes in the house split open as well as the asbestos walls and ceilings. Light switches were pushed out of the wall and all the light bulbs in the house next door dropped out. The gas meter caught fire, lumps of concrete and plaster shot out across the room. 63 07 05d

1968 new sewers save city from floods - no extensive flooding after storm. Riverside people sand bag houses 68 09 16, 68 09 18[4.5,4.6]

1969 blizzard causes havoc, snow traps scores in Cambridge [4.7]

1970 Campkin Road flooded after deluge, June : 2© feet of water gushed into houses, waves caused by passing vehicles pushed water back, King St, Northampton St flooded 70 06 26 a & b [2.16,4.8]

1973 Total disaster faces the world in about two generations according to Prof Mike Pentz of the Open University. Speaking in Cambridge he said so much energy is now being burnt that the temperature of earth's atmosphere will rise by half a degree. "This will melt the polar caps and start a runaway reaction which will raise the ocean levels by a height which will bring about disastrous flooding." A rise of 100 feet in this country would put Cambridge well beneath the waves c73 12 21

1976 hurricane force winds & blizzard bring chaos January [4.9]

1976 It is NOT the driest summer in the Cambridge area for 500 years, or even 250 years – and that is official. Cambridge Water Company strongly suspected the statisticians were becoming over-excited. Now its doubts have been confirmed. Weathermen have been forced to admit that the months from October 1920 until November 1921 were even drier; during that time there were 13.4 inches of rain in the Cambridge area, compared to 15 inches in the same period up to the end of June this year c76 10 02 [4.10]

1976 Extreme heat has begun to take its toll of animals and people, with little sign of letting up. For the past three days temperature has been in the 90s and this afternoon was a scorching 98 degrees Fahrenheit. At Cambridge abattoir in Coldham's Lane one animal died on the premises and three others have been dead on arrival because of the intense heat which induces heart attacks. At Haverhill Furniture Ltd, Rookwood, the management has been giving free drinks from an automatic machine while half of the fixed skylights at Taylor's Foundry have been removed to encourage a breeze c76 06 28

1977 Heavy snow hit Cambridge as the worst weather for 14 years caused nationwide chaos and led to widescale disruption on the roads and railways. Weathermen say the snowfalls will be heavy and prolonged and warm winds could produce drifts. In many places there were snowfalls of more than one foot. Thousands of people were late for work as hard-packed snow, freezing fog and black ice made driving treacherous. And many trains were late or cancelled despite an all-night fight against the Arctic conditions by British Rail who called in their full cold weather emergency procedures. CDN c15.1.1977 [4.11]

1978 A tornado cut a two-mile swathe through Newmarket. Roofs were ripped off buildings, windows smashed and cars overturned. Every window in the railway station signal box was smashed. Chief Inspector Trevor Hewitt of Newmarket police said: "It's a disaster area. It was just a freak storm and only lasted a couple of minutes. The damage is appalling. Roofs have caved in, windows have been smashed and cars overturned". In Cambridge the wind lifted the roof from a house in King Street. c78 01 06 [4.12]

1979 bitter winter, Feb [4.13]

1979 As Britain faced yet another day of icy chaos with more bitterly cold weather on the way, the Army was making plans to move in and clear snowbound roads, said the 'Snow Minister', Mr Denis Howell. In Cambridgeshire workmen battled to clear some of the worst snowfalls, 179 snowploughs and diggers are out but salt stocks are reaching a critical level. Seven weather-hit coach passengers were put up at Parkside police headquarters; they were given mattresses and bedded down in the gym. But there has been a sudden cut back in crime figures; even burglars and thieves are staying at home CEN c16 Feb 1979

1981 Mid Anglia is counting the cost of the worst storms to hit in more than ten years. At least five homes in Cambridge were damaged by lightning, together with two at Abington. More than 20 houses had to be pumped dry after flooding with water eight inches deep in houses in Eaton Socon. Amateur weatherman, Percy Ashman says the last 24 hours were the wettest since September 1968. 81 08 07b [4.14]

1981 Cambridge could be a busy coastal town in 50 years' time due to a 23 feet rise in sea level caused by the melting of the south polar caps, scientists at the British Antarctic Survey say. The increasing amount of carbon dioxide in the atmosphere means the earth cannot cool itself as efficiently as previously. This is popularly known as the 'greenhouse effect'. 81 12 01

1981 Motorists faced a nightmare journey to work with several main roads blocked by heavy snow. Saffron Walden was snowed in & Royston and Haverhill were cut off as was Cottenham, Waterbeach, Fulbourn and Sutton. Cambridge police rescued 130 people trapped in their cars and about half the county schools were closed as teachers could not get to work 81 12 14; gritters – 81 12 15

1982 violent storm causes chaos, basements flooded sewage etc [3.1]

1985 snow, Feb [4.15]

1986 Winds gusting up to 70mph brought chaos, killing one man, injuring others and causing thousands of pounds' damage. In Cambridge King's Parade was sealed off after material was dislodged from the chapel roof and an international computer exhibition at the University Centre was called off after windows and skylights were smashed. Duxford Museum closed after gales damaged a replica Spitfire and blew over a security man and a corrugated iron roof was ripped off the old Falcon Hotel ballroom in St Neots 86 03 24

1986 Percy Ashman has been keeping an eye on the weather since 1935 with the aid of several instruments. His latest is a storm bottle device that dates back to the last century and was used in the mills of the north country as weaving and dyeing were dependent on the weather. It uses an old wooden bobbin taken from a Yorkshire mill attached to a glass phial containing a secret amber liquid which rises when rain is on the way. Percy's predictions can be relied on and his telephone is always busy with people calling for a quick forecast 86 09 10

1987 The AA were inundated by calls to motorists stranded in the snow and hundreds more were caught without anti-freeze as overnight temperatures plunged to -11C. The River Cam was iced up for the first time in five years and skaters were out in force on the flooded fen at Earith in perfect conditions of ice, sun and no wind. Many were practicing for the Fen Ice Skating Championships but for others it was pure pleasure. 87 01 13

1987 Summer sizzled into Mid Anglia in the last week of April – hot on the heels of some of the worst gales the country had ever seen. But as winter spirits lifted the temperature took a downward plummet and left us all shivering again. May slid by with some cold, wet and miserable weather and June was no better until the end of the month when the sun wiped away the gloom with a glorious burst of summer that rocked the temperatures into the mid 80s. But it didn't last long and the wet weather was back in July and dripped into August for another gloomy month. But amateur weatherman Percy Ashman says the first two weeks of September should be good – that's when he's going on holiday 87 08 28

19887 Overnight gales and torrential rain devastated the region with winds of more than 100 mph. The atrocious weather disrupted rail and bus services, trees were uprooted, one falling on the roof of a bungalow in Duchess Drive, Newmarket while Wandlebury Woods was devastated with more than 200 trees blown down. Saffron Walden High School had to close after windows

were smashed. Power supplies were disrupted causing chaos at pumping stations and Byron's Pool has been placed on red alert as the threat of serious flooding increased. 87 10 16 & a

c.12.1 – snow, cold

1895 great frost lasted from January to March unbroken except for very brief thaws; from Jan 18 to 25 were snowstorms, floods & north-west gales; frosts of 15 to 20 degrees turned hundreds of acres of flooded land into skating rinks; for 2 months was possible to skate from Cambridge to Grantchester or Ely. Three fields at Newnham flooded & electric lights allowed skaters to flock there in evenings; ice carnivals & skating races on river from Bottisham Lock to Ely [5]

1906 Such a Christmas as has just been experienced in Cambridge occurs but few times within a lifetime. A good old-fashioned Christmas when the brightly-blazing Yule log, or its modern equivalent, is necessary to counteract the efforts of King Frost is as a rule so old-fashioned that it seems to have existed only in the picturesque imaginations of the novelist and pictorial artist. So also is the Christmas-card Christmas with the country covered with the white mantle of snow. Yet the festival of 1906 has been remarkable for both 06 12 27

1906 Cambridge byelaws compel a householder to remove the snow from the path in front of his habitation, which provides an opportunity for out-of-works to earn an honest copper. One rang the bell of a corner house and informed the occupier that he had swept the snow from his path. Obviously the only thing to be done was to pay the man for his labour. But when he rang the bell of the adjoining house with many feet of frontage there was no answer: the occupants had gone away for Christmas but not drawn their blinds. Love's labour lost indeed! 06 12 29c

1907 In such a cold spell undergraduate etiquette is apt to go by the board. It is an unwritten law that no junior member of the University should, on pain of merciless chaffing, appear in academical dress plus an overcoat. The idea of cap and gown and gloves was simply horrifying. Yet both these laws have been broken with impunity. One young man appeared in public with cap, gown, overcoat and a pair of very aggressive yellow-brown gloves. 07 01 26a

1907 On Midsummer night the thermometer in a Cambridge hotel yard registered one degree less than on Christmas night! The weather has lately been enough to move one to despair – snow and hail fell in Scotland for nearly an hour until the mountains were mantled in white. Truly the gods must be offended. But while the hatters and tailors are lamenting over the lack of orders for straw hats and summer suits, the mackintosh merchant waxes fat on the proceeds of his sales. 07 06 29b

1908 Ancient inhabitants rack their brains in vain for a parallel to the extraordinary weather of the past fortnight, bringing in its train a record crop of influenza. The changes from 20 degrees of frost to a damp muggy air and then back again have caused the National Skating Association to rearrange the Championships which took place at Lingay Fen in almost perfect conditions. The ice was hard and entries above average. 08 01 17b

1908 heavy snow April [2.15]

1916 heavy snow, snow ploughs needed, soldiers snowball fight Parkers Piece [2.25]

1919 Magistrate Summoned. — At the Cambridge Borough Court, a County magistrate living in Hills Road, Cambridge, was summoned that, as occupier of premises, he did not as soon as conveniently may be after the cessation of a fall of snow, remove or cause to be removed from the footway and pavement all snow on such footway and pavement. He did not appear, but sent a letter to the Bench explaining that he only had one domestic, and could not call on her to clear the

snow away. An odd man, who was called, wanted art extravagant sum for removing it. The Mayor said the case was a proper one for the police to bring before the court. It was a considerable comfort to the public if every householder cleared away the snow from his own frontage. He warned the public that cases of this kind would be dealt with more severely in the future, but as this was the first of the kind to come before the Bench this year, they had decided to dismiss it on payment of costs.19 02 06 CIPof

1927 snow began Christmas day & led to most complete stoppage of road & rail traffic since coming of motor car [1.13]

1929 For the first time since 1895 there was skating on the River Cam. A thick sheet of ice powered with white snow, stretched unbroken from Silver Street to the electric light works. It was too inviting to be resisted and several skating parties took advantage of it. Many undergraduates took to the ice in front of King's College and at Quayside a man was seen cycling on the slippery surface. However the ice bore and he neither came off nor went in. At Silver Street it was possible to cross to the mill on the ice but below Jesus Lock, where the dredges is at work, the ice was broken up by the flow and black pools and crevices had appeared in the thin surface. c29 02 16

1929 All Cambridge seemed to be skating or carrying skates this morning and there is something like five inches of ice on many parts of the Granta. Eight hardy spirits took the plunge at the Town Bathing Sheds though it took nearly half an hour to break the ice. There have been bathers ever since the front began and many of them have hardly missed a day. The cold was so severe that the comb stuck in the head of one of them who was doing his hair. But the Open Flying Mile Straight Race, fixed to take place at Cowbit Wash, near Spalding, was abandoned after the Skating Association reported that it was not possible to provide a straight mile course to conform with the conditions. c20 02 17

1929 Sir: Quite a number of people took advantage of the frozen river last weekend to skate to Ely and among them were three Newnham girls. It is 34 years since last such a journey was possible. There was only one day's skating on the river in 1901. It was February 1895 that the river last admitted skating to Ely and I and two friends undertook the journey. On arrival it was suggested we continue to Denver Sluice but after two miles the ice was very bad, so we returned. I wonder how many have ever succeeded in it, a distance of 72 miles there and back. I am fond of skating and have been to Ely five times – 'Septuagenarian' – CDN 22.2.1929

1935 Cambridge goes white – snow complaints – 35 01 28

1939 After many hours of continuous snowfall — the longest, if not the deepest, fall for many years—a partial thaw set in. In Cambridge 400 men were employed (during the fall of snow) to clear a path for road traffic and pedestrians, and six snow ploughs were brought into use. 38 12 23 CIPof

1947 heavy snow, German prisoners of war employed clearing streets extensive flooding, March

1947 The work of clearing Cambridge streets of snow is costing £500 a day. Every available lorry and a labour force in the region of 400 men is engaged in the task. There is a generally held view in the town that the snow clearers are doing a hard job very well. Meanwhile there has been an almost cheerful acceptance of the inconveniences. For the second morning in succession, most of Cambridge walked to work today - strange sight in the normally bicycle-crowded streets c47 03 10

1954 Parts of the river Cam were frozen over this morning after a night of extremely cold conditions. The maximum temperature yesterday was 31 degrees F. but last night it dropped to 18 degrees. The severe weather had caused all previous output records to be broken at the Cambridge Gas Works. c54 01 27

1956 Cambridgeshire was hit by the second arctic spell over the weekend. Snow, ice and biting winds brought treacherous conditions to many of the roads, but no major accidents were reported. Last night the temperature dropped to 18 degrees, at 9am today it was 25.7. The Waterworks Company dealt with over 1,000 burst pipes over the last cold spell and expect there will be many more when the pipes thaw out after the present freeze-up. 56 02 20a

1958 snow blocks roads worse than 1947, February 58 02 26b & c [2.6]

1961 It is going to be even colder than it was during most of the Christmas freeze-up when ice on the Cam trapped several swans in the water. On Christmas morning fire appliances went to St Giles' church where a small fire severely damaged an electric motor in the organ. They were also called to Avery's scale makers premises in Regent Street and at Joseph Lucas on Newmarket Road where pipes in the ceilings burst and flooded the premises. The Waterworks Company dealt with 30 burst pipes on Christmas Day 61 12 27 61 12 30

1962 Many Cambridgeshire villages are without electricity as eight inches of snow dislocated traffic and communications. Engineers had difficulties getting to the trouble through road blocks, fallen telephone wires and diversions. Snow ploughs have been working on the roads throughout the night. Railways have been badly affected with a drift between Shepreth and Royston making only single line traffic possible. It was the coldest night in Cambridgeshire since February 1917 62 01 01 Queens Road & Earl Street with snowed-up cars – photo – 62 01 01a

1962 Clearing snow St Andrews Street & dumping it at Quayside – photos – 62 01 02b [4.2]

1962 Supplies of salt are fast running out at Cambridge grocery shops as people adopt a 'do-it-yourself' policy towards clearing away the snow from their doorsteps. In two of the largest stores stocks of block or crushed cooking salt are negligible. But there is still plenty at the Corporation store yard in Mill Road despite a considerable amount being used on the streets. Hard-packed frozen snow still prevails on all roads and overnight fog reduced visibility. One result of the snow-up in Royston was the postponement of the meeting of the Urban Council 62 10 03

1962 Hundreds of building workers have been laid off because of the severe freeze-up. Many have taken temporary jobs with the City Council as snow cleaners; so far 250 extra men have been put on to help the 50 regular council workmen. In addition 46 extra lorries have been hired with 10 bulldozers and two crawler shovels. Gangs are working 24 hours a day gritting and sanding the roads. The cost of all the extra work will be 'pretty heavy' 62 01 03a

1962 great blanket of snow, 24¢ frost, December [2.8,2.9]

1962 The fog which came down over the Cambridge area was blown here from London by a twelve-knot wind, says meteorologists. London, having its first clear day since Monday was like an oasis surrounded by a slowly-clearing fog belt though mainline trains were still meeting long delays and London Airport was closed. The number of sudden deaths in the capital has now reached 106. Conditions were still grim in East Anglia with temperatures remaining well below zero and part of the River Cam froze between Pye's Bridge and Garret Hostel Lane. 62 12 05 & 07

1963 7 foot drifts, minus 32¢, water mains frozen, January, skaters on Backs [2.10,2.11,2.12,4.3]

1963 Seven-foot drifts block county, 400 workmen fight to keep traffic moving – 63 01 01

1963 People travelling to work were delayed after three buses were put out of action with frozen fuel pipes. Sunshine encouraged many skaters on the River Cam along the Backs where ice is two-inches thick but the Met Office warns there is no sign of a break in the very cold weather. Snow and ice has brought outside work on building sites to a standstill though many firms are keeping on men to help with snow clearing. Demand for coal has shot up as have the number of telephone calls with people ringing up to say they are suffering from the acute weather conditions – 63 01 03 Cambridge shops dim lights to conserve power 63 01 14 63 01 15

1963 Temperatures amongst lowest ever recorded with 35 degrees of frost – 63 01 22

1963 Temperatures rose above freezing point for the first time in ten days but electricity cuts almost paralysed in the county. 63 01 26

1969 Snow traps scores in Cambridge – 69 02 08, 08a

1977 Heavy snow hit Cambridge as the worst weather for 14 years caused nationwide chaos and led to widescale disruption on the roads and railways. Weathermen say the snowfalls will be heavy and prolonged and warm winds could produce drifts. In many places there were snowfalls of more than one foot. Thousands of people were late for work as hard-packed snow, freezing fog and black ice made driving treacherous. And many trains were late or cancelled despite an all-night fight against the Arctic conditions by British Rail who called in their full cold weather emergency procedures. CDN c15.1.1977 [4.11]

1979 bitter winter, Feb [4.13]

1979 As Britain faced yet another day of icy chaos with more bitterly cold weather on the way, the Army was making plans to move in and clear snowbound roads, said the ‘Snow Minister’, Mr Denis Howell. In Cambridgeshire workmen battled to clear some of the worst snowfalls, 179 snowploughs and diggers are out but salt stocks are reaching a critical level. Seven weather-hit coach passengers were put up at Parkside police headquarters; they were given mattresses and bedded down in the gym. But there has been a sudden cut back in crime figures; even burglars and thieves are staying at home CEN c16 Feb 1979

1981 Motorists faced a nightmare journey to work with several main roads blocked by heavy snow. Saffron Walden was snowed in & Royston and Haverhill were cut off as was Cottenham, Waterbeach, Fulbourn and Sutton. Cambridge police rescued 130 people trapped in their cars and about half the county schools were closed as teachers could not get to work 81 12 14; gritters – 81 12 15

1985 snow, Feb [4.15]

1987 The AA were inundated by calls to motorists stranded in the snow and hundreds more were caught without anti-freeze as overnight temperatures plunged to -11C. The River Cam was iced up for the first time in five years and skaters were out in force on the flooded fen at Earith in perfect conditions of ice, sun and no wind. Many were practicing for the Fen Ice Skating Championships but for others it was pure pleasure. 87 01 13

1988 Road, rail and air services were all thrown into chaos as heavy snow brought mayhem 88 01 22

c.12.2 – sun, drought, heat

1899 Can the meteorologists tell what has happened to the English climate? Last summer was hot, but the extraordinary protracted heat was set down as a meteorological eccentricity that was not likely to be repeated. Yet this summer the thermometer has been dancing between 80 and 90. If this happens another year it will be necessary to take counsel as to whether England should not adopt Indian usages. The mid-day siesta may come into vogue. But the weather is a fickle thing. One day it is oppressively hot, the next day it is delightfully cool. One summer it is the weather of the tropics; the next may be distinctly suggestive of the arctic circle c1899 07 16

1906 For four days Cambridge has vainly been endeavouring to live in a temperature rising above 90 degrees in the shade, 125 in the sun. The first day of September was as hot as the last day of August and even now the heat shows little diminution. Nobody remembers such a succession of tropical heats so late in the season. The weather is in a curiously topsy-turvey condition 06 09 03 & a

1907 What extraordinary weather we are experiencing! It reached its climax on September 25th when the hottest day of the year was reported and those on holidays are getting interest for delaying the spending of their annual vacation. The appearance of gardens is not synonymous with autumn, Strawberries are now providing a good crop, whilst roses are doing very well. 07 09 30b

1911 The dry weather has led to great scarcity of water in many parts and if the drought continues the Army planned manoeuvres might be abandoned. The brooks and ponds in many places are completely dry, rivers are running lower than in living memory and farmers are at their wits' end to know how to provide water for their cattle. Water trains will soon have to be organised though unfortunately some of the worst villages on the clay hills of Huntingdonshire are remote from the railways. However at most seaside places nearly every room is occupied and the summer of 1911 will be long remembered as the best on record by boarding-house keepers 11 08 18m

1911 The longest drought since 1887 has happily come to an end and heavy rains have reduced the torrid heat. In Cambridge the hottest day was August 9th when the temperature was 95 degrees in the shade. Messrs Pain's records go back 43 years and the only other record of that figure was on 15th August 1876. During violent thunderstorms lightning set fire to farm buildings at Friday Bridge but the brigade was powerless as there was no water to put it out. 11 08 25a

1911 A most welcome break in the long-sustained drought came when the first really wet day for months was hailed with the joy and gladness with which people generally welcome fine weather. Rain fell all day, having a marvellous effect in clearing the air and bringing down the temperature. It was like stepping from blazing August to chill gloomy November. Normally everyone would have been dismal and depressed. But everybody has been thoroughly saturated with sunshine and turned to the mud and drizzle with positive delight, splashing through puddles with utmost cheerfulness. This year has been the driest on record. 11 09 15g

1911 Break in drought – 11 09 23

1912 April a record drought but only 5 rainless days in August [2.14]

1921 intense heat causes fires, including Midsummer Common, July & August; 14 months of drought [1.17,4.10]

1930 Seven deaths have been reported from various parts of the country and no break is expected in the heat wave. In Cambridge temperatures of 88 degrees were recorded in the shade, two lower than yesterday. A girl in green striped pyjamas was seen in one of the main thoroughfares, an extreme symptom of the heat wave that holds the town in its grip. There was an

outbreak of open-necked shirts whilst those who were less courageous fingered the tight damp bands that had once been collars and wondered whether respectability was worth while. At midnight there were bathing parties by the banks of the Cam 30 08 28 [2.1]

1933 Does the present succession of mild Januaries suggest something in the nature of a change in climate? Today amateur gardeners have standard and rambler roses in full bloom, primroses blooming in clumps, stocks, polyanthus – indeed a show of flowers usually retarded by frost until spring. 33 01 06

1933 The mildness of the winter has given gardeners something to talk about. Even the frost has failed to kill off all the roses and some were in full bloom at Cottenham with the first snowdrops flowering between the standards. Flowers gathered before the frost set in and put into water have a more powerful scent than usual. But are these the first roses of summer or the last? 33 02 11b

1976 It is NOT the driest summer in the Cambridge area for 500 years, or even 250 years – and that is official. Cambridge Water Company strongly suspected the statisticians were becoming over-excited. Now its doubts have been confirmed. Weathermen have been forced to admit that the months from October 1920 until November 1921 were even drier; during that time there were 13.4 inches of rain in the Cambridge area, compared to 15 inches in the same period up to the end of June this year c76 10 02 [4.10]

1976 Extreme heat has begun to take its toll of animals and people, with little sign of letting up. For the past three days temperature has been in the 90s and this afternoon was a scorching 98 degrees Fahrenheit. At Cambridge abattoir in Coldham's Lane one animal died on the premises and three others have been dead on arrival because of the intense heat which induces heart attacks. At Haverhill Furniture Ltd, Rookwood, the management has been giving free drinks from an automatic machine while half of the fixed skylights at Taylor's Foundry have been removed to encourage a breeze c76 06 28

1989 "Costa del Cambridge" possible due greenhouse effect c76 11.4.89

c.12.3 – aurora, meteors, fog

1905 The other evening a large expanse of the north eastern sky was suffered with a rosy glow which waxed and waned in intensity. The light extended upwards from the horizon in a broad band and illuminated the edge of a thick bank of cloud towards the left of the moon. It is believed to be the Aurora Borealis, the famous northern light, though others felt it was caused by the moon shining through falling snow. 05 11 18c [2.13]

1932 succession of meteorites, August [1.2]

1936 Thick fog invaded Romsey Town hours before it reached Huntingdon Road. Once it settled it did so in earnest and visibility was practically nil. Buses were reduced to trailing through the streets on the heels of the conductors and even they could not see their way properly: one stopped himself just in time from leading a No.106 into the pit on Newmarket Road. Where conditions were not quite so bad drivers 'convoyed' and as many as six buses were seen in single file. One conductor walked from Cambridge to Ely, leading his bus – and did the journey in 4½ hours 36 12 10a

1938 aurora borealis seen [2.3]

1939 Meteor Seen in Cambridgeshire. Mr. George Pearson, of Fen Road, Milton, who said it came into view at 6.10 a.m. "I had got up to milk my cows," he went on. "As I stood outside my cowshed, the yard suddenly became lit up. I saw a brilliant white light moving across the sky. There were no flames coming from it: it was something like an electric light" 39 02 24 CIPof

1954 A large meteorite is believed to have been seen over Cambridge. Following reports that an explosion, thought to have been due to a meteorite smashing into the earth's atmosphere, had rocked Dieppe about 160 miles from Cambridge, several members of the City Police Force have claimed to have seen the object. P.C. R. Barlow, on duty in Drummer Street described 'a meteorite of exceptional size, oval-shaped and green in colour' falling in a south-east direction. Other policemen claim to have seen the flash as it apparently struck the earth. c54 01 07

1962 The fog which came down over the Cambridge area was blown here from London by a twelve-knot wind, says meteorologists. London, having its first clear day since Monday was like an oasis surrounded by a slowly-clearing fog belt though mainline trains were still meeting long delays and London Airport was closed. The number of sudden deaths in the capital has now reached 106. Conditions were still grim in East Anglia with temperatures remaining well below zero and part of the River Cam froze between Pye's Bridge and Garret Hostel Lane. 62 12 05 & 07

c.12.5 – flood

Campkin Road July 1970

89.33

1894 serious floods [4.18,1.5]

1913 The heavy and almost continuous rains are having a serious effect in Soham. The whole countryside is saturated and ditches full to overflowing. At Greenhills water is level with the cottagers' gardens and paths and roads are impassable. the outlook is extremely serious. A hundred acres are flooded due to the unsafe condition of the river bank which is in a state of collapse. Farmers fear grain will rot in the ground, some having been covered with water since before Christmas. The roads are in shocking condition, the heavy farm traffic having cut them up to such an extent it is impossible to cycle over them 13 01 24 p11 CIP

1914 serious floods - worse since 1879 [2.24]

1914 Storm and Floods. responsible for considerable damage to telegraph and telephone wires. The heavy downpour of rain and the blinding snowstorm late at night found the weak spots in an enormous number of house roofs in Cambridge, and the exceptional downpour swelled the stream of the Cam until the water flowed over the banks. The greater part of Midsummer Common was covered with water and the paths were impassable. Boathouse and boathouse yards were flooded and military men who were billeted in the boathouses were seriously inconvenienced. In several

instances they were compelled to seek billets elsewhere. Thousands of acres of land in and around Cambridge were flooded. 14 12 25 CIPof

1915 A heavy downpour of rain experienced last week caused the River Cam to overflow its banks, and the low lands adjoining the river were extensively flooded. At Grantchester the road from the mill to Trumpington was submerged for a distance of about 400 yards on Friday and Saturday, the road being impassable except in a vehicle. The water rose very rapidly on Friday, Sheep's Green, Newnham and Coe Fen became impassable, whilst Chesterton Meadows became inundated, the water encroaching halfway across the roadway at Water Street, Old Chesterton. The ferries below Victoria Bridge were unable to be worked during the weekend, but were able to resume on Monday. Although the commons were not flooded to anything like the extent they were following the blizzard towards the end of last month, large pools of water existed at places. At Jesus Sluice there was only a difference of about a foot between the levels of the water above and below the locks. The river has now gone down, and is almost at its normal level 15 01 29 CIPof

1916 Flood scenes in Cambridge following heavy snow – Midsummer Common, Riverside – 16 03 08e

1917 Highest flood between Jesus Lock and Baitsbite Lock was 1917 when nearly two feet water over office floor; river bank broke Brandon Creek and flooded fen around Southery which quickly cleared water at Abbey Road – H.C. Banham – 46 03 02b, 46 03 09a

1918 highest floods since 1879, April [1.9]

1918 Floods.—the severe weather and the thaw had further detrimental effects upon the trees at the Backs of the Colleges and our riverside walks. Many old familiar arboreal friends have been dismembered, notably the veteran weeping willow on the south-west side of Trinity College Bridge. The floods which followed the thaw rose to a considerable height and considerable damage is now seen to have been done to the river banks at Sheep's Green. Part of the trouble here is said to have been caused through the flood gates at the Apron being out of repair 18 01 30 CIPof

1918 A great flood - higher level than has been recorded since the great storm of August 3, 1879 Miles of country were under water on Wednesday; roads and paths were rendered impassable to foot passengers, the ferries at Cambridge were stopped, low-lying houses and premises near the river were flooded and the water was up to the permanent way of the railway between Chesterton and Waterbeach. The river has shown more frequent tendencies to flood of late years than, formerly - one cause is said to be the clearing-out of ditches and water courses by War Agricultural Committees 18 04 24 CIPof

1919 Floods highest since 1879; homes inundated Riverside & Newnham, parapet of house in Parker St collapses – 19 02 19a

Serious floods, river bank gives way between Waterbeach and Upware, worst in living memory, men cradling on Stretham bank and Old West. One cause is clearing of streams above Cambridge last summer and accumulation in the river-beds below. Dredging scheme needed; photos – 19 02 26a & b

1919 Serious Floods.—Not for many years has the County of Cambridge been visited by floods of such magnitude or of so serious a nature as those experienced within the last ten days. Thousands of acres are under water, and at Cambridge the water rose at one time to within six

inches of the height reached by the memorable flood of 1879. At Ely the river touched a depth beyond any previously attained within the memory of the oldest inhabitants. It is good news to hear that since Sunday the water has been steadily falling. A serious break in the river bank midway between Waterbeach and Upware last Wednesday resulted in the disastrous flooding of hundreds of acres of low-lying land in the vicinity, the temporary isolation of several farms and cottages and considerable damage to stacks. On Tuesday night ... above the banks at Waterbeach Fen where the break in the river bank occurred, and farmers took prompt steps to remove their stock to safety, but on Wednesday morning a break occurred, and the breach rapidly becoming wider, the water poured through. Farm buildings and cottages were surrounded, and the inhabitants in some cases were forced to seek shelter in the village. All Wednesday farm workers and other helpers from Waterbeach and district worked up to their knees in water, but the gap widened, and it was found necessary to sink two barges in the breach. Thousands of sandbags were requisitioned and by this means the hole was filled and the inflow of water at this spot checked. Men have been employed night and day in "cradging" along the banks and strengthening the places where any water was found overflowing, this also being done on the Stretham bank of the Old West 19 02 26 CIPof [1.14]

1922 wettest July since 1865 [1.18]

1926 floods on Coe Fen & Sheeps Green, February [1.20]

1934 fish 2 inches long rain on Market Hill, March [1.1]

1952 For Cambridge 1951 was again a "very wet year". Ald F.Dogget said the figure of 27.57 inches was well above the average. There were only 150 days without rain. It was an exceptionally wet Spring and gardeners will remember we had only six fine week-ends during that period. The heaviest fall was on August 6th and during a thunderstorm on July 30th. The longest spell of fine weather lasted for 13 consecutive days between May 27th and June 9th. In the county Lt-Col Thornhill of Manor House, Boxworth, said it was the wettest year since 1937 c52 01 09

1956 1" rain in 20 minutes floods basements [4.1]

1959 flooding, January [2.72.27]

1960 Many roads were flooded following a torrential downpour. Policemen with red warning lights patrolled parts of Queen's Road which was covered to a depth of 18-inches in parts and the roadway at Chesterton Hall Crescent was also under water. Wilberforce Road was the most seriously affected where water poured off a nearby playing field and fences were pulled up to divert the flow away from houses. The Wheatsheaf Inn at Harlton and a cottage at Barton Road Haslingfield were also inundated. This has been one of the wettest years recorded in Cambridge. 60 11 02b

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1982 violent storm causes chaos, basements flooded sewage etc [3.1]

c.12.6 – gales, hurricanes

1891 wall at Hyde Park corner blows down in gale, girl killed [2.2]

1906 Last night's gale was one of the most severe within living memory. Great damage was done all over Cambridge. On Newmarket Road a tall chimney at the brickworks began to sway violently and then fell with a tremendous crash. The large trees at the Backs suffered considerably; five were uprooted and blown into Queen's Road. During the morning numbers of poor people were busily engaged in taking away the portions they could carry for firewood. Two children took away a branch of considerable weight using a pair of wheels taken from a perambulator 06 01 06e

1906 The extraordinary weather was experienced in all its bewildering variety. Thunder, lightning, hail, snow and a hurricane provided a new experience. Many pedestrians were blown over by the wind which swept over the mill at Chippenham with such suddenness that before the sails could be adjusted, the top of the mill was blown off. The storm travelled at a remarkable pace. It took less than an hour to travel from Leicester to Cambridge. 06 02 09c

1910 A hurricane with winds of 80 mph caused considerable damage. Hoardings in Belmont Place, King Street, belonging to the Billposting Company were unable to withstand the onslaught of the wind and fell while a large elm tree opposite Trinity Fellows' Garden was bespoiled of its top. At Ely Cathedral a window depicting St John the Baptist was damaged; the apostle's head was blown out but falling upon the lawn, the glass was not broken. At St Ives the wind blew down the home signal on the railway line and caught the gable end of Mr Holloway's music shop in Bridge Street, blowing off four yards of tiles. CWN 10 02 25a & b

1928 gale damages Fred Hiams residence Grange Road, Jan [2.20]

1928 The great gale which swept the country blew down trees, damaged roofs and caused damage. The most serious loss is the removal of the roof of the grandstand on the Cambridge Town Football Club's ground. The cross at St Barnabas church was carried away but no person was injured in its fall. Hoardings on the LNER Railway's property near Cambridge station have been razed to the ground and the line was blocked by a signal that was blown down near Waterbeach. At Trinity College the famous 'Sedgwick Elm' in the Fellows' Garden was partly blown down. At Ely two large sheets of lead were lifted on the roof of the cathedral nave and a huge chicken shed in Lynn Road was completely demolished. c28 11 20 [1.21]

1930 worst gale in living memory brings down trees, January [1.25]

1935 The hamlets of Pymore and Oxloade suffered severely by the visitation of a hail storm, the worst in living memory. It stripped slates and tiles from the roofs of houses and smashed

windows. Scarcely a residence escaped and numerous cases of ten, twelve and even fourteen windows being broken in one house were reported. Holy Trinity church and day school had the entire side windows smashed and both Methodist chapels suffered badly. The LNER signal box had nine windows broken and the roof damaged. Hundreds of birds and small animals were killed. 35 09 23b

1936 Damaged houses, a blocked road and wrecked telephone wires marked the route of the great storm through Cambridge and district. The first ominous rumblings were heard comparatively early but not until the crowds began to pour out of the cinemas after the last performance did the rain stream down and great flashes of forked lightning rend the sky. Cambridge seemed to be almost surrounded by thunderstorms, for sheets of light flashed on the horizon at every point of the compass 36 06 20

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1976 hurricane force winds & blizzard bring chaos January [4.9]

1978 A tornado cut a two-mile swathe through Newmarket. Roofs were ripped off buildings, windows smashed and cars overturned. Every window in the railway station signal box was smashed. Chief Inspector Trevor Hewitt of Newmarket police said: "It's a disaster area. It was just a freak storm and only lasted a couple of minutes. The damage is appalling. Roofs have caved in, windows have been smashed and cars overturned". In Cambridge the wind lifted the roof from a house in King Street. c78 01 06 [4.12]

1981 Mid Anglia is counting the cost of the worst storms to hit in more than ten years. At least five homes in Cambridge were damaged by lightning, together with two at Abington. More than 20 houses had to be pumped dry after flooding with water eight inches deep in houses in Eaton Socon. Amateur weatherman, Percy Ashman says the last 24 hours were the wettest since September 1968. 81 08 07b [4.14]

1986 Winds gusting up to 70mph brought chaos, killing one man, injuring others and causing thousands of pounds' damage. In Cambridge King's Parade was sealed off after material was dislodged from the chapel roof and an international computer exhibition at the University Centre was called off after windows and skylights were smashed. Duxford Museum closed after gales damaged a replica Spitfire and blew over a security man and a corrugated iron roof was ripped off the old Falcon Hotel ballroom in St Neots 86 03 24

1987 Overnight gales and torrential rain devastated the region with winds of more than 100 mph. The atrocious weather disrupted rail and bus services, trees were uprooted, one falling on the roof of a bungalow in Duchess Drive, Newmarket while Wandlebury Woods was devastated with more than 200 trees blown down. Saffron Walden High School had to close after windows were smashed. Power supplies were disrupted causing chaos at pumping stations and Byron's Pool has been placed on red alert as the threat of serious flooding increased. 87 10 16 & a

c.12.7 – lightning

1889 severe thunderstorm causes extensive damage [2.5]

1896 East Road school hit by lightning. July [1.11]

1908 A house in Castle Street was struck by lightning during a heavy thunderstorm which caused tremendous damaged and rendered it uninhabitable. A brick chimney stack fell with an appalling crash into the bedrooms beneath, which have been completely wrecked. It is a semi-detached residence of three storeys and reputed to be the highest inhabited point in Cambridge. CWN 08 06 05 p5 [2.17]

1920 Cowper Road houses struck by lightning, June [2.18]

1921 Bateman Street houses struck by lightning, July [2.16]

1931 Grafton Street house struck by lightning [2.19]

1939 Huntingdon Road house struck by lightning [2.21]

c.12.8 – earthquakes

1896 earthquake felt in Cambridge, December [1.12]

1926 Earthquake shocks of unusual severity were felt on Sunday morning. In Cambridge occupants were awakened by the rattle of windows, crockery and furniture. Two residents in West Road were aroused from sleep by the oscillation of their beds; a lofty wardrobe continued to shake and its contents to rattle for some time. Railwaymen on night duty said the telegraph poles rattled and the windows of signal cabins shook. Several residents of Huntingdon felt three tremors c26 08 16

1931 It was a very gentle earthquake in Cambridge: suddenly in the silence of a calm and tranquil night there came a mysterious, slow, oscillatory motion, quickening and increasing in intensity. It seemed as if a giant hand had seized the bed and was shaking it, gently but with irresistible might. A washstand was overturned at Comberton but houses were rocked at Ely where some of the foundations were heard to crack. At St Ives people sought refuge on the Market Hill and could not be induced to return to bed. 31 06 12c & d & e

1938 earthquake felt, June [2.4]

1948 What is thought to be the biggest earth tremor in East Anglia since 1757 occurred in the King's Lynn, Bury St Edmunds, Mildenhall and Cambridge area last Friday. Observers distinctly felt it. In some places it was accompanied by a rumbling noise. A Cambridge resident said; "I distinctly felt a 'bubbling' movement and heard a slight rumbling noise while sitting in the living room after tea. I took no further notice, however, thinking it may have been a passing bus or heavy vehicle" c48 06 03

1892 trees planted along Victoria Avenue [1.9]

1894 Victoria Avenue trees removed as need room for Royal Agricultural Show & put in nursery plot on Chesterton side of river, replanted when over [1.9]

1897 Chesterton Road limes planted to commemorate Queen Victoria's Diamond Jubilee [1.10]

1897 Florists' Society demise, 1897 04 24 p2 CDN

1906 years ago Cambridge was noted as a centre growing the finest tulips, craze died down but now reviving [3.5]

1906 Last night's gale was one of the most severe within living memory. Great damage was done all over Cambridge. On Newmarket Road a tall chimney at the brickworks began to sway violently and then fell with a tremendous crash. The large trees at the Backs suffered considerably; five were uprooted and blown into Queen's Road. During the morning numbers of

poor people were busily engaged in taking away the portions they could carry for firewood. Two children took away a branch of considerable weight using a pair of wheels taken from a perambulator 06 01 06e

1906 No one who has seen the courts of many of the old colleges in early summer, well furnished with window-boxes full of luxuriant plants can deny they add greatly to their beauty. There is not much variety in the contents: usually geraniums, calceolarias and Paris daisies, while lobelia hangs down from them in long trails. In winter small shrubs, generally variegated, are used.06 04 23a

1906 Gardeners beware: your neat little flower patches are in danger from apparently innocent young children. They will make flattering comments upon your show of roses, geraniums and other blooms but when no one is about they will quickly open the garden gate and before you realise it, the best of your blooms are torn off. Sometimes the flowers are within reach of a small hand thrust through the railings and they will mysteriously disappear. 06 08 04

1907 trees planted on west side of Queens Road between West Road & Burrell's Walk [2.6]

1910 Much to the regret of the Proprietors of the Cambridge University and Town Roller Skating Rink, who have taken a lease of the beautiful Pythagoras Gardens, and to the disappointment of the public generally, it has been found necessary, owing to complications arising as a result of a misunderstanding between themselves, the lessees and Merton College, Oxford, the owners, to discontinue the use of the gardens for public entertainment. For some time past, hundreds of visitors have spent an enjoyable hour upon the open-air rink and splendid lawns – 10 07 08aa

1911 Plant Breeding Institute founded (75 years ago 1986) [5.10]

1911 P.C. John Wallage heard a noise in St John's college garden, looked over the hedge and saw the prisoner pulling up beetroot and putting them in a sack. The man ran off down Madingley Road. When caught he used very bad language and threatened to 'bash his brains out' and shoot him. The language woke a gardener living 100 yards away. Frederick Hutt, gardener at St John's College found the place where some beetroot had been growing: they were very similar to the ones in the sack. The thief was fined ten shillings 11 09 15b

1912 Hyde Park Corner Lombardy Poplar cut down, was planted by Julian Skrine in his garden at Lensfield, the grounds of which extended to where the Catholic Church now stands [2.10 & 2.22]

1912 In 1898 a number of men in the neighbourhood of Newmarket Road decided to form an allotment association to acquire land that the Co-operative Society were relinquishing. 12 02 23f

1913 Cambridge Allotment Committee regulations say holders should keep plots free from weeds and not plant any fruit trees or bushes, strawberry plants, asparagus, rhubarb or any other market garden crops which produce for two or more years They could erect a tool house, greenhouse, fowl house or pigsty with permission but not keep more than two pigs nor take any dog on the allotment. # c.18 13 01 24 p7 CIP

1913 Edward Rickard, a builder, was probably the greatest amateur natural historian outside the University and published a book on Leaves containing actual specimens. He was an entomologist, a botanist, geologist and taxidermist who had a collection of nearly 2,000 insects, 800 beetles and over 300 ferns. He had stuffed thousands of birds with one case containing 129 small British examples. A few years ago he had over 6,000 specimens of various kinds but lack of room had recently compelled a reduction 13 11 28 p4 CIP

15 06 11 p7

1916 March blizzards. The wind, which had been boisterous during the day, developed into a heavy gale, accompanied by snow. A good deal of damage was done to telegraph and telephone wires, trees were uprooted. On Tuesday morning the ground was covered with snow. Trains were late owing to wires being down. Rain set in during the day, but towards the close of the afternoon this turned to snow. The wind, too, increased in violence until it was blowing quite a hurricane. Huge trees gave way before the violence of the wind, chimney pots and slates came crashing down, whilst many fences collapsed. The Corporation workmen had to be called out to assist in clearing away fallen trees, and to assist the police in warning vehicles. Several pedestrians had narrow escapes. Among the many trees which fell was the famous plane tree in the Catholic Rectory grounds, which has been visited by arboriculturists from all over the world. 16 03 29 CIPof

1916 In the wake of the blizzard – photo feature – clearing trees – 16 04 05

1916 Oriental plane tree in grounds of Catholic Rectory one of those damaged in gale, was planted 90 years ago – 16 04 05b, c

1916 The rookeries in Cambridge have been a good deal upset by the recent gales. Trees, which for generations have yearly been occupied by rooks, have been blown down, and some of the college grounds most frequented by them are now almost deserted, the silence being most remarkable to those accustomed to the "cawing" of the sable birds. This is particularly noticeable at St. John's, formerly one of the most favourable nesting centres, and generally at the Backs there are fewer nests than usual 16 04 26 CIPof

1917 Vinery Road allotments set out – photos – 17 05 16f

1917 A Drastic Resolution, - The following resolution has been passed by the Allotments Subcommittee for Newnham and Castle End: "That inasmuch as they have received 50 applications for allotments, which they are unable to satisfy, they beg to request the Town Council to break up the Lammas Land at Newnham without delay, viz., without waiting for formal authority from any higher authority". As a result the Borough Member is to be asked to interview the Authorities of the Board of Agriculture and Fisheries with regard to the application of the committee for permission to use the Lammas Land and empty common for allotments 17 04 04 CIPof

1917 Allotments, - A walk round the various allotment grounds in the Borough of Cambridge is distinctly encouraging ('says the' writer of Town and Country Topics), for the most unpromising plots of the newly-cultivated land are turning out better than the most optimistic might have expected. The crops are through the soil, and show splendid promise, and the allotment holders must feel greatly encouraged and well rewarded for their labours, which have not been light. We hope that as the result of war-time measures the gardening habit may be re-established at Cambridge. A quarter of a century or so ago gardening was practised very extensively in Cambridge, and amateur horticulturists and college gardeners were produced who accomplished wonders in the way of intensive cultivation and carried off prizes even in All-England shows. The growth of Cambridge and other causes checked the gardening habits, which has now another opportunity, and we hope it may now progress 17 06 13 CIPof

1917 Allegations against smallholders - A report of the Smallholdings and Allotments Committee, moved for adoption at the quarterly meeting of the Cambs. County Council on Saturday contained a paragraph regarding notices to quit or cautions given to smallholdings were not properly cultivated. Ald. Redfern said it appeared from the report that out of 73 tenants 61 were not satisfactory. He thought it was time they had the assurance that things were not so bad

as they looked.—Coun, H. G, Few said they had 400-odd tenants and of that number they had 58 in the Western and 15 in the Eastern Division who were not entirely satisfactory with regard to their cultivation. Nine tenants were to have notice to quit and they occupied 65 acres 3 roods 31 poles out of 10,408 acres. No man could point to any private estate which, in the same piece of land there was as little complaint as that. They must be reasonable in their attitude towards the smallholders who had great difficulties to master. Ald Refern said he had served his purpose in obtaining the information he wanted 17 11 07 CIPof

1919 NIAB established (King George V opens Huntingdon Road HQ, 1921) [5.3]

1920 St Catharine's College grove of elms cut down – photos –, notes on site - Ch 20 10 13d well discovered, don lowered down – Ch 20 12 08

1921 NIAB opening by Queen Mary in 1921 – memories – 69 03 07

1922 My readers will learn with great regret that Brookland-avenue (Cambridge) with its countless romantic associations appears to be fore-doomed to destruction. The beautiful trees which provide the leafy tunnel which for generations has been so much admired are elms, and elms have an unpleasant habit of dismembering themselves with age. A good many of the trees must come down at once, as they are in such a decayed state to be liable to split and fall without warning c22 05 06 [3.9]

1922 Botanic Garden likely to have £1,362 deficit [3.11]

1924 A new allotment society was formed in Cambridge at a meeting of applicants for land in the Vinery road allotments. Mr Newman said this particular land had been allocated for allotments under the Town Planning Act and the 11½ acres would be allotments for ever. (Applause). It was to be hoped they would be made to look very beautiful and that uniform fencing would be erected. The Central Allotments Council hoped to eventually take the whole of the allotments from the Town Council and would be able to run them much better c24 07 21

1924 Sir – To my thinking there are, for a town the size of Cambridge, too many useless trees by half : trees that are neither useful nor ornamental. Take a walk along Grange Road and look at some of the expensive villas there being ruined by trees planted in the small space of ground around them, blocking out the air and harbouring all kinds of insects. Where can you take a walk and get a view of a glorious sunset or beautiful landscape. Your vision is marred by a lot of unnecessary trees. I think a good purpose would be served if hundreds of trees were cut down and sold as cheap firing to many poor people – “An old lover of Cambridge” c24 11 22

1928 elms cut down in front of St Catharine's College [1.16]

1930 The Backs look very desolate just now for fifteen of the giant elms have been condemned to death and the axe and saw has already accounted for most of them. The trees are being felled because their tops have become rotten and there is a danger of passers-by. Children are making the scene their playground and gathering firewood to take home and young amateur woodmen trying their skills with choppers when the workmen are not looking at them. The trees will be replaced by young elms. There is a variety of opinion about the age of the trees; some put them at 180 years but other say none is more than 100 years old. 300201

1932 trees at Green End Road & Kendal Way planted, oaks from USA [1.3]

1933 Sir – many a lover of trees mourns the cutting down of the fine Pagoda tree, Sophorn Japonica, which stood in Downing Street. It was about 200 years old and doubtless adorned the Botanical Garden there before it moved to its present site. A young American who was sadly photographing its headless trunk says it was one of the finest specimens in England. Why do we not value our ancient trees as we do our buildings? - F.P. Leyburn-Yarker 33 02 23a – photo 33 03 01

1934 The greenhouses at Cambridge borough cemetery were beyond repair and would have to be scrapped. But more glasshouse accommodation was now required for the propagation of plants used on the recreation grounds. Two new 120 ft glasshouses could be constructed on the West Chesterton recreation ground where a house could be built for the man in charge, councillors agreed. 34 01 30

1935 In the gale of January 26th an ancient and somewhat decrepit sycamore in the Sidney Sussex College Fellows' Garden was blown down. This tree was the last survivor of an avenue of sycamores planted in 1607-8 along the east side of that part of the King's Ditch which crossed the college grounds from the end of Hobson Street to Jesus Lane and thence along the side of Park Street. In the college accounts are payments to Thomas Hobson, the carrier, 'for bringing the sycamore trees from London ... iiis. xd' 35 02 02

1935 Many who frequent the University Botanic Gardens will be sorry to learn of the death of 'Tommy', the old pony who had been a familiar sight for 30 years. He had reached the great age of 35 and was a special favourite with children who loved to take him sugar and other little dainties. Old ladies too used to make quite a fuss of him. Tommy helped to pull the lawn mower and was working up to a few days ago – 35 05 11c

1935 A gale which raged all night wreaked sad havoc amongst the leafy avenues and clusters of trees of which Cambridge is so proud. The Backs bore the appearance of having been shelled by a volley of artillery and Queen's Road had to be closed. A Huntingdon elm, the pride of Trinity garden, was blown down. A tree was blown half into the water at Jesus Green Baths while another came down near Park Parade. Hundreds of 'conkers' were blown down, to the delight of the kiddies and large quantities of ripe and unripe fruit fell on the ground. 35 09 17

1936 Sir - Great falls and breakages in the main line of elms along the Backs began in a gale 40 years ago. They have come at intervals ever since and will certainly continue as the trees are much more diseased and feeble than the public knows. Twelve years ago King's cleared fifty yards of the sad wreckage of old trees and planted a double reserve line. These are now well grown but some have been broken. The public may look forward to more random falls whenever the wind is high and a limited amount of controlled felling and replanting where the trees are judged to be worst. But there will be no sudden large clearances and we are taking the best advice we can – Vice-Provost, King's College 36 03 06c

1936 The Seed Testing Station, Huntingdon Road was established as during the Great War farmers had not been getting the best seeds and new regulations had to be worked out. The main work is carried out by a staff of 30 girls. There are sections dealing with cereals, grasses and clover – where a bad weed called dodder has to be separated - together with a vegetable germination room where an ingenious device automatically plants 200 seeds in a pan. Onion and parsnip seeds are tested periodically – they will keep for two years then go off altogether. 36 05 12

1936 Since 1921 there have been 2,800 allotment holders in Cambridge. One man had entered the national onion competition and came first in all England. There were 187 applicants for allotments from among the unemployed during the past season. Where men had to do work on the soil to produce food it meant keeping in really good health. That 'daily dozen' weeding or hoeing

or digging the ground was of the greatest importance. But the allotments should be permanent: it was hard for a man who has to leave his land after about 18 months. 36 12 07 & a & b

1937 Elm disease has attacked some of the trees along the Backs at Cambridge. Some have been topped and others are definitely going bad. But experts believe the disease is not so serious as first feared. A number of trees have recovered and there is no need to be in a hurry to fell those which have been affected. At Sheep's Green and Coe Fen the trees are chiefly willows but some are not as happy as they might be. They could be replaced by cricket bat willows which are pretty trees and the most profitable grown at present, a Forestry expert told Rotarians. 37 07 07b

1937 Mr W. Ridgeon established his shop in old Sussex Street in 1902 and moved to their new premises in 1932 since when the business has steadily grown. Now with their own nursery at Castle Street and lawn mower works at Westfield Lane they pride themselves on giving the best and most complete garden service in Cambridge. The business also includes a modern floral department and a section devoted to all dog and pet foods and requisites. 37 08 14

1947 Sir - I think it is scandalous that 31 trees should be removed from Newmarket Road, Cambridge. This is easily the least imposing approach to the town and the removal of the trees will make it ten times worse. Why is this road always chosen when a site has to be found for a new refuse dump. Why has it such a bad road surface for such an important main thoroughfare. Those things just have to be tolerated, I suppose, but I sincerely hope that Newmarket Road may retain its one redeeming feature - the trees - letter from L.R. Thurston c47 07 15

1948 Trinity College Avenue of limes to be removed & 44 replanted [1.13 & 2.2]

1949 rare weeping elm cut down in Chapmans Garden Emmanuel College, had Dutch elm disease [2.1]

1950 Brooklands Avenue : 92 elms, many diseased, remain out of 180 planted 100 years ago; 50 destroyed 1937 & by 1940 disease so prevalent that there was no use planting new, those left are coming down at rate of 1 to 5 per year [2.3]

1950 explosions as 16 elm trees aged about 500 years are removed from the Backs [2.8]

1951 willows on the edge of Newnham Mill pond too old, being replaced by golden willow [2.9]

1951 Over the last few decades St John's college grounds in the Backs have suffered severely from the loss of trees by decay, storm damage and elm disease. A survey showed there were many trees so diseased that they might fall down at any time, including most of those in the remains of the Avenue leading to Queen's Road. A comprehensive scheme for replanting has been adopted. In place of the former elms a new avenue of limes will be planted c51 05 02 [2.11]

1951 Sir – the Cambridge Backs are unfortunately no more – at all events in their full glory of the giant and venerable trees. If King's College chapel should disappear from the scene untold photographic representations of it would remain, but of these giant monuments of the past there is little. To fill the void I have reproduced in picture postcard form a photograph of my own. There may be many persons who have walked under the shadow of these great trees of the Backs and I could arrange for it to be on sale. – Sir Henry McAnally c51 08 06 [2.13]

1952 Magdalene College fell horse chestnut as damaging wall of River Court [2.14]

1953 Botanic Garden announce plan to double size by 1960 [2.16]

1953 To the everyday passer-by the tall stately elm trees in Brooklands Avenue, Cambridge, give the impression of being sound and sturdy. But some have now been cut down and it can be seen that sections of their trunks are hollow! Six have been taken down and there are a further 20

which have serious defects and decay. It was in April 1950 that the City Council decided to remove all the trees and replant the Avenue with new ones, but owing to public opinion the decision was reversed. If the present disease continues it will not be many years before most of the common elm trees in Cambridge have been removed. c53 08 07

1953 Sir – the trees which were the focal point of Victoria Park, a pleasant cul-de-sac of urban Cambridge, are now lying on their sides awaiting removal; one or two were diseased and some of the roots were interfering with soil drains. By a happy combination of simple group planning and the breaking down of the artificial barrier between home and green caused by the removal of the railings during the war, the Park was something quite unique. To plant replacement anaemic flowering sticks of trees with ‘touch me not’ flowerbeds will turn it into another piece of suburbia. – D. McLeod. c53 11 27

1954 Botanic Garden new rock garden constructed [2.19]

1954 The elm tree on the pavement near the junction of Drummer Street and Emmanuel Road, Cambridge, is probably 250 years old. It is a little over 70 feet in height and sixteen feet in circumference. In the 1940s some of the lower branches were removed to prevent contact by omnibuses but now extensive rotting has taken place in the main branches. These should be removed and any hollows scraped out and filled with concrete, but in view of its scientific interest as much as possible should be retained. The Botanic Garden hopes to perpetuate samples from the old tree by grafting some of its twigs on to young elms CDN c 12.2.1954 [2.18]

1954 The inaugural meeting of the Cambridge Flower Decoration Club was held in the Guildhall with an audience of several hundred people – almost entirely of women. The Mayor said the city council was fully alive to the value of floral decorations. On one roundabout alone as many as 4,000 plants were used. There was criticism of the money spent on floral decorations but residents and visitors appreciated the added beauty they gave the city. The new Club could bring Cambridge extra fame by becoming one of the centres of floral art. No fewer than 143 people have now joined. c54 04 14

1955 The Plant Breeding Institute’s new buildings and experimental grounds at Trumpington were opened by the Minister of Agriculture. It investigates the improvement of Spring and winter wheat and breeds oats adapted to climatic conditions of the Eastern counties whilst in potatoes its chief concern is the battle with blight, eelworm, wart and virus diseases. A pathological section has recently been established. 55 07 16a & aa [2.18]

1956 Cambridge Preservation Society acquire Wandlebury [2.23]

1956 Cambridgeshire & Isle of Ely Naturalists Trust formed [2.24,5.7]]

1957 Cambridge Natural History Society celebrates centenary [5.6]

1957 You would hardly expect to find flowers and plants high above Cambridge in the land of roof tops and chimney stacks but among the slated slopes of 4, St Andrew’s Street Mrs P. Southgate has created a roof garden. She has turned a small lobby into a conservatory with trailing plants and ferns, tubs and boxes of earth making an attractive relief to what can so easily be a dismal scene. 57 09 06

1958 A new Cambridge Gardening Club held its inaugural meeting. They would have ‘Club Nights’ for the discussion of gardening problems and exchange cuttings and plants. Gardening was not just perspiration: the greatest joy was to sit in it and see what you have done. The use of mechanisation made gardening easier but it was considered an unnecessary extravagance to buy such items. The club could provide machines which they could hire. 58 09 27

1959 The Minister of Agriculture opened new laboratory and office buildings at the National Institute of Agricultural Botany. The extension had been needed for a very long time: it has been bursting at the seams. NIAB was established in 1919 and in October 1921 King George V opened the Huntingdon Road headquarters designed by Morley Horder. Since then the average yield of wheat has gone up from 17 cwt to nearly 25 cwt and that of barley had increased more than half. 59 07 16, 18 & a

1959 Dahlia Society formed – 59 10 29

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Cambridge will be without its usual street decorations this summer because the staff at the Corporation's Cherry Hinton Hall Nurseries are busy preparing plants for the Royal Show ground. The Hall came into the council's possession soon after 1934 and now two acres are used to grow plants for roundabouts and recreation grounds. They include fuchsias, petunias, stocks, asters, dahlias and lobelia to say nothing of 3,000 daffodils, 20,000 pansies and 40,000 wallflowers. 60 04 21b

1960 Mr & Mrs Peter Issitt of Arbury Road have a beautiful small landscaped garden with miniature Alpine outcrops planned to give an illusion of space. The pond attracts a variety of wild life. Two hedgehogs, seven toads and a collection of frogs live in the garden and birds come each day for bathing and drinking. Their two small daughters have no complaints. They have a lawn with a swing to play on and appreciate the artistic setting 60 09 23

1961 Trees being removed from Four Lamps area in preparation for road widening scheme and alterations to roundabout 61 10 31a

1962 Cherry Hinton chalk pit may be preserved as an area of exceptional educational value for the study of natural history. It is not an amenity at the moment but should be made one as the chalk cliff is an area of interest. Cambridge University has said it may provide the services of a warden for the area if it were left untouched. The eight-acre site, recently vacated by the Cambridge Civil Defence Corps, is next to land scheduled for extensions to the Grammar School for Boys playing field. 62 11 07 [5.8]

1962 Parkers Piece elms becoming dangerous [5.13]

1962 A special road island will be built so that a 50 ft elm tree can retain its present position near Four Lamps Roundabout. Part of Butt Green has been cut away to make room for a wider roadway and now the tree, which once stood on the Green, is in the middle of the main road. Other elms were cut down as part of the scheme to speed the traffic flow and reduce congestion. Work has taken much longer than expected because of the large number of cables and wires that needed re-routing 62 04 11 [5.14]

1964 2 40-ft lime trees moved from Milton Rd to Arbury Estate to make room houses [5.15]

1965 70 ft high rotten trees removed Alexandra Gardens

1965 The greenhouses of Cherry Hinton Hall are coming apart with walls bulging, rooms leaking and draughts. Dampness and poor heating make the task of producing sturdy plants soul destroying for the staff of the propagating centre. The boilers are old, obsolete and temperamental. Stoking goes on day and night in boiler rooms which have no proper ventilation. The dust is choking and at times the fumes are so powerful the stoker is in danger of being overcome. But if the temperature drops plants and seedlings will die by the score – 65 01 22

1967 Ted Peacock opens Byron Square, Trumpington, council house garden, 1,000 visitor (again 1970,71,73,74) [5.1]

1969 N.I.A.B. celebrates 50th birthday; was opened by King George V and Queen Mary; started with 10 acres of grounds, worked on virus-free potatoes – 69 01 13a # c.18

1969 NIAB Royal Jubilee – Queen visits – 69 03 13a , b # c.18

1973 NIAB : new building to make it centre new national seed control network under EEC [5.5]

1973 Dutch elm disease [5.16]

1975 Some of the most sought after scenery in Cambridge is being devastated as a result of the fight against Dutch elm disease. Tourists visiting the backs of the colleges will find tree felling in full swing. The disease has spread to trees near Trinity's main college buildings and systematic felling began there in March. The college had carried out an intensive programme of tree injection but despite this the disease is spreading & it has decided to fell all the elm trees and replace them with limes c75 08 02 [5.17,6.1]

1976 Trees along Cambridge's world-famous Backs felled because of the spread of Dutch elm disease have now been replaced. More than a dozen lime tree have been planted at Trinity College Pieces to replace 20 elms recently felled. Trinity college bursar said, "Not all of the elms were diseased but they were felled because, once the disease starts in a row it is difficult to contain unless all are removed". The disease was beginning to appear in a number of other elms, although at the moment those in the Fellows' Garden were unaffected c76 01 17

1976 Has there ever been a more disastrous year for the trees of Cambridgeshire than 1976? The mild winter allowed the elm bark beetles to live on and their work of infection and destruction is plain to seen. In the high temperatures and drying winds of the last few weeks giant elm trees have taken only a few days to turn from green to brown. In January, gales felled many a fine tree which had taken a century or more to mature. Now Wandlebury has closed because the great heat is causing apparently healthy trees to shed branches without warning. What is more frightening is that young trees planted to make good the loss are dying too c76 07 12

1976 A rescue operation has been mounted at the University Botanic Garden to save fish from a lake which is drying up. The lake, one of the main scenic attractions, started to fall about ten days ago and dozens of fish, mostly larger roach, dace and chub, have been transferred to the nearby fountain pond. Now they are threatened by swooping herons. The lake is normally fed by Hobson's Conduit, but all but one of the springs at Nine Wells has now dried up and even the one that is active has been reduced to a trickle c76 08 24

1976 Most of the 38, century-old elm trees around Parker's Piece, Cambridge are likely to be chopped down within 10 years because of Dutch Elm disease. A number of the elms along Gonville Place are known to be diseased and felling has already started. Now tree experts fear that at least 80% of the others are likely to be affected. Replanting, using oriental planes, weeping silver limes and hybrid lime would be an ideal opportunity to commemorate the Queen's Silver Jubilee in 1977 c76 09 11

1977 The Mayor of Heidelberg officially opened the rooftop garden above Lion Yard, Cambridge, which has been named after the German town to mark the link between Cambridge and its twin university town. Oberburgermeister Renhold Zundel said a scheme similar to Lion Yard was being built in his city and they might have a garden named after Cambridge soon. c77 07 26

1977 The mystery of oriental activity on Cambridge's Coe Fen deepened with proof that its water margins abound in wild cress – and further evidence of Chinese harvesters. Streams by the Leys School are virtually choked with watercress and one resident told how she watched a group of 10 Chinese carefully cutting and bailing the cress. Generations of Newtown people culled the

Coe Fen paddy fields for their own salads and there are memories of a professional cress gatherer, 'Tug' Wilson, who operated before the First World War and sold it round the pubs and houses. He used to have a wooden cart he towed along and people ate it because they thought it was good for the blood. c 77 12 26

1978 Peter Issitt, Arbury Road 30,000 miniature trees [5.2]

1978 elm Emmanuel Rd & Drummer St to be felled, diseased - 250 years old, stood on pavement, rare & twigs from it grafted on to young elm trees in Botanic Garden [6.2,5.12]

1980 Cambridge's top amateur gardener, Mr Ted Peacock, has died. He hit the headlines in the early '70s when he decided to open his Byron Square gardens so people could see the dahlias which were his pride and joy. It became an annual event and the wealthy turned up in their Rolls-Royces. He was an expert on many other flowers, fruit and vegetables and probably won more gardening show prizes than anyone else over a period of 40 years. 80 09 19b

1982 A renewed upsurge of Dutch elm disease is leaving a trail of devastation with Jesus Green suffering most. Other trees on Parker's Piece and Petersfield are showing the yellowing leaves and premature loss of foliage typical of the disease It has been rampant in the past few weeks and it looks as if there will be hardly any elms surviving in Cambridge in two years time. But a five-year tree-planting scheme is expected to make good the losses 82 07 30 [6.3]

1983 About half the giant elms trees which have lined Parker's Piece for the last 150 years have been cut down – the latest victims of the deadly Dutch elm disease. Twelve elms along Gonville Place have already gone and the famous park looks totally unfamiliar without its border of towering trees. The council plans to have lime trees and London planes, some have been planted and already reached 18 feet in height 83 10 07 p14

1984 Plant Breeding Institute threatened by cuts (1986 Government announce plans to privatise National Seed development Organisation & part of Institute), founded 75 years ago (from 1886), grows varieties of wheat, potatoes & field beans, (1987 several departments to merge with John Innes institute Norwich, other parts of research programme hived off to industry) [5.9,5.10-11]

1985 Choppen's links with Saffron Walden go back to the 19th century when the family moved their engineering business to the town from Great Chesterford. John Choppen, the founder, was also a local fireman and drove the horse-drawn fire engine. His son Frank, under whose control the business prospered, died in 1962. They established a branch in Fitzroy Street Cambridge in 1964 with a purpose-built garden machinery centre in Barnwell road opening in 1980. Now expansion continues with a new headquarters with offices, workshops and showrooms in Thaxted Road, Walden. 85 04 11

1986 Most of the trees on Parker's Piece are about 150 years old. But they are under threat: the limes are deteriorating and Dutch Elm disease is making such insidious progress that there will probably be no elms left in five years. Now young trees are being planted but it will be the end of the century before they make their full impact. Elsewhere getting trees established has been difficult with maintenance through watering and staking almost forgotten once the burst of enthusiasm for planting has abated. 86 09 22

1987 Scientists at the Plant Breeding Institute at Trumpington are preparing to welcome Princess Anne who will present them with another Queen's Award for Industry, this one for breeding high winter wheats. Their work in producing crops resistant to the ravages of disease

and selecting varieties that flourish in harsh conditions is vital to poor countries. But, after 75 years, the Institute is being sold off by the Government with many of the scientists having to move to Norwich 87 07 03b

1988 Plant Breeding Institute changes name to Plant Breeding International co.ltd [CEN 22.4.88]

headlines

1897 A babel of sound greets you as you enter; some four hundred members of the canine tribe lift their voices in chorus. From end to end the Corn Exchange is filled with benches tenanted by dogs of every breed, size and colour - a sight to gladden the hearts of the Cambridge Canine Society committee at its first show which, if excelled in future years, will require a larger hall
c1897 10 29

1898 When Judge Hawkins came to Cambridge on one occasion he essayed to bring his dog with him into Trinity College. But the head porter refused to allow it to be brought within the precincts and persisted even after it had been made known to him that it was the dog of one of her Majesty's judges. The judge was angry at the time, but sent for the head porter and told him that he was right, making him a present in recognition of his trustworthiness c1898 12 21

1901 "Knackeries", are places where diseased and other horses and cows are slaughtered. The common instrument used is the "pole-axe" which requires a large amount of practice to despatch an animal properly. Others resort to the gun, shot cartridges being preferable to bullets. The flesh is cut off the bones, boiled and sent to London for cats' meat, the fat is boiled down and sold for greasing carts and the bones ground into manure. Through all this work of killing, bleeding etc the sub-soil becomes saturated with the fluids which soon decompose and create a horrible stench
c01 06 01

1901 Sir - There is now in course of erection a new knackery in Coldham Lane, Cambridge where some 300 horses can be slaughtered daily with improved appliances for their expeditious

slaughter at a minimum amount of pain. To throw the expense upon the ratepayers of the erection of a public knackery, whereby individual enterprise is thwarted, should not be encouraged. The fact that there is already a thoroughly efficient slaughterhouse hardly warrants the expense of a new one being thrown upon the ratepayers – “Vigilant” c01 06 04

1901 Messrs Pink Brothers new ‘Knackery’ in Coldham’s Lane, Cambridge, stands in an isolated spot and is constructed on the most hygienic principles. In one corner is a large dissecting table and there are two huge coppers for boiling down the carcasses, the remains of which are subsequently sent away by rail. Some distance away is a tank ventilated with a shaft considerably higher than the top of the passenger carriages that may pass on the railway. The possibility of any offensive odour reaching travellers is thus quite obviated and the same care has been exhibited in regard to any unpleasantness that may arise from the boiling operations c01 08 20

1903 Cambridge Horse Club exists for the amelioration of the suffering of the horse as well as the benefit of the members. Not only was a member benefited if he lost a horse, but should the horse become ill it received prompt attention from their veterinary surgeon, Mr Bennett, and this saved money on doctors’ bills. The number of horses was 177; during the year eight had been lost and £80 had been paid to the owners who were well satisfied with their compensation. There had been an outbreak of glanders but the disease had been stopped. c03 04 01

1903 A sale of work was held to raise funds for the furnishing of a ‘Cats Home’ in Mr Banham’s yard, Cambridge. Persons going away from home can have their cats taken care of. The fee is not a large one. There will be room for an odd stray, provided it is a healthy cat; if not it will be mercifully destroyed. c03 05 08

1903 Sir – last evening I met three horses running loose and apparently unattended along Mill Road, Cambridge. Some distance behind them two men were being dragged along by a young horse which they were evidently trying to ‘break in’. Carts, cycles and other users of the road overtaking them had to slow down until they could dash past & foot passengers had to seek safety in doorways. I have also frequently met in St Andrew’s Street a high-spirited, high-stepping horse being led by a single rein about 20 feet long, the other end being held by a man on a bicycle! These things ought not to be allowed in our streets – Citizen c03 09 02

1904 grass snakes escape from a collector in Mill Road & are found in numerous gardens [3.4]

1904 Ratting is a form of amusement which dates back to the dim ages. Usually this practice is carried on in out of the way places but in Cambridge ratting parties are to be seen on Midsummer Common on Sundays. The undergraduate takes a great pride in the sporting qualities of his “dawg’s” pedigree, half-bred or mongrel, and certain townies feed this pride for collecting a supply of rats for the alleged sporting dogs to worry. With stout wire cages slung on their backs the dealers await the arrival of undergraduates and then offer rats at a “bob apiece”. Rat after rat is released from the cage, given half a dozen yards start, and then the dogs “course” it to its death. The slaughter over the dead rats are piled on the common to fester and rot. – 04 03 18

1904 A few years ago such a group such as the Cambridge and Chesterton Horse Club would have been out of the question but over the last six years it had grown beyond all expectations and now has a membership of 185. All who possess horses should join: during the past year they paid £235 to 16 members who lost horses by death. The condition of horses in Cambridge and the treatment meted out to them is much better than previously for if an owner neglected his animal he is prohibited from receiving the benefits of the club c04 04 16

1906 Mill Road has never known anything quite so strange as eighteen cassowaries which have been translated from the Pacific Islands to a piece of ground reached by a short lane down Gwydir Street. They have been collected by the Hon Walter Rothschild who is writing an monograph and placed in the charge of Mr F Doggett as they flourish better here than anywhere else in England. 06 09 15a [3.6]

1906 The owner of the Holme Wood Estate went to court to restrain four undergraduates from trespassing on his land to catch moths. They had arrived on the reclaimed mere with elaborate paraphernalia for luring unwary insects to their doom and remained twelve days, to the annoyance of gamekeepers. They swung lanterns in the pheasant covers, placed 'sticky stuff' on trees and erected a sheet on the roadway. They were fined one shilling. 06 03 31 & a

1906 The world-famed travelling Educator of Natural History will pay Cambridge a visit after an absence of 15 years. Bostock and Wombwell's circus was instituted in February 1805 and novel additions are being made to keep pace with the times including specimens of Tasmanian Devil and the gigantic blue and red faced mandrill. In olden days shopkeepers used to close and the public declare a holiday in order to explore the menagerie. The conditions of the animals speaks volumes for the kindness and attention with which they are treated. 06 09 19a

1906 Much interested was excited by a strange feathered visitor alighting on a pinnacle of King's College chapel. On Sunday afternoon it was attacked by crows but it thrust out its long neck and gave a vicious snap of its large beak. The bird possessed grey plumage on the breast and darker feathers on the back. In flight it presented a remarkable appearance, having enormous wings and legs, similar to those of a stork or heron. – cormorant 06 10 08 [3.7]

1906 We have received a letter from a lady in Bridge Street complaining of her loss of new fewer than nine cats and that it seems to be the general opinion they are taken to the Anatomical Laboratory for dissection. This is a false as it is odious. The Professor of Biology says he knows of two people who possess air guns and shoot cats but anybody who came there with them would be kicked out of the door. 06 10 30a [3.8]

1906 Allegations of vivisection by University departments – 06 11 03

1907 It would show a little more consideration for the feelings of other people if the dog-fancying undergraduate would go a little farther afield than Midsummer Common for their rat-worrying exhibitions. I have no objection to the extermination of the rodents nor to the training of dogs for the purpose, but to many people the sight of the 'sport' in full view of Victoria Avenue is repulsive and disgusting. Such displays should not be permitted in places which force the sight of them willy-nilly upon every passer-by 07 01 26a

1907 Cambridge Horse Club had many ups and downs during the last ten years. Gentlemen who lost their horse were compensated to the full market value. When the animal was ill it was taken to Mr S. Bennett, the veterinary surgeon where it got skilful attention until it recovered. There had been a small epidemic amongst horses but fortunately it did not extend or it would have been serious for their finances. 07 04 04

1907 Charles Lawrence's kennels at Chesterton have bred many famous animals in the dog world, winning prizes in Antwerp, Brussels and Rotterdam. Purchasers come from all over the country; Alderman Pratt of Bradford recently bought two pups for £100 while one sold for £300. During term time a familiar sight on Market Hill is a man surrounded by dogs which he sells to undergraduates at fancy prices. Mr Lawrence bought one for £2 cash, then exhibited it at a show and sold it for £150. To see a collection of valuable clumber, field and cocker spaniels gambolling in the paddock is a sight which must appeal even to those who have but the barest acquaintance with a good dog. 07 06 22b

1907 An RSPCA Inspector saw a box of wild birds in the booking office at Isleham railway station addressed to a man in Islington. He found it contained a number of goldfinches together with some linnets, their wings fluttered through the side of the box. A birdcatcher of The Pits, Isleham claimed they were chaffinches. A linnet or chaffinch was worth fourpence while a goldfinch, newly caught, was worth about a shilling. Goldfinches had been sold for up to 30 shillings, but that was only after they'd been taught. 07 08 28 a & b

1908 A West Norfolk gamekeeper has shot and killed one of the luminous owls which have appeared in East Anglia of late. Whilst out one very dark night he saw a bright blue light pass

close by his face. He fired at it and found a poor, old, half-starved barn owl dead on the ground. He thought it must have been gathering glow-worms as it was getting late in the winter. He has never seen another giving out any light. 08 01 24d

1908 Two men were summonsed for catching wild birds. P.S. Merry said he found them on ground adjoining Coldham's Common with a number of nets fixed to the ground and some calls birds in cages near at hand. They caught six linnets and at home had 25 others together with three greenfinches, all of which were released. They claimed they had permission from the landowner and so were exempt from prosecution. 08 05 11a

1909 Cambridge British Beekeepers Association was wound up as they had members who only wanted to get what they could out of it. Cambridge honey was superior to any in the UK and they did not wish to see bee culture go down. So a new 'Cambridge and District Beekeepers Association' was formed to provide mutual help. 09 04 02

1910 A foreigner, accompanied by a performing bear, stopped to refresh himself and his animal at the Bird Bolt public house, Newmarket Road. Sitting down on some straw next to another man the alien proceeded to break up a loaf of bread he had bought. The bear, who was held by a chain round his foot, evidently thinking the other chap was going to receive its share of the food, clawed hold of the man's leg and then sprang at and clawed his shoulder. The owner showing remarkable promptitude in pulling the animal off but. A performing bear badly mauled the landlady of a public house in Hertfordshire on Saturday. 10 07 08bb

1910 Court case over larks sent to London from Barnwell junction station – 10 07 08d & e

1910 The RSPCA entertained 75 Cambridge cattle drovers to a tea and concert in St Paul's Institute. The Master of Trinity College said grace. The Mayor hoped he would not see any of them in the police court for cruelty to animals. Cattle driving was not an easy job; it needs patience, gentleness, skill and endurance. Sometimes they were greatly tried and tempted to be cruel to their animals but they should use forbearance. As the men were leaving each was given a packet of tobacco. 10 11 25c

1911 world record magpie pigeons at annual show Ornithological Society

1911 The Cambridge Horse Parade Society show on Midsummer Common attracted over 100 entries. Seldom were such glossy coats, spotless harness and glittering brasses seen in the streets of Cambridge on ordinary working days. The huge Shire horse attached to the brewers' drays, coal wagons and farm carts were in striking contrast to the high-stepping, spirited carriage and cab horses and dainty ponies drawing the smaller tradesmen's' carts. Donkeys had a class to themselves; one looked very plump and contented which made him incline towards sluggishness. 11 06 09

1912 Immense excitement was caused in Glisson Road when a bullock belonging to Charles Wright of Stretham became agitated while being driven to the Cattle Market. It took an aversion to Mr J.S. Palmer, attacking him from the rear. He grasped both horns but was lifted off the ground before slipping out of the way. The animal then dashed into the hall of the Warwick Hotel where Miss Baker closed the inner door just in time. The bullock butted it, then sat down on the mat. Mr Atkins, the butcher, sent two men with a rope and the animal was finally restrained 12 01 19a

1912 Cambridge Horse Parade show on Midsummer Common – 12 05 31g

1912 Clayhithe Zoological Gardens have added four beautiful silver seals from the Arctic oceans to the recent pythons and boa constrictors which have proved an immense attraction. The lemurs, apes, baboons, kangaroos, Syrian rats, cockatoos & Mangaby monkey with baby (the only one in Europe) are also much appreciated while the Shetland ponies are available for boys and girls to ride. Great crowds were here last week but under no consideration can more than

5,000 people be admitted in one day. In addition there are skittles, billiards, swings, and boats with dancing on the lawns or ballroom every evening. Grounds illuminated on Thursdays and Sundays. Everything high class at moderate price 12 07 26f

1912 Clayhithe zoo – detailed article – 12 09 06

1912 The big white cockatoo on the lawn at the Bridge Hotel, Clayhithe, was having an altercation. With her crest erect and her head close to the bars of her cage she was glaring and shrieking at the toucan that shares with several marmosets the big cage hard by. One young lady of 18 months had a biscuit in her chubby fist and presently toddled up to the cockatoo's cage and held it out. Cockie promptly stopped her scolding and accepted the proffered tit-bit. Soon the morsel was devoured. A low, chattering noise from the toucan's cage attracted attention to several of the prettiest little monkeys imaginable; they were not impressed with our English climate and refused to come out of their snug nest. All the animals and birds are in beautiful condition and the cages being in the open, there is no disagreeable smell 12 09 06f & g

1914 A pair of little brown owls have laid their eggs in the furnace of a portable boiler used for washing beehives on Chivers farm at Histon. Of course the fire has not been lighted recently but the copper is used every day, and when the owls are at home they do not mind this at all. They find their way in and out by the small iron chimney attached to the copper. These owls are not indigenous: Lord Lilford brought a pair from Spain and kept them in captivity near Thrapston. They thrived and he turned them into the open. They have multiplied and are now fairly common 14 05 15a

1915 A Novel Occurrence.—On Monday evening, a party of bathers in the Brook (at Bourn) noticed a large animal disporting itself on the bank and diving into the water. After pursuit, it was eventually shot by Mr. F. Crow. It proved to be a large, well-developed male otter in splendid condition, weighing 11½ lbs and measuring 40' inches from the tip of its nose to the tip of its tail. It was a most unusual visitor to this neighbourhood, an otter never having been known to have been taken here before. If the creature found its way up from the Cam at Byron's Pool, it must have made a journey of over ten miles 15 07 09 CIPof

1916 The rookeries in Cambridge have been a good deal upset by the recent gales. Trees, which for generations have yearly been occupied by rooks, have been blown down, and some of the college grounds most frequented by them are now almost deserted, the silence being I most remarkable to those accustomed to the "cawing" of the sable birds. This is particularly noticeable at St. John's, formerly one of the most favourable nesting centres, and generally at the Backs there are fewer nests than usual 16 04 26 CIPof

1917 bullock escapes from Warrington's yard, Northampton St & gets into river [3.21]

1918 death of Charles Calvert Lawrence, dog fancier, bred Norwich terrier dogs with Hopkins in 1890's [1.14 & 3.2]

1923 A meeting was held on Cambridge Market Hill under the auspices of the local branch of the World's League Against Vivisection. Some hundreds gathered around the first speaker who was heard amid a running series of questions and interruptions. He gallantly held his post for over an hour, and many of his points were agreed to, even by opponents of the movement generously. Certain diseases had been lowered doing the last 50 years in response to sanitary improvements, he said, but no direct evidence could be found as to any decrease of the death rate as a result of vivisection c23 08 17

1926 Cambridge court heard that when an undergraduate came to Magdalene College he brought with him a bay gelding, worth £200, which was placed in stables in Cambridge and hunted with the Cambs Hunt and the University Draghounds. In December an agreement was reached with the L.N.E.R. for the carriage of the horse to Berwickshire. During loading into the horsebox at the station it lurched forward, fell out and broke its spine c26 05 28

1927 2 heron 3 snipe, & 2 kingfishers seen on Coe Fen : “some wildlife left in spite of the Causeway” [3.1]

1927 Cambridge Women Citizens’ Association heard that a cats shelter should be provided in Cambridge for the reception and humane destruction of neglected, starved diseased and homeless cats. Mrs Norman Mason said last year 478 cats were brought to the home but the council had now ordered the shed to be taken down. Now if a pet cat was brought in they had nowhere to keep it and it had to be chloroformed. CDN c12.3.1927

1927 Cambridge Councillors heard that Mr D. Page had been appointed to act as pindar at a wage of £2 18s. 2d. per week, which included 5s, the value of the cottage now occupied by his predecessor, Mr C. Everitt. As he was unable to occupy the cottage at Coldham’s Common there was a difficulty in locking and unlocking the gate and it was agreed that Mr Everitt be paid 10s a week for such services. c27 12 09

1928 vivisection abolition motion rejected in debate [1.21]

1928 bird sanctuary Adams Road opened by Cambridge ornithological Society on old skating rink site [446.10.5]

1928 Members of the Cambridge Horse Club spent a jolly time at their annual dinner. It was formed 35 years ago when there were a great number of hansom cabs and horses and flys in Cambridge and if a man lost a horse he went round from house to house and collected. Some people thought that was rather objectionable and a man named William Wallis conceived the idea of a club for people who owned horses. It only cost 1d a day to join and they still had 50 members; when they considered the increase in motor traffic it was feather in their cap to know they stood safe financially. The Chief Constable said Cambridge was losing horses very rapidly but he hoped they would not all disappear. c28 04 28

1931 sheep graze on lawn at Kings College for first time in 50 years [2.21]

1931 An amazing freak, a kitten with two faces, was born at the ‘Ramping Lion’ garage near Fenstanton but lived only three days. The kitten was an extraordinary little object with its two mouths, two noses and four eyes, but it had only one head and consequently only two ears. 31 05 08o

1931 A cormorant, presumably the same bird which created something of a sensation when it perched on the tower of Ely cathedral, has been seen at Cambridge. For several nights it has come at dusk to one of the chimneys of the Saxon Cement Works, Coldham’s Lane, and aroused great curiosity in the neighbourhood. It leaves its perch in the early morning and is not seen during the day, returning at night 31 09 25d

1932 “Dukes Walk”, the donkey which has been a familiar participant in all Poppy Day ‘rags’ has died. Rising from the mundane routine of drawing a chimney-sweep’s barrow it enjoyed a distinguished career. In addition to being first favourite with undergraduates the animal was equally popular with children at Sunday School treats, as water-carrier at the University fruit-picking campaigns and as mascot to the 17th Lancers. It was while on military service that he earned his title which led to his appearance before the King in the Military Tattoo at Olympia. His owner, Mr A.W. Wyer, is to get another donkey. 32 01 30

1932 There were three horses for sale on Midsummer Common – which is three more than last year. A group of bored-looking men watched the animals being put through their paces. An

elderly man dressed in country clothes patted one of them and looked critically at its teeth. A young man in oil-stained overalls walked over, a pail in each hand. "What's going on", he asked. "The Horse Fair" I replied. "Never heard of it". So pass out ancient institutions. 32 06 24

1934 memorial to dog Tony erected by Prince Chula of Siam, a tremendous character & with brother Prince Bira well-known racing drivers in 1930s [446.10.5]

1934 The dog trough which stands outside Lloyds Bank in Victoria Road has been in position for some weeks. It was erected by His Royal Highness Prince Chula of Siam in memory of Tony, a dog which gave him friendship and happiness during his Cambridge years. The Prince 'went down' some time ago but left the money for the trough to be erected 34 10 06

1935 Blue Cross home established 1935, cattery buildings built 1960s as result legacy [Misc.4.4]

1935 Cambridge has 779 horses twice as many as any other similar town [1.2]

1935 death of "Tommy" - pony at Botanic Garden who pulled the lawn mower and was loved by children [1.8]

1935 According to the recent census taken for military purposes, Cambridge has a horse population of 779, excluding railway and military animals. This is abnormally high, being roughly twice as many as any other town of its size. In the riding horse and hunter class Cambridge takes fourth place in the country but the town is poorly supplied with carriage and trap horses. People have forsaken the horse for wheeled outings though there are still a few residents who prefer to sit behind a horse instead of a petrol engine. It seems that the motor salesmen of Cambridge are extraordinarily efficient. 35 05 21

1935 Prince the Airedale dog owned by Mrs Rowell of Fair Street is one of the most persistent cadgers. His life-long occupation is to sit in a public house and beg for pennies from customers which he does by tapping their pockets with his muzzle to make them jingle. If he is offered a penny he goes to the counter and buyers a biscuit which he lays at the feet of the donor and waits for permission to eat. He also goes to the shop and buys a newspaper for his mistress every morning. 35 08 03b

1936 The new R.S.P.C.A. clinic for animals at Covent Garden was officially opened. Those who could pay took their animals to the veterinary surgeon but many could not afford the fees and three prominent vets had promised their professional assistance without any charge 36 04 27b

1938 The Cats' Home in Garlic Row, which opened in 1919, received 604 stray cats last year. Of these 541 were chloroformed, homes were found for 57 and six were claimed. Taken over by the Dumb Friends League in May 1937 – 38 03 31b

1940 First aid for pets in wartime explained – 40 05 18

1940 A.R.P. for pets – list of centres – 40 05 31a

1943 Pindar, pound and pony – horse placed on Stourbridge Common impounded but released by owner – 43 02 02a

1947 5 puppies poisoned while making Accident Prevention Council film [1.12, TT 20.9.1947]

1950 A large white cob swan walked up Cambridge castle Hill and found himself for 15 minutes the focus of much interest from the police, the press, two cats and the borough pindar. He first attracted attention waddling up the hill in the middle of the road – much to the consternation

of drivers and cyclists. Oblivious to the hazards of walking in the middle of a Cambridge street, he took a look through the Shire Hall's entrance, but after a critical appraisal of the building he decided to continue his journey. It was then shepherded into the county police station yard where it stood and glared at everything that moved. Two inquisitive ginger cats approached, sniffing at the strange interloper, but they did not stay long. Neck arched, wings beating and hissing the big bird chased them away c50 05 05 [2.4]

1953 RSPCA open clinic in Great Eastern Street [2.15]

1954 great whale on show [2.20]

1954 The rabbit-killing myxomatosis disease which has been sweeping the country has been officially confirmed in Cambridgeshire for the first time. Following reports by farmers and gamekeepers that rabbits were dying on their lands with symptoms similar to the disease Ministry of Agriculture inspectors have found Chippenham and Boxworth to be affected areas. Government policy is to let the disease run its course. CDN 10.8.1954

1956 The White Horse Riding Establishment in Barton Road, Cambridge, has been used as a riding school for 35 years and has stabling for 24 horses. Much of the teaching takes place on land down Grange Road and it would reduce the dangers for inexperienced riders taking horses down Barton Road if they had an Indoor Riding School. But neighbours complained that it was noisy and smelly and a relic of the past. Horse boxes unloaded on the pavement and children stacked their bikes against the wall when they popped in to give the horses tit-bits. 56 05 16a

1956 Woolworth's application for a licence for a pet shop met criticism from councillors. Everyone knew the vast crowds who went into their Cambridge store and the noise made there - conditions which would worsen as even bigger crowds would be attracted. The animals would be kept in the same premises as food, much of which was open. People who kept pets under these conditions should go out of business. 56 03 30c

1958 Norwich terrier dog originally bred by Jodrell Hopkins and 'Doggy' Lawrence – 58 11 22 & a

1958 A gleaming new R.S.P.C.A. clinic in Great Eastern Street was opened at a simple ceremony, a memorial to Sir Arthur Eddington. Dr Rattray traced the history of the clinic from its beginnings in a small house in Covent Garden to the adequate and modern building being opened where hurt and ill animals will be treated with the latest equipment. Last year 2,248 animals were treated by the Cambridge branch but after returning from doing splendid work in the East Coast flood areas Inspector Bartlett had developed pleurisy. The Great Yarmouth branch wrote that his work was wonderful. c58 04 22

1959 Cambridge Cats Home run by the Blue Cross in Garlic Row was filled to capacity with 75 animals over the Christmas holidays. In the course of a year the Superintendants, Dennis Broomfield and his wife, look after over 1,000 'lodgers' and a very large number of strays. Each cat has a large run to itself and the nights are spent in warm boxes lined with straw and cloth inside spacious 'hutlets'. Each cat eats about half a pound of fish a day – good quality rock salmon steaks - and gets through a good quantity of milk 59 12 30b

1961 A day in the life of Bill, mongrel dog owned by licensee of Fountain pub – 61 05 26

1961 The collared dove is a new and exciting addition to the birds of Cambridgeshire. The first of these invaders from Eastern Europe settled on the Norfolk coast about five years ago and nested successfully at Overstrand. But they were first recorded in Cambridgeshire only two years ago. Three broods have been recorded from a pair nesting in Littleport and another pair has been

seen in Adams Road. It will be interesting to see how they will stand a really hard winter. 61 12 08b

1962 A wild Muntjak deer, believed to have wandered around Cambridge for more than a year, was cornered and captured by RSPCA officials in the Caius College boathouse. For months people have reported seeing it running across their gardens, nibbling their flowers or walking along main roads. Although tired the deer, about the size of a small dog, was still lively. It was placed in a disused aviary overnight and succeeded in loosening one side with its constant kicking. It was taken to the wooded countryside on the southern outskirts of the city and released. 62 04 04a

1985 2 scientists banned by Home Office from experimenting on animals after causing unnecessary pain [4.8]

1985 Barbara Duff has been Cambridgeshire's stray dogs' greatest friend for twenty years. She has devoted all her energy, time and money to saving thousands from death. Her work started when she visited the council's dog pound near the Milton sewage works. There was a row of pathetic dogs each tied up in a large room, spotlessly clean but unexercised and fed only dog biscuits. She put some in her car and took them to her friends. If they did not want them, she took

them to her home. Some she kept in kennels, which can be very expensive and she sold her own antique furniture to raise money. 85 01 31b

1985 Ernest Cooper is a furniture dealer who lives in Beche Road. His father began the business with a horse and cart but it has grown since those days and the horse and cart disappeared. However his love for horses was re-awakened when he bought a dapple grey pony named Dandy for his daughter. Then, when she had outgrown him Ernest went to Chingford and bought a trap and put Dandy in the shafts. Each weekend he harnesses the pony up and goes for a trot in the side streets or out into the country enjoying the roughness of a pair of reins and the hardness of the buggy seat. 60 11 22

1897 Not 10 per cent of houses in and around Cambridge have a bathroom. There is one public bath in Cambridge and for its use 1s is charged. How many of us workingmen can afford to pay that? The corporation has plenty of land for the purpose such as Petersfield, the cost of the baths would be not more than £20,000 and it would move one of the standing disgraces of Cambridge. (Letter) c1897 03 17

1897 The "Cambridge Daily News" makes proposals. A municipal washhouse. We believe there are hundred of women in Cambridge - the wives of working men - who would hail with the liveliest satisfaction the establishment of a place where they could do their week's washing with some degree of comfort. How many homes belonging to the humbler classes are there without anything like proper washing and drying accommodation to the occupants of which such a place would be a boon and a blessing c1897 03 17

1899 Dr Dennis Adams, one of the oldest and best-known medical practitioners of Cambridge has passed away. His career reaches back for many years. His practice was a large one; it was chiefly among members of the University. In celebration of the Jubilee of his practice in 1889 he was presented with a splendid collection of silver candlesticks. It is well known that he was not an admirer of the display of expensive flowers and wreaths at funerals and friends will probably wish to show their respect in some other manner 1899 07 10

1900 Not within our experience has there been so much sickness as during these last few months. It would take a very skilful actuary to make a full account of what influenza has cost the country. At the Hearts of Oak dinner in Cambridge the secretary reported that sickness has been altogether unprecedented, and they have paid out £7,700 in sickness allowances. Happily though influenza frequently develops into something very serious, in itself it is not deadly c00 02 23

1900 E.S. Payne has opened premises at Alexandra Street, Cambridge for the manufacture of artificial teeth. Complete sets, upper or lower from £1. Single tooth added, 2s.6d. Easy payment taken. Teeth scaled, stopped or extracted. Trusses and elastic stockings made to order – advert c00 08 01

1900 An epidemic of disease has broken out in Cambridge which is of such serious importance as regards the public health that we should not be discharging a duty we owe to our readers if we did not draw attention to it, notwithstanding the reticence of the medical authority, which to say the least is inexplicable. The Medical Officer of Health has absolutely declined to take the press into his confidence. That diphtheria is prevalent is beyond dispute, nor is it confined to Cambridge for rumour is that deaths have occurred at Chesterton. The death of certain children attending Park Street mixed infants school first brought the matter under the attention of the local medical authorities. Several deaths have taken place which are directly attributed to the disease CDN 1900 10 25

1900 We have received an official statement from Mr Alderman T. Hyde, respecting the outbreak of diphtheria at Cambridge. 'Last Friday I stated that we knew of 12 cases of the disease. Since then we have had a rather unexpected increase which made a total of 35 today. There have been four deaths from the disease. With a few doubtful exceptions all cases have been proved to have originated in connection with the Park Street Infants School, although so far investigations have shown no reason for supposing that the actual building on the site has had anything to do with the causation of the disease. No expense or labour will be grudged in the endeavour to stamp out the disease. It is thought advisable not to allow children to attend meetings in public halls during the present conditions" c00 11 08

1901 underground toilet built at Hyde Park corner [1.4] – *for other toilet stories see c. 29.8*

1901 Yarmouth Guardians received a report on the dissection of paupers' bodies. They had been sent to Cambridge by officials of the workhouse since 1881. Professor Macalister sent a cheque for £6 14s 6d for each body but only £5 10s 0d was really incurred for expenses. The railway charge for the carriage of a body was £4 6s.0d but the Master's clerk said it was £4 9s.0d and that he put the other 3s. in the poor box. £1 was paid for a coffin but he received 1s. from the undertaker. All the clerk had to do was to see the body was screwed down, go to the railway station and pay the charge. He said he gave the porters sixpence each but inquiry proved they only received a pint of beer c01 06 12

1901 Great Yarmouth board of Guardians revived the question of paupers bodies being sent to Cambridge Anatomical School for dissection. Every friendless person who died in the workhouse should be asked before death if he had any objection to his body being sent away for dissection. Mr Saul thought that was a gruesome and unseemly idea. Dissection was perfectly legal and right; if they declined to allow unclaimed bodies to be used surgeons would be compelled to make experiments on living people or resort to paying for bodies stolen from newly-made graves. The practice will continue c01 07 18

1901 During the recent epidemic of diphtheria in Cambridge great assistance was rendered by Dr Cobbett of the Pathological Laboratory. He is one of the greatest authorities on diphtheria and as so little was known about the general treatment quite a new plan had to be adopted. As he will not be available in future the Cambridge Public Health committee recommend that Dr Graham Smith be appointed bacteriologist to the council. It was only a skilled bacteriologist who could examine the throats of those who had been in contact with the patient. One child in school might affect twenty or thirty. Other councillors thought they would be creating a new office when they were overrun with officials at the present time. They had organisations all over the place. The Medical Officer of Health was quite capable of dealing with it c01 12 21

1902 smallpox brought to Cambridge by prisoner & men who built the London smallpox hut; Health Committee isolate it & prevent outbreak [1.1]

1902 Dr F.W. Hutchinson of Cambridge made an ascent with Mr Graudron, the aeronaut, from the grounds of the Crystal Palace in a balloon of 38,000 cubic feet capacity, to make observations with respect to the presence of bacilli in the upper reaches of the atmosphere. He took with him eight samples of sterilised gelatine and exposed them at different altitudes in order to capture stray microbes suspended in the air over London. These he intends to bring to Cambridge and cultivate, afterwards determining the nature of the bacilli he had collected. CDN c 29.1.1902

1902 Cambridge council heard that no demand appeared to exist for public wash-houses and owing probably to the facilities of bathing in the river. Ald Deck said it was true that every house built now was provided with a bath but they did not come within reach of some people who lived in old houses, of which there was a vast number. Public baths would be a great advantage & not only to the working classes. There was not a Turkish bath in Cambridge and a great many people had to go to London to get one. CDN 1902 02 01

1902 The smallpox case from Richmond Road, Cambridge, has been transferred to the smallpox hut in Coldham's Lane. All steps have been taken to minimise the future dangers. The clothes and the whole of the bedding have been destroyed and the house thoroughly disinfected. c02 02 12

1902 A small pox case from Richmond Road, Cambridge, has been removed to the small pox hut in Coldham's Lane and all steps taken to minimise any future danger. The clothes and the whole of the bedding had been destroyed and the house was thoroughly disinfected. The public vaccinator had vaccinated persons willing to be vaccinated CDN 1902 03 06

1902 Another case of smallpox has occurred at Cambridge Prison, Castle Hill. The spread of the disease is a mystery. The first case was in a prisoner from Maidstone. Prompt isolation followed. Another was found suffering from an infectious disease diagnosed as scarlet fever and he was moved to the Sanatorium. Other symptoms developed and he died. A few hours after a warder was smitten with smallpox and now there is a fourth case, a prisoner confined in the gaol for several months. Elsewhere infection has been traced to letters that have come from London where the epidemic is now raging. At Cambridge gaol mailbags are repaired in large numbers. They come from all parts of the country and may have carried the microbes that cause the disease. CDN 1902 03 10

1902 Dr Dalton said that in the case of smallpox taking a real hold upon Cambridge the very fact of waiting two or three days for vaccination would be the cause of more cases. He would prefer to pay for vaccination rather than pay for the erection of new smallpox huts. He hoped

more people would go openly to the public vaccinators to show it was not accompanied by any taint of pauperism; some believed they would be vaccinated with purer vaccine than they would get if they went to their own medical men. CDN 1902 03 12

1902 Sir – A man from the Cambridge prison, which they knew to be infected with smallpox, was admitted to the Sanatorium and yet no precautions were taken in the way of vaccination. His nurses passed into the room day and night. I object strongly to the want of promptitude in telephoning me as soon as smallpox was suspected so that I might be aware of the possible danger and be able to take precautions. I would not allow my patients to go to the Sanatorium if they are to be exposed to such risks – E. Lloyd Jones. CDN 1902 03 14

1902 Cambridge councillors considered possible sites for public baths, including Mackenzie Road, Quayside and Castle Street. The most suitable is Christ's Pieces. In order to provide a good swimming bath, length baths, a Turkish bath installation, together with boilers etc a sum of £8,000 would have to be expended, exclusive of the purchase of the site. £500 a year would be required for maintenance. In view of the half-hearted character of the public meeting they could not recommend expenditure of so large a sum of money CDN c20.3.1902

1902 Chesterton U.D.C. had asked the Prison Commissioners to provide accommodation for small-pox patients at Cambridge Gaol but they did not see their way to do that and urged the local authorities to provide room for the patients in their own accommodation. Chesterton would be prepared to place the small-pox hospital at the disposal of the gaol authorities but felt the prison should guarantee expenses and pointed out the difficulty of the safe custody of the prisoners. CDN 1902 04 03

1902 Sir – may I call attention to an almost intolerable nuisance that maintains on Mill Road, Cambridge. The shopkeepers are in the habit of sweeping the refuse from their establishments into the streets (especially on Saturday night) with the result that dirty paper is blown about the streets and into the gardens of private houses. It is most objectionable and annoying to have one's gardens and yards filled with rubbish of this description. Is it not an offence against the bye-laws? – Resident CDN c 18.4.1902

1902 A young Cambridge man who was imprisoned through being in arrears on a wife's maintenance payment contracted small-pox whilst lying at the county gaol, Castle Street. He was removed to the hut but succumbed to the disease on Sunday last. Deceased, we believe, had only been in gaol 18 days. He was buried last night. CDN 1902 05 13

1902 A piece of work, involving operations similar to those by which the "Tube" railway was constructed, is on the point of being finished, having been in progress for nearly twelve months. It is the sewer connecting the New Cemetery with the Sewage Farm, Cambridge. Its length is over a mile and in some places it is laid to a depth of 24 feet. The greater part of the work has been done by the "tunnelling" system and carried out entirely by Cambridge men under the supervision of the Borough Surveyor c02 11 18

1903 smallpox outbreak during Long Vacation, 100 people per day vaccinated. 146 cases, 15 deaths. Later doubt expressed if it was smallpox [2.1,2.2,2.3,2.4]

1903 A man living in Ainsworth Street, Cambridge was diagnosed with small-pox. He was forthwith removed to the small-pox huts, Coldham's Lane, and all known contacts vaccinated and kept under observation. He was a goods guard on the Great Eastern Railway whose train shunted opposite the small-pox camp in Tottenham Marshes and there was reason to believe there was communication between persons in the camps and the officials on the train. It is highly probable the disease was incepted from the camps. He made a good recovery. c03 05 28

1903 Typhoid fever was present in Cambridge during the year, 17 cases in 14 households having been notified. Four were county cases admitted into Addenbrooke's Hospital for treatment; five were imported from Fenstanton, Swaffham, Norfolk, Littleport and London. Two cases were probably due to eating shellfish. Two were nurses who had charge of typhoid patients and others could not be accounted for. Three of the cases proved fatal c03 05 29

1903 The new municipal cemetery, which Cambridge Corporation has prepared on Newmarket Road, was opened for interments. In anticipation of the time when the general public will regard burial more from a sanitary than from a sentimental point of view, a part of the ground adjoining Ditton Lane has been reserved for the erection of a crematorium. The first interment was a child named Alfred Willet Whitmore; the coffin was borne by six young ladies and Mr Ellis Merry was the undertaker. c03 06 02 – *for other cemetery stories see c. 21.2*

1903 There has been a recurrence of small pox in Cambridge. A well-known tradesman was removed to the Isolation Hospital and everybody who had been in contact with him was vaccinated and the premises and clothes disinfected. Had the information about smallpox spread it must have had a very deterrent effect upon the trade of the town and driven away many 'May Week' visitors. Ladies especially view possible disfigurement with feelings of revulsion. We considered we were justified in withholding the news until the close of festivities. The smallpox is contemporary with a widespread epidemic of scarlet fever which has taxed the Sanatorium almost to its limits. c03 06 24

1903 Dr Dalton has confirmed that the dangerous epidemic prevalent in Cambridge is smallpox and there have been no less than three deaths from the disease. Nobody who has been vaccinated recently had it but two unvaccinated children had the disease badly. He must insist absolutely on isolation of every case, however mild. He had ordered one tent which held 15 people – tents were very suitable at this time of year – and must order sufficient to provide for every case which required isolation c03 07 21

1903 On June 18th we informed the Cambridge public that a case of smallpox had appeared in the town. The day following we were officially instructed that it was not of smallpox at all, but of chicken pox, there was nothing like an epidemic and there was no cause for alarm. Now the announcement that there have been three deaths from smallpox is so astounding as to be almost incredible. Midsummer Fair has been held, probably the best means of disseminating an infectious disease that could be imagined, and no warnings issued to the public. A terrible scourge has been allowed to run riot without check or hindrance and we are afraid that Cambridge is face to face with a disastrous epidemic c03 07 22

1903 Since the outbreak of smallpox in Cambridge was official announced there has been a large increase in the number of cases reported. Unfortunately the infection has spread to surrounding villages and a case has broken out at Histon. This has resulted in the abandonment of the Histon Show and Sports, the Waterbeach Show has been postponed, the Promenade Concert on Christ's Pieces cancelled, schools have been closed and the Barnwell Theatre Mission have suspended operations. Wherever crowds assemble in a town where smallpox is prevalent there is danger of infection. c03 07 25

1903 Sir - An exciting scene occurred at 11.30 pm when the small-pox hearse was just reaching its destination and turning round previous to receiving the body of a young man who had died that morning. The night was very dark and the hearse overturned on its side, the smashing of glass and the bumping of the vehicle on the road causing a great commotion. After some delay it was righted again, the body duly deposited inside and it rumbled and groaned off to the cemetery, grating on the road with its iron-shod wheels in the dead of the night in a most unpleasant manner. Any private firm would have an India-rubber tyred vehicle for such work but Cambridge Corporation have apparently yet to discover that such 'luxuries' exist – 'Mill Road' c03 08 01

1903 Three additional cases of smallpox have been notified in Cambridge. In a large business house a young lady engaged in taking money became ill and the cause was traced to the money received into the establishment. Some businesses are now disinfecting coins as soon as they are received and none but disinfected coins are given in change. At Foxton the horticultural show has been postponed owing to an outbreak in the village. c03 08 06

1903 Sir – whatever may be said about slums, in Whitechapel you could go into any house in the poorest district but you would find a flushing cistern to every w.c., and that is more than you can find in Cambridge. When we had the sewers put in the Corporation tried to have the flushing

cisterns put in but they were ruled out by the objections of the large property owners. Until these matters are remedied we shall always be in trouble, either with this epidemic of some other – Ratepayer c03 08 14

1903 Sir – a report is circulating that a lad was sent from Cherry Hinton to the tents on Coldham's Common supposed to be suffering from smallpox and that after a week he was sent home, only to be taken away a second time in a few days. Another report is that during the recent heavy rains the beds in the tents were surrounded by water and the deaths that have occurred there have been caused by cold and not by smallpox, as reported. As ratepayers we have a right to know whether this is true or false. – Villager c03 08 27

1903 A meeting arranged by the Cambridge Anti-Vaccination League was held on Market Hill. A large crowd of people assembled but the opinions of the principal speaker aroused some opposition & a little heckling took place. Someone placed a quantity of calcium carbide into the water of the fountain. & the acetylene gas which was generated was borne among the audience to whom the disagreeable odour was most objectionable. c03 09 08

1903 The Mayor of Cambridge read a letter: "The teacher of the school which my daughter attends has asked that she be sent away from Cambridge during the last 18 days of her holiday in order she may have a period of quarantine before returning". He was sorry Cambridge had such an unenviable reputation. It was not deserved. There was no town in which a smallpox epidemic had been got under with such rapidity and this was due to vaccination. Not one who had been vaccinated had taken the disease. Six weeks ago there were 95 cases under treatment, now there were only 24 (applause) c03 09 22

1903 At St Matthews' church, Cambridge a service of thanksgiving to Almighty God for his mercies in delivering many from small-pox, scarlet fever and diphtheria was conducted by the Vicar. Since the parish was formed 37 years ago nobody had known anything like the amount of sickness God had been pleased to send them this year. In eight months they had been visited by three terrible diseases, each taking a large number of victims, 12 of which had proved fatal. How the people in the small-pox huts on Coldham Common suffered and longed for health so as to escape what seemed a prison. Those who were still convalescent wondered what was going on in their homes and were looking forward to the time of their release. No one wanted to stay in the huts a day longer than there were obliged to. c03 10 12

1903 A discovery has been made which seems to throw some light on the now happily disappearing epidemic in Cambridge. A professor claims to have discovered a new species of blood nematode which is productive of a disease called 'craw-craw' & has many points in common with small-pox. He contacted the Cambridge Medical Office and obtained blood films of a doubtful case of small-pox and on examining them found the same nematode. But an expert who was consulted was quite clear that the Cambridge outbreak must be an exceptional form of small-pox c03 10 15

1904 anti-vaccination movement active, magistrates grant exemption certificates [2.14]

1904 There is still a doubt in scientific circles as to whether last year's epidemic in Cambridge was really small-pox or a similar disease with another name: 'Craw-craw'. A lecturer on Patho-Histology at Birmingham University has sampled some blood films and is convinced that this the disease which has been puzzling the authorities at Cambridge, Smethwick, Kidderminster and Burton-on-Trent amongst other places. CDN 29.3.1904

1904 The placid life of Linton has been stirred by a rumour that the dead body of a pauper had been sold by the Master of the Workhouse to the Cambridge School of Anatomy. This was a perfectly lawful proceeding under the Anatomy Act which provides that the bodies of unclaimed paupers may be used for scientific study. The matter had been debated by the Board of Guardians who voted five for and five against but the Chairman declined to give the casting vote. The

Master had taken it upon himself to send the body to Cambridge. But it was not 'sold'. 1904 05 18

1904 The Association of Managers of Sewage Disposal Works inspected the Cambridge pumping station destructors where all kinds of refuse turned out from households daily, sweepings and other undesirable matter is tipped into huge trucks and burnt, giving off heat used whose steam is used to pump sewage. During winter months some 40 tons of refuse is burned each day. The disinfector was examined with interest; it was installed in 1902 and during the smallpox of 1904 was of great service in disinfecting a great number of articles using super-heated steam. They then moved to the Corporation sewage farm, Milton Road, for a practical demonstration of sewerage analysis CDN c 18.5.1904

1904 The Cambridge Medical Officer of Health reported that during the recent small-pox epidemic 154 people had been infected of whom 15 had died. At the start the Small-pox hospital consisted of two huts with an administrative block and a caravan for the use of men employed. Subsequently an addition hut and two tents were provided to give a total accommodation of 85 beds. There was also a tent for the nursing staff, a discharge tent, a dining tent, a mortuary hut and an additional caravan for the male staff. CDN c 26.4.1904

1904 Cambridge cemetery committee considered whether to close the whole of the Mill Road burial ground. They had asked the various incumbents as to the number of grave spaces allotted to their parishes and whether it was possible to identify the graves of all persons buried there. It appeared to be dependent on the knowledge of the sexton and there was no way of identifying the position of each grave. There should be a public enquiry. But there were many timid widows who had husbands buried there and would like to be buried there too who would not go to an enquiry. Alderman Kett agreed: he would like his bones to be laid there and had six or seven unoccupied spaces for members of his family. What would an inspector care about such sentiments. He would be overruled by those fanatics of sanitary improvement. CDN c 28.5.1904

1904 The Local Government Board have decided to close those parts of Mill Road cemetery which are assigned to the parishes of St Andrew the Less, St Mary the Less and St Botolph but say there is no need for the protection of public health for other areas to be closed. The three portions will be sealed while in the rest of the burial ground interments will continue as usual. This is in accordance with the deep feelings expressed at the inquiry where representatives of the other parishes had protested strongly against their grounds being closed, with the single exception of the Rev Wood who was acting in direct opposition to the wishes of his parishioners. His 'aesthetic' vapourings were appreciated by the Inspector for their true worth. CDN 25.8.1904

1904 Since September 14 cases of diphtheria have been diagnosed among Cambridge school children, 11 of whom have been removed to the Infectious Diseases Hospital. Swabs have been taken from their classmates and any harbouring the diphtheria bacillus are removed to the Isolation Home. Three cases have proved fatal. One was of a child who died through medical advice not having been sought in time. It had been ill for four days before a doctor was called in. Steps were taken to remove the patient to the Hospital as quickly as possible but when the conveyance arrived at the house death had taken place only a few minutes earlier. CDN 24.11.1929

1904 Lincolnshire has long been a county noted for drug-taking. A chemist said that he had sold more opium and laudanum in four years at Spalding than during the previous twenty in other parts of the country. The habit had been handed down amongst the inhabitants for many generations. It was originally resorted to as a means of allaying pains resulting from ague but the present generation are not such slaves to the habit as their predecessors. More opium is sold at Peterborough than in any other town in England but it is not one-tenth of what it was 30 years ago. The sale is now mainly confined to villagers, especially women, and the evil appears to be gradually dying out CDN 29.11.1904

1905 Council Medical Officers department reorganised following smallpox outbreak [2.15]

1905 Midwives Act comes into force [2.16]

1905 Serious allegations have been made against the sanitary administration of Cambridge in a letter to 'The Times'. As that newspaper reaches but a small section of the burgesses it would normally have been reprinted in the columns of the C.D.N. We were, however, requested by the Town Clerk not to give publicity to the complaints until a reply had been given. But now we can print both. The manner involved a furnished apartment in which a child died from diphtheria. Finding the apartments to let 'The Times' journalist took them. She claimed it had not been disinfected and a survey showed very serious defects in the W.C. between the two bedrooms. 05 02 23

1905 Cambridge Medical Officer reported on the recent scarlet fever epidemic which affected undergraduates at one college. The only common link was the milk supply. He discovered that the dairy had obtained a supplementary supply from fifteen different sources. One of these had a milker who had visited relatives at a village where scarlet fever had been present and had suffered from a sore throat. But there was no definite proof he had suffered from the disease. The dairy had stopped distributing any milk other than that of its own cows and no further cases have occurred. 05 04 20 a-c

1905 A valued correspondent asks whether the Cambridge Town Council are going to take any action in regard to the recently-constructed drinking place for cattle on Midsummer Common. "In view of the recent scarlet fever epidemic which was directly traced to infected milk their apathy is remarkable. Unless something is done the cattle from which the milk supply of Cambridge is principally derived will shortly be feeding on sewage" An iron trough should be inserted in the existing waterway so that the water the cattle are drinking would escape the sewage which currently mingles with it. 05 04 25

1906 Voluntary Association for Maternity & Child Welfare originated [2.17]

1906 Dr Bushell Anningson has served as Cambridge Medical Officer of Health since 1875. Then the whole sewerage was most unsatisfactory and 800 houses in Sturton Town had only middens and cesspools. 2,000 houses had no water supply other than pumps or wells – in many cases contaminated with sewage – and there were no arrangements to cope with a serious epidemic. Household refuse was collected by private individuals who did the work for what they could get out of it. They used donkey carts which were emptied in their own backyards in the neighbourhood of Gas Lane where it was examined for saleable material such as bones and cinders. 06 03 28a

1906 One of the most important activities of Friendly Societies is the provision of skilled medical advice in time of sickness. Cambridge Medical Association was formed in 1883 with a membership of 1,740 and one medical officer. It now serves 7,350 and has engaged two and sometimes three. It is important to keep good doctors: you must treat them as gentlemen and their services should be made as pleasant as possible 06 04 16a

1906 The Borough Surveyor bought a new watering van at a cost of £52. They had 11 vans but four were unfit to travel as the wheels would not go round. With the sudden arrival of hot weather there was not one fit for use. They should have been overhauled at the end of the season. But scavenging in two districts had been let out to contractors and the vans belonging to the council were in their hands. 06 04 19b

1906 Cambridge water supplies might be polluted from sewage from Cherry Hinton and Fulbourn. Householders use pails for the collection of excreta and if this is spread on the land then the possibility of typhoid organisms finding their way into the water supply must be remote. A more serious menace is the soakage of infected matter from improperly-constructed cesspools and the sewage from the Asylum. Some Cambridge people have started to boil their water. 06 06 14a & b

1906 Eugen Sandow has opened consulting rooms in Sidney Street where advice regarding health matters may be obtained. Provided your ailment is not an incurable one he guarantees to

bring you to a pitch of physical perfection. The Cambridge Manager will take particulars of your case and forward them to him in London where Mr Sandon will plan your course and the Cambridge Manager will show you how to correctly carry out instructions. 06 11 02b 06 11 22a
1906 Sir – each scarlet fever patient leaving the Cambridge Sanatorium has to have a final disinfecting bath, after which he is put into clean clothes sent from home. But the patient is bathed and dressed in the bathroom in which all the patients have been peeling for an indefinite period. The room is therefore more infectious than the wards themselves. Discharged patients risk carrying home the infection they have been isolated to obviate – J.H. Dalton 06 12 05
1906 Though blind from birth, Miss Mary Start was never one to sit down hopelessly under the infirmity and as a masseuse found a means of supporting herself and conferring service upon many sufferers gaining a distinguished clientele. Her skill was not reserved for the rich; many poor people had reason to be grateful to her. She played chess, studied Esperanto and read practically every book published in Braille. 06 12 10

1907 dental inspection for children introduced [1.3]

1907 Mr G.A. Mackenzie of Ross Street has organised services for deaf and dumb children at Tracey Memorial Hall. They have been attended by nearly 30 people, many of whom have received excellent training in institutions and some have already been confirmed He was formerly Diocesan Missioner at Oxford and secretary of the Liverpool Deaf and Dumb Association. 07 01 24a

1907 Sir – the cartage of the sewage filth into Milton is again in full swing. Considering the outbreak of fever at the Hospital and at Cherry Hinton everyone must agree this is a terrible risk to run and it should be stopped. Crude sewage was run as usual on Sunday down a ditch to Baitsbite Lock which should supply the lower fen with pure water. This is within a few feet from where the University boats start, and would hardly commend itself to rowing clubs – ‘Ratepayer’ 07 09 28

1907 Cottages in Cave’s Yard, Union Road, Chesterton are as about as bad as any in the district, an inquest into an infant was told. Vermin found on the child’s body were not the fault of the mother: it would be impossible to keep such a house in that district free from vermin; the district ought to be burnt down. The slums in Old Chesterton are as bad as any you will find in London, a doctor testified. But people had to live somewhere. 07 10 17

1908 dental clinic opened : Cambridge the first town to give proper attention to children’s teeth & only one with complete scheme for regular dental examination of every school child once a year [1.11]

1908 1 in 8 infants under 12 months die [2.17]

1908 Cambridge MOH report- 08 04 15 & a

1908 The Cambridge Church of England Mission to the Deaf and Dumb was started two years ago to meet their spiritual needs. It meets at St Philip’s church and attracts people from Swaffham Bulbeck, Milton and Trumpington. Several special services of Holy Communion have been held with Mr G.A. Mackenzie interpreting in the sign language CWN 08 09 18 p5

1908 The Cambridge District Nurses moved into their new home standing in its own grounds on Newmarket Road. Designed by W.M.Fawcett and built by Coulson and Lofts, it has a smart exterior appearance. Facing the road is the entrance to the surgery with the dining room, and kitchen with sitting rooms for the Superintendent and nurses on the first floor together with four bedrooms and another three on the second floor. The building is lighted by incandescent gas and fitted with electric bells CWN 08 11 06 p5

1909 children's teeth – Cunningham, dentist – 09 01 29

1909 health of Cambridge report – 09 05 21

1909 Dr George Cunningham told an International Congress in Berlin of the work of the Cambridge School Dental Clinic, the only one of its kind in England. Mr Sedley Taylor of Trinity College had been shocked at the state of children's teeth and funded a dentist to investigate. He found the condition of their temporary teeth was so bad that proper treatment was impossible. The best thing was to concentrate exclusively on permanent teeth which appear after the sixth year. The results were so convincing that the Town Council decided to fund the clinic. CEN 09 09 03

1910 complaint that bathrooms not provided in new houses [2.21]

1910 If the death rate for consumption continues to fall at the present rate it should be extinct in Cambridge in the next 20 years, said Dr Laird at the Tuberculosis Exhibition in the Corn Exchange. Last year there were about 200 cases and 65 deaths. If a patient stays at home a Health Visitor provides spittoons, proper handkerchiefs and disinfectant; if they go to the Sanatorium the house is disinfected, cleansed throughout, re-papered and limewashed. A new pavilion will be built for those who live in overcrowded rooms or who cannot have a bed to themselves. 10 02 11d & e

1910 Under the Midwives Act no woman can habitually attend women in childbirth unless she is certified. There were 54 midwives on the register of whom 30 were trained. Ten of the untrained women were between the ages of 65-75 and might need replacing before long by reason of death or infirmity. There was only one trained midwife at Willingham and an untrained woman at Landbeach. There were none at Isleham, Burwell, Wicken, Upware, Milton, Cottenham, Swavesey or Histon. Some mothers can afford the fee of a medical practitioner but are unable also to pay the full fee of a skilled nurse and so may turn to unregistered women 10 05 06b & c

1910 Amongst those who took their degrees in Theology at the Senate House was G.A. Mackenzie the Missioner of the Church of England Deaf and Dumb Mission for Cambridge. He has attained his degree in spite of the fact that he was born deaf. He started the present mission in the Tracy Hall, Cockburn Street in 1906 where services and Bible-classes are held every Sunday in the finger and sign language. About 30 deaf persons attend regularly 10 06 24g

1910 Death of Walter Edward Pain, chemist – 10 12 30b

1911 The Cambridge Society for the Blind was established at a meeting attended by the Masters of several colleges. The number of blind were gradually tapering off as there were few diseases of the eye that were not understood and most were preventable or remediable. But there should be a society to watch over their interests. Sadly H.M. Taylor of Trinity was unwell. When his sight first failed he had the greatest difficulty in learning anything about the blind. He had given his powerful intellect for others who suffered the same trouble and had established a firm to publish embossed scientific works for the blind. 11 10 27e [1.5]

1911 byelaw proposed that refuse must be placed in galvanised receptacles, feel tenants might use them for wheelbarrows, coal scuttles or to give babies baths; cost high, byelaw with drawn [1.5,4.1]

1911 milk depot established to provide pasteurised milk in sealed containers for infants [3.4]

1911 Red Cross Society Voluntary Aid Detachments formed to complete medical establishment required for Territorial Force in event of invasion, County Council hold courses [3.3]

1911 surprise at number of ladies who smoke [3.6]

1911 Measles is very widely prevalent in Cambridge just now, largely due to the fact that it is nearly three years since there was an epidemic and a large population of susceptible children has grown up. Parents should be familiar with the symptoms which are similar to those of a common cold and should keep the children at home until quite certain measles will not develop. This is not

a trifling complaint: the average deaths from measles is five to six times higher than from scarlet fever and a doctor should be called in immediately it is suspected 11 03 10

1912 proposal to ban smoking in New Theatre rejected [2.22]

1912 Romsey Town Institute have bath that members can use, 1d cold, 2d hot, few use it [2.23]

1912 Assistant dentist to be appointed to look after children's teeth – 12 05 17c

1912 Insurance Act ; Doctors pledge not to work the scheme but eventually decide to go on the panel for 3 months [3.1]

1912 Borough council byelaw re siting wcs etc [NI.3.4]

1912 Since Midsummer Fair there has been a very great increase in the number of cases of scarlet fever. The disease had been epidemic in Cambridge for a long time and owing to the mildness of the cases it is proving most difficult to cope with. Many are only discovered during the 'peeling' stage. Numbers of children in an infectious state attended the fair resulting in the sudden jump of reported cases 12 07 23e Interview with a victim – describes symptoms – 12 07 12l

1912 Scarlet fever outbreak statistics, started Castle End – 12 07 19b

1912 The Medical Officer's report on pure milk supplies includes excellent photographs showing the good caused by pulling down old cow sheds and their replacement with up-to-date buildings. There are 305 milch cows in Cambridge, kept by 30 cowkeepers, but a large number of purveyors buy supplies from Huntingdon, Norfolk and Buckingham while cream is brought from as far away as Wiltshire or Somerset. The average consumption is less than half-a-pint per head per day. Amongst the poorest milk is a luxury and used chiefly in tea. The practice of ladling out milk from a deep can is a source of contamination: the milkman's hand may enter it or rain and dust get in when the lid is removed. 12 07 19

1912 Chelmsford Board of Guardians passed a resolution in favour of the bodies of paupers who die in the Workhouse and are not claimed by relatives being sent to the University Medical School, Cambridge, for experimental purposes. One Guardian described the proposal as a scandal, but others, including two clergymen, said they would be willing to allow their own bodies to be used for a similar purpose. 12 10 04j

1913 January 15th, the date on which medical benefits are due to begin under the National Insurance Act, will find Cambridgeshire prepared. Up to last Saturday Cambridge doctors showed a solid front against working the Act but a meeting was hurriedly called at which they agreed a resolution: "That to save from absolute ruin many of our fellow practitioners ... we can no longer condemn those who are forced in self-preservation to go on the panel". But they express 'bitter animosity' against the Government's methods. 13 01 03a

1913 Cambridge Provident Medical Institution was established in 1883 to secure medical assistance during illness for the working classes, domestic servants and others unable to pay the usual professional fees. At one time 2,000 names were on the books but this declined as other friendly societies were established and now the Insurance Act means it must be wound up. W.R. Brown served as assistant collector and secretary till disabled by an illness which ultimately proved fatal 13 06 20 p5 CIP

1913 The British Dental Association conference heard of the work of the Cambridge Dental Clinic 13 08 08 p5,6,10 CIP

1913 Big public baths were really a luxury but the council should spend money on cottage baths in the poorer quarters of Cambridge. They were necessities for those who had not opportunities in their own private houses to wash themselves. In Germany schools were built with baths and the children were required to bathe once a week. In backward Russia there was the village bath for everyone. Bradford had seven different types. Could not the Corn Exchange be put to double use by making a bath at the bottom and have the corn merchants above? 13 10 17 p4 CIP

1913 Huntingdonshire & Cambridgeshire are amongst the most serious cancer localities in England, research over the period 1901-1910 shows. 13 12 05 p5 CIP

1914 need for bath houses & cleansing stations for school children stressed [3.8,5.4]

1914 Amongst those who took their M.A. was Mr G.A. Mackenzie who is the first to attain the degree despite being born deaf. For some years he was a well-known artist in Liverpool, then became a diocesan missionary in Oxford. In 1906 he came to Cambridge and founded the Ely Diocesan Association in aid of the Deaf and Dumb. At the same time he read for his degree, attaining his B.A. in 1910. He learned to speak with the aid of his mother and an elocutionist and can now conduct all his business by speech. 14 03 20a

1914 Professor Sims Woodhead, said while members of the Sixth Division were based in Cambridge, before going to the front, one man was found dead in his tent. There were rumours he had succumbed to typhoid inoculation but a post-mortem showed he had not been given one. To get the best results from inoculation men should be rested and given light food. Then they would be well again after one or two days. But a man who would not rest and have his arm in a sling was four of six days in a very uncomfortable condition 14 12 18

1916 half sewage passed into river untreated, resignations from committee; due lack of care when laid pipes crack & water gets in from soil, but has transformed Cambridge from damp place to dry & healthy - few years ago impossible to dig down 7 feet without hitting water, now 20 feet, mists stopped [2.2]

1916 flooded state sewage farm due to experiments to see what possibilities; daily flow 3 million gallons, can dispose of only 2 [2.3]

1917 300 babies at Corn Exchange show [Rev Yr 7.1919]

1918 Influenza Epidemic- no signs of abatement of influenza, outlying districts, which were immune a week or two ago, are now attacked, and the epidemic still proceeds. Public schools, which were to have re-opened next Monday, will in all probability remain closed for a further period. The doctors agree that the present type of the disease is very virulent, and one of its features is the great rapidity with which it spreads. There has been a tremendous run on the chemists for eucalyptus, quinine, etc., but the great preventative is, we are told by the highest authority, "open air and free ventilation." 18 10 30 CIPof

1918 Influenza Scare.— shops were complaining that they were getting large stocks of bacon on hand because people would not buy it on account of the idea that influenza was due to eating it. Dr. Laird (Medical Officer) could not find the slightest evidence in support of the idea that the present outbreak of influenza was attributable to the eating of bacon from animals which had suffered from swine fever. There was no evidence of swine fever being transmissible to man 18 12 04 CIPof

1922 Faith healing in Cambridge. Remarkable evidence at inquest on diphtheria victim An inquest was held by the Borough Coroner on a boy aged five, the son of a bricklayer, who had died from diphtheria. The parents had not called in a doctor until it was too late. The father said the boy had been ill for the last week or so, and had been away from school. “I belong to the Peculiar People and we believe in faith healing – the laying on of hands and anointing with oil”. On March 4th the boy appeared to be worse and could not get his breath easily. He sent his wife for the Doctor at midnight and while she was gone the boy collapsed in his arms and could not draw his breath. The doctor said that if one went out to every child that was unwell one would be out half the night. Next morning the mother called and told him the child was dead. The child’s brother had been swabbed at school as there were cases there. Unfortunately deceased was absent from school then. The Coroner said “When a case like this occurs it not only affects the parents and their children, but it may have a very serious effect upon the whole town” CDN c 9.3.1922

1922 At the Grand Council of the Red Cross Society and St John Ambulance Association Mrs Hartree raised the question of the police ambulance, and said she understood that the police ambulance was to be kept in the town, and that the Red Cross Ambulance should be used for long distances. However it was seen that the Police ambulance had gone on long distances - Ipswich and Norwich. Mrs Pryor said she knew the ambulance had been used extensively at the Evelyn Nursing Home. The Chief Constable said that the objection to the Red Cross Ambulance was that it was not heated, but they had very quietly informed him that it was heated and the ambulance had been much improved lately CDN c 30.4.1922

1923 Cambridge public health committee have asked the surveyor to prepare plans for the erection in Gwydir street of a building containing about 18 slipper and two douche baths. Dr Dalton said there was great need for washing baths in Cambridge. Three quarters of the houses in the town were without baths, and he believed there was only one place in the town - a hairdresser’s - where there were baths available for the use of the public. There were 20,000 people in Petersfield, St Matthews and Romsey town districts alone. This was not a luxury, but a necessity c23 10 28

1925 Cambridge Chief Constable reported that the present motor ambulance is showing signs of wear and in need of a thorough overhaul. It had travelled upwards of 13,000 miles and conveyed 1,500 patients. It had cost was £800, the chassis was secondhand. During this time £700 has been received for its use by private persons. The committee recommended the purchase of a new motor ambulance, built by a special ambulance body builder, at a cost not exceeding £1,000 c25 03 21

1925 Speaking of the need for a Bath House in Gwydir Street, Cambridge, Dr Laird said the only houses in the area with baths were 50 being built by the Corporation in Vinery Road and about 80 houses in Guest, Willis and Collier roads. A very small proportion of the houses in Cambridge had baths. The absence of such facilities was a contributory cause of disease. The Ministry wished to defer it because they thought bricklayers should be employed on housing schemes and hesitated to sanction schemes that would take bricklayers from houses c25 06 15

1925 The Cambridge Women's Welfare Association was formed recently to bring a knowledge of birth control methods within reach of poor mothers. It is a rule that every woman attending must be seen by a doctor and the Cambridge Centre, Fitzroy Hall, Wellington Street has both a lady doctor and a certified midwife in attendance. The London Society for the Provision of Birth Control Clinics began its work in a small way at Walworth and now has centres at North Kensington and Wolverhampton as well as Cambridge. At Walworth 5,275 separate cases have been dealt with since its work began in 1921 c25 12 15

1926 A Cambridge school girl died of small-pox at the Infectious Diseases Hospital, Mill Road and as a result the East Road Boys', Girls' and Infants' Schools have been closed for at least a week for disinfection. The Medical Officer strongly advises people to get vaccinated. The last outbreak occurred in 1921 when a man was affected. There was also an isolated outbreak in 1919 c26 03 14 [1.13]

1926 The motor ambulance service in Cambridge continues to prove of great benefit and increased demands have again been made both for accidental and private cases. An additional motor ambulance has been purchased and has proved of great assistance. The number of calls received was 701, 175 to accidents and cases of sudden illness in the streets and 526 to private removal cases. The Watch Committee have excused payment in several cases of private removals, where the persons were in necessitous circumstances. The ambulances are available at any hour of the day or night upon application to the Central Police Station or Fire Station c26 03 01

1926 A Cambridge dispenser claimed he used drugs to make up "pick-me-ups" for undergraduates in the morning. The judge: "Do they require 'pick-me-ups' in the morning?" (Laughter.) "They do things now that we never thought of". He made them up out of his head, usually mixing three tinctures. They were drunk in a wineglass of water. They were used every day during term time. The undergraduates looked something of a wreck in the morning and owned to having had a little refreshment at night. (Laughter.) c26 11 19

1927 Public Baths open in Gwydir Street [1.16]

1927 discuss provision of maternity home [2.5]

1927 A state bordering on perfection" is the report of the Cambridge Public Dental officer on the treatment of elementary school children during 1928. 642 parents had written to refuse treatment for their children but we shall slowly educate the public that dental treatment for children is well worth while, he says. The improvement in the condition of the teeth has advantageously affected the physique of the children – in 1908 17 per cent of the Cambridge children were of poor physique, whereas in 1925 only 1.8 per cent were found to be so. c28 07 08

1928 1928 has been a bad year for the prevalence of diphtheria with over 100 cases in Cambridge, resulting in 14 deaths. There have been 37 cases in elementary schools since September and six have ended fatally. Taken early the disease can be treated with a serum but parents are liable to mistake the first symptoms for those of a slight cold, a sore throat or the mumps. There is no traceable cause for the outbreak and personal contact, not insanitary conditions, is a primary cause of its spreading. c28 11 28 [1.18]

1928 The work of the Cambridge Birth Control Clinic was explained to Cambridge Women's Welfare Association. The foremost difficulty was the absence of a contraceptive method so

simple and effective as to meet the needs of the over-tired, feckless, under-housed, unintelligent or mentally-deficient woman. But although they should do something to enable people to have just the children they could manage, their methods, generally called 'birth control', were disgusting and filthy. There was danger in the free use of contraceptive methods by unmarried young people. They might be getting to the morals of the poultry yard. c28 05 15

1928 In Salisbury Villas, Station Road, Cambridge is an embryo Missionary School of Tropical Diseases and Hygiene. Since its inception 85 missionary candidates have received instruction in anatomy, bacteriology and medicine to enable them to care for their own health when far from qualified aid and alleviate sickness and suffering on the field where they will be working. It was founded by the Rev. E.S. Fellowes-Farrow and housed in rooms in his private residence. c28 10 20

1929 Sir – The Cambridge Surveyor offers to supply 'Standard Bins' at 4s. 9d and limit the amount of refuse. These are certainly tidy but judging from the state of some of the bins one feels that potential disease forces lurk under the lids, especially on murky warm nights. The advantages of the old wooden box or tub is that when the bacteria and damp have done their work the said container perforce refuses refuse – I.M. Tired. Editor: I believe the sanitary dustbins are infinitely preferable to the old wooden boxes without lids that often decorate our pavements and provide a happy hunting ground for stray dogs. CDN c.13.1.1929

1930 Two bottles of dead flies were produced at Cambridge council meeting in support of the contention that a rabbit skin factory in York Terrace was still a public nuisance. They had been caught in neighbouring houses. Residents said life was unbearable on many occasions and a man suffering from tuberculosis had to sleep with his windows shut because of the obnoxious smells which were worse at night. But the Medical Officer said that in spite of careful inspection no smells, flies or bugs were found. 30 02 28-

1930 Sir – the rabbit factory in York Terrace, Cambridge, is a disgusting nuisance, excluding a horrible stench. Had this factory been on Grange Road the foundations would never have been dug but York Terrace stands for poverty and insignificance and so maggots, flies and stench should apparently be borne with that humility that has been the bane of the workers all down the ages – P.J. Wright. 30 03 08

1930 Sir – I am one of the fortunate ones employed at the rabbit warehouse in York Terrace, Cambridge. I came here about two years ago to grade these skins. It is a warehouse, not a factory; there has never been an outbreak of fever among the employees and a healthy child of 13 may start work there. To close it would add about 20 names to the unemployment register – T.A. Edwards 30 03 08b

1930 Cambridge Guildhall was crowded with an audience chiefly composed of young men and women, but with a fair leavening of older folk, who had come to hear Dr Marie Stopes give an address on birth control. She spoke rapidly for an hour and replied to many questions. Thousands of mothers, having had three or four children, with perhaps only one year between them, finding it difficult to get sufficient food and worn out were in dread of another unwanted child. What was wanted was spaced babies from radiant mothers. Dr Stopes had been abused, insulted and misrepresented but she made people think and talk about birth control. 30 04 30a & b

1931 A new luxury ambulance will soon be seen in the streets of Cambridge, replacing the older of the two Borough Police ambulances. It is an Armstrong-Siddeley fitted with self-changing gears and equipped with a wheel stretcher and Mosley 'float-on-air' bed. It is the last word in comfort with a Thermorad exhaust heater to warm the interior in cold weather and opaque glass so patients can see out. 31 10 02b

1931 Residents of York Terrace protested about the rabbit-skin warehouse in Sturton Street. They had large blue-bottles in their homes and maggots had been seen crawling on the pavement within a few inches of their doors. The proprietor had put in different machinery but had not obviated the nuisance. It should be moved from that crowded area so people could live free from the smells, maggots and flies. 31 10 23c & d

1932 Complaints have been received about the rabbit skin warehouse in Sturton Street. Inhabitants of York Terrace say it caused effluvia and was a nuisance injurious to their health due to abominable smells which prevented them opening their windows and because of the maggots which escaped from the works and entered their houses. 32 01 18

1932 York Street residents signed a petition complaining about the Sturton Street rabbit skin factory. It had started in 1928 and the skins were stored and dried on the premises. The smell was very offensive and unhealthy, like old bones burning, there were maggots in the streets and blow flies as big as small bees. It was very bad in August – but the factory was only open from September to March. 32 02 19 & 19a

1932 Dr F.C. Searle is giving up his practice in Cambridge and will take up an appointment as a medical attendant on a ranch in Kenya Colony conducted by former students of Trinity College, known to him as patients during their stay at the University. “I have always felt the call of the wild and shall be in my element roughing it hundreds of miles from civilisation”, he said. He has resigned from the Rotary Club and as medical officer to the Cambridge Home of Mercy. He will not be accompanied by his wife and children, for whom he has taken a house in Cambridge 32 03 14

1932 A Cambridge doctor claimed payment from an undergraduate for a course of sun ray treatment. He sent his account to the college but the tutor had not been told the student had been ill and queried the charge. When undergraduates are going down it is extremely difficult, if not impossible to get them to pay their bills, he lost more from undergraduates than any other kind of patients, the doctor complained. 32 06 17 c& d

1932 white walking sticks for blind provided [1.7]

1933 new Health Centre established [1.11]

1933 The Medical Superintendent reported a rather severe epidemic of influenza at Fulbourn Mental Hospital involving a large number of inmates and staff. The epidemic spread to the female side and 105 patients were affected, 30 dying. None of the staff died. The epidemic lasted nearly a month. The Visitors expressed their appreciation to the staff for the extra and hard work during a very trying time. 33 02 28b

1933 school dentist's report – 33 03 29b & c

1933 Cambridge Mothercraft Clinic gives information and teaching which saves women many hours of anxiety and babies many terrible pains. They have held classes for expectant mothers and six have come to the clinic for help and advice. It is open two days a week and has seen 160 attendances but needs 360 people to pay a guinea a year to cover expenses. 33 05 18 a & b

1933 Deaf-mute people were cut off socially and industrially, many became a burden on their families and were sent to institutions at the age of seven. The answer lay in one word: ‘Papworth’. A village settlement should be established in pleasant surroundings where they could live in an entirely self-contained community. They could make their own township and find a suitable vocation in working the land. The difficulties of normal children born in such a colony, of the marriage of deaf-mutes and the sterilisation of the unfit were touched upon at a meeting in Cambridge 33 05 26d

1933 The new Municipal Health Centre in Auckland Road houses the school dental and medical clinics as well as maternity and child welfare centres. After health visitors started in 1906 infant mortality had dropped from 114 per 1,000 down to 38 last year. As for the dental clinic it

was Dr Charles Cunningham and Mr Sedley Taylor whose combination of science and benevolence set an example which had been followed all over the civilised world. 33 10 16

1933 Dr Charles Frederick Searle's name removed from Medical register – 33 11 30

1935 Thomas Henry Connor, Cambridge dentist dies – 35 05 27

1935 A widow, married woman and a waiter were charged with procuring a miscarriage. The man said a girl arrived in Cambridge and told him she wanted something done. He went to Mrs S—who said she knew a woman to go to. There was only one thing that might be effective. It would cost £3. But Mrs D--- said she'd been only paid £1.10s for what she had done. 35 09 02

1935 Death statistics show that measles and whooping cough had caused as much loss of child life as diphtheria and scarlet fever. Since 1910 influenza had caused at least 1,400 deaths in Cambridgeshire, even higher than in the five years preceding the Great War. Improved travelling facilities and cheap cinema entertainment were great causes of the spread of infections and until people refrained from exposing others to risk in those surroundings there could be little improvement, Dr F Robinson warned Rotarians 35 12 18a

1937 Horace Coulson, the well-known chemist, was one of the best-liked men in Cambridge. – 37 01 30a

1937 St Dunstan's organised a reunion of war-blinded men at the Dorothy Café. Their aim has always been to re-establish the men in their own homes and consequently they have lost touch with fellow sufferers. There were demonstrations of the Talking Book Machine, a kind of gramophone which can be used to play both ordinary records and special recordings of books which run for about 25 minutes. The machine has only been in production for a year but already 100 books have been recorded. 600 have been distributed, half to soldiers, and half to civilians. 37 03 20b & c

1937 Dr A.J. Laird has served as Cambridge Medical Officer of Health for 29 years. Since 1908 the death rate, infant mortality, tuberculosis and all ailments had dropped with the possible exception of cancer. There'd been no complaints about the Infectious Diseases Hospital and he'd twice saved Cambridge from epidemics of smallpox. Nor had there been a quarrel with the County Council over matters of public health – the medical officers had always come to an agreement. His work had been largely unseen and unspectacular but Cambridge owed him a very great deal. 37 07 29d

1938 crematorium opens, Huntingdon Road [1.4]

1939 St John Ambulance brigade formed [4.1]

1939 Tuberculosis work as been carried on in Camden Place for 25 years. Now the old dispensary is being demolished with a new clinic adjoining Shire Hall, Castle Hill opened by Prof Ryle. It is equipped with an X-ray apparatus of the highest quality with a skilled radiologist in charge of it. Now the death rate from tuberculosis in Cambridgeshire was one of the lowest. The new dental caravan was also on display 39 03 04a

1942 Death of Dr. F. L. Nicholls. — The news of the death of Dr. Frederick Lucius Nicholls, O.B.E., on Thursday of last week, came as a great shock to the village of Fulbourn and to a wide circle of friends, colleagues and admirers in the county and still further afield. For nearly 55 years Dr. Nicholls had practised in Fulbourn and the neighbouring villages, and his skill, kindness and ever-present sense of public duty endeared him to all with whom he came into contact. Some of the older residents will remember him many years ago, when he was to be seen on horseback visiting his patients, and will have seen him riding up to the doors, and, whilst still in the saddle, knock with his riding whip, and often prescribe by the road-side; and now that he has passed on, his generosity of heart can be recorded with gratitude, for many families have

benefited by his care and attention, but never received a bill for his professional service. He refused to be enrolled as panel practitioner, preferring to retain the old family doctor tradition, but he was always ready respond to all appeals for his services. During the last war successfully conducted a hospital in the village without any remuneration, and for which he received the O.B.E. in the post-war honours list. During these years of national difficulty he made it a rule never to make any charge for professional services to any members of servicemen's families 42 07 31 CIPof

1942 Frank Robinson, former Medical Officer Health Cambs dies in river, career – 42 10 05a

1943 Mobile Operating Theatre attached to Red Cross Flying Squad – 43 01 11

1943 E. Saville Peck retires from Pharmaceutical Society council – career - 43 07 03

1945 Blantyre Home for blind formed [446.12.3]

1946 Voluntary Association for Maternity & Child Welfare wound up [2.17]

1947 ambulance service jump gun to become first to carry patients free of charge- unique- comes under NHS June 1948 [5.4,446.11.3]

1948 Nursing Association wound up [1.4]

1948 The first case dealt with by Mr Harry Edwards, a leading psychic healer at the service of healing of the Cambridge Spiritualist Healing Guild was a four-year old of Ramsey who was afflicted with infantile paralysis last August and has not been able to walk properly since. He was carried by his mother on to the dais wearing an iron support on his left leg. This was removed. Mr Edwards placed his hands around the boy's back and a few seconds later he was walking. For the remainder of the afternoon he was romping around the front of the hall as happy as any child could be c48 02 16

1948 Sir - "In reply to a gaily-coloured invitation to have my eight-month old daughter immunised from diphtheria, free of charge, I took her to the Auckland Road Clinic, Cambridge. I had experience of this clinic during the war as an ambulance driver. What I found horrified me. I found makeshift surroundings completely unsuited and of dubious cleanliness and that instead of the babies being isolated at this special time the room was occupied by 20 or 30 school children, some with scabs on their faces, some with colds, some hardly clean, all waiting for treatment. I waited for half an hour from the time of my appointment and as the doctor had not yet arrived I decided not to risk the babies health any longer in such an environment and went home. If we are to have any kind of National Health Service that will work this kind of thing will have to stop" - Margaret Phillips c48 05 12

1948 By June 18th 89% of the general practitioners in Cambridge and county had accepted service under the new Health Service Act. A preliminary list of the doctors was pinned up in all post offices yesterday. Formerly the number of insured people in this area was 75,000. From July 5th the number will have more than doubled - the population of the area being 160,000. In spite of all that has been written about the National Health Service many are fogged about what they should do. Everyone over 16 can choose his or her own doctor. People wishing to do so may still go to their usual doctor as a private patient c48 06 23

1950 polio victim dies in Iron Lung [1.14]

1950 Ambulance station corner Coldham's Lane till 1950 [446.15.3]

1950 A swifter and more efficient ambulance service is in action this week – thanks to radio control. This innovation, which has already proved its worth with the police and fire brigade, has had a successful trial with the county ambulance service. Radio control was fitted to their four ambulances and two utilicons by Pye Telecommunications and all vehicles are in constant call

from the control room, newly equipped with receiver, transmitter and microphone. A number of Cambridge commercial firms have now followed the lead of Camtax in installing radio telephones and Cambridge must be among the world's most advanced towns in the field of radio control c50 03 01

1950 The Cambridge Communist Party has presented a further 100 signatures – making 400 in all – to Cambridge Town Council protesting against the proposed increase in the price of Gwydir Street baths. Many people in Cambridge were without proper washing facilities and have to use the public baths. Judging by the addresses of the petitioners many have also to bear the expense of bus fares and the proposed increase of 50% would be a further burden - particularly for those with large families and old age pensioners c50 06 09

1951 flu epidemic - 900 cases in week [1.15]

1951 Four more cases of poliomyelitis have been reported in Cambridge, bringing the total to eight. Three of the new cases are schoolchildren, the other is an adult. They have all been reported in the earliest stages of the disease. The four earlier cases are rapidly getting better c51 11 16

1953 step against cancer - opening of new University Laboratories at Addenbrooke's, director Prof. Mitchell [1.19]

1953 mass chest X-Rays introduced [1.20]

1955 Gray club for physically handicapped & friends begun, ex-pupils of Open Air school [

1955 St John Ambulance Brigade has been given a new headquarters building in memory of the later Rev. Dr T. Fitzwilliam, President of Queens' college. It is one of the most marvellous things that has ever happened in the history of the organisation and when finally opened next year Fitzpatrick House will be something to be proud of. 55 11 22c & d

1955 Archibald Rayner, dentist, dies – 55 11 12a

1956 polio vaccine declared safe, wholesale vaccination programme planned [1.21]

1956 The Queue to join the 'Quiet Service' – ambulance article 56 09 08a & b & c

1957 Countess Mountbatten of Burma visited Cambridge to receive the gift of Fitzpatrick House in Barton Road and declare it open as the new county headquarters of the St John Ambulance Brigade. Then on Lammas Land she inspected more than 300 men, women, boys and girls who make up the Brigade and presented the Grand Prior's Badge to nursing cadet Averil Turville. 57 04 29a & b & c [1.23] [4.5]

1957 The Cambridge Christian Spiritualist Church held a service of spiritual healing at the Guildhall to commemorate their 25th jubilee. Mr Gordon Taylor lead the demonstration, treating a man with rheumatoid arthritis: when he walked onto the stage he was unable to comb his own hair, after Mr Taylor had manipulated his joints he could. He also improved hearing and restored sight. 57 09 20 & a

1957 A Selwyn College undergraduate has died in Addenbrooke's Hospital after being seriously ill with poliomyelitis. The Medical Officer said there are eight recently-notified cases in Cambridge; the others are all children ranging from infancy to 11 years. Two are members of the same family. All are in hospital. 57 11 21

1958 The Gray Club began in 1955 for ex-pupils of the Open Air School but now works with handicapped people organising a programme of outings and competitions. Long lines of cars, invalid carriages and the occasional ambulance can be seen outside the City Football Club ground where they meet. Lady Adrian, herself physically handicapped, is its President and the search for

new members goes on. There is a very real need for a permanent club building open every day where they could find companionship while their carers go shopping. 58 08 19b

1958 Dr Henry Roderick came to Cambridge as police surgeon and surgeon to the post office and was present at the last hanging at the old Cambridge Gaol. He came particularly interested in the treatment of crippled children in the 1920s though some parents refused to have their children treated by what were then new methods of surgery. He started the first orthopaedic out-patients sessions at Addenbrooke's Hospital together with country clinics where nurses visited people in their own homes. 58 09 01 & a

1959 The Cambridgeshire Branch of the British Red Cross Society celebrated its Golden Jubilee. The first detachment (women) was formed in Cambridge in 1910 and followed by Bourn, Swavesey, Shelford & Willingham. The first men's detachment was formed at Melbourn in 1913. With the coming of the First World War valuable work was done at hospitals in Cintra Terrace and Wordsworth Grove which laid the foundation for their well-established reputation for invaluable service 59 04 25c [2.10]

1959 Cambridge has a problem with smoky chimneys. Domestic smoke contains a high proportion of tar which sticks to everything it touches. The 'prefabs' at Church End, Cherry Hinton and Histon Road are a very bad example of the smoking low chimney. The 'cosy coal fire' is by no means as innocent outside the house as it looks to be inside the grate and the rights of the individual should not include the right to choke his neighbour. Smoke Control Orders should be sought, the Public Health Inspector reported. 59 11 26a, b & c

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 The mobile Mass Radiography Unit has taken 200,000 X-ray photographs in the region since it extended its service to the general public in 1949. Since then deaths from TB have fallen from 24,000 to 3,000 a year. But there has been a marked increase of tubercular infection amongst young people in Cambridge. The town plays host to a large number of people from abroad who come seeking building or factory work and one source could infect ten others. 60 08 11a

1960 Cambridge's public health inspector told how he entered one house to find the occupants had long ceased to use the lavatory. They threw all their rubbish screwed up in papers into one of the streets. Later a police woman, looking at photographs, noticed a baby wrapped up in newspapers lying in a corner of the room. Restaurants could be unhygienic and in one he found a waiter with leprosy. The standard of housing in Cambridge is low: there are streets and streets of houses which in northern cities would have been pulled down many years ago. A smoke control order should be imposed on the centre of the city as smoke from ordinary household fuels is the most pernicious of all. 60 10 17

1960 Solomon Greenburgh, public analyst describes role – 60 10 19

1960 The school dental service in Cambridgeshire is rapidly becoming a mere toothache service: in the rural area there is half a school dentist for 12,000 children. The amount of dental decay in children has doubled in the last ten years and is increasing. Half the youngsters will require artificial teeth in their late teens or early twenties but they will not get them as there will not be dentists to make them. Parents are meeting increasing difficulty in arranging treatment for their children with fully occupied N.H.S. practitioners and new residents find it practically impossible. 60 11 11a

1962 smallpox scare- Pembroke student from Bradford taken to Ipswich Isolation Hospital. His room fumigated, staircase vaccinated secretly, college closed & rest vaccinated next day.

University health centres over-run with applicants. Found to be only vaccination fever [2.12]

1962 Samaritans start up after 6 student suicides [2.13]

1962 smoke control area introduced, decide no more [13.1]

1962 A 19-year old Cambridge undergraduate now in an Ipswich isolation hospital as a smallpox suspect may not have the disease at all. Although living in Bradford he had not been in contact with smallpox victims there and may be suffering from vaccine poisoning. All those at Pembroke College who have been in contact with him are being traced but other students are not being vaccinated. 62 02 01

1962 A chapel for the deaf and dumb in Romsey Terrace was packed with people for its ordination. The service was taken and translated into deaf and dumb language by Mr E.G. Gollup, the Missioner. More than £900 is still needed to finish paying for the timber-built chapel which seats about 60 and has an expected life of 30 years. The Ely Diocesan Deaf and Dumb Association's work began a great many years ago and a hall – close to the chapel – had been used as a meeting place. But people found it easier to pray in a church or chapel and needed a space apart where they could worship. 62 03 19

1962 Mrs C. Clark has been secretary of the Cambridgeshire Society for the Blind for 15 years. She supervises two homes for the blind in Cambridge as well as the blind workers' shop in Regent Street. But there is more: she deals with the loan of wireless sets – there are over 250 at present, visits blind people in need of help and arranges parties or outings. There is a 'talking books' system and two blind undergraduates who had difficulty in finding textbooks were grateful to the people who read the information to them. Volunteers are needed to take people out for walks or help with teas at the weekend when the domestic staff are off-duty. 62 09 26

1963 St Raphael Club opened, set up 8 years ago to help physically handicapped [Misc.1.1]

1963 The firm of J.E. Hanger of Brooklands Avenue is concerned with the supply and repair of artificial limbs. For nearly 50 years they have dealt entirely with legs. Measurements are taken, appliances fitted and minor or emergency repairs are undertaken. The workshop has legs of all shapes, sizes and styles, with or without shoes and socks or stockings. Repainted wooden feet are hung up to dry and a grinder is used for smoothing rough metal surfaces. Shelves of screw-top jars contain nuts, bolts and screws 63 06 14a

1964 dust from Norman Cement works about average [13.2]

1964 Although the pharmacy of A. Sidney Campkin and Sons of Rose Crescent is modern, it retains unique links with a long history. It still offers for sale Brewster's balsham of squills, horehound and aniseed as well as ear canker lotion for dogs. In 1955 the business passed to Mr T.E.W. Howell and now has a labour force of more than 60. It has had a 'facelift' but is still one of the older-fashioned chemists of Cambridge. 64 03 20d

1964 Cambridge air is only a little less dirty than that of Newcastle-on-Tyne with a considerable health hazard from smoke. Now a programme of control orders will be introduced at a cost of £18,000 a year to make Cambridge a smoke-free city by 1985. But the greatest danger came from vehicle emissions, there was an inadequate supply of smokeless fuel and it would involve hardship for old people, councillors argued. 64 10 09

1964 Solomon Greenburgh, Cambridge Public Analyst undertakes post-mortems and food contamination – feature – 64 10 23c

1964 The Cambridge Society for the Blind runs two homes in Glisson Road providing comfortable surroundings for 20 people and operates a small shop in Regent Street selling handicrafts made by the blind. Those registered are allowed craft materials at cost price, receive a free radio licence or get a rebate on the cost of a television licence. They also have access to the Nuffield Talking Book Library. The newly-formed Cambridge Rehabilitation Centre for the Blind provides the opportunity for meetings and discussion at the Barnwell Community Centre 64 11 20 cdef

1964 Cyril Eastwood, Cambridge Medical Officer of Health, profile – 64 12 18b

- 1965 extra smoke control area agreed (1966 exempt college fire places which only used ceremonially [13.3]
- 1967 Cambridge Advisory Centre for Young People offers advice on birth control and relationships; most of clients from university – 67 07 20
- 1967 St Raphael Club opened in Hawthorn Way in 1963, have 150 handicapped people – feature – 67 11 21
- 1969 Guide Dogs for Blind branch formed [4.9]
- 1969 Gwydir Street public baths opened in 1927; part may be turned into sauna – 69 03 19c
- 1970 area VD rates increased 300% since 1959 [5.5]
- 1970 University Dental service set up [5.6]
- 1970 new smoke control orders agreed, (1971 Newnham area added, protest over log fires but get chop 1973) [13.4]
- 1970 National Health Service new buildings in Vinery Road – 70 02 27a
- 1972 1st health centre set up, Brookside. GPs surgeries, school clinics, private dentists, health visitors etc under one roof (?scrapped) [5.8]
- 1973 Ambulance HQ moved to New Addenbrooke's after 19 years at Ditton Walk [4.2]
- 1973 parking places reserved for disabled [6.4]
- 1973 Cherry Mann disabled, given council house, (appeal 1975) [6.5]
- 1973 A group of doctors who set up a hard drugs clinic in Cambridge during the 1960s believe they have now contained the spread of heroin addiction in the city. The first full report on almost seven years work by the Containment Unit for Drug Misuse has been produced by Dr Ross Mitchell, a Cambridge consultant psychiatrist. The unit was established to deal with hard drug addiction and he is not sure whether the same methods could be used to deal with the spread of "soft" drugs. "The misuse of drugs like cannabis and LSD have a large personal, political and ideological component. Our concern should be with young people at risk and we should attempt to set up facilities which will recognise this risk and try to provide continuing support", he said c73 08 20
- 1974 NHS reorganisation - administrative change only, to bring together hospital service, general practice & local community health services which used to function independently. Old admin bodies scrapped & new are : Dept of Health East Anglian Regional Health Authority, based Union Lane (succeeding EA Regional Hospital Board). Under them are 3 Area Health Authorities responsible for day-to-day running of each of their areas Cambridgeshire, Suffolk & Norfolk. Cambridgeshire based at Purbeck House, Hills Rd. They have below them district management teams of trained health service administrators & between them will replace the present individual hospital management committees & boards of governors. There will be two district management teams, one based at Cambridge, one Peterborough. Liaising with these bodies will be Family Practitioner Committees who are replacing the NHS Executive councils, dealing with matters affecting family doctors, dentists, opticians & pharmacists. To represent the public interest & protect consumer Community Health Councils set up to be consumer watchdogs [9]
- 1974 by end of year "NHS locally grinding to juddering halt under a snowdrift of paper & legislation which had neither cash nor manpower to cope with"; doctors, surgeons & specialists

well off, hospitals well equipped & all best of medical sciences gadgetry is on hand; what in great demand is nursing power ... people have been forgotten [11]

1974 first year review (1975) says it catastrophic & chaotic, service too big to be intelligently run from an administration in London which pumps out enormous quantities of paper to Area Health Authorities with less staff [12]

1974 “now NHS sinks in a paper sea” (9.75) [13]

1975 Cambridge Talking News for blind starts [4.11]

1975 Gwydir St baths losing £7,000 pa, boilers 2nd hand when installed 50 years ago [5.2]

1975 Cambridge’s £60,000 Hester Adrian Centre was described as an “outstanding achievement” by the Minister for the Disabled, Mr Alf Morris at its official opening. The Centre provides work facilities for both mentally and physically handicapped people. He paid tribute to the co-operation between Cambridge St Raphael Club, the Cambridgeshire Mental Welfare Association and the County Social Services Department. “It is a matter of deep concern to the Government that in the field of the handicapped, there is so much that still needs to be done to bring facilities up to the standard we accept as necessary”, he said c75 11 01

1977 St John Ambulance new HQ opened [4.5]

1977 doctors not move Brookfields Health Centre as will be too expensive to run [12.2]

1977 Cherry Mann’s fight for independence has ended because she has died. And only death could have been her conqueror. She died weighing less than five stones. For 36 years – she was 38 when she died – she was the victim of a rare disease which turned 80 per cent of her body to chalk. She was incurable, and knew it; she could only move the forearm and three fingers on one hand. Yet she wrote in laborious long hand stories for BBC’s Children’s’ Hour, poetry and gained her O & A levels. She fought for a home especially adapted to her needs and moved in when others like her had given up hope to wither away in geriatric hospitals. Her ambition was to help people. “I’ll fight”, she used to say, “to the day I die”. And that was just what she did. c77 07 09

1978 Simon Peacock case [1.9]

1978 Camtad - Cambridge campaign to tackle acquired deafness established [6.2]

1978 King’s Hedges junior and infants’ schools in Cambridge have closed because of a dysentery outbreak, three weeks after the first pupils went down with the disease. The number of children being kept at home has been rising daily – over 120 children and staff absent yesterday – and it is obvious they can no longer function normally. They may never know where the infection came from, with a changing number of children with the symptoms. If there is just one case in the school the very number of people using the building means it is likely to be passed on repeatedly c78 07 14

1979 Britain’s latest heart transplant patient, London builder Keith Castle, was sitting up in a chair at Papworth Hospital less than 48 hours after his major operation. Mr Terence English, the consultant surgeon who led the 12-strong heart transplant team said the 5½ [FIVE AND A HALF] hour operation went very smoothly and the new heart was functioning perfectly normally without assistance. Mr Castle received the heart of 21-year-old golf professional Duncan Prestt who died after a car crash in Ely. CEN 20.8.1979

1980 Cambridge Diet launched USA, devised Dr Alan Howard from Dept Medicine, Addenbrooke’s; (forms charitable trust, puts £100,000 pa into medical research 1984) [5.1]

1981 George Pateman Court, Tennis Road established by Cambridge Housing Society for disabled [6.6]

1982 The Cambridge Blind Shop in Regent Street is to close, ending a tradition that goes back 50 years. Its original purpose was to provide an outlet for the work of local blind people who relied on basket-making, chair-caning or knitting for an income. Today the same necessity does not really exist and the number of local craftsmen has dwindled, making the shop no longer viable. 82 07 28 [4.12]

1982 Secret wartime experiments involving the production of deadly anthrax serum were conducted at the Institute of Animal Pathology on Milton Road. Now doubts remain about the safety of a piece of land where the carcasses of 12 horses were buried. Details have emerged as the university has applied for planning permission for housing on land close to the Dunn Nutritional Laboratory. The risk of infection is minimal and they plan to cover the immediate area with a concrete slab. 82 01 05 & 05a

1984 Experts say Cambridge has as many as 350 drug addicts, a bigger proportion than in London and five times the official number. But it has fewer facilities and no proper advice centre for anyone to turn to. Last year there was a 44 per cent increase in arrests for dealing and 577 for drugs offences generally. In addition there is the massive and hidden drugs world serviced quite legally by family doctors who supply prescriptions for tranquilisers and sleeping pills to a quarter of a million patients, mainly housewives and pressurised businessmen 84 08 30

1985 Cambridge has a big drug abuse problems with as many as 800-1,000 young people thought to be dependent on hard drugs. Twenty years ago the 'News' went on the city streets and found drug abusers when the agencies claimed there was no problem. As a result of the publicity Cambridge police set up a drugs squad which lead to an Association for the Prevention of Drug Addiction. Now an advice centre, 'The Bridge Project' will be opened in Mill Road. 85 05 22

1986 Ambulance HQ moves to Fulbourn Hospital [4.7]

1986 Panic-stricken callers are jamming the switchboard of Addenbrooke's Hospital asking if they can be tested for signs of radioactivity after the Chernobyl nuclear reactor disaster. A monitoring service has been set up for people who have visited Eastern Europe and fear they may have been contaminated. But most of the calls are from Cambridge people who have not been abroad. Scientists assure them there is no cause for alarm and environmental health officials say it is unnecessary to test milk and water supplies in the city 86 05 08

1986 Dedicated GP Rex Salisbury Woods began general practice and surgery in Cambridge in 1919 and retired aged 91 in 1983. He was an old-style family doctor to whom the most important people were his patients. His consulting rooms were a delight to wait in with comfortable armchairs and a cabinet in which he displayed his many sporting trophies. He was British Weight Champion – the old name for putting the shot - and a member of the Olympic teams in 1924 and 1928. 86 10 03

1987 200 attend reception re transplants [NS3.17]

1987 A Government blunder over the ambulancemen's pay award last year landed Cambridgeshire ambulance service in trouble. They'd said the award would be funded by a rationalisation of budgets throughout the country and so would be funded at no extra cost. But this did not happen, resulting in a £1m bill. There was a 90 per cent cutback in the volunteer hospital car service where management alleged some drivers were making a fortune. The resulting row led to many drivers resigning. Now an investigate reveals it is more cost-effective than running ambulances 87 05 21

c.21.15 – refuse and road sweeping

Len Hutt, street sweeper, September 1966

158.24

1897 Will you allow me a small space to refer to the arrangements for sweeping and cleaning Fitzroy Street. After one gets one's place thoroughly cleaned and dusted, ready for business, we have three men commence sweeping the street and it is impossible sometimes to see across the road for dust. After this is done and the cart takes the rubbish away the water cart makes its appearance about two hours later. Considering that Fitzroy-street is one of the busiest streets of Cambridge I think these things could be altered to the benefit of the tradespeople of the street - letter from "Shopkeeper c1897 05 08

1901 Miss W—of Regent Street, Cambridge was summoned for causing an obstruction by leaving some refuse tins in the street. P.C. Cole said he saw the tins outside her premises at 10.11 pm and they were still there at one o'clock the next morning. She said she placed the rubbish outside overnight because the scavenger came so early in the morning – 6.35am - before she was up. The Chief Constable said something had to be done to stop the practice of putting pails of rubbish out overnight. The defendant was cautioned and dismissed c01 03 09

1902 Sir – may I call attention to an almost intolerable nuisance that maintains on Mill Road, Cambridge. The shopkeepers are in the habit of sweeping the refuse from their establishments into the streets (especially on Saturday night) with the result that dirty paper is blown about the streets and into the gardens of private houses. It is most objectionable and annoying to have one's gardens and yards filled with rubbish of this description. Is it not an offence against the bye-laws? – Resident CDN c 18.4.1902

1902 Sir - Cambridge Corporation has its roads cleaned between the hours of eight in the morning and five in the evening. As soon as the roads become busy a one-horse sweeping machine makes its appearance and begins to sweep the mud from the centre of the road to within three inches of the kerb, and there leaves it for 36 hours. By that time the public have removed it on their clothes, or it has been splashed on the front of adjoining houses, or else the Corporation employ a few boys to sweep it into nice heaps which they leave at some place that it is convenient for the public to step into. But should there by any chance be any left the Corporation kindly send two men and a cart to remove it – Grateful Ratepayer CDN c8.3.1902

1904 The Association of Managers of Sewage Disposal Works inspected the Cambridge pumping station destructors where all kinds of refuse turned out from households daily, sweepings and other undesirable matter is tipped into huge trucks and burnt, giving off heat used whose steam is used to pump sewage. During winter months some 40 tons of refuse is burned each day. The disinfecter was examined with interest; it was installed in 1902 and during the smallpox of 1904 was of great service in disinfecting a great number of articles using super-

heated steam. They then moved to the Corporation sewage farm, Milton Road, for a practical demonstration of sewerage analysis
CDN c 18.5.1904

1906 The Borough Surveyor bought a new watering van at a cost of £52. They had 11 vans but four were unfit to travel as the wheels would not go round. With the sudden arrival of hot weather there was not one fit for use. They should have been overhauled at the end of the season. But scavenging in two districts had been let out to contractors and the vans belonging to the council were in their hands. 06 04 19b

1909 It is highly desirable that the footways should be kept clean and it may come as news to many that there is a bye-law which requires occupiers of any premises fronting or adjoining any street to cleanse the adjoining footways and pavements at least once every day, when necessary, excepting Sunday. The Chief Constable has been informed so Cambridge householders had better look out in future. CWN 09 12 17

1910 description of road sweeper at work [1.21]

1910 water cart drivers turn off the supply when passing cyclists [1.22]

1911 byelaw proposed that refuse must be placed in galvanised receptacles, feel tenants might use them for wheelbarrows, coal scuttles or to give babies baths; cost high, byelaw with drawn [1.5.4.1]

1911 Every house should be furnished with a proper metal refuse container. At present all sorts of receptacles – pails, wooden boxes, tin pans etc – were stuck on the edge of pavements, without covers, so that the wind and dogs scattered their contents about the streets and children picked over the rubbish. In hot weather the refuse lay exposed to sun, fermenting, decaying and attracting swarms of flies. But who would provide for the damage done to receptacles: the dust carts were so high that dustmen had to throw them up to a man on top to catch as best he could. Wooden boxes would be cheaper and could be burnt in the destructor 11 06 16f

1913 “in De Freville men collect rubbish from the back of the house, in poorer areas people need to take it to the front” [1.23]

1913 PC Law said he was on duty in Hills Road when he noticed the pavements outside no.36 were in a filthy condition: there were pools of water and refuse lying about. He’s asked the occupant to clean them up, but the man had refused. The bye-law said occupiers should cleanse the footway adjoining their property once a day. But this had taken place at 9.10 am and that was too early; there was no evidence it was not clean at 10 o’clock. The case was dismissed. 14 02 14 p9 CIP

1917 Women Scavengers — The following is an extract from the minutes of the Paving (etc.) Committee which will come before the Cambridge Town Council, tomorrow. — The chairman reported that Mrs. Keynes, Chairman of the Advisory Committee for Women's War Employment, had suggested that some of the workmen employed by the Corporation might be released for National Service and the scavenging of the streets be carried out by women. The Borough Surveyor explained that he had placed no obstacle in the way of the men going, but he had not pressed any men to go. The Committee approved the action taken by the Borough Surveyor. 17 02 14 CIPof

1918 Council buy 2 electric & 2 motor vehicles to collect refuse due to difficulties in getting horses & drivers [1.6]

1918 Women are now employed by the Cambridge Corporation as street scavengers and are performing the duties very capably, too 18 04 03 CIPof

1918 Uniformed Women Scavengers. A notable feature of Cambridge streets is the women scavengers, who are now turned out in a smart uniform. They are doing their work in a very capable fashion, and keep the thoroughfares wonderfully spick and span 18 07 10 CIPof

1919 new Council dust cart damaged by fire [1.8]

1919 Corporation Motor Lorry for house refuse collecting and general haulage. The body was built on to a Ford chassis at the Corporation Works Department, Mill Road 18 11 13 CIPof

1923 A remarkable story of how a large sum of money was snatched from the jaws of death, as typified by the corporation refuse destructor reached me the other day. It appears that a certain tradesman on Peas Hill, Cambridge, had by some strange mischance consigned a wallet containing money to the dustbin. A frenzied telephone message to the contractor revealed that one of his dustcarts had collected at the address that day. The cart was searched, but without success. Eventually the missing wallet was discovered on the very threshold of destruction and found to contain Treasury notes to the value of between £200 and £300. Some people back Derby winners and others have luck in other directions c23 06 16 [1.20]

1925 The borough surveyor reported that the reconstruction of the cells at the refuse destructor had been completed and it was now taking all the town's refuse. Under the old system there were three "topmen" and six "shovellers" employed to feed the cells, now no shovellers were necessary and all men were doing similar work. He recommended they should be called "chargers" and should all receive the same amount of pay c25 04 20

1925 Sir – in the course of clearing the refuse from the household dustbins the employees now have instructions to sort out all empty fish, fruit and other tins from the refuse and leave them behind for the householder to dispose of how he may. This regulation may not be a hardship for those who have a spacious garden where they can dig a hole and bury their tins. But we, the ratepayers of Petersfield Ward, blessed with councillors who have suggested homes in the fields for our poultry, ask them in their wisdom to be good enough to provide us with a home for our empty tins – A.M. Morley c25 10 30

1927 A motor road sweeper and street cleaner was demonstrated in Jesus Lane, Cambridge. The makers claim it has a small capital outlay, low operating costs, small turning circle and ease of control. The brush can be lifted when not in use and sprays fitted to damp down dust in hot weather. The machine worked over 150 yards of road which had been specially covered with a layer of refuse. It showed a fine turn of speed - with the brush not in use it can do 20 mph - and the rubbish was quickly and neatly removed to the gutters. Compared with the horse sweeper now used it is much superior. c27 10 03

1927 Cambridge councillors spent a couple of hours observing the capabilities of another motor road sweeper, the "Karrier" Patent Road Sweeper, Sprinkler and Collector". It was first tried in Jesus Lane where a large quantity of newly fallen plane tree leaves were thickly scattered about the roadway and had drifted to a depth of four inches. A quantity of road sweepings had also been laid and pressed down firmly by passing traffic. Some of this and patches of horse droppings proved very difficult to remove and the large leaves presented a serious problem. A great quantity of the leaves was removed and lifted into the tipping truck at the back of the vehicle but some of the leaves spun round with the brush and were deposited on the roadway again behind it. c27 10 31

1929 Corporation purchase Shelroke & Drewry refuse vehicle [2.1]

1929 Whilst shaving the other morning I caught sight for the first time of one of the brand new motor dust waggons and called other members of the household to see it. "Freighters" is the correct word for them and they have the reputation for being dustless loaders and more hygienic generally. There are four openings each side with sliding covers so that everything is closed in & when the men are on the way back to the destructor with their load there is none of that unsightly mass of paper and rubbish above the loading line with which we have been familiar in years gone by. Altogether a great improvement. CDN c 25.3.1929

1929 Sir – The Cambridge Surveyor offers to supply 'Standard Bins' at 4s. 9d and limit the amount of refuse. These are certainly tidy but judging from the state of some of the bins one feels that potential disease forces lurk under the lids, especially on murky warm nights. The advantages of the old wooden box or tub is that when the bacteria and damp have done their work the said container perforce refuses refuse – I.M. Tired. Editor: I believe the sanitary dustbins are infinitely preferable to the old wooden boxes without lids that often decorate our pavements and provide a happy hunting ground for stray dogs. CDN c.13.1.1929

1929 Some authorities have been recovering useful matter from old tin cans and something could be done in Cambridge. Soft metal articles – tubes and tinfoil – are already collected by the authorities of Addenbrooke's and there are persons who collect bottles and jars. But tinned articles seem not to be regarded as anything but mere waste. A start on a small scale would need hardly any capital but how to dispose of it is the problem. CDN 5.10.1929

1937 Sir – Cambridge's dustbins are insanitary. Until late in the morning they decorate the edges of the pavements and their ugly and battered forms render the streets hideous. But worst of all, they stay there without lids, old tin baths, bent and dented zinc tubs, even cardboard boxes, all filled with garbage, scattering their dust and filth in the winds. In summer they stew in the hot sun. In winter they lie open to the bleak rain and drip their dust and ashes on the pavement. Babies have to run the risk of dust and infection in the streets while mothers at home strive to keep them protected from germs. Can nothing be done? – A maternity nurse 37 01 21c

1938 Millions of tons of refuse have been tipped into the disused blue gault pit belonging to Messrs Watts and Son in Newmarket Road during the past 35 years. The Corporation and innumerable householders have dumped their rubbish there until an area of nearly two and a half acres has been filled to a depth of fifty feet. Now the tipping has got to stop. There is a grave danger that, in the event of a heavy rainstorm, part of the area filled in will be carried over a slender barrier and encroach upon the adjoining pit being worked by the Cambridge Brick Company. The blue gault is used for making bricks for the majority of local houses and is the best wearing material because of its remarkable durability. 38 04 20a

1939 The Corporation want to construct a refuse-dump at Swann's brickyard, Newmarket Road. Their destructor could only incinerate two-thirds of the town's refuse and the remainder disposed of by controlled tipping. It was a deep disused clay pit and brick-making works and when filled a good part of the area could be added to Stourbridge Common. There were houses only on one side and it was quite remote. There would be a seven-foot high screen around the pit and the estimated life of the tip was ten years 39 11 02b

1940 Waste material collects in Cambridge being compressed at Newmarket Road dump & turned into handy bales – photo – 40 04 19a

1947 Sir, I am interested in the letter of H.O. Fleming on the collection of refuse. The only way to have the old dustbin removed is to see the dustmen personally and make a suitable arrangement with them. I have had to do this myself and have found them very civil and helpful. The dustmen are highly selective and seem to go through the bins carefully, taking out anything

they do not fancy and strewing it about. They also batter the bin out of shape very quickly and in may case leave it some distance away from where it is placed outside my premises. Now that we have provided cars for officials they might perhaps get around a little and see what is being done (letter from J.R.Partington, Maids Causeway, Cambridge) c47 04 08

1947 Sir - A dustman's wage is £3.16s.0d a week, irrespective of loads or journeys. I wonder if your readers would like to try this job for a while. They would then find out the discomforts which are a dustman's lot. He mustn't mind when lifting a bin if water and filth trickle down his neck through a hole; he mustn't mind if somebody puts some acid in a bin which when emptied sprays on one's clothes and burns holes in them (these are not replaced). One pair of overalls a year is the limit. Each motor is given a district and that has to be cleared, and if the dust and smell should make him feel ill he must just carry on. With all this we are expected to sort all the paper from the dirt. If all householders kept it separate it would be different. Critics should try on a windy day, emptying a bin that has been crammed full. It is impossible to to it without some dropping but if the loaders top to pick it up every time, the driver would be in the next street" - a Dustman c47 09 30

1948 Strong protests with regard to the filling of the tip opposite the Gasworks in Newmarket Road were voiced at Cambridge Town Council and it was recommended that a corrugated iron fence be erected along the whole of the frontage to Newmarket Road. Moving an amendment requiring owners to remove "the existing barrier of motor bodies", Councillor Gilbert said that residents had complained about the smell and inconvenience caused by the owners putting a number of dismantled motor bodies along the frontage. Coun. Cutting said there was filth, disease and "the most unsightly heap of rubbish you have ever seen in England" at this place and it was increasing day by day c48 06 16

1950 Mr Owen Duce of Scrapbanks works, Newmarket Road, Cambridge, told an inquiry that he used the pit for dumping waste from his scrap business & also accepted other materials such as brick rubble and old wire, but no domestic rubbish which might give rise to vermin or the risk of fire. He has recently erected a high steel fence along the road frontage. It has already resulted in the production of 4,000 tons of scrap for steel works besides valuable quantities of platinum for export c50 01 12

1952 After Monday wash day it's Tuesday bucket-and-shovel day for the women of the Cambridge's Queen Street, or Dustmen's Folly as it has been re-named by the residents. Tuesday is the day when the dustcart calls to empty the conglomeration of tin cans, ashes, kitchen waste and other refuse. Every Tuesday morning as regularly as clockwork 20 housewives place 20 dustbins on the pavements for the dustmen to empty. Promptly at mid-day the dust-cart hoves in sight and the contents are emptied into the cart with a liberal application for the road as well. And 20 housewives wait for the metallic clang that is the signal for them to go into action with brushes, buckets and shovels to clear up the mess the dustmen leave behind – for the street is in a worse state than it was before they called. And so seldom is a street cleaner to be seen that to the majority of the residents he is a legendary figure, though Mrs Fry who runs a little general stores does claim to have seen the Abominable Dustman CDN c 8.1.1952

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 Refuse collection comes in for a good deal of criticism. Visitors are shocked and ashamed by the exhibition of dustbins on the pavements and the trails of garbage left by the lorries on dustbin day. The old and infirm feel it is a strain and an imposition to lift or drag their bins to the kerb. But it is hard work for the dustmen and three-wheeled bases to fit the standard

bins may be supplied to help both. It is illegal to put garden refuse in a dustbin but this will be collected separately for a modest charge. Very little rubbish, other than offal, is burned. Paper is sold, other rubbish sorted and the bulk of solid waste tipped into worked-out brick fields. It is then covered with earth and the land will eventually be reclaimed for recreational purposes. 60 01 23

1960 For most people sweeping the roads would be a boring and wholly irksome task. But to Arthur Morgan, who has done it for 20 years, it is always interesting and occasionally exciting with ample scope for meeting people. Arthur, a sprightly man of 63 was once an army sniper but now sweeps the Market Square twice a day though he dislikes having to dodge the traffic. Cinema queues shed a quantity of litter which he carts away in his barrow without complaint. He has come across many items of value including rings, watches and on one occasion a car bonnet! 60 06 03a

1960 The news that part of the worked-out British Portland Cement clay pits at Cherry Hinton are to be used as a Corporation rubbish dump have aroused opposition. There had to be some better way of getting rid of refuse than putting it in a pit. It would take 25-30 years to get it filled and unless every cartload of rubbish was immediately covered with earth it would become rat-infested. But other pits had been reclaimed: Herbert Robinson's garage in Newmarket Road was built entirely on a filled-in pit. 60 04 29

1962 Radioactive waste materials with a short life, from University departments, can be buried under six feet of earth at the Cambridge rubbish dump off Newmarket Road. There were concerns that children might dig it up before the radioactivity had dropped or rats might become contaminated and spread it around. Dangers might also arise if a fire broke out on the dump or if some of the material got into sewers or drains. Councillors recommend the waste, wrapped in plastic, should be delivered by University vehicles and buried after strict safety checks have been observed by University officials. 62 01 19

1962 The last resting place of many Cambridge vehicles is Rich's yard off Coldham's Lane. To this graveyard of motor vehicles come hundreds of cars and lorries worn out with old age or cut off in the prime of life through accidents. If they are of a type still running on the highway they are stripped of anything that might be transferred to a similar vehicle. So the yard is a mass of broken bodies and skeleton parts, old shafts, old springs and old engines. The bodies are broken up further and sent away for export, mainly to Japan where they are crushed and melted down. 62 09 28

1962 Rag and metal merchant Ronald Arber of Newmarket Road says rags are still in great demand. He receives as much as six tons a week often brought in by children during the holidays and when the Midsummer Fair is being held, so that they can get a few more coppers to spend. They are baled up and sent to a London merchant where they are sorted into various categories and used for such things as cleaning materials and roofing felt. Considerable quantities are exported to Italy. Metals are similarly sorted. Lead is delivered to London mills to be made into lead piping, roofing materials and the lead bricks used at atomic power stations, such as Harwell. The demand for iron and steel has decreased in the past few years both at home and abroad. Most metal merchants are finding they can get more scrap iron and steel than they are able to sell. Bones, which used to provide an extremely good trade, no longer interest Mr Arber because the glues for which they were used are now made from other substances. Much of the material comes from the public. They bring their odds and ends in all the time: bed rails, gardening tools, bicycles, brass pots, radiators, car batteries, mangles, even refrigerators and fish-frying ranges along with aluminium saucepans and kettles. Jumble sale left-overs also provide a source of trade. An electric guillotine cuts as many of the items as possible into short lengths for easy transportation. After pressing, melting and recasting at other factories, it is surprising how many of these waste articles find their way back into the home. Looking at a rag and metal merchant's premises is like looking at a wilderness of destruction. But there is order in the wilderness and

every item has its place. The firm has been established for 40 years and he is confident it will remain for many years to come 62 10 05a

1962 Rubbish from the corporation tip in Coldham's Lane was spread over a wide area by the gales on Saturday; gardeners were littered with paper and other refuse. But residents claim this is nothing new: "We get smells in our houses, flies and rats frequently visit us and the floors are covered with dust each morning; and these nuisances all come from the rubbish pit", one claims. 62 12 17b

1964 Mill Road shift workers say dustbins left in darkened streets are a menace and danger. Residents drag their dustbins into the street ready for an early collection. But at midnight all the street lights go out and people bump into them in the blackness of dreadful dustbin alleys. Elderly people say refuse collectors could take bins from the rear of their homes. But this would mean dustmen going through their houses. 64 10 12a

1964 Cambridge council launched a pilot scheme to test the reactions of householders to putting their refuse in paper sacks instead of the traditional dustbins. There are various faults: it will not be possible to put hot ashes or wet refuse such as potato peelings in the bags. And there is the question of cost: it seems the paper bag scheme could prove more expensive. Meetings have taken place with various paper sack manufacturers to discuss the types of refuse bag now available. 64 11 12

1965 Plan to build shopping centre with parking for 1,000 cars at Duce's Pit may be blocked if council acquire adjacent site – inquiry – 65 01 20a; photo – 65 01 22a

1970 Richard Duce took over Coldham's Lane site in 1948 after a brickyard closed and since then recovered 23,000 tons of copper and aluminium from scrap metal' has sold most site to London property company for new trading estate; to demolish chimney and move to bottom of the site between railway line & Newmarket Road – 70 04 01

1971 Refuse disposal problems as cement works pits fill up, plans for pulverisation plant at Cheddar's Lane – 71 02 04

1972 Hundreds of seagulls are leaving their mark on Cherry Hinton. But the people who live there are not impressed and have asked Cambridge councillors to start a clean-up campaign in the area. The seagulls live on the refuse tip at Coldham's Lane where the pickings are good. But they do not confine their activities to the waste ground and have started to make themselves felt on the residents. And this has upset the housewives who have told the councillors that they prefer their white washing to stay that way. Some residents have referred these problems dropped on them unexpectedly from a the heights to the councils Conservative leader, Ald Stanley Bowles. Today he admitted "I just don't know what we can do about the problem. Perhaps we should issue the seagulls with nappies c72 04 10

1972 A rubbish-filled claypit off Coldham's Lane, Cambridge, bought by a firm of London property developers less than four years ago for little more than £100,000, has just been resold for £300,000 with out a single building being put on it. The former claypit was filled with rubbish in the late 1940s before being bought by Mr Richard Duce in 1948 for "a matter of a few pence". In the mid 1960s attempts were made to build a shopping centre on the site but these fell through. Then at the end of 1968 Summerfield Developments bought the seven- acre block with an option on the remaining seven. Plans were announced to build warehouses but these in turn fell through. Now the land has been bought by J. Coral Estates, another firm of London developers at around £40,000 an acre. Coral also intend building warehouses c72 09 17

1975 Cambridge city council will drop its controversial waste paper collection experiment next week after losing almost £1,800 of ratepayers' money on the project. Now they intend to encourage voluntary bodies to organise their own collections. More than eight tonnes of waste paper were collected during the first week but the average had now dropped to below five tonnes. In addition the price which they obtained had dropped from £18 to only £14 a tonne c75 03 16

1978 The Cambridge rubbish tip at Coldham's Lane, which has been frequently criticised on windy days for its smells and the large amount of paper blown from it, is to close. But the tip which is now full up will be replaced by a massive hole in the ground just a few hundred yards away at the worked-out quarry by the side of the Norman Cement Works, where the city's refuse will continue to be dumped. In time there will be a special section for household waste like old furniture and garden waste not normally collected by dustmen. It is expected the new tip will last about five years after which rubbish will be carted to a new tip at Milton. c78 12 02

1984 pilot scheme paper sacks rather than bins [3.9]

1985 Messrs Richard Larkinson Ltd has warehouses and sidings equipped with modern lifting equipment at Station Works, Hills Road to load non-ferrous metal direct on rail wagons. The family originated in Biggleswade dealing in rabbit skins then diversified into household rags using imported labour from the London area. Richard Larkinson started his business in Baldock in 1958, establishing a branch at Cottenham in 1972. Today they purchase and process all grades of scrap and export to Germany in their own company vehicles, returning with wine for their associated company, Fen Vinters Ltd. 85 05 10

1988

The dustmen leave the depot at 6.10 am and begin collecting bins, cracking jokes and shouting good-natured abuse at each other. Each man is almost trotting between houses, often lifting bins on to a shoulder with one hand while grabbing bulging plastic sacks with the other. David, a veteran of 15 years, drives the dustcart a few yards at a time; too far and they would carry the bins further than necessary, too little and they waste precious minutes waiting for him. They have incentives to get the work done quickly – they knock off as soon as they are finished 88 11 04b & c

1989 “wheelie bin” system to be extended whole city, from Sept. £CEN 12.1.89 25.4.89

c.21.2 – funerals, cemeteries etc

Funeral in Mill Road for ferry victims, 1905

170.63

1898 Mr Dixon said that Mill Road cemetery was always locked up on Sundays, because, if not, swarms of little children rampaged about over the graves; and while he was conducting a funeral it was very annoying to have some little urchins come up and say, "Oh, my! Ain't that a little coffin!". The children jumped about over the graves, while labourers going to work made the cemetery a thoroughfare. The matter was giving the committee a great deal of trouble. 1898 04 13

1898 Sir - for many years I have constantly visited the Mill road cemetery, Cambridge, and feel quite certain that if the present cemetery were made into a general and open place of burial it would last for many years. When the time arrives to provide a new cemetery, why not use that which is situated on the Huntingdon Road, which has a field adjoining sufficient to make a very large cemetery. I know that the Castle End hill is an obstacle, but an extra horse could be used to assist in drawing the hearse over this spot. This would be far preferable to going through Barnwell – R.R CDN 1898 10 19

1899 The custodian of the Mill Road cemetery, Cambridge, Thomas Stanbridge, said he saw the defendants approaching with a handcart containing a headstone. There was a funeral taking place against the entrance gate so endeavoured to prevent them from entering the cemetery. In so doing he was pushed right under one of the coaches attending the funeral and got his leg fixed between the wheel and a headstone. He called out and the people at the funeral were disturbed by his remarks. Then the defendant stuck him under the chin, and threatened to pull his beard out 1899 06 02

1899

While making excavations at the junction of City Road and Fitzroy Street some workmen in the employ of the Cambridge Electric Lighting Company came upon some gruesome remains. They dug up some coffins. It is supposed the site is that of the old burial ground of Eden Street chapel. The remains were removed to Mill Road cemetery, where they were interred. For some reason efforts are being made to prevent the real facts becoming known. The employees of the Electric Light jealously guard what they deem an important secret, and refuse to give any details - 1899 12 23

1900 An Inspector of the Local Government Board held an inquiry at Cambridge Guildhall with reference to the application of the Town Council to borrow £15,500 for the provision of a new cemetery at a spot near Fen Ditton. Dr Cooper said there was a good deal of talk and it was of the utmost importance to the inhabitants that the formation of the new cemetery would not in the slightest degree be of risk to the purity of the water supply of the town CDN 1900 11 28

1901 Yarmouth Guardians received a report on the dissection of paupers' bodies. They had been sent to Cambridge by officials of the workhouse since 1881. Professor Macalister sent a cheque for £6 14s 6d for each body but only £5 10s 0d was really incurred for expenses. The railway charge for the carriage of a body was £4 6s.0d but the Master's clerk said it was £4 9s.0d and that he put the other 3s. in the poor box. £1 was paid for a coffin but he received 1s. from the undertaker. All the clerk had to do was to see the body was screwed down, go to the railway station and pay the charge. He said he gave the porters sixpence each but inquiry proved they only received a pint of beer. CDN 1901 06 13

1901 Cambridge Guardians heard that a coffin had been supplied by the undertaker minus the plate and the funeral had had to be postponed. The people concerned had a desire to avoid, as far as possible, what might be termed a pauper funeral and were willing to pay half the expense. The coffin should be provided by the parochial authorities but the relative wanted it made by someone other than the man who did the work on behalf of the Union because, with some of that pride which they had seen so frequently exemplified by paupers, they wanted to escape the eyes of Mrs Grundy. That had probably led to a little friction with the undertaker CDN 1901 10 09

1901 The funeral of Mr C.F.G. Stanhope, who was better known by the stage name of Mr Charles Gervase, under which he played the part of Harry Bronson in Mr W. Greet's "Belle of New York" Company, took place at Mill Road Cemetery. The deceased actor contracted typhoid fever whilst at Cambridge and died at Addenbrooke's Hospital. The interment took place in the presence of a large number of persons who showed deep sympathy with the mourners 01 11 25

1902 The funeral of P.C. Thompson of the Cambridge police was conducted on military lines. His comrades, accompanied by members of the Borough Fire Brigade, marched to Sturton Street. As the coffin was brought out of the house the police band played the death march in "Saul" and Drum Major Inspector Johnson, his staff draped with crepe, led the hearse & mourning coaches in procession to Mill Road cemetery. The route was lined by people and many were the manifestations of sympathy with the mourners. The funeral arrangements were carried out by Mr Ellis Merry 02 05 10

1903 Newmarket road cemetery opens, 1st interment June, is seen as major horticultural feature [1.6]

1903 The new municipal cemetery, which Cambridge Corporation has prepared on Newmarket Road, was opened for interments. In anticipation of the time when the general public will regard burial more from a sanitary than from a sentimental point of view, a part of the ground adjoining Ditton Lane has been reserved for the erection of a crematorium. The first interment was a child

named Alfred Willet Whitmore; the coffin was borne by six young ladies and Mr Ellis Merry was the undertaker. 03 06 03

1903 Sir - An exciting scene occurred at 11.30 pm when the small-pox hearse was just reaching its destination and turning round previous to receiving the body of a young man who had died that morning. The night was very dark and the hearse overturned on its side, the smashing of glass and the bumping of the vehicle on the road causing a great commotion. After some delay it was righted again, the body duly deposited inside and it rumbled and groaned off to the cemetery, grating on the road with its iron-shod wheels in the dead of the night in a most unpleasant manner. Any private firm would have an India-rubber tyred vehicle for such work but Cambridge Corporation have apparently yet to discover that such 'luxuries' exist - 'Mill Road' 03 07 28

1903 A growing demand for the stone, marble and granite objects with which the memory of the dead are perpetuated indicates an expansion of business for those who provide these melancholy tokens. Messrs Ivett and Reed have found their premises on Mill Road and Regent Street inadequate and have opened a new branch on Newmarket Road, appropriately near the new cemetery. The premises consist of a dwelling house and show-room and are built of Bath stone with a portico supported by two graceful Corinthian pillars. Inside is a chimney-piece of statuary marble upon which delicate-looking foliage is represented in the Italian style. 03 11 21

1903 Cambridge Cheap Funeral Furnishing. Polished Elm Coffin, Glass Hearse, 2 Carriages, Bearers, and Attendance complete £5 5s. - C. Osler, Mawson Road. Glass Hearse and Pair, with rubber tyres, 7s.6d. Brougham with single horse, 5s. No extra charge for Black Plumes or Velvets if required. Coffins finished and delivered in two hours if required. Guaranteed five per cent cheaper than anyone else - Ellis Merry, Abbey Walk [Adverts] 03 12 19

1904 Cambridge cemetery committee considered whether to close the whole of the Mill Road burial ground. They had asked the various incumbents as to the number of grave spaces allotted to their parishes and whether it was possible to identify the graves of all persons buried there. It appeared to be dependent on the knowledge of the sexton and there was no way of identifying the position of each grave. There should be a public enquiry. But there were many timid widows who had husbands buried there and would like to be buried there too who would not go to an enquiry. Alderman Kett agreed: he would like his bones to be laid there and had six or seven unoccupied spaces for members of his family. What would an inspector care about such sentiments. He would be overruled by those fanatics of sanitary improvement. 04 05 19

1904 The placid life of Linton has been stirred by a rumour that the dead body of a pauper had been sold by the Master of the Workhouse to the Cambridge School of Anatomy. This was a perfectly lawful proceeding under the Anatomy Act which provides that the bodies of unclaimed paupers may be used for scientific study. The matter had been debated by the Board of Guardians who voted five for and five against but the Chairman declined to give the casting vote. The Master had taken it upon himself to send the body to Cambridge. But it was not 'sold'. 1904 05 18

1904 Cambridge cemetery committee considered whether to close the whole of the Mill Road burial ground. They had asked the various incumbents as to the number of grave spaces allotted to their parishes and whether it was possible to identify the graves of all persons buried there. It appeared to be dependent on the knowledge of the sexton and there was no way of identifying the position of each grave. There should be a public enquiry. But there were many timid widows who had husbands buried there and would like to be buried there too who would not go to an enquiry. Alderman Kett agreed: he would like his bones to be laid there and had six or seven unoccupied spaces for members of his family. What would an inspector care about such sentiments. He would be overruled by those fanatics of sanitary improvement. 1904 05 19

1904 An inquiry into the proposed closure of Mill Road cemetery, Cambridge heard objections from several parishes. The All Saints portion would not be absolutely full for another 23 years and was as sanitary as any other. There were 142 spaces available for Holy Sepulchre and 120 for

St Paul's parish which was strongly opposed to closure. The Rev E.C. Pearce of St Bene't's said there were 60 vaults and brick graves likely to be used again; he had never seen remains exposed when a new grave had been made. At St Edward's there had been 47 interments in the last 10 years, 23 of which were not parishioners and had no right to burial in the ground & there was space for another 120 graves. But St Michael's parish only had space for 50 - 1904 07 05
1904 The Local Government Board have decided to close those parts of Mill Road cemetery which are assigned to the parishes of St Andrew the Less, St Mary the Less and St Botolph but say there is no need for the protection of public health for other areas to be closed. The three portions will be sealed while in the rest of the burial ground interments will continue as usual. This is in accordance with the deep feelings expressed at the inquiry where representatives of the other parishes had protested strongly against their grounds being closed, with the single exception of the Rev Wood who was acting in direct opposition to the wishes of his parishioners. His 'aesthetic' vapourings were appreciated by the Inspector for their true worth. 04 08 25

1905 A Cambridge lady has patented a coffin to minimise the possibility of premature burial. It contains an electric bell, the button of which is fixed near the hand of the occupant with the bell on the top of the grave. There is also a glass plate in the lid together with a hammer to allow the person to break out, though it is hardly conceivable that anyone would have sufficient strength to scramble to the surface 05 05 16a

1905 The new Cambridge cemetery on Newmarket Road is nothing less than a small farm with oats, wheat and barley covering over 20 acres. As yet very few interments have taken place and years must elapse before graves encroach upon a great expanse of the site which would otherwise be lying unproductive. The crops have a very promising appearance and will produce a profit for ratepayers 05 07 18a & b

1908 Cambridge Guardians discussed the case of an old soldier who had served in the Crimea and the Indian Mutiny for whom they paid 2s 6d a week for a nurse. The old man had saved £20 out of his pension to pay for his funeral expenses, so that he should not be buried in a pauper's grave. But this had been seized by the relieving officer. They did not want the old man to have the money back so that his children should have the pleasure of spending it for their own comfort and then send him to the Union 08 02 22a

1908 Newmarket Road cemetery was too expensive, ratepayers claimed. The land had cost four times what adjacent ground had fetched, the walls were crumbling and the cottage built of the poorest bricks so the papers hung in strips inside. There were four greenhouses and a kind of chapel where part of the service was held – all of which had to be heated. A number of beds had been planted with bulbs and expensive flowers whereas herbaceous plants would do quite well. A number of people visited on a Sunday bringing children who played in the open space, but it should not be a recreation ground. 08 04 16

1909 On Friday night a man died in an East Road Lodging House and the landlady was naturally anxious to relieve her house of the body at the earliest moment. She had no knowledge of the man's relatives and a 'parish burial' was ordered. The undertaker said she had wanted to put the body in the yard covered up with clothes but he had removed it at his own expense. But relatives complained that the coffin was too small and the body laid on bare wood with the feet sticking to the pitch. All there was to cover him was a piece of thin stuff which did not meet in the middle CWN 09 01 15

1909 The gallant band of old soldiers who fought in the Crimea and the Indian Mutiny gets smaller every year. Cambridge man James Gray died in the workhouse, where the poor are so well looked after and was buried at Mill Road cemetery. There was no time to arrange for a military funeral but Captain Heal sent a large Union Jack to be placed on the coffin. Four

members of the Territorial Force volunteered to act as pall bearers but assembled at Newmarket Road cemetery. On realising their mistake they drove to Mill Road which they reached just after the sorrowful ceremony had concluded and the mourners had left 09 02 19

1909 Two spinsters, aged 50 and 30, appeared in court charged with stealing carnations value sixpence from a grave in Mill Road cemetery. The custodian said he saw them take the flowers from the side of the grave of Trooper Truscott; he took the ladies to his house, locked the door and sent for a policeman. They were respectable Sunday school teachers who had known the deceased well and picked up flowers that had dropped from a wreath to take home and press in remembrance of him. The custodian was legally correct but for him to lock them up, send for a policeman and cart them through the streets to the police station was very regrettable 09 05 14

1909 Frederic William Hodgson carried on the business as plumber and decorator for nearly 30 years. He was a life-long abstainer and the oldest Deputy Grand Worthy Patriarch of the Cambridge Sons of Temperance, having cycled some thousands of miles whilst engaged in propaganda work. The sad cortege proceeded from his house in Peas Hill to Mill Road cemetery where the first part of the funeral service was conducted in the chapel. The coffin was borne by fellow members of friendly societies. 09 11 19

1912 Cambridge Medical Schools recently applied to Chelmsford Guardians for unclaimed bodies of paupers for dissecting purposes. These are indispensable for the education of a surgeon. Prof Courtney Kenny refutes the belief that a person has no legal right to bequeath his own body for anatomical examinations. If he directs that after death his body shall be examined anatomically then the person having lawful possession of the corpse shall direct such an examination to be made. However the deceased relatives can require the body to be interred without such examination 12 10 18i

1914 Two military funerals took place from the First Eastern General Hospital at Trinity College. One body was sent in a coffin wrapped in a Union Jack to the station and put on a train to Durham. The railway expenses were generously defrayed by Nurse Keep. The funeral of other, Arthur Larkin of the Royal Scots, was held at Newmarket Road cemetery. He'd been wounded at Mons and the cause of death was tetanus. Bugler Royston sounded the 'Last Post' 14 10 16

1915 Newmarket Road cemetery worked at a loss – 11 acres under cultivation by permanent staff; other cemeteries were few but graves were being used by other members of family 15 11 26
p5

1916 John Robert Peck funeral at Mill Road Cemetery. He was sexton at St. Andrew's the Less for about 29 years. It was impossible to visit the cemetery without seeing Mr. Peck, and having been there for so many years he knew the situation of every grave. Six of the sextons from other churches offered to act as bearers 16 03 22 CIPof

1916 Mill Road Cemetery lamentable condition of a considerable part of the Mill Road Cemetery. under the jurisdiction of the parish of Christ Church. The whole area is a howling wilderness with grass reaching to a tall man's waist. We appreciate the labour and other difficulties which have to be encountered at this time and we are prepared to make reasonable allowances, but the present state of things in the Christ Church portion of Mill Road Cemetery is past all excuse 16 08 23 CIPof

1918 Crosses erected over graves of those died in service buried at Newmarket Road cemetery – photo – 17 06 13a

1922 Impressive scenes were witnessed at the funeral of an Indian undergraduate. The funeral was carried out according to the Mohammedan ritual, and the interment was at St Giles' cemetery, Huntingdon Road, Cambridge. The coffin was conveyed in a a hearse and was followed on foot

by over 50 Indian undergraduates. Arrived at the cemetery the coffin was placed on the lawn at the entrance. Then several of the mourners, removing their shoes, conducted a short form of service, after which the coffin and mourners were photographed by an Indian student. The body was carried to the graveside and lowered by a party of the mourners. Nobody who was not directly concerned with the ceremony was allowed within 25 yards of the grave c22 04 15 1922 The condition of Mill-road Cemetery for long past has not been creditable to a town like Cambridge. The Borough Cemetery is a delightful flower garden compared to the Mill-road Cemetery which is an amalgamation of the parish churchyards. Some parts of the cemetery are well tended, others are dreary wastes whose evidence of neglect have now been removed by the unemployed at the expense of the ratepayers. The question is whether these reclaimed spaces are again to be permitted to run wild. No church which lets its graveyards get into the deplorable state of the Mill-road Cemetery can be truly described as a live church 22 09 16 [1.7]

1925 Sir – if all the grumblers would combine to get the custodian of the Histon Road cemetery, Cambridge, a better wage they would do some real good. Each man begins cheerfully and willingly, but how can he be expected to keep a good heart and pay for auxiliary labour out of a 25s. wage. Every man who had taken the job has gone out owning himself beaten by a starvation wage. I heard one say he had to buy his own grass-cutting machine and bedding-out plants. Even with a house thrown in the job appears to be more a ‘man-trap’ than cemetery. – ‘Anti-Fat’ 25 11 04

1926 The Imperial War Graves Commission has undertaken on behalf of the Belgian Government to erect headstones over the graves of deceased members of the Belgian Forces in various cemeteries, including Cambridge. They will be made in Belgium and forwarded to this country for erection. There are two graves of Belgian soldiers in the Cambridge Borough Cemetery, two bodies being interred in each grave, and permission was given for the erection of the headstones 26 10 26

1935 Cambridge General Cemetery Company asked that the Corporation take over control of the Histon Road Burial Ground which was established nearly 100 years ago by a private company. There are still a number of private grave spaces available for burials and it would be in the public interest. This was agreed 35 05 14

1936 Arrangements have been made with the Cambridge General Cemetery Company for the Histon Road Cemetery to be transferred to the Borough Council as from February. The cottage, chapel and old mortuary required considerable repairs, the paths regravelled and the grounds cleared up. The cottage should be made habitable for a man to live there and have general charge of the ground, a report recommended. 36 01 29a

1936 Crematorium proposed design – 36 10 13a

1936 Councillors had considered the erection of a municipal crematorium before 1900 and earmarked a piece of land at the cemetery on Newmarket Road. Now a private company had come forward and it was time to act. It would cost £12,000, including land, a chapel, furnace and accessories together with a garden of rest. Running costs were extraordinarily low. Quite half the senior members of the University who died were cremated and it would soon pay for itself. 36 10 16

1936 Trumpington petition for faculty to have plain marble kerb to enclose grave – 36 11 14

1936 Private crematorium at Barton turned down – protest – 36 12 10h

1937 When the Salvation Army first came to Cambridge Ellis Merry gave them what was then his wash-house in which to hold their meetings. He was one of the early sergeant-majors and associated himself with their work in the villages, using a concertina and violin to good effect. He

was the first to run a penny bus, from Mill Road into town and also did the horse mail work. Until his retirement Mr Merry carried on the business of undertaker. 37 03 24c

1937 Cambridge & Counties Crematorium Ltd was incorporated on 8th June 1936 to establish a crematorium on an attractive site on the main Huntingdon Road with a chapel, incinerating chambers, columbaria for the reception of urns and waiting rooms. The Borough Council have decided not to proceed with a Municipal Crematorium so this will be the only one within 50-60 miles and has every prospect of success. The Company's revenue will consist not only of fees for cremations but also for the storage of urns and for niches. Shares are now available – advertisement 37 10 29a & b

1938 The Bishop told the clergy he had money to make Mill Road cemetery chapel more dignified and beautiful. He would ask an architect to prepare plans. The chapel was used from time to time and more funerals might be held there. But it was felt that as so few burials took place, it was not worth the expenditure. It was extremely damp, there was no heating, it was difficult to ring the bell and it was such an ugly building it could never be made beautiful. But it was too drastic to close it altogether 38 06 16a & b

1938 The Bishop of Ely spoke in favour of cremation at the opening of the Cambridge Crematorium: it overcame the difficulty of overcrowded cemeteries and the danger of water pollution which might arise from earth burial – 38 12 16a, b Advert 38 12 17c [1.4]

1939 Mill Road cemetery chapel to be decorated by Reginald Hallwood – 39 03 25

1939 Mill Road cemetery chapel has been redecorated and a dedicatory service was conducted by the Bishop of Ely who said he was very keen about cemetery chapels, some of which were in a very sorry condition. Before this chapel was redecorated it was much better than some others. It is exceptional for a cemetery chapel to be inspiring and uplifting; they should be beautiful and eloquent of the Christian faith. He thanked the decorators for their work and a collection was taken in aid of the fund for the readornment of the chapel. 39 04 01a

1944 Madingley cemetery dedication, famous service chiefs present – 44 05 25a, 44 05 30a, 44 05 31a

1944 U.S. Military cemetery dedicated. — Memorial Day — the day when Americans pay special honour to their dead— was marked in Cambridgeshire on Tuesday, with a service at the U.S. Military Cemetery (at Madingley). High ranking officers of the American and British Armies, as well as the R.A.F. were present together with leading civic representatives of the Eastern Region and the Town, University and County of Cambridge. A detachment of the British Legion, with their colours, members of the St. John Ambulance Brigade and the British Red Cross Society, and members of the W.V.S., who have undertaken to provide flowers for the chapel, were also among the large gathering. Centrepiece of the service was a small grass mound, rising from which flew the Stars and Stripes. The Bishop of Ely (Edward Wynn) walked to the mound from the little chapel, followed by the senior officers carrying wreaths. The ceremony opened with an invocation, followed by a scripture reading and a prayer for the fallen. An Order of the Day was read from the Allied commander-in-chief (Gen Eisenhower). During the service either by accident or design three Fortresses flew low over the company. Official and private wreaths were laid and the proceedings came to a close with the National Anthems of America and Britain, the Benediction by the Bishop of Ely and finally "Taps" by two buglers. 44 06 02 CIPof

1948 Several hundred people gathered round the flagstaff at the Cambridge American Military Cemetery for a simple service of benediction. The reason for the service was emphasised by the long rows of empty, tarpaulin -covered caskets bear the scene of the service - the caskets in which will be returned to the United States the remains of those American service men and women buried at the cemetery whose relatives wish their last resting-place to be at home. For this reason

the cemetery is to be closed for a period, and for the purpose too of reburial of the bodies of those interred in the now-to-be -closed Brookwood and Lisnabrenny (Northern Ireland) American Military Cemeteries whose relatives wish them to rest in England c48 03 04
1948 Council debate take over of crematorium [1.1]

1949 Cambridge borough council have applied to borrow £25,000 for the purchase of the crematorium in Huntingdon Road. In 1936 the council took active steps towards building a crematorium on their own site, but, in the meanwhile the Cambridge and County Crematorium Company had been formed and they were talking steps to build their own crematorium. The demand for cremations had increased and there was every indication it would continue to do so. The figures for the Cambridge crematorium had increased for 228 in 1941 to 421 in 1948 49 07 06

1951 Members of the armed forces, the church and hundreds of relatives, totalling more than 1,000, gathered at the Cambridge city cemetery to do honour to the men and women buried in the special Air Forces plot. A Stone of Remembrance was unveiled by Marshall of the R.A.F., Lord Tedder and blessed by the Bishop of Ely. Training aircraft flew over the cemetery in formation 51 08 01

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Weyman Funeral Service whole-page advertisement – 60 12 19

1961 American Military Cemetery superintendent – 61 03 24a

1962 Mill Road cemetery gravestones – 62 10 18

1981 A basic funeral is likely to cost £300 – that is 10 times the death grant. It includes £58 for a cremation and service, not including an organist or any memorials. Burial can work out cheaper, because if a family buy a grave it can be used for two or three people. At Cambridge the charge for land is going up 50% to £75 and there is a charge of £40 for opening the grave and burial. Things are cheaper in the villages where local people have a right to be buried in the parish churchyard without buying the land, if there's space. 81 03 12

1986 Crematorium history – 86 11 06

c.21.3 : nursing

Red Cross nurses being presented with cups

1908 The Cambridge District Nurses moved into their new home standing in its own grounds on Newmarket Road. Designed by W.M.Fawcett and built by Coulson and Lofts, it has a smart exterior appearance. Facing the road is the entrance to the surgery with the dining room, and kitchen with sitting rooms for the Superintendent and nurses on the first floor together with four bedrooms and another three on the second floor. The building is lighted by incandescent gas and fitted with electric bells CWN 08 11 06 p5

1920 Kate Martin of Kingston Street awarded OBE for her work as nurse in explosives factory; was at Woolwich Arsenal and reduced number of girls suffering from TNT poisoning - CDN 20 10 02

1930 The New Cherryhinton Nursing Association was wound up; the nurse's time has been by no means fully occupied and much has been of an unskilled nature. Now Nurse Hodges has left. 2,204 visits had been made during the year but many people prefer to employ a private nurse

rather than the district nurse, although she is fully qualified for every branch of the work. The district was growing but new people seemed disinclined to join the Association. 30 06 19d

1948 Under the new National Health Service the Nursing Association service is to be taken over by the County Council. In reviewing their history it was reported that Mrs Marcus Dimsdale and Mrs Mellish Clark were put on the newly set up County Insurance Committee in 1911 one of the tasks was to provide nursing for patients suffering from tuberculosis who, owing to the acute shortage of sanatorium beds, had to be treated in their own homes. It was discovered that less than half the villages in the county had the services of a district nurse. A public meeting was held in 1913 and it was agreed to form a County Nursing Association c48 07 06

1987 Low salaries are driving thousands of nurses out of the National Health Service. A 28-year-old staff nurse at Addenbrooke's Hospital earns just over £8,000 a year (worth about £18,400 today) for her highly skilled, highly rewarding and highly frustrating job in neuro-surgical ward, A3. Major brain surgery has become a routine operation. Twenty beds are housed in a room off one long corridor with four others in 'The Annexe' intensive care unit. 87 10 01c

headlines

1888 death of Alice Fisher, former matron, who left for America 6 years ago

1889 by now a large & important medical school with lectures given by people not members of hospital staff 1895

1889 new outpatients & nurses buildings

1898 finance unsatisfactory, management changes opposed [1.5]

1899 The amount of good which results from the presence in our midst of Addenbrooke's hospital is incalculable. In one important particular, however the work is limited and confined:

the want of a suitable home for convalescent patients. The Hunstanton home is much appreciated but receives no surgical cases which require the smallest dressing, which limits its usefulness to patients, many of whom linger on in hospital for several weeks, when probably a very short time at the sea side would restore them to complete health. Now some friends have guaranteed to start a convalescent home exclusively in connection with Addenbrooke's, and another donor has promised to give a house at Hunstanton in furtherance of the scheme c1899 02 04

1900 Regius Professor of Physic & Professor of Surgery elected as additional members of medical staff

1901 in debt, plan a new wing as memorial to Queen Victoria [1.6]

1901 Great Yarmouth board of Guardians revived the question of paupers bodies being sent to Cambridge Anatomical School for dissection. Every friendless person who died in the workhouse should be asked before death if he had any objection to his body being sent away for dissection. Mr Saul thought that was a gruesome and unseemly idea. Dissection was perfectly legal and right; if they declined to allow unclaimed bodies to be used surgeons would be compelled to make experiments on living people or resort to paying for bodies stolen from newly-made graves. The practice will continue c01 07 18

1901 The Infectious Diseases Hospital, long known as the Sanatorium, in Mill Road, Cambridge is at the centre of the system under which all cases of scarlet fever, diphtheria, typhoid fever and small-pox are notified and wherever isolation at home is difficult the patient is removed for treatment to the hospital. Although Romsey Town has encroached extensively upon what not very long ago were open fields, the Sanatorium is still upon the verge of the country. From the grounds the view of a fine expanse of rural scenery is commanded; the air is fresh and invigorating. There is a large field behind and in this the new diphtheria block has been erected CDN 1901 09 24

1902 A fire broke out in the women's ward at the top of the left wing of Addenbrooke's Hospital. In a very short time the flames secured a firm hold and the unfortunate patients had to be removed. Flames burst through the roof and worked towards the centre of the building. Nurses and probationers heroically entered the wards and brought their patients to a place of safety. Many scenes, tragically distressing, were witnessed. To such proportions did the fire assume that it was deemed advisable to remove other patients and several afflicted old men were brought to the lawn. The news of the outbreak spread quickly throughout Cambridge and some thousands of people gathered in front of the Hospital. The scene on the open plot of greensward in front of Addenbrooke's Hospital presented a curiously medley of hastily-improvised arrangements for caring for patients evacuated from the blazing building. Bed after bed, each with its living freight, was carefully lifted with stalwart arms and borne steadily to the quarters assigned to it in neighbouring houses. In the meantime the dull clouds of smoke rolling skywards from the Hospital gradually grew less in volume. The ceaseless exertions of the firemen were telling their tale and soon water pouring in a cascade down the staircase adjoining the blazing wing made it clear that the building was flooded to the extent that rendered the further spread of the fire improbable. The police report on the Addenbrooke's Hospital fire says they found a man at the top of a ladder with his head through the trap door leading to the roof of Victoria Ward, using a small hosepipe. Shortly afterwards the firemen arrived and after much trouble, mainly through the low pressure of water, got to work, but could not extinguish the flames before the roof and contents of Victoria Ward were destroyed. Police assisted to maintain order, regulate the traffic in Trumpington Street where there was a large crowd, and remove and restore patients, many of whom were in a fainting condition. CDN 1902 10 01-02-03

1902 The report of the committee on the fire at Addenbrooke's Hospital shows that the fire did not originate from any carelessness, but from the improper construction of the building itself.

Joists have been found extending to the interior of the chimneys, which the committee regards as dangerous. The marvel is that it was ever permitted. If this method of construction prevails generally then some rather extensive alterations will have to be faced. CDN 1902 11 12

1903 new form of administration introduced - change from 600 Governors to 24 elected representatives [1.8]

1904 reopen wards but face large overdraft, Peckover gives £1,000 & granted Freedom of Borough in acknowledgement of his munificence

1904 not possible to proceed with Memorial wing [1.9]

1904 The recent decision to reduce the number of days on which the Cambridge Sanatorium can be visited from two a week to one a month has effected a change to which the patients' parent are not becoming easily reconciled. On Sunday afternoon several made the journey hoping to see their children through the windows. But all the blinds had been drawn and the children instructed not to look out. The parents waited for half an hour in the rain and then all but one departed. One man, who had not seen his son for five weeks, waited in an adjoining field. His vigil was rewarded when one of the blinds was raised and a timid little face peeped out and waved. The father went away somewhat gladdened at having seen his child in the distance. c04 02 04

1905 Cambridge Research Hospital founded by T.S.P. Strangeways (moved Worts Causeway 1912; tries find cures of killer & crippling diseases) [CEN 20.6.87]

1906 Cambridge Voluntary Association for Maternity & Child Welfare set up with milk kitchen in Newmarket Road & a few destitute mothers who had given birth cared for amongst geriatrics at Mill Road workhouse - its first connection with babies [15.1]

1906 A fire broke out in the roof of Addenbrooke's Hospital and extensive damage by fire and water has been wrought. A laundry maid saw wreaths of smoke above the roof of the operating theatre. The staff devoted themselves to the safety of the patients; those who could walk were hurriedly clad in warm wraps and led down the emergency staircase down which the more infirm, some on stretchers and some in their beds were carried. A similar fire broke out in October 1902. 06 01 06a-c

1906 Addenbrooke's Hospital fire – further report on cause – 06 02 01a

1906 It was alleged that the matron of the Cambridge Infectious Diseases Hospital had given a private supper party to friends and corporation officials. A councillor had stood in the pouring rain for two hours and watched through the window! The patients were in isolation and there was no objection to having a friend occasionally, but a large-scale party was not suitable. It had been the custom to have tea and bread and butter when the committee met there – that too should be stopped. 06 07 12 b & c

1906 Since 1886 the parish of St Andrew the Less has theoretically been richer by the sum of £5,299 through the munificence of Frederick Bailey, a well-known brewer who resided at Burleigh House, Newmarket Road. Up to the present the riches have conferred no practical benefit but now a scheme has been formulated and income will flow to the relief of poor residents. There is also to be a commemoration service on his birthday. Now a poor parish will receive a substantial charity and the memory of a generous benefactor will be kept green for many an age. 06 03 21a

1906 Sir – each scarlet fever patient leaving the Cambridge Sanatorium has to have a final disinfecting bath, after which he is put into clean clothes sent from home. But the patient is bathed and dressed in the bathroom in which all the patients have been peeling for an indefinite period. The room is therefore more infectious than the wards themselves. Discharged patients risk carrying home the infection they have been isolated to obviate – J.H. Dalton 06 12 05

1908 Addenbrooke's Hospital is now secure in the possession of half the estate of the deceased Polish Jew of Romsey Town, Harris Norman. The other portion has been left to the London Jewish Synagogue for the poor and needy Jews. A bachelor, he had amassed a fortune of £12,000 by the sale of cheap jewellery and by investments. At his death an envelope thought to contain the will was fetched from the safe but found to contain only a blank piece of paper. Subsequently the will was found in the lining of an old silk hat he had given away. 08 07 31

1908 Cambridge is not too well supplied with private nursing homes for the treatment of medical and surgical cases so the Priory Nursing Home almost opposite Christ Church, Newmarket Road, is welcome. It stands in grounds of nearly an acre with a garden sloping down to the river, isolated from the throb and vibration of traffic in one of the healthiest spots in Cambridge. A sense of comfort pervades the rooms and lurks in the corners and it seems hard to realise one is in a place associated with sickness and physical discomfort. 08 12 04

1909 Prince Henry of Battenberg opened a sale of work in aid of the funds for providing a properly-equipped Children's Ward at Addenbrooke's Hospital. There has been one in the past but some years ago it was done away with as the Hospital's income was not sufficient. Children have not been entirely neglected: urgent cases have been taken in but the staff felt handicapped without a bright, sunny ward where the injured and diseased little ones might be given a fair chance of recovery. 09 05 07 p5

1910 Cambridge & District Workers Hospital Fund set up - regular contributions to fund to maintain hospital Addenbrooke's hospital daily menu includes 50 cabbages, 6 stone of potatoes, 60 eggs etc, some given by gardeners in villages served [3.10]

1910 Monday marked an important epoch in the history of Addenbrooke's Hospital when the electrical department, containing the new X-Rays and other appliances, was formally opened. The installation of the X-Rays is yet another evidence of the determined effort made by the Hospital Authorities to keep pace with modern scientific discovery and have all the latest appliances. A 16-inch coil is used, with a motor generator and Wehnell brakes, and currents can be obtained up to 35 amps. By means of the Rays cases of bone disorder, injuries, cancer, rodent ulcer and ringworm can be dealt with. 10 06 10a & b

1910 Although the Cambridge Workers' Hospital Fund has only been in operation for 13 weeks it has already collected £166. Great difficulty has been experienced with some employers: hundreds of firms have been written to but few had replied. More accommodation was needed at Addenbrooke's Hospital but this could not be undertaken unless the workers would raise an extra £1,000 a year to maintain the extensions. The hospital charges for bandages and medicine were very reasonable but although subscribing workers should have them, this could not apply to their family or relatives 10 10 07e

1910 A public meeting agreed that the best Cambridge memorial to King Edward VII would be an extension to Addenbrooke's Hospital. At present there was a small ward where only eight infants could be accommodated and the outpatients department did more harm than good as people suffering from infectious diseases had to wait in company with others, increasing infection. The boiler needed replacement and there was need for a new room for X-ray apparatus as well as a new lift. There should also be a bust of the late King to be displayed in the Guildhall alongside that of his mother, Queen Victoria. 10 10 21e & f

1911 Addenbrooke's Hospital death under chloroform; anaesthetist exonerated. Richard Harris son of Newmarket licensee 11 08 18b

1912 additional accommodation for Infectious Diseases Hospital [3.11]

1912 Cambridge Research Hospital (Strangeways research Laboratory) opens, Hills Road, principally engaged in cancer research [3.12,369.15.11]

1912 Mr Strangeways was the heart and soul of the Cambridge Research Hospital which was opened on Hills Road. There has been a remarkable progress of science. It is now possible to examine bones and joints as if the flesh was transparent and to take photographs of them. The position of bullets and needles can be ascertained and diseases of internal organs elucidated by the X-rays.. 12 05 31a & b

1912 Mrs H. Bonnett of Lensfield Road has offered to build, equip and endow a Clinical Laboratory for the benefit of Addenbrooke's Hospital as a memorial to her son, the late Mr John Bonnett, who was for many years secretary and legal adviser to the Hospital and one of its most earnest advocates and supporters. It is not often that such a generous, one might almost say princely, benefaction is offered for such an invaluable object. It is a most generous gift at a time when the Governors are about to decide on plans for a new Children's Ward and out-patients' department. 12 05 24f

1912 The wealth of Cambridge in scientific fields seems to grow almost daily. Today is to be opened the new Cambridge Research Hospital for the study of rheumatoid arthritis. The condition can be one of almost ceaseless pain but it arouses less sympathy and lacks the sentimental element that helps hospitals for children and the consumptive. Success will bring about a greater diminution in human misery than the discovery of a cure of cancer. 12 06 24g

1913 Addenbrooke's Hospital big falling off in church contributions – report, gifts in kind 13 01 10 p6 CIP

1913 Now the council had acquired land adjoining the Infectious Diseases Hospital, work on two new isolation blocks should be started. Each would have twelve beds in a sort of cubicle closed in with glass partitions, so that it would be quite possible to have in one bed a patient suffering from scarlet fever and diphtheria and only a few yards away, but separated by glass, another patents for whom it was extremely important that there should be no risk of catching diphtheria. This needed a skilled architect to design 13 02 21 p7 CIP

1913 Addenbrooke's Hospital John Bonnet memorial clinic stone-laying 13 05 02 p2 CIP

1913 Mrs Almeric Paget has again shown her support for Addenbrooke's Hospital. A new lift is required to replace the existing one for moving patients from one floor to another or to the operating theatre on the top storey. The cost is £1,000 (about £98,000 at today's prices) and she promised £500 with a further £250 if the remainder could be raised. Lord Peckover immediately wrote the cheque needed to match the generous offer 1913 07 18 p12 CIP

1913 Red Cross VAD detachments had a field day at Newton Hall Park. Shepreth send a complete detachment of both men and women. The village has a pensioned R.A.M.C., Mr A. Smith, who they made Quartermaster and threw himself heartily into the work. He improvised stretchers using ash poles but slings. These are necessary for it is quite impossible for bearers to carry wounded men long distances without them 13 08 01 p2 CIP

1913 Infectious disease hospital may be extended by two additional blocks, one a twelve-bed observation ward, the other a twelve-bed pavilion with two single-bed wards, a convalescent room & additions to the administration block 13 08 22 p4 CIP

1913 An alarming accident occurred during the building operations at Addenbrooke's Hospital. An iron girder which had been hoisted to the roof slipped and crashed through the roof and the floor of the topmost ward into the ward below. Considerable alarm was naturally caused, particularly as the second ward was occupied by patients, but providently the girder fell clear of the beds and nobody was injured. It was quickly hoisted out and the holes in the roof were temporally boarded up 13 10 24 p8 CIP

1913 College Servants formed a VAD so they could train to join the First Eastern Hospital. This was at a skeleton stage. Cambridge was an ideal place with all its colleges capable of holding a large number of people. It needed to be run on military lines 13 10 31 p10 CIP

1914 John Bennett clinical labs open, he was secretary to hospital governors Addenbrooke's – 14 02 13b, c [1.10,2.5,3.13]

1914-18 various casualty hospitals opened - see WW I notes

1914 Men of the First Eastern General Hospital were quartered in Corn Exchange Street. An elaborate scheme was drawn up for constituting Cambridge a great hospital centre and the various college buildings were mapped out for conversion into wards. But this scheme is intended in case of invasion and it is to be hoped will never be needed. At present the need is for accommodation at places where wounded men are likely to be landed 14 08 07

1914 Arrangements are in hand for the accommodation of a very large number of wounded in the event of Cambridge being established as a base hospital and completely equipped wards have been fitted up in many of the colleges. Nearly 100 Army Nursing Corps nurses have been quartered at Downing College and a large number of beds lent by various colleges. Scores of voluntary workers are making clothing. Accommodation for 500 wounded may be required when the Great Court of Trinity College would become a huge temporary hospital 14 08 14 p5 Shepreth VAD could have a hospital for 26 patients ready within 24 hours.

1914 Red Cross hospitals have been equipped throughout the county. At Cottenham 40 beds are ready at one hour's notice, 25 are ready for wounded at Histon Council School, Oakington has 15. At Waterbeach the Baptist Sunday Schoolroom is equipped as a hospital with nurses in uniform presenting a neat appearance. At Newmarket thirty beds are fitted in the King Edward VII Memorial Hall. Should 100 wounded men be sent further beds will be fitted in the Astley Institute, Town Hall and Technical Institute. 14 08 14 p8

1914 Cambridge is one of the principal base hospitals to which the brave men wounded at Mons have been brought, 150 are now being cared for at King's College, to which the First Eastern General Hospital has been transferred from the Leys School. They include a Cambridge man, Leonard Cornwell of Gwydir Street, who was the very last to be placed in the train. So within a month of his departure he is back in his own town bearing marks of the terrible conflict. 14 09 04

1914 The train with wounded from the front was delayed. Rooms on the Great Northern platform were converted into wards for serious cases before being taken to hospital. Outside a fleet of motor cars and tradesmen's vans converted to ambulances were ready to take the men to the First Eastern Hospital now at Trinity College. It was not easy to lift the badly-wounded men out of the carriages but stretchers were placed on luggage trolleys and wheeled slowly along the platform. There were tears in the eyes of onlookers 14 09 04 p7

1914 A complete military hospital to accommodate 520 patients is to be built on college playing fields, Burrell's Walk. The hospital has to be completed within a month – indeed a considerable part is required within a fortnight so that the present hospital at Trinity College may be vacated before term commences. It will comprise of five wards with 100 beds in each, a supply block, operating theatre, mortuary kitchens etc. This means working at top pressure, night and day. When complete it will be one of the largest of its kind 14 09 25

1914 A soldier from the Gloucester Regiment, lying in Trinity College, writes "I am a wounded soldier who has lost his leg whilst fighting at the front. I had it taken off by Lieut.-Col. Deighton at Cambridge Hospital, which was a great relief to me and saved my life. I wish to thank all the visitors who came in to see us wounded soldiers and for the presents I have received. We get treated very well and the nurses and sisters are so kind and gentle. A choir comes to sing on two evenings. It is lovely and we enjoy it so much. I am proud to say that I lost my leg for King and country. Others including Sawston 14 10 09

1914 Two military funerals took place from the First Eastern General Hospital at Trinity College. One body was sent in a coffin wrapped in a Union Jack to the station and put on a train to Durham. The railway expenses were generously defrayed by Nurse Keep. The funeral of other,

Arthur Larkin of the Royal Scots, was held at Newmarket Road cemetery. He'd been wounded at Mons and the cause of death was tetanus. Bugler Royston sounded the 'Last Post' 14 10 16

1914 As motor ambulances are much needed Cambridge Red Cross have decided to hire a chassis from the Cambridge Automobile and Engineering Company and build an ambulance upon it. Other chassis have been lent by Mr Briscoe of Longstowe, Lady Inchcape and Mr Douglas Newton while Lady Waldstein has also converted one of her cars into an ambulance. These, together with those lent by Messrs King & Harper will convey wounded with increased comfort from the station to the First Eastern General Hospital 14 10 30 p8

1914 Royal visit Princess Christian of Schleswig-Holstein to First Eastern General Hospital 14 12 18

1914 Nurse Boutle of South Street volunteered for foreign service with the Red Cross Society. She was taken prisoner in Brussels and sent to nurse wounded German and French soldiers. When the Germans refused to let them go she disguised herself and after a risky journey and an exciting incident with a German sentry – three minutes afterwards a man was shot at the same spot – she reached the coast. On the crossing the steamer passed two floating mines. She had no complaints about the conduct of the Germans who saluted nurses in the street 14 12 25

1915 new wards opened

1915 Isolation hospital new block added, cost £5,600 [1.11]

1915 C.T. Skipper, architect of FEGH and Cherry Hinton huts appointed to War Office to produce new hospitals 15 02 12

1915 Addenbrooke's Hospital has experienced exceptionally difficult conditions due to the extension and alteration of the buildings and the disorganisation of staff arising from the war. Various surgeons had been commissioned into the army and nurses had volunteered for service with Queen Alexandra's Naval Nursing Service. But the X-Ray department is now working in the new out-patients department and Dr Roderick had supplied radium for the benefit of patients for whom this treatment is required. They'd offered 60 beds for wounded soldiers but these had gone to the First Eastern General Hospital 15 03 05

1915 Red Cross – no more small convalescent homes to be opened – are waiting at Balsham, Cottenham, Gt Shelford & Cambridge; Seven hospitals now open with 158 beds. First Borough Hospital temporarily closed & would reopen at St Chad's; also one at Linton. A private hospital opened at Cheveley by Lady Savile Crossley. New scheme for large convalescent camps 15 04 23 p7

1915 Cambridge Sanatorium additions Isolation Hospital complete – block of 14 beds; enter from Vinery Road 15 05 07 p4

1915 Isolation Hospital, Mill Road opened, history 15 05 14 p4; 15 05 14a Ch

1915 Dentist in wartime – work at 1st First Eastern General Hospital 15 05 14 p7

1915 First Eastern pamphlet by Shipley 15 06 18 p6

1915 11th (Service) Battalion (Cambs) Suffolk Regiment stationed at Hut Barracks to leave at end week to train as part of larger unit; have won high esteem of inhabitants. Nucleus formed in Aug 1914 when Army Relief Camp was established in Cambridge under Col Heycock of CUOTC. 300 men were billeted in Corn Exchange then County Girls' School. Recruits came in well as Territorial Force Association asked permission War Office to raise a county battalion of the Regular Army. Authority received Sep 25th & recruiting campaign started. Moved Melbourne Place School 30th Sept where Col C.W. Somerset took command; moved Territorial Drill Hall, East Rd & Eden Street, King St & East Road school requisitioned.

1915 Formation of 5th (Depot) Company authorised 2nd Dec and on 11 Dec moved into the new Hut Barracks, Continued to grow. Two Depot companies will remain in Cambridge to train any further drafts. Fighting strength that will move out comprises 26 officers, 1,084 other ranks

1916 Mr and Mrs. Charles Finch Foster had given to the Hospital the sum of £1,000 commemoration of their golden wedding. Mr. Foster had asked that the Hospital should assign a bed, in consequence of this gift, in accordance with their by-laws. The General Committee had gratefully accepted this very liberal donation, and the inscription on the bed would be as follows: "A Golden Wedding Gift. 1866. October 2. 1916. Mr. and Mrs. Charles Finch Foster endow this bed to commemorate the fiftieth anniversary of their wedding day". This was, added Mr Lock a very valuable present and he ventured to say it was an example which they might hope others would follow 16 11 15 CIPof

1917 Cherry Hinton military hospital – suicide of soldier, gassed – 17 02 28b
1917 Mr Paget asked in parliament about town council resolution of 2nd March 1916 drawing attention War Office to lack of control of and the insufficient guards placed at military isolation hospitals in Cherryhinton Rd & Newmarket Road whereby patients were enabled to escape and thereby cause danger to the health of the community. Mr Churchill, Sec of State for War asked – 4th registrar of Cherryhinton military hospital reported to local medical officer of health that the previous day a soldier had been discharged from hospital at his own request suffering from venereal disease ... was due for demobilisation 1917 03 22 Hansard
1917 Red Cross Hospital beds unoccupied and those sent require no nursing – 17 12 19a

1918 hospital £1,500 in debt [2.3]
1918 The Secretary of State for War, Lord Derby, made an unofficial inspection of the 1st Eastern Hospital. He visited the administrative offices, the Nurses' Mess and went round several of the wards & the recreation room, where the Irish ladies of the town had provided a sumptuous tea on the eve of St. Patrick's Day for the Irish patients. This pleased him much. The kitchen and operating theatre were then inspected, and he expressed himself as being extremely satisfied especially with the open-air wards 18 03 20 CIPof

1918 PC Barnes saw two soldiers in hospital uniform going towards Mill Road each carried a full sack. Said it was bread for the hospital from Bainbridge's shop. Until six weeks ago breaking out of the hospital bread been reduced to a minimum – one or two cases a month. But recently had increased to 2-3 per night, mainly owing to reduction rations. But they got more than ordinary peropld. 10 ounces of meat, 14.5 ounces of bread and a pudding each day. In course of their treatment some were put on a milk diet for 24 hours and got hungry. They were encouraged by baker to break out and obtain large quantity of bread which they sold in the hospital when they got back at rate of 1s a loaf. It was doing men a great deal of harm and was very derogatory to discipline. Baker gave them stale loaf, they came back for 40 loaves, came into the house and wife made them cocoa. Did not know that bakers came under Shop Hours Order – should close not later than 8pm except Saturday 18 05 10

1918 Wordsworth Grove Hospital, Cambridge, has Newnham gymnasium lent to them for their massage and electrical department, a large, airy bright building where between 30 and 40 cases a day are treated—men in hospital in the mornings, and out-patients and discharged soldiers in the afternoons from Swavesey, Newton, Harston, Duxford and outlying villages. The treatments are massage, galvanism and Faradism, radiant heat, hot air and ionisations and exercise. The work here, as in all other Red Cross Hospitals in the county, is carried on under the supervision of Miss

Laven, who has been untiring in her efforts on behalf of the wounded ever since the outbreak of war. 18 12 11 CIPof

1919 Soldiers on strike.—At a meeting of the Cambridge War Pensions Committee, the story was told of a strike of discharged soldiers undergoing treatment, at the Papworth Tuberculosis Colony. Dr Aldren Wright told the committee that on July 2 something not quite satisfactory occurred with regard to the food. There had been a little dissatisfaction before, and on this occasion they asked the Superintendent. (Dr. Varrier-Jones) to receive a deputation. Mr Varrier-Jones said he would quite willing to listen to the individual complaints but would not interview them collectively. Three representatives however went in to see him and discussed with him the food situation and some words took place with the result that two of the men were dismissed, and this incident was followed by the whole of the discharged soldiers in the building, with one or two exceptions leaving the same day 19 08 06 CIPof

1919 First Eastern General huts to be converted into houses; 120 applications already received. One long ward to accommodate 16 small families; divided by concrete slabs – 19 09 10b

1919 Cambridge provisional limb depot began last January, a workshop established by Red Cross Society; provides light peg legs for amputees – 19 11 05b VAD in Cambs; notable record of work in days of peace and war, by Alex Wood – detailed account – 19 09 24b

1919 Isle War Pensions Committee – discuss buildings adaptable for training purposes. Most promising two hospitals at Cambridge. One Barnwell erected for 780 patients, other Cherry Hinton for 800, each complete accommodation residential staff - Barnwell 1,000, Cherry Hinton 1,110. Buildings commodious, well planned & well provided with first class roads, drainage done. Both used for venereal cases but practically vacated & notices could be put up re new use; men would not go to buildings associated with VD. Barnwell temporarily occupied by 80 general cases from 1st Eastern General Hospital while few VD cases being treated – ES 19 11 07 p6

1919 Training centres for discharged soldiers ... venereal diseases hospitals ... is no risk of infection but would men go into them ... hospitals at Barnwell and Cherryhinton Road, one having accommodation for 750 men and the other for 800 are most suited. A matter of sentiment – VD Hospitals as training centre – meeting convened by Church League for Women's Suffrage ... military established two hospitals and prevented men getting out a d mixing with inhabitants ... if buildings taken down and re-erected on another site with delay, construction of new roads and paths and new system of draining there would be no objections ... when FEGH taken over by Town Council some of patients were sent to these hospitals but had great difficulty getting the men to go there ... there was a moral taint about the place 19 11 14

1920 First Eastern – during snowy weather water leaks through roof, the only obtainable as pipes are frozen; coke ran out and no hot water, water cistern frozen and ten lavatories between 32 flats - CDN 20 12 16

1921 nurses salaries compared with those of Corporation scavenger [2.9]

1921 Evelyn Nursing Home opened as result of £30,000 given by Mr Agnew in thanks for wife's recovery after serious operation [1.2] 1919 the local nursing home was a sizeable house in Thompson's Lane next to electricity works (later Magdalene lodging house). Primitive theatre on 1st floor & no porter, patients needed to be carried up & down narrow zig-zag stairs on stretcher angle 60 degrees; Charles Agnew's - of Agnews Bond St art dealers - wife Alice operated on & in gratitude he built new nursing home in about 1922 by extending a large house called The Orchard in Trumpington Road & named after his wife Evelyn. In early 30s extension & new theatre added. Fees charged sometimes waived & University could use money from Crane's Charity to pay for needy undergraduates. A non-profit making institution for town & gown [17]

1921 voluntary hospitals in financial difficulties [3.14]

1922 Something more than a talking-to ought to be administered to the boys who have committed so much wilful damage to the remains of the Barnwell Military Hospital adjoining the Newmarket-road just beyond the Cambridge Borough boundary. For some reason the boiler house and one complete section of the wooden hutments have been left, apparently totally uncared for, and are rapidly going to wreck and ruin. The site of the hospital, overgrown with weeds and littered with debris, forms a happy hunting ground for children who are able to get through the gap where the gates used to be. The bolder and most mischievous of the boys have found the remaining buildings a tempting target for stones, and scarcely a pane of glass remains undamaged 22 07 15

1923 Speaking to Cambridge Rotary Club Dr H B Roderick compared Addenbrooke's Hospital 50 years ago with today. In 1872 the average stay in hospital was 37.87 days and in 1922 to it was 27.46 days, so that with practically the same number of beds, owing to the more rapid turnover due to shortened convalescence, they were able to deal with a considerable number more patients. In 1922, 2,376 operations were performed, and 2,231 in-patients and 4523 outpatients

were treated. This great increase in work naturally involves increased demands both on the medical, surgical, and nursing staffs of the hospital, as well as on its financial resources. The present operating theatre was constructed in 1897 and today it is out of date. Two theatres, on modern lines, are urgently needed in order to cope with the ever-increasing work c23 04 10

1926 Cambridge Workers' Hospital Fund raised nearly £3,900 last year but expenses of Addenbrooke's Hospital were liable to increase. They were now installing new operating theatres, two of the women's wards were being remodelled to provide sanitary annexes and in the near future they would have to build a new ward on the top of Victoria. This all cost money and unless their income was increased they would have a drop in efficiency. It was a worry to know where the money was coming from. One bright spot was the parades; before the war they only received £600 from them, this year it would be over £4,000 c26 09 27

1927 authorise construction of maternity department, May; decide not to proceed August & discuss maternity home [2.12]

1927 proposed enlargement at cost of £37,400 - new ward on top of Victoria, at present waiting list of 23 men & 56 women [2.13]

1927 radium fund introduced [2.29]

1927 Dr Francis Shillington Scales one of the foremost radiologists in the country has died. He was appointed medical officer in charge of the X-ray department at Addenbrooke's Hospital and made much of the apparatus himself. He had an extensive private practice in the special branch of medicine to which he had elevated himself, and had an elaborate X-ray apparatus installed at his residence in Adams Road CDN c1.3.1927

1928 two operating theatres opened [2.14]

1929 appeal for £90,000 for rebuilding [2.15]

1930 Mill Road Poor Law Infirmary & workhouse closed when responsibility passed from Poor Law Guardians to County council; becomes County Municipal Infirmary for infirm & able-bodied homeless with nursery for children; some huts for mothers in childbirth [15.2]

1930 The time is drawing near for the opening of the new Musgrave Ward at Addenbrooke's Hospital. The name is a reminder of the great service rendered by T. Musgrave Francis, chairman of the General Committee. The hospital wards get their names in various ways; sometimes it is after royalty as in 'Victoria' and 'Albert' but the most interesting in 'Tipperary' which was built in 1913-14. For a long time it was known as the 'New' Ward but the 'long, long way' that one had to travel to get to it reminded people of the popular song and gradually the name stuck. The 'Tipperary' Ward always made the hospital look rather lop-sided from the front, but the new 'Musgrave' restores the balance. 30 03 15c

1930 With the sun's warm rays streaming in at the windows – a fitting herald of life and health – the new Musgrave Ward was opened at Addenbrooke's Hospital. It is an addition to the top floor and intended as the second women's surgical ward. It contains 18 beds with three single-bed side wards and a balcony accommodating six beds for open-air treatment. Its name commemorates T. Musgrave Francis, chairman of the General Committee, who provided a tea and concert in the out-patients' department. 30 03 28b-c [1.12]

1930 The disappearance of Boards of Guardians and the transference of the Poor Law work to the Public Assistance Committees has caused some bewilderment. The chief institution in Cambridge is that at 81a Mill Road; it was erected in 1838 as a 'Union' to replace numerous small parish workhouses. The name has been changed to Poor Law Institution in recent years. The demand for accommodation became so acute that in 1923 they had to build a new block. The

Infirmery of the old Workhouse has become a hospital with 124 beds in up-to-date wards with a large nursing staff including three certified midwives. 30 04 01a-c

1930 Chesterton poor house taken over by local authority [12.7]

1930 There are only seven patients at Oakington Isolation Hospital, the cases were chiefly scarlet fever and the virulence of this disease was decreasing. The matron and porter have retired due to ill-health. It would be best to close it and arrange for Cambridge sanatorium to take the patients. But the cost of maintenance there was three shillings and sixpence more a week, councillors were told. 30 08 20d-e

1931 given £6,000 to enlarge X-ray department [2.24]

1931 Workers Hospital fund becomes Contributory Scheme under which various country parishes secure rights when sick in return for standing payments

1931 Addenbrooke's Hospital contributory scheme encourages people to pay twopence per week. Treatments get more expensive as doctors discover new methods of helping people and owing to lengthening waiting lists extensions to the hospital become necessary. But it is no use having additional wards unless there is an increase in funds. Those who do not join may be required to pay a substantial charge if they need treatment. 31 10 02p

1931 Addenbrooke's Hospital contributions scheme – 31 10 02o

1931 William Darnell, the head porter at Addenbrooke's Hospital is the best-known and most popular man to be featured in our 'Mystery Backs' series. Almost every writer identified him. They described him as 'genial', 'kind-hearted', and say 'the hospital would be a sorry place without him for he has a smile and kind word for every one'. Many asked that if they should win the five-shilling prize that it should be donated to Addenbrooke's. 31 12 11a

1932 new wing opened, eye ward opens, X-ray clinic opens after £8,500 anonymous gift [2.26,2.25,2.27]

1932 private wards cost 12/- (60p) a day [1.13]

1932 The Duke and Duchess of York opened Papworth Village Settlement's Women's Hospital which provides accommodation with the personal appurtenances of a private bed-sitting room so that each of the 62 patients may enjoy cheerful, colourful surroundings in her fight for health. Then they journeyed on to Addenbrooke's Hospital to open a new wing for children. 32 07 15a & b

1932 Members of the Cambridge Workers' Hospital Fund say they cannot accept the new Addenbrooke's Hospital Contributory Scheme. There have been no discussions with the Hospital who have rejected every approach. They had refused permission to put posters on the gates of the Hospital saying it would not look nice – although notice boards advertised a staff dance for the nurses. 32 09 09a

1933 Arthur Cooke, senior Surgeon at Addenbrooke's Hospital, owned one of the first steam cars in Cambridge. He was founder of the University Automobile Club which wound up about 1926 when the funds went to form the Ricardo Prize for Thermo-dynamics at the Engineering School. 33 03 14 & a

1933 First Eastern General Hospital reunion – 33 03 04d

1936 Mill Road : County announce development of maternity side & establish 20 beds, 96 births during year, by 1939 was 300 [15.3]

1938 Oakington Isolation Hospital to be closed with cases transferred to Cambridge – 38 01 26

1938 The First Eastern General Hospital is to be revived as part of a War Office plan. The site has not been officially approved but will not be far from Cambridge. It would have 600 beds on mobilisation, possibly expanding to 1,200. There will be a permanent staff of three officers and

24 other ranks with 19 medical officers, a matron and 49 nursing sisters. On mobilisation the staff will be increased by other ranks largely composed of V.A.D. men and women. They hoped it would never be called into action, but they must be prepared, ex-servicemen were told. 38 04 11a & b

1938 Miss Moggach has retired as Matron at Addenbrooke's Hospital after 13 years. There have been many changes: the number of beds has increased from 190 to 320 and the number of nurses from 48 to 180. A preliminary training school for nurses has been established, a bed endowed at Delhi in memory of former matron Mary Cureton and a fund started for a chapel for nurses. She took a keen interest in nurses' recreations, starting the various sports clubs and presenting the first cups for tennis. 38 04 02a

1939 Mill Road transformed into AI Hospital under Emergency Medical Service to cater for expected casualties from East Coast hospitals in event invasion; takes Dunkirk evacuees, civilians still dealt with; 'temporary' theatre & X-Ray block set up in wooden huts (functioned till Hospital closed) [15.4]

1939 The Grove Nursing Home was opened in 1920 with three beds. Nine years ago it was moved to Chesterton Road where there were nine beds. The most recent expansion is to 159 Hills Road where a newly completed extension gives accommodation for 20 patients as well as an up-to-date operating theatre with anaesthetising room and all the modern apparatus. The home is, of course, centrally heated 39 02 08b

1939 Cambridge is to raise a 600 bed Military Hospital (Territorial) with an establishment of 23 officers, 50 nursing sisters and 145 other ranks. Steps are being taken to provide temporary accommodation for officers and social purposes pending the erection of permanent buildings. This new unit replaces the original 1st Eastern General raised in Cambridge and the Isle of Ely in 1908. After the war, the hospital was disbanded, but in 1938 it was reconstituted under the command of Lt.-Col. C. H. Budd. M.C. T.D. 39 03 03 CIPof

1939 The old First Eastern General Hospital had been born again last year, but it had a short life and died in the September crisis. Then the Cabinet decided to form eight Territorial General Hospitals and it was revived as the "2nd (1st Eastern) General Hospital". There are 23 officers and 145 other ranks, a matron and nurses and it will have the same number of beds, about 600. Old Comrades can assist training recruits in the initial stages, they were told at their annual dinner 39 04 17

1939 Emergency plans envisage that as London will probably be attacked before Cambridge the County Infirmary should provide for 250 casualties from Central London. The Ministry would provide bedding and equipment but mattresses and pillows would be supplied as cases only, to be filled as required. It would be up-graded with an operating theatre and X-ray rooms, emergency lighting and better sanitary conveniences. But in the event of local casualties the London cases would be transferred to other hospitals 39 06 29

1940 Hope Nursing Home acquired by Roman Catholic Sisters of Holy Family after evacuated from London 1940 [446.9.8]

1940 The Duchess of Gloucester visited Cambridge. At an emergency hospital, the whole of the nursing staff, regular and auxiliary, were lined up and inside the ward, the royal visitor talked with some of the patients, including several members of the B.E.F. back from France. An R.A.F. sick quarters, which is entirely nursed by the Red Cross, was the next place of call. After inspecting two of the wards, the Duchess saw a short display of surgical work by the nurses. Proceeding next to the University examination Hall, now an emergency ward of Addenbrooke's Hospital, the Duchess saw some of the American ambulance units presented to the region then inspected the joint war organisation emergency hospital stores 40 08 16 CIPof 40 08 14a

1940 Hospital Inspected.—Cambridgeshire's first convalescent home and auxiliary hospital under the Joint War Organisation and the Ministry of Health is staffed by two trained sisters,

Miss Simmons and Mrs. Bailey, and B.R.C.S. members of detachments Cambridgeshire 14 and 38. Commandants Mrs. Martin Wright and Miss S Phillips 40 11 29 CIPof

1942

Isolation Hospital Mill Road temporary extension opened for infectious diseases – 42 07 24

1943 radiotherapeutic centre established [7.1]

1946 Mill Road : County plan to turn into maternity unit, delay due imminence of National health Service in 1948 [15.10]

1946 Plans for new hospital at Chesterton on site of present one approved by county council and will go to Ministry. There were beds at Chesterton which could have been used for a long time and enable them to close down the disreputable, disgraceful, uncomfortable and insanitary beds which patients now occupying. But this 50-bed ward was away from the main building and the Medical Officer would not take responsibility of opening it when they did not have enough trained people to look after it – 46 05 13

1946 County hospital, Mill Road, largely used as Maternity Unit – feature – 46 11 20

1948 National health Act abolishes Contributory scheme as becomes part of new National Health Service, East Anglian Regional Hospital Board established, Chesterton hospital becomes part [4.2,12.7]

1948 Mill Road formally becomes Maternity Hospital with 91 beds & premature baby unit of 6 cots, still had 24-bed female geriatric ward (till 1965) [15.11]

1950 During the Nazi “blitz” of 1940, members of the Roman Catholic Order The Sisters of Hope were driven from their home in London and came to settle in Bateman Street, Cambridge. In 1944 they moved to Brooklands Avenue. “So good has come out of evil”, said the Bishop of Northampton as he laid the foundation stone of the new nursing home at Hope House. This large extension to the present premises will be completed in 12 months time and will increase the capacity of the nursing home from its present nine patients to 30 c50 05 18

1950 Changes in the arrangements for visitors to Addenbrooke’s Hospital were outlined by the Board of Governors. The present system of brass tokens will be discarded and the porter admitting visitors will be provided with a copy of the daily bulletin sheet for each ward and place a tick against each patient’s name for every visitor.. A maximum of four visitors will be allowed with not more than two by the bed at any time c50 11 28

1951 authorisation for purchase of land for new site [2.10]

1952 hospital closes for 2 months due to infection [2.16]

1952 Cambridge Daily News Robin & Goodfellow cots established, January. [2.11]

1952 hand over radio sets as result of appeal run by paper, November [2.18]

1952 Sixteen patients were moved to safety when fire broke out in the nurses’ quarters at the Evelyn Nursing Homes, Trumpington Road, Cambridge. One of them was 102 years old. The Fire Brigade tackled “the biggest job for a long time” and brought the fire under control. Chief Fire Officer, Mr Tom Knowles, paid a tribute to the conduct of the nurses: “They were cool, calm and collected and completely unflurried; they might just have been making a cup of tea”, he said. c52 02 20

1952 Cambridge Trades Council strongly objected to the closing of Romsey Municipal Restaurant. It will deny a good mid-day meal to many old people & working class men could not afford to go into places in Cambridge and pay high prices for meals. Transport workers could not get a meal if the facility were taken away. The profit of the combined restaurants is more than

enough to cover losses and as municipal restaurants are a public service and not run for profit they urged the continuation of the service in Romsey. c52 04 17

1953 new Cancer labs - Prof. Mitchell - policy of linking hospital & science [2.20]

1954 The extension to the nurses' training school in Owlstone Road, Cambridge has everything for the convenience of the nurses. There are two shampoo rooms where the girls can wash their hair, two ironing rooms and a drying room for doing their washing and provision may be made for a small kitchen so they can fill a hot water bottle at night. Each bedroom has its own washbasin, while the dressing tables are really dressing-tables-cum-writing desks. A games room has been provided where they can enjoy table tennis or listen to the radio. There is also a piano so they can hold dances there if they wish. With such ideal conditions it will not be surprising if would-be-nurses will want to come to Cambridge for their training. CDN c 28.1.1954 [2.22]

1955 New Addenbrooke's approved [2.23]

1955 Chesterton R.D.C. received a letter from Addenbrooke's to say that cases of diphtheria would no longer be admitted to the hospital. There were outbreaks at Impington and Trumpington, the fourth in the village. The provision of an isolation hospital had been postponed for a long time, with the object of avoiding expense but was now imperative. They could erect one at a cost of about £650 which would meet the needs of the district for a long time to come. 55 04 22b

1956 When Addenbrooke's Hospital was opened in 1766 it had no kitchens and some time later the Governors bought a small adjoining tenement. But now they celebrate the opening of new spacious and luxurious kitchens. The large dining room is artistically decorated with red curtains, yellow walls and blue Venetian blinds with separate spaces for medical and nursing staff. 56 01 31a [2.28]

1956 The resignations of Mrs and Mr Ditchburn as matron and secretary of Cambridge Maternity Hospital were accepted with regret. They were jointly appointed in 1934 when it was a ten-bedded public assistance institution and during the war became a transit hospital. Now it had grown to a 100-bedded institution and maternity training hospital of high repute and much of its success was owed to them. 56 04 10b

1956 Addenbrooke's Hospital Home of Recovery at Hunstanton is used for pre-convalescent and post-operating patients. Cases can be sent down much sooner than to their own homes; hospital beds are cleared quicker and they are able to take in other patients. In 1955 687 patients stayed at the home which has now been extended with a new sitting room and sun lounge. 56 05 08 & a

1956 In Cambridgeshire there is a whole corps of volunteer unpaid drivers who put their cars at the disposal of patients, driving them in to the hospital, wait for perhaps a whole morning and then taken them home again. The service is administered by Mrs Sybil Edwards and Miss Peggy Pointer who liken the outpatients department of Addenbrooke's Hospital to the booking hall at Piccadilly Circus tube station at rush hour. 56 09 08c

1956 Mr & Mrs Ditchburn have seen many changes at Mill Road Maternity Hospital in the 22 years they have been Senior Administrative Officer and Matron. When they came in 1934 it was the County Infirmary and was mostly for old people. During the next five years a new wing was built, together with a new ward and theatre. Gradually the chronic patients became fewer and now there are only 23. During the war it was an emergency Medical Services Hospital with only one

bed left for maternity patients. In 1934 there were only 56 births at the Hospital but 1,831 were recorded in 1954. 56 10 05a & b

1958 A new W.V.S. Out Patients' canteen opened at Addenbrooke's Hospital. It supplies light meals and refreshments to 2,000 people a week. The welcome food and hot drinks help reduce tension and enable patients to be ready to benefit from medical advice and treatment. The canteen was started in 1911 by members of the British Women's Temperance Association and Miss Olive Golding who began the work, still does three shifts a week. 58 02 19

1958 Miss L.J. Ottley was appointed matron of Addenbrooke's Hospital in January 1944 when the war-time annexes at the Leys School and Examination Halls were in full use, giving a total complement of over 800 beds. A year later these were closed, adding to the waiting lists. The Hunstanton Home of Recovery was opened in 1947 and an unoccupied ward at Brookfields Hospital opened for medical cases. She has worked tirelessly for the betterment of the hospital and many will miss her now she is retiring. 58 04 23

1958 Addenbrooke's Hospital new site work starts August – 58 07 30

1959 Addenbrooke's : central sterile supply department - first in country [5.4]

1959 Work has begun on the new Addenbrooke's Hospital in Hills Road. The first stage will include a ward block of 100 beds and although the final size has not yet been decided it will be between 600 and 800 beds. "Our responsibilities are to the future and we shall be very much to blame if in 20 years' time we find ourselves looking for a bigger hospital", said the Chairman of the Governors' building committee. It will stand in a landscape planned by a woman architect, Mrs J.M. Hayward, in collaboration with the Director of the University Botanic Garden 59 07 28 [5.5]

1959 Excavations for the foundation of the first buildings of the new Addenbrooke's Hospital have started. It is hoped the ward block, radiological, outpatients and casualty departments will be completed in about two years. The architects are Easton and Robertson who have been responsible for many new buildings in Cambridge, including the new Engineering and Chemistry Laboratories, and the general contractors are Messrs Kerridge. 59 09 02a

1959 Private patient's advantages, Addenbrooke's Hospital – 59 12

1961 neurological surgery department opens in new hospital [5.6]

1961 bus service to new hospital debated [5.7]

1961 Chesterton hospital to develop active out-patient & day-therapy service; had been decades of neglect in geriatric medicine; converted from dreary Victorian institution to modern brightly-decorated hospital & home for elderly [12.6]

1961 Ministry of Health agree to resiting Mill Road maternity hospital at New Addenbrooke's 'by 1975' [15.12]

1961 When completed by 1968 the second stage of the new Addenbrooke's Hospital will have been probably the greatest single building project ever embarked upon in Cambridge at one time. Described as 'a hospital in a park' it will be the most up-to-date in Britain with beds for about 1,100 patients. It will comprise five ward blocks each ward having 25 beds and a site for the Chest Clinic, Blood Transfusion and Artificial Limb Centres. In addition five acres have been leased to the University for clinical research and medical teaching. 61 04 18a

1961 Private patients in Addenbrooke's Hospital are to pay lower charges for their rooms. At present a single room costs £4.9s.0d. a day and this will drop by one pound. A double room comes down six shillings to £3.19s.0d. The Board of Governors have also set aside £5.12s.6d. for the purchase of a budgerigar cage for the Mill Road maternity hospital 61 06 01

1961 Chesterton Hospital has 166 beds for the elderly sick and 74 custodial beds for able-bodied elderly people with no homes of their own. After decades of neglect geriatric medicine has come into its own. The number of elderly people is the highest it has ever been while a declining birth-rate has diminished the number of children available to care for their parents. Now 25 per cent of Britain's elderly are left without children to look after them in their old age. But of these 95 per cent are living independent lives and a quarter make some contribution to society until the age of 75 61 08 12

1961 Nearly 300 people had the distinction of being the first out-patients to attend clinics at the new Addenbrooke's Hospital. Long before nine they were filing into the spacious entrance hall and being dispersed to six clinic suites each of which has a receptionist to prepare them for the consultation. Only a few clinics remain at Trumpington Street, including orthopaedics, radiotherapy and psychiatry. By January it is hoped to have nearly all the wards transferred 61 10 23

1962 The Queen arrived in Cambridge to a fanfare of trumpets and over 2,000 people stood in the biting wind to welcome her as she opened the new Addenbrooke's Hospital. With Miss M.M. Puddicombe, the hospital matron, she walked past a line of nurses to the marquee where the ceremony was held before touring various wards speaking to patients. Later the Queen visited King's College chapel to see the newly-installed Rubens painting and toured the Papworth Village Settlement 62 05 28 & a 62 05 29a

1962 demand for plastic surgery threatens out-patient sessions [5.9]

1962 'Mill Road maternity accommodation has reached crisis point' - Matron [13.1,14]

1962 Cambridge's new Addenbrooke's Hospital is the first with an accident service. This brand new idea deals with everything from a minor cut on the thumb to major high-speed road accident. Eventually the idea will spread all over the country. Many labour saving devices have been introduced: electronically controlled containers in a pneumatic tube system deliver records and drugs to all parts of the hospital, oxygen can be piped to the wards, there are special chutes for the disposal of rubbish and doctors carry small wireless beepers to tell them where they are wanted. Patients are assured of the finest attention in some of the finest hospital surroundings in the country 62 02 14

1962 Addenbrooke's Hospital to install two-way closed circuit television between Operating Theatre and X-Ray department – 62 04 04

1962 Addenbrooke's Hospital development plans – 62 06 28

1965 Chesterton Hospital staff shortages are nothing new. Since the invention of antibiotics people do not die of disease at early ages, but live on. Geriatric nursing is not something you would be glad to see your daughter doing. Particularly when there is such a wide choice of less demanding and better-paid jobs. It is hard work: patients have to be fed, washed and helped to a degree unimaginable in other forms of illness. Sometimes their very helplessness makes the patients feel resentful at their dependence on the goodwill of others, so that they are critical rather than grateful for the help that is offered. If Chesterton is one of the most up to date in the country, one shudders to think what the rest must be like.– 65 01 12

1965 Plans for second phase of Addenbrooke's Hospital approved – 65 02 01 [5.12]

1969 new artificial limb & appliance centre. first as integral part of new hospital [6.9]
1969 liver swap on 2 year-old boy [6.6]
1969 nurses fear "hospital will grind to halt in five years" [6.10]
1969 Chesterton becomes one of first geriatric hospitals to have cardiac monitoring system due to charity [12.10]
1969 Mill Road premature baby unit costing £80,000 opened, part of £500,000 work over 5 years, 'the site has almost reached saturation point' - Hospital secretary – 69 10 08 [13.3,14]
- 1970 trains male nurses - only 5th hospital to do so [6.11]
1970 renal dialysis unit opens Douglas House [6.13]
1970 Kidney Unit at Douglas House can be opened following permission for junior doctor; team headed by Prof Roy Calne; unit contains ten kidney machines – 70 06 03, 03a
1970 Evelyn relicenced for abortions, one of top 5 private clinics in country [16.1]
- 1971 new central laundry opens [6.14]
1971 Alan Howard of University Department Investigative Medicine pioneers new treatment for heart cases – 71 07 09b
- 1972 pioneer computer medicine for processing blood test results [6.15]
1972 An unlovely and inhumane heap. That is how the "Architect's Journal" describes the £12 million second stage of New Addenbrooke's Hospital, Cambridge now complete after six years of building. "One would have to go a long way to find such an unlovely and inhumane heap, which looks as if it was designed piecemeal by a team of untalented temporary assistants c72 05 28 [6.16]
1972 campaign to be chosen centre for training physiotherapists & radiographers [6.17]
1972 faced with choice - finance for either 5 new kidney machines or new gas fired boiler system - chose machines [6.18]
1972 Only hours after moves began to cut its food bill, a Cambridge hospital has learned that it is one of the top four in the country for its bill of fare. New Addenbrooke's Hospital is only one of four hospitals named in a national survey by the Egon Ronay organisation as providing "completely good meals". The Ronay accolade is a tribute to the efforts of New Addenbrooke's head chef Douglas Lambert and catering officer Miss Mary Chivers - still working together in the kitchens after 24 years. General hospitals visited spend an average of £2.40 each week on food for patients. The food bill at New Addenbrooke's has risen recently to £3.20, and the Hospital's estimates committee recommended the bill should be cut back to about £2.50 c72 09 29

- 1973 radiotherapeutical centre develops cancer drugs [7.1]
1973 first liver transplant for year, have developed anti-rejection drug [7.2]
1973 Brookfields (old infectious diseases hospital in Mill Road) becomes old peoples hospital [12.1]
1973 Nurses at Chesterton Hospital have dreaded what might happen if flames gripped the most vulnerable of their wards. Sister Pat Hough, of Harston ward, said, "Our ward has 19 continuous care patients. It has a wooden floor and it is above the kitchen". But yesterday she was a lot happier after a mock fire exercise at the old people's home in which a new invention came through its first test. The invention - a harness that lies under the mattress and clicks like a car safety belt into an emergency hammock for the patient - is the brain child of the Hospital's fire officer. She said: "The first patient was down the fire escape 35 seconds after the alarm went off. That is about four times quicker than we could have expected if we had used the conventual method" c73 03 15
- 1974 Frank Lee centre opens [7.4]
1974 NHS reorganisation - administrative change only, to bring together hospital service, general practice & local community health services which used to function independently. Old admin bodies scrapped & new are : Dept of Health East Anglian Regional Health Authority, based Union Lane (succeeding EA Regional Hospital Board). Under them are 3 Area Health Authorities responsible for day-to-day running of each of their areas Cambridgeshire, Suffolk & Norfolk. Cambridgeshire based at Purbeck House, Hills Rd.- They have below them district management teams of trained health service administrators & between them will replace the present individual hospital management committees & boards of governors. There will be two district management teams, one based at Cambridge, one Peterborough. Liaising with these bodies will be Family Practitioner Committees who are replacing the NHS Executive councils, dealing with matters affecting family doctors, dentists, opticians & pharmacists. To represent the public interest & protect consumer Community Health Councils set up to be consumer watchdogs [9]
1974 by end of year "NHS locally grinding to juddering halt under a snowdrift of paper & legislation which had neither cash nor manpower to cope with"; doctors, surgeons & specialists well off, hospitals well equipped & all best of medical sciences gadgetry is on hand; what in great demand is nursing power ... people have been forgotten [11]
1974 first year review (1975) says it catastrophic & chaotic, service too big to be intelligently run from an administration in London which pumps out enormous quantities of paper to Area Health Authorities with less staff [12]
1974 "now NHS sinks in a paper sea" (9.75) [13]
1974 report says Addenbrooke's planned figure of 1,700 beds too many to manage, 1,200 now recommended; may need to keep old hospital [7.5]
1974 laundry block fire [7.6]
1974 kidney transplant stop due new rules - can only remove when have relatives consent [7.7]
1974 Chesterton first with new invalid 'standing chair' [12.11]
1974 Sir – In the death of Mrs Doris Ditchburn, Cambridge has lost a much-loved citizen who will be missed by a wide circle. She and her husband came to Cambridge in 1934 to work at the old County Hospital in Mill Road. Together they worked to improve the standards of the hospital and towards her dream of a first-rate maternity hospital. Mrs Ditchburn was a most understanding person and most unlike the old-fashioned dragon of a matron, but insisted on a high standard from her nurses and gained their affection and respect. – Margaret Reed c74 11 12
- 1975 first hole-in-heart operation in city [7.8]
1975 department of nuclear medicine opened - one of first [7.9]

- 1975 Evelyn appeal £1M extend facilities, was gift 50 years ago, grandson of Sir George Agnew, head art-dealers, leads committee; 45 beds [16.2]
- 1976 Government change policy - now suggest only 900 beds at Addenbrooke's, also cut budget; hospital goes into red [7.10,9]
- 1976 clinical research unit for rheumatic diseases opens [7.11]
- 1976 rehabilitation unit for disabled opens, first in hospital grounds [7.13]
- 1976 Chesterton : 2 wards described as fire traps but no money to rebuild [12.12]
- 1976 Mill Road get £300 cardiac monitor from Friends, money raised by jumble sales; has ultra-sound which draws pictures foetus by sound rays [13.5,13.6]
- 1976 Agnew House nurses hostel from public appeal which also raised money x-ray dept, wins award [16.3]
- 1976 Twenty private beds will be axed at Cambridgeshire hospitals in the first phase of Government plans for phasing out pay beds from the National Health Service. There are 56 private beds in Cambridgeshire, 29 of them at Addenbrooke's & Mill Road Maternity Hospitals, Cambridge. Others are at Papworth (3), Huntingdon (1) & 23 in the north of the county c76 04 13
- 1977 polio victim confirmed [7.14]
- 1977 500,000th patient since 1948 [7.15]
- 1977 320 bed extension called for [7.16]
- 1977 major breakthrough in Leukaemia - lead world [7.17]
- 1977 Mill Road - 3 babies die due virus, conditions condemned, call for new building, "new unit could start 1988" (1978); "1983 start likely" (1980) [13.7]
- 1977 Mill Road Maternity Hospital in Cambridge, a former workhouse, was slammed for its cramped and appalling conditions. A report highlights overcrowding, complete lack of privacy for patients, appalling residences for nurses & pregnant women having to sit clad only in a dressing gown in draughty corridors waiting for attention. It is virtually impossible to expand the hospital, access is difficult and car parking impossible. This is a disgraceful state of affairs for a maternity hospital doing the standard of work that Cambridge does. It should be replaced by a 100-bed obstetrics hospital on the New Addenbrooke's site as soon as finance is available c77 04 04
- 1978 "can Addenbrooke's high-class frontier medicine be afforded" [10]
- 1978 unit for terminally ill to be built beside Brookfields [12.2]
- 1979 East Anglian Regional Health Authority established in place of E.A.R.H.B. [4.3]
- 1979 international kidney donor appeal launched in Cambridge [4.4]
- 1979 first trial of transplant reject drug [7.19]
- 1979 Mill road bed occupancy twice national average & above safety limit, 3,898 babies last year [14] They carry on the business of life and death at Mill Road Maternity Hospital in what is little better than a clinical slum. Yet when the question of replacing it comes up this week, those with the power to close it are committed to keeping it open for another 10 years. In that time all that stands between the death of a baby, the death of a mother, or both, is the determination of the highly-motivated people who work there. But it snows on the patients in the X-ray department and there is only one lavatory for a dozen pregnant women. The operating theatre needs creosoting – it's an ex-Army hut – and boxes, bottles and laundry-bags litter the tunnel they call corridors. 79 09 18
- 1979 The best place to be during the current strike by members of the Public Services union is tucked up in bed in new Addenbrooke's Hospital. Those outside are at the mercy of a skeleton ambulance service, ever-growing waiting lists and a soon-to-be crippled out-patients service. Those inside simply have to put up with a reduced menu and eating off paper plates. At this time

of the year it is normally at bursting-point with about 86 per cent occupancy but on Friday there were 150 beds at both new and old hospitals empty. The real suffering is in the homes of the 3,500 people waiting for operations. Waiting lists vary from about six months from gynaecological to 18 months for general surgery c79 02 11

1980 new University clinical school opens [8.2]

1980 Mill Road debated in House of Commons, is top maternity hospital, loses least babies - but terrible conditions, planned rebuilding to start 1988-9, completion 1990-91; David Robinson shows interest, offers £3M (1/2 cost) provided new hospital finished by 1983; to be called Rosie Maternity after his mother, wards after family [13.8,15.13]

1980 Britain's top maternity hospital is the one in Mill Road, Cambridge – and that's official. It handles the most difficult births and a fifth of all babies in the region are born there.

Government figures show that it copes with 4,000 births annually, many referred from other hospitals for specialist care, but its only operating theatre is a wooden shed built for the Dunkirk wounded during the last War. 80 06 13

1981 new Medical Research Council centre opens on Addenbrooke's site, marks over 50 years medical research in Cambridge [36.9.13.1]

1981 body scanner unit opens [1.17]

1981 first arm transplant (unsuccessful) 8.3]

1981 Prince Charles opens cancer body-scanner after public appeal [8.4]

1981 Arthur Rank House in grounds Brookfields opened, £200,000 out of £530,000 came from Arthur Rank Charities [12.3]

1981 Duke of Edinburgh opens operating theatre, in use since Dec 1980, gift from Charles Morland & Evelyn Agnew [16.4]

1981 The seven-ton electronic camera known to thousands of fund raisers as the cancer scanner has arrived at Addenbrooke's Hospital on the back of a lorry. It was made near Nuremberg and shipped to Gravesend before going to the Siemens works for checking. It takes three-dimensional pictures of the body in micro-thin slides which can be studied to reveal the site of deep-seated disease without the need for investigative surgery. After two years the organisers are now only £100,000 short of their £1 million target 81 05 22

1981 With the official opening of a new £450,000 operating theatre at the Evelyn Nursing Home, private medicine in Cambridge takes a decisive step forward. Most of the operations are of a routine kind for which patients can wait a long time on the National Health Service. With the growth of private health insurance an employee can have now his operation at minimum inconvenience to his firm or himself. 81 09 16

1981 The Duchess of York officially opened Arthur Rank House for the care of cancer patients in the grounds of Brookfields Hospital, Cambridge and spoke to each patient. Retired Cottenham farmer, Horace Simpkins, a life-long fan of the Royal Family, had never met Royalty before and spent five minutes chatting to her and was delighted when she gave him a flower from her posy. 81 10 16

1982 Area Health Authorities abolished, replaced by District Health Authorities [4.8]

1982 "previously Cambridge Health managed by United Cambridge Hospitals Board, prestige medicine burgeoned apace while services for handicapped etc subsisted on what was left.

Reorganisation brought hospital, community & family doctor services together but so much had been done by the UCHB that officials at a loss to trace the origins of some arrangements.

New Health Authorities were officer dominated & much less involvement by lay members.

Budgets drawn up under defined headings for first time & all had to justify spending - in theory - but old ways continued & budgets got out of hand. By the time Cambridgeshire Area Health

Authority disbanded in 1982 it had still not sorted the financial & administrated web, money continued to be spent on what was considered important leading to criticism by Auditors”[4.12]

1982 866 abortions carried out in Cambridge [4.11]

1982 new £750,000 wing, started; Robinson wing [16.5]

1983 “Cambridge is ... the best place in the world to be ill in. From bunions to brain surgery there is a resident expert ...” but inadequate finance [11]

1983 “old people face 3-year wait for ops” due insufficient rehabilitation beds [11.2]

1983 Government plans for private contractors in hospitals announced [4.9]

1983 more emphasis on care in the community [4.10]

1983 Rosie Maternity hospital opens September [13.9]

1983 changes status & known as Evelyn Hospital with opening above [16.6]

1983 Regional health chiefs delivered a massive snub to both Cambridge City and the University by placing the Mill Road maternity unit and the old Addenbrooke's Hospital sites on the open market. They will go to the highest bidder which rules out the chance of the city buying Mill Road for an old peoples' sheltered housing scheme. They have also disregarded a gentleman's agreement with the University to give them first refusal on the Addenbrooke's site which is worth between £1 and £2 million 83 04 19 p12

1983 As Addenbrooke's Hospital prepares to close more than 100 of its beds for the summer holidays, 7,000 people are waiting for operations. Some have been waiting up to four years and waiting lists in some specialities have increased 340 per cent since 1977. Until September 1st the hospital will be on an official red alert – emergency and urgent cases only. But medical staff believe it is not far off that status without any summer closures. “It is a ghastly situation and it gets worse, week by week”, said a senior surgeon 83 07 22 p1

1983 The Rosie, Cambridge's much-awaited maternity hospital, is Liz Earl's baby. The top midwife in the area, she has been involved in its planning right from the outset. No sooner had it opened than Miss Earl had the satisfaction of delivering a baby herself, the new hospital's second arrival. The Rosie has all the ‘high-tech’ that could be needed – two operating theatres, an improved monitoring room and new equipment - but the general atmosphere is as comfortable and homely as it can be with bright curtains and attractive play areas for older children 83 10 22 p12

1984 Ben Hardwick liver transplant - a two-year old, featured on ‘That's Life’ tv programme; BBC offers £110,000 for intensive care but fear Addenbrooke's cannot meet running expenses (dies March 1985 - 85 03 23) [2.1,8.6,8.8]

1984 day hospital & outpatients clinics for elderly open [8.9]

1984 cleaning at standstill after OCS win contract under privatisation scheme, (collapses in August 1986) [8.10]

1984 Government rules which restricted beds to 900 scrapped [8.12]

1984 Old Addenbrooke's Hospital has provided care and cure for ordinary people for more than 220 years. This month it is to close and when the last patients vacate the gynaecology, plastic surgery and ear, noses and throat wards it will be sold. 84 10 10 p26 (sold February for £5.75 million) [8.11,8.14]

1984 Brookfields opens day room for elderly patients [12.4]

1984 Mill Road old hospital sold to City [13.10]

1984 MRC units face cutback : Neurochemical Pharmacology - mental illness like senile dementia, vacant directorship not to be filled; Biostatistics Unit moved Cambridge from London 1980, involved front-line studies from breast cancer to organ transplantation; all units except Molecular Biology have budgets axed by 21% [36.9.13.3-4]

1984 Addenbrooke's cot-death unit saved by CEN readers after cash axed by MRC, Sultan of Brunei gives £130,000 which saves for 3 years [36.9.13.5]

1984 Aids case successfully treated at Addenbrooke's [36.9.113.6]

1984 It was Mrs Thatcher herself who sliced through swathes of Whitehall red tape to allow Cambridge's new maternity hospital to be built in record time. Her role in the crucial discussions was disclosed by the chairman of the Regional Health Authority, Sir Arthur South, at the official opening of the Rosie Maternity Hospital. Mr David Robinson had agreed to give £2.9 million towards the cost but only on condition that it was completed by the end of 1983. But he wanted to appoint his own architect and builder. Government contracts usually took a long time to plan but this hospital was built probably faster than any other in the country 84 03 31 p1

1985 Mill Road £1M conversion announced for old peoples flats [13.11]

1985 routine tests for Aids begin, 4 patients get revolutionary new treatment [5.1,8.15]

1985 new child development centre opened [8.16]

1985 major shake-up of NHS management [5.3]

1985 new cancer-treatment machine [8.13]

1985 The Addenbrooke's Hospital cleaning row has now rumbled on for nine months. It started when some 150 health workers refused to work with a private cleaning firm which beat an in-house tender for the contract. Since then nurses and doctors have joined the picket line claiming cleaning standards have fallen below acceptable levels and operations have had to be delayed because of filthy conditions. But the firm insist they are doing a good job and that newspaper reports were biased. 85 06 26a

1985 Patients are having to bring their own bed linen to Addenbrooke's Hospital because a new laundry cannot cope. Some patients are lying on paper sheets and some doctors are doing their own laundry at home. One nurse said she had not seen any clean bed linen for three weeks. One man walked a mile home to bring his wife a proper pillow case. The centralised laundry at Fulbourn handles all the soiled linen; it does such massive amounts that get stuck in the system when the machines break down, an administrator said 85 10 03

1986 "quarter of beds at Addenbrooke's empty due cash shortage [[8.19]

1986 debate on future of Old Addenbrooke's, vote for demolition by made a Listed Building Brookfields : plans announced for £2M facelift to transform into centre for care of elderly & young disabled; ultimately 3 24-bed geriatric wards, 1 for mentally ill, 25-place day hospital & 24 places disabled on site; Fulbourn hospital alcoholics unit also to move sometime; to be finished by 1995 [12.5]

1986 Hope Nursing Home run sisters of Holy Family of Bordeaux, stop operations so concentrate on curing elderly; surgery since 1952 in Brooklands Ave [16.7]

1985 The Old Addenbrooke's Hospital site in Trumpington Street has been bought by Cambridge University for a record £5.75 million – double the expected price. This reflects nationwide interest in what is the last major site likely to become available in the central area. There had been a gentleman's agreement to give the university first refusal when the old hospital closed, but East Anglian Regional Health Authority decided to go out to tender. It will now be used for expanding university teaching, research and laboratory departments. 85 02 07

1986 The University's plans for the old Addenbrooke's Hospital site will see the former outpatients' department being converted to a restaurant. The main hospital block and some single-storey buildings will be demolished and replaced with a commercial car park, the private patients' wing let for commercial use and the nurses' buildings on Tennis Court Road used for student hostels. The southern half of the site will be redeveloped to house the departments of biotechnology, pharmacology and biochemistry 86 06 18b

1986 Midwife Phyllis Baker started as a trainee at Mill Road in 1940. Then the hospital mainly catered for geriatrics though there was a maternity ward which was full of pregnant evacuees. In 1958 she became a community midwife when a high percentage of deliveries were at home and mothers only went to hospital if there was something wrong. Mill Road is a very happy hospital

and she is happy to have been associated with it for so long. Now staff are compiling a photographic album of all the 2,001 babies she has delivered during her career 86 09 04

1986 The Evelyn Nursing Home, founded over 50 years ago, had brought its facilities up-to-date to match the increasing demand for private medicine. Its new Agnew House nurses' home won architectural awards, then came the provision of modern x-ray facilities and finally the building of a new operating theatre which has been used extensively by most local surgeons. Most operations are of a routine kind for which patients can wait a long time in the National Health Service. The majority of those on the waiting list are not incapacitated, merely inconvenienced. 86 09 16

1986 Old Addenbrooke's Hospital has been made a grade II listed building which means it cannot be pulled down without listed building consent from the city council. A copy of the notice under the Town and Country Planning Act has been sent to the University who want to demolish it, turn the site into a car park and later build extra space for bio-sciences. Their surveys have shown that £3½ million would have to be spent in just making good the structure and £650,000 needed just to keep the façade even if the main wards behind were demolished. Now dons are to vote on the issue. 86 11 05 vote to go ahead – 86 11 08 A major new car park could be built under the site of Old Addenbrooke's Hospital after Dons voted in favour of demolishing the buildings which they bought a year ago. – 86 11 10

1987 killer-bug at Addenbrooke's [8.22]

1987 plans expand Addenbrooke's from 800 to 1,300 beds by 2001 [NS.1.4]

1987 new £2.5M scanner, 1st kind Britain at varying magnetic field strengths; Duchess of York opens [CEN 15.9.87, 8.10.87]

1987 Addenbrooke's Hospital vision for the turn of the century – 87 06 12a

1987 When the Evelyn Hospital was officially opened in 1921 there were 12 beds. Today on its pleasant site off Trumpington Road, it has a total of 56 and last year admitted 3,012 patients. There have been many improvements recently including the Robinson Wing, built in 1983 with money donated by Sir David Robinson, a modern nurses home and a new operating theatre which opened in 1981. Each patient room has a telephone, colour television and all will soon have attractive en-suite bathrooms. 87 07 22 & a

1987 Addenbrooke's Hospital £1million cleaning contract has been a disaster, health chiefs admit. It led to the longest-running dispute in the hospital's history with health workers picketing the gates for 17 months in protest against cuts in cleaning time. One operation had to be cancelled when blood and bone fragments were found on a theatre floor. Cleaning is still not satisfactory in many areas and contractors have had problems recruiting staff on low wages. 87 12 16

1988 Cambridge scientist pioneers Aids treatment, kills the virus [CEN 1.12.88]

1988 University has withdrawn its application to demolish the historic main ward block of the disused Old Addenbrooke's Hospital. A £7 million research institute to be set up on another part of the site 88 02 12

1988 A major row is brewing over the future location of Papworth Hospital and its world-famous heart transplant programme. Health Chiefs are debating whether it should be closed completely or relocated to Cambridge or Huntingdon. The benefits of Addenbrooke's sophisticated support services have been overtaken by worries that an upsurge in university research-based medicine could adversely affect routine patient care. Whatever happens it will stay put for at least 10 years. 88 04 27

1988 'Honest' Paul Tippett was one of the first traders to set up shop at Addenbrooke's Hospital 15 years ago. Now he has taken over a new purpose-built supermarket on the main concourse. The shop has been designed to accommodate wheelchairs or patients coming in with their drip stands. It does them good to get out of the wards and back into the real world for a little while. Although Concourse Mini Market sells alcohol and medicines staff check with the patient's ward sister before supplying them. 88 12 21b & c

1989 Addenbrooke's establish psychiatric unit for 1st time ¢CEN 11.1.89

1989 The new shopping mall in the main concourse at Addenbrooke's Hospital is the first money-making venture to be undertaken by a joint NHS-private sector partnership. Under the deal the British Airport Services paid for the redevelopment in return for a five-year contract to manage the businesses on the site. The NHS is guaranteed income from a profit-sharing agreement with the 20 private commercial concerns which have taken space; they include a hairdresser's, florist, grocery store and cafeteria. It will be unveiled by the Health Secretary, Kenneth Clarke 89 01 05

Cambridgeshire Mental Welfare association founded 1908 as sub-cmte of Charity Organisation Society, affiliated National Association of Mental Health; at time about 30 backward children attending elementary schools might be helped by special teaching & only 3% people discharged mental homes became self-supporting 3 years later special class was begun by Education cmte which grown into Lady Adrian school 1914 a small home for high grade feeble minded boys of school age Littleton House was transferred from Uxbridge to Girton after 1913 Mental Deficiency Bill County council set up statutory committee for care of mentally defective Cmte amalgamated with new Cambs Voluntary Association for care of mentally defective formed under auspices county council; 1921 medical superintendent Cambs Mental hospital asked for reports on home conditions patients about to be discharged; this undertaken & name changed to Cambs voluntary association for mental welfare 1929 scheme for occupation & training centre opened 1958 Winston House half-way home opened 1961 sheltered workshop now lease home for women discharged mental home or hospital [14]

headlines

1908 Cambridgeshire Mental Welfare Association founded 1908 as sub-cmte of Cambridge Charity Organisation Society [7.3]

1911 There are a number of patients from Cambridgeshire in the Royal Eastern Counties' Institution for Idiots, Imbeciles and the Feeble-Minded at Colchester which started in 1859. Many patients were so crippled and helpless that they needed individual attention. The youngest was only four, the oldest 65 and they were of every grade. They reserved a number of beds for life

cases who remained on payment of £10 per annum. It was not merely a home but a training school where every ray of intelligence was welcomed. Older girls worked in the kitchen or laundry in the morning and then at basket work, rug making, cane-seating or on the knitting machine. Nearly 100 lads were employed in the basket, brush, tailor's or carpenter's shop or in wood carving. 11 05 12b

1911 There is no doubt that lunacy is steadily increasing owing to the strenuousness of modern conditions. The asylums were never so full as they are today. We have a higher sense of duty to those bereft of reason than obtained fifty years ago and place under restraint cases that would formerly have been allowed to be at large. Fulbourn Asylum is overcrowded and there is no accommodation for further nurses which is especially important as the female side is understaffed. Unless there is some decrease in the number of patients additional expansion will be necessary 11 12 01c

1913 The Cambridge Association for the Feeble-minded was formed in 1908 to gather information on the number of feeble-minded children in schools. It was difficult to find vacancies in suitable homes for special cases. Some were so far from Cambridge that parents were unwilling to send their children to them and had made application for the care and protection they were unable to give their mentally-deficient youngsters. The Eastern Counties Institution is the only one taking unimprovable imbeciles and idiots from this district and was already full with a long waiting list. So there was no alternative but a pauper lunatic asylum or the Workhouse 13 05 23 p05 CIP

1914 small home for high-grade feeble-minded boys of school age, Littleton House School transferred from Uxbridge to Cambridge [7.3]

1933 The Medical Superintendent reported a rather severe epidemic of influenza at Fulbourn Mental Hospital involving a large number of inmates and staff. The epidemic spread to the female side and 105 patients were affected, 30 dying. None of the staff died. The epidemic lasted nearly a month. The Visitors expressed their appreciation to the staff for the extra and hard work during a very trying time. 33 02 28b

1956 A new villa to accommodate 40 female patients at Fulbourn Mental Hospital was opened by the Minister of Health. It will be used as a social therapy unit. He referred to the 'terribly cramped conditions', saying 'if you had 900 villagers living like this you would say the Government must take immediate steps to put in right. That is the problem at Fulbourn and is typical of what is happening all over the country' 56 03 03b & d

1958 occupational centre for mentally handicapped children opened Coldham's Lane; plan to help youngsters in 1920s & under old Voluntary Mental Welfare Association small centre opened Hope St in 1929. Difficulties & not until 1942 that it divided into sections. 1948 County Council undertook running under National Health Services Act, became homeless but moved to St Giles Parish room & Castle End Mission [7.1]

1958 Winston House, county's first half-way house aimed at getting psychiatric patients back into community, house belongs SOS Society, London-based charity set up 1929 to help homeless. After WWII Cambridge streets full of destitute youngsters from homes broken by wartime upheaval, Cambridge Rotary Club approached SOS for help & between them opened Winston House; in 1958 changed roles from helping youngsters to helping mentally ill [7.7]

1958 A new Occupation Centre for mentally handicapped children was opened at Coldham's Lane to provide daytime accommodation for the youngsters and give their parents a respite from their responsibilities. A small centre had opened in Hope Street in 1929 under the old Voluntary

Mental Welfare Association. After the County Council took over responsibility in 1948 it moved to St Giles' parish rooms at Pound Hill. 58 10 24a & b

1959 Fulbourn and Riversfield Hospital Management Committee will 'not even think' of parting with their Riversfield Home for mentally defective children – in spite of the Ministry of Health suggesting that the 'reasonably small, accessible and fairly modern' home could be made into a useful hostel under changes proposed in the Mental Health Services. There was nowhere in the Eastern Region run so efficiently as this little place and until the Ministry can provide a place of similar comfort for these little ones, they will not think of parting with it. 59 03 23

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960s Cambridge Society Mentally Handicapped Children open residential home at Milton [7.2]

1960 Gone are the days of custodialism at Fulbourn Hospital; gone are the days of locked doors, padded rooms and ever-watchful gaolers. In their place has evolved an open hospital with a relaxed, homely atmosphere with no suggestion of the stigma which has at times been attached to it. Ten years ago there were few effective treatments for mental illnesses but now through various therapies and drugs even the most acute cases no longer need to be imprisoned under lock and key. In the Derby and Joan Club the elderly and most disturbed people spend the days playing dominoes, cards and board games while patients in the Ely Ward travel into Cambridge each morning to work 60 06 24a

1961 Winston House, an experiment in mental after-care in Brooklands Avenue, was opened in 1958 to provide temporary accommodation for those recovering from mental and nervous sickness and looking for permanent homes of their own. It can accommodate 23 people in a homely atmosphere and since January 1960 there has been a waiting list. Last year 48 people left the hostel, 26 of them having gained benefit from their stay. 61 03 02a

1962 The Cambridge Society for Mentally Handicapped Children, formed seven years ago, hopes to establish a residential home for those who are capable of an amount of self-help but need accommodation when their parents can no longer care for them. At present the only option is admission to a large hospital catering for all types of mental defect. The Society have purchased a large sombre-looking Victorian house in Milton which will be transformed with the careful use of colour to meet the best of modern standards. There will be a sheltered workshop for those capable of industrial work 62 02 23d

1975 Hester Adrian Centre to provide work facilities for both mentally & physically handicapped people opened [7.4]

1979 Forty per cent of Cambridge students are potential psychiatric cases, according to a report published by the Students' Union. There are a large number of reasons but whether Cambridge attracts people with a predisposition to mental illness or creates that illness once they arrive, the university has a responsibility to its students. The women in men's colleges are far more stressed

than their counterparts in single-sex colleges and the male students about to be introduced into Girton, the oldest women's college, could end up suffering a corresponding weight of stress. The report is bound to spark off controversy among dons. c79 05 21

1981 new home for mentally handicapped, 128 Suez Rd - Granta Housing Society, houses 7 people [7.5]

1981 new hostel for mentally handicapped, 41 Russell St for 18, Cambridgeshire Social Services Dept [7.6]

1983 Winston House in Cambridge, the country's first halfway house, has helped hundreds of people to get back into the community, some after more than 20 years in mental hospitals. Much of the impetus came from Dr David Clark, then psychiatric chief at Fulbourn Hospital. After the last war Cambridge streets were full of destitute youngsters, many from homes broken up in the wartime upheaval. Cambridge Rotary Club approached the SOS Society to see whether the help they were giving to London's bombed-out homeless could be extended and between them they opened Winston House. In 1958 it changed for helping youngsters to assisting the mentally ill 83 05 19 p9 88 05 20

1985 82 Russell St, joint Cambridge Housing Society & Mencap & Cambridgeshire Social Services, allow mentally handicapped independent life, opens [7.8]

1985 The Castle Project, which provides work experience for people who have mental health problems, has two workshops in Gwydir Street which are used for furniture repair, printing and painting. There are 20 craftworkers using the facilities and manufacturing toys, small furniture and plastic signs. Cambridge's Mayor, Jim Johnson, and local councillors inspected the facilities to see work which people in need of rehabilitation can do. The Project has been disappointed not to receive any Urban Aid grant but hope the city council could assist with finances. 85 05 29

1989 Douglas House, Cambridge's 'slum' psychiatric unit for disturbed teenagers with its crumbling décor, cell-like rooms and graffiti-covered walls is to be closed down. A new unit will be built on the corner of the Robinson Way entrance to Addenbrooke's Hospital with proper facilities specifically designed for their needs. 89 02 15a

1989 Winston House in Brooklands Avenue, established in 1959, is a psychiatric rehabilitation centre owned by the SOS charity. There are 20 residents staying on average a year with care and advice on hand all day. All are encouraged to lead a full life and to do something constructive outside the house. But privacy is a problem in the 13-bedroomed house and an appeal has been launched to provide more single rooms and larger kitchens. 89 05 19b

Farmers' protest rally on Parker's Piece, 1930

104.12

1897

In Cherryhinton-road, Cambridge, and in close proximity to the Cattle Market, Mr Henry Day has erected a new flour mill. The building is compact, the three floors are occupied by a most interesting system of machinery. Needless to say the plant is of the most up-to-date character. It has been fitted to produce one sack per hour. Mr Day expressed his confidence that he had some of the very best wheat obtainable. He enters the open market with every determination to succeed c1897 04 10

1900 The Vice Chancellor of Cambridge University has published a letter received from Mr Macfarlane-Grieve of Impington Park. "I have watched the successive efforts of the University to help the teaching of agriculture on an intelligently scientific basis since 1893. It would be a distinction for Cambridge to be the first to found a University School of Agriculture. A Professor of Agriculture without a farm, conducted on both model and experimental lines wherewith to illustrate his teaching, is like a Professor of Chemistry without a laboratory. A farm on this estate will fall vacant at Michaelmas and I am prepared to offer it to the University rent free till 1909". The Senate has accepted the offer with thanks c00 01 16

1906 Burwell is included in a Government scheme for colonising England by offering vacant Crown land to smallholders. A start has been made with a farm of 916 acres which is being cut up into parcels of between two and twenty acres and let to the Cambs Small Holders Association. There are some excellent cottages, two farmhouses and farm buildings and these are being allotted to the new tenants who will enter upon their holdings at Michaelmas. 06 08 03

1911 The strike of Norfolk farm labourers, which has been waged since May last, has now ended. Thirty-three men returned to work on the same terms as they had come out, leaving 42 to be dealt with. It is feared the farmers will not take some of them back. The men's union had recommended acceptance of the farmers' terms and decided to withhold further strike pay. They had received thirteen shillings for working six days a week from 6am to 6pm with half an hour for breakfast and two hours rest in the middle of the day. Strike-breakers had been secured secured from Norwich and Cambridge, hence the protracted nature of the struggle. 11 01 13i

1913 Eglantyne Jebb told a meeting that farming was in a very unsatisfactory state and a great deal of land was now waste. Since 1881 the population had increased by a quarter but the number of agricultural labourers had decreased by more than a quarter. Country children fell victim to diseases due to ill-nourishment caused by the bad condition of cottages and the evil of low pay. Wages were better in areas where there were factories to add competition for workforce 13 12 05 p4 CUP

1914 The farm labourers strike is continuing and in view of the nearness of the harvest steps are being taken to import labour. Mr Webb of Streetly End has charge of recruiting and has been to Cambridge on market days endeavouring to secure 150 men, offering £8 a month plus lodgings. All classes of men are being taken on. At Weston Colville practically all workers reconsidered their decision and accepted the harvest upon the terms offered. But then they were advised by a Union official and again 'downed tools' leaving farmers with only a dozen hands between them. On Wednesday many of the strikers were enjoying a game of cricket 14 07 24

1914 The first batch of imported labourers left Cambridge when eight men travelled to Walter Price's farm at Rylands, Steeple Bumpstead. The news soon spread and the premises became the centre of demonstration by striking farm labourers. The occupation of a tenement near the estate was resented and the tiles and windows were smashed. The demonstrations continued next day, the strikers booing and shouting outside the gates which were guarded by police 14 07 31

- 1917 Motor ploughing demonstration at University Farm – ploughs with motor power directly attached to them; ladies being trained for farm-gangers; will plough, sow seed and harvest the grain but will take it to market in a train of wagons – 17 03 14c, photo 17 03 14d
- 1919 Women’s Land Army demobilisation conference at Cambridge; National Association of Land Women set up as successor and to assist in agriculture – 19 12 03b
- 1920 County Agricultural Committee takes over duties of War Agricultural Executive Council, had promised men in trenches would be fixed up with land when war over; the men who were disabled and came out of the army first had been set up on the land according to the quantity they applied for, the men who left later would not get what they wanted - CDN 20 10 01
- 1920 Tile drainage difficult – young men have had enough of digging trenches – now American machine demonstrated at Croxton Park – Ch 20 09 01a; photos 29 09 08a
- 1922 Mr Lloyd George’s tour in the rain of some of the Cambridgeshire smallholdings was evidence of his anxiety to gain first-hand knowledge of the problems faced on the land today. He described as “marvellous” the development of the holding of Mr David Easy, who started with three-quarters of an acre and now has 200 acres and a herd of 30 cows. Tea, taken at Mr Street’s farm at Landbeach was “like a family party” and Mr Lloyd George found considerable interest that some of the articles placed before him for consumption were home grown or home made. The tour continued to Cottenham and Willingham. c09 08 27
- 1922 The great agricultural city on the Trumpington-road (the Royal Show) is in full blast today - in more senses than one. A stiff south-westerly gale had been sweeping over the show ground for the greater part of last night and it continued with unabated strength during the day. The tents and shedding for the most part withstood the gale remarkably well but a dozen of the larger structure were blown down wholly or in part and the Mayor’s tent was levelled to the ground. In the latter a man was sleeping but escaped unhurt, although the circumstances gave rise to an erroneous rumour that a man had been killed c22 07 08
- 1931 The National Tithepayers Association protested against what is widely regarded as an unjust tax on agricultural land. Owen Webb said the tithe was a burden impossible for the land to carry. During these difficult times of depression, when farmers were struggling to keep their heads above water in the face of terrible drops in commodity and grain prices it was an inverted food tax on the industry; there was no justification from an economic or religious point of view 31 04 03c & d
- 1933 A state of armed neutrality exists on the title ‘battlefield’ of Woodlands Farm, Ringshall near Stowmarket. Fascists are camped in the farmyard while a bailiff is in possession of two cornfields on the farm. The owner owes £47 to King’s College for tithe and fields of wheat and barley have been seized for which tenders have been invited. Police are on constant duty while the fascists watch the approaching roads for signs of approaching cutting machinery. They have chalked messages on the road which read ‘Farmers, Unite Now’ 33 08 09

1934 Eighteen 'Blackshirts' were arrested on farms at Wortham, Suffolk by 50 police who arrived in large double-decker motor buses. The 'Blackshirts' were outside the farm gates and were arrested peacefully without any resistance. They have been at the farm for several days 'guarding' cattle and sheep which were impounded for tithe and a crowd of spectators cheered them as they left. Other Fascists were instructed to withdraw from a farm at Diss where their steel-protected cars have been keeping a watch-out for a van expected to remove animals 34 02 17 34 02 20 34 02 21 trial – 34 02 26

1935 Over 3,000 farmers and workers attended an open-air demonstration at Ely to protest against the abandonment of State assistance to the sugar beet industry. It would mean disaster for agriculture. Without beet the eastern half of England would have fallen into desolation and become another distressed area. The 18 factories had installed machinery which consumed no less than three million tons of coal and coke as well as over one million tons of limestone and no fewer than 65 million bags. The cost of the industry had been worth it to the nation as money would otherwise have been spent on dole and poor relief. 35 06 03 & a

1936 Byelaws that prevented children doing agricultural work for more than four hours a day during school holidays were a hardship for farmers – they could not even employ their own sons to help with the harvest. But one 13-year old boy had worked in the harvest field from eight in the morning to eight at night, six days a week, for a full harvest, and was paid the magnificent sum of twelve shillings. The farmer did not put his own children in the harvest field – would they allow their own children to do that? Councillors agreed to allow children to be employed in light agricultural work, not involving heavy strain, for up to nine hours during the summer holidays. 36 03 06b

1936 The Tithe Bill now before Parliament would alter tithe from being a charge on the land to a charge on the person. This meant a man could be distained on his household goods and everything else to pay tithe dues. The burden of tithe should rest on the broad shoulders of the large landowners, but it had now been put on those who had not the shoulders and could not bear it, Cambridgeshire farmers were told. If they owe money fairly and squarely, they are prepared to pay. But they are not going to pay unjust taxes, a meeting resolved 36 06 08 & a

1951 Cambridgeshire education committee decided by a single vote that schoolchildren might once again be released for agricultural work this year. Mr A.R. Greenslade, a farmer, said agriculture had had the help of schoolchildren for centuries. They were already taken to do carpentry, metalwork and gardening. Mrs Rackham said they had been stopped from working in the Isle of Ely and Huntingdonshire. Dr R.F. Rattray thought it very desirable for children to help on the land. They should have experience of doing real work in the interest of the country & great educational advantage would be accrued. Others said there was no evidence that their services were required. "They will all apply to work in the fields and it is going to throw our schools into a state of upheaval", said Mr S.A. Martin c51 06 26

1951 Cambridgeshire Education Committee has decided to allow schoolchildren to help in the corn harvest and the forthcoming potato harvest "as a last resort and where acute local need justifies its use". They are prepared to grant up to 10 half-days to children of 14 years of age and over. It seems likely "acute local need" will arise for the position of Cambridgeshire's harvest is now becoming serious. Most of the spring-grown barley and wheat is not yet fit for harvesting

due to the six week's late drilling and the cold, wet weather of August. One disturbing feature is the increasing signs of blight in the potato crop c51 09 18

1952 The National Farmers Union Owen Webb committee is anxious to purchase City council premises at Gresham Road, Cambridge, to form a headquarters for all the agricultural interests in the county. Cambridge was the centre of the agricultural belt and the headquarters of the farming fraternity should be in a place other than their present miserable and dingy offices in Corn Exchange Street. It would not affect the Council's housing programme one jot. If the building were converted into flats the rent would be such that no one waiting for a Council house could afford it. c52 07 25

1956 Arbury Rd rapidly growing ... Arbury Camp farm the central pedigree poultry farm of Chivers Farms, established 40 years [446..8.5]

1956 Cambridgeshire Agricultural Society was formed in 1863 and held its first show in a field between St Paul's Church and Station Road, Cambridge. Today the County Show requires 70 acres of land with covered accommodation for stock, displays and catering to cope with an attendance of some 20,000 people a day. Apart from 1924 when there was an outbreak of foot and mouth disease it has been held every year except during the wars and when the Royal Show was held in Cambridge in 1894, 1922 and 1951. It is a shop window for agriculture and enables the farmer to keep abreast of modern developments in mechanisation. 56 05 23a

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 There was a damp welcome for early visitors to the Royal Show at Trumpington. But those who ventured out stared at the sheep, peered at the pigs and commented on the cattle and horses being paraded in the Grand Ring. In the Demonstration Area six red hot forges, each manned by two blacksmiths, were busy fitting horses with new shoes. One of the strangest sights was of farmers standing in the pouring rain watching demonstrations of artificial irrigation machines pumping gallons of water on grass already soaked by overnight rain. 60 07 05

1961 Royal Show site at Trumpington being prepared – 61 04 07c

1973 The fens were yesterday swept by the most severe blow this spring, as high winds picked up the lighter peats in the Soham, Stretham and Mepal district, uprooting new sown crops of beet and carrots, which are particularly vulnerable. The blow appeared to be widespread and raged for several hours. There have been two blows so far this spring but neither has caused widespread damage. Last year, more than 10,000 acres of sugar beet had to be replanted after a blow at roughly the same time. A Soham farmer, Mr Guy Shropshire has been using a prototype machine which "plants" straw between vegetable rows to prevent wind damage on his 1,000-acre farm c73 05 18

1911 French's road mill did not get much wind, converted steam ... had sails & rural 1911
[446.12.2]

1956 The old brick windmill in Hurst Park Avenue was built in 1855 by J.M. Mann and ended its working days some 60 years ago when the sails were removed. The mill was last operated by William French from Hildersham whose family have been millers for four generations. It is now used as storage by S.A. Rose, the butcher, whose slaughterhouse once stood close by. 56 09 06

1957 Highworth Ave windmill disappears [446.13.4]

1986 French's Mill was built on a high point in Chesterton in 1847 by William Beart. It was a wooden-walled smock mill but didn't catch enough wind, so it was jacked up and an eight-sided brick base added. But it was still not satisfactory so in 1868 William French converted it to run on steam power. Later the sails were removed and gas engines installed, to be replaced by diesel 14 years later. At its peak small bakers used the it regularly but when the adjoining land was taken as playing fields for St Peter's School it looked as if the mill was doomed. Now it has begun a new life as an office suite and the surrounding buildings house ten other small companies playing their part in the technology boom 86 08 28

1899

A fatality occurred today. The scene of the accident was the new stores being erected in Burleigh Street, Cambridge for the Co-operative Company. The outer walls have been built up and the workmen are engaged on the interior. One scaffolder, named Thomas Filby, aged 60, was engaged on the scaffolding erected above the top floor. He fell sheer into the basement on to a heap of broken brick. Before he lapsed into a state of utter insensibility he was heard to murmur, "It's all up" - 1899 07 17

1901

An outbreak of fire occurred at the works of the Cambridge Brick Company, situated between Coldham Lane and Newmarket Road on the outskirts of the densely populated district of Barnwell. The fire attracted large crowds and the flames, aided by a gentle breeze, spread rapidly, soon mounting in the air a distance of about a hundred feet. In just over two hours everything had yielded to the flames and all that remained was the damaged and broken parts of the valuable machinery. Fortunately the conflagration was confined to the corrugated iron roofed wooden building covering the machinery or the entire works could easily scarcely have escaped destruction CDN 1901 02 18

1902

Death of Francis Thoday, builder [1.7]

1902

Sir – Is Cambridge becoming overbuilt? As one looks around it is palpable that many of the recent erections of new houses is hardly the result of demand, but of speculation. Its effect must be the deterioration of older properties, and wasted energy and capital in the newer. The census shows the population to be moving slowly and the demand for new properties correspondingly small. To see a town dotted over with properties "to let" has a dispiriting effect to strangers and residents alike, and more especially to those whose capital must be sunk in them – Observer CDN 1902 08 21

1902

The growth of the population in Cambridge is not keeping pace with the building of houses and in various parts many houses are constantly empty. But the absence of overcrowding is in the highest degree beneficial, not only to public health, but to the public morals as well. The housing problem is one of the most difficult of the day and the proportion of income which has to be paid as rent by artisans in the neighbourhood of London is so great as to make the problem of obtaining sufficient food almost insoluble. It is to be hoped that such a state of things will never exist in Cambridge CDN 1902 08 25

1903

Cambridge Borough has had its pride wounded by the London Express charging it with having incurable slums and possessing filthier homes than Whitechapel. In reply Mr Campkin, a Guardian said: "There is no doubt there is an amount of poverty and squalor in Cambridge but there has been a vast improvement in the St Matthew's district over the last 40 years. There is evidence of the effects of drink in some parts of the town but in the Romsey and Petersfield district the residents are respectable working people" c03 08 07

1903

Commenting on the Cambridge slums Dr Roper said: "I think even the very worst are fast becoming demolished; take St Peter's Court, Castle Street, they are pulling that down. In consequence that there are large families in the poor quarters a woman very often has to go out and work as well as her husband to keep things going, and they can't keep their houses quite so clean as they otherwise might. In New Street you will not see much dirt or dilapidation, though in summer time the people are sitting outside nearly half-dressed in consequence of the heat. But their homes are not so bad as you might imagine". c03 08 08

1903

The recent completion of the Atlas Stone Company works at Coldham's Lane will add to the industrial importance of the Romsey Town and Cherry Hinton districts of Cambridge. A complete plant for the manufacture of artificial paving slabs on the most up-to-date principles has been installed with a hydraulic press capable of 500 slabs per day worked by electric power. The chief market is in London and the Eastern Counties where the value of artificial flags for footways has been firmly established. c03 11 06

Building trade in Cambridge is comparatively slack just now as suburban expansion on any large scale has ceased. Six months ago there was considerable activity in the Newnham district and on the Central Estate where a large number of houses sprang up suddenly. Then there was an extension of New Cherryhinton through the erection of many houses on the Hills Road. It is now planned to open up a building estate by cutting an avenue from Hills Road to the Trumpington Road. 06 09 08c [3.21]

1906

Collins Passage, off Northampton Street, consisted of a number of very dilapidated houses closely packed together. They had low ceilings and the floor was insecure. There was no ventilation behind and a high brick wall at the front so they got no sun at all except for half-an-hour at the height of summer. They were unfit for human habitation. A good many other premises in the area were defective but did not justify wholesale demolition. 06 04 19c

1906

Any clerk or artisan with £25 can become the owner of a well-built convenient house just outside the borough boundary in Grantchester within ten minutes' walk of Market Hill. The houses contain eight good rooms with bathroom, 2 w.c.'s and nice garden. Gas and water laid on. The price is £250 and the balance can be spread over any number of years to suit the purchaser's convenience – E. Parcell & co., Builders, Newnham – advert. 06 07 12a

1907

Cambridge councillors recommended that a site in Albion Row occupied by the weigh-bridge and the Nag's Head should be offered on a building lease for 75 years and in case no satisfactory offer was received they should prepare a scheme for the erection of cottages. But first they must adopt the Housing of the Working Classes Act. 07 08 08

1907

Cottages in Cave's Yard, Union Road, Chesterton, are as about as bad as any in the district, an inquest into an infant was told. Vermin found on the child's body were not the fault of the mother: it would be impossible to keep such a house in that district free from vermin; the district ought to be burnt down. The slums in Old Chesterton are as bad as any you will find in London, a doctor testified. But people had to live somewhere. 07 10 17

1908

The Cambridge Railway Building Works, better known as the firm of William Saint and Sons, entertained 170 employees to dinner at the Lion Hotel. It started in 1880 and the first job was two villas on Mill Road, later came the Cattle Market contract but Westminster College, in 1900 was the largest project they had ever tackled. They were known for the quality and execution of their work which was due to men such as Vigers, Hodson, Coe, Willmott, Taylor, Lobb and Haynes. 07 12 31 & a

Average Cambridge builder omits bathroom in otherwise tolerable house - whole streets of new houses without a bathroom amongst them" 10 02 12 [4.5]

1910

"Very few plans of cheap homes passed, other property being condemned so working people go outside the Borough for housing & need bicycles to get to work" 10 07 09 [4.6, 4.23]

1910

Luke Hosegood, the Master, told Guardians there were 26 children in Cambridge workhouse. A large number of men had brought in their wives and families simply because they had been evicted from their houses as the result of slum clearance. There were several cases from Cambridge Place and a number from Castle End and if they went in at this rate all Castle End would be pauperised soon. It was getting a very serious matter. 10 02 04g

1910

It was incredible to hear of the conditions that existed in Barnwell, said the Rev Gwinn. There was one road which in winter was almost knee-deep in mud. The children could not step from their doors without going ankle-deep and always went to school wet-footed. Five children in that street had been taken away with scarlet fever recently, partly owing to the sanitary arrangements and partly due to the stuff that was thrown out into the road. There was another street of 11 houses – or rather hovels – containing only two rooms apiece. In one of these lived seven people CWN 10 03 04f & g & h

1911

Model houses Castle End snapped up, but have pulled down more old than put up new & former residents live in the Workhouse; ought to build cheap houses but so many new byelaws it cannot be done 11 09 30 [6.1]

1911

Cyril Ridgeon builders formed [8.3]

1911

The Storey's Charity Estate occupies one of the most elevated and healthy positions in Cambridge. The greater portion of the sites front the new road known as Storey's Way which is likely to become a major thoroughfare between Huntingdon & Madingley roads. Gas, water and electric light mains are laid on. Given its proximity to the Backs of the Colleges it should become one of the most popular residential estates in the neighbourhood. Judging from the interest the plots should be readily disposed of. 11 06 02c

1912

It was wicked for the council to pull down insanitary houses without building cottages for the people displaced. Where were the people turned out to go? Landlords were getting twelve shilling a week for a cottage divided up amongst seven families. In one house there were five occupiers of six rooms, one family having two and the others one room each. They each paid four-shillings a week whereas the normal rent was only three shillings, councillors were told. 12 03 29d & e
slum demolition means 4 families in 1 house, thus 10/- to 12/- (50 - 60p) paid per week for 2/9 (14p) cottage [4.8]

1912

Sanction to spend £1,600 on working-class dwellings Stanley Road site [4.9]

1912

Poorer Cambridge used to house itself in courts tucked away behind the streets. Some of them are now mere empty sites from which the wretched buildings have been cleared away. They are not even building sites. The requisite amount of space under the present laws is lacking even for one dwelling where they may perhaps have been half a dozen. Others contain old cottages which will come down when others can be built for the occupants. In the meantime disposed families herd in with other families. The Borough Council have applied for a loan to provide new dwellings but the amount of bricks and mortar bears no proportion to that applied to the University 12 06 28

1912

A serious case of overcrowding was reported at a lodging house at 57 Fitzroy Street. The Medical Officer said there were four rooms, two of which were bedrooms. The front sitting room was used as a bedroom by night. It was occupied by the owner, his wife and five-month-old baby, a man and 10-year-old daughter and Mr & Mrs Smith with two girls aged 14 & 12 and three boys of seven, five and two years. Such overcrowding was injurious to the people and a danger to neighbours as infectious diseases could easily spread 12 12 27c

1913

A serious crisis has occurred in the building trade in Cambridge owing to the men's dissatisfaction with the present working conditions. Negotiations have been going on between the Amalgamated Society of Carpenters and Joiners and the Master Builders' Association but without agreement. Among the demands is for walking time allowed to jobs to be paid at twenty minutes a mile and not less than 3s 6d for lodgings. Wages should be 9d per hour (£3.66 at today's values). Now a strike will start on Monday. 13 07 25 p7 CIP

1913

1913

Cottages were recently erected under the Housing of Working Classes Act in Stanley Road. One block of 12 tenements for old people consists of a living room with bed recess, scullery, larder and w.c.. Costs were higher than expected due to problems with the foundations meaning rents had to be higher. No ordinary person would have built such horrible houses. But they had been erected as an experiment to see what was needed and been successful, councillors heard. 13 11 21 p7 CIP

1914

It is with deep regret we record the death of ex-Alderman George Kett, J.P. It was only in November he resigned his council seat after long and valued service, having been Mayor three times. The firm of Rattee & Kett, ecclesiastical builders was founded in 1854 and he became head on the death of his father in 1872. The Catholic Church was erected under his direction but the

work of his life was the restoration of Arundel Castle where 400-500 men were employed at one time. He retired in 1904 and his son, G.R. Kett is now head of the firm 14 05 08f [1.26]

Housing Difficulty - plans for the erection of six roomed cottages on the Victoria Road estate. The estimated cost of the houses will be £200 each. The Stanley Road experiment in the erection of cottages was criticised and to invite offers for the lease of the ground in Stanley Road for a term of 75 years. 14 04 24 CIPof

1914

Cambridge Town Planning Committee had been in existence only a few months and had not yet decided anything in the way of town planning or building houses, the Mayor told a conference on Rural Housing. The Public Health Committee had erected dwellings for the poorer class in one part of town, some people thought them ideal and some otherwise. Some of the houses he would be sorry to lose from an antiquarian point of view but others, from a public health point of view, they would be exceedingly glad to lose 14 03 27, aa

1914

It would be fatal to erect houses in Cambridge without a parlour. It was the place where the family relics were kept and was needed when daughters started courting. They wanted to end the building of brick boxes with slate lids on them, but builders were the most conservative people on the face of the earth. If they were going to put baths in at great expense they would do more harm than good, said Mr Campkin. But people were rapidly realising the amenity of the bath and were using it properly, said others. 14 03 27aa

1914

The whole of the Watts' Timber Yard on Newmarket Road., including sawmills, drying sheds and kilns were destroyed by fire. The blaze started in the stoke hole from which flames spread to the engine room and brick-making shed adjoining. The saw-mill nearby, containing a lot of wood, was soon alight and the wind blowing from Newmarket Road swept the blaze to the drying sheds and kilns where workmen removed the bricks. The tall chimney was expected to fall at any moment but the gable end of the saw-mill fell outwards, just missing firemen standing beneath it. However sheds holding valuable stock of flooring boards were put out. 14 07 24

1915

A mysterious outbreak of fire in the boiler house and blacksmith's of the Stourbridge Brick Co. Newmarket Road (Cambridge) on Thursday evening resulted in injury to a fireman and the total destruction of a large portion of the premises concerned. So far as can be ascertained, no one was working on the premises after 5 p.m, and the outbreak was discovered by the foreman Mr James Ingle, at 7,30 p.m. The Fire Brigade were telephoned and when they arrived with the motor escape and tender, the flames had got a grip on the buildings. Shortly after, the engine arrived. The roofs of the blacksmith's shop and the boiler house were burnt off and practically the whole of the contents of the building destroyed. Fireman Papworth, of the Cambridge Fire Brigade had a narrow escape. On entering a burning room, he fell into a deep pit, but fortunately sustained only slight bruises. The premises, we understand, were not insured 15 11 10 CIPof

1922

At the Cambridge Housing Committee meeting Mrs Rackham said that there were 430 marriages in the borough during the year, and only 72 new houses were built. They were also told that there would have been more marriages had it not been for the housing difficulty. In 116 homes in which babies were born there was overcrowding to the extent, in some cases, of six or seven persons per bedroom. Before the war they used to talk of legal overcrowding as two persons in a room. Then there was some hope of getting the matter put right, but now there was none - 22 05 19

1923

'Unassisted' housing scheme : 878 new dwellings required - 615 for the homeless & to replace First Eastern General Hospital huts & 263 to replace slums [2.4]

1923

Coleridge Road under construction [4.15]

1923

Housing Committee recommend 239 houses in Chesterton Road & Milton Road at cost of £101,000 no private building - only 61 houses for working people built since 1919 & most of these owner-occupied; pre-war 168 houses per year houses to let very rare - over 100 applications for one advertised at £40 per annum 23 08 18 [4.3]

1923

A recommendation that a subsidy equivalent to £8 per house for 20 years be given to induce private enterprise to proceed with the erection of houses was carried by Cambridge town council. Councillor Few thought those who built would take advantage of the law of supply and demand. Only last week a case occurred of a landlord of a house in Romsey town raising the rent from 7s.9d. to 14s.9d. when the father died, declaring that the house had become vacant and telling the daughter she could have it at the increased rent – nearly 100% advance c23 12 16

1924

Cambridge must face the growing danger and disaster of its housing shortage. In our not very large town between 7 and 800 families are in immediate need of a house, not because they are unemployed, or very poor, or in any way unable to pay a fair rent, but because there are no houses for them to go into. Families are divided. The husband is here where his work lies, the wife and children are living elsewhere. Some dare not have children. Others have them and find that they are no longer welcome tenants. It is not easy for a young wife and mother to make good when her two rooms are rented and when the use of the kitchen, bathroom and lavatory by her family are looked upon as an intrusion c24 01 11

1924

Cambridge council heard that 240 slum houses still remained and none had been treated except where the structural condition was so unsafe that the buildings had to be abandoned. The slums were getting worse and worse and there was no means of cleaning them. Some small cottages should be built to relieve the pressure so there might be transition from houses which were quite unfit for human habitation. But if they built such houses they would later have to spend money on

sanatorium treatment. There would be no room for air space, and they would be a disgrace to Cambridge c24 02 09

1924

An inquest was held on a 57-year-old general labourer, in the employ of the Cambridge Brick Company, who died as a result of injuries received in a fall of earth. Charles Peters, 62, said he was working some nine feet from the deceased in a clay pit. He was picking and the deceased was filling trucks. The front fell off from the face of the pit, two tons fell. Not three minutes before the accident he had examined the top of the pit. There were two sets of railways and the clay fell between these two. The work had been carried on for many years and all were fully alive to what might happen c24 05 04

1924

The death occurred at his residence, Devonshire Road, Cambridge of Mr William Saint. Born at St Ives in 1851 he came to Cambridge and started business as a builder in Hooper Street. In 1888 he transferred to St Barnabas Road where the present works are situated and in 1918 it was turned into a limited company. A flourishing concern has now been built up, but the builders' strike in the early months of this year had a serious effect and gave him a great deal of worry & hastened his end c24 11 24

1924

Cambridge Council have asked the Ministry of Health if they are prepared to grant a subsidy in respect of wooden houses. Coun. Stubbs asked if they intended to build the workers wooden rabbit hutches to live in. Coun. Briggs said it was a retrograde matter, they ought never to touch such a thing as wooden houses in 1924. Councillor Ambrose said they were not putting houses up because they had not the men to put them up. There were rows of houses waiting for men to come along and finish them off. If they put up a wooden frame construction they would do any amount of good c24 12 07

1925

The acquisition by Jesus College of the old Newmarket Railway has enabled them to develop the Station building estate by the construction of Coleridge Road, and they are offering freehold land in suitable plots for the erection of private dwelling houses in open and healthy surroundings, with ample garden ground. Coleridge Road has been constructed by the college at great expense & is the first in Cambridge constructed of reinforced concrete. Lots are offered at prices from £225 to £250. 25 07 17 c

1926

Coun Few said they were very proud of the houses they had built in Vinery Road and Coleridge Road, but they were now proposing to build houses that in a few years would become a slum area. They would be spoiling Cambridge if they built non-parlour houses with only one living room. They ought to consider the women who had to live in those houses. "We men only pop in and pop out, as it were, we are only lodgers; it is our working women who have to put up with them all the time. I call that type of house unfit for human being to live in as far as the wife and children are concerned", he said c26 02 07

1926

Cambridge Women's Housing Association has been formed to assist in the supply of houses for the town and, in particular, to meet the urgent demand for the provision of more housing accommodation at an economic rent for the educated woman worker and others. It proposes to purchase suitable houses and convert them into self-contained flats of one, two or three rooms with kitchenettes. At a later stage it is hoped to build a residential club. Already nearly £1,000 has been subscribed c26 09 20

1927

Corporation sell houses on Milton Road & Coldham's Lane for £5 down & the balance in weekly instalments - Milton Road cost £579 repayable at 21/1 (£1.05) for 2 years & 17/- (85p) for 18 years (rates 3/- (15p) a week. "Those who can afford to pay such amounts to contact Treasurer" 27 12 17 [3.14]

1927

Cambridge Housing Society founded to provide housing to rent for larger families unable afford council houses, first scheme 22 terraced 3-bed houses Green End road completed 1928 & let at 7/3 (36p) a week; other building Montreal Square, Hobart Rd & French's road, Ditton Walk; part of campaign against slums [1.22,2.12,6.3]

1927

New Chesterton Hall Estate called a 'charming place'; green verges along Milton Road collect the dust caused by cars on road on windy days and are being introduced throughout the town 27 05 16 [3.12]

1927

The newly-formed Cambridge Housing Society has lost little time in getting to work. It has obtained a site in Green End Road, Cambridge and plans for 22 houses have been approved. The houses are to cost about £420 each and are to be let at a weekly rental of 5s.6d. It is hoped to have them complete by September. c27 02 19

1927

"I feel it should be the utmost endeavour to get townspeople now existing in Burrell's Walk out of those hutments and into council houses with the greatest expediency", said A.C. Taylor, the Independent candidate in the Castle Ward by-election. He was gravely concerned with the sanitary conditions of the place and while the huts served a very useful purpose years ago they were never intended to be permanent abodes of civil population. There were some worse cases in Cambridge but for young people with families the cramped conditions and colourless surroundings did not make for the bringing up of bright, healthy children. CDN c25.4.1927

1928

Tablet on house in Montreal Square as this the 45th house erected by Cambridge Housing Society [2.13]

1928

Cambridge Preservation Society founded due to concern over unregulated development [4.1]

1928

Cambridge borough council considered plans from the Cambridge Estates Ltd for the construction of roads and sewers on the Hurst Park Estate which has an acreage of 30 acres, nine being in Cambridge and 21 in the parish of Impington. It is proposed to erect approximately 190 houses. Ald Raynes thought the public who were considering purchasing plots should be fully aware of what they were doing. Only a small portion of the estate was within Cambridge and the rest was in the Chesterton Rural District Council's area who did not have a single bylaw affecting buildings or the construction of roads c28 02 06

1928

The first annual report of the Cambridge Housing Society shows they have built 22 houses at Green End Road to be let at an average rent of 5s.6d. per week. Twenty-two families with 91 children are accommodated and thus given the chance of growing up in healthy surroundings in houses with three bedrooms, modern sanitation and good gardens. But there are still problems of providing modern houses for poor families at rents they can reasonably afford c28 02 14

1929

Cambridge Councillors considered erecting 50 houses of a type within the pecuniary means of the people who would have to be moved from insanitary houses. In some places eight people were living in a single room under exceptional circumstances of poverty. But a man might say 'I am paying 3s. 6d. a week for two rooms and I cannot afford any more'. So what type of house was going to be built? In some of the houses there were elderly people and moving them perhaps two miles would be quite out of the question.c29 01 21

Cambridge slums – 31 02 20b

1931

Mr J. Sainsbury, head of the famous provision firm, opened a new residential club that will accommodate 15 young men. In a place like Cambridge it is difficult for a young man to get lodgings and this large house in Brooklands's Avenue has been modernised and redecorated and is a model of its kind. The bedrooms, which have two beds, have a wardrobe and cupboard for each occupant; it has a room with facilities for games and reading and dispels any gloomy feeling about what used to be called 'living in'. There were few local firms who had made such provision for their staff. Many firms had a contributory pension scheme but they had decided against such a scheme. 30 04 03k

1931

A Cambridge builder was granted possession of a cottage at Mill End, Cherry Hinton. He had purchased it three years ago when the occupant paid 2s 9d a week. That man had left but there were now nine people living there in just a living room and kind of kitchen with a bedroom and a lean-to on the landing above. It was in a very bad state and he intended to carry out improvements; it should not have been re-let until in proper repair. 31 04 24f

1931

The new road under construction between Milton and Histon Roads provides some exceptionally attractive sites for those wishing to erect a private house. It has much to recommend it as Chesterton is a very popular district but most of the available land within a reasonable distance of town has already been taken up. The plots are for the erection of private dwellings only and no bungalows or inadequate houses can be erected. 31 06 12k

“This is a time to spend ...” get local cash flowing as an aid to unemployment; “buy new clothes, furniture or extra food. Have your house decorated or painted. A prompt response to this appeal will lift thousands of homes from misery into happiness by Christmas [32.1]

1932

A Ram Yard plumber told Cambridge bankruptcy court he had been successful until 1929 but due to the trade depression he could not get sufficient work and certain customers did not pay. He built a house in Belvoir Road for his own occupation with the very best plumbing and if this sold for £1,100 he could repay his creditors 32 01 21

1932

St Andrew’s Court, off St Andrew’s Street, was a disgraceful place in the centre of Cambridge. It was not only an eye-sore, but dangerous. Properties were dark, damp, reeking with age and decay. The houses were not fit for human habitation, children under school-leaving age will not be permitted to live there – but what of young mothers and old people? Such slums should be demolished, the Medical Officer urged 32 02 26

1932

Described by its builders and furnishers as ‘the ideal home at the ideal price on the ideal terms’ there is a newly built house in King’s Hedges Road which all prospective purchasers should inspect. With two receptions, three bedrooms, a bathroom and large garden it is on sale at the remarkably reasonable price of £625 freehold or for £35 deposit and 19/6 (97p) weekly. Robert Sayle has completely furnished it at a price of £140.10s. Lucky will be the wife whose husband presents her with this home. 32 03 30

1932

The new Trinity Hall Estate off Milton Road is one of the highest, healthiest and more popular residential districts of Cambridge. It has been developed on garden suburb lines with grass verges and street lighting. The rooms are airy and spacious, hot and cold water is supplied to the bathroom, and there is a good garden with space for a garage. The first seven houses were sold before they were complete 32 06 16b

1932

On the Kendal Way Estate 375 new panels had had to be put in the front doors as they had cracked badly and fallen out on the mats. To put them in workmen had nailed pieces of wood at the back of the doors and nailed the new panels on to them. Such bodged-up doors should be taken out straight away and replaced with new ones. In every house one can find one or more of the ceilings and walls cracked. Jobs were only done properly when the clerk of the works was around. 32 09 23e

1933

Master Builders & Decorators advert: "Do you realise that 1,653 able-bodied men are totally unemployed in your own town. Do you realise that of this appalling total 543 men are of the building trade". Help the unemployed by spending money on home improvement

1933

Demolition orders were made in respect of houses in Wellington Passage, Sun Court, Smith's Gardens and Newmarket Road. Some were in such a precarious state they would not last much longer. But the people moved from slum dwellings just found accommodation in lodgings, which meant two families in one house. It would be no kindness to rebuild on the site of demolished houses. People should be moved to more spacious sites on the outskirts of Cambridge. 33 02

1933

The latest feature of building development at Cambridge is the erection of two blocks of modern flats at Pinehurst, Grange Road. The site, formerly occupied by a large house used as a private school, has been acquired by the Strand and Savoy Properties. Each block has 20 flats at rentals from £145 to £175 per annum. Messrs Stockbridge furnished on display flat in antique style including a Queen Anne bureau-bookcase, another had modern furniture by Papworth Industries with an 'all-electric' kitchen. 33 06 16a [6.2]

1933

George Robert Kett was one of Cambridge's best-known and respected builders. He studied medicine before joining Rattee & Kett, becoming managing director in 1926 and was a founder of the Federation of Building Trades Employers in 1918. During the Great War he was Executive Officer for Food Control for Cambridge and served as a special constable.. Despite his outspoken manner his genial personality maintained for him an almost unrivalled popularity. 33 07 04 p8

1933

Cambridge is well ahead with its slum clearance schemes. In the Newmarket Road area there was a case for clearance near the Tabernacle but most of the people worked in the neighbourhood and if they were rehoused on the outskirts it would mean increased cost in getting to work. They had displaced 342 people and only provided homes for 218 of them: would the rest be put onto the street? There was controversy over the fate of one old lady whose house had been demolished, but it was better than leaving her in a building so dangerous it might collapse and bury her. 33 08

1933

Well-built houses, Perne Road. An attractive position, situate on the beautifully-made new ring road, close to bus stop. Prices £690 and £710. £50 down, balance £1 weekly. See Walter Driver's announcement in the auction columns for detailed particulars. Sole Agent: Drivers, 1a Post Office Terrace. Tel.468 (Advertisement) 33 09 20

1933

Speaking of slum clearance, Mrs Stevenson said there was no trouble about building houses, but the psychological side of rehousing is difficult. Slum dwellers became very cosy in their 'dirty little places' and when transferred to the spacious amenities of a new estate, the families felt terribly lost. Cambridge had 1,700 council houses yet there were 1,269 people on the waiting list

with names added at the bottom as fast as they were removed from the top. The situation was helped by the newly-formed Hundred Houses Society. 33 10 03

1933

Rents of houses in Dalton Square, Linden Close and Scotland Road were subsidised and because of the low cost of building they were remarkably low – houses with four bedrooms were six-and-ninepence (34p) a week. These rents could be reduced if tenants could show their income was insufficient. The general public did not fully realise the facilities now provided to the re-housing of very poor people, councillors were told. 33 12 15

1934

Kirby & son, woman builder and contractor, bankruptcy 34 02 02

1934

A home of his own for even the lowest paid worker – such was the prospect opened up at Coldham's Lane when the first brick was laid on the new Cromwell Road housing estate. Cambridge Ideal Homes will build about 200 houses at prices from £350 which can be purchased on a small weekly payment of about ten shillings. They will contain three good bedrooms, two large sitting rooms, scullery, bathroom and garage space. If every family could own their own house they would be happier and more contented. 34 02 16 [4.19]

1934

A plastering contractor said he'd been told there was "a bag of money for plasterers in Cambridge" and had come from Sutton Bridge with £900 to his credit. There was a strike on at the time and he started on 20 houses in Huntingdon Road for Mr John Brignell then contracted to plaster 212 houses in Kendal Way. But another workman's strike arose – a strike that never ceased. His last contract was for houses at Harston, Eversden and Coldham's Lane. He attributed his failure to other people's bankruptcy and bad debts 34 03 08

1934

An inquiry into the sale of land in Scotland Road heard it had been offered to the corporation by Mr A.E. Few in 1929 but they'd turned it down. The land was subsequently bought by a private individual for £2,600. But when it was needed for the Hundred Houses Society the new owner had sold it to the council for £3,200. It was a good profit but the inspector cleared the council of any maladministration. 34 04 10 [1.11]

1934

The Mayor opened Cambridge's 2,000th council house situated on Bateson Road and a large number of spectators gathered to watch. He unveiled a memorial tablet high up on the front wall to commemorate the occasion. The Housing Committee was formed in 1920 to construct houses for the working classes and the estates are a great credit to the architect. Mr Bland. Most houses had three bedrooms with spacious gardens. But there was a need for more for young people who find it difficult to get a home and remain unmarried year after year, disappointed and tired of waiting 34 06 23 [1.12,1.23]

1934 William Sindall was one of the most prominent of Cambridge business men. Born at Isleham he served his apprenticeship and established the well-known building firm 60 years ago. It has erected many University and college buildings besides undertaking a number of other important contracts. A councillor and Alderman, Mr Sindall was director of the Waterworks Company and the Cambridge Chronicle. He was also associated with the arts and crafts side of the Cambridgeshire Technical School. 34 12 28a

1935

The Hundred House Society realised that young married people were not getting a very good chance of obtaining a house. Nothing in the world matters more than that they should have happy

home lives and that marriage and the bringing up of children should be the happiest and jolliest business that could ever happen to them. Eastfields was the most beautiful housing scheme and those who had been selected would make very good tenants. The rents were set at what they could more-or-less comfortably pay, without the Society making excessive profits 35 07 31 erects 100th house 35 08 22 [1.1]

1935

Brampton Road new housing estate [4.13]

1935

Cambridge Ideal Homes Ltd laid the first brick on the Cromwell Park Estate on 16th February 1934 and now 128 houses were built or under construction – one third of the total houses built in Cambridge during that period. Builders Johnson Bailey and road contractors Lavender & Bateman had worked whole-heartedly to assist the scheme. The low prices they charged meant houses had got to be sold as soon as they were built, bringing them within the reach of the ordinary working man. But there are still 900 people on Council house waiting lists. 35 02 22a

1935

1935

Sir – the de-population of Castle End has brought a serious decline in trade in this district. Slum clearance has seen the departure of many young families to the new residential estates in other parts of Cambridge and we are left with the old people whose requirements are practically nil. When a house is vacant it is condemned and pulled down so consequently no new residents come to take their place. Some sites have been empty for years and are growing a plentiful supply of weeds and thistles. When are we going to have new houses built on these vacant sites –

Tradesman 35 12 16

1936

Plans for the new Meadowlands Estate show 277 houses and six shops. The builders proposed to construct the primary roads with concrete but run the risk that the council will not take them over. They have suggested the names Meadowlands Road, Meadowlands Way, Meadowlands Terrace, Brightside and The Sunnyside but councillors want some alternatives 36 04 11

1936

There were a large number of single people in Cambridge living under very unsatisfactory housing conditions and few of the public lodging houses were suitable for them. The council could cooperate with the Church Army or Salvation Army but this meant robbing people of their freedom as individuals. It was about time they erected a municipal lodging house where people could live under decent, humanitarian conditions, Dr Wolf urged 36 05 15a & b
1936

The Housing Committee was told that over 170 people would be displaced by the demolition of buildings in Cambridge Place; the houses would have to be vacated within two months from the date of the clearance order. Plans would be drawn up to build 47 houses to re-home residents on land off Newmarket Road which the Council would purchase from G.P. Hawkins and W. Boyton for nearly £10,000. 36 10 13b
1936

Cyril Ridgeon recalled the early days of his business at a dinner in to celebrate its silver jubilee. When the Great War came ruin had started him in the face. But he managed to get some army contracts and started as an English timber merchant selling thousands of trees to the Midlands and Cambridge builders. At times he worked up to the knees in snow. He bought his first lorry, a Wolverine, in 1922 and put up a sawmill in Cavendish Road. It had been hard work and success was due to the loyal staff 36 12 15a & b
1936

Cambridge Place was a long, narrow cul-de-sac with a narrow entrance from Hills Road. It used to have an unenviable reputation but had now greatly improved. It was a convenient place for residents engaged in unskilled work who left their houses early and returned late. But the houses were unfit for human habitation. Nearly all the roofs were sunken, the doors perished, the plaster was decayed, the stairs dark and steep. They were all were damp, thirty-three shared a water tap with another house and none had a water closet inside nor any proper place to keep food, an Inquiry heard. 36 12 30b & c, picture 36 12 31

1937

Thompson's houses sell because they are quality built, using only the best materials and stand on good sites. The 'Windsor Estate' is being rapidly completed with houses for sale from £585 to £850 (£32,500 - £45,200 today). It is in a very healthy position on one of the highest points and served by two main bus routes. The 'Thornton Estate' houses cost from £800 to £1,500 (about £83,340). Each is freehold and the price includes roads and paths, fencing, decoration and large gardens. Ralph Thompson Ltd, Fulbourn – Advert 37 09 11a

1938

Many unscrupulous Cambridge landlords are charging more than they are entitled under the Rent Restriction Act. There should be a crusade against them. One railwayman about to retire on a pension had been paying three shillings and ninepence rent for over 20 years (about £10.04 today). Now this had been raised by three shillings (£8). Tenants in Cavendish Avenue had been

told they would have to pay sixpence a week more because the landlady was supplying sanitary dustbins. Those who felt exploited should see the Poor Man's Lawyer 38 02 03c

Near golf course. Schools and churches nearby. Houses have sold quickly to discriminating buyers during the short period this Estate has been open. Prices £1,050 to £2,000. Secure your site now to avoid disappointment. House now ready for sale, £1,475 (about £79,000 today). Specifications include large oak hall, dining room, coal and coke stores, larder, central heating with three radiators, electric lighting, power and bell points. – Advertisement 38 02 26a

1938

Young couples are caught in a trap: they cannot have Council houses until they have produced a family, and they must not produce a family unless they have a proper place to live, Prof John Hilton told the Cambridge Housing Society. The nation was taking no steps to provide houses for young people who wanted to marry. They might try the hire purchase system but are required to find about £50 deposit – where are the working-classes to find such a sum (about £2,700 at present prices). And is it desirable that those starting out should begin by buying a house? They are not settled in their work and may want to move only to find that because of a change in the value of the house, they have lost all they have poured into it. 38 03 16

1938

Park Street was a very congested area in the heart of Cambridge and the houses were upwards of 100 years old. The brickwork was weather worn and crumbled, the walls were damp, natural light was poor and the staircases narrow, winding and dark. The ceiling plaster was cracked and liable to collapse and the floor boards were weak, springy and worm-eaten. In some cases there was no copper or sink and no proper food store. Some had no water supply. They were unfit for human occupation and should be demolished, an Inquiry was told. But residents objected 38 10 27 & a also Saxon Street

St Regis luxury flats, Chesterton Road. The main staircase has Rexine-finished walls with soft lights dispensing an atmosphere of well-being. The stairs are covered with cork to silence the noise. All flats are expensively fitted out and a resident caretaker will remove refuse and arrange for domestic cleaning. A unique feature is the provision of a large air raid shelter built under the garages. It has a concrete roof and will be perfectly safe against all but a direct hit by a heavy bomb. Provision has been made for gas-proofing it in case of emergency. 39 04 06a

1939

For many couples contemplating marriage, the biggest obstacle is a home. Mr L.M. Parker, a local bricklayer, was faced with that problem in 1935 and set to to build his own. It took him three years to finish but if you go along to 187 Hinton Way you will agree his time has been well spent. It is a home any working-class man would be proud to possess with six rooms, modern

labour-saving devices and inlaid cupboards. Above all the cost was comparatively negligible. 39 05 09

1939

Jack Brignell carried on business as a builder and undertaker in Newmarket Road for over 40 years. He erected many large buildings in Cambridge but was recently mainly engaged on Council schemes such as the erection of the Coleridge Senior School. He was a county councillor and took a keen interest in the Mill Road Infirmary, Salvation Army, Victoria Institution and Cambridge Brotherhood. He died on the eve of his only son's 21st birthday so a coming of age party arranged at his college, Sidney Sussex, has of course been abandoned. 39 05 18c

1947

Simplicity and speed is the key-note in the Cambridge Borough Council's Birdwood Road building site, when 158 permanent concrete houses are being erected. Machinery used in the work of construction - like cranes, cement- mixers and lifts for conveying concrete to the scaffolding tops - is electrically powered from the Electricity Company's supply. Briefly the method of construction is this : a concrete foundation is laid and on it a steel case is placed in position. Concrete is poured into this steel "skeleton" and after the mixture has set the case is removed - leaving concrete walls with an air-space between. The roofs will be tiled. Ninety per cent of the labour, incidentally, is Polish c47 04 21

1947

Alderman Dr Wood, chairman of Cambridge Housing Committee said "We are in an extremely difficult situation. We have got perhaps a hundred and fifty cases where we have a man working in Cambridge with his wife and family elsewhere - cases where after six years of separation during the war the family and the father are still separated". It appeared that it is going to take ten to twelve years at the present rate to find accommodation for all wanting it. Coun Cutting said "I think we will have a very ugly situation before us next winter. I cannot imagine that those who suffered and fought are going to endure this for many more months" c47 05 02

1947

The death occurred at the Catholic Nursing Home in Brooklands Avenue of Mr Edmund Joseph Kett who has been ill for the past week. Mr Kett who was 85, was a partner in the firm of Messrs Rattee and Kett, builders and contractors where he started as a boy immediately on leaving school. He retired from the firm in 1925 when the business became a limited company. During his time with the firm he was responsible for the building of the Cambridge Catholic Church and was also connected with the restoration of Arundel Castle, the Duke of Norfolk's country seat. This took 16 years to complete c47 07 22

1947

Ald Dr Alex Wood, chairman of the Cambridge Housing Committee said that 500 houses had been completed, of which 206 were permanent. The number of houses completed by private contract was 68. The greatest difficulty was in regard to labour. On one site he discovered but one bricklayer at work. He commented "We are attaching no blame to the contractors; I met two of them and found both almost broken-hearted about the difficulties with which they had to contend, and the shortages they were up against. The slow rate of building means that people have got to keep on living in emergency accommodation and other families which ought to be moved into emergency accommodation are, therefore, kept waiting. They were still completely unable to deal with a number of families living separated in almost impossible conditions of overcrowding -

sometimes 11 people in three bedrooms - and in property which ought not to be inhabited c47 10 10

1948

Dr Alex Wood, chairman of the Cambridge Housing Committee spoke of the factors which had largely created the housing problem in Cambridge. There had been an influx of a very large number of people whose property elsewhere was destroyed during the war and they had settled in the area. The second "complication" was that the University was being urged by the Government to take larger numbers of students, thus adding to the competition for the housing accommodation available. "In the third place there is a very large increase in the Civil Service personnel in Cambridge," said Dr Wood amongst laughter. "While we like them all very much personally, they do complicate our problem" c48 04 27

1948

The first important milestone in Cambridge post-war housing drive was reached when the Mayor opened the council's 1,000th house – an "Easiform", at 27 Peverell Road on the Newmarket road site, where tenant, Mrs Betson, was waiting. Beforehand they had been taken on a tour of some of the principal housing estates in the town and saw estates at all stages of development - ranging from the neat, well-established looking one at Trumpington, only lacking the shops which will come one day, to the unfinished but partly-tenanted. At these mothers with perambulators have to be helped through the mud, and children kept in wellington boots c48 12 16 [3.11]

1949

Tenants of Gothic street and Doric street have sent a petition to Cambridge health department protesting "most vigorously against the prolonged occupation of these slum dilapidated properties, seriously affecting the health, particularly of the children forced to live under absolutely shocking conditions, which foster ill health and the spread of disease; being vermin-infested and in a very bad state of disrepair, some without kitchen fires, others with collapsed interior walls and ceilings". They recall that the properties were actually purchased by the council before the war for demolition. 1949

Borough propose 217 houses Ditton Lane, Coleridge & Queen Edith's Way, give no priority to key workers 49 12 06 [2.6]

1949

"Council put in Gilbert road after WWI & sold off individual plots to spec developers to erect villas; Gurney Way & Courtney Way built prior WWII by Ginn & Son, then Metcalfe Rd & Carlton Way; building ceased for duration, land used allotments. Started Metcalfe soon after war; regulations forbade buildings over a certain floor area & covenant from St Johns forbade buildings under certain area; thus first half of Metcalfe Rd have appearance of pairs of large semis but were built as 4 flats, designed for easy conversion into semis; one flat satisfied Government, 2 flats converted to semis satisfied St John's; 1st houses E side Carlton Way at college's specified density of 8 to acre" [81 07 23]

1949

Sir – I want to call your attention to the despairing fact that Cambridge landladies seem to hate babies. My husband and I have been trying for countless months to rent a house, flat or rooms but as soon as we haltingly mention the criminal fact that we have a baby, the answer is "Sorry". Why, he is far too young to do any possible damage and cries less than the average. We are not paupers, and can afford a reasonable rent. I would give a hand in the house if need be, so that my husband, baby and I can be together. Will landladies please tell me why they refuse accommodation to people such as we? – "Norrie" c49 02 11

1950

Cambridge's population now 90,000. Borough have built 1,347 new houses, 350 temporary houses, private builders 215 new & 6 rebuilt - 50 08 12 [2.7]

1950

A start has been made on the construction of 38 garages on the Walpole Road housing estate in Cambridge using a new system of mortar less block construction known as "Dri-crete". This patented concrete block is the invention of a local businessman, Mr B.F. Hartley, who has been a manufacturer of concrete products for several years. The British Art Tile Company of Cambridge and Whittlesey are the patentees and manufacturers c50 02 04

1950

Using pre-cast and interlocking concrete blocks three men laid the equivalent of 3,000 bricks in just under 3½ hours on the Newmarket Road housing estate, Cambridge. The blocks, patented under the name of "Dri-Crete" are the results of research by Mr B. F. Hartley, director of the British Art Tile Co. of Mill Road. During 1950 two houses have been erected at the new satellite town of Newton Aycliffe, near Darlington, using the blocks. Members of the Dri -Crete Association visited Papworth to see farm buildings erected from the blocks and to Waterbeach RAF station to inspect Dri-Crete walls 50 07 05 c

1952

5000th Unity steel & concrete house opened by Ernest Marples, on need to cut costs by reducing standards he says one has 'got to stop somewhere, otherwise would be building little pigeon-houses with one room downstairs & one upstairs - 52 10 18[2.17]

1952

Mayor suggests now clear slum areas & build large blocks of flats instead of taking acres of agricultural land [2.17]

1952

Cambridge city council won its appeal against the refusal of the County Council to grant planning permission for the erection of houses on land fronting Queen Edith's Way on either side of the approach to Wulfstan Way. The plots were intended for former owners of land which had been sterilised by the revocation of planning permission on the Ventress Farm Estate. They could be sold at a reasonable price as compared with that now commonly asked for building land near Cambridge, where there was a serious shortage of sites available for private builders. The county had wanted sufficient land left open to preserve a view of the shopping centre. c52 08 12

1952

"The more houses the City Council give us to build, the more we can put up. We have been in Cambridge five years and can put up 400 houses as quickly as it takes to erect 50", said the foreman of Messrs John Mowlem's 150-house estate at Fisher's Lane, Cherry Hinton. A flag is now flying from the chimney of their 1,000th house in Cambridge. The fitting of the chimney stack is the traditional moment for celebration in the form of a bottle of beer all round for the workmen. The Poles working on this site are familiar with the practice which has existed in Europe for hundreds of years. A dinner-dance is being planned to celebrate when the house is handed over to the Council c52 09 04

1953

15 year waiting list for council house – 54 03 13 [3.1]

1953

Arbury smallholders given notice that the land is required for building – 53 10 29 [3.3]

1953

Despite all the building by 1953 there was a 15 year waiting list for council houses & in 1954 1,250 houses were reported unfit for human beings to live in with another 160 condemned before the war. Planned replacement of 500 houses every year was exceeded & 200 of every 500 new council houses built each year were set aside for rehousing people from little streets of unfit houses. However as properties deteriorated by 1959 there were between 3,000 or 4,000 houses worthy of clearance under the 1957 Housing Act such as those in Prospect Row many people did not want to move however production means standardisation to keep prices down [14].

Residential homes for old people were also started, Langdon House being completed in 1955 by Cambridge Housing Society to be followed by warden-controlled flats.

1953

A large number of Cambridge people have made applications to the City Council for licences to build their own homes, since the Government announcement that anyone could build a house of up to 1,000 square feet. Circulars have been sent to all people on the council housing list asking them if they want to build. Provided the authority is satisfied that the cost of erecting a house is reasonable the licence is granted automatically. The cost of building a house is about £1,300 and with the aid of a mortgage comes within the scope of an £8-a-week wage-earner. It is possible to have more expensive fittings than those generally used in council houses; if a bath in a council house costs £5 a person wanting to install one costing £25 would be allowed the difference in building his own house. c53 01 16

1953

Plans for slum-clearing within Cambridge and for the transfer of tenants from under-occupied properties were outlined at the city council. At present people on the 5,000-strong waiting list will have to wait as long as 15 years for a home. Ald Langdon said: "Cambridge has been expanding into the countryside, but inside it is rotten to the core. We have got to clear the slum houses which are a great expense to the council, but what are we going to do with the people living in

dilapidated houses which were condemned before the war". The council is now concentrating on providing smaller dwellings and blocks of flats, but land will be very scarce in the future. c53 03 17

1953

For four years Mr Ken Allen had had his name down on the waiting lists for a council house. After all that time he decided he would wait no longer – and he set to work to build his own home. On Monday he stood under his own roof. Inside and out nearly a score of self-builders, members of the Cambridge Self-Build Housing Association were putting in the window frames, hammering home the floorboards, measuring here, sawing there and generally completing the interior of his house in time for moving in before Christmas. The six-roomed semi-detached dwelling on the Arbury Road housing site will have cost £1,300 – and for that he gets a house worth £2,000. c53 10 13

1953

A house has been erected in Cambridge using 'Niblock' mortarless concrete block units for the external and internal walls. Patented by a local man and made by Messrs Jackson Bros of Coldham's Road, they are hollow, allowing a high degree of thermal insulation and the actual building of the walls can be carried out quite quickly, largely by unskilled labour saving cost. Other buildings such as boundary walls or pigsties have proved singularly dry and warm and without doubt 'niblocks' will figure greatly in future building activities. c53 12 12

1954

The Mayor said that 1,000 council houses had been built in Cambridge in less than two years but the waiting list continued to grow so that today we have more people waiting for houses than we had at the start; the list stands at over 5,000. How many will get council houses within the next two years is hard to say; the land in the Council's possession is sufficient only to build another 1,800 houses and flats. Replying to criticism of 'housing foreigners' he said that applicants of foreign nationality had been given council houses but they were naturalised and had a right to be considered in their turn. It is imperative that the fullest use be made of the accommodation at their disposal c54 03 10

1954

Only major items not approved are site of bus station between Christ's college & Emmanuel & the proposed development for residential purposes of the smallholding land north of Arbury Rd during 1st 5-yearly period of the plan [18]

1954

10 houses Netherhall Way for key workers recruited from away by CUP

1954

The Ministry of Housing is prepared to hand over the emergency housing units on Donkey Common to Cambridge city council. Planning permission for the continued use of the huts as living accommodation has been given until 30th September 1957 or until such time as major repairs are required. The huts can then be removed and the land reinstated as a public open space. 54 12 01

1955

Cambridge Housing Society Langdon House residential home old people completed

1955

A proposal to sell up to 300 plots of the Arbury Road housing estate for private building was questioned by City Councillors. Messrs Mowlem had asked for plots for 100 houses and William Sindall were interested in another 29 fronting Arbury Road. The council was faced with slum clearance and would have to buy land to re-house the people displaced. The Housing Committee existed to provide as many houses for people as possible and if builders offered to erect 300

houses with subsidy, without adding to the rates or national taxation then they could to welcome them. But people affected by slum clearance would not be able to afford these houses 55 01 21 1955

Plans are going ahead for the new Arbury Road Estate which should in time take a large bite out of Cambridge's 4,337 housing waiting list. Stage one will include about 240 houses, flats and bungalows; a shopping centre; two churches (Church of England and Methodist); a cinema and a public house. Already roads and sewers have been laid and it is hoped to start building some of the houses this year. But the shops will be a longer-job and will be built to keep pace with the demand. The new Primary School should be occupied this September. The land to the south of Arbury Road will ultimately accommodate 1,600 families in Council and privately-owned houses and it is possible the land to the north may be developed along the same lines. 55 02 02 1955

Houses in York Street were "drab and monotonous"; they were typical of the "very densely populated part of Cambridge and the sort of house you visualise when you talk of slum property", a Judge was told when a man claimed possession of a property in Milford Street. He had bought it in 1944 and now wished to live there; he'd offered the tenants alternative accommodation in York Street. But they objected to the move saying it was "a most unattractive and drab street" and that changing houses would put them "down the social scale". The Judge agreed saying the two streets were entirely different in character and the houses not in any way comparable" 55 02 18 1955

Cambridge has 1,350 dwellings unfit for human habitation including 100 in the East Road, Gothic and Doric Street areas. The Council is to submit proposals for the demolition of 500 dwellings in the next five years and the remainder within the following seven. But three condemned cottages at Brookside in Toft have been reinstated by the Cottage Improvement Society and now make a charming group in this beautiful yet little known corner of the village - 55 06 29 1955

The Medical Officer for Cambridge says houses in Trinity Place together with warehouses to the rear of King Street are unfit for human habitation; they are dangerous and injurious to the health of the inhabitants & should be demolished. People living there will be asked to quit within two months with the Council finding alternative accommodation - 55 07 27 1955

On the map in 10 weeks. The first completed dwelling on the Arbury Road estate extension, designed and built by Monkman of Halifax Road, Cambridge was started on 1st July 1955 and occupied on the 17th September. – Advert 55 09 16b [3.5] 1955

Since 1952 Cambridge has sold 84 pre-war and three post-war council houses. They were going to be lived in whether they were bought or rented and people ought to be able to buy them if they wanted. They had plenty of money to spend and wanted to use it for repayments on house loans instead of frittering it away. If we can sell the whole lot, we shall", declared Ald Langden. But pre-war council houses sold for £400 and it cost about £1,300 to replace them at present day prices. To say that encouraging people to own the houses would make more them responsible citizens was a most unworthy argument. 55 10 24a 1955

The condition of the huts on Donkey Common has steadily deteriorated and they should only be let to families requiring emergency accommodation who can be rehoused by September 1957. Some are so bad they will have to be closed before that and when the worst of them become vacant they should not be re-let. The Council should purchase 50 premises due for demolition and carry out minimum repairs to allow them to be occupied temporarily. 55 10 15b

1956

Arbury Rd rapidly growing, a new town in miniature; in 1st decade century little but County Council smallholdings, poultry farm & laundry; by 1920 most houses on West side near Milton Rd erected; post WWI fields converted University Tennis Courts, George VI & Duke of Gloucester played; Arbury Camp farm the central pedigree poultry farm of Chivers Farms, established 40 years [446..8.5]

1956

Cyril Bailey, partner in the well-known building firm of Johnson and Bailey, spent the whole of his life in Cambridge. He was apprenticed as a carpenter and joiner, working on aircraft production in the First World War and founded the firm in 1919. He devoted his life to the business up to the time of his death and was a past President of the Master Builders' Association. A man of pleasing personality and of a charming and unassuming manner he will be greatly missed. 56 01 03

1956

The Lord Mayor of London visited Cambridge to open a new block of flats for old people at Honey Hill, Northampton Street. It was the first such visit and brought a glimpse of the pageantry in which the true Londoner takes great pride. In 1936 the frontage had been bought by the council with a quarter of the cost paid by Cambridge Preservation Society and Magdalene College. But the war intervened and the site was a blot for many years. Now the Mayor presented the keys to the first tenants, Mr & Mrs H.C. Rogers 56 03 06a-d

1956

Cambridge Business and Profession Women's Club opened their block of flats on Harding Way and handed six lucky women their keys to brand new self-contained homes. They have coal bunkers and Ascot hot-water heaters for sinks and baths. Faced with the overwhelming need for accommodation for single ladies in Cambridge, when it proved impossible to find a house, they had the braveness and energy to find £1,000 to form their own housing society. 56 06 25

1956

Garry Drive, a private street and a cul-de-sac just off King's Hedges Road which ends at the railway, was constructed by a Mr Naylor. He put down kerbs and channels and in May 1939 was contemplating finishing the road himself, but the war intervened. He then left for Australia but his wife owns three properties and has written from Melbourne objecting to the council's proposed charge for making up the road. 56 11 10b

1957

3-storey flats being built Cherry Hinton housing estate - 57 09 25 [3.2]

1957

Cyril Ridgeon and Sons staged a gala night for their 160 employees at Cambridge Guildhall. The company began in 1911 and in 1913 took a small piece of ground in Tenison Road for their first depot and in 1922 bought their first solid-tired lorry. During the second war they worked with the Ministry to get materials off to the bombed areas quickly. Now they had a staff of 160 with 28 lorries and vans and 13 cars. 57 01 08 & 08a

1957

Keys to a bungalow at 246 Green End Road House were officially handed over to its first occupants, Mr & Mrs L. Hart, by the Mayor. It is the 4,000 council house completed since 1945 - an average of 353 houses each year. The 1000th was opened in Peverel Road in December 1948, the 2,000th in Whitehill Road in May 1953 and the 3,000th in Colville Road, March 1952. The site had been an eyesore, now it is a tremendous improvement. 57 02 25c, 57 02 09, 57 02 22[3.10,3.11]

1957

Cambridge city council may purchase the 350 temporary bungalows from the Ministry of Housing for £150 each. They are suitable for elderly couples and can be kept sound for another

ten years. They could also purchase big houses to let as flats to business people, starting with no.20 Beche Road which has already been converted into five flats. 57 04 16

1957

John Mowlem, 'a famous name in building' have a number of houses in Tedder Way, Hurrell Road and Harding Way on the Arbury Road Estate ready for immediate occupation. First class construction, part central heating and decorations to the purchaser's choice. Prices from £2,550 on easy purchase terms: deposit £255 and repayments from £3.9.6. per week. You are cordially invited to inspect the show house at 42 Hurrell Road which is open daily – advert 57 07 25a

1957

The tallest residential block in England may be erected in Hills Road. It would tower 135 feet high and, with a series of smaller blocks, accommodate 161 families. The 15-storey building would be of slender design, using modern materials to create homes for today, not pale imitations of the past. It will provide homes for the middle classes who have been saddled with houses at a cost beyond their means which, on re-sale, show a loss of hundreds of pounds. 57 10 03 a & b

[494.4.2] [3.16]

1957

Cambridge builders John Brignell have submitted a tender of more than £113,000 for the erection of 30 one-bedroomed flats, six two-bedroomed flats and 36 two-bedroomed maisonettes on the Arbury Road housing estate. Many of these will be used to rehouse people removed from their dwellings under the Council's slum clearance programme. The construction of 17 shops is well-advanced; five will be finished with the remaining 12 left as 'shells' 57 19 15

1958

Doric Street & Gothic Street demolished for car park – 53 10 09 [3.17]

1958

1958 East Road district heating plan abandoned – 58 03 11

1958

Are you looking for an elegant, spacious, contemporary flat in Cambridge? Situated at Newton Road, a first-class residential district, and designed by a leading domestic architect, this flat is civilised. It is acoustically insulated, thermally insulated, light, labour-saving and spacious. There are two bedrooms, a most un-British kitchen and bathrooms, your own drying balcony, space heating and a garage if you want it. Price £3,200. Span Developments advertisement. 58 04 09b

58 03 29a

1958

James Ison of Girton is a well-known stonemason who has worked on many college buildings including King's college chapel, where he made the pinnacles, and Caius where he assisted William Topper with the carvings on the Gate of Honour and Gate of Virtue. He also made the foundation stone for the new Catholic Church in Milton Road. Now he started his own business and has carved the gargoyles and medallions that are going to help restore the second court of St John's. 58 08 23a

1959

Having completed their flat project at Applecourt on Newton Road, Span Developments have just announced several big redevelopment plans. One is a 15-story high tower block of flats in Hills Road where two Victorian houses have been demolished but the magnificent trees standing in their gardens are to be left undisturbed. Another is a complete new village planned for Histon Road. They are also negotiating a scheme for factory development which will bring more well-paid work to the Cambridge area. 59 02 27, 59 03 01 & 01a

1959

Ridgeons celebrate their silver jubilee – 59 01 08 [3.9]

1959

Cambridge has a slum problem - damp & lack air & light; in 1954 had 1,250 unfit & 160 condemned before war but now probably 3-4,000 merit consideration for clearance; Robert Davies : people 'do not want to move to Arbury Rd, people replaced with demolition should get new houses in old area; plans for East Rd clearance area will provide 100 new homes for lucky ones many of houses now to be demolished are over 100 years old; built by small speculators to standards of time near centre meet demand of natural increase in population; now concern at inadequate ventilation - blank wall at back, artificial light, lavatories, water supply, drainage through people do not want to move but like it when they move - 59 12 21 [17]

1959

The new Span flats at Newton Road have been built around a central garden court and amongst the carefully preserved remains of an old orchard. More trees and shrubs have been planted and the whole outlook is truly Arcadian. The flats are, briefly, superb with practically every mod.con. yet developed including unfreezable plumbing, effective thermal insulation, built-in wardrobes and an incredibly convenient kitchen. Each has two double bedrooms, bathroom and breakfast-cornered kitchen. The price is £3,200 for a 99-year lease – Advert 59 02 09

1959

All the 100 houses planned for the first part of the Scotland Farm Estate by the Hundred Houses Society were completed last year and handed over to tenants at rents of £3 a week. Already the new character of the estate is taking shape. The design of the terraces of houses in varying numbers and the use of contrasting colours for individual doors avoids the danger of monotony. Inevitably the ground still has a somewhat bare appearance but much solid spade work is being put into the gardens. These well-designed houses are making a real contribution to the accommodation problem in Cambridge 59 04 01b

1959

One of the recently-built council flats in Carlton Way has been opened to give prospective tenants an opportunity to inspect the types of homes to be offered, get an idea of the amount of furniture they will hold and take measurements for curtains and carpets. Each has an indoor coal bunker and its own shed. They are intended for older people whose families have grown up and left them with empty rooms. The rent is 16s.8d (84p) a week 59 05 20

1959

1960

The first of five blocks of flats at Sherlock Close have been completed. Designed by the London architects, James and Bywaters, and built and owned by Peploe and Partners Ltd, the estate will eventually have 60 flats and 40 garages. Designed around two enclosed gardens they will resemble college courts. They have two bedrooms and are warmed by a gas operated space heater. The use of pine panelling, which has been lightly waxed, and polished hardwood-lined doors give the flats a Swedish appearance 60 01 26

1960

Are 32 thatched properties in Cambridge – 60 09 20 [9.1]

1960

The Minister has confirmed compulsory purchase orders concerning houses in Norfolk Street which the City Council are anxious to pull down for the second stage of the East Road

redevelopment scheme. The area affected was generally dilapidated, over-crowded and of a demolition standard with some of the buildings giving a general impression of decay. Now they can go ahead with erecting new houses, flats and shops 60 03 12

1960

One of the landmarks of Cambridge which has overlooked the city for about 60 years was demolished. The 100-foot chimney on the Newmarket Road once belonged to one of the city's brickworks which closed down about a year ago owing to the lack of clay. A large portion of the base of the chimney was cut away and propped up by wooden supports. These were then set alight using paraffin and wood shavings and smoke gushed from the top of the chimney for the last time before it fell slowly and gracefully to the ground. The actual kilns have already been demolished to make way for Watts and Son, timber importers 60 03 16

1960

William Topper who left school when he was nine years old and who has worked with his hands for the last 70 years is to be made an honorary Master of Arts of the University, becoming the first master stonemason to receive one. He has restored the Gate of Honour at Caius College, replacing pieces which had been missing for 300 years and has been in the Senate House once before, when he laid some tiles. Now he will take the day off from work and in mortar board and gown receive the degree from the Vice-Chancellor. 60 04 26b

1960

Houses in Prospect Row and Brandon Place will be compulsorily purchased and demolished. Most of the 62 properties were overcrowded, suffering from dampness, deteriorating woodwork and perishing plaster. A Government Inspector agreed they were unsuitable for human habitation. But residents say the Council are trying to get the property 'on the cheap' and they are not being offered adequate compensation. 60 08 26

1960

People living in cottages shortly to be demolished in Prospect Row and Brandon Place described conditions. One housewife told of hearing rats at the back door, "I found the hole and covered it with coal". Another spoke of having two rats in the house which is so damp she has to redecorate once a year. "My eldest boy, who is four, catches cold after cold and I shall be glad when we move. I don't care where it is as long as it has three bedrooms and a bathroom", she says. A Ministry inspector said the properties were unfit for human habitation. But an 81-year-old lady who has lived in her house for 11 years said: "I can't understand why they want to knock them down". 60 08 31a

1960

McManus, the company that caused a stir when they agreed to pay £4,500 an acre for land have decided to put up terraced houses rather than the traditional semi-detached properties on their projected estate between Histon Road and Windsor Road. They call it an experiment in contemporary living that can accommodate the same number of families but with a greater amount of open space around the houses for children to play on. The houses are selling for nearly £2,400 60 09 09a

1960

Stanton House flatlets in Christ Church Street provide luxurious accommodation for 29 old people. Each has a bed sitting room, with the bed space behind a curtain partition, a small electric cooker and fitted wall electric fire. Lavatory and bathroom accommodation is in conformity with Ministry requirements with an emergency bell. There is a large lounge with an open fireplace where old folk can spend their evenings in each other's company and a large open patio with fish pond and fountain. Central heating and lighting is included in the rent of thirty shillings a week. 60 10 20

1961

Demolition of house at entrance to Manor Farm to form Campkin Road [4.10]

1961

Rattee & Kett working in Downing Street – 61 02 07

1961

Houses in Chesterton High Street and Green End Road have been subject to a demolition order since January 1960. Their occupants have gradually been re-accommodated and their homes abandoned. Now only two families remain. It is an eerie feeling to have empty houses on either side, especially when they are broken into, the wallpaper ripped and the boarded-up windows damaged. Once they have been rehoused the rickety four-roomed homes with their primitive sanitation will be pulled down for re-development. 61 02 24

1961

In 1911 Cyril Ridgeon set up in timber and the products of the Cam Cement Company at Meldreth. These prospered and he was able to rent a small area in the Tenison Road Wharf of the Great Eastern Railway Company. The initial buildings were modest and deliveries could only be made by horsed horse drawn transport – very different from the fleet of lorries and vans now in operation. Over 50 years it has grown into a concern employing 200 people supplying every kind of building material required. 61 05 25

1961

Demolition in Ram Yard has revealed a brick inscribed '1509'. Its size indicates that it was part of a batch produced shortly after 1790 when the Government imposed a brick tax. As a result bricks suddenly became larger so fewer were needed to build a house. A firm at Bourn made outsize bricks of a four-inch depth, which can be seen all over the village. A very handsome gault brick was made by a Barnwell firm. These are still very much in demand and when properties are demolished they are salvaged for reuse. The Shire Hall was built from such old bricks which fetch £11 a thousand. 61 09 22a

1961

A newly-built Canadian wooden house on the Girton Road is attractive visually. The exterior is finished in cedar shingles, the interior panelling and door frames are pine, the doors mahogany, the lounge has parana wood panelling and the ceilings are of plaster-board. Decorating costs have been cut to a minimum: the interior walls are papered, then covered with a thin film of plastic. It cost more than a comparable five-bedroomed house, but its upkeep costs far less. The new owners are delighted 61 0 06a

1961

Cyril Ridgeon is celebrating 50 years of service to the building trade. Never before has Cambridge seen so many outstanding changes as old out-dated premises are giving way to the modern shops and houses demanded by today's standard of living. Its depot at Cavendish Road has a specialised department dealing in Formica while fully-loaded lorries carry timber treated against rot by a Tanalising Plant, ensuring it an almost indefinite life. In the Slabbing Shop a large range of artistic fireplaces are manufactured in tile, mosaic and marble 61 10 10a

1961

Nightingale Avenue means something new in elegant living. It means spacious, modern four-bedroomed detached houses of quality and character by Trend Homes. Here is a rare opportunity to buy an exclusive architect designed house in a first-class position. Each will have the wonderful boon of oil fired heating, built-in wardrobes and French doors to a paved terrace. Price from £5,250 – Advert 61 12 01c

Building boom, new & vast housing estates mushrooming in Cambridge builders never had it so good; but shortage of bricks, industrialised methods being considered 64 06 17 [13]

1964

City council housing problems : up to about 10 years ago cars were hardly considered when planning new estates, now average parking provisions for 1.3 cars per family; latest Kings Hedges road project includes central heating; move in emphasis from 3-bed family houses to individual units; mass production means standardisation to keep prices down – 64 06 16 [14]

1964

Clunch was for centuries an important material but now the old quarries have fallen into disuse except as sources of stone for road-mending and fen-embanking. Sometimes the waste rubble was burnt for unslaked lime and the limekilns in Carter's Quarry at Burwell were used as air raid shelters. They are still there, derelict and tumble-down with the shed that once housed the transport horses. Part of the interior of Heydon Church, bombed during the war, was rebuilt with clunch and at Lode a new chapel, built entirely with clunch, was added by Lord Fairhaven when builders had to be specially trained for the work. 64 03 26

1964

Cambridge housing squalor – squatters; 500 houses have no hot water, 5,000 no bath, 640 no flush lavatories – 64 06 15a

1964

Pre-fabricated aluminium bungalows Church End Cherry Hinton to be made safe, suffer corrosion – 64 06 13a

1964

Prefabs may be answer to city's house problems; cars not considered when planning new estates; survey King's Hedges – 64 06 16a

1965

final phase of Arbury plan, 25 acres between Arbury Road, Campkin Road & Kings Hedges Road, taking 11 acres from Green Belt but providing 20 acres for recreation, 2 primary schools & nursery schools to be built; well-balanced development – 65 08 18 [9.7]

1965

A shortage of bricks and labour problems, caused by the high wastage of recruits who complete their training before deciding that building is not for them, has forced Cambridge Council to experiment with a timber-based system for 32 houses on the Arbury Estate. Each costs nearly £800 more than conventional houses but traditional methods mean they would not be able to provide the 500 houses needed. The situation was exacerbated by the 200-odd eroding prefabs that have to be completely replaced almost immediately. But the Ministry of Housing rejected their plans saying it was too expensive– 65 01 01 Cambridge Factory-built houses rejected by minister but approves industrialised dwellings for Fulbourn – 65 01 08a

1965

A new German machine at Milton owned by Cambridge Precast Stone can produce enough bricks to build a house in less than two hours, thus helping to beat the national brick shortage. It is the

biggest installation in the country and will enable the firm to supply orders from builders' merchants. It comprises a dragline feeding aggregate to a mixer where cement and colouring are added. The moisture content is measured by an automatic 'Hydrobot' device. The mix is fed to the moulds for vibrating and tamping before the completed bricks are delivered on pallets to an off-loading conveyor 65 01 12a

1966

Since 1945 council built 5942 houses & 344 under construction; private builders 3398 completed, 324 started - 66 08 13 [9.8]

1967

Is shortage of £3,000 houses for young couples – 67 08 09 [9.11]

James Street resident commits suicide – 70 03 11 [9.14]

1971

Cambridge first local authority get Improvement Area projects off ground since Government announced them 2 years ago – 71 10 18 [9.15]

1971

Arbury residents cut off from shops; is functional and austere, offering adequate homes at economic rents and a place to sleep. But few pensioners can afford price of bus ride to centre and council puts off cheap bus fare scheme – 71 03 19a

1971

6,000 properties could become the slums of tomorrow unless deterioration is halted and basic amenities installed – feature – 71 04 02

1971

Prime, Cambridge building firm started more than 150 years ago cease trading, main yard at Adam & Eve Street – 71 12 22

1972

3-bed semi costs over £6,000 – 72 01 01[10.1]

1972

Government plans to release land for private housing, stop hoarding which causing house prices to spiral; 6 acres sold Arbury – 72 04 27, 72 07 08 [10.2,10.4]

1972

Are 2,700 outstanding planning permissions – 72 05 08 [10.3]

1972

Squatters in John St (others in 1974 & 75) – 72 10 05 [10.18,19]

1972

Cambridge Squatters group formed May, 2 mothers take house Milton Road; 2nd house Huntingdon Rd; evicted by Kings from Milton Road house – 72 05 24 [15.5]

1972

City Council taken over John St squat – 72 10 02 [15.6]

1972

As Cambridgeshire house prices soar - in one area up by 100 per cent in six months - estate agents report an acute shortage of houses for sale. And the houses that do come up on the market are snapped up immediately. The agents put the blame on the lack of building land released by the planners and that fact that more people than ever are able to buy their own homes c72 03 21

1972

The Conservative chairman of the Cambridgeshire Planning Committee, Tony Cornell, has told the Government that local councils should be allowed to buy land compulsorily unless land prices come down quickly. The cheapest houses in Cambridge and county will cost £9,000. And only one fifth of the young couples who want their own home will be able to afford one. What land is coming on the market now is changing hands at £30,000 -£40,000 an acre and rising c72 04 18

1972

Robinson and Gimbert, the Cambridge builders with reputation for high class work have been taken over by one of the "big boys" of British home building. From next week they will be trading under the direction of T & E Homes ltd of Reigate. The Cambridge firm who started in

Guildhall Street 25 years ago and moved to Victoria Road six years ago have 60 full time employees. Robinson and Gimbert currently have schemes on the go at Oakington and Stapleford, and recently completed one at Waterbeach. They build about 50 houses a year c72 05 12

1972

Cambridge City Council have halted the demolition of some of their old prefab bungalows at Histon Road while officials find out if they could be used for housing Ugandan Asians. The bungalows, which were built shortly after the Second World War as temporary homes, are being demolished to make way for a large council houses and flats development. A few of the buildings are still occupied but the tenants are due to move shortly c72 09 116

1973

200 squatters occupy Owlstone Croft, Whitehall changes mind & can stay [Misc.5.3];

1973

CCAT occupy Owlstone Croft which closed since 1969 – 73 10 11[15.8]

1973

Squatters forced from Bateman St – 73 01 23[15.7]

1973

Plans for 1,200 houses, Cherry Hinton – 73 94 25 [10.5]

1973

“All available council housing land will be used up by 1978” – 72 11 01[10.6]

1973

Claims by a prominent Cambridge trades unionist that many bored and disgruntled Cambridge city council tenants were demanding to be moved from the Arbury estate were rejected this afternoon by the Housing Committee chairman, Coun John Powley. The claims were made by Don Millard. He said both young and old people were asking to be moved nearer to the city centre because they were bored with life at Arbury. He added that the boredom was due to the lack of social and community facilities and a dearth of public houses. The claims were supported by Coun Mrs Janet Jones, a Labour county councillor for the area. "Arbury and Kings Hedges are just like an isolated satellite town", she said. "People are always asking us to help them move away because they do not like living there" c73 06 23

1973

No more Cambridge council houses will be sold after April 1st – because the waiting list of people who want to rent them is growing daily and building land is running out. The new Labour controlled Cambridge district council also intends to clamp down on speculators who buy old houses cheaply and sell them at big profits after modernising them with the aid of improvement grants. During the last five years almost 300 city council houses have been sold to tenants and a number of other possible sales are in the legal pipeline c73 11 17

1973

A 160-foot-high chimney that was used in the old days as a furnace for brick-making in the heyday of the Cambridge brick industry is now a pile of bricks, strewn about a sticky clay building site off Coldham's Lane, Cambridge. The chimney was abandoned well before the last war and remained as a blackened reminder of the glories of an industry past its peak. The new owners of the site, J. Coral Estates Ltd, decided they did not need it at their £3 million warehouse and industrial development on the 11 acres they have bought so they blew it up. The bricks will become the fill for part of the new warehouse development already christened the Coral Park Estate c73 12 10

1974

£1.24 million land purchase will mean 600 council houses Ditton Lane; first phase 218 agreed 1975 74 08 07 [10.8]

1974

“Planning controls are responsible for high prices” - Parry Lewis [10.8a]

1974

Housing Corporation became major funding source for housing associations 1975

1974

Rent Act hits landlords, students housing advisory service set up - 75 10 10[15.4]

1977

32 lived in boarded-up James street houses – 77 02 05 [15.3]

1977

Next stage of development announced - 155 houses at Kings Hedges – 77 12 08 [7.3]

1977

Cambridge councillors are considering a new plan for building large numbers of low-price houses. A major building company would build houses to a standard design on a number of council-owned sites; the council would prepare the land, put in sewers and build estate roads. They would then buy the houses from the builders and sell them to young people living in council houses or who are on the waiting list. The plan is linked with a savings scheme aimed at giving first-time homebuyers enough money to put down as a mortgage deposit. Coun. John Powley said: “We are determined to give as many of our tenants as possible the opportunity of buying their own homes – and this is a new way of doing it”. c77 03 06

1977

There are almost 400 properties standing vacant in Cambridge according to the Empty Property Action Group. More than 200 are houses of which the great majority are privately owned. There are 1,026 people on the council’s “live” waiting list and another 1,400 seeking council accommodation at some future date. Numerous organisations are seeking accommodation for special groups like the College of Arts and Technology, Women’s Aid, Fulbourn Hospital and Cyrenians Night Shelter. The Kite and Castle Street areas share the highest concentration of empty property. The city council are worried that the list could serve as a kind of housing register for squatters. c77 11 18

1978

Squatters protest over eviction Kite [494.7.8]

1979 council house sales stopped, 4,000 on waiting list – 79 07 20 [10.9]

1979 Kerridge builders into liquidation due financial difficulties (had been sold to Matthews Holdings in 1973 when employed 1,000 & taken over by others) – 79 01 04 [7.8]

1979 Two hundred people employed by Cambridge building firm R.H. Smart have lost their jobs. Work has ceased on the firm’s major council housing jobs at King’s Hedges, Arbury, where it contracted to build 214 houses and flats and employed 80 people. The firm began in 1960 as a plumbing business; it started on its first council housing contract in 1974 and took over Newmarket builders M. Carrick. Next year it had contracts worth £4 million to build 400 council houses c79 01 28 [7.13]

1980

“Self-sufficient house” experiment abandoned after death of originator, started 1971 – 76 02 06 [8.7]

1980

Pre-fab bathrooms need replacing, £320,000 bill- 80 07 18 [10.10]

1980

Cambridge Housing Society Danesbury Court for older people on ground floor & young couples on first

1980

The name Kerridge is to appear again in the title of a Cambridge building firm. Mr Paul Kerridge, great-grandson of the man who started the group has taken a 75 per cent share in the company which operated for 100 years. It was sold to Matthews Holdings but when that group was taken over the Kerridge part was put up for sale and has since been in several hands. The business will be run from Sturton Street on the site of the original firm's small works department and in the shadow of its former headquarters 80 07 21

1980

Over 2,000 people are waiting for a council house in Cambridge with 900 applications this year. New legislation enabling tenants to buy their properties at discount has also caused problems as the Government has banned spending on new building. One way to house more is to reduce the time between a house being vacated and the new occupant being allowed in. But the council often has to call in specialists in dry rot or roofing. Unimproved terrace housing is very expensive costing twice that in Peterborough 80 11 14b [10.12]

1980

Government Housing Act frees council house sales; threaten to put in special commissioner if Labour council don't sell; first sale July; ordered to complete sales preliminaries for 800 houses by December 80 09 30, [10.13-14]

1981

Cambridge Housing Society George Pateman Court Tenison Rd for disabled, single people, single-parent families

1981

Since 1962 the price of a semi in Perne Road Cambridge has risen from £3,000 to £30,000 and in De Freville it is much higher. The leap in prices in the early 1970s meant that first-time buyers they turned to the Mill Road area and prices rocketed. If you had bought a terraced house in Romsey Town in 1962 it would have cost £1,350. Now it is worth more than £20,000. 81 05 14c

1981

Mr & Mrs Jack O'Dell, the first Cambridge council house tenants to buy their own homes were given a potted plant when handed the keys to their house in Carlton Way. With a 50 per cent discount the three-bedroomed house has cost them £9,375. More than 800 other tenants have asked to buy since the law was changed last October 81 07 09

1981

George Pateman Court was built by the Cambridge Housing Society to provide homes for the disabled because they were told the need was acute. But few have applied. The project on Tenison Road has a prime site close to shops and transport and is designed with wide doors for wheelchairs; there are raised gardens and places to charge up electric cars overnight. 81 07 09a

1982

Cambridge City Council have just sold 191 council houses at an average price of £11,500, with another 550 sales in the pipeline. Anyone who has been a council tenant for three years is entitled to a 30 per cent discount on his house valuation if he decides to buy. It can be a good investment as houses in Cambridge are at such a premium that everything sells, provided the price is right.

82 03 18

1982

Cambridge isn't an easy place for a couple to buy a house for the first time. The average purchase price is around £22,000 which means finding a deposit of £2,500 and with mortgage interest rates of 12 per cent over 25 years would cost £148.82 a month after tax relief. Currently a modernised

Victorian house in Newmarket Road is on sale for £22,250 and a two-bedroomed, centrally-heated house in Stanley Road costs £21,500. 82 09 16 & a

1982

Newnham is a unique and quite exceptional area of Cambridge, and planners intend to keep it that way. Its 'up-market' aspect is reflected in property prices. A 10-bedroomed house at 5 Cranmer Road recently sold for £145,000 while £38,000 buys a three-bedroomed house in Owlstone Road. Properties in Gough Way fetch about £65,000, Grange Road £59,000 and Hardwick Street £39,500. A flat at Cherwell Court, Barton Road is £38,000 for a 99-year lease while one in Westberry Court is £60,000 82 11 04

1983

Three-quarters of lodgings converted homes & hostels in Cambridge area substandard – 83 12 05 [15.1]

1983

A much-heralded district heating scheme which was installed in 234 council houses and flats at Lichfield Road and Neville Road is being scrapped after only 10 years. The pipes which are buried deep underground leak. There were claims it would be much cheaper but tenants said their homes were unnecessarily hot, giving 70 degrees in living rooms and 65 in bedrooms when temperatures outside were freezing. It will be replaced by individual central heating units in each property. 83 04 29 p9

1983

Seventeen flats and maisonettes being built as part of the Grafton Centre are now on the market. The flats in Fitzroy Street have a bedroom, living room, kitchen, bathroom & private rooftop terraced areas and sell for £29,500. The maisonettes are on two floors and have two bedrooms, they sell for £42,000. The scheme also includes 22 one-bedroomed flats in Christchurch Street which will be available on a share-ownership basis through the King Street Housing Society. Most have been allocated already 83 08 04 p12

1986

Cyril Ridgeon began his tiny timber business in one room in St Barnabas Road in 1911. Now the company is celebrating 75 years of trading. During the war they stored timber on behalf of the Government sending supplies down to London to repair blitz-damaged houses. The firm opened branches at March and Saffron Walden and is now planning to move its Tenison Road and Cavendish Road operations to a new site on Coldham’s Lane 86 01 07 & 86 01 02

1986

When Charles Kidman decided in 1876 to start up his own building business Britain was in the midst of a recession. Yet within 20 years he had built most of Romsey with its distinctive terraced houses plus a whole series of large contract work which enabled him to retire at the tender age of 40! Today, 110 years later, Kidman & Son is a thriving business with another Charles Kidman at the helm determined to maintain the family tradition of personal service coupled with flexibility. From their workshops in Victoria Road teams of bricklayers, carpenters and labourers are on hand for the craft of building 86 02 19b & c

1986

Squatters at the old Salvation Army shop in Mill Road doze on sofas and chairs by the log fire or in sleeping bags in the eaves of the roof, and when they need a toilet they wander to the public lavatories just down the road. The squat is a protest to high-light the social depression, unemployment and lack of facilities for the young. Anarchist slogans have been painted boldly over the shop front replacing the old religious messages. 86 10 07a

1986

The Council is undertaking its biggest renovation to wipe out some of Cambridge’s worst living conditions. After 15 years the damp-prone bathroom ‘pods’ stuck on to brick kitchens will be removed from Darwin Drive, Akeman Street, Stretton Avenue and other streets. The modernisation programme will transform pokey 50-year-old homes into spacious, modern accommodation. There will be a new bedroom and bathroom, fully-fitted kitchen, central heating and new windows. Residents who move out for the 20 weeks of renovation can claim a disturbance allowance of several hundred pounds. 86 10 28a

Cambridge Housing Society had changed emphasis to single people [Misc.2.3]

1987

Firm quits as house prices soar - cannot recruit staff [NS.1.6]

1987

Rapidly rising costs caused by glut of building work hits projects [NS.1.11]

1987

A local building firm marked 30 years of existence in style with a special celebration. C.G. Whitmore & Son started in a garage at the bottom of its founder's garden. It is still firmly ensconced behind 159 Cherry Hinton Road, the terrace house that was home as well as business headquarters for company founder Cyril George Whitmore who died in 1980. In the early days they undertook mainly decorating jobs and domestic repairs. Now they will undertake any building project from house extension to house building. 87 03 23a

1987

Store giant Sainsbury's has announced plans for a superstore on the Arbury Camp site, creating more than 300 jobs. The supermarket could occupy a six-acre site closest to the interchange between the Northern Bypass and Histon Road. It would have a petrol station, coffee shop and parking for 500 cars. There would also be a park-and-ride site. This would be part of a mixed development of retail and research areas with a large ornamental lake. An Inspector has recommended that the site be taken out of the belt because it made a minimal contribution to the special character of Cambridge. But planners have so far disagreed 87 03 24

1987

The search for somewhere to live is becoming increasingly desperate. Yet more than 400 council homes in the region are standing empty. In Cambridge – where the council housing list tops 4,000 – one property in Fen Road has been empty for a year, another in Long Reach Road for nine months and one in Oak Tree Avenue for 20. At Girton four police houses have been empty for almost two years. Officials say some need repair, campaigners claim it is down to inefficiency. 87 08 10b

1987

Cambridge Housing Society celebrates diamond jubilee – 87 10 20a

1987

The family-run small works roofing and plumbing company of TR Freeman began trading from a terraced house in Histon Road in 1887. Their early customers were Cambridge colleges who demanded an exacting standard of work on superb buildings and companies in the Freeman Group still work for them, fulfilling the need for traditional skills using traditional materials. The firm has expanded into an internationally operating combine with a workforce of more than 300. Now celebrating its centenary, it is shortly to move into new corporate headquarters on the outskirts of Cambridge 87 11 04

1987

When it comes to housing, Cambridge is a victim of its own economic success. A traditional flow of brains drawn to the university has been bolstered by a growing influx of well-paid workers attracted by a booming high-tech sector resulting in rocketing property prices. More and more native Cambridge people are being squeezed out of the property market: 35 per cent of locals cannot afford to buy, with an average home costing £70,000 (about £161,000 today). Private housebuilders say they are hampered by the Green Belt while Councils are struggling against a Government keen on ending their roles in housing provision. There are 4,000 people on the city council waiting list, many of whom will never get a home 87 12 14b

Harold Ridgdon was one of Cambridge's most famous self-made men. From humble beginnings, he graduated from Cambridge University and began his own business in 1927 with a couple of men and an agreement to build a pair of houses in Perne Road. His success was such that in 1936 he was able to purchase William Sindall, an old-established Cambridge builder. During the war they took on responsibility for airfields and defence work and today the company has a turnover of £60 million a year. His other business interests included Abington Farms, W.J. Atkins meat producers, the Gonville Hotel and the Cambridge Building Society. He was also chairman of Cambridge City Football Club for many years. 89 09 19

1989

Government clampdowns on local council spending mean no new Cambridge housing schemes will start next year, even though there are 4,000 people waiting for a home and the council has £39 million in the bank ready to spend. And council house maintenance and improvement schemes will also be cut back under rules that come in with the new poll tax. There are 100 homeless families for whom the council provides temporary accommodation. Nearly 30 are in private bed and breakfast accommodation for which the Government pays most 89 12 22

1990

H.C. Moss, the building company, was started by Cliff Moss in 1962 with two employees; now it has 150 based at Cottenham, to which it moved in 1977. Much of their workload is construction projects of which the majority is housing estates. It also specialises in the renovation and conversion of period buildings into flats and apartments. One such project is the Riverside Mill at Godmanchester. Now they are working on a Maltings renovation at King's Lynn with an indoor waterfall and 19 luxury flats opposite Tattersalls in Newmarket. – 90 02 23b, c

1990

Cambridge's most luxurious flat is one of three penthouses in a new block called The Oast House at Pinehurst South off Grange Road. It has three bedrooms with a spiral staircase leading to a striking room like a Kentish oasthouse with a 25-foot ceiling and glass doors on to a roof garden. It will have all the luxury fittings expected including a video surveillance system. The Cambridge-based developer Nigel Grimshaw says "Nothing approaching it has ever been offered in Cambridge". The developers have produced a 52-page book listing its attributes 90 03 28a, b

c.24.2 : water supply

Pump, Peas Hill 1907

170.69

Headlines

1888 scheme to obtain further supplies from a spring at Fulbourn, foundation stone laid in October [1.24]

1891 new supply from Fulbourn starts

1897 new pumps installed to supply combined total of 2.5 million gallons a day

1899 Borough council seeks to promote a Bill to allow municipalization of tramways, lavatories, crematoria & water supply but this is rejected by ratepayers in December [1.10]

1902 Cambridge Water Company sued Messrs Kerridge and Shaw for water supplied for a building in course of construction in Rose Crescent, Cambridge. The supply recorded by a water meter had increased from 78,000 gallons one quarter up to 220,000 gallons the next. A new meter was installed and consumption fell. They claimed the old meter must have got out of order. But it was quite possible considering the number of taps they were using that one was left running and the water wasted. CDN 1902 12 18

1906 According to a Government expert who was sent down to inquire into last year's outbreak of typhoid at Fulbourn there is a 'potentiality of danger' that the water supply of Cambridge might become contaminated with the Asylum sewage. Their present system is antiquated - it is irrigated over grass land and may percolate through the soil into the vast subterranean lake beneath from which the Water Company pumps their supplies. We do not want even the 'potentiality of danger': the public health is too serious a matter about which to take any risks whatever. 06 04 04

1906 News that the Cambridge water supply might be polluted by sewage from Fulbourn Asylum has spread alarm and is getting the town into disfavour. More than one anxious father or mother as they read the report in 'The Times' will decide "We must send Jack to Oxford" and we fear that the entrance at the University next academic year will suffer considerably. No trace of contamination has been discovered up to present but even the possible risk must be removed. 06 04 24

1906 Cambridge water supplies might be polluted from sewage from Cherry Hinton and Fulbourn. Householders use pails for the collection of excreta and if this is spread on the land then the possibility of typhoid organisms finding their way into the water supply must be remote. A more serious menace is the soakage of infected matter from improperly-constructed cesspools and the sewage from the Asylum. Some Cambridge people have started to boil their water. 06 06 14a & b

1906 Considerable panic has prevailed in Cambridge following a rumour that typhoid germs have been found in the water supply. Recently certain organisms known as 'coli' which closely resemble the typhoid bacilli were discovered but they are absolutely innocuous. However in view of the boring operations near Fulbourn Asylum and the remote possibility of contamination experts suggest that all drinking water should be boiled. 06 07 25b

1907 It is alleged that Hobson's Stream is being 'tapped' by some unauthorised body and the supply of water for public purposes is fast diminishing. Not so. To restore its former volume it simply needs flushing. Water comes from Shelford to the conduit in as plentiful a supply as ever but it is many years since the pipe which feeds the Market Hill fountain was adequately flushed and an accumulation of rubbish prevents it receiving the amount of water it should. There is some difficulty in deciding whether the town council or the Hobson's Charity are responsible, but the cost would not exceed £5. 07 04 27

1908 An inquiry into Cambridge water supplies heard that the bulk of the sewage from the female side of Fulbourn Asylum was disposed of in the Rectory Field and that from the male to the west. This was found to be faulty, very faulty. In 1905 there was a serious outbreak of typhoid fever at Asylum with some 70 cases and 16 deaths after which Dr Copeman investigated. He did not want to be alarmist but an inquiry into possible sewage contamination would reassure the public. 08 02 19 & 20 [1.11]

1908 Government Inspectors say a large source of Cambridge water should be abandoned as it is dangerous to the lives and health of the inhabitants. It had been suggested that contamination came from Fulbourn Asylum sewage but the experts say the danger comes from the villages of Cherry Hinton and Fulbourn where the method of sewage disposal are at the very least primitive. Even if sewage was excluded from the present leaky sewers it would still be disposed of in cesspools and there is no certainty that these would not leak. CWN 08 12 11

1909 investigation finds bacillus but Water Company reluctant to give details [1.12,1.13]

1910 Company seek a Bill to sterilise by chlorine or ozone both Cherry Hinton and Fulbourn works but this fails. Parliamentary approval given to construct a new well and pumping station at Fleam Dyke, work starts

1910 Cambridge Waterworks Company's Bill passed by select committee of the House of Lords. It would allow for the sinking of a new well outside the polluted area.. But if the prehistoric methods of sewage disposal in villages been corrected the whole problem could have been ended. 10 04 15

1910 Cambridge University & Town Waterworks Company Bill examined by House of Lords – 10 04 15c & d

1911 Borough council try to acquire powers to purchase water undertakings. Bill passes Select Committee of House of Lords on April 8th but with conditions that involve scrapping the existing water works & providing for a fresh supply from Fleam Dyke. Later the Select Committee decline to add the clause to the Waterworks Bill [1.14]

1911 'Water supply pure' claim [1.15]

1911 The longest drought since 1887 has happily come to an end and heavy rains have reduced the torrid heat. In Cambridge the hottest day was August 9th when the temperature was 95 degrees in the shade. Messrs Pain's records go back 43 years and the only other record of that figure was on 15th August 1876. During violent thunderstorms lightning set fire to farm buildings at Friday Bridge but the brigade was powerless as there was no water to put it out. 11 08 25a

1921 Fleam Dyke station opens, was delayed because of World War 1 Fulbourn and Cherry Hinton works close down

1921 Waterworks Company proposed Parliamentary Bill opposed by local authorities – 21 03 23h

1931 Borough Council promote Bill to acquire the Waterworks company in April, ratepayers reject proposals December [1.21,1.22]

1931 Since 1904 the charges for the water and the poor rates have each risen by over 300 per cent. But whereas the services of lighting, better paths, roads and sewerage have increased enormously the supply of water has been just the same. The Water Company has simply passed any extra charges on to the consumer. Now they are unwilling to agree to a take-over by Cambridge Town Council. But no parliament will refuse any town the right to its own water supply. The anti-Socialist composition of our legislators leaves no doubt that the stockholders will be generously treated 31 04 10l-n

1931 Waterworks purchase proposal – history of water company – 31 04 10d-n

1931 A crowded meeting at Cambridge Guildhall threw out proposals for the Corporation to take over the Waterworks Company. Were they going to get a cheaper or more efficient service? No. There had been no serious criticisms of the management and there would be heavy legal expenses and compensation to directors. But the creator had given mankind three essential things: sunshine, air and water and it was immoral for water to be kept from the people by private enterprise. 31 12 18 e f g

1933 Water Company's scheme – new main for Cambridge – 33 01 27e & f

1933 Waterworks company list of plumbers – 33 02 20b

1934 "This is the first time in history that a water company has of its own free will undertaken the softening of its supply", the Chairman of the Cambridge Waterworks Company said at the laying the foundation stone of its new water-softening station on Fulbourn Road. Cambridge water is abundant and pure but being drawn from a chalk formation is of necessity hard in quality. A considerable number of private water-softening plants have been installed but these will soon not be worth their salt and people should ignore the blandishment of salesmen. 34 11 24b

1935 It will cost less to wash in Cambridge from now on, thanks to the Cambridge University and Town Waterworks Company's new water-softening station at Cherry Hinton whose plant was

designed by Messrs Roby of London. They were a public utility company which while it had a duty to their shareholders, also had a duty to the public. So when in 1934 the Company had at long last freed itself from the heavy financial drain incurred by the obsolescence of the old Fulbourn pumping station, much consideration was given to the problem of how subsequent revenue surplus could be handed back to its customers. 35 06 07 & a (continued until 1975)

1936 King's College had employed a firm to supply a pump to serve half-a-dozen jets of water at their fountain. They had intended to use the water over and over again but found that with the heavy wind the water was blown over the gravel and did not go back into the fountain. So they had connected the mains to make up the loss. This contravened Water Company byelaws and there was a danger of contaminating the supply 36 10 20a

1937 Cambridge University and Town Waterworks Company's new workshops and depots in Rustat Road would lead to improved service, enhanced efficiency and – sooner or later – reduced charges. The old premises in Bene't Street had been a veritable shambles and disgrace with pipes stored at the disused Cherry Hinton and Fulbourn pumping stations. They would wage ceaseless war against waste by leakage and had a gang of plumbers ready to deal with any emergency 24 hours a day with the promptitude of the London Fire Brigade. 37 10 23b Waterworks Company new workshop and depot foundation stone, Rustat Road – 37 03 27c [1.5]

1938 Market Hill fountain water not fit for human consumption – 38 03 22e

1938 Cambridge University and Town Waterworks Co, new workshops & depot – 38 05 30g

1939 Protest Meeting in the Hempstead schoolroom against losing the water of the Fountain. Villagers made indignant expressions against the Saffron Walden Rural District Council for posting on the Fountain a notice stating 'that the water supply would be discontinued as the Council's main supply was now available. Villagers maintain that the Fountain has supplied the village with drinking water for generations past and there was also a great demand by travellers, hikers, cyclists and motorists passing through. It was emphasised that the water had been analysed from time to time, and was stated to be perfectly pure spring mineral water, always flowing in abundance and recently approved by the Ministry of Health for dairy purposes. It was known as the "Dipping Well" until about 60 years ago, when the overseers of Hempstead village built up the Fountain and it was paid for by subscriptions collected from the villagers. 39 09 01 CIPof

1939 Progress is being made on the construction of the Cambridge Waterworks Company's new reinforced concrete service reservoir on Lime Kiln Road. With a capacity of two million gallons, it will double the available storage so that in the event of a breakdown at the pumping station the supply could be maintained for practically two days. Over 1,400 tons of concrete and 150 tons of steel will be used. When finished the banks and roof will be soiled and sown with grass seed to provide effective camouflage for something which would doubtless prove attractive to raiding aeroplanes 39 04 27a

1939 Cambridge Waterworks Company's new 2,000,000 gallon reservoir on Lime Kiln Hill, Cherry Hinton, opened. 39 12 22 CIPof

1939 It is unlikely that the Water Company's source of supply, the Fleam Dyke pumping station, would be chosen as a target by enemy bombers or that a direct could put both duplicate sets of machinery out of action. However the disused Fulbourn pumping station has been completely reconditioned as a precaution. But if Cambridge was raided it is almost inevitable that water mains would sustain considerable damage the Manager said. The Company supplied water to 81,000 people but this may well be increased to over 110,000 by evacuations from London, 39 05 01 & a

1939 Waterworks new service reservoir is most up-to-date in country; Fulbourn pumping station brought back into use as ARP standby; history – 39 07 22

1939 The new concrete reservoir on Lime Kiln Hill has been built partly below ground and covered with earth which will be sewed with grass seed, adding a pleasant green mound to the skyline. To guard against an interruption in supply due to a breakdown of pumping machinery or the bursting of trunk mains, the Water Company now had a duplicate plan together with a reserve of four million gallons – nearly two days' supply – in its three reservoirs. 39 12 16

1943 East Huntingdonshire Water Company wound up – set up 1887 to establish water works in Cambridgeshire and Huntingdonshire, recently taken over by a joint water board formed by the Ministry of Health – 43 10 20

1945 Waterworks booster station, Castle Hill opened to boost supplies to north Cambridge – CDN 1945 07 13

1947 Housewives are dealt yet another blow today. Cambridge University & Town Waterworks company will reluctantly be compelled to close down the water softening plant at Cherry Hinton. Cambridge's water will then be about twice its present hardness. There have been drastic reductions in the coal required to evaporate the brine at the salt works in Cheshire. Mr Philip Porteous, managing director of the company told a reporter "The Government takes the view that water softening is one of those amenities without which we can manage in times of crisis, but we appreciate only too well the difficulties of the housewife in these days of soap rationing c.25th February

1953 Cambridge Waterworks Company celebrate centenary, June [1.18]

1953 The condition of the stone of the conduit head on Cambridge Market Hill has been found to be much worse than anticipated during recent demolition work and so the Council will be recommended not to rebuild it. The condition of the stone was such that the only part which could be safely re-used was the four pillars and the cost of restoration would be at least £4,000, double the previous estimate. They propose to loan the carved figures from the conduit to the Folk Museum. c53 10 15

1953 A decision not to rebuild the Conduit head in Market Hill, Cambridge was described as a retrograde step by Ald James. "I know it is the fashion to run down Victorian architecture but I think it was very seemly. I think we should rebuild it in the same style". But Ald Priest said "If in ten years' time people see pictures of the Conduit as it was, there will be nothing to prevent them from replacing it by photographs. The majority of people are quite satisfied and the Secretary of the Preservation Society has written to say how nice we have made it". c53 10 16

1954 Fulbourn pumping station reopens September [1.19]

1954 The Cambridge Water Company is to start work immediately on a new five-million-gallon reservoir on Lime Kiln Hill which will double the reserves of water. Rainfall during the winter months had been substantially below average and the replenishment of underground water storage severely diminished. A low rainfall next year might endanger their ability to maintain supplies during periods of peak demand. Improvement had also been made to the Fulbourn Pumping Station where new machinery would soon be installed; this will afford temporary relief from the situation where demand for water had equalled their maximum yield c54 02 27 [4.1]

1955 Cherry Hinton water-softening station opens, July [1.20]

1955 Cam valley water supply scheme – 55 11 17b

1956 Sir George Thomson, a Nobel prizewinner in physics and Master of Corpus, said that by 1975 the majority of the electricity generating stations would be driven by nuclear energy which in future would replace 'fossil fuels'. At present motor cars run on fuel derived from oil, but nobody knew how long this would last. A more immediate problem was a shortage of water; even the rainfall of Cambridge was near the desert limit, we are taking out more than is going in and shall have to cut down. 56 08 03

1957 Hobson's Run, the water channel down each side of St Andrew's Street near Christ's Lane is neither picturesque nor traditional, councillors said. It was originally built to carry away the refuse thrown from houses in St Andrew's Street but was a danger to cyclists and shoppers were often splashed. Now it will be diverted underground to allow the road to be widened. 57 11 28

1958 suggestion to put Hobson's Conduit underground between Emmanuel & Christ's college, only 50 years old, no water runs down it; decide to go ahead [3.1]

1958 should Hobson's run be preserved – 58 01 17 and history – 58 01 31a

1958 Cambridge Water Company originally hoped the new Great Wilbraham pumping station would help meet the ever-growing demand, even in times of severe drought, until 1965. But the experiences of last summer have prompted a less optimistic view and they were sinking a trial bore near Stapleford. They are also moving from Bene't Street, where they have been since 1866, to new offices in Rustat Road. 58 03 03

1958 Cambridge Water Company opened its new office block in Rustat Road. It was formed 106 years ago by twelve townsmen and ten prominent members of the University and now supplies 120,000 people. There was an exhibition of nylon sink tops, Perspex baths and fibre glass cisterns instead of the old-fashioned ones made of galvanised iron 58 09 20a[1.25]

1961 Chesterton and St Ives Joint Water Board to transfer water undertakings to Cambridge University & Town Waterworks Company – 61 05 12a

1962 Hobson's Conduit section Gonville Place & University Arms abandoned, causing problems under houses & new pipe laid Parkers Piece [3.3]

1962 Water undertakings administered by local authorities in St Ives, Ramsey, Chesterton and South Cambridgeshire are to be transferred to the Cambridge University and Town Waterworks Company – 62 01 06a

1963 City water mains frozen, January [1.26]

1963 Company's area of supply extended from 60 to 453 square miles & name changed to 'Cambridge Water Company' : have taken over other supplies, including South Cambs & Chesterton RDC following many objections after discussions since 1959 [4.3-6]

1966 new £4^aM reservoir Lime Kiln Hill in use within year [4.7]

1967 Hobson's Conduit : plaque to commemorate restoration [3.2]

1967 Parish Pump Peas Hill removed for repairs but no re-erection due to cost, was used to wash down old fish market; goes to Folk Museum [3.5]

1973 Water Act creates Anglian Water Authority but Cambridge Water Company functions as agent for water supply drought, water levels lower than ever before [4.9]

1976 Fleam Dyke steam pumping engines finally stop after 56 years

- 1976 Hobson's Brook dries up possibly for first time [3.4]
1976 to fight AWA take over [4.10]
1976 11 month drought, only half rainfall in last 12 months (to July) some County houses cut off due shortage but Cambridge Water Company supplies adequate [4.11]

1977 stays independent AWA [4.12]

1981 More than 8,000 old wells could be tapped if water supplies are threatened. But many have fallen into disuse, are capped or not officially recorded. The water could be quite usable since they are on underlying chalkland which acts as a great purifying agent but the Anglian Water Authority are concerned about the risk of pollution: it wouldn't do for them to distribute contaminated water. 81 04 29

1983 water workers strike [4.13]
1983 The giant Fleam Dyke steam engines that supplied Cambridge's water for more than 50 years are slowly disappearing. The twin 180-horse-power horizontal engines, named Anderson and Lilley, stopped working back in 1976 and are now being dismantled for scrap. They were a showpiece for parties of visiting schoolchildren until a massive piece of machinery flew off. Now parts will be going to steam engine centres or sold to private buyers. They are just too big and expensive to move 83 06 17 p24

1987 Fleam Dyke engines dismantled [4.14]
1987 A water pumping station at Fulbourn is to be closed and replaced by two others costing £1 million. The old pumping station, which opened in 1888, will be sold raising money to offset the cost. It was too close to a built-up area, posing danger of pollution, and did not produce enough water. The new stations are at a field at the edge of the village and Weston Colville. 87 06 10

1988 Cambridge Water Company subject to French take over bid [CEN 7.7.88]
1988 Fulbourn water pumping station was built by the Cambridge University & Town Waterworks Company in 1888. The pump was taken out of service last year. Now it may be turned into a house and four flats. Sale by auction 88 12 01b

1989 Cambridge Water Co now safe from French takeover ¢CEN 23.1.89

headlines

Thomas Hawksley built gas works in Cambridge – feature – 82 09 28a

1896 serious gas explosion, Park Street [1.3]

1897 carbonising & purification plants enlarged at cost of £10,000

1898 pre-payment meter introduced, consumers provided with a cooker on loan & 30 feet of service pipe free of charge. Heating stove also available for hire

1898 Thrifty wives, hopeful maidens, and even thoughtless bachelors assembled in large numbers when an exhibition under the auspices of the Cambridge University and Town Gas Light Company was opened. Some disappointment was occasioned by the announcement that Miss Richmond would not be able to give her lecture owing to the fact that her cooking utensils had not arrived, but as a solace a male assistant gave an illustration of how a bachelor's breakfast could be cooked in 12 minutes on one burner, and with a very small expenditure of gas. An attractive feature of the show is the penny in the slot cookers. These should prove a boon to the working classes, a single penny releasing enough gas to keep a single burner alight for 5½ hours
c1898 10 09

1899 Act extends area supplied

1900 consumption up to 255 million cubic feet

1904 “it used to be the common opinion that electric light would entirely supersede gas but actual experience has exposed that fallacy”; Gas company maintain mantles at bare cost & supply appliances on deferred payment scheme - up to £300 payable by instalments [1.10]

1904 A clay gas pipe has been dug up in Newmarket Road. It is probably one of those used when coal gas was first introduced to Cambridge about 1836. Previous to this oil gas was manufactured by John Grafton from works in Staffordshire Street and found considerable favour with inhabitants until about 1830. Six years later he began to manufacture coal gas; there were only two small gas holders and by 1848 only 400 street lamps. Now the Cambridge Gas Company supplies 1,160 public lamps in the town alone. 04 12 10

1905 further modifications to plant, 11,095 cubic feet of gas produced from one ton of coal

1906 Most people have seen gas works and will remember the great gaping mouths of the retorts, belching forth hungry flames and intense heat, where perspiring half-naked men laboriously shovelled-in coal and at the end of the process raked the cokes out under even more trying conditions. They could not work many hours at a stretch and needed much beer. Contrast this with the De Bronwer method which now obtains at the Cambridge gasworks and seems marvellously simple 06 02 07 & a & b

1907 A new development of gas lighting in St Andrew’s Street renders the exterior of the New Theatre almost as light as day. By the use of an automatic compressor the power of ordinary incandescent light is increased fourfold but cost of the gas consumed is halved. There are two other installations in Cambridge, one in the locomotive department at the railway station and the other at Messrs Crossman’s knitting factory in Norfolk Street. 07 01 09

1909 “gas shop set out like a restaurant due to the popularity of gas for cooking; despite electricity gas continues to prosper, the great red gasometers rise up daily like red mushrooms. New showroom Sidney Street attracts great attention [1.11]

1909 co-partnership scheme enables employees to become shareholders recreation club founded

1909 An explosion occurred at the Cambridge Gasworks on Newmarket Road. Two men working on the top of the beds of the retorts were badly cut but managed safely to descend a ladder to the ground. Covered with tar and bleeding profusely they were conveyed in a cab to Addenbrooke's Hospital. One refused to be put under chloroform whilst his injuries were dressed as that would necessitate his detention in the Hospital. CWN 09 09 24

1909 The Cambridge Gas Company’s Employee’s Institute includes hot and cold baths, a reading-room and a large hall heated by hot water pipes making it a place where they may find healthy recreation out of working hours. The Company hope to introduce a system of co-partnership, making every employee a shareholder and giving a bonus in shares every profit-making year. CDN 09 10 26

1909 An old Fenlander walked to Cambridge seeking a good square meal. He searched a goodish few streets and wandered into colleges seeking a good juicy steak. Getting desperate he noticed a shop in Sidney Street where spread out on a gleaming white tablecloth was an amplitude of appetising cold viands. He entered only to emerge swearing: “That be a gas shop, and I am starving”. He was right. It has been opened to demonstrate the popularity of gas for lighting, heating and cooking. CWN 09 11 05

1912 mains extended to villages around Cambridge workers laying main Huntingdon Rd find skeleton, rebury it alongside pipe [1.12]

1912 A conference on rural water supplies heard that many villages are supplied with drinking water from shallow wells just a few yards from a leaky cesspool or privy-pit. These often leak: the emptying of such receptacles is very unpleasant work and if they are made water-tight needs doing more frequently so it often happens that a crowbar is used to make a water-tight cesspool leaky. The roofs of average village cottages are scarcely desirable gathering grounds for drinking water but often the water thus collected and stored underground is infinitely safer than from wells and being soft is usually preferred for use in tea making and cooking 12 02 02a Constance Cochrane evidence – 12 02 02b

1913 half people in old Cherry Hinton now converted to gas, new penny-in-slot meters fail to work [1.13]

1914 War results in shortage of labour & women employed at gas works

1915 motor transport introduced; during War some operated by gas, supply being carried in bag fixed to roof (repeated during World War II)

1917 Gas Explosion,—A gas explosion under the floor of the bar of the The Jolly Butchers public house, Newmarket Road, Cambridge, caused a fire to break out on Thursday morning. The landlord, Mr. A. W. Hawes, had a narrow escape, for, although knocked down by the force of the explosion, he escaped injury. The cause of the explosion was apparently a leakage of gas, but exactly how it occurred is unknown. The gas meter was blown from its position, and three large windows and a quantity of glass in the bar were broken. The floor boards became ignited, and although the licensee took prompt action, he found it impossible to extinguish the flames with buckets of water, and so gave the alarm to the Fire Station. The firemen, with motor tender and escape, were speedily on the scene, and the fire was soon extinguished. An examination of the gas pipes failed to reveal from where the gas escaped 17 02 14 CIP0f

1919 supply dwindles due to coal shortage [1.4]

1920 Gas Company workmen return from war – Ch 20 04 14c

1921 gas charged by therm rather than 1,000 cubic feet

1921 Gas Company war memorial unveiled – 21 06 29c; photos 21 07 27a

1923 'Regulo' controlled ovens appear major rebuilding, including new coke handling plant

1924 Six men were injured at the Cambridge University and Tow Gas Works this morning. It appears that 16 men were engaged in the oxide of iron purifier, when an explosion occurred. Oxide of iron is used in the manufacture of coal gas, and after having been in use is revived by the generation of heat. The explosion was followed by a fire. It was found necessary to send for the Dennis motor engine so that water could be pumped from the river c24 03 26

1927 new monster gasholder - largest in East Anglia [1.5]

1929 Coldham's Lane railway sidings (constructed 1867) increased to 2© acres & rotary wagon tippler installed; by 1949 handle 1,500 tons a week

1930 new plant introduced throughout decade

1931 Mr J.W. Autherlonie, manager of the Cambridge University and Town Gas Light Company since 1902 has seen many changes. During the Great War 70 women worked there, doing exactly the same hard tasks as the absent men. But on the return of the men they retired and today only one is engaged in this capacity. Eighteen of the employees fell and the war memorial, placed in a garden surrounding the works, is counted amongst the best of its type.

31 05 01a

1932 mains extended to Cottenham & Milton

1933 new plant means that ammoniacal liquor no longer sent by barges to Kings Lynn chemical works, two gallons of benzole obtained from each ton of coal carbonized

1933 A house in Parkside was severely damaged when an explosion, suspected to have been caused by gas, blew out almost the whole of the front upper part of the building. There was a flash, followed by a tremendous explosion and the wall appeared to be driven across the road. James Langdale, heedless of danger, broke in the front door and searched for the old lady inside. He found her on the top landing, terribly injured with her clothing alight. 33 01 23 & a & b was first house to be building bordering Parkers Piece

1933 Gas exhibition – ‘housewives wonder’ – 33 03 20

1934 James William Auchterlonie was for over 30 years manager and engineer of the Cambridge Town & University Gas Light Company during which the annual output has risen three-fold. He was responsible for the adoption of a co-partnership scheme by which employees as well as shareholders enjoy a proportion of the profits. After the war he received Government recognition for his services in connection with the supply of high explosives. His loss will be keenly felt in Masonic and Rotarian circles

34 08 10

1935 authorised to extend mains to further 11 villages including Coton, Waterbeach & Willingham

1936 Gas demonstration platform at Premier Hall, Union Lane – photo – 36 11 09

1937 The Cambridge Gas Bulletin started

1937 The head offices and showroom of the Cambridge University and Town Gas Light Company in Sidney Street, where all the most modern and efficient appliances for heating, cooking, refrigeration and lighting can be seen, were built in 1909. Today the total number of consumers is in the region of 25,000. Recently the villages of Willingham, Longstanton and Oakington were supplied with gas and mains are being laid to Sawston. 37 01 15b

1939 University Gas Light Company install new carbonising plant – 39 02 24a

1941 new plant produces 40 tons of crude tar a day.

1942 During war make hydrogen for barrage balloons

1942 Gas Works tar storage tank catches fire, two men die – 42 04 04b

1945 Cambridge and the balloon barrage: war work at the Gas Works – were 2,400 balloons. In 1940 supply of hydrogen became difficult and Cambridge approached as to facilities available

such as blue water gas and steam or existing plant such as purifiers and gasholders. Was one of 19 sites selected and production hydrogen started early 1942, producing enough for 8,000 balloons. They brought down enemy aircraft over an East Anglian city. Output increased due large number balloons required for the flying bombs. Loads of long round steel cylinders on long trailers carried them. Ascents from Midsummer Common before the last war needed gas supplied from the Newmarket Road works by a main specially laid for the purpose. Recently have made nitrogen of very high degree of purity for Air Ministry – CDN 1945 06 27

1946 Gasworks explosion and fire injures seven workers – 46 06 25

1949 205 miles of mains now in use Cambridge University & Town Gas Light Company nationalised under Gas Act 1948

1951 Residents of Abbey Ward, Cambridge, described as “a constant menace to health” the dust which comes from the Gas Works and enters their houses. Mr W. Barling produced a sugar bag half filled with dust which he said was collected in his house in one week. Another resident said she could not put her children in a pram in the garden because of the dust. A Gas Board official said a contributory factor may have been the burning of wood owing to the shortage of coal resulting in more dust and smoke getting into the atmosphere. The works had the reputation of being one of the cleanest in the country. As soon as the gas industry was nationalised endeavours would be made to reduce the problem c51 06 14

1955 new retort house started [1.6]

1955 Cambridge Gas Works is progressing with its new retort house near the Newmarket Road end of River Lane. The interior of the old disused retort house has been completely demolished and the new one should be completed by 1957. Coal will then flow into the retorts through closed hoppers and the coke will be extracted already quenched, eliminating a prolific source of dust and grit which has caused complaints from nearby residents. 55 03 16c

1956 A fire-eating gargantuan of a bygone era made its last journey when a steam-powered ‘Super Sentinel Wagon’ completed its last run at the end of a degrading tow from another vehicle. For the monster, which started service with the Gas Company in 1928, is no longer able to run on its own steam. It carried coal from Coldham’s Lane sidings to the works but today stands in Messrs Silverman’s scrapyard in Ditton Walk awaiting the oxy-acetylene cutters which will render it a heap of metal. 56 03 01f [1.17]

1956 A Sentinel steam wagon has been recommissioned at the Cambridge Gas Works as a means of conserving petrol. It has been out of action since May when it was taken off the road because of its age. It is the only vehicle of its type now working in the country and will be used for conveying coal from the Coldham’s Lane sidings to the Gas Works. 56 11 23

1957 new carbonising plant installed, now entirely supplied by coal gas, will ensure self-sufficiency in coke for many years [1.9,2.1]

1959 Severe damage was caused to a newly decorated house at 48 Beche Road when a gas main in the hallway blew up with tremendous force. Neighbours thought a jet bomber had crashed, so fierce was the explosion. Many people dashed into the street and saw flames bursting through the front door. The Fire Brigade could not get to the blaze until the gas company people turned off the mains. The owners had noticed a terrible smell of gas which made them feel dizzy but said the Company had been blowing out the pipes and had warned them of a smell. 59 08 21b

1961 A new plant at Eastern Gas Board's works in Newmarket Road will produce gas from oil, replacing a 22-year-old retort installation which produced tar and coke as well. It will be more economical and reduce some of the dust emissions which have caused many complaints. The new plant is housed in a sound-proofed building and any surplus will be pumped into the gas grid which now covers the local area. But it will still use 400 tons of coal each day so grit will not be completely eliminated. 61 04 27 & a [2.2]

1961 Joseph Farrington has worked for the Gas Board since 1917. He operates a Super Sentinel Loco, called 'Lucy', at the Coldham's Lane depot. Every morning he gets it going on a diet of wood and coke, eases her out of her shed and down to the six trucks with which they move supplies of coal from the main railway line, depositing it in a tipper. The operation is repeated until 400 tons have been shifted. The coal is then taken up into a hopper and unloaded into a lorry which transports it to the gasworks on Newmarket Road. 61 09 08c

1961 New gas plant operates without causing dust and smoke – 61 10 26

1962 Gas Board to pay cost of decontaminating River Cam after oil from the Gas works polluted the river – 62 01 25

1967 3 gas suicide students, natural gas to come a year early [2.14]

1968 North Sea gas conversion begin (? Cambridge given priority because of numbers of student suicides) [1.2,2.5]

1969 Gasworks ceases production after 140 years to make way for sea gas, 60 lose jobs – 69 6 06c

1970 Science laboratories devastated in big explosion laboratory on New Museums site – 70 08 17, 18; caused by natural gas – 70 08 22

1971 Fire at gas works when oil residue caught alight as workmen using acetylene torches cut metal plates from demolished gas storage tank – 71 03 06

1971 Gas works retort house demolition – 71 10 08

1973 90 foot high gas holder demolished, was erected 1908 [2.11]

1979 6 miles of gas pipe replaced with plastic pipes [2.12]

1983 A terraced house in Bateson Street was destroyed following a massive gas explosion in a kitchen at the back of the house which blew out walls and windows. The occupier fled with his back in flames. Neighbours said they had smelled gas and a service pipe to the meter inside the premises was found to have been cut through. Council workmen demolished part of the house to make it safe. 83 01 10 [2.13]

1990 Fifty families were forced to flee their homes after a gas pipe blew up in Alpha Terrace, Trumpington, sending gas streaming into the street. Emergency teams were called and the street sealed off. Residents were taken to the Fawcett School – 90 06 01

1889 Cambridge Improvement Commissioners consider four schemes for the provision of electricity, Council favour municipal electric generating scheme [P.14]

1890 obtain Cambridge Electric Order

1891 Bailey Grundy & Barrett produced first lighting 1891, sold goodwill to Cambridge Electric Supply Co 1896; supplied private electrical generating plant to colleges & country houses till 1914-18 war; sale premises 1973 [271.7.5]

1891 The building where the first electricity for lighting in Cambridge was generated is now on the market. The property, No.2 Market Passage, was the premises of Bailey, Grundy and Barrett, electrical contractors. In 1891 the firm produced the first electricity for lighting in the city with a gas engine and a dynamo installed in the basement. In those early days private electrical generating plants were supplied by the company to several of the Cambridge colleges. Until after

the 1914-18 war such plants continued to be installed in country houses in outlying districts. As this business declined, the company moved into wireless, the design and making of temperature control equipment for laboratories and other specialised apparatus c73 03 04

1891 Council authorised to borrow £35,000 for scheme but run into technical & financial difficulties [P.14]

1892 Cambridge Electric Supply Company established, begin construction of power station at Thompson's Lane, Magdalene College objections unsuccessful [P14]

1892 electric light introduced into ten colleges & business establishments [1.4,P14]

1895 electric floodlighting installed to illuminate ice skating at Newnham [P.14]

1897 An extraordinary general meeting of the Cambridge Electric Supply co. Ltd was held at the Company's offices, Thompson's Lane, Cambridge. The chairman reported that their first capital had been £40,000 which had been spent on plant and the necessary things to equip the station. They had gone over that and had borrowed £2,250 from the bank. The business of the company was increasing and the capital must be increased too. Now was the time for shareholders to reap the reward of their enterprise if the use of electric light became universal in Cambridge 1897 08 04

1898 St Mary's substation equipped & Guildhall sub-station demolished [2.10.11]

1898 That electricity is a great boon everyone is prepared to admit, but we shall enjoy better when scientists have solved more of its mysteries, and when it has dropped the tendency to drop and die away just at the time when it is most required. The New Theatre is one establishment where loss of light means loss of money. The incandescent lamps with which the interior is efficiently illuminated drooped and finally the current failed all together. Having been accustomed to brilliant electric light, the fact that the theatre was illuminated by means of ordinary lamps gave rise to much comment amongst the audience. As far as the stage was concerned the management had taken the precaution of retaining the gas. However before the performance commenced the truant current resumed its ordinary course and gave the steady light which continued the remainder of the evening c1898 11 02

1899 Messrs Bailey, Grundy and Barrett, electrical engineers were summoned by the Cambridge Electric Supply Company for connecting a wire in a house in Bridge Street house without their consent. The Supply Company had laid mains to Mr Nichol's house with a meter, and a wire leading from the meter to light the house. The wires were placed there in 1893 and were temporarily reconstructed last year. Subsequently Bailey's were called in to put in wires for additional lights for the house. The new wire was connected with the main whereby it was possible for current to be consumed without being register by the meter 1899 05 16

1902 Cambridge Electric Supply Company reported that they would probably outgrow the present site, in Thompson's Lane. They had secured a site at Chesterton, situated at the side of the railway line so they would be able to bring coals into the yard and they had also arranged for the use of the river and the road. The site would not be required yet but as no other spot on the river was so placed they were justified in buying the land. CDN 1902 02 12

1902 The demand for electric light is continually on the increase and Messrs Millington and Everett, King's Parade, Cambridge, have a good show of high-class electric lamps which they are selling at 1s. These lamps are guaranteed to be much more economical than the ordinary electric lamp. Telephone and electric bells are also well displayed here. CDN 1902 12 27

1904 St Pails & All Saints churches lit by electricity [1.5]

1907 Mr E.E. Marshall, electrician of Castle Street said he was formerly employed at the University Laboratory and afterwards had sole charge of an electric plant at Holt. In 1905 he installed the electric light at Leonard Mortimer's hairdressers saloon in All Saints Passage. Messrs Bailey, Grundy & Barrett said the work did not test high but not low enough to condemn it. The claim was settled 07 06 27a

1908 Sir – the idea of electricity generated by peat gas appeals to residents in the Fen country where peat is so plentiful. The black swamp possesses theoretical heat values not far below coal when thoroughly dried. When economically farmed, stored, dried and made fit for burning by steam boilers or 'producer gas plants' it becomes a formidable rival to coal with its ever-fluctuating price – James Smith 08 04 04a

1912 Cambridge Daily News becomes first newspaper printed by electricity in Cambridge [1.13]

1913 Electric supply company report 13 02 21 p10 CIP

1913 Electric Supply Company annual meeting 13 02 28 p4 CIP

1923 Mr R C Pierce the manager of the Cambridge electricity supply company said that there was there had been three central generating stations built in 1891 of which Cambridge was one. They were built to prove that the turbines could work for in those days everyone was afraid because of the speed of the machine. The dynamos gave trouble and used to burn out at inconvenient moments. Cambridge started in 1892 and was run by very carefully trained men whose motto was "Never mind what happens, keep it going". Some people thought that the power in the town was very costly but it compared favourably with others of the same kind c23 11 19

1925 proposed electricity scheme - Bedfordshire, Cambridgeshire & Huntingdonshire electricity company envisages overhead lines [1.6]

1925 The Bill to electrify Cambs., Beds & Hunts comes before Parliament this session. A great generating station will be erected at Lt Barford. At first they propose to develop the central area including St Neots, St Ives and Ely & to give a supply in bulk to Cambridge and Newmarket. To help the electrical development of the railways it is proposed to link up with the transmission lines of the North Metropolitan Electric Power Supply Company and to afford a supply to the main railway lines within the area c25 02 11

1927 virtual reorganisation of the Cambridge Electricity Supply Company by association with Edmundsons Electricity Corporation, speculation over reactions of Corporation, perhaps a reduction of price ... "High time Cambridge brought more up-to-date in public & private electricity supply"[1.9,1.11]

1927 expanding net-work of electricity power cables reach Cambridge & one of terminals installed in field adjoining the Observatory, Madingley Road [1.12]

1929 Caxton Rural Council received a letter from the Beds. Cambs. and Hunts Electricity Company seeking permission to fix an overhead wire from St Ives to Eltisley. The line would go through Hilton and Papworth and be a great boon. Mr Moss asked if the wires would be high enough to clear a man on a loaded cart. He had seen the wires near Cambridge and they seemed very low. The Chairman said this was a matter for the owners of the land. He pointed out that it was the top wire that was the dangerous once, and the lower ones were merely guards. c29 01 23

1929 An explosion in St Andrew's Street plunged a considerable part of Cambridge's shopping centre into darkness. The cover plate of a junction box of the Electric Supply Company was

blown off and several people had a narrow escape from injury. Flames leapt up from the hole and blazed fiercely. For some minutes there was great excitement, people rushing hither and thither. Police whistles were blown and the Fire Brigade turned out but found that the fire had already been put out by a motorist with a fire-extinguisher from his car. Shops and houses in a large area were deprived of light and the printing of the 6.30 edition of the C.D.N. was held up. 29 12 04

1930 new Electricity Company offices & showrooms opened 4 Market hill [Cam p109]

1930 The Beds, Cambs and Hunts Electricity Company sought permission to erect a power line across the Waterbeach Lodge estate. They wanted to supply the village with electricity and had secured way-leave for the whole route apart from this one pole. But the owner, T.C. Lethbridge said the overhead wires would cross a paddock and he would be unable to let it. He wanted an underground cable laid instead 30 08 20c

1931 When R.C. Pierce took up an appointment with the Cambridge Electric Supply Company in 1908 it was a small affair with about 1,400 consumers. Now it has risen to 8,000 with 150 employees. During the war he was a Coal Conservation Officer and made much of the apparatus used by the V.A.D. massage and electrical treatment department. He was one of the original members of the Cambridge Rotary Club and Commodore of the Cambridge Motor Boat Club 31 05 08b

1933 Cambridge was thrown into a state of chaos by the failure of the electric light system over a very wide area. The breakdown started when lights grew dimmer and dimmer and finally went out altogether. Shops, offices and private homes brought candles into use. One ingenious garage owner switched on the lights of the cars in his shop window showrooms. At the CDN office reporters wrote by bicycle light and headlines were set by hand with the aid of a supply of wax tapers 33 11 16

1935 Cambridge council's decision not to purchase the 1890 electricity undertaking hardly came as a surprise. Only the members of the Labour Party who believe in public ownership of all utility services were in favour. The undertaking would have had to be split into two parts but the Company offered to reduce the price of supply by 25 per cent if the council waived their option. Several councillors are not averse to taking over the whole concern when it comes up again in 1945 35 03 09e

1935 Electricity supply company future 35 03 07a & b 35 05 08 & a

1938 R.C. Pierce retired as general manager & engineer of the Cambridge Electric Supply Company. Since he came in 1909 the Company has changed almost out of recognition. None of the original generating plant remains; recently the old-fashioned 90 cycle single-phase supply was replaced by the modern 50 cycle three-phase system and whereas when he started the annual output was only 600,000 units now it has risen to 15 million. 38 01 08

1940 After 50 years' service with the Cambridge Electric Supply Company, Mr. J.H. Taylor has just retired. He began when it was first formed in 1892. He was actually on the staff before the first power station was built. Nine years later he became secretary, an office which he has held for the past 39 years 40 06 07 CIPof

1947 nationalised under Electricity Act of 1947, boards constituted 1st January 1948 [3.1]

1947 It was a bewildering experience to visit the Cambridge Electric Supply Company's power station, Thompson's Lane, during one of yesterday's peak periods. Bewildering because of the steady hum of the generating plant, the mass of gauges and dials, the terrific heat thrown out as the inspection doors in the coal-burning "stokers" were opened and because of the comparatively

small number of men engaged in controlling this veritable image of machinery. While the bulk of Cambridge's power is generated at the station a proportion comes off the nationally controlled "grid" - 47 12 03

1948 Some of the proud achievements of the Cambridge Electric Supply Company were recalled at the last meeting of the Company at the University Arms. The Company ceased to exist from April 1st having been absorbed by the Eastern Electricity Board, one of 14 boards set up under the new Electricity Act. The Cambridge company is one of the oldest in the electricity supply industry, and first started work of supplying electricity to the citizens of Cambridge in 1892. Today over 25,000 consumers are supplied with electricity by the Company at prices which compare more than favourably with those made in towns similar in size c48 04 01

1949 Cambridge, like the rest of Britain, shrugged off a little bit of austerity when display lights went on again after ten years. It was only a little bit. For every lit up shop window in the town centre there were at least ten wrapped in gloom. Many hotel and public house signs were illuminated and the "great light up" had a good send off at the flag-bedecked Regal cinema where Mr Morley Stuart, editor of the C.D.N. operated a specially installed master switch in the foyer. It was the Regal's 12th birthday, all but a day c49 04 05

1949 "I think within 20 years time a considerable quantity of our electricity will be produced by the disintegration of uranium rather than the burning of coal", Dr T. Allibone told the British Electricity Authority's school at Cambridge. Within the next 30 years possibly all the world's power would be produced from uranium. "You will have to get rid of about 200 tons of fission products per annum. Where are you going to take it? What you produce is like radium. It is terribly dangerous, and goes on being dangerous for a decade". The problem of the disposal of radio-active fission products is one of the greatest sociological problems of the whole lot c49 04 07

1953 A well known figure for many years, Mr Robert Pierce, has died. He joined the old Cambridge Electric Supply Company in 1908 as manager and engineer and stayed until 1938 when he retired and was placed on the Board of Directors where he remained until the industry was nationalised in 1948. In his own private workshop he built a good deal of the equipment used at Addenbrooke's Hospital in the early days of X-ray. c53 01 13

1957 The Eastern Electricity Board has installed V.H.F. Radio control in its mobile vehicles which range from heavy field vehicles to vans used by electricians engaged in house repairs. One lady from Bassingbourn telephoned to report a fault but before she put the receiver down the electrician was knocking on the door! The main transmitters run night and day allowing communication between vehicles and there is a portable transmitter that can be taken home by the controlling engineer in case of an emergency during the night. 57 08 03a

1958 works in conversion of electricity voltage from 200 to 250 volts, hoped to complete by 1971 when 25,000 consumers will have been put on new voltage which will be standard throughout City. Changeover to cost £249,000 [2.2]

1959 The inaugural meeting of the Cambridge Electrical Association for Women heard that when the Association started in 1924 electrical appliances were just beginning to find their way into the home. Housewives joined to get over the fear of electricity and to get the best value from their appliances. With machines men always want to know how they work and women are contented if they work but now they are giving a scholarship to a girl wanting to study engineering at Cambridge University. 59 05 19 & a

1959 Mackays of East Road has donated a Blackstone horizontal diesel engine to Freetown, Sierra Leone. The engine was first installed in 1930 and gave them complete independence to power cuts. It ran throughout the war with virtually no maintenance. They have completed the electrification of their plant and John Mellanby, the well-known Cambridge electrician, suggested it be offered to the Technical Institute over there. Similar engines have been working at Heffers printing works and Coulson's wood mill 59 08 20

1963 (Thompson's Lane power station feature Feb 1963 [2.12])

1964 generating station can produce 7,000 kw hour but only used as peak periods [446.17.4]

1964 Electrical engineers are busy analysing the damage from recent storms. Special devices have been fitted to minimise damage – feature – 64 07 24

1964 Eastern Electricity's new Fens Sub-Area control room knocks spots off the old system used at Thompson's Lane. A huge panel displays the entire electrical network while control desks have radio communications and lists of emergency engineering staff who can be called out. There is a standby generator which starts automatically should the main power fails. All this is the work of Pye Ltd. There is not a second when it is left empty. But it is unlikely that full-scale automation will ever be introduced. 64 11 13

1965 works in conversion of electricity voltage from 200 to 250 volts, hoped to complete by 1971 when 25,000 consumers will have been put on new voltage which will be standard throughout City. Changeover to cost £249,000

1966 Thompson's Lane power station to close [2.2]

1966 Electricity power station Quayside wreathed in scaffolding prior demolition – photo – 66 04 01

1966 Electricity generating works – scaffolding erected to demolish chimney – photo – 66 04 23a

1970 Electricity strike cuts expected to black out central Cambridge – 70 12 10 [2.3]

1972 last house converted to 240 volts, 35,000 houses converted in 10 years [2.7]

1972 blackouts - cuts extended to 9 hours [2.4]

1973 Eastern Electricity this week produced a detailed rota and chart to help the public tell when their area would most likely suffer power cuts. A cutback in electricity supplies could take place tonight. Voltage reductions were feared during last night's period of peak demand - usually the largest of the week - but they were not necessary. The men's associations have agreed nationally with the electricity industry that they should get special payments for "unsocial hours" they have to work, but the agreement has been blocked by the government c73 11 09 [2.8]

1974 Cambridge has escaped lightly so far from the effects of the three-day working week. Only about 250 workers are being paid benefits by the Department of Employment. The vast majority of those temporarily laid off are receiving benefits from their own firms under a "do-it-yourself dole" scheme. The firms will be reimbursed later by the Department. At Saffron Walden the town's largest firm, Acrow Engineering Ltd, are treating Thursdays and Fridays, when industry in the area is without power, as part of their workers' normal holiday entitlement c74 01 12

1977 blackouts [2.9]

1977 Retailers in Cambridge city centre are angry because the power cuts threaten to deprive them of electricity for up to three hours every Saturday afternoon. They feel it is unfair that the same shops should face being cut off during a peak period every week. The manager of the Abbey Boutique said it could cost traders thousands of pounds. But Eastern Electricity say they have to think of the needs of all their consumers and the traders would do well to see how it goes this weekend before they start complaining c77 11 06

1980 Working windmills may return to the East Anglian countryside – not the drain the fens or mill corn, but to generate electricity. Scientists at Cambridge University's Cavendish Laboratory have been working on wind turbine design with the Central Electricity Generating Board who will shortly begin looking for an inland site for the first large wind-powered generating machine. These could be sited in flat lands where their impact on the environment would be less than on exposed hilltops. They would be mounted on towers 150 feet high and when their 200-foot blades turned each machine should generate enough electricity to heat 100 single-bar electric fires. 80 08 14b

1982 Thompson's Lane power station demolished [P.14]

M.J.Petty. A Chronicle of Cambridge News 1888 - c.24.8
c.24.8 : street lighting

New lights switched on, 1955

110.04

headlines

1894 Parkers Piece lamp standard erected, cost £39 [1.1]

1907 A new development of gas lighting in St Andrew's Street renders the exterior of the New Theatre almost as light as day. By the use of an automatic compressor the power of ordinary incandescent light is increased fourfold but cost of the gas consumed is halved. There are two other installations in Cambridge, one in the locomotive department at the railway station and the other at Messrs Crossman's knitting factory in Norfolk Street. 07 01 09

1907 Cambridge Gas Light Company told a meeting in St Mark's parish room that they would erect street columns, lanterns and piping, ready for lighting in any street in Newnham where the mains were laid and also lay mains in King's Road and Selwyn Road. They would keep lights burning all night for £2 12s 3d per lamp, including gas, lighting and extinguishing them, maintaining mantles and keeping the lamps clean and in repair. This was agreed unanimously. 07 12 14c

1910 After a very close debate Cambridge councillors voted to continue lighting the streets with gas. Councillor Kenney said the lighting was bad and it was ridiculous to think of giving a ten years' contract to gas. Street after street was almost entirely one-sided as regarded lighting. Beyond Hills Road railway bridge all the lamps were on the left hand side and the place was in shadow. Nothing could take the place of electric lamps suspended over the streets. But in London where there were no long lines of electric wires from remote stations there had been a number of breakdowns. How much more would that apply to Cambridge? 35 08 0

1911 Barnwell Bridge dangerous due to bright gas lamps dazzling road users [1.11]

1915 Extinguishing of Lights. — A new order, dated March 10, has been issued by the military directing the extinguishing of lights in the Borough. The order is issued by the Competent Military Authority for the district under the powers conferred upon him by Regulation 12 of the Defence of the Realm (Consolidation) Regulations, 1914. The order directs that all lights in the Borough other than lights not visible from the outside of any house, and such public street lamps as a Competent Military Authority, in writing, conditionally permit to be lighted, shall from the 10th inst. and until otherwise ordered, be kept extinguished or obscured between the hours of 7 p.m. and 6a.m. 15 93 12 cipOF

1928 Motoring friends have remarked that they consider the new island and lamp standard at the bend of Victoria Avenue, Cambridge, a danger to road users, and although the Corporation's object was to prevent accidents they may do more harm than good. The motorist who was unfortunate enough to crash into the standard this week had his vision partially obscured by heavy rain but it would be the easiest thing in the world for a stranger to meet with an accident there. Because of the green background of the trees the standard is not visible to motorists until they are nearly on top of it – why not paint it white? c28 09 04

1934 Cambridge council is to restore full all-night lighting in the streets following numerous complaints. The gas lighting is obsolete and the time would come when they would have to consider electric lighting. Even policemen were nervous about going down some of the unlighted streets: it is enough to make any policeman nervous when we know what is happening in the way of gangsters, one councillor said. 34 02 01

1936 street lighting on main roads improved [1.2]

1936 Cambridge street lighting is being brought up to standard. Hills Road and St Andrew's Street are already ablaze. So is Sidney Street. Twenty-three miles of streets will be illuminated by autumn. Side lights properly equipped with seven watt bulbs are all that are now required by motorists. Pedestrians and cyclists are now visible from afar after dark. The lamps are lit automatically by clock devices and soon the familiar figure of the lamp-lighter will disappear from the streets forever 36 07 04

1936 "Cambridge is now almost entirely covered with new street lamps, which will hardly be of any use until the dark evenings. Suggestions have been made as what to do with them during the long wait – as hanging baskets, clothes lines and even wireless aerials. But it is more than likely that owing to the summer holidays our streets will become so congested that we shall have to turn them into - police traps!" (Ronald Searle cartoon showing policemen with telescopes mounted in crows' nests high on lamp posts) 36 07 04a

1936 Specimen lamp standards had been put up so that everybody had equal chance of commenting and not one criticism had been received. So standards had been ordered and work was proceeding well. But then criticism poured in from the Preservation Society and Colleges who said the standards were not in keeping with the buildings around them. But while they had

antique buildings in King's Parade, they also had modern traffic passing along the road at the modern fast rate. Where were the protests going to stop? 36 07 30b & c

1936 More than 737 new street lamps had been installed and from Milton Road to Northampton Street there was excellent lighting. But the council had deliberately left a big black patch along the Backs. Discussions had taken place with the Cambridge Preservation Society and Heads of Colleges; Queen's Road was unique, they had to reconcile its beauty and character with the efficient lighting which would protect life 36 10 15

1949 sodium lighting tried in Trumpington street - the first such experiment [1.4]

1951 proposal to convert street lights from gas to electricity [1.5]

1952 conversion to sodium lighting, 400 in 4 months [1.6,2.1]

1953 Cambridge will be one of the first cities in England to be lit almost entirely by "sodium" street lighting. And, said the Mayor, it will be one of the best-lighted in the world. A motorist can appreciate sodium lighting better than any pedestrian can. Black spots and fog are obliterated. Trunk roads will be lit, stopping at the inner ring-road, as this type of light is not thought suitable for the historic city centre. A completely new type of lantern is being used which gives an exceptionally high light output in relation to the electrical energy consumed. c53 01 07 [1.7]

1953 Cambridge councillors approved a scheme for replacing gas lamps with sodium lighting along 'The Backs'. Ald Hickson wanted assurance this would not be a prelude to Queen's Road becoming a trunk road. It was becoming more frequently used. But the beauty was only apparent during daytime and at night it was only a blur of trees. The same arguments were probably put forward when the present gas standards were installed and in ten year's time the university would say what a lot of fools they were to oppose the scheme c53 05 05

1954 Sir Albert Richardson's candles installed [2.2]

1955 new fluorescent light Regent St switched on [1.8]

1957 The Cambridge Design Society considers the proposed new street lamps unsuited to the city. It is basically a glass cylinder five feet high, enclosing fluorescent tubes and mounted on fluted cast-iron columns. The design was adapted by a member of the Royal Fine Arts Commission from one used extensively in Birmingham. But a proposal of this scale should be brought to the notice of a wider public. 57 01 18a [1.9, 1.10]

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Sir – Orchard Street is one of the minor beauties of Cambridge. Its old gas lamps harmonized well with the curving row of low-roofed cottages, enhanced their picturesqueness and were charming objects in themselves. But they are to be uprooted and replaced by hexagonal aluminium obelisks which are out of character among old tiles and climbing roses. Orchard Street is not a bypass and does not need glaring lights. – Guy Ottewell 60 06 01c also: Opinion on new street lamps divided – Warkworth Terrace – 60 06 02a

1961 Having installed big sodium lamps to light the radial roads and then put the tall candle-shaped fluorescent lamps in the city centre, the council is now extending electric lighting into the side streets. Until now Hooper Street has been so dark that people avoid it at night and Gwydir Street would be in darkness were it not for two pubs shedding their homely light on the pavement. But the lantern of the gas lamp opposite the end of Sleaford Street is regularly knocked off by big industrial vehicles and elsewhere youths smash the lamp glasses with stones immediately after the gas man has replaced the last breakage. 61 01 26

1973 side street lights switched off, Christmas lights banned [2.4]

1973 A group of people found an unusual way to spend an afternoon on Saturday - using paint to pick-out the detail on a Cambridge lamp-post. The lamp-post which stands at the paths junction in the middle of Parker's Piece has for many years been painted plain grey. Now after some hard work by five friends part of it is resplendent in blues, yellows and red. The friends who are all students were led by brothers Sandy and David Cairncross. They obtained permission of the City Surveyor's department before beginning c73 10 30 [2.3]

1987 The replacement of old lampposts in the centre of Cambridge has aroused opposition. The old 'Candle' lamps were designed in the early 1950s by Sir Albert Richardson, President of the Fine Art Commission. Coun Andrew Duff says they are of considerable interest and are appropriate in the historic centre. Now the County Council is replacing them with modern steel columns which are cheaper to run, give out more light and make the roads safer for motorists and pedestrians. 87 09 14

1987 Cambridge residents should be given the chance to air their views about old-fashioned lampposts that are being replaced as an economy measure, says Coun Rosensteil. The 'Richardson Candles' along Magdalene Street were designed nearly 40 years ago by Sir Albert Richardson, President of the Royal Fine Arts Commission to fit in with the street. But the County Council claims they are expensive to run and that spare parts are no longer available. However the modern steel columns have angered environmentalists who say they are unsuitable for such a sensitive area. 87 10 20

Heffers bookshop, Petty Cury, 1962

152.47

c.25 : printing, books, bookshops

1896 Gustave David sets up book stall on Market Hill (by 1912 he is described as ‘an institution’) [1.171]

1896 Heffers bookshop Petty Cury opens [2.6]

1899 ‘Bowes & Bowes’ name established [2.2]

1902 A new branch of trade has been opened by the buttery of Christ’s college, Cambridge in the direction of a stationery store. The CDN has been favoured with samples, but the party had omitted to enclose his name or even say when he intends to “call for orders”. This omission is either intentional or points to a certain amateurism pardonable in a new venture. The samples are small post quarto Club writing paper priced at 1s.6d. per 5 quire packet; envelopes 1s.3d per 100 and writing paper with the college arms embossed in blue at 2s. Can any Cambridge stationer improve on these quotations? CDN 1902 02 01

1904 mechanised typesetting introduced by Cambridge Express Newspaper Co ltd, 1st in Cambridge to install monotype [3.2]

1907 Messrs Macmillan and Bowes, the well-known booksellers, have recently acquired the house over their premises at the corner of Trinity Street. On the new staircase, designed by Mr T.D. Atkinson, hangs a portrait of ‘Maps’ (John Nicholson) and old views of Cambridge. In the

new reading room are exhibited manuscripts and autograph letters from Wordsworth, Tennyson and Thackeray. One room is devoted entirely to Cambridge material of which Mr Bowes published a catalogue in 1894. 07 08 10 & a [1.13]

1908 Quite recently, the Burlington Press, which for a number of years carried on business in East Road, has removed to larger premises at Foxton. Dr Briggs, the founder of the business as an adjunct of the University Correspondence College entertained the entire staff to dinner inside the works and proposed a toast of 'Success to the University Tutorial Press' CWN 08 06 05 p6

1911 Heffers printers begin Hills Rd, purchased Black Bear Press 4.2 [3.5]

1911 The Black Bear Press was started by Mr Dixon, a printer and stationer, with premises in Hills Road and machinery had been bought. It had been placed on the Paris Bourse stock exchange but this had proved unsuccessful and had accepted contracts at unremunerative prices. They had now sold the printing plant and machinery as well as "The Gownsmen" but not "The Hairdresser" or "The Cambridge Directory" and there were shares in the Maxwell Publishing Company, for whom they did printing, creditors were told. 11 03 03b

1912 Assistant Booksellers Association formed – 12 03 08e

1913 Frederick W. Metcalfe was head of the printing and publishing firm of Metcalfe & Son on the corner of Green Street which at one time produced most of the publications emanating from Cambridge. Soon after he joined the firm the Cambridge Express was started and he had charge of this popular newspaper until his father's death when it was purchased by the Conservative party. He ran a local troupe of Christy Minstrels including the finest voices amongst the senior members of college choirs. It had a very successful career for several seasons and visited all the principal towns in the area 13 11 28 p7 CIP

1914 Deighton Bell now a limited company 14 12 11

1916 two booksellers – C.P.Porter & Leavis - help unemployed man, one supplies books the other a barrow, books sold at 1/- each [1.16]

1916 Death of Ald. W. P. Spalding. He was the eldest son of a printer, stationer and bookseller, Mr. William Spalding (Ipswich), and was apprenticed to his father. He started business in Cambridge on his own account in Sidney Street, Cambridge, in 1873. This prospered and was enlarged in many ways, and in 1881 he became a member of the Cambridge Town Council, proving an expert debater and administrator. Mr. Spalding was elected to the aldermanic bench and in 1908 was chosen Mayor in succession to his friend, Mr. H. G. Whibley. He had been appointed a J.P. in 1897. During 35 years of faithful public service, Ald. Spalding left his mark in many ways upon the affairs of the borough 16 03 22 CIPof

1920 W.H. Smith dinner staff includes J.F. Ballinger, bookstall manager at Cambridge station – memories – Ch 20 12 08c

1920 Bookbinders Union branch reopened 1917 after being closed for 50 or 60 years; three years ago average wage very low and negotiations had taken place. Employees resisted minimum wage for women; 60 women had been on strike for a fortnight - CDN 20 11 04

1922 University Press celebrates 400th anniversary of first Cambridge printing press [1.6.]

1923 Cambridge is justly proud of its business veterans, and it may truly be said that no one is held in higher respect than Mr William Heffer. He started as a groom but resolved to make a start in business on his own, and opened as a stationers and newsagents in a shop which is still his, the Post Office in Fitzroy Street. It has been said that Mr Heffer to a large extent altered the character of Fitzroy Street, for when he introduced to Cambridge the 25% discount off books, university men and others not accustomed to frequenting that part of the town, began to stream up there, and, of course, other tradesmen - benefited in consequence c 23 05 27

1925 Very many residents of Cambridge who in their leisure moments wander round the Market Place to see what literary treasure may there be picked up will be interested in a movement set on foot by prominent members of the University to do honour to Mr G. David, the well-known bookseller, who has had a stall there for close on thirty years. A luncheon will be given in the Old Combination Room, Trinity college in appreciation of the conspicuous service he has rendered to c25 06 09 [1.2]

1927 Nicholson's sketch of David published [1.12]

1927 Messrs Galloway and Porter, Cambridge, whose business operations extend to all parts of the world, have formed a private limited company. Mr Charles P. Porter, for many years sole proprietor, becomes chairman. He is well known as a Cambridge councillor and was formerly chairman of the Free Library Committee. His clients range from queens to factory boys and include foreign and colonial libraries extending to every part of the globe. c27 07 11

1929 Heffer's wonderful new shop in Petty Cury, Cambridge, is a book lovers' paradise. In the basement are 'remainders' at reduced prices while the ground floor is devoted to the latest publications and an extensive foreign literature section. A wide range of second-hand volumes occupies most of the first floor where connoisseurs of original editions will find much to interest them at prices from £5 to £250. On the second floor are oriental, foreign travel and fine art books while higher still are Heffer's own publications, many of local interest. There is a special reference department and out-of-print books service. The front design successfully combines and old-world impression with a modern style. 29 12 05

1930 From modest beginnings in Fitzroy Street the history of the House of Heffer is one of continuous progress. The Printing Works on Hills Road has been considerably enlarged, last year saw reconstruction of the Petty Cury Bookshop which is now twice its original size, and this year sees the reconstruction of the Sidney Street Stationery and Art Shop. It will be a shop worthy of its central position. The new premises will have five floors, the frontage will be in the Georgian style with pilasters, fascia and columns of grey polished granite and the upper part will be faced with red Flemish bricks with Weldon stone dressings to the windows. A unique feature will be the Picture Gallery on the third floor with a barrel-shaped ceiling 30 01 15

1930 The bookshops of Cambridge are a special feature of the town; no visitor can possibly miss David's stall on the Market Place where the book-lover may pick up a bargain. He came to Cambridge in 1896 and started his career at this stall; in 1906 he took a shop in St Edward's Passage, which is full of interesting old books and though often locked can be viewed at leisure in the window. In such esteem is he held that a luncheon was held in the Hall of Trinity College and a lithograph cartoon by Mr William Nicholson presented to him. 30 05 28a & b (major feature)

1931 George Brimley Bowes joined his father in the firm now called Bowes and Bowes in 1897 in the building known to be the oldest bookshop in the country. He became intimately connected with the business, as bookseller and printer and published the first works of J.B. Priestley. He founded the Cambridge branch of the T. H. C. and Cambridge Rotary Club. People who

associate many books with mustiness should speedily make his acquaintance and be disillusioned. 31 03 27c

1931 Counc. A Spalding – profile – 31 04 17a

1931 Arthur Heffer death – folk dancing leader – 31 11 06g

1932 John Austin Fabb started in business as a printer, moving to Guildhall Street in 1881 and Corn Exchange Street in 1920. He printed the Cambridge Review from its inception in 1879 and conceived the idea of a list of Resident Members of the University in 1890. During the war he compiled seven editions of the list of Cambridge University men on active service. He was a prominent Freemason and founded the York Street Sick Club. 32 08 19e

1932 J.T. Lambeth told the bankruptcy court he had started as a second-hand bookseller from a stall on Market Hill. Then he took a shop at 17 Peas Hill selling antiquarian books. But a slump in trade 18 months ago meant Americans were not buying books so he had to borrow from moneylenders. 32 12 09a & b

1933 Spaldings printers sued a University lecturer over an unpaid bill for publishing ‘Forestry Journal’ a magazine of the Cambridge University Forestry Students’ Association. He had brought in a considerable amount of copy, articles and advertisements together with photographs from which they had to make blocks. But the don claimed it was run entirely by undergraduates and it was the responsibility of the editor. He could not say who that had been. 33 01 19c & d

1933 Master printers and new CDN machinery – 33 04 26

1936 David dies, farewell to David [1.1,1.3]

1936 G.J. Gray was born in Pembroke Street and entered the firm of Bowes and Bowes in 1876. He was encouraged by the late Robert Bowes to prosecute his bibliographical work beyond the requirements of business and his publications on Cambridge booksellers and printers won him the esteem of University librarians. In earlier life he was connected with the Higher Grade and Camden Cricket Clubs, Old Chesterton Institute and Men’s Bible Class. He also organised the Penny ‘Pops’ concerts held in the Guildhall in years gone by. At his retirement The Publishers’ Circular praised his 60 years in the book trade 36 02 01

1936 Broadsheds were once very popular in Cambridge and now Dr F. Carr of Sawston has revived the tradition with one featuring Mr David who has been selling books for 40 years. He pays tribute in a poem printed on antique paper with two admirable sketches of David and his stall by his son, Mr Hubert David. The broadsheet is published at a shilling and should make a strong appeal to the friends and customers (the words are almost synonymous) of one of Cambridge’s celebrities 36 03 14a

1936 George John Gray entered the firm of Bowes and Bowes in 1876 and completed nearly 60 years’ service. Encouraged by Robert Bowes he carried out bibliographical work and researches, publishing several works on early Cambridge printing and bookselling. He also indexed the William Cole manuscripts in the British Museum. Mr Gray was a member of the Library Committee, secretary of the Higher Grade Cricket Club and YMCA and organiser of the Penny ‘Pops’ held in the Guildhall. He also played an active part in Chesterton Institute, Cricket Club and Men’s Bible Club, amongst others. 36 10 12a

1936 Gustave David, known as ‘David’ to generations of undergraduates has died hours after returning by the midnight train having attended a London auction. He came to Cambridge forty years ago, opening his now-famous stall on Market Hill. Later he opened a shop in Green Street before moving to St Edward’s Passage. He was the first man in Cambridge to sell rare and old books at low prices. So appreciative were Universitymen of his services that in 1925 a number of distinguished members entertained him to lunch at Trinity in recognition of the ‘conspicuous services he has rendered the cause of humane letters’. 36 11 20 a & b

- 1949 Rampant Lions Press set up by Will Carter [3.11]
- 1950 notes on George Stoakley, bookbinder, 80 [1.7]
- 1950 Mowbrays opens [2.4]
- 1951 The staff of Messrs S.C. Marshall & Sons, the old established local printers, spent an enjoyable evening at the Lion Hotel to mark 25 years of printing under the present ownership. A presentation was made to Mr B.G.T. Cox for 37 years' loyal service. In a witty speech he recalled that in those days there was no electric light or power, the premises were lit by gas and the machines – such as they were – were driven by foot treadles and the posters were hand-rolled and printed on hand presses. Since 1928 fully automatic machinery and plant have been installed c51 07 12
- 1951 Laurence Fletcher was given the challenge of opening a new Christian book shop in Cambridge in 1951; now Mowbrays which was founded in Oxford almost 140 years ago has a world-wide reputation. At his retirement party the Bishop of Ely read a letter from the Archbishop of Canterbury paying tribute to Mr Fletcher's enthusiasm and knowledge of books: "I can't imagine King's Parade without him", he wrote 88 11 16
- 1953 The site of England's oldest bookshop has just changed hands for the 14th time in more than 350 years. Messrs W.H. Smith have acquired Bowes and Bowes' shop on the corner of Trinity Street which has a heritage of bookselling, publishing and binding that goes back as far as 1581. In 1807 it belonged to John Nicholson, son of the celebrated 'Maps' who went his rounds of the University with a moveable stall laden with textbooks and called out "Maps and pictures". Later Kingsley and other literary men held 'tobacco parliaments' on religion and politics, Wordsworth reclined there, Thackeray dined there and Tennyson first read "Maud" in the Long Room, now the Foreign Department. c53 03 18
- 1955 Cambridge has a new publishing company. The Golden Head Press has been formed to promote the production of fine books with original subject matter that for economic reasons would normally fall outside the province of larger publishers. It has been run on a limited scale by Mr Raymond Lister but with its formation into a company the scope may be widened. The Chairman is Dr Philip Grosse, a Trinity don well known for his 'History of Piracy' and the secretary A.K. Astbury is a London journalist 55 01 22a [1.8]

1955 The Cambridge Express Printing Company has been acquired by W. Heffer & Sons. The 'Express' works have a long history. At one time they published a weekly newspaper which was eventually incorporated with the 'Cambridge Weekly News' which in turn amalgamated with the 'Cambridge Independent Press and Chronicle'. 55 09 10e [1.9,4.4]

1957 new publishing house, P.R.Macmillan, poetry [1.11]

1957 Heffers acquire Severs [4.4]

1957 A Penguin Bookshop has opened opposite the University Press in Trumpington Street. This is an innovation by Heffers for they will devote the entire shop to the display and sale of the thousand titles at present in print. The shop has been designed by Peter Bicknell who has preserved the pleasant original stone front whilst making the inside both gay and light. 57 04 06b

1958 Harry Ingrey was the first monotype operator in Cambridge in 1904 and apart from the Great War has been at the keyboard ever since. In the early years people from the University Press would call into the Cambridge Express Printing Works in King Street to see things new in the printing line. Harry recalls the pleasure of printing 'Granta' and its undergraduate editors – "everything always went nice and smooth with them", he says. 58 02 01b

1959 Modern traffic problems have brought to an end a Cambridge tradition. David's Bookstall has occupied its site on Peas Hill on Saturdays for more than 60 years but recently the street has been turned into an area where the parking of cars is prohibited during the busiest time of the day. Motorists objected that the stall took up as much space as any car so Mr Ashley Hubert David was asked if he would move his Saturday stall to its weekday position on the market square. Many customers are indignant about the change. 59 05 05 & a [1.17]

1959 Percy Piggott was owner of a printing business, a journalist, a keen Tory, an Amateur theatrical producer and a leading light in the Cambridgeshire Sailing Club. His father, Frank, founded the printing business in what was then called Caxton Court (now the front of Boots' in Sidney Street) and had been editor of the Cambridge Chronicle. Following in his father's footsteps he was University Correspondent for 'The Times' and official scorer of the University Cricket team, managing them on tours and producing a booklet '50 Years at Fenners' 59 11 21a

- 1981 Cambridge University Press's new £6 million office and warehouse complex, named the Edinburgh Building after the Duke, will be officially opened by the Queen. It has a number of unusual design features and can store up to 15 million books 81 05 20

1981 Newmarket millionaire David Robinson today announced he had given an extra £1 million to the college he founded. The news came shortly before the Queen and Prince Philip arrived in Cambridge to formally open it. But Mr Robinson did not attend the ceremony as he did not feel up to it. He is very frail. But 2,500 employees of the Cambridge University Press took tea with the Queen after she opened their new Edinburgh Building. 81 05 29, 30

1982 Equus bookshop opens, King St [2,11]

1982 More than 100 years of bookbinding comes to an end when the old established firm of John P. Gray closes down its Green Street premises. The firm was begun in 1847; it established a high reputation for the restoration and repair of ancient books and carried out special commissions for the leading private collectors. Planning permission has been obtained to turn the site into a restaurant and wine bar 82 07 28a

[6.8]

1983 Woodhead-Faulkner establish new co ICSA publishing [3.6]

1984 CUP celebrate 400 years printing [5.7]

1985 Heffers Penguin bookshop, Trumpington street closed [2,8]

1985 Reuben Heffer death – 85 07 19

1986 W.H. Smith, a familiar sight on Cambridge Market Hill for the past 25 years is to close. Staff will be transferred to their other shops in Lion Yard and at Cambridge railway station. 86 07 09

1987 Bowes and Bowes, Cambridge's oldest bookshop, marked the end of an era and the beginning of a new. The building on the corner of Trinity Street started as a bookshop under William Scarlett in 1581. It was acquired by Daniel and Alexander Macmillan who in 1845 laid the foundations for one of the largest publishing firms in the world. It became a literary centre where figures like Thackeray and Charles Kingsley were frequent visitors. Now it has been completely redesigned and reopened under its new name of Sherratt and Hughes. 86 10 16 [2,2]

1987 Black Bear Press was formerly known as Heffers Printers which was set by William Heffer in the 1920s. Now a new management are investing in the future. Black Bear does not produce the 'mainstream' books. Much of its work is producing journals including 'The Analyst' which has been printed by the firm for the Royal Society of Chemistry since 1922, and catalogues for Stanley Gibbons and other companies. They provide a data retrieval system when authors submit their disks and the data is transcribed into whatever printed format required. 87 07 29 [4.3]

1987 One of Britain's oldest booksellers, Deighton Bell in Trinity Street, which dates back to 1700 and specialises in antiquarian and rare volumes, has been sold to nearby Heffers. It takes them back to second-hand books, a department it gave up in 1974 because of lack of space. Then they had sold their stock to Deighton Bell and had maintained a good relationship ever since. The shop will remain on the corner of Trinity Street and Green Street and continue to be run by John Beech and his staff 87 04 28 [NS2.11]

1987 Sydney Cockerell, the Grantchester bookbinder who helped preserved some of the world's most important works has died, aged 81. An expert at restoring and repairing ancient manuscripts and early books, he revived the art of marbling paper. He bound works by Wordsworth, Milton and Tennyson and he designed and tooled binding for the House of Commons Book of Remembrance and many historic volumes. He was awarded the OBE and received an honorary degree from Cambridge University. 87 11 11

1988 Cambridge is set for a battle of the booksellers after news that the Waring and Gillow furniture store in Sidney Street will be refurbished as Dillons Bookstore. 88 02 20

1988 Dillon's bookstore, the largest in Britain, opens on site of old Dorothy – 88 10 01b

1988 Laurence Fletcher was given the challenge of opening a new Christian book shop in Cambridge in 1951; now Mowbrays which was founded in Oxford almost 140 years ago has a world-wide reputation. At his retirement party the Bishop of Ely read a letter from the Archbishop of Canterbury paying tribute to Mr Fletcher's enthusiasm and knowledge of books: "I can't imagine King's Parade without him", he wrote . 88 11 16

1990 Hobson's Publishing, Bateman Street, which has announced losses may be taken over by Daily Mail and General Investments group – 90 04 17a

1991 Sherratt and Hughes, Sidney Street to close. Is part of Waterstone's Booksellers and seeking larger premises. In recent times was known as Bowes & Bowes which was owned by W.H. Smith in the 1950s and then involved in a number of mergers. Its site of the oldest bookshop – 91 01 10a

Arthur Deck was one of the best-known inhabitants of Cambridge. Hundreds annually gathered on King's Parade to witness his quaint tradition of firing rockets at midnight every New Years Eve. As a young man he made balloon ascents including one from Fenner's when the balloon tore a slice off the pavilion roof. CWN 08 09 04 p5

Balloon ascents – historical feature – 62 07 21

1901 Mr Frank Cooper, an undergraduate of Clare College, made an ascent in a balloon from the grounds of the Welsh Harp, Hendon and dropped in a parachute from an altitude of 1,500 ft into the grounds of a private mansion about a mile and a half away. The parachute did not open immediately and the daring aeronaut had a dead fall of at least 300 ft after which the canvas inflated and then descended gradually. Mr Cooper is engaged in the study of aerostatics and intends to apply himself to the problem of aerial navigation, which he believes is possible by mechanical means CDN 1901 12 18

1902 Dr F.W. Hutchinson of Cambridge made an ascent with Mr Gaudron, the aeronaut, from the grounds of the Crystal Palace in a balloon of 38,000 cubic feet capacity, to make observations with respect to the presence of bacilli in the upper reaches of the atmosphere. He took with him eight samples of sterilised gelatine and exposed them at different altitudes in order to capture stray microbes suspended in the air over London. These he intends to bring to Cambridge and cultivate, afterwards determining the nature of the bacilli he had collected. CDN 1902 01 28

1902 Frederick William Hutchinson was born in 1868 and studied engineering at Cambridge University. He founded the Cambridge Autocar Co., Ltd., of which he was Manager and Director. He was also concerned with the design of the aeroplane in association with Edward Frost, described in Autocar July 1906 86 03 07

1902 All day the great mass of silk which was presently to make a journey to the skies was a source of deep interest. Around Parker's Piece where the balloon was taking its huge meal of 32,000 feet of coal-gas were rings of spectators. Slowly the gas inflated the silk, the aeronauts loosened the ropes and the balloon rose from the grass a graceful pear-like shape. After settling the final details Spencer gave the word for the two passengers to jump aboard, then with a startling rapidity the balloon leaped up and was soon several hundred feet above the earth. It first travelled in the direction of Hills Road but then, caught by a current of wind, sailed over to the Newmarket side. CDN 1902 08 12

1902 Enquiries were being made as to what had become of the balloon and her cargo which left Parker's Piece, where it had landed, and whether the two Cambridge voyageurs had returned safely. No one knew. One wag said that the quartet had been blown across the English Channel and landed at Dieppe. And there were those gullible enough to believe it. As a matter of fact the balloon did an hour's trip and covered 28 miles, landing in the grounds of Spencer's Grange at Great Yeldham in Essex c 02 08 14

1903 The well-known aeronaut, Rev J.M. Bacon, an old scholar of Trinity College said the afternoon of his first balloon ascent was a very boisterous one and it was only the consummate skill of Captain Dale that brought them safely to earth again. Not long afterwards Captain Dale was dashed to pieces and lost his brave life. He made one ascent to witness a wonderful shower of meteors when, instead of being up for two hours, he was drifting helpless for 10. His experiments in the use of a balloon in time of war and his races, carrying despatches against 70 cyclists, are well known and the graphic views which illustrated them made the lecture at Cambridge Guildhall additionally attractive. c03 03 07

1904 Residents in Cambridge were among the witnesses of a race between two balloons which started from the Crystal Palace. The first, named the Norfolk, contained Mr C.F. Pollock, D. Lloyd and J.T.C. Moore Brabazon and the second, the Aero Club No.1 contained the Hon C.S. Rolls, a former Cambridge man, Prof Huntingdon and Mr Frank Butler. Mr Pollock obtained a lead of several miles by trailing – keeping very low and trailing a rope along the ground – but this could not be done for long as a village had to be ‘jumped’. When approaching Bottisham it was very near the ground and a number of cyclists awaited the descent; their hopes were doomed

when the occupants threw out a quantity of ballast and ascended to a good height. A safe landing was effected near Ely for one balloon and the second was captured by a motor that was sent to chase it. CDN 25.7.1904

1904 Sir – last Monday night I was cycling from Eltisley to Cambridge and some time before I reached Caxton I saw on the right a large bright circular red light which disappeared soon afterwards. Shortly afterwards I saw it again, but this time it was an orange colour. It soon disappeared, just as a lighthouse light would. Next time it appeared it was green. It kept on appearing until I was close to Madingley. Later the moon rose in a directly opposite direction and I saw no more of the light. Can any of your readers explain? ‘Curious’ CDN 4.8.1904

1905 Mr Hutchinson of Brooklands Avenue attached a pair of natural wings to a swinging balance and actuated them by means of an electric motor in the way in which a bird’s wings move. Encouraged by the experiments he constructed a larger machine with wings of 60 feet square, the power being supplied by a petrol cycle engine. The results are encouraging but no actual attempt at unrestrained flight has been attempted due to the probability of an unpremeditated decent. Were it to be exhibited at the Mammoth Show what a ‘draw’ it would be. 05 07 08b

1906 Haverhill Gale Committee told the court they arranged to have a balloon ascent with a double parachute descent. Mr Bidmead of Plaistow, an aeronaut and balloon manufacturer, agreed to perform for £21 and sub-contracted Mr Mizen and his wife to make the jump. The committee provided the gas, labour and sand; Bidmead brought the balloon but it was porous and when the gas was turned on it did not fill. The balloon did not go up and they sued for their costs which including posters came to £10 12s. 06 01 24a & b & c

1907 Arthur Deck, senior, is Cambridge’s oldest balloonist. In 1877, when he made an ascent from York, he initiated the custom of throwing cards from a balloon with a request that they should be posted by the finder. At that time considerable nerve was needed to brave the almost unknown dangers of high altitude. His adventures have not been confined to this side of the channel: many years ago he made an ascent from Paris 07 09 07b

1908 Some excitement was caused in Fulbourn by the descent of a large balloon with two aeronauts on board. Coming from the direction of Shelford it passed over the golf course and dropped into a field. The aerial travellers – one an old Trinity Hall man – said they left London at noon with Cambridge as their objective. The balloon was deflated and packed on a cart ready for the return journey per Great Eastern Railway. 08 02 15d

1908 A sensation was created at Sutton by the descent of a monster balloon near the Chain Causeway. It was the renowned ‘Valkyrie’ carrying the champion lady balloonist, the Hon Mrs Assheton Harbord which had been inflated at Battersea Park Gas Work hoping to sail as far as Peterborough. It landed without the slightest difficulty and was packed in a cart for conveyance to Sutton station. Mrs Harbord’s motor car had followed the balloon for some distance but the chauffeur had lost sight of it so, after being entertained by Walter Haddock of the Brooklands, she took the train from Ely. CWN 08 10 09 p8

1908 Perhaps it will be some comfort to the party of revellers near Selwyn College the other night to know that the balloon they saw was a real one and the occupants living men and not huge white rats. It was the ‘Daily Graphic’ balloon on its unsuccessful attempt to reach Siberia and contained an old Trinity man, Capt E.M. Maitland. He says he distinctly recognised the Roman Catholic church and burnt some red flares as they passed over the town. CWN 08 11 13 p5

1909 concern that airships might land on Parkers Piece, fear that flag found on Midsummer Common was dropped from German airship [3,20]

1909 rumours of airship being built near Cambridge {3.21J

1909 notes on Mr Frosts flying machine at West Wratting, now beyond recovery [3, 22J

1909 Wallbro' airplane built .[5,3)

1909 Airships were the real menace, Burwell Rifle Club was told. Foreign nations had an immense number of them capable of living up in the air for 48 hours away from their base. They could carry half a ton of dynamite. They could not dodge over floating ironclads and attack them but they could drop dynamite into our naval dockyards and a navy without a base was not a navy at all. The authorities in the United States were very worried about them 09 02 19

1909 The unknown airship whose nocturnal wanderings in East Anglia have caused such a sensation is said to have been seen in Downham Fen eight days ago. Mr James Wilkin thought he heard the noise of a motor car but could not see one. His son said "Didn't you see it! It was an airship!" Other people in the locality observed the mysterious stranger, which is said to have gone in the direction of Littleport 09 05 22

1909 Mr William Lack states that when he was in Taylor's Lane, Swavesey, at 2.30 am, he saw a large object in the sky which had every appearance of being an airship. The object had a strong light at its head and another at its tail. It appeared to be passing towards Huntingdon along the line of the old road from Cambridge. A police constable however, who was patrolling at the same time, saw nothing of the apparition 09 06 04

1909 It is a surprise that Cambridge has long been immune from the raids of the 'scareship'. There are splendid places such as the roof of King's College chapel where a Zeppelin might find a lovely anchorage. Now a flag flaunting an eagle rampant has been picked up in the dead of night. This gaudy tinselled thing lies stowed away in the police station bearing the inscription 'This flag, believed to have been dropped from an airship, was found on Midsummer Common'. Nervous readers should be assured that it is a flimsy trifle, two inches square, and it is thought improbable that the owners will return in search of their missing property 09 06 11

1909 Oakington aircraft news – 09 10 08

1909 Something strange was seen in the air over Knapwell. The policeman hurried to the scene on his bicycle where a crowd had collected, confident they had caught an airship. It proved to be a balloon which contained one passenger. The aeronaut's name was not known but 'C.S. Rolls' was marked on the canvas and it is thought it came from London. The balloon was packed up and conveyed by horse and cart to Old North Road Station. 09 06 25

1909 At Oakington and all-British monoplane being built by Grose and Feary ... embodies patent stabilising apparatus – OF 09 09 17

1909 All Cambridge will soon be taking a deep personal interest in aviation. In a large barn at Oakington is the slim wooden skeleton of one of the first all-British monoplanes. The plane, which will soon be completed and ready for trial spins, is the joint work of Messrs A.M. Grose and N.A. Feary, two expert London engineers. It will be fitted with a 20 horse-power engine and has already been entered for the 'Daily Mail' £1,000 prize for the first circular flight by an all-British aeroplane. They selected Oakington for the express purpose of dodging inquisitive Press but gave a courteous interview to the News representative CWN 09 09 17 & CWN 09 09 24

1909 Shoppers had the unusual opportunity of seeing an aeroplane in the streets of Cambridge. It was an all-British monoplane invented and designed by Jack Humphreys, founder of the British Aeroplane Syndicate and one-time Cambridge resident. He had worked day and night at Wivenhoe to get the machine ready for the Blackpool meeting and had hoped to put it on the train there. Instead he had it towed to Cambridge but missed the turning at Station Road and had to drive through the narrow central streets until he could get back. A crowd of railway officials, crossing-sweepers and daintily-dressed ladies quickly clustered around it. CWN 09 10 22

1909 Oakington aircraft news – 09 10 08

1909 Mr Dennis, a man of the utmost credence in Isleham, states quite seriously that on Tuesday night he saw a floating light in the sky. Struck by the unusual spectacle he watched it proceed in a straight light across the railroad and on to Fordham. Mr Dilley, the Newmarket and Isleham carrier was on the road near Fordham at the same time but saw nothing CWN 09 11 26

1909 University undergraduates built biplane in vacation – Flight Magazine May 1909, ebook 693

1910 Huntingdon proposed aviation course proceeding and the first machine, a Bleriot monoplane has already arrived. The owner, James Radley has been granted permission to use the ground for trial flights OF 10 04 01

1910 inspired by the Oakington aeroplane four young scientific instrument makers named Wallis, Knightley, Booth and Miller, all living in Chesterton, decided to build a flying machine. For their workshops they hired a large barn in High Street, Chesterton, where the machine now lies practically finished. The only thing that has been copied is the warping of the wings for steering which is a Wright patent. In the whole machine there not a single nail, but it is all fixed together with some 3,000 brass screws. It is expected that flights of about a quarter-mile will be obtained. It is throughout an all-British machine and the first and only biplane that has been made in Cambridge. It is to be removed to Royston in a few days where some trial flights are to be made. If there are successful as is probable, an engine will perhaps be fitted to the machine OF 10 05 20

1910 A peculiar accident occurred to the new Wallbro' airplane built by Messrs P.V. & H.S. Wallis during the course of a trial run. Through some means or other the machine turned a complete somersault and, although Mr P.V. Wallis, who was driving, jumped to the ground unhurt, the aeroplane suffered considerable damage. The machine, which is housed in a field near Abington, landed upside down. Messrs Wallis Bros are by no means disheartened through the accident OF 10 07 08

1910 Wallbro all-British aeroplane made by R.S. & P.V. Wallis, the Cambridge motor cycle cracks, was exhibited at the Mammoth Show in a large marquee and the engine and tractor were set going at intervals attracting an enormous amount of interest ... between 4,000 & 5,000 people inspected it. The committee decided that a flight should not be attempted owing to insufficient space for starting and possible risk to the public ... August - TT 10 08 06, CDN 10 08 02

1910 Wallbro destroyed in storm when hanger collapses [5. 5]

1910 Oakington aeroplane – 59 10 30a & b, f & g

1910 Mr F.C. Pruden has been experimenting with a new cycloplane which he has invented and which he kept in a shed at Needham Hall, Elm. The machine embodied some very novel ideas and great care was observed in keeping the thing secret. It was all but completed and a trial trip had been arranged but about midnight flames were seen bursting from the shed where the machine was stored along with a motor car. Both were completely destroyed. It is believed the fire was the work of an incendiary as villagers saw a man riding quickly on an unlighted bicycle. CWN 10 02 25

1910 A fine aviation ground is to be established Huntingdon on the site of the old racecourse due to the enterprise of a syndicate to be known as 'Aviation Courses Limited' who hope to have flying in progress during the Whitsuntide holidays. It will be started under the aegis of the Royal Aero Club supported by Lord Sandwich and a Huntingdon and Midland Counties Aviation Club will be formed. A grandstand is being erected, the Humber Company are erecting workshops and they anticipate the co-operation of the Bleriot School of Aviation. There will be periodical race-meetings and international gatherings of aviators 10 02 25o

1910 The first real flying machine ever delivered in Cambridge arrived at the Hobson Street garage of Cambridge Automobile and Engineering Company. It is an exact counterpart of the monoplane with which M. Bleriot flew across the channel. On Friday the engine, tractor and

ignition were tested. It worked splendidly and developed great power, the screw creating a tremendous draught and exerting such a force that, although the machine had not its wings and tail fitted, it took half-a-dozen men to hold it down. 10 04 08a

1910 Snugly housed in a shed in the rear of a house in St Barnabas' Road reposes a brand new flying machine of the monoplane variety which has been designed and built by the Bros Wallis. The CDN had an opportunity of inspecting the machine and seeing the engine and elevating and steering apparatus tested. We came away greatly impressed with the graceful and workmanlike lines on which it is built. The machine embodies a number of novel ideas and is one of the lightest and strongest yet made. If not exactly the first flying machine that has been seen in Cambridge it is certainly the first one built in the town 10 05 13 a & b

1910 An Elm man told the court that two years ago he commenced to build a cycloplane. It ran on the lines of a bicycle or tricycle and if one pedalled hard enough it made it fly. It had planes and various things attached to it and was of considerable interest. But it was absolutely worthless as a flying machine. It was destroyed when its shed had been set on fire and now he was charged with defrauding his Insurance Company. 10 06 03 & a

1910 The new 'Wallbro' aeroplane built by P.V. & H.S. Wallis of 12, St Barnabas Road, met with a very remarkable mishap during the course of a trial run in a field near Abington. They intended to test the pulling powers of the engine and not attempt a flight but the machine suddenly rose completely off the ground and sailed along at a height of three or four feet. She continued to fly like this for several yards and then the back part was seen to rise in the air and the front to sink towards the ground. Finding himself unable to right the machine Mr Wallis stopped the engine and sprang out. The monoplane slowly turned a complete somersault, eventually landing upside down and there lay with its wheels in the air like some giant insect on its back. 10 07 08b

1910 Cambridge Bank Holiday Mammoth Show in aid of Addenbrooke's Hospital. Exhibition of the 'Wallbro' Aeroplane fitted with engine complete but owing to lack of space and possible danger to the public a flight cannot be permitted. Thurston's electric bioscope. Firework Display – advert 10 07 29b & 29d

1910 A special meeting was called to discuss a complaint from Marshall's Flying School who felt the council was obstructing their business by aligning a road across the existing aerodrome site so they could not compete with a planned municipal airfield. Councillor A.C. Taylor had gone away on vacation but on receiving the agenda had chartered an aeroplane to get to the meeting. Ald Stephen said there had been a number of underhand actions and he wanted an assurance that Marshall's would not be prejudiced. It was agreed that the previous resolution was not in order. 35 08 15

1911 The proposed army manoeuvres have been abandoned due to the drought. This is a disappointment to local tradesmen. The tender of G.P. Hawkins had been accepted for the supply of bread to troops expected at Cambridge, Gt Wilbraham, Babraham, Fulbourn and elsewhere. Bicycles hired for the use of the advance party engaged in constructing telegraphs were returned to Robinson's bicycle showroom. The Royal Engineers encamped near Whittlesford station will take down the telegraph posts and wires already erected. Landlords of village inns have cause to regret the abandonment for the advance party of troops had evidenced a liking for a variation of camp fare. 11 08 25b [4,4,4,5]

1911 Second Lieutenant W.B.Rhodes-Moorhouse lands his monoplane on Parkers Piece twice, prompting undergraduates to flock to Huntingdon for flying; also lands on Butts Green amidst crowds; visits again to collect shoes & on return to Huntingdon tries to run down heron I:1,13,1,14} 1,21,4,6]

1911 Moorhouse conveyed a consignment of boots from Northampton to Cambridge on behalf of Mr Frank Dalton who had his bootmakers premises in Bridge St (dubious); Oct. 12 Moorhouse left from Brooklands, became lost & tacked on to what he thought was GN railway',

in fact was LNW to Cambridge; running short of petrol & surrounded by houses he recognised Parkers Piece & came down with a dry tank at 5.40, machine covered up & left for the night; took off 6.30 next morning to Huntingdon [8]

1911 plane designed by Lieutenant Holt & built by him & H Williams, Victoria Park, metal work done in University Engineering Laboratories, to fly in September; Holt, a graduate of Kings College has built 3 others which unsuccessful [4.3]

1911 Aviation at Hardwick, 1911 – exploits – 58 01 24b and 58 01 31c

1911 A scheme for the development of Port Holme, Huntingdon, as an aviation centre is virtually an established fact. Mr James Radley, who was the first aviator to use the meadow will play a prominent part in the undertaking. Hangars will be placed on the meadow near the Great Northern Railway where his original hangar was erected. Works have already been taken for the construction of aeroplanes and numerous sheds are expected to be erected shortly. Most aviators consider Port Holme to be the best aviation ground in England, easily accessible from London and the North 11 03 31f

1911 What were believed to be five aeroplanes passed over Cambridge for a few minutes on Thursday afternoon. They were at a great height and travelling at a rapid rate and were out of sight in about a minute and a half. When observed, two were first noticed. These were followed at some considerable interval by three others. One of the spectators suggested they were pieces of paper, and another that they were birds. But their colour – they looked perfectly white – the absence of lateral movement and their peculiar oscillating flight with occasional glides, seemed to contradict this idea. They crossed the town in a north-westerly direction, evidently moving at a great speed 11 06 09b

1911 Littleport Show held in the grounds of Highfield House was a gratifying success. A great many were attracted by the announcement that an aeroplane flight would be attempted and they were not disappointed. The machine – one of the Bleriot type belonging to the Midland Aviation Syndicate – was wheeled to an adjacent field and the aviator made several flights. He would have continued longer but for an accident to the propeller, one of the arms having broken in the course of a descent. The machine was exhibited in a tent until five o'clock when it was wheeled out. A force of police kept the crowd under control. A large field was selected for the start. The fen men, who had never seen an aeroplane before, described it as 'like a self-binder'. There was a large cheer when the aviator took his seat and started the engine. In the first attempt the machine travelled from one end of the field to the other at a height of about 15 feet. It then headed towards Lt Downham and rose beautifully while the crowd cheered. It had travelled some hundreds of yards when the aviator, for reasons best known to himself, descended in a field of corn. In order to facilitate a start for another ascent the aeroplane was taken to a clover patch. There was a considerable delay and the majority of the crowd had returned to the show ground when the machine was seen again to rise to 50 feet but then the aviator planed down to earth again. It did not descend so well as on previous occasions and it was reported that an accident had happened. A proportion of the propeller had broken off. This put an end to the flying and the crowd dispersed, satisfied that a flight had really been made 11 07 28c

1911 A captive balloon attached by a steel hawser to a powerful traction engine, made a number of ascents at Cambridge Mammoth Show, giving passengers a magnificent view. The display culminated with a thrilling parachute descent from 1,600 feet by the famous aeronaut Captain Spencer. He dropped like a stone, then the parachute spread out and he floated down near Jesus College grounds. The balloon, freed from his weight sprang upwards, the sun glistening on its yellow casing before descending at Exning where it was the object of a great deal of attention from a large crowd 11 08 11 & a

1911 Alphonso Smith, one of the passengers along with Messrs King, Pamplin and Wallis in Captain Spencer's balloon describes the landing in a field near Exning. 'Some horses were greatly frightened and rushed about frantically, one breaking down a fence and escaping. Some oxen proved more sensible. They looked quietly on and took it all in. Many willing villagers

squeezed the gas out of the balloon and were rewarded for their services. After ten minutes one of Mr King's drivers arrived in a motor car and we were rapidly covered back to the Mammoth Show in time to witness the splendid display of fireworks' 11 08 11i

1911 An ancient certificate will stir memories of older readers who remember the Mammoth Shows. It was presented to Alphonso Smith, a boot and shoe maker, and records that he ascended in balloon 'Enchantress' from Cambridge on August 7th 1911 and descended at Exning one hour later. It is signed by Percival Spencer, aeronaut of Highbury whose other activities included parachute descents and airship flying. 56 07 06a

1911 There was considerable excitement near Histon railway station on Wednesday evening when the Army monoplane which has been manoeuvring in the district was seen flying towards the village. Not being at a great altitude, the queer-looking machine was seen quite plainly and the public had a good view of it as it hovered towards Dry Drayton before finally alighted at the military manoeuvres camp at Hardwick 11 08 25g

1911 A practical joker drove into Wisbech in a powerful racing car and announced that Grahame-White, the famous airman would fly into the town that evening. A large crowd gathered in a field selected for the landing but there was a high wind blowing and it was announced he had landed at St Ives. The crowds reassembled next morning and scores of cameras were placed in position. But the news broke that the whole thing was a hoax. The man had circulated the same story at March and crowds of people also waited there 11 09 01g

1911 Large crowds have witnessed successful flights during the week by the Army airmen encamped at Hardwick. Lieut. Cammell, flying his own Bleriot monoplane, was expected to arrive from Hendon shortly after dark on Friday night and petrol flares were lit on the camp ground which acted at once as beacons and as a guide to the most convenient place to land. But at Baldock he ran into a storm and was compelled to alight. He arrived early next morning. He later made another flight when the sight of the aerial monster combined with the noise it created terrified some farm horses. 11 09 01f

1911 Aviation is much too expensive to be enjoyed by the ordinary man. But Mr H.W. Holt, a graduate of King's College, has been building from his own patents a machine to carry one person. When finished the 'Dihehedral triplane biplane tandem' will be one of the lightest and smallest of flying machines. The greatest part of the metal work has been done by Mr Holt at the University Engineering Laboratory and the machine is being erected on the premises of Mr Harry Williams in Victoria Park. It should soon be complete and ready for flying 11 09 01e

1911 Lieut. Barrington Kennett in his aeroplane descended in a field midway between the villages of Elsworth and Papworth, his flight being interrupted by the wind. Many people went to see the machine, a Bristol biplane no.F8 of the Air Battalion. He resumed his flight next morning, six or seven people being interested enough to view the start at 5am. The aeroplane rose gracefully as a bird and was soon out of sight in the direction of Huntingdon 11 09 01h

1911 Cambridge folk will regret the death of Lieut Reginald Cammell, the gallant Army airman who was killed at Hendon while flying a new Valkyrie machine. He had extensive service with army dirigibles but then took up the heavier-than-air type of machine and had flown a Bleriot monoplane to the recent Army Air Battalion encampment at Hardwick where it had been in a hangar for several days 11 09 22c & d

1911 Mr Moorhouse paid a second 'flying visit' to Cambridge. The footballers playing on Midsummer Common abandoned their game at once when the machine came into view over Castle Hill. The aeroplane looked as if it must come down among the crowd, but the airman managed the descent very cleverly, and, travelling a short distance only a few feet from the ground, eventually alighted very smoothly rather less than a hundred yards from the railings on the Maid's Causeway side. On his ascent the machine rose gracefully and easily over the trees and the river. It quickly attained a height of nearly 1,000 feet before he made a circle over

Chesterton and then sped off towards Huntingdon, He is an intrepid young man of whom more will doubtless be heard in the future 11 10 13b

1911 The airman who made two wide circuits of Cambridge on Wednesday evening was Mr W.B. Moorhouse, who had flown from Huntingdon, whither he returned in the dark, guided by the flarelights on Portholme. The journey of 40 miles occupied 42 minutes – 11 11 03

1911 Rhodes Moorhouse brought consignment of boots from Northampton to Dalton's bootmaker, Bridge Street in 1911 – history 61 11 17a

1911 On Wednesday afternoon a monoplane was observed to be flying over the fields to the west of the allotments at Bourn, going in a northerly direction and apparently following the Old North Road. The airman seemed to be flying at a height of three or four hundred feet. Meanwhile work on the church tower is progressing. Outside the spire had been nearly covered in new lead sheeting and inside workmen are shoring up the tower above the great western arch. 11 11 24g

1911 The young airman, W.B.R. Moorhouse flew over to Cambridge and alighted on Butt's Green, departing two hours later. He took with him a parcel of shoes made for him by Frank Dalton of Bridge Street that he'd ordered a week ago. Several improvements had been made in the monoplane since his last visit including a bottle labelled 'Cherry Brandy' fixed inside the 'conning tower' fitted up with a flexible tube with a mouthpiece so that he could take a 'nip' when so disposed. The news rapidly spread and several hundred spectators watched his take off. 11 12 01j

1911 Mr Moorhouse made a fine cross-country flight from Huntingdon aerodrome, landing at Northants County Golf Course. After lunch he made a circuit of several villages before returning. He found travelling slow and the cold was so intense he had to descend to a lower altitude. On Tuesday he made a flight by moonlight, making a number of circuits, descending safely by the light of petrol flares 11 12 08b

1911 Several Cambridge people cycled to Huntingdon to view the flying at Portholme Meadows. They saw two machines in the air and watched Mr Moorhouse make a beautiful spiral volplane (guide with the engine cut off), then give chase to some sea-gulls. The landing ground was practically flooded and when descending his machine entered the water, causing the tail to lift and turning it completely over. Down it went into the water with Mr Moorhouse in the well of the machine. Numbers rushed to help but before they arrived they saw the aviator come crawling out from under the plane and walk knee deep to a horse and trolley. He seemed none the worse for his involuntary cold plunge 11 12 29 also another plane crashes on landing

1912 Military manoeuvres 1912, airships – feature – 82 09 24a

1912 E.P. Frost letter of appreciation from Aeronautical Society on his retirement as president – 12 04 19h

1912 Mr W.B.R. Moorhouse covered the 80 miles between Huntingdon and Brooklands at a speed of a mile a minute. Steering a 50 h.p. Gnome engined Bleriot monoplane, the aviator started at 7.05 am, the weather being perfect. A little more than an hour later he was passing over Hendon but then ran into a thick mist at Hampton Court and had to descend to within 60ft of the earth in order to steer a good course. He made a safe landing at Brooklands at 8.25am. 12 04 26f

1912 A crowd of about 10,000 watched Mr H. Ewen, the 'Daily Mail' airman give a flying demonstration from the University O.T.C. parade ground. The Caudron biplane was wheeled out of the enclosure and the engine started up. He ran along the ground for about 150 yards then rose into the air amidst the cheers of the crowd. On reaching a height of 600 feet he flew over Grantchester and Trumpington. The wind was too treacherous for him to attempt any risky manoeuvres but the public were quite satisfied and cheered as he landed. Mr Ewen was called upon for a speech but felt he had given a 20 minutes exhibition and had done his task. 12 06 28e [1.16, 3.25]

1912 Some little excitement was caused on Saturday evening by several balloons travelling over Gamlingay in a northerly direction. One dropped within shouting distance and having

ascertained its whereabouts, rose and floated away. The aeronauts were taking part in a long-distance contest from Hurlingham and some reached Yorkshire before descending. 12 06 28k
1912 Mr W.H. Ewen who conducts the orchestra at the Cambridge New Theatre won fame as one of the first airman to fly to Cambridge. He founded the first flying school in Scotland and flew across the Firth of Forth in 1911. He made a flying tour on behalf of the 'Daily Mail' and chose Cambridge as his first stopping place, landing his Caudron biplane on the University Rifle Range, Grange Road on 27th June 1912 - CDN 30 09 27a, b & c

1912 Nardini, the Italian airman, landed at Huntingdon after an adventurous journey from Birmingham. His destination was Hendon but he lost his way in the Midlands and ran into a terrific thunderstorm, his machine being buffeted in an alarming manner by the hurricane. Suddenly he observed an open space, and making a volplane landed by pure luck in the centre of Huntingdon aerodrome. The airman was almost frozen and his hands were numbed. The monoplane suffered some slight damage in the storm 12 07 12h

1912 Colonel Cody flew over Cambridge during Army manoeuvres at Hardwick, 1912 – photo – 39 09 30

1913 A new water plane designed and constructed at the Huntingdon Aeroplane Works by Messrs J. Radley and Gordon England was taken to the Port Holme in the hope of a trial flight. High winds made this impossible until Tuesday morning, when the breaking of a driving chain just as a start was being made, still further delayed operations. The first flight was made on Thursday, Mr England, covering about two miles at 20 to 30 feet from the ground, and demonstrating the power of the machine to remain in the air with only two of the three engines running 13 04 11 p12 CIP

1913 Percival Spenser was the first balloonist to take an active part in military aeronautics when his balloon was attached to an armoured-plated train drawn through dense tropical forests then released to rise so he could give the position of the enemy's forces. He made balloon ascents at the last two Mammoth Shows which will be long remembered. On the first occasion the balloon was carried to Exning and on the second Mr Spencer and Miss Spencer made a double parachute ascent and later ascended again, coming down near Manea Station. 13 04 18 p8 CIP

1913 Some excitement was caused at Cottenham by the descent of a balloon in a field of Mr Lewin's on the Oakington Road. There were two occupants who hailed from Farnborough and were out for military practicing purposes. The balloon was packed up and conveyed to Cambridge station by Mr F. Norman 13 04 18 p12 CIP

1913 Sir Charles Rose, the Liberal MP for East Cambs, died with tragic suddenness in his motor car as he was returning from Hendon Aerodrome where he had taken a flight in a biplane. It had circled at a moderate height for seven minutes and on landing he said he had enjoyed the trip. The Coroner ruled that the excitement and exhaustion of the new experience had brought on a heart failure. An aeroplane was not suitable for those getting on in years. Aeroplaning should be left to the young, vigorous and robust. Sir Charles might have survived many years had he lived a placid and quiet existence. 13 04 25 p10 CIP

1913 Future of aeroplanes – their part in war, lecture by Hiram Maxim, inventor of Maxim guns, to University Engineering Society. Considered helicopters, balloons and aircraft powered by steam engine 13 10 24 p5 CIP

1913 The Bovril airship encountered a strong headwind while passing over St Ives and the pilots decided to land. But it was impossible to bring the machine to earth. Repeated efforts were made to descend but the airship refused to answer to the landing gear and they were compelled to remain aloft in a wind sufficiently strong to render the situation distinctly dangerous. It was not until within six miles of Cambridge that they were at length able to come to ground. The pilots set it down to some extraordinary atmospheric phenomena which cannot be explained. 13 11 14 p8 CIP

1914 Gustav Hamel monoplane - 6,000 people assembled in the Rock Meadow for sensational .exhibition of flying in an 80 h.p. Morane-Saulnier of compact build. He circled above the field, skimmed the ground and then looped the loop to the accompaniment of loud cheering. Opportunity was given to fly with Mr. Hamel and the fee fixed with £5 5s. There were six bookings. 14 05 22 CIPof [1.25,4.2] 14 05 22k

1914 Mr. Hamel after his brilliant display at Cambridge he departed for Paris with the intention of bringing back a new Morane-Saulnier monoplane, driven by a 160 m.p.h Gnome motor. He is said to have left Boulogne at half past one o'clock, and afterwards to have been seen at Calais, but after that all traces of his flight have been lost. The weather in the Channel on Saturday was extremely unfavourable for flying. Search was made in the Channel and the North Sea by ships, but on Tuesday all hope was given up 14 05 29 CIPof 14 05 22l

1914 School of Aviation to be established near Cambridge- [4.7]

1914 Mr John Edmund Thornely, the 17-year-old son of Thomas Thornely of Merton Hall, 'looped the loop' at the Eastbourne aerodrome. He is believed to be the youngest airman to perform this feat and the first Englishman to do so on a biplane. He intends to do so again, with and without passengers. A native of Cambridge, he was educated on the Army side of Malvern College and began training a year ago. He has always been interested in all forms of sport and is a good rider, a good shot and has driven motor cars in races at Brooklands – 14 03 27i & j

1915 German Aircraft Raid.—German aircraft made a raid on the East Coast on Tuesday evening and dropped bombs on Gt. Yarmouth. Sandringham, King's Lynn, Cromer and Sheringham. The accounts of the attacks vary in details, notably in regard to the number of people killed, but they agree on the main facts. The first attack would seem to have been made on Yarmouth at about half-past eight o'clock. It was too dark to discern the hostile craft, but nine bombs appear to have been dropped on the town and two people killed. A soldier was also injured, and several of the townspeople sustained wounds from broken glass. The damage to buildings does not seem to have been extensive. Subsequent raids were made on Sandringham and King's Lynn, and on Cromer and Sheringham, where bombs were dropped. Two people were killed at Lynn. The accounts in this case speak definitely of a Zeppelin. Whether the raids were made by the same aircraft cannot be said but a telegram from Amsterdam speaks of four German airships passing over the Dutch islands earlier in the day. 15 01 22 CIPof

1915 Down in field. —An Army plane came down recently at Thurling, in the neighbouring county of Northamptonshire. The pilot was Lt. Broughton, said to hail from Cambridge, who was on his way from Farnborough to Cambridge, and descended at Thurling to ascertain the locality. By a piece of bad luck he landed in a ditch, in the middle of a field 15 08 20 CIPof

1915 Zeppelin Raid. — The Press Bureau on Wednesday issued the following report; Three Zeppelins visited the Eastern Counties last night and dropped bombs. Anti-aircraft guns were in action. Aeroplanes went up, but were unable to locate the airships. Fifteen small dwelling houses were demolished or seriously damaged and a large number of doors, windows, etc., were broken. Several fires were caused but were promptly extinguished. There was no other serious damage. The following casualties have been reported: Killed 10, seriously wounded 20, slightly wounded 23, missing (believed buried in debris) 3. Incendiary and explosive bombs were also dropped in London. Total casualties in all areas: Killed 20, seriously injured 14, slightly injured 72 15 09 10 CIPof

1916 A captured German aeroplane of the Albatross type, the gift of the Government to the University. When the aeroplane is erected it is to be housed in the Engineering Laboratories. when a small charge to view. The machine, is to remain in Cambridge as the property of the university. All the parts are here and the machine appears to be in good condition] with the exception of the propeller, which was smashed, and a British one substituted for use in this country. The aeroplane is a two-seater Mercedes six-cylinder, 130 horsepower machine, and was used: for observation purposes only. The number is A374, and it weighs exactly a ton 16 08 23 CIPof 16 10 11 CIPof 16 08 23a [1.14]

1917 Stackyard fire at Eversden.— fire had broken out in the stackyard at the Manor Farm, Great Eversden. It was sad to see the corn stacks burning, and the stables and granary were burnt to the ground. A heap of nine ton of coal also caught fire. To add to the excitement, an aeroplane was seen hovering around, and descended in a field behind the fire. The airman had lost his bearings and thought the fire was an aerodrome. The volunteers were put on guard while the airman had a night's rest, and next day he started off for his destination. 17 09 26 CIPof

- 1923 An Avro biplane was taking two passengers over Cambridge yesterday afternoon and when returning to the licenced aerodrome on Barton Road, the under-carriage fouled the hedge, causing the machine to fall almost vertically on its nose. The pilot was slightly injured. The passengers were uninjured and motored the pilot to the Evelyn nursing home where he was detained. The machine, which stands in the field in an almost vertical position, appears to have suffered but little damage other than that sustained by the under-carriage c23 10 16 [4.1]
- 1924 An aeroplane came to grief while alighting in a field on Barton Road, Cambridge, and the pilot and two passengers had a narrow escape from serious injuries. The plane was attached to Edward's Flying Service, which provides flights from a field off Barton road. It appears that the pilot was about to land and was manoeuvring for a position suitable to the direction of the strong wind when the engine stopped, and he was forced to land. The aeroplane crashed into a hedge and turned completely over, its back being broken c24 05 12
- 1924 A Belgian balloonist came down at Ely in a pond ten feet deep. He was taking part in a big race from Brussels for a £2,000 prize. He crossed the Channel during the night and had a very rough journey. His balloon is said to be the smallest in existence and the pilot had to stand all the time he was in the air. It came down at Norney farm and was pulled out by Mr Herbert Cross, an Ely farmer c24 05 17
- 1924 Four R.A.F. men had an exciting experience in an aeroplane crash at Barway. The Vickers Vimy developed engine trouble and a landing was made in a stubble field. For a score of yards the aeroplane ran along the ground at the rate of nearly 80 mph and all would have been well had not a four-foot dyke barred the way. The machine crashed into the opposite side of the dyke, its nose penetrating the earth. The impact caused the 'plane to swerve completely round and almost turn a somersault. Fortunately it rebounded on a even keel and the airmen were able to alight, only one sustaining slight injuries c24 11 03
- 1925 R33 airship passes over Cambridge { 1.15]
Cambridge University air squadron formed (5,10]
- 1926 A Duxford aeroplane crashed on the Gog Magog golf course, killing the pilot. The fatality occurred on the first tee, the machine first hitting the road and crashing through the hedge; as it struck the ground it burst into flames and was soon reduced to ruins. Bullets were flying around all over the place. Some time after the accident the pilot's tunic was found with a fountain pen and letter, both only slightly damaged. His hat was found intact and inside this was his name. We understand he had recently inherited a large sum of money c26 08 20
- 1926 Capt Ronald Leavey, who was burnt to death when an aeroplane he was piloting crashed and burst into flames near Leatherhead, is not unknown to Cambridge. Two months ago he visited Cherry Hinton where he took many passengers up at different times for pleasure flights, and also accomplished many noteworthy feats of daring in the air. His untimely end will be regretted by all who met him c26 09 06
- 1926 Two aeroplanes from Duxford Aerodrome came down on Coldham Common, one being overturned and considerably damaged. One of the machines in a flight of five passing over

Cambridge was observed to be in trouble. The single seater fighter had been engaged in firing practice at the Wash. He made a good landing, coming to rest near the bathing-place with just a buckled wheel. A similar machine went to its assistance but was not so fortunate; it struck some bumpy ground and turned right over, coming to rest flat on its back with the wheels in the air c26 11 07

1927 Sir – there are a large number of persons of both sexes who are intensely interested in aeronautics and would welcome the formation of a light aeroplane club. Learning to fly in this way is moderately cheap and invigorating. This county specially suited for flying as in almost every village several fields may be selected which would make excellent landing grounds. – R.C. Jonas CDN c 17.4.1927

1928 The largest bombing aeroplane in the British service, the “A” came down on Newmarket Heath and was exceedingly fortunate to make a safe landing. P.C. Bacon saw the aeroplane cross over Newmarket and turn back. It was evidently in distress for it had a strong searchlight turned on the ground as if seeking a landing and was firing red warning lights from its signal pistols. The descent was rather hurried and the plane bounced ten feet into the air from the impact with the earth. One of its two engines had ceased to work; mechanics put it right and stopped a leak in a petrol tank and the plane resumed its flight. c28 03 31

1928 Captain Harry Spencer, the famous balloonist, was killed while attempting to release a balloon piloted by his son which had descended on the roof of a house belonging to Rugby School. He became affected by the escaping gas and rolled off the roof. He was responsible for the design of the famous parachutes with which he made hundreds of descents and in 1922 his son and daughter, then 14 and 16 years of age, made simultaneous parachute jumps with him at Cambridge from a height of 3,000 feet. c28 09 17

1929 Cambridge Aero Club opens airfield at Conington [2.10]

1929 Visiting R101 at Cardington – CDN 20.4.29

1929 Alan Cobham’s flying circus plans; Varsity flying rules – CDN 15.5.1929

1929 Cambridge air pageant for opening Marshall’s - CDN 10.6.29

1929 The University Proctors have considered regulations for students who desire to use aircraft during term time. Undergraduates flying their own or civilian aircraft may lead to annoyance from low flying and accidents. A Light Aeroplane Club has already been formed which gives facilities for flying within a few miles of the University. Now no student may fly as pilot or passenger during term time without written permission from his parents and tutor. Those offending will be liable to be punished by suspension, rustication, expulsion or otherwise. CDN c 16.3.1929

1929 The new edict with regard to flying by undergraduates is well timed. Conington aerodrome is used by the Aeroplane Club and now comes news of a private aerodrome for Cambridge. Marshall’s, automobile engineers of Jesus Lane are opening it shortly. It is on the main Newmarket Road less than two miles from Cambridge. There is a railway station 200 yards away and a 20-minute bus service connection. One hangar has already been erected and the whole site is about to be put down to grass. Marshall’s are agents for the de Havilland Aircraft Company and already have their own demonstration machine ready at the aerodrome. CDN c 26.3.1929

1929 The R.A.C. has decided to extend the benefits of its ‘Get You Home’ service to members of the Club whilst flying. It has hitherto provided a relief car free of charge for their members who have broken down on the road but a considerable number are now either owners of light aeroplanes or are members of flying clubs. Should any of them whilst flying be compelled to

make a forced landing they will be able to send for an R.A.C. relief car and be conveyed to the nearest railway station. If the plane is of the folding wing type that can be towed on a public road the R.A.C. is prepared to pay for its conveyance to any town within the limits of the scheme.

CDN 1.11.1929

1929 The giant airship R101 passed over Cambridge after a visit to Sandringham. It appeared shortly before three on its way towards Cardington. The great ship glittered in the low November sun as though made of silver and hundreds of people came running into the streets as they heard the noise of the engines. As it receded into the distance it appeared like some strange monster floating on the misty horizon. At Newmarket races there was a cessation in the betting and all race glasses were trained towards the sky. CDN 1.11.1929

1929 Conington air thrills – CDN 11.6.1929

1929 F.A. Ridgeon, the Cambridge Town Football Club's inside left, travelled by aeroplane to Sussex for the F.A. Amateur Cup tie with Southwick. There was some doubt whether he could make the match owing to duties in Stamford preventing him from travelling by train. Hearing of his difficulty Mr D.G. Marshall of Aviation Hall generously placed his Moth aeroplane at his disposal. His son, Arthur Marshall, would have piloted the machine but he had gone on an air trip to Austria so a de Havilland pilot was engaged for the journey. This is, we believe, the first time an amateur footballer has travelled to a match by air. Cambridge won 2-0. CDN 14.12.1929

1930 The R100 airship which made a long flight from Cardington in fog was seen as a fleeting but fascinating object over Swavesey. Emerging from the mist like a spectre of the sky, the giant vessel attracted admiring attention as the sun glinted on her silvery nose, which, approaching head-on, was turned into the semblance of a full moon. She circled round the locality before disappearing in the fog in the direction of St Ives. 30 01 17

1930 A News reporter experienced the thrill of looping the loop in the joy-ride aeroplane now giving flights from the Cherryhinton Road ground: "We bounced across the bumpy field and before I was aware of it we had left the ground. We climbed until I saw the hand of the pilot's altitude clock creep round to the 2,000 feet mark. Suddenly we seemed to be hurtling downwards at a tremendous speed and I felt I had left my tummie up above. I saw fields and roads above, then the sky came back over the top. I suppose we had been upside down, but it seemed as if it was the world that had turned over. It was great fun" 30 04 23a

1930 By the courtesy of A.G. Marshall of the Newmarket Road Aerodrome, who placed a plane at the disposal of the C.D.N., our representative was able to secure a bird's eye view of the bumping races. "I could hear nothing of the general buzz which must be going on by the river, only the roar of the engine and the voice of my companion through the speaking tube. He tells me he is regulating his height so that we are well in gliding distance of a landing place all the time. I am very comforted – I should hate to drop on Jesus or a crew just making a bump", he writes. 30 06 16 & 16a

1930 Aviation history was made when a Puss Moth aeroplane, one of the latest models of its kind, arrived at Cambridge airfield. It carried English oak caskets of samples of Leicestershire granite chippings. A cargo such as this has never before been transported by air. The idea of the flight was to further the interests of commercial aviation and to test opportunities afforded by this method of increasing sales 30 06 21aa

1930 The air exercises have begun and squadrons of fighting planes took off to engage in bitter combat. Until the very last minute of peace 250 aeroplanes were being secretly moved to vulnerable points and the men in command have been planning their attacks. Five night bomber squadrons, nine day bomber squadrons and 11 fighter squadrons will be engaged. Some are fitted with robot controls which can relieve the pilot for extended periods on long flights. 30 08 12

1930 Rumours of the R101 airship disaster were received with incredulity in Cambridge where thousands of people had seen it passing over. Early on milkmen and postmen had the story that it had crashed in flames, but details were lacking. Inquiries in London confirmed that the greater

part of the passengers and crew had perished and a special edition of the C.D.N. was issued. Amongst the victims was Walter Radcliffe, a rigger on the airship, whose wife is a daughter of the late Mr Charles Isaacs, the well-known Newmarket racing correspondent. 30 10 06b-e 1930 The 'Westland Wessex' three-engined six-seater cabin monoplane de luxe arrived at Marshall's aerodrome. A CDN representative, seated in a padded brown leather seat with arm and head rests found it glided so smoothly that he could scrawl down his experiences in his best hand. From the air the new estate at Milton Road gave the appearance of a toy town, King's College chapel was a landmark and the white-fronted Central Cinema very prominent. There is no vibration and the businessman can take his secretary, for letters and notes are typed with ease. 30 10 20

1931 fatal crash at University Air Pageant [3.4]

1931 An aerobatiser was killed at the University air pageant. He was flying an Avro, looping the loop, rolling and spiral diving when the machine appeared to break and crashed to the earth. Mr Honour, ground engineer at Marshall's Flying School, said that tools were kept at the aerodrome for extricating pilots but some delay was caused as the machine was made of metal, not wood. He obtained a hacksaw to cut part of the wreckage and within 20 minutes the pilot was taken to Hospital, terribly injured. 31 06 19b

1931 Huntingdonshire county council sanctioned the use of Wyton Aerodrome as a municipal airport. Some said it was wrong for the children at the nearby county sanatorium to have aeroplanes always buzzing about, especially if one crashed near the building. 85 per cent of the 120 children were from other districts and if parents knew there was an element of danger they would not send them. But it was an ideal site and were the council going to say 'We don't like it because it is going to frighten little children'. (Laughter) 31 01 23c & d

1931 A thrill of romance marked the departure from Marshall's Aerodrome of a gleaming silver Puss Moth monoplane bearing its bridegroom pilot, Mr A.G. Marshall, and his bride on the first stage of their honeymoon. He took his seat at the controls, the propeller whirled and the graceful machine glided forward. In the next few seconds it was rising steeply into the wind, while rain fell from a heavy cloud. The bridal couple however were quite cosy in the saloon cockpit. 31 04 24e

1931 Marshall's Aerodrome was visited by a party of continental airmen when ten planes, including two containing young ladies, flew in from Heston Aerodrome. After tea and a chat they left by motor coach for a hurried tour of the colleges before flying out again. It is the first time any private French and Belgian pilots have paid an organised visit to England. 31 07 17i

1931 A serious accident occurred during a performance by Capt. Barnard's aerial circus at Port Holme, Huntingdon following a passenger flight. A young woman had just been up for a trip and, on alighting, walked around the wings into the revolving propeller. The blade struck her left shoulder, smashing the bone. It was not revolving at great speed, otherwise she would have been killed outright. The force of the blow stopped the propeller instantly. Despite the mishap the programme of aeronautics continued and the passenger flights proved very popular 31 07 31a

1931 A heavy, gusty wind and driving rain greeted Captain C.D. Barnard and his famous monoplane, the Spider, when he visited Cambridge. But when it abated a number of people took trips knowing they would be dry in the plane. 20 readers of the CDN had been given free tickets for a ten-minute flight and enjoyed the experience; one young lady laughingly remarked she felt 'a bit funny' coming down. 31 08 21e

1931 Glider built by Slingsby and Armstrong of Scarborough on display in Slingsby's workshop – photo – 31 10 09f

1931 In 1931 Dr Norman de Bruyne, then aged 26, set up the Cambridge Aircraft Construction Company which produced the Snark, a rakish four-seat light, strong monoplane monoplane. The first flight was uneventful, apart from the engine stopping while it was flying over Cambridge, but it landed safely. It was held together with casein glue which had been used on all wooden

aircraft. Then he set up a new company, Aero Research at Duxford where he developed Aerolite, formaldehyde glue which was used during WW2 for the construction of motor boats and transport gliders. In 1947 the firm became part of CIBA 87 09 11

1932 Alan Cobham's Flying Circus visits Cambridge, Council officials taken for flight in giant air liner [1.17,3.5]

1932 The Prince of Wales landed in his red Puss Moth monoplane at Marshall's aerodrome. He jumped hatless from the plane, then donned a boater and drove to the Leys School where he opened the new squash courts and sports ground. On his return he was assisted into his raincoat in preparation for a lofty flight in search of a favourable wind before he stepped into his monoplane, soared gracefully aloft and headed for London. 32 06 22a

1932 Littleport was plunged into gloom after a fatal accident at the Show. A man died when his parachute became entangled in the rudder of the plane. The machine at once tail dived and drifted backwards over an oatfield. The right-hand wing struck the ground and the propeller dug into the soil. The pilot lay bleeding and about 30 feet from the tail was a mark caused by the body of the parachutist striking the ground. His wristwatch was still going. 32 07 29f

1932 Cambridge town councillors saw their constituencies from a new angle when they took the air in Sir Alan Cobham's big liner. He was visiting Marshall's aerodrome with his fleet of planes and many gathered to see his display. The Mayor was unable to be present and the deputy mayor preferred solid ground. When the party was about to take off it was discovered to number 13, so the County Chief Constable stepped into the breach and the plane both ascended and descended safely. They made a comprehensive survey of the town with its ring of new housing estates though the new County Hall looked more impressive than the huddled roofs of the Guildhall. 32 10 14a

1933 air pageant held at Barton Road [1.9] - see photo 596-7 Pauline Gower and Dorothy Spicer were friends of Amy Johnson – indeed they had plans to go into business together, but when Amy continued her record flying the other girls set up a company to give joy-rides to the public, Pauline as the pilot and Dorothy keeping the plane in good trim. They joined the flying circuses which visited the Cambridge area in the early 1930s. The programme always began with a formation flight on which passengers were carried, so that everybody around would know there was an air circus in town. There would be balloon bursting, paper cutting, bottle shooting from the air – an endless supply of beer bottles lined up in front of a screen at which the pilot fired as she flew past. The bottle always smashed (but, say Harry, the gun fired blanks and the bottle was hit from behind the screen with a sledgehammer). Later in the '30's the girls based themselves at Hunstanton, living in a gipsy caravan on Searle's donkey field and giving flights to holidaymakers. Memories 3 Sep 1998

1933 Hangman's Corner, Barton Road presented a scene of excitement when the British Hospital's Air Pageant visited Cambridge and all afternoon there was the incessant 'zoom' of aeroplanes 'taking off' and landing. All-in advanced aerobatics provided a thrill; the 'crazy' flying drew many a gasp whilst equally entertaining was the dancing to music by the tiniest machines in the show. Wing-walking and parachute jumping were presented, together with balloon bursting and a chase after a 'kidnapped' bride. One machine which caused amusement was Mr Heath Robinson's conception of a Chinese dragon: the 'flying motor cycle' 33 05 18
1933 Sir Alan Cobham's great air display at Marshall's Aerodrome showed all kinds of flying and many were the thrills his pilots provided. During a demonstration aerobatic flight with a passenger the plane dived and looped, twisted and turned and did everything a plane could do. But at the end the hardy individual who had decided to take the flight actually managed to walk without assistance and appeared to have enjoyed his literally hair-raising trip immensely. 33 06 01 33 05 26f

1933 A Newnham College student was summoned for dangerous flying. Mary Barnard said she had taken off from Marshall's flying school on a solo flight and descended to 1,000 feet over her College. But Dr John Bury, who had flown for five years, said she had descended rather rapidly, then flattened out and crossed Corpus Christi gardens at about 600 feet, he could read the letters on the plane quite clearly. As it was the first prosecution of its kind the magistrates decided to dismiss the case with a caution. 33 06 08a

1933 The pilot of a Gypsy Moth was summonsed for low flying at Fen Ditton. He had hired the plane at Marshall's aerodrome but then began 'hedge hopping', looping-the-loop and narrowly missing telegraph poles. Roy Fisher, the ground engineer at Marshall's waved a piece of white fabric to try and attract the pilot's attention and then Mr Marshall went up in a Puss Moth in an attempt to bring him down. They flew together but the man did not land with him. He told magistrates he had served in the RAF but was fined £5 33 09 20

1933 Flying-officer Norman Styche, who formerly lived in Fordham and Cambridge, was one of two men who perished when their bomber crashed at Bamburgh after a successful "battle" against the Home Fleet. Having attending Soham Grammar School he had got books on flying out of the library and learnt all he could. He had previously been in two crashes, but was unhurt in both. 33 09 27

1934 Sky Devils air circus held, Barton Road [1.6,1.8]

1934 site sought for aerodrome near Coldham's common [1,24]

1934 Marshall's Flying School had offered to buy Elfleda Farm, Fen Ditton for a public aerodrome, county councillors were told. Financially it would be a very good deal, giving them a profit of £3,000 for land they'd earmarked for smallholdings. But it was a very growing neighbourhood and the aerodrome would be a source of great annoyance to residents who didn't want these noisy things coming at all hours of the day and night. Mr Marshall would be getting a thunderingly good deal, others argued. The sale was agreed 34 03 03

1934 Marshall's Flying School propose to carry out improvements to their aerodrome and had purchased Elfleda Farm through which the proposed Ring Road would run. They asked the Council to move the route slightly east. But the Surveyor said this was not possible. The whole of the land is zoned for dwelling houses and this would be have to be borne in mind if any proposals were made to them for further developing this aerodrome 34 05 15

1934 air circus, Barton Road – 34 05 05, 34 05 07

1934 A student, Cecil Hutchinson, made a dramatic race against time to attend the Cambridge Entrance Examination. He docked at Cherbourg early today on the Olympic on which he had travelled from New York, then chartered an Imperial Airways taxi which arrived at Croydon at 8.45. After snatching a hasty breakfast he flew on the Cambridge where he arrived a few minutes before the examination was due to start. The ship had decided in mid Atlantic not to dock at Plymouth, from which he had arranged to travel by train, so he cabled his father who arranged the air taxi. 34 06 15

1934 The first air display by the recently-formed Ely Aero Club attracted 2,000 people to their flying field on the Downham Road. An attractive programme of aerobatics had been billed but was marred somewhat by the non-arrival of a number of machines. Despite this the crowd had plenty of thrills and many opportunities for joy riding. Mr H.R. Dimock was the first Ely citizen to own a private plane and his activities in the air had been watched with interest. The club hoped to have its own ground, own staff and own machines. 34 07 11

1934 Many thrilling flying feats were seen during Sir Alan Cobban's air display at Ely. The most popular machine was the multi-engined Handley Page 'Youth of New Zealand' in which passengers, seated in comfortable chairs in a roomy saloon enjoyed the experience of soaring over the Cathedral. Flight-Lieut Godfrey Tyson flying a 'Lincock' did aerobatics at high speed and took every liberty with the machine while Miss Jean Meakin's wonderful demonstration of

gliding was outstanding and Ivor Price made a thrilling parachute descent. As a humorous item an old battered motor cycle was pelted with 'bombs' from the air 34 09 13

1934 A London pilot from the Klemann Air Services offered people flying trips in his blue Klemm monoplane from a field near the Gibbet Inn, Caxton. But he did not hold a proper licence to carry passengers for reward and the field was not approved as a regular place of landing and departure for aircraft. The landlord said the pilot had landed in his field and said he was looking to start a flying school. He had got permission from the owners, Paines the brewers, to put up an air indicator and applied to the Air Ministry for a licence which had not yet been granted. 34 09 22

1934 A pilot from the Klemann Air Services offered people flying trips in his blue Klemm monoplane from a field near the Gibbet Inn, Caxton. But he did not hold a proper licence to carry passengers for reward and the field was not approved as a regular place of landing and departure for aircraft. The landlord said the pilot had landed in his field and said he was looking to start a flying school. He had got permission from the owners, Paines the brewers, to put up an air indicator and applied to the Air Ministry for a licence which had not yet been granted. 34 09 22

1934 For the convenience of people wishing to travel to Newmarket races by air, the Stewards of the Jockey Club have approved the laying out of a private landing ground on the exercise ground north-east of the Rowley Mile Stand. It will be open each race day. No hangars have been erected but picketing gear and chocks will be available. Petrol and oil can be obtained by arrangement with Turner and Hore, Heath Garage. Charges will be two-and-six for landing plus one-shilling a head for all occupants 34 09 27

1934 Sir – since the demolition of the military aerodrome at the end of the war, Newmarket has taken a back seat in aviation activities because of the possible danger of aircraft upsetting nervous racehorses. But the opening of the special landing ground on the Heath may dispel the fears of trainers. Newmarket has a bigger call for speedy air transport than most towns. Bury St Edmunds will soon become an airport, Cambridge has the advantages of a splendid flying school and there is an Aero Club at Ely. Now perhaps we may look forward to a local flying club here – Edward Milner, Heath Villa, Newmarket. 34 10 02

1934 Col Roscoe Turner and Clyde Pangbourn, the Americans, arrived at Mildenhall for the England to Melbourne air race. Their plane, a huge dull grey Boeing Transport, was the 15th to reach Beck Row. Another machine landed on the old aerodrome at Conington. No damage was done, the monoplane being forced down through engine trouble. The pilot was Mr Lowdell, and the 'plane has been entered by Lord Nuffield. Mechanics were at work on the machine early this morning. Competitors are to see a film of the route to Australia at Mildenhall Town Hall on Thursday. 34 10 16

1934 Mildenhall air race to Australia – 34 10 19, 34 10 20

1934 A young airman who set out from Marshall's aerodrome ended his flight in the River Thames which he chose as a landing-place in order to save his own life and those of many Londoners after he had nearly run out of petrol. He had landed at Cambridge in his Moth aeroplane but did not fill up with petrol then ran into fog on his journey home and got lost. To land on the Thames was the best thing he could have done, for a Moth tearing down a street at 50 miles per hour does not give people walking there much chance of escaping injury. His machine floated and he was taken off by tug. 34 12 11

1935 special Council meeting to discuss Marshall's proposals for airfield at Teversham corner (1.20]

1935 Cambridge University gliding club formed I5.1] University Gliding Club celebrate jubilee 1960 – when formed in 1935 they used a horse to retrieve aircraft – 60 09 23e

1935 Gypsy Moth forced landing field Long Road – photo – 35 01 31

1935 A flight of three RAF aeroplanes were forced down near Cambridge. Two landed in rough fields near Dry Drayton and turned upside down. None of the pilots was injured. The other

made a forced landing at Smithy Fen, Cottenham. The flight was of a very recent pattern single-seater fighters and had taken off from Duxford to practice for the Hendon Air Pageant. They ran into thick fog and received wireless instructions to make a forced landing. The squadron leader mistook a field of wheat for grass and turned his plane completely over on the rough surface. His flying helmet was covered with mud as a result of his skidding along upside down 35 03 01
1935 I dialled '0' and asked for Teversham 331. The answer came, "Marshall's Aerodrome". I said "How about that little trip we spoke of earlier". "Righto, come along at once. In a few minutes I arrived at the aerodrome and found a 'plane awaiting me. I tied my camera to a buttonhole in my mackintosh as we took off and made for Baitsbite where we could see the boats at First Post corner. Close co-operation between the pilot and myself was made easy by the speaking tubes and my helmsmen showed adaptability to the requirements of aerial photography, allowing me to obtain some interesting photographs. 35 06 15

1935 A number of readers of the 'CDN' saw the town from a new angle. Winners of our Free Flights Competition in connection with Sir Alan Cobham's air display went on a formation flight round the town. A number went up in the 10-seater air-liner while others took a 'flip' in the open planes which take part in the display. The rush of air past the face, the thrilling sensation as the plane dipped and the sight of Cambridge spread out mosaic-like made for an exhilarating experience and the winners walked more jauntily after their trip than they did before it! 35 06 20a

1935 The largest number of British warplanes ever assembled in one spot have arrived at RAF Mildenhall for the Silver Jubilee review. Three hundred and fifty in number, from 38 squadrons, 'planes of the bomber, night bomber and fighter type have turned the green aerodrome into a sea of silver. But poor visibility caused the practice take-off to be postponed twice and owing to the time it takes to get airborne only 200 of them will actually participate in the fly-past 35 07 02a

1935 The King had 'Jubilee Weather' for his review of the Royal Air Force at Mildenhall Aerodrome where he inspected 28 squadrons of the RAF – five miles of aircraft in all – on the vast landing ground. The machines ranged from tiny 230 mph Gauntlets to giant bombers. Twice he left his car to learn some of the secrets of our latest flying machines including the power-driven machine guns mounted in the turret of an Overstrand bomber 35 07 05 & a

1935 Two RAF 'Bulldog' planes taking part in night flying exercises over Cambridge had to make forced landings when they were caught in a thick mist which came up suddenly. The pilots looked for an emergency landing ground and saw the lights of Marshall's aerodrome below. One succeeded in landing just before the fog blotted out the lights but the other five had to keep on flying until one ran out of petrol and had to make a forced landing at Duxford. In doing so the machine crashed and the pilot was slightly injured. 35 07 25

1935 A crowd of 2,000 people invaded Marshall's Aerodrome to see a demonstration by M. Henry Mignet of his marvellous little machine, 'The Flying Flea'. Thousands of people would love to fly but could not afford an ordinary plane so he had built 'The Flea' which was a combination of kite and parachute. It cost £70 to build and can do 40 miles per gallon. He took it up to 1,000 feet and then cut the engine. The little machine floated gently to earth like a parachute and made a perfect landing. 35 09 04b – photo – 35 09 04

1935 The London branch of the Civil Aviation Corps was founded in 1934 and approached Marshall's Flying School who realised that such a corps could become of national importance. They have been coming to the Aerodrome regularly each Sunday and are now building a hangar for themselves where they hope to build a 'Flying Flea' and 'B.A.C. Drone'. Now Cambridge has started a local squadron; any young fellow over 20 years of age who is keen to fly will be welcomed. 35 11 22

1936 The Air Ministry say it is very desirable that a new Cambridge municipal aerodrome site should be provided in the near future. Land at Milton had been recommended by Sir Alan Cobham but this would cost more than £33,000 and take at least two years to build. Messrs Marshall's existing flying ground at Newmarket Road is quite inadequate for present requirements and they could have a new site at Teversham ready in a year, councillors heard. 36 01 28b & c 36 01 30a

1936 The question of a Municipal Aerodrome for Cambridge has at last been settled. Messrs Marshall's new aerodrome at Teversham will be of sufficient size to enable Cambridge to have a fully licensed airport competent to meet the needs of commercial and civil flying. The council will remove the present restrictions on the site and divert a footpath but will have the option of purchasing the undertaking in 40 years and afterwards every ten years 36 02 07

1936 A former undergraduate told the court he had hired a plane from Marshall's Flying School and flown to Caxton where he landed and then taxied towards the Gibbet. There was a haystack between him and the hotel and he hit a pole which had been erected with a wind-sock, but there was no wind-sock. The propeller and two wings were damaged. But he disputed the cost of repairs and said the job could have been done in three days and two wings were not necessary: he'd had a similar accident at Lympne when the machine had been repaired next day for £35. 36 07 24c

1936 Mr H.R. Dimock of Ely, an enthusiastic air pilot, had a lucky escape from serious injury when his machine crashed at Cardiff Airport. He had been demonstrating a Super Drone machine in which the pilot sits at the front, the propeller being above and behind his head. Mr Dimock's hat flew off and caught in the propeller, which snapped. Luckily he was flying fairly low and was able to bring the machine down with only a minor crash. His injuries were very slight 36 09 21

1936 An RAF pilot had a remarkable escape when his Bulldog machine – a single engine fighter – landed on the railway line near Six Mile Bottom. He was engaged in taking weather observations in thick fog when he got into difficulties and descended in a field, crashing through a fence and on to the railway track. The force of the impact cocked the tail up into the air and it became entangled on the overhead wires running beside the railway line. This probably saved the pilot's life. An oncoming train was stopped and passengers wheeled the plane into a field. 39 06 22b pic 36 09 22

1936 A pilot summonsed for flying at a low altitude over the Cam at Fen Ditton told the court he was carrying a photographer for the Sport and General Press Agency. Herbert Cook was taking pictures of the Bumping Races from a side window using an ordinary camera with a long focus lens. They had to fly across the river and would not have got good photographs if they'd come down to the tree tops. There were a number of other planes from Marshall's flying about. Spectators complained he was too low and had caused one of the waitresses at The Plough to spill the things on a tray in the tea garden. The case was dismissed. 36 10 01 & a

1936 An RAF pilot and observer had remarkable escapes from death when their plane came down and overturned in a field near the Gogs. The pilot thought the place looked safe enough to land on from the air but when the plane touched earth the rain-sodden ground caused it to smash its nose into the ground and turn over. The pilot's helmet was covered with dirt as a result of being dragged along the ground but he escaped with a bruised lip. The observer was entirely unscathed. Jack Utteridge, who has a petrol station nearby, was an eye-witness. 36 11 03a & 03

1936 Farmer killed in aircraft crash near Caxton Gibbet – 36 12 12c

1936 A 'Flying Flea' airplane was built by Mr W.V. Smedley of Wisbech in 1936 and tested in Cambridge. But when the test pilot was killed elsewhere, the machine was abandoned 63 10 11d

1937 Sir Alan Cobham, the world-famous airman, spoke in favour of a nine-bedroom Airport Hotel on Newmarket Road. Every Continental airfield had a hotel where accommodation was available in the same way as at a terminal railway station. A man had a terrible inconvenience when he landed at an airport and a first-class hotel was one of the amenities which was going to

make people fly. A rival proposal by Lacons Brewery was withdrawn: people like Mr Marshall who were training pilots were doing a work of very great importance and entitled to reasonable facilities. 37 03 04a & b 37 03 05l

1937 Airport Hotel approved – 37 04 01a & b

1937 Civil Aviation Service Corps first open day at Cambridge aerodrome; bomb dropping contest – 37 04 09

1937 Five RAF men were killed when two bombers collided near Methwold. Three machines were flying in V formation when the propeller of one caught the tail of the leading machine. Both 'planes fell, one bursting into flames and coming down in a field, the other crashing on the bank of the river Wissey. Part of this machine was submerged in the river. Men rushed to help from Wissington Beet Sugar Factory, half a mile away, and tugs were sent up river with tools. Inhabitants of Stoke Ferry saw the planes collide and two men make parachute decent. The squadron only moved to Feltwell from Scampton a few days ago. 37 04 29

1937 Marshall's Aerodrome's special fire engine meets Air Ministry specifications for fire, first-aid and crash equipment. It is finished in fire engine red and black, the front seats are upholstered in best selected black hide and fitted with outsized fire and alarm bells. It is designed to meet any possible emergency with an impulse magneto which, together with the dash carburettor flooders and emergency gravity feed petrol tank ensures instant and easy starting in all weathers. 37 04 30

1937 Fatal air crash at Fen Ditton kills Horningsea man – 37 06 24 & a

1937 Many people assembled at Marshall's Aerodrome to see the competitors in the King's Cup air race pass over on their journey northwards. The first swept in from the direction of Cherry Hinton, roared over the 'drome and were lost in the void beyond, travelling at over 200 mph. But the majority of the entrants made for the wrong aerodrome, heading towards the new one near Teversham and when they discovered their mistake had to bank round towards the town. 37 09 10a

1937 Major-General Ernst Udet, ace pilot during the war, was amongst top German airmen who inspected two squadrons of giant Heyford bombers and the latest Battle Bristol-Blenheims, Harrow, Wellesey and Whitley aircraft at R.A.F. Mildenhall. They went into the body of the Harrow plane and three sat in the cockpit of one of the others before watching the engines starting. The visitors, some carrying small dress daggers, also toured the station buildings including the mobile wireless transmitting, photographic and automatic control sections. 37 10 19 & a

1937 The new aerodrome at Teversham Corner is a great improvement. Pilots can glide down without having to dodge or scrape over trees or other obstacles and it is a pleasure to land on a flat piece of ground after the ridges on the old airfield. The size and spaciousness of the main hangar is impressive with huge sliding doors allowing any one of the single and twin engined civil airliners in use today to be accommodated with ease. A control tower is being built to replace the small one on the tarmac and a start has been made on a hotel. They should be in full swing when the aerodrome is officially opened next spring. 37 11 19 & a

1937 An inquest heard that three fighters had been attacking three bombers over Therfield when two machines touched wings and spun to the ground. One man fell out but his parachute did not open. – 37 11 26b – photo – 37 11 24

1938 Ely Aero Club (Humphrey Roger Dimmock, proprietor) let out planes for private hire but not commercial purposes. They'd received a telegram from a man in Coventry asking to hire a machine for a day. He'd been offered a Hawk for £5. But as the certificate of Air Worthiness was at the Air Ministry the man refused to hire it, saying he was not satisfied with the condition of machine. He'd flown to Ely, having to land at a village because he could not find the airfield, and claimed expenses for the journey and hire of another plane. 38 01 20a

1938 Charles Daisley, a library assistant of Coronation Street, was injured when the aeroplane he was piloting crashed at Quy. He was practising forced landings when the two-seater, of which he was the sole occupant, landed in a field and tipped sideways. The front cockpit was damaged by the engine being forced into it. He was in the rear cockpit but sustained a broken nose and concussion. He was one of the first to join the RAF Volunteer Reserve when they started training in Cambridge a few months ago and was doing part of his 15 days' annual training. 38 05 02b

1938 Trainee pilot crashes at Marshall's aerodrome in Hawker Audax two-seater plane – 38 06 18

1938 Pilot parachutes from plane into beech tree at Thriplow, plane crashes Duxford 38 08 04

1938 Some 900 aircraft are taking part in an exercise testing the air defence of Great Britain. The attacking force will have 36 bomber squadrons (some from Bassingbourn and Wyton) while the defenders will consist of 23 fighter stations and 14 bomber squadrons, including planes from Duxford, Debden, Feltwell, Mildenhall and Stradishall. Anti-aircraft and searchlight batteries will be spread across the Eastern Counties. Bombers will fly without navigation lights unless other aircraft approach and fighters are forbidden from attacking below 1,000 ft 38 08 05a plane crashes at Melbourn – 38 08 08. Mayor made tour of town, all in darkness apart from one or two lighted windows – 38 08 08b

1938 Cambridge aerodrome has been in use for some months but the building operations have only recently been completely finished. The immense aeroplane hanger already houses over 20 machines and has room for more. The engine overhaul and repair shops are every well equipped and all the parachutes are stored, packed and aired. The airport hotel has lounge bar, dining rooms and kitchen with guest rooms on the second floor. I have seen a lot of aerodromes but this takes a lot of beating for its well planned layout 38 10 06

1938 Cambridge airfield was opened by Secretary of State for Air. There was no airport in Europe, with the possible exception of Berlin, which is so conveniently placed in relation to the town. D.G. Marshall recalled that in 1919 he purchased his first hangar from the Disposal Board and bought his first aeroplane. Some of his neighbours had told them to take their business elsewhere and now they had moved further out. The Flying School has been run in full understanding of University regulations; in most aerodromes the most profit-making department is the club bar, but there is not one here. 38 10 07b & c

1939 Ralph Ernest Wright, a 19-year-old Ely pilot, set out in a Hawker Hind for his usual Sunday "flip" from No. 22 Training Centre of the R.A.F. Volunteer Reserve at Marshall's on Sunday morning. Over Ely he attracted attention with his stunting. Later more aerobatics thrilled the people of Chatteris. Then the plane dived from about 1,000 feet, straightened out and rose slightly at about 500 feet, then dived again, striking the ground with a sickening thud. The machine narrowly missed a house and buried its nose deeply into the grass turf, killing the pilot instantly. 39 02 10 CIPof 39 02 06

1939 Inquest on pilot Wright of Ely, who crashed at Chatteris – 39 02 10

1939 An R.A.F. Volunteer Reserve pilot had a narrow escape at Marshall's Aerodrome. As he landed, his machine overturned, finishing up on its back. He ducked his head inside the cockpit, so escaping injury. The machine was badly damaged, but did not catch fire. 39 05 19 CIPof

1939 A young member of the R.A.F.V.R at Marshall's Aerodrome received concussion and the sergeant with him slight injuries when their plane crashed at Lode on Saturday. The crash

occurred during practice flying. It is understood the plane hit a tree. Sgt. Stearn is a son of the Rev. A. J. S. Stearn, Vicar of Swaffham Prior. 39 06 09 CIPof

1939 Waterbeach Aerodrome - proposed acquiring by the Air Ministry of County Council land at Winfield Farm, Waterbeach, as an aerodrome. The Council had 20 tenants there. Two of them won cups for the best smallholdings this year; both lost legs in the war. The Committee wrote to MP and made a strong protest to the Air Ministry. They said there was nowhere else they could possibly go. 39 07 28 CIPof

1939 Blenheim crash at Wyton inquest – 39 03 01c

1939 The A.R.P. First Aid post at Auckland Road will be staffed by a doctor and trained nurse and give more extensive first-aid. Two practices have already taken place. A sham air raid was enacted last night with casualties brought in by ambulance and unloaded by stretcher bearers. Nurses and orderlies under the direction of Dr Walker, dealt with them. Realism was added by squibs which were let off and red paint was used to give the impression of real wounds. 39 03 30 & a

1939 Marshall's airfield new hangars – 39 03 27

1939 Blinded by the dazzling beam of a searchlight and unable to see his instrument panel, an RAF pilot leaped by parachute from his plane as it dived to the ground and burst into flames at Steeple Morden. Flying Officer Jeff, of Debden, was flying a Hawker Hurricane in formation with two other planes when he was caught by the searchlight. He dare not move out of the beam for fear of colliding with the other planes and, unable to see his panel, got into a spin. He jumped out and landed in a churchyard. The machine fell near a cottage, setting fire to some trees and killing several chickens. There were several small explosions as flames reached the ammunition. All that remained was a charred and tangled mass of metal strewn about an orchard 39 08 19a

1940 Dornier Down. — A Dornier 215 was brought down by anti-aircraft gunners in Cambridgeshire shortly before midnight on Friday. The three-inch guns damaged the bomber just sufficiently to force the German pilot to land. All five of the crew were taken prisoner 40 08 30 CIPof

1940 Junkers 88 crashed near Cambridge after being engaged by RAF fighters; four occupants taken into custody – 40 09 20a

1940 Nazis Surrender to Woman. — When a Junkers 88 bomber was shot down at Stuntney two occupants, aged about 18 to 20, threw down their revolvers and gave themselves up to a woman, who was the first person on the scene. The two other members of the crew, who had baled out by parachute, were captured in Soham Fen and taken to Newmarket. The machine had been badly damaged by R.A.F. fighters and was finished off by another fighter. The Nazi pilot crashed on Mr. Owen Ambrose's farm at Quanea Fen. Mr. Ambrose told a reporter "The plane touched down in a ploughed field, jumped a ditch and came to rest in a beet field. The first person on the scene was Mrs. Ashman, who lives at the farm. As she approached the two men, they emptied their revolvers and threw them away. Other men from the farm came up and the Germans were driven away in a lorry by Mr. Brooks." The two who baled out were uninjured 40 11 01 CIPof

1940 A man was killed when a barrage balloon drifted over Cambridge. Daniel Dunston was near the railway between Mill Road and Coldham's Lane bridge when he was caught by a steel cable trailing from the balloon. He was carried for a distance of over 30 yards and then dropped, sustaining fatal injuries. Before the accident the balloon had passed over the town at a considerable height. In the Mill Road area it came lower, and the cable threw a wireless pole through the roof of a house in Mill Road. The interior of the house was not damaged and nobody was injured in this incident. The balloon then gained height and drifted in the direction of Teversham. At Teversham Hall an old chimney stack on a scullery was struck by the cable. A piece of the cable was snapped off and the balloon at once shot up into the air and continued in an

easterly direction. Telephone wires were damaged and the electricity supply for a village was affected for a time 40 09 13 CIPof

1941 Plane crashes garden Bene't Place, pilot killed – photos - 41 09 27

1942 Daring Rescue, — The British Empire Medal (civil division) \ has been conferred on Mr Frederick Bertram Pearson farmer, of Westwick Hall Farm, Oakington, for the courage and determination he showed in saving the lives of two airmen when their machine crashed and caught fire. The plane, which was "bombed up", narrowly missed Mr Pearson's house, crashed through his garden and landed in an adjoining field, where it burst into flames. Rushing to the spot Mr. Pearson found one man trying to pull another more seriously injured from the burning wreck. With great coolness, Mr. Pearson cut of the harness of the badly injured man and carried him clear of the flames on his back, giving a hand to the other man at the same time. While he was doing this the heat was discharging bullets and the bombs were liable to explode. Two horticultural workers from Oakington, Wilfrid Josiah Brickwood and Edward Jabez Smith, have also received commendations for their share in the rescue. 42 04 03 CIPof

1946 Lancaster crashes in field off Cambridge Road, Waterbeach – 46 09 18

1947 Flying officer R.W. Ford was ferrying a Meteor jet-aircraft from Gloucester to West Raynham yesterday, when turbine trouble forced him to attempt a landing at Cambridge Airport. He crash-landed in a barley field about 200 yards short of the airfield. The tail unit broke off, and the aircraft turned completely round before skidding to a stop. Flying Officer Ford stepped out, uninjured except for a chip in the skin on the bridge of his nose. Within an hour he was on his way in an Anson that had been sent to fetch him. Crash-apparatus from the airport was quickly on the scene and R.A.F., Waterbeach, provided a guard c47 07 07

1948 Flying a proctor light aircraft Mrs Richarda Morrow-Tait of Cambridge set out from Marshall's airport on her attempt to be the first woman to fly a light aircraft round the world. She was accompanied by her navigator and co-pilot Mr Michael Townsend of Cranmer Road, Cambridge. They carried only a minimum amount of baggage but included in it was a .303 rifle and ammunition, as part of the flight will be over uninhabited territory. Maps and baggage stowed away, including some sandwiches cut for Mrs Morrow-Tait by her husband the two climbed into the aircraft. Her husband said, "She is a wonderful person, full of courage and determination. The machine is an ex-RAF aircraft which has been thoroughly overhauled and fitted with a reconditioned engine.c48 08 18

1948 Miss Morrow-Tait, 24-year-old flying mother, today abandoned her around-the-world flight attempt. She left Marshall's airport yesterday but her plane was damaged in landing at Marseilles last night. She told Reuter's correspondent, "I hit a small ditch owing to bad visibility. The propeller was twisted, a wing damaged and the undercarriage also suffered. Our plan for a round-the-world flight in 200 hours is no longer realisable. I think I will probably go back to London and start again". When a C.D.N. reporter told her husband of her accident he said, "I don't care twopence about her abandoning the flight. I expect she will have another go" c48 08 20
1948 Mrs Richarda Murrow-Tait~ a housewife leaves Marshall's to become first Woman to fly around the world in a light aircraft; took: 366 days [2,1]

1949 Cambridge's "flying housewife", Mrs Richarda Morrow-Tait, was resting following her arrival at Croydon last night on completion of her round the world flight, claimed to be the first to be made by a woman. She landed in England 366 days after she had set out from Marshall's airport where she learned her flying. She took off in a single-engined Proctor which was damaged in a forced landing and was replaced by a Vultee Valiant c49 08 20

1949 Mrs Richarda Morrow-Tait's famous round-the-world flight is now complete to the very last mile. Yesterday she flew "New Thursday's Child", the plane in which she completed her journey on August 19th, from Croydon airport to Marshall's aerodrome, the place where she set off on her mission just over a year ago. Flying alone, she got a particular thrill out of wearing a normal dress for the trip instead of the flying kit to which she had become accustomed c49 08 31

1949 Newmarket and surrounding districts were shaken by an enormous explosion when a giant 6-engined American B50, the latest type of US bomber still on the secret list, crashed at Isleham. All members of the crew, believed to consist of 12 airmen, were killed instantly. The blazing remains of the aircraft were scattered over the area of 500 square yards on the Beck Road. Neighbouring farm buildings and haystacks at Worlington were set afire. The B50 is designed for long-distance bombing and is said to be specially adapted for carrying atom bombs c49 10 13

1949 The Chief of Air Staff, Marshall of the R.A.F. Lord Tedder came to Cambridge to unveil the war memorial at Magdalene college and to open the new Headquarters and Mess of the Cambridge University Air Squadron at Chaucer Road. The Cambridge unit was the first University air squadron not only in Britain but the world c49 11 10

1950 Cambridge University Air Squadron's silver jubilee dinner at the University Arms also celebrated the arrival at Marshall's airport of an appropriate "gift" from the Air Ministry – the first batch of the eagerly-awaited new Chipmunk training aircraft which are replacing the squadron's Tiger Moth. In its 25-years the squadron had three types of trainers – the Avro 504, then in 1934 the Tutor and in 1940 the Tiger Moth c50 02 17 [2.50]

1951 training aircraft crashes at Marshall's [2,7]
jet explodes, Huntingdon Road [2,15]

1951 Three survived out of a crew of eight when a US Superfortress crashed and burst into flames at Manor Farm, Abington Piggotts shortly after taking off from Bassingbourn RAF station. The survivors were in the tail unit which broke away and somersaulted over the main wreckage into a neighbouring field. The crew inside stepped out almost unhurt. Firemen entered the blazing fuselage in their search for the rest of the crew. Exploding ammunition added to the danger of the work c51 02 05

1952 flying saucer seen [1,11]

1953 Marshal Tito saw two Meteor jets collide in mid-air and crash in flames as he was watching an air display at Duxford airfield. He jumped to his feet in horror as a great burst of red flame rose hundreds of feet into the air behind some trees at Chrishall. They were two of the four

jets which had swept past his armchair before taking off. From their open cockpits the pilots each gave an “eyes left” to the Marshal who saluted back. Just after the crash there was a poignant moment when the two surviving Meteors touched down. Tito rose from his armchair, stood to attention and saluted the planes in tribute to the dead pilots. c53 03 25

1953 The possibility that Marshall’s airfield might be used by jets and other high-powered aircraft provoked a vigorous debate at Cambridge City Council. Coun Warren protested at the construction of a hard landing strip: “The town is going to be menaced by high-powered aircraft which we know nothing about”. But Coun Collins suggested that more powerful aircraft must come in time and added “The aircraft now landing there will soon be obsolete”. Ald James asked: “If it is essential should the ground have not been moved further out into the country?” c53 12 08

1954 Cambridge Flying group formed, teaches flying on Tiger Moths [5,19]

1954 A large meteorite is believed to have been seen over Cambridge. Following reports that an explosion, thought to have been due to a meteorite smashing into the earth’s atmosphere, had rocked Dieppe about 160 miles from Cambridge, several members of the City Police Force have claimed to have seen the object. P.C. R. Barlow, on duty in Drummer Street described ‘a meteorite of exceptional size, oval-shaped and green in colour’ falling in a south-east direction. Other policemen claim to have seen the flash as it apparently struck the earth. CDN c.7.1.1954

1954 People passing Cambridge airport were intrigued to see the arrival of a German-built ultra-light aircraft, the Zaunkoenig. The tiny plane which can land and take off from the proverbial sixpence and is virtually ‘unstallable’ is the only survivor of a group of ten; the others were destroyed in Germany towards the end of the war. It is present on loan to the Cambridge Private Flying Group, but the members hope to make it their property. With a cruising speed of only 56 mph it is an ideal aerial runabout and can be hired out for a mere 30 shillings an hour. CDN c 20.5.1954

1954 Would-be pilots can now learn to fly for as little as ten shillings a week. A scheme introduced by Cambridge Aero Club now brings the cost within the reach of most pockets. For an initial payment of £1 plus the weekly amount they can then carry out one and a half hours flying in a four-week period, or more if they pay extra. The Club has been operating continuously – except war years – since 1929 and offers training facilities for the Student Private and Commercial Pilots’ licences including instrument and night flying CDN c 9.6.1950

1954 RAF authorities are investigating reports that two parachutes were seen to appear from a Canberra jet bomber shortly before it crashed in a sugar beet field near Six Mile Bottom. It had taken off from Bassingbourn a few minutes before. The three crew, who include a Royston man, have been reported as missing believed killed but only one body has yet been found. Mystery surrounds the crash but the finding of the aircraft’s cockpit canopy in the Melbourn area indicates it might have become detached and been the cause of the accident. The plane hurtled into the ground in a field half-a-mile from the railway and made a hole about 40 feet deep, the sides of which collapsed almost burying the aircraft. c24.6.1954

1954 The pilot of an RAF Vampire jet trainer from Oakington airfield was killed when his plane crashed into a cornfield at Dry Drayton. He succeeded in missing 18 Council houses and women picking fruit in a nearby orchard before the plane – smoke pouring from its tail – crashed into a field off the Oakington Road. It is thought the pilot might have been attempting to make a forced landing and crashed through a hedge before skidding along the ground for some distance. The engine and tail-plane were 40 yards apart but still intact after the crash CDN 16.8.1954

1954 Just after 9.30 on Thursday evening a CDN reporter was cycling along Victoria Road, Cambridge when suddenly a green coloured ball of light flashed over at great speed in the direction of Huntingdon. At the same moment his cycle developed all kinds of mechanical troubles. Wheels began to creak and groan and the chain parted company with the rear cogs. Then on Friday a lady at our Saffron Walden office asked 'Did you see the flying saucer last night', saying she too saw a light in the sky, this time red in colour, travelling fast towards Cambridge. Shortly afterwards her television had failed. CDN 28.8.1954

1954 Was it a flying saucer or an ice-blue star-shaped machine that flashed across the Cambridge sky? The 'star' description comes from Herbert Finbow who said: "My wife and I were taking the dog for a walk when we saw 'the thing' flash across the sky near our home. It was like a huge star, apparently mechanical and similar to the wartime 'doodle-bug' glow before it fell. We heard a swish as it passed overhead". The 'ice-blue' description completed the colour-trio for the object: it was reported green over Cambridge and red over Saffron Walden CDN 31.8.1954

1954 A perfect black smoke ring topped by a mushroom cloud hung in the air over a bombed fort hit by Meteors highlighted Waterbeach 'Battle of Britain' Saturday. Small boys clutching identification manuals pestered their less knowledgeable fathers with technical questions or casually recognised jet planes and provided exact data for ignorant mothers. They elbowed their ways into the cockpits of fighters on display – except the Swift, which was closely guarded. A mass scramble split the eardrums as the jets roared down the runway in pairs but most impressive was the tight formation flying of the modern fighters at low level. Stateliest aircraft were the long-range submarine killer Shackletons while 'Old Faithful', the Vampire V flew some skilful aerobatics. c.20.9.1954

1954 British military officers and civilian personnel from the Lakenheath air base witnessed a 'Skysweeper' firing demonstration at Weybourne range, Norfolk. This is the U.S. army's largest calibre automatic anti-aircraft artillery weapon – an artillery machine gun. It is the first weapon with radar, computer and gun on one carriage with fully integrated gun and fire control. The units are designed to spot and track with radar and aim and fire the gun semi-automatically at enemy aircraft flying near-sonic speeds at low and medium altitudes. CDN 9.11.1954

1954 A 78-year-old gardener was cycling across the perimeter track at Oakington RAF Station when he was struck by a Vampire jet plane that was taxi-ing before take off. The pilot saw the cyclist crossing the dispersal area when travelling at 25 mph. He assumed the man would look to see if anything was coming and would certainly hear the plane. It was a rule that aircraft always had the right of way. He added: "the cyclist took a 90 degrees turn towards me suddenly. I turned slightly to the right and my left wing caught his neck". All employees were required to sign a document that under no circumstances could claims be made against the Air Ministry in the event of accidents to and from work.c 1.10.1954

1954 A Vampire jet aircraft from RAF Oakington attempting to land on a disused runway at Bourn aerodrome overshot and crashed across the main Cambridge to St Neots Road. It landed in a field and burst into flames. The pilot managed to pull himself clear of the wreckage suffering from severe burns and was given first aid by Sister Joan Webb of the Medical Research Department of Bourn Pest Control. All that was recognisable of the wreckage was the tail assembly and jet engine propulsion unit. The pavement on the other side of the road was smashed and crumpled by the impact when the plane crashed. CDN 3.12.1954

1955 Flames shot 30 feet into the air as a Vampire Jet aircraft crashed in Landbeach, narrowly missing the church, school and rectory. Villagers crowded round the Rectory paddock where the

plane fell. The crash stopped at meeting of the Women's Institute in the Rectory; the ladies ran out and saw the planes in flames but when they found they could not help they resumed their meeting. The body of the pilot was found almost at the door of the church, about 50 yards from the aircraft. 55 02 02a

1955 A Vampire jet aircraft on a training flight from Oakington. crashed and exploded at Comberton, killing the pilot. Flaming twisted mangled parts of the plane carpeted a 500 yards radius, a bullock was badly injured and chickens were killed. A car was badly damaged. Pieces of the plane wreckage went through the roof of the kitchen of Fox's bridge Farmhouse where the farmer's wife was working. She described the noise as a 'terrific tornado' and flung herself down for safety. She tried to dial 999 but the telephone wires had been cut by the crashing aircraft. 55 02 16a

1955 A Meteor jet aircraft made a successful forced landing at Newmarket. The pilot informed his companion that he had run out of fuel and had to attempt a landing. He missed the racecourse runway at his first approach and was compelled to land on the Heath. The landing was perfect and the aircraft came to a halt at the finishing post on the Rowley Mile course, immediately opposite the photo-finish camera. A guard was mounted round the plane all night and the pilot took off next morning. 55 02 16b

1955 Cambridge University Airborne Club organised a parachute jump from a balloon on the Pemberton Estate. In the first cage for jumping, which took place from the usual height of 800 feet, were four regular soldiers; they were followed by 28 members of the Airborne Club in drops of five, all of whom were attached to regiments of the 16th Parachute Division, Territorial Army. The wind was quite sharp and gusty and most of those who landed were dragged yards by their inflated canopies. Quite a crowd of spectators gathered to watch the descents and many cars and lorries were drawn up on the Trumpington Road. All ended happily, with a cup of tea. 55 03 11

1955 Pye demonstrated their new aircraft instrument landing system with a series of flights in Dakotas between Cambridge and the De Havilland works at Hatfield. The trips are also open to factory staff so they can see how the system allows the pilot to land without having to be 'talked down' from the ground. They had barely time to unfasten the seat belts, say 'Thank you' to the air hostess for packets of 20 cigarettes and the treble scotches before a loudspeaker commentary was started on the landing. 55 09 10a-b

1955 A 'flying saucer' object – one of which has been seen in the vicinity recently – will make an appearance at the Battle of Britain Show at R.A.F. Debden along with Hunters, Sabres and Shackletons. The Valiant and Vulcan 'V' bombers will also fly over. There will an attack by Meteor fighter-bombers and the R.A.F. Regiment will deal with the 'flying saucer'. There are strong rumours that 'Dan Dare, Special Agent' will help the Regiment. 55 09 13

1955 When a Hawker Hunter jet fighter crash-landed near Upware pumping station the pilot was pulled from the aircraft and taken to the Ely RAF Hospital by a helicopter which had taken off from Waterbeach airfield carrying the Station Commander, Gp Capt Chackfield, to the scene of the crash. Units from Cambs and Fordham fire brigades were called but the aircraft did not catch fire. 55 09 30a

1955 A Vampire jet from RAF Oakington skimmed over Rampton before crash-landing in a field. The pilot managed to miss council houses and touched down, bouncing over and ditch and hedge before coming to rest in an orchard. Several villagers did not hear any explosion and only realised a plane had crashed when they saw the flames. 55 11 15

1956 first season of operations of independent airline from Cambridge airport [

1956 An American newspaper, the 'Omaha World-Herald' has reported that after a B-47 bomber crashed at Lakenheath RAF station in 1956 flaming fuel pouring from the ruptured tanks engulfed a building containing three nuclear bombs. If they had exploded radioactive material would have been showered over a large area. But a major accident was averted when the base Fire Chief ignored the burning bomber and its four-man crew and concentrated on dousing the

flames surrounding the nuclear storage building. The incident was kept secret, as the British people had not been told that nuclear bombs were being kept in the U.K. CDN 5.11.1979

1956 A practice bomb, inadvertently released from an American B47 bomber, fell in a ploughed field near Newport and buried itself in a crater 15 feet deep and 20 feet wide. It caused hundreds of pounds worth of damage to Biggs' nurseries; one man was wounded when sheets of glass were blown out and five other men ran clear. The crater was surrounded by large sheets of metal which was burned and twisted and scattered over a wide area. A lorry-load of RAF men wearing bow ties and white gloves with Wellington boots collected the fragments and men with picks and shovels removed a large container from the bottom of the crater. 56 01 05

1956 A captive balloon will be used for parachute jumping at Trumpington. Although intended primarily for members of the University Parachute Club, 50 'chutes have been allotted to the Cambridgeshire Regiment Parachute Light Regiment. All men now have a reserve parachute strapped to his middle as a second line of defence 56 03 06e

1956 Marshall's Flying School were granted permission to double the width of the 'hard land strip' on the airfield and extend it from the boundary of Coldham's Lane to the boundary of Teversham Road provided they erect suitable fences to prevent the possibility of jet slipstreams from reaching the roads. However planners feel the aerodrome is wrongly sited adjoining a residential area and that no further development should be given approval. 56 03 13a

1956 Waterbeach airfield to receive standard, history 56 squadron 56 03 29

1956 A Central School girl claims to have seen a flying saucer over Milton and Impington. "It came towards me at a very fast rate and disappeared back in the direction it had come. There were little windows all round it", she said. Asked whether it could have been the airborne elephant from Bertram Mills circus straying slightly off course she laughed and said "That is impossible". Nothing would shake her belief that this was a flying saucer. 56 04 26b

1956 The pilot of a Mark 5 Vampire training jet based at R.A.F. Oakington was forced to bale out of his machine while flying over Littleport. He landed safely in Camel Road and the plane crashed at the side of a cornfield at Black Bank, Lt Downham causing a crater 15 feet deep. Norah Garner and Neville Constable ran to the wreckage and could see there was no one in it. The nose was sticking up in the air. 56 06 06a

1956 All four members of the crew of an American B.47 strato-jet were killed when it crashed a caught fire at Lakenheath air base while practising landings and take-offs. American fire-fighters were joined by the Mildenhall Fire Service in extinguishing the blaze and personnel working in buildings nearby were evacuated because of the danger of fuel tanks exploding. The B.47 is a swept-wing medium bomber designed to carry a bomb load of 20,000 lbs and can carry an Atomic Bomb. 56 07 28a

1956 At Oakington airfield there is a station cinema, the NAAFI provides television and haircuts and shoe repairs are free. A civilian tailor comes every week to fit the men for their uniforms and pyjamas are part of the Service issue. There is one full armed parade a month but most time is devoted to teaching young pilots to fly. It has enough ground staff for a large village since it takes from 50 to 80 people to keep one plane in the air, most are fitters and mechanics who tend the Vampires 56 08 31d & e

1956 The pilot and navigator of a Venom night fighter taking part in the Air Defence Exercise, 'Stronghold, were killed when it crashed in a sugar beet field near Sutton. Portions of the aircraft were strewn over a large area and flames were still visible in the bottom of a large crater some times later. 56 09 29a

1957 Cambridge was visited this week by a flying saucer that appeared to be about 500 feet above the ground, says a reader from Fanshawe Road. It had a dome-shaped structure on top with a series of windows around the edge, one of which was blacked out while the base glowed with a vivid green fluorescent colour that seemed to be bubbling. He contacted the University Observatory who says it might have been a meteor. 57 02 01a [3,9,7,1]

1957 A farmer from Craft Hill Farm, Dry Drayton probably saved the life of a pilot who crashed in a Vampire jet aircraft in a field. He gave first aid to the airman who'd been thrown from the wreckage and was unconscious. He removed his harness, helmet, leggings and the watch from the pilot's swollen and discoloured arm. Then when an ambulance, a Jeep and a fire engine became bogged down he got a tractor and pulled them out. If the plane had exploded he'd have been blown sky high. 57 02 18

1957 Cambridge residents watched a short aerobatics display and heard a radio commentary by the pilot of the aircraft at the same time. It was the first such broadcast. The commentator was Raymond Baxter, the aircraft a Tiger Moth of the Cambridge Private Flying Group. This was formed in 1953 to bring private flying within the reach of the man in the street. One of the lady members, Betty Willink, hopes to qualify for her Private Pilot's licence soon. 57 08 09

1958 air link to Jersey, scheduled services due to start. May 1959 [3.14J]

1959 The facilities for private flying and gliding in Cambridge are as good as those in many larger cities. At Cambridge Airport there exists a flying school, a flying group and a gliding club, and a few miles distant at Duxford another gliding club run by the R.A.F. Gliding and Soaring Association which caters for a limited number of civilians. In April 1935 the Cambridge University Gliding Club made its first flight field at Caxton Gibbet. A St Neots butcher, Tom Ayres, placed a field at their disposal and loaned them a barn for use as a hangar. (History) 59 05 20a & b & c & e

1959 Cambridge University Gliding club – history – 59 05 08a

1959 More than 900 passengers flew from Cambridge to Jersey in Derby Airways' first season's operations. The aircraft used were 19-seat Marathons and Pullman DC-3s, a 36-seat luxury version of the well-proven Dakota. The extremely good flying weather, coupled with a high standard of aircraft serviceability enabled the service to operate with almost 100 per cent punctuality. An inclusive tour service between Cambridge and Ostend, which is only available to passengers booking hotel accommodation, was also successful. Applications have now been made to open similar services to Zurich, Barcelona, Pisa and Zagreb. 59 10 02a [5.12]

1959 A Vampire jet trainer aircraft which was formation flying with three others ploughed through electricity cables before crashing on its back in a field at Meadow Farm near Elsworth. Thousands of gallons of foam were poured on the wreckage by members of the Oakington RAF Station Fire Brigade and spectators were told to keep well clear as one of the ejector seats in the aircraft had not gone off and bare electricity cables were smouldering and sparking in the stubble 59 10 15b

1959 Vampire crash near Conington inquest – 59 10 20

1959 Britain's first gyrocopter has been built by an Ely officer, Wing-Commander Ken Wallis, who is serving at RAF Stanmore. It takes off in less than 100 yards and cruises at 80 mph. A second, much-improved version is now in the pipeline. Flying and building aeroplanes is a family tradition for in 1909 his father made a 'Wallbro' monoplane and his cousin, B.P. Wallis, is chief flying instructor at Marshall's Flying School 59 12 27b

1959 Oakington plane crash – 59 11 03

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 Passengers can now fly from Cambridge to almost anywhere in the world after Customs made available facilities for checking passports and luggage at the airport. Three large buildings are being converted into comfortable passenger transit, baggage and customs halls in readiness for the holiday rush. Marshall's have installed specialised electronic equipment and hope to develop it into the largest civil flying field in Eastern England. They also hope to capture the valuable trade of US service personnel from nearby bases to the Continent 60 05 03a [5.13]

1960 The remains of a large Stirling bomber which crashed just outside Icklingham during the last war, loaded with incendiary bombs, are now being unearthed by a team of RAF experts. The area is wired off and notices saying 'Danger. Unexploded Bombs' erected in the field. There are not many large pieces of the bomber left, as it exploded on crashing, but 20 live bombs and 1,000 rounds of ammunition have been recovered. They will be detonated on site when the work is completed. Things have been made more difficult with the large quantities of phosphuretted earth in the pit which can cause a nasty and painful burn. 60 05 20

1960 Direct and easy air travel to the Continent from Cambridge Airport is now possible for holidaymakers and businessmen as Airline operators and travel agents have taken advantage of the granting of customs facilities. Scheduled and chartered flights together with all-inclusive air tours will be available this summer, eliminating time-wasting journeys to London. The development of an international airport is also important to University undergraduates as well as hundreds of students taking exchange summer courses at the colleges 60 06 17c

1960 A young Cambridge businessman has started a contract-hire scheme for light aircraft. Anyone who can fly a plane can hire one of four Austers from Grantair of Grantchester for a day, week or longer. Some Oxford University students recently flew one to Ghana; their trip proved profitable for they have been offered executive jobs in the newly-formed Ghanaian Air Force. Another plane is giving holidaymakers joy rides off an improvised landing strip on Blackpool beach. The firm also have an aerial taxi service and plan to import kits of special ultra-light aircraft from France so do-it-yourself pilots can build their own planes. 60 08 24

1960 Cambridge University Air Squadron has six little Chipmunk trainers with nine experienced full-time RAF instructors. Every facet of flying is covered and when the examinations and tests have been passed students are the proud possessors of their pilot's "wings". As an additional attraction each receives a £35 bounty at the end of each year to say nothing of the six shillings a day pay for each complete day's training. Trainees can resign at short notice if they feel their academic studies are suffering and only a very small percentage enter the RAF 60 11 04c

1961 Cambridge University Gliding Club has a membership of more than 350, only half of whom are members of the University. They include Prince William of Gloucester, who is studying engineering. The instructors include John Hulme who was former holder of the UK record for a distance flight and Mrs Ann-Mari Neumann, a school teacher. Mr Bryce Smith, a civil engineer, is one of the Club's tug pilots. He says you can't glide without a team of people to help but you must be an individual to be successful at soaring. 61 01 06

1961 A leading RAF glider expert, Ernest Walter Clarke of Duxford, was killed when his sail plane broke up in the air over Fen Ditton – 61 05 29

1961 A workman had an amazing escape from death when an American F-100 Super Sabre jet fighter crashed less than ten yards from him, blowing a hole 15 feet deep in the centre of the main Sawston-Babraham Road. The blast of the exploding aircraft, which broke windows 200 yards away, picked him up and threw him into a field. The plane narrowly missed the Simplex dairy and farming equipment factory and a large housing estate. The pilot ejected and landed in the grounds of Pampisford Hall 61 06 19

1961 The number '22' has been a feature of life at Cambridge Airport for some time. In the immediate pre-war years No.22 Elementary and Reserve Flying and Training School was based there; during the war it became No.22 Elementary Flying Training School and with the return of

peace Cambridge became home of No.22 Reserve Flying School. Now Cambridge Private Flying Group has included the number in its blazer badge. It was formed in 1953 by local businessmen John Peak who owned a Gemini, John Chapman with a Chrislea Ace, G.P. Reece (a Proctor) and Reg Marsh with his Taylorcraft Plus D. They are the 22nd group of the Popular Flying Association 61 06 30f

1961 A visitor to the Royal Show asked if he could park on the playing field of Fawcett School in Alpha Terrace, Trumpington, less than a mile from the showground. But the headmaster told him he could not. So he climbed back into the cockpit of his plane and took off with a 30 yard run. The machine had circled low before landing and Mr F.N. Walker thought it had made a forced landing. But the pilot, who was wearing a Royal Society member's badge, jumped down and asked if he could leave the plane there while he went to the Show. 61 07 05

1961 Queen Mother visits Royal Show by helicopter – 61 07 06

1961 The Dragon Rapide, one of the most popular types of aircraft from de Havilland, is disappearing from the local scene. Until recently Marshall's Flying Services used a fleet of four to operate charter services for jockeys and trainers from Newmarket. Built between 1934 and 1946 they are economical to operate and maintain and even now are a common sight. Some firms use them as executive machines while others still plod the air routes. Marshall's has not entirely said farewell to the bi-plane era: they still have five Tiger Moths for instructional flying 61 08 18

1961 Two young fliers from RAF Waterbeach were given lifts by passing motorists when they landed safely by parachute after abandoning their Javelin jet fighter-interceptor aircraft high over Cambridgeshire. The 700 mph aircraft plunged into a field on Rectory Farm at Fox End Balsham and blew up, scattering wreckage over a wide area. Crash investigation work was hampered as live ammunition from the aircraft's canons was lying in the thick mud of the field where it crashed. 61 11 28

1962 How Cambridge caters for would-be pilots – Marshall's flying school, University Gliding Club & Royal Aeronautical Society – 62 01 12b

1962 The small puddle-jumping aeroplane is becoming part of the modern scene. Wing Commander K.H. Wallis, a member of the well-known Ely family, imported a Benson autogyro in 1957 and has carried out an intensive modification programme. The result is a practical single seat machine known as the Beagle-Wallis WA-116, far-removed from the original American design. It will leap into the air in about 25 yards and climb very steeply at over 1,000 feet per minute before landing n half the length of a tennis court 62 02 23e

1962 A young pilot escaped serious injury when he used his ejector seat at low level shortly before his Vampire jet aircraft crashed on the airfield at Graveley. 62 03 01

1962 Tiger Moth crashes at Caxton – 62 04 23b

1962 Two fliers parachuted to safety when their Hunting Jet Provost aircraft crashed into a corn field at Girton. It came down less than 100 yards from the spot where one of the first flying machines in the country force-landed 50 years ago. The same man who ran to the rescue of the pilot then was one of the few eye witnesses to the recent crash. He was 65-year-old Herbert Moore of Histon, a special constable in the County Police. The plane is believed to have been on a flight from the experimental centre at Boscombe Down 62 08 22

1963 A 1916 Sopwith Pup aircraft was forced to make an emergency landing in a field near Waterbeach. Police stopped traffic on the A10 while it was manhandled across the road on to the airfield 63 05 25a

1963 Stapleford man builds ultra-light monoplane in garage – 63 06 07c

1964 Wallis Autogyros Ltd, formed by Wing Commander Kenneth Wallis and his cousin, produce some of the world's smallest aircraft. Military versions of his autogyro have been tested by the Army and reached more than 10,000 feet. Now the design is being simplified for amateur flyers. Twelve are being completed at a factory at 121 Chesterton Road. His father built the

'Wallbro' monoplane in St Barnabas Road in 1909, but it was destroyed by a storm 64 11 27b
1964 Cambridge airport, an asset to city – feature on Marshall's – 64 09 23a

1965 Cambridge airport seek runway extension of 1000 feet, would divert Teversham road
(opposition, inquiries, approved 1972) (5.15]

1965 barrage balloon from Cardington trailing 2,000 feet steel wire hits Magdalene college; 50
students evacuated due to fear of explosion – 65 10 27, a, 28a,b 6, 2J

1965 Wallis Autogyros, Chesterton Road set up by Ken Wallis & Geoff Wallis of Coton Court
– 65 04 22a

1965 Wallis Autogyro – first export order – 65 10 12e, 13a

1966 Cambridge airport main runway may be extended across main Teversham Road but must
not be used more than eight days a year, will enable larger and heavier aircraft to use it – 66 08
09a

1967 Canberra bomber crashes into empty house, Steeple Morden – 67 04 18

1970 autogyro crash kills test pilot, Farnborough (5.4]

1971 Hot-air balloons launched over Cambridge by Perse schoolboys – 70 01 08a

1971 RAF Oakington trains pilots – feature – 71 07 15

1972 UFO spotted [7 ,2]

1975 Cambridge airport new £100,000 custom's centre [5,16]

1975 UFO spotted[7 .2]

1976 Cambridgeshire planners are asking major international airlines to start a high-speed
airbus service linking Cambridge with Heathrow, Gatwick and Luton airports. They also want the
network to extend to the other provincial airports in East Anglia. The journey between Cambridge
and London airport frequently forced businessmen to stop overnight and the Philips electrical
organisation thinks it is worth while running a trip for businessmen between its Dutch factory and
Cambridge every week. But a director of Premier Airlines of Cambridge said he did not think
there is a regular demand, at the price one would have to pay c76 07 16

1977 aircraft sabotaged at Cambridge airport (5,17]

1977 There was confirmation from Newmarket of the Cambridge flying saucer report. Mr J.
Beirne reported seeing 'a definite circular object while cycling along Madingley Road,
Cambridge. Now comes a report from a bus conductor of seeing a 'bright cigar-shaped object'
flying at great speed at Newmarket. It gave out an orange-coloured tint and was fire by three
small tappets at the rear. There have been isolated cases of practical demonstrations of guided
missiles being carried out in the Mildenhall area and on the Norfolk coast. These guided weapons
are known to be capable of speeds over 2,000 m.p.h. c77 11 27

1979 Wartime memories came flooding back to the ex-servicemen who strolled across
Witchford airfield. A giant hangar here, a derelict office there, and bits of crumbling runway
everywhere: all helped them to remember the days when four-engined Lancaster bombers
rumbled off the airfield on bombing runs to Germany. Other colleagues were at the nearby
Shoulder of Mutton pub, supping pints & swapping yards. All were members of 115 squadron
who had returned for reunion celebrations c17.5.1979

1979 first Thomson holiday jet Boeing 737 leaves Cambridge airport for Tunisia [5.18]

1979 Three people died and seven were injured when two RAF jets crashed at Wisbech. One plane narrowly missed two schools and a college before plunging into Ramnoth Road, demolishing two houses and a bungalow. Hundreds of people, including the Mayor, frantically searched through the rubble for survivors. Police put a 'disaster plan' into immediate action and emergency services rushed to the area which was evacuated and cordoned off. The second plane crashed at New Drove, near the town's industrial area. The aircraft, single-seater Harrier jump jets, were based at RAF Wittering. c.20.9.1979

1979 Stunned and exhausted the Mayor of Wisbech spoke of the appalling tragedy which rocked his town. Coun Bob Lake was one of the first on the scene of the disaster in which an RAF Harrier jump jet totally destroyed two houses and a bungalow following a mid-air collision. "I just ran for the smoke as fast as I could. When I arrived in Ramnoth Road my heart stopped", he said. "I was informed that there was a man and a child trapped so I started tearing at the rubble. The remains of the three buildings were on fire and gas filled the air. The three people who died were a former Mayor of Wisbech, a 40-year old man and his 2½ [TWO AND A HALF] year-old son. There were stories of narrow escapes as the plane passed narrowly over two schools and an 800-pupil college c21.9.1979

1979 A US Air Force F111 fighter-bomber crashed at Harlton. Nearby houses were rocked and a great sheet of flame was sent up as the plane plummeted into a spinney. Trees were pushed downwards and branches torn off and only the tail section was visible embedded in the ground. First on-the-spot rescuers dashed around the meadows trying to find the crew, but they had parachuted down several fields away. The crash came after a series of low-level flying missions over the area. Only two weeks ago two RAF Harrier jump jets crashed at Wisbech CEN 31.10.1979

1980 One of the strangest new shapes in the sky has lifted off the runway with its Elsworth designer, John Edgley sitting next to a test pilot. His aircraft, the Optica, has been nicknamed the Bug Eye because of its odd looks. The cabin is a Perspex bubble and it is designed to have the low-speed capability of a helicopter but be as cheap and easy to fly as a conventional light aircraft, making it an economical observation plane. Its future roles could include powerline inspection, fire-watching, traffic patrol and pleasure flying CEN 4.1.1980

1980 Reports of a UFO which held Harston villagers spellbound have been received from other parts of the world. A researcher who investigated the phenomenon says they appear to be genuine descriptions of an unknown technology. Other reports have been received locally. Desmond January, a Cambridge estate agent, said he watched a line of three white lights which he thought at first were helicopters, but there was no noise and one shot away at right angles up into the sky. Another resident of Hauxton reported something similar that evening while on New Years Day a lady described seeing a dark cylindrical object pass over her home in Hills Road, Cambridge. The following day two teenagers at Girton told of a light 'burning like magnesium ribbon' c80 01 19

1980 An undertaker sitting in his van on the outskirts of Barkway saw a saucer-shaped unidentified flying object cruise silently past at a height of 60 feet. "We were eating our lunch and this brilliant silver object went past us", he said. "It was travelling about 30 mph and looked like two dustbin lids stuck together; it was moving in a straight line, not going up or down". Police say the Army had troops on manoeuvres in the area but it was nothing to do with them. 80 09 17

1981 The famous autogyros produced by Ely-born aviation expert Wing-Cmdr Ken Wallis may soon go into production. They can carry out many of the roles of a helicopter but are much

cheaper, costing around £17,000. A fighter version was used by James Bond in the film 'You Only Live Twice'. His father built his own aircraft in the garden of a house in St Barnabas Road in 1908; it flew from a field near Fulbourn but was later destroyed in a storm. 81 03 04a

1981 Just over 70 years ago an enthusiastic CDN reporter wrote about a 'brand new flying machine of the monoplane variety' built by Horace and Percy Wallbro in their back garden in St Barnabas Road. With an astonishing eye for technical detail he described the world's first aircraft built from light steel tubing. Now, using his notes, their sons have built a replica and proved it really could have flown 81 06 30a

1981 The famous autogyros produced by Ely-born aviation expert Wing-Cmdr Ken Wallis may soon go into production. They can carry out many of the roles of a helicopter but are much cheaper, costing around £17,000. A fighter version was used by James Bond in the film 'You Only Live Twice'. His father built his own aircraft in the garden of a house in St Barnabas Road in 1908; it flew from a field near Fulbourn but was later destroyed in a storm. 81 03 04a [5.6]

1982 Prince Philip flew into Cambridge and made what is believed to be the first helicopter landing on Parker's Piece. It made quite a stir among people making their way to work. It may also have made them late because police cordoned off the Piece for the landing, special permission for which had been obtained from the City Council 82 05 19 [02,4.22]

1982 The new flying craze, sport and business of microlights has arrived in Cambridgeshire. Taurus Aviation has been set up at Haddenham and with the co-operation of farmers they now have a choice of fields from which they can take off and land. Meanwhile a Haverhill Company is selling an American-made microlight for £3,000 including five hour's free instruction. It can be assembled in half-an-hour and carried on a car roof-rack. 82 06 11 b&c

1982 If you want to buy a microlight aircraft in Cambridgeshire there is only one place you should go – Taurus Aviation of Haddenham. They are agents for Puma aircraft with prices ranging from £2,317 for a single-seater to £3,230 for a two-seater model. A trial flight, just to see if you like the sensation, will cost £11.50 and dual instruction is £23 an hour. It seems a lot of money, but middle-aged people find it thrilling. 82 09 02

1983 A 130-ton TriStar airliner, the largest ever to land at Marshall's, marks the start of a six-plane conversion programme that will keep the firm's 800-strong aero-engineering staff in work for the next four years. The £50 million contract is to convert four into 37,500-gallon tankers for flight refuelling duties and the others to freighters with big cargo doors. 83 02 17

1984 Sonerai light racing plane built, Perne Road [5,7]

1984 A back garden in Perne Road has become a makeshift aircraft factory. Two plane enthusiasts, Peter Fabish and Andy Crumphorn have been chiselling, sawing and shaping the sheet metal, struts and spars which will eventually become a Soneral light racing plane capable of looping the loop and acrobatic flying. They intend to find a farmer's field from which to fly it 84 03 21 p7

1984 Millie Howes of Houghton will be reliving fond memories when she settles down to watch her television. She worked in the Portholme aircraft factory at Huntingdon during the First World War helping build Camel fighters. A film made in about 1917 is to be shown on the programme showing Millie working in the factory. "When we first started we were given carpentry lessons, then put on fuselages and had to put the struts in and wire them up, I supposed where worked on two planes a day", she remembers. We earned £2 a week, which was good money, but it wasn't very warm and we had no canteen", she says 84 05 11 p13

1984 Ken Wallis, the aviator who invented James Bond's "Little Nellie", has notched up two world records at RAY Wyton. Following a measured course along the 16ft drain at Chatteris he attained a speed of 117.8 mph – beating the previous record held by an American by almost 10 mph. He now holds 15 of the 16 world records associated with an autogyro. The Wallis family are no strangers to Cambridge. In 1910 his father took their Wallbro monoplane to a field near Fulbourn for a maiden flight. But after a couple of hops and a bump they called it a day. Now Ken hopes to arrange a commemoration to mark his father's efforts 84 10 19 p18 (16 by 1985) (5.9,5.10)

1985 The bug-eyed Optica plane designed in Cambridgeshire has won its certificate of airworthiness. It can loiter at under 60 miles and hour, carries three people and is intended for observation work, aerial photography and sight-seeing. It was invented by John Edgley of Elsworth who planned to build it locally. But because of difficulties in finding a suitable site the firm has moved to Wiltshire. 85 02 14a

1985 Ken Wallis sets off for another record – 85 02 14 #

1985 Autogyro pioneer Ken Wallis has just notched up his 16th world record. Flying from Waterbeach, Ken completed his remarkable record-breaking flight to mark the 75th anniversary of the first public viewing of a monoplane built in Cambridge by his father and uncle. "It seemed that the anniversary should be marked in some way, so I made an attempt upon the one work record not held by my autogyro aircraft", he said. 85 05 22a & b

1985 Edgley Aircraft, producers of Optica which was first flown 1979 goes into liquidation – 85 10 23

1986 Cambridge airport plans for £15 million hanger announced, opposed, inquiry [6.1]

1986 Two Newmarket families had a miracle escape when a blazing American jet crashed just a few feet from their home. The F-111 plane plummeted into the garden of a house at Clarehaven Stables in Bury Road. Wreckage was scattered over the garden and holes were made in the house roof. But miraculously no one inside was hurt. The plane's two crew members were blasted clear by their ejector seats and were treated by a team from the Magpas 'flying doctor' service. 87 02 23

1986 The F-111 jet crash at Newmarket is the latest in a string of accidents. Two months ago two RAF Tornados plummeted into the countryside, one close to Peterborough and the other just missed a Norfolk school. In 1985 a Canberra exploded into flames when it smashed into fields near Alconbury. In 1981 an F-111 crashed while approaching Lakenheath and another rocked houses at Harlton when it hit the ground with practice bombs aboard. In December 1977 a fighter came down a few hundred yards from a Newmarket school sparking a major scare as police feared one of the plane's bombs could have gone off 87 02 23a

1987 It was pitch dark at 3am one Sunday morning as a Newmarket lorry driver was making his way north of Littleport towards Welney. He was talking to his wife on CD radio when suddenly a bright green light appeared in the sky. It was heading down to earth at tremendous speed, then changed direction and zipped across the road before disappearing. His experiences follow that of two Burwell women who saw huge orange lights above the fields near Swaffham Prior. These are the first unidentified flying objects reported locally for six years. 87 01 12

1987 The F-111 jet crash at Newmarket is the latest in a string of accidents. Two months ago two RAF Tornados plummeted into the countryside, one close to Peterborough and the other just missed a Norfolk school. In 1985 a Canberra exploded into flames when it smashed into fields near Alconbury. In 1981 an F-111 crashed while approaching Lakenheath and another rocked houses at Harlton when it hit the ground with practice bombs aboard. In December 1977 a fighter came down a few hundred yards from a Newmarket school sparking a major scare as police feared one of the plane's bombs could have gone off 87 02 23a

1987 Cambridge graduate Michael Foale has been named by Nasa as its first English-born space shuttle astronaut. Mr Foale, whose parents live in Cambridge, graduated from Queens' College and completed a PhD in Astrophysics at Lucy Cavendish College six years ago. He first learned to fly at Marshall's airfield while a student. "He is absolutely over the moon", said his father retired Air Commodore Colin Foale who lives in Cambridge. 87 06 06

1987 An amazing plan to relocate Marshall's Airport to Waterbeach airfield and use the hundreds of acres vacant for a massive housing estate will be put to county councillors. It would solve the city's shortage of land for housing and end aircraft noise problems for residents. The move would create more jobs and relieve traffic. There would then be no need to spend millions of pounds on a proposed new overspill village in the fens. But the airport authorities do not agree. 87 10 06

1987 Cambridge's first airborne pleasure trip service has just taken off. Techair, a charter company, offers flights from Marshall's Airport in a five-seater Piper Aztec. They charge £14 for a 15-minute trip over the city. The weather for the inaugural flight was dull, raining and windy, buffeting the plane as the pilot pointed out landmarks. The flights are nice for foreign tourists but are mainly aimed at local people who have no experience of flying a small plane. 87 10 15a

1989 An A-10 tankbuster jet taking part in close ground attack manoeuvres ploughed into a field near Ramsey Forty Foot and exploded in a ball of flame. It came down close to several farms, tearing across a road and narrowly missing two vans as it disintegrated. US troops scoured the wreckage for potentially dangerous training ammunition. It is the third accident locally in four months: one crashed into a field at Earith and another crashed off the end of the Alconbury runway 89 04 18

c.26.2 : railways

Chesterton school pupils with locomotive 1956

110.45

Railway Traveller's Guide history 60 03 22

1845 After several abortive starts a railway finally arrives at Cambridge in 1845, the station having been sited far from the centre of the town because of University objections to the line coming within a mile of their buildings. An additional clause prohibited trains from stopping within three miles of Cambridge on Sundays. Although this restriction was not repealed until 1908 it had long ceased to be observed.

1849 A reader has sent a picture of a locomotive engine built by Headley Bros of the Eagle Foundry, Cambridge in 1849. It was a small single-tank affair with two big driving wheels, painted bright green and named the 'Eagle'. At first there was no tender, only a small place for the driver, though later it was extended to carry a saloon. It was intended for the use of the Eastern Counties Railway's engineer but its career was marred when in 1850 it ran over and killed the district superintendent. 30 08 19a

1863 A wooden island platform connected by footbridge & tunnel under the lines was added only to be abandoned during rebuilding work in 1863 which lengthened the original platform.

1886 In 1886 a new two-platform Station was planned but this would have involved taking part of Coldham's Common which Parliament refused to sanction.

headlines .-

1888 plans for Mill Road Bridge nearly ready [2.8]

1888 proposed new Goods Yard, Mill Road [2,7]

1889 Sir – The Mill Road footbridge over the railway line was opened to the public on Monday August 3rd 1889. I was the last one to take the keys of the gates to the station – William Nelson. Sir - The iron footbridge over the railway on Mill Road had wooden steps and gave access to the open fields beyond it. In fact, so countrified was the area that when the Royal Standard was built it was known as 'Apthorpe's Folly' from William Apthorpe the brewer who built it. The bridge now stands on Coldham Common where it spans the Newmarket Line – H.D.C. 35 01 26

1892 opposition to divert section of line across Coldham's Common [1,5]

1893 Great Eastern Railway Act empowers new station at Cambridge & diversion of the Newmarket line as trains crossing all main lines at station presents danger [1.6]

1893 station improvements [1.15]

1896 Coldham's Lane bridge built & new track of railway opened [1.9]

1897 a fast train to London takes 1 hour 22 minutes & costs 10/-(50p) (in 1947 it took 1 hour 13 minutes & cost 4/7a (23p) [1.10]

1897 Propose new GER station – present station dangerous, extension to Mill Road, Coldham's Common site proposed, Hyde Park Corner possible 1897 02 01 p3 CDN

1899 The Great Eastern Railway Company has for many years been engaged in carrying the workpeople of East London to and from their work and Liverpool Street and Fenchurch Street stations every morning are thronged with the wage earners of East London. Now within a few miles of Cambridge Messrs Chivers have established a jam factory and in the fruit picking season employ an average of 8,000 people, most drawn from Cambridge. For their benefit the Great Eastern Railway has now provided trains to Histon, morning and night. These are of immense convenience to the fruit pickers and in putting them on the railway company has in promoting its own welfare promoted also that of Cambridge - 1899 07 05

1900 Sir – At present gates cross the railway line on Milton Road, Cambridge, and a sub-way is provided for vehicular traffic. After heavy rains it is flooded some feet deep and a few days ago the driver of a carriage containing an invalid lady found over five feet of water there, and no room to turn round. The invalid and her attendant had to sit up to their knees in water, and in their saturated clothes had to proceed to the Hospital. – Viator c00 03 06

1900 An accident happened at Cherry Hinton. The 8.55 passenger train was due, but the gates over the Cherry Hinton crossing remained closed; consequently the engine, which was travelling backwards, dashed into them with horrific force and smashed them to pieces. The head lamp on the engine was broken, but no other damage was done. The gatekeeper has been suspended 00 08 14 c

1901 Few spots in and around Cambridge have become more notorious for the number of fatalities which they yield than the vicinity of Barnwell Junction and the stretch of line between that point and the level crossing on the Chesterton side of the railway bridge which spans the Cam. And probably nothing

has ever surpassed in ghastliness the gruesome discovery made there during the early hours of Tuesday morning. The unfortunate victim was a telegraph linesman, inquest 31st p3 CDN 1901 01 29

1901 As we tread the borders of the 20th century we wonder whether the people of the year 2001 will find the railway train be a thing of the past because they are using flying machines as a means of locomotion. Will the fact of sending a message along a wire be deemed romantic at that period or will the telegraph appear to them as old fashioned and romantic as the first efforts of telegraphy by means of wooden arms do to us. The romance of looking forward is to us not to be compared with that of looking back c01 02 12

1904 children throw stones on trains from Mill Road bridge [2.15]

1904 Mr F.B. Kelly has retired as District Manager of the Great Northern Railway at Cambridge after 55 years service. He began at Lincoln when the railway began to compete with a boat that used to ply between Lincoln and Boston. Instead of seeking to attract custom by providing a more comfortable means of travelling they decided that anything cheap, though nasty, would do. They provided fourth-class carriages which had neither seats nor covering and packed them in like so many sheep. He also recalls the better type of carriage that was modelled on the stage coach and remembers how before the introduction of vans luggage used to be piled on the top of the carriages and covered over with a sheet. 1904 07

1905 GNR experiment with petrol car on railway [2.17]

1905 It would appear as though the automobile is going to revolutionise transit in all departments and the next application is likely to be the railways. The Great Northern Railway Company have been allowing a motor manufacturing company to make experiments upon their lines with a petrol car as a conveyance over branch lines passing through sparsely-populated districts. It is being seriously considered whether the automobile carriage carrying a few passengers shall not supersede the ordinary locomotive-drawn train. The car with which experiments are being made ran into

1905 Sir – thousands of people in Romsey Town are anxious for a shorter route to the railway station. Some years ago they had a private path but this was closed; a shorter route, known as Coulson's Path, was also taken away and passengers have to go by the Devonshire Road. The erection of one of the old foot bridges, now lying useless, somewhere near Charles Street or David Street would be a boon to both railway and inhabitants – S. Hurrell. 05 09 06

1906 A serious accident occurred on the Great Eastern Railway at Shippea Hill station. The engine attached to the Norwich-London express jumped the line, the coach following reared up on end and fell down the bank into the ditch, breaking the telegraph wires. The second coach was hurled down the bank on the opposite side and the third, fourth and fifth coaches left the lines. Three passengers were injured, two seriously, but all had a miraculous escape from death. The line was completely blocked and a breakdown gang was speedily conveyed to restore communication. The passengers were sent on by special train 06 04 07b

1906 A Government Inspector's report into the derailment of a passenger train near Shippea Hill on April 7th concluded it was caused by unduly high speed over a portion of track under repair. At Cambridge Assizes a 15-year old boy from Prickwillow was indicted for having placed a sleeper on the railway line near Ely on the evening of March 6th. It was hit by the Norwich train and carried for a mile and a quarter 06 06 04b, 06 06 04c, d

1906 Cambridge station platform will be lengthened by 270 feet and widened with new awnings. The booking hall will be enlarged nearly three times, the waiting room, lavatories and parcels office doubled. A subway connecting the eastern side of the line with the town would be a convenience but only a small proportion of those people using it would be railway passengers. However the railway would allow a wayleave under their line to anybody who wishes to construct one. 06 08 09

1907 A signalman at Cherry Hinton signal box experienced the agony of seeing his son killed before his eyes. While he was on duty his three-year-old lad toddled across the line to visit his father, just as a passenger train was approaching. Unable to leave his post and unable to prevent the accident, the father saw his son knocked down by the train. He was picked up, shockingly injured, and conveyed by the train to Cambridge station and from thence to Hospital but was dead before he arrived. 07 01 03b

1907 Sir – I should much like to live in Cambridge but am unable to do so because of its trains. If I could get to London before nine in the morning and return after 10.30 at night I could do so. There are numbers of commercial travellers and tradesmen who have to go to market who would live here and patronise whichever railway company gives this facility first. A route via Bedford would only take some 20 minutes longer and would be a great benefit. – Effigy. Two years ago the railway asked for the names of 10 people who would be regular passengers – but no names were forthcoming - Editor 07 07 08

1907 When the Cambridge station Night Inspector heard of a fire at Bishops Stortford he despatched telegrams summoning workers from their homes. A truck specially designed for the conveyance of the fire engine is always kept ready but the engine itself is kept unmounted, ready for local fires. Within an hour a special train comprising a locomotive, the fire-emergency truck and a brake van was thundering down the line as, on board, a little band of half-a-dozen men busied themselves with preparations for the grim contest that lay before them. 07 12 07

1908 clause re trains not stopping on Sundays formally repealed (stopped before) [4.10]

1908 A shocking railway accident, resulting fatally, occurred at the Cherry Hinton level crossing. Two light engines were approaching and the gatekeeper, Mr West, being absent at the back of his house, his daughter was closing the gates. One easily shut but before she had time to close the second the engines were upon her and she was thrown to the ground. The unclosed gate was badly damaged. The gatekeeper was 71 years of age and on duty all hours. For the last four weeks he had been called at four o'clock in the morning and was on duty till 10.30 pm. CWN 08 07 17 p5

1908 There will be considerable reorganisation at Cambridge station following the agreement between the London and North Western and the Midland Railways. There will now be a combined staff for goods, cartage and passenger traffic and one town office will do the business of the two. But passengers taking ordinary tickets to London by the Great Eastern Railway still have the privilege of returning by the Great Northern, or vice versa. CWN 08 09 18

1908 After many years of waiting, Thaxted is at last assured of its railway. The history of the Elsenham, Thaxted and Bardfield light railway scheme is a very long one but in 1907 an Act of Parliament was obtained and now the Great Eastern Railway has agreed to construct the line. A platform will probably be erected at Henham and a siding for goods at Sibley. Thaxted is a delightfully sleepy old English town; many of its inhabitants are said to have never seen a train and some disbelieve in the existence of such means of locomotion. But soon this peaceful spot will receive the rough jolt of advancing commercialisation CWN 08 10 09 p3

1908 Cambridge railway station – major article from Railway Magazine – 08 12 04

1909 The line near Cambridge station was blocked by a collision between two goods trains. One engine and four trucks were derailed and the goods thrown in all directions. One was completely overturned and its contents scattered over the line while others loaded with granite had the sides ripped open. The accident happened under Mill Road bridge where a crowd of spectators watched the arduous task of clearing the line 09 01 22

1909 Improvement work has started at Cambridge railway station to provide better facilities for branch trains. But other work to enlarge the booking, parcel and lavatory accommodation, to widen the main platform by twelve feet, provide another exit for parcel traffic and erect another

colonnade in the yard is a task of considerable magnitude and will not be undertaken at once. 09 04 02

1909 The stationmaster of Barnwell Junction found the ticket office had been entered, the till broken open and cash and stamps stolen. After smashing the till he visited the stationmaster's office and made a meal of bread and cheese. 09 04 09

1909 A shocking accident occurred at Cambridge Railway Station when George Meade of Shepreth fell in front of an engine and received such injuries as necessitated the amputation of both his legs. It was fully twenty minutes before he could be extricated and removed to Addenbrooke's Hospital 09 05 28

1910 Cambridge station railway worker decapitated by train – 10 10 28d

1911 Everyone concerned is to be congratulated on the construction of a light railway to link up the old-world Essex town of Thaxted with the Great Eastern system at Elsenham. It is 15 years since the project was mooted and now the first sod has been cut. The difficulties have been great: land was difficult to obtain and it was not easy to raise the money for a scheme which does not present the likelihood of profit. But the Treasury considered it would tend to the development of agriculture and made a substantial grant. Now the long-cherished dream is almost an accomplished fact 11 07 21b 11 07 28g & h

1911 The Great Eastern Railway says that despite the increase in motor travelling, which renders wealthy people independent of railway trains, the first-class returns show a considerable increase. The third-class returns are also up which is more surprising for the development of tubes and trams in the London suburbs means keen competition. But the second-class passenger seems to be gradually dying out and on many lines has been abolished altogether 11 08 04

1911 The railway strike has begun and its effects are impossible to say. A complete stoppage would paralyse the trade of the country. Meat would be unobtainable and flour and corn exhausted in a week leaving cities starving for bread. No doubt road and river traction would bring some mitigation but fruit and fish would leap to famine prices and without coal no gas or electricity can be produced. Mills, factories and workshops would be closed down for lack of power and the great majority of people become dependent upon public relief. 11 08 18e

1911 The effects of the rail strike are not seriously felt in Cambridge. All trains are running though supplies are considerably delayed with shortages in butter, bacon and petrol. Representatives of the Amalgamated Society of Railway Servants have been in town but only a very few local employees are society men. Cambridge Station is looked upon as a 'fat job'; guards, porters and platform hands know when they are well off and there are plenty of reserve men to take the places of any who come out. 11 08 18h

1911 Had the railway strike not been settled on Saturday there is little doubt that nearly 100 of the men employed at Cambridge station would have come out. The GER trains ran as usual and the London and North-Western Railway will give double pay to the men connected with the movement and handling of traffic who have remained loyally at their posts. Although no actual disturbances were feared the Chief Constable very properly took the precaution of stopping all leave in case of need. 11 08 25f

1911 The Cambridge stationmaster, Mr Holdich, was presented with a gold watch and a cheque for 100 guineas on his retirement. When he'd started with the Eastern Counties Railway in the 1850s the rolling stock was in a wretched state. He'd ridden in a carriage with no roof, others had a roof but no windows. In 1894 he'd been appointed to Cambridge, dealing with Masters of Colleges, learned Professors, royalty and other distinguished personages. Then there was the Royal Show. But they'd got through all right. 11 11 03d

1911 John Stanley, poulterer of Peas Hill sued the G.E.R. Company for damages sustained in the carriage of 84 ducklings and three geese from Liverpool Street to Cambridge. They were to

have been sent by passenger train the same day. But instead they were taken on to Doncaster. He made numerous inquiries but it was not until 9pm that the birds arrived at the station but the GER could not deliver them until Monday, by which time they would have been bad. But he had an old contract that said the goods were sent at his risk and he lost his case. 11 11 24f

1911 William Macfarlane-Grieve of Impington Park sued the Great Eastern Railway over trees and shrubs which were destroyed by fire caused by sparks or cinders from locomotive engines used on the railway at Histon. During the abnormally dry season the plantations had been set alight eight or nine times. He had seen a train pulled by a red Midland engine, number 134. Directly it passed a fire broke out and he'd picked up cinders from the engine. He was awarded damages. It was the first action under the Railway Fires Act passed in 1905. 11 12 22b

1912 Some little excitement was caused on Saturday evening by several balloons travelling over Gamlingay in a northerly direction. One dropped within shouting distance and having ascertained its whereabouts, rose and floated away. The aeronauts were taking part in a long-distance contest from Hurlingham and some reached Yorkshire before descending. 12 06 28k [2.21]

1912 A slight mishap occurred at the Milton level crossing when the down gate was smashed by the 6.05 pm train from Cambridge to St Ives. Beyond the smashing of the gate and some slight damage to the brakes, due probably to the sudden stopping of the train, no damage was done. Immediately before this Chivers' work-girls train had passed on the up line. The gateman said that earlier he had let through some sheep and the gates were securely fastened. But the down gate became opened in some way and was run into by the train. This is the fourth accident at this crossing in the last three years. 12 03 01f

1912 When retiring Stationmaster, George Kimm, first came to Cambridge the Superintendent's office was on the old island platform that stood opposite the present platform before it was lengthened. There was a bridge by which passengers reached it but all luggage was transferred by means of a trolley and then shouldered by porters to a cab or van for conveyance to its destination. This caused very great delay, especially at the beginning or end of term, and it was largely for the convenience of the University that the present long single platform was made. It was opened in October 1863. He has seen the opening of the Haverhill and Sudbury line amongst others, welcomed Royalty. Stretham fen accident described: the balance-weight of the engine of an express train fell off just as a down express was approaching, and, the weight rolling on to the line, threw the down train into the dyke. A number of people were injured. Litigation followed and the company were found liable 12 06 07k

1912 Ever since his undergraduate days Mr Will Moorhouse of Huntingdon has devoted himself with unremitting zeal and undaunted pluck to mastering the science of aviation. Now he has set a new record. With his newly-married wife and the aeronautical correspondent of the Daily Telegraph he has flown the channel starting from Douai and arriving at Ashford two hours later. This is the first time the Channel has been crossed by an aviator with two passengers. A serious accident attended the forced descent owing to a storm. The airman and his passengers escaped, but the new Breguet airplane was badly damaged. 12 08 09a & b

1913 2 killed at Coldham's Lane crossing [1.8]

1913 The new light railway between Elsenham & Thaxted was officially opened. The line runs for 5½ miles with three stopping places, Sibley Station, Henham & Cutler's Green. In 1896 it was proposed that the line should go as far as Bardsfield but in 1906 it was decided to terminate at Thaxted. The GER undertook to find half the cost of construction if the Treasury provided the rest and landowners gave the land.. There can be very limited revenue with the GER carrying farm and market garden produce cheaply and quickly to London. 13 04 04 p8 CIP

1913 Suffragettes attempted to blow up a railway crossing gate at Granhams Road, Shelford. The gatekeeper found a treacle tin with a bootlace through the lid connecting with a long red

squib inside. It was surrounded by cotton wool soaked in oil and lumps of charcoal. On the outside was written 'Votes for Women'. There is little doubt it was a genuine article that could have set fire to the gate had the lighted lace not gone out. It was immersed in a bucket of water. Rumours said that two strange women had been seen near the site 13 05 30 p11 CIP

1914 railwaymen's union meeting 14 07 02

1914 The train with wounded from the front was delayed. Rooms on the Great Northern platform were converted into wards for serious cases before being taken to hospital. Outside a fleet of motor cars and tradesmen's vans converted to ambulances were ready to take the men to the First Eastern Hospital now at Trinity College. It was not easy to lift the badly-wounded men out of the carriages but stretchers were placed on luggage trolleys and wheeled slowly along the platform. There were tears in the eyes of onlookers 14 09 04 p7

1914 Railway Tragedy. — A fatality on the Great Eastern Railway line at Cambridge on Saturday, when a platelayer named William James Thurlow was knocked down by a truck while engaged in oiling points near Mill Road Bridge. Thurlow was working with a man named Jack Andrews, who was also knocked down and injured. Thurlow died after admission to hospital, and at an inquest the jury returned a verdict of "accidental death." 14 10 23 CIPof

1915 Presentation. — On Thursday a presentation was made to Mr. W. B. Allen, for ten years London and North-Western and Midland Stationmaster at Cambridge. The gifts consisted of an easy chair, a case of pipes and a tin of tobacco. A welcome was extended to Mr. Bradley, the successor to Mr. Allen 15 02 05 CIPof

1915 Well-known G.E.R. Stationmaster —It is with deep regret that we record the death of Mr. John Ablitt, the Gt. Eastern Railway stationmaster at Cambridge, which occurred at his residence. Morecambe House, Mill Road, on Thursday. The news of his demise will be received with universal regret throughout the whole of the Gt. Eastern system. Mr. Ablitt was in his 58th year. At the age of 21, he was appointed relief Stationmaster in the London district, and when Huntingdon joint railway station was opened, he took up duties there as stationmaster. He was afterwards transferred to Shelford, where he remained for 10 years, proceeding to Hunstanton (two years), St. Ives (two years), and Wisbech (six years) as stationmaster. In 1911 he secured the appointment at Cambridge railway station. 15 02 05 CIPof

1915 New Stationmaster.—The vacancy caused at the Cambridge Station (G.E.R.) by the death of Mr. J. S. Ablitt has been filled by the appointment (made by Mr. Win. C. May, the Chief Traffic Manager of the G.E.R.) of Mr. Frederick Randall, Stationmaster at Ely. Mr. Randall, who this week took up his duties as stationmaster at Cambridge, has been in the service of the company for 28 years. He succeeded Mr. Bedford (now District Superintendent at Ipswich) as stationmaster at Ely in 1911. By his large and varied experience in the practical working of a railway, he is particularly well-fitted to discharge the responsible duties which the management of so important a junction will devolve upon him. Cambridge is regarded, as the most difficult to work of the company's provincial stations 15 02 19 CIPof

1915 The Fire Brigade received three calls to borough fires during the past week. In the early hours of Wednesday morning they were called to a serious outbreak in Fitzroy Street, and on the following day they were called upon to pay two visits to the London and North-Western Railway, where an engine shed had caught fire. 15 09 03 CIPof

1915 LNWR engine shed damaged by fire, in siding near main line; second outbreak; caused by sparks from engine 15 09 03

1916 Sidney Frederick Lofts, aged 19, of Thoday Street, Cambridge, was engaged in shunting operations on the G.E.R. at Barnwell Junction when he was knocked down by an up express. The down express train had just passed, and this Lofts had noticed approaching. In avoiding it, however, he did not notice the other train. A motor ambulance was telephoned for and obtained

from the military hospital, the man being taken to Addenbrooke's Hospital. Here it was found necessary to amputate both legs. 16 03 29 CIPof

1919 Rail Strike,—The action of the N.U.R. Executive in forcing on the country, without warning, a national railway strike, bound up as it is with so many evil consequences and endangering the country's food supply, met with universal condemnation in Cambridge, as indeed it has throughout the British Isles. The situation is being met with calmness and fortitude.

Cambridge railway station went to sleep on Friday night at the behest of the N.U.R. Goods traffic and perishable articles were held up, cattle suffered similarly and the mere man in the street was faced with the necessity of arranging his own transport if he wished to get home during the week-end. Four or five passenger trains were handled at Cambridge on Saturday. About 90 per cent of the men are out. A few trains have been run daily during the week. The Divisional Superintendent of Operations said a large number of Cambridge civilians had volunteered for service on the railway. The strike affected the gas supply and postal services and food rations were reduced to the following amounts: Meat 1s. 8d. worth per-week, bacon 6 ozs. sugar 8 ozs. butter 1 oz, margarine 4 ozs, lard 2 ozs. An old lady walked ten miles on Saturday to fetch margarine. Coal deliveries were restricted to deliveries of one cwt. 19 10 08 CIPof 19 10 01b

1919 Rail strike; military at station; food supplies assured but shortage inevitable; road transport development, strikers interfere with volunteers – 19 10 01b

1919 Railway Strike Ends,—The railway strike terminated on Sunday after an existence of nine days. Speaking generally, Cambridge felt but little ill effect from the national railway stoppage. Volunteers and loyal employees carried on a skeleton passenger service and voluntary effort in connection with road transport proved an invaluable asset in the movement of food supplies for the community. Travellers were incommoded, the public generally showed annoyance and anxiety in turn, and the man in the street exercised a Briton's privilege of "grousing" and carrying on the best he could, Cambridge railway employees returned to work on Monday, and about 8 a.m. 500 of the strikers marched to the station to report for duty. Others arrived in the course of the day, but owing to some misunderstanding in connection with the re-instatement of certain labour, the goods operatives declined to resume work. A deputation waited upon the local railway authorities and subsequently returned to the strike headquarters in Devonshire Road. Here the goods men were told to report for work next morning, the difficulties having been overcome. The men received the instruction with general pleasure, and one enthusiast called for cheers for the "brothers" who had settled the matter. A member of deputation discountenanced any form of demonstration, and the men dispersed quietly 19 10 08 CIPof [1.18] 19 10 08g

1922 Bencro timetable indicators at station giving details of platforms etc [2,20]

1923 first LNER engine at Cambridge [2.19]
1923 until grouping in 1923 Cambridge served by 4 independent companies - Gt Eastern which owned station & most things around it, Gt Northern from Kings Cross, London & North Western from Bletchley & Midland Railway from Kettering; LMS & LNER only came it 1st Jan 1923 [21.5.1987]

1923 The offer of the London and North Eastern Railway Company in connection with the acquisition of the site of the old Newmarket railway line for the purpose of linking up Cherry Hinton road with Mill road, Cambridge, led to a good deal of discussion at the town council. For many years they had tried to get the company to come to terms, so that they could join the Rock Estate with Romsey town. The line was the key of the situation, and there were great possibilities of development on that side of the town. Mill Road too was strangled at present. Councillor Ambrose hoped the negotiations would be conditional on some promise of a bridge or railway for the people to get to the station from the Rock estate c23 07 29

1925 Certain alterations are to be made in the railway station at Cambridge. The L.N.E.R. propose to extend the main line platforms at each end so that the whole of long trains may be accommodated. The goods yards on the Cherry Hinton side are to be re-arranged and extended for the storage of carriages. Up to the present the old Newmarket line had been used but this is being handed over to Jesus College and the Corporation in connection with the building of the new arterial road from Cherry Hinton to Romsey Town c25 01 20

1926 Sir – as a business man obliged to use the railways I wish to draw attention to the lack of punctuality of trains from the St Ives branch at Cambridge station. The 8.25 pm is invariably anything from a quarter to half-an-hour late, generally waiting ten minutes at Mill Road bridge whilst room is being found to run up to the platform. There is a rumour that the Ortona Motor Bus Company is shortly linking up with the National Bus Company at St Ives. The railway companies grumble about road transport competition, but it is their own fault and they have a remedy by being more punctual with the passenger service – H.G. Parker c26 02 28

1926 A large crowd assembled in the grounds at Cherry Hinton Road, Cambridge to see the daring leap from an aeroplane by Mr Geoffrey V. Peck. The descent was made with a Guardian Angel parachute from an aeroplane travelling at nearly 100 mph and 1,000 feet high. Crowds rushed to the adjacent field where Mr Peck had landed; he was surrounded by eager autograph hunters and signed innumerable photos. Passenger flying was very popular and the pilot will loop the loop and corkscrew at a slightly higher cost. The two aeroplanes belong to the Southern

Counties' Aviation Company and are quite reliable so anyone who would like to fly should avail themselves of this opportunity c26 06 11

1926 Sir – the aeroplanes which make daily trips from a field off the Cherry Hinton Road, Cambridge, are becoming something of a nuisance. They have been here nearly a month and show no signs of going away. They fly low over the houses and are even more of a nuisance on Sundays. A quiet residential district like the Rock Estate is not an appropriate district for amusements of this kind which should be carried on over open country, far from places where people live and work – John Bousfield, Cavendish Avenue c26 06 12

1926 Sir – you published a letter complaining of the noise and inconvenience caused by aeroplanes at present operating from a field on Cherry Hinton Road. These 'gypsy' aircraft companies which tour up and down the country giving joy-rides are educating the country up to aerial transport. They are giving people an "air-sense" which is essential before aviation can become at all general; people have to be made to realise how extraordinarily safe flying is even at present, when several problems of control have yet to be completely solved – S.V.C., Christ's College c26 06 13

1929 Big Cambridge fire – sheds and railway trucks destroyed at Hills Road – 29 08 17

1929 Pymoor railway sidings tragedy, plate-layer killed 29 08 14

1930 most up-to-date engines displayed at station to raise money for Addenbrooke's Hospital building appeal [2.2]

1930 The railway came to Cambridge in 1845 and was carried onwards to Ely by a trestle bridge; this was replaced by a low girder bridge until April 1930 when crowds descended to witness its replacement by a much larger and stronger bridge. The operation was a spectacular one, commencing at midnight engineers worked in the light of white acetylene flames to cut the steelwork in the centre of the old bridge and remove the track at either end. It was then raised on hydraulic jacks before being removed. Then the new bridge which had already been erected alongside was carefully moved into place, the lines reconnected and all was ready for trains to run again. 30 04 28 [2.1]

1930 The King and Queen will experience a sense of regret at the retirement of Inspector John Harrison of St Philip's Road, Cambridge. He has been Royal inspector since 1916 and was on the Royal train which took their majesties to Sandringham at the weekend. He remembers one occasion when he saw assembled on Wolferton station two kings, five queens, two princes and two princesses. Inspector G. Goddard, also of Cambridge, will succeed him. 30 10 09 & b

1930 Great anxiety is being felt by Cambridge's 2,000 railway employees over the Companies' drastic proposals on rates of pay and conditions of service. The tobacco and other luxury trades were affected at the time they accepted a reduction in wages to ease the companies' financial difficulties temporarily but this would have a serious impact on the spending power of a large number of relatively high-salaried men. Coming at a time when trade enterprise in Cambridge is approaching its zenith and the University is being appealed to for commercial support the prospects may be regarded with concern. 30 11 14

1930 The booking hall at Cambridge railway station was the scene on Christmas Eve of one of the most extraordinary happenings ever witnessed. As a taxicab was being driven back to the station rank its driver suffered a seizure; the vehicle careered through the booking hall entrance and crashed into the collapsible iron gates near the ticket collector's box. If the barrier had been wide open it would have gone right on to the track, and a train was just due. 30 12 27

1931 At Cambridge the railway companies have a financial interest and working agreement with the Ortona bus company. The time will come when co-ordination will be very close; already they have had two experiments when railway return tickets could be used on the buses and vice versa, the Ortona chairman told an inquiry. In both borough and county they worked routes which

were good and bad and excursions and long-distance tours helped to pay for unremunerative town services. 31 05 01c

1931 Great changes are planned at Cambridge station. The locomotive shed and yard is to be increased from 111 to 150 locomotives and an automatic coaling plant with a bunker capacity of 200 tons will be provided, equipped with the latest measuring devices so that enginemmen may take their own supplies. There will be a 70 feet turntable capable of taking the largest express locomotives in use together with three new water columns 31 08 28b [2.3]

1931 New type of railcar being tried on branch lines – pic – 31 10 02q

1932 automatic coaling plant installed [1,4]

1932 Cambridge stationmasters were told that protection from unfair and illegal road transport was essential. In the last year the number of passenger journeys have dropped by 16 million, goods trade decreased by 15 million tons and the livestock by a million head. Motor lorries were running away with the traffic they used to carry. A man can buy an old bus chassis, stick a lorry body on it and pick up traffic here and there, charging different prices as it suits him. 32 02 01

1933 railway v motor traffic – 33 01 30f & g

1933 Railways are a never-failing source of interest to young and old. Cambridge Rotarians were told that trains between Cambridge and London occasionally attain 72 mph and tunnels on the Newmarket line were constructed so that trains should not frighten racehorses in training. In the fens one could stand 100 feet away from the railway track and be shaken like a jelly when a train passed. The outer rail settled half-an-inch owing to the ‘draw’ when the dykes dried and telegraph poles and even buildings leaned outwards. But the permanent way was practically immune from flooding. 33 10 04

1933 Sir - The London and North-Eastern Railway are to withdraw wireless from their London-Leeds trains blaming the ‘prohibitive’ charges announced by the Performing Rights Society for the use of its copyright music. But the fee is only three shillings a week per train and when challenged they now say the service was uneconomic and had never covered its cost. The payment of a fee to the composer is as much a cost of production as the ten shilling licence to the BBC or the installation of earphones – C.F. James, Performing Rights Society. 33 11 10

1934 The LNER will shortly be releasing a new crop of posters calling attention to holiday resorts and other places of interest on their lines. Cambridge is to be represented by a picture of St John’s college gate which shows the artist, Fred Taylor, at his best. The poster advertising York shows Dick Turpin on his famous ‘Black Bess’ with the Minster in the distance. 34 04 14

1935 first rubber-tyred petrol rail motor [1.3]

1935 The first passenger service to be run by a petrol rail motor will be operated as an experiment between Cambridge and Oxford. The vehicle is a 56-seater, painted red and silver with a glass-covered conning tower from which the driver obtains a clear view of the line. There are two sets of eight pneumatic-tyred wheels, the car being kept on the rails by the usual metal flange. It runs equally well backwards or forwards, cruising about 55 mph with none of the roar of an ordinary train. Inside it is a cross between an underground carriage and a single-decker motor bus. On a test run the rail motor was the object of great interest. Similar vehicles have been popular in France for some time. 35 02 20 & a

1935 Long Road railway bridge photo – 35 12 11d

1936 Long Road new railway bridge – photo – 36 03 03

1936 Improvements have been made at Cambridge station yard to provide better parking accommodation and cope with the heavy vehicular traffic. Three car parks have been allotted

with an in-way and out-way for 'through' traffic. The Eastern Counties Omnibus Company's services are located at the south side of the passenger station and will 'set down' and 'pick up' at the same place. The taxi-cab accommodation has also been divided into three parks with an in-way and out-way between them. It is hoped that with the co-operation of the owners of road motor-vehicles this will facilitate safe movement into and out of the station premises 36 07 02 (photo)

1936 The L.N.E.R. has made provision for a heat wave by giving orders that new trolleys which serve light refreshments to the passing travellers from station platforms should be equipped with refrigerating apparatus to ensure minerals and other soft drinks are kept cool. They also serve tea, coffee, cakes, cigarettes and the dainty modern successor to the railway sandwich of grandfather's day. Two of the new barrows will be placed at Cambridge and Ely stations 36 08 01a

1936 Rail times for the journey from Cambridge to Oxford have increased since 1886 when the quickest journey took three hours. But although a noisy minority quick through journeys there were insufficient of them to make such a service pay. The railway company had experimented by running an express petrol rail car but it was a complete failure from a commercial point of view: the patronage was so small they had to give up within a few weeks. Additional stations had been opened on the line since the war, necessitating more stops. 36 08 29

1936 Six people were injured following a collision near Milton Road level crossing. A passenger train struck a light engine which was stationary on the reception goods line and its driver and fireman had a fortunate escape from being buried under tons of coal from the tender. The crossing-keeper said the passenger train was on the wrong line. Its front was badly smashed and a coupling broke but it did not leave the track. The passengers received a severe jolting. 36 10 05

1937 electrification proposed [1.13]

1937 Motor vehicles are to be substituted for the horses engaged in railway cartage traffic in Cambridge. They will displace 18 horses after which the railway would have no horses in use 37 03 06a

1937 Travellers between London and Cambridge will soon have three additional fast trains performing the journey non-stop in 65 minutes. All will have buffet cars, bringing the total to 10 each way daily, in addition to the restaurant trains already running to Liverpool Street. The first service of five buffet cars was inaugurated between Cambridge and Kings Cross in 1932 when the trains each consisted of three coaches. So popular has the service become that at least double this accommodation has to be provided regularly 37 08 14b

1937 Milton Road railway bridge over level crossing proposed – 37 11 04

1938 The L.N.E.R. have just issued a new lantern lecture on Cambridge that may be borrowed free of charge by societies through the country. The 70 slides, which depict the colleges and other places of interest, should be of real value, because they will awaken interest in our town and University and may be the means of bringing us many visitors in days to come. Suitable reading matter has been prepared by Mr P.C. Fitzgerald beginning at the Round Church and describing a walk around the centre. This is one of 276 sets of lantern slides available from the Railway Company at King's Cross Station. 38 01 01

1938 The LNER is going to make a big effort to ensure that the interior of their trains is kept up to drawing room standard. A staff of travelling train attendants and cleaners is to be appointed who will accompany the train throughout the whole journey. They will ensure an adequate supply of clean towels and soap in the lavatories, remove litter from corridors, dust window ledges and empty ashtrays in compartments not occupied by passengers. When trains stop at stations they will polish up the outside door handles. Where conditions are suitable women will be appointed for this work as it is felt that the feminine touch will yield the most satisfactory results. 38 01 15a

- 1938 New diesel train tried on Cambridge-Oxford service – 38 05 06
- 1938 One of original ‘Flying Scotsmen’ locomotives runs through Cambridge – 38 08 24a
- 1938 An experimental stream-lined Deisel-driven light passenger unit, something new in rail transport, made its first trip on the Oxford and Cambridge route. The unit consists of three cars permanently coupled together with a driver’s cab at each end of the train. Acceleration was much more rapid than a steam train and instead of the familiar ‘chugging’ there was a pleasant whirr. Soon it was travelling at 75 mph with unusual smoothness. It has loud-speaking communication between driver and guard and the seats are reversible, so passengers can face whichever way they please. 38 09 13a & b
- 1938 At long last a start is to be made on the construction of a railway bridge on Milton Road in place of the present level crossing. Ministry of Transport approve has finally come through and work is expected to take 18 months. The crossing is frequently closed to road traffic and the adjacent subway, which has not sufficient head-room for larger vehicles, is narrow with steep gradients. Now there will be a bridge 44ft wide with a 30 ft carriageway and two footpaths. In 1935 2,000 motor vehicles and 1,000 pedal cycles used the road each day 38 10 08 [2.4]
- 1939 Three women were killed & other passengers injured when an express train from Hunstanton to London, via Cambridge collided with a lorry on an occupational crossing near Hilgay. The dead were all in the second carriage of the train, which toppled over on to a stationary goods train. The driver was D. Barber, of Hills Avenue and the fireman R. Miller, of Brookfields, Mill Road, Cambridge. 39 06 02 CIPof
- 1940 Driver Saves Train.—The driver of a passenger averted a serious accident near the Long Road Bridge when some goods wagons became derailed across the passenger train’s path. Rapidly applying his brakes, he brought the train to a standstill just as it touched one of the wagons. Its four leading wheels were derailed, but neither passengers nor train crew were hurt. The goods train, which was on a loop line adjacent to the main line was derailed by safety points designed to prevent any train from the loop line entering the main line when the line has been signalled as clear and some dozen trucks came off the rails. The front of the passenger train ploughed ten or 12ft. into one of the waggons before coming to rest. The goods engine fell on its side, and the driver and fireman scrambled clear 40 05 17 CIPof

1947 the Garner family's 271 years service on the railway [1,11]

1947 The mustard gas bomb train fire at Six Mile Bottom last July had a sequel on Thursday when two L.N.E.R. drivers, Frederick Smart and William Thorburn, and two firemen, Joseph Westland and Alfred Chandler, all of Cambridge, were presented with the L.N.E.R. Medal. A special goods train included 40 open wagons of mustard gas bombs. When passing Six-Mile-Bottom driver Smart observed a fire in the third wagon. Fireman Chandler jumped down immediately and uncoupled the burning wagon from the rear part of the train. The engine then proceeded forward for 50 yards. The engineers tried to subdue the fire with buckets of water, fully aware of the dangerous nature of the contents of the wagon. 47 12 20

1950 Two Cambridge railwaymen, driver John Collingwood and guard Alfred Palmer have been awarded the "Daily Herald" Order of Industrial Heroism. The rescue which won them the "Workers VC" was made just a year ago at the Air Ministry's private siding at Lord's Bridge. Coming round a blind corner a goods train collided with a RAF motor lorry loaded with bombs. The driver was knocked unconscious and trapped in his cab; the petrol tank was smashed and petrol splashed onto the bonnet which was smoking fiercely. Several bombs fell off the lorry and rolled towards a pool of petrol. Despite the danger the railwaymen ran to the lorry, released the driver, lifted him out of the cab and carried him to safety c50 05 10

1951 To most the mention of a railway waiting room conjures up a vision of a dismal, dingy place. But that at Cambridge station is a very different state of affairs – in fact such a bright and cheerful room that I felt it would be quite a pleasure to lose one's train and have to sit there and wait for another! The colour scheme is a bright green and cream and the old-fashioned leather bench type seats have been replaced by small brown leather armchairs. In the ladies' waiting-room one beholds the astonishing sight of fresh flowers c51 05 22

1951 Two railwaymen whose prompt action averted serious damage being caused to a goods train were commended for their action. Driver C.V. Bloy and Fireman L.R. Gardiner of Cambridge each received a cheque for two guineas. The incident took place at Elsenham when Driver Bloy noticed that one of the wagons of his train was on fire. He immediately stopped and isolated it from the rest of the train. They stopped another train and asked the driver to use his slacker pipe to damp the fire on the wagon. In view of their action more serious damage was averted, bearing in mind that a number of petrol wagons were included in the train c51 06 27

1952 The Royal Train bearing the King's body from Wolferton to King's Cross had two local men as its crew. The driver was Mr S. Harding who first drove the Royal train when the King came down to Trinity, and the fireman Mr C. Pearman from Weston Colville. Also on the train, as fitter, was Mr W.H. Simmons of Kelvin Close, Cambridge. Another local link is that the stationmaster at Wolferton, Mr Bernard Hodge, was formerly in charge of Whittlesford Station. At Cambridge South signal box The Welbeck Abbey, a Sandringham class engine, spick and span in polished olive green, was one of three trains standing by on the route in case of breakdown on the journey 52 02 06, 52 02 09, 52 02 13

1953 locomotive crashes into buffer stops Coldham's bridge [1.20]

1954 A large new railway depot is to be established at Chesterton sidings. One area equipped with two Goliath cranes will store new and second-hand rails and emergency stock; another will refettle serviceable switches and crossing units while a third will be equipped for the mechanised pre-assembly, loading and despatch of complete lengths of plain line for permanent way renewals. There will also be dismantling and sleeper areas together with a chair and smalls area and a flash butt welding plant. New access roads will be built together with a canteen. c54 02 10

1955 diesel train on test [1,22]

1955 British Railway's new weedkiller train can cover up to 100 miles of track a day and recently made the Ely-March run handing out lethal doses of weed-killing concentrate at up to 20 mph. It is operated by two Cambridge men, Bob Lee and Jack Aldhouse. Working away from home has its disadvantages but their living accommodation is as luxurious as any caravan with interior-sprung mattresses, dining room, galley and chemical lavatory. Jack attends to the living accommodation and Arthur keeps an eye on the machinery. 55 05 13 b & c

1955 Cambridge station improvements - cartoon – 55 09 10aa

1955 For the passengers on the Cambridge to Kettering train it was a normal journey; but for the guard, Archie Sear of Cambridge it brought an end to a career lasting 50 years on the railway, 23 of them on the Kettering line. He became a familiar figure to regular travellers and gained the title of 'The Varsity Guard'. He has had a remarkably smooth career and has never been asked to look after anything more unusual than dogs, kittens and schoolchildren. The train has remained accident-free and he has never had anything unusual to report – which in itself is extraordinary. 55 10 13

1956 A revolutionary new kind of rail transport has been the centre of attraction at Cambridge Railway Station. The huge shining dark green diesel-engined unit is unlike the traditional train. It has higher speed, greater comfort and a complete absence of smoke. The drivers cab looks more like a scientist's workshop than the dirty, greasy footplate and the carriages resemble long-distance buses with electric devices which circulate hot air during cold weather and cooling breezes in the summer. 56 02 07a & b & c

1956 Last year Cambridge station sent over 900,000 people safely on their way, another 1,000 a day were transferred from one train to another without passing through the ticket barriers. During rush periods they can send 'The Fenman' on its way only two minutes after arriving although hundreds of passengers get on and off and scores of parcels taken from brake vans. In the telegraph office where the most up-to-date teleprinters and signalling equipment are installed, 1,300 telegrams and 1,200 phone messages a day are dealt with. 56 09 01-a-b

1957 British Railways modernisation plans involve conversion from steam to diesel traction. A diesel instruction train has come to Cambridge where it will be open for inspection by drivers, firemen and fitters. It consists of two coaches including a complete set of driver's controls and a room with cinema projectors where lectures are given by the Resident Instructor. When it was at March 523 people visited with a record attendance at one of the lectures. 57 11 01

1957 Great Eastern House, the new British Railways office in Tenison Road, is a functional modern building with the high standard of architectural design necessitated in a University city. Shaped like a vast cube, its tiers of windows catch the light row upon row. Inside is the railwayman's dream. Gone are the rickety stairs, the walls in green or chocolate and cramped offices with old-fashioned coal fires. Instead there is light, ivory-coloured walls and glass partitions, a lecture room, bar and two billiard tables 57 12 19a, b, c [2.9]

1958 diesel rail bus on Bartlow line [2,10,2,11]

1958 German-build lightweight diesel engines will shortly go into service on Eastern Region branch lines. Based at Cambridge they will be used initially on the Witham-Maldon, Witham-Braintree and Audley-End- Bartlow services. Each rail-bus provides seating for 56 passengers and standing room for a further 40. Powered by a 150 h.p. engine, it has a six-speed gearbox and can attain a speed of 55 mph. 58 07 03

1958 the era of smoky trains has gone and the “dieselisation” of Cambridge railway services comes into operation today. Passengers will travel in fast, clean and comfortable two-car lightweight diesel trains with accommodation for 103 second-class and 12 first-class passengers. The return fare to Peterborough has been halved and journey time reduced. For too long railways have suffered from old equipment and services planned for the steam age; it is not ‘jam tomorrow’, it is jam today, a rail official promised. 58 10 25 & a

1958 diesel trains inaugural run Cambridge to Peterborough – 58 11 04 & a [1]

1958 Traffic over Hills Road railway bridge, a bottleneck on the principal road into Cambridge, is extremely heavy. Visibility over the summit is severely restricted and many accidents have occurred there. The existing steel plate girder bridge has deteriorated with age and now work will start to provide a new twin two-lane carriageways and footpaths. The new bridge will be designed to allow for widening should additional railway tracks be needed in the future 58 12 19b

1959 Great Eastern Railway now offers a service which is second to none. Speedy and comfortable trains leave at regular minutes past the hour and take the same time to reach their destination. Fast services have opened up East Anglia to the man who was forced to journey by road – and it is no better than the rest of the country in its trunk road network. Now those who previously used cars must now ask themselves whether it is really worthwhile driving 59 01 06

1959 The progressive dieselisation of the branch line services has seen the construction of a maintenance depot near Coldham’s Lane bridge. It affords facilities for carrying out examinations for multiple unit trains, rail-buses and diesel-mechanical and diesel-electric shunters. It is open 24 hours a day, seven days a week and has a staff of 100 men. 59 03 31d & e

1959 British Railways announce that passenger train services between St Ives and Kettering and the freight train services from Buckden and Grafham stations will be withdrawn on June 15th. In addition trains running between Cambridge and St Ives on weekdays which at present serve Kettering will also be withdrawn. Arrangements will be made to augment the service to St Ives by the 10.17 am Cambridge to Peterborough train calling at Histon, Oakington, Longstanton and Swavesey stations and an additional train leaving for St Ives at 5.15pm calling at all stations 59 05 27a

1959 Retirement railway stationmaster Reuben Taylor – 59 11 04c

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 It took twenty men twenty hours at the week-end to demolish Cambridge’s old Hills Road bridge – twice as long as the contractors had anticipated. Originally it was thought that the removal of 140 tons of steel girders would take a little over eight hours, but the trains passing underneath proved a little more troublesome than expected. The men took advantage of the frequent breaks to wipe the sweat from their brows and light a cigarette. The scene resembled firework night for, as the oxyacetylene guns cut through the girders, a spray of red hot sparks would fall on the ground giving an impression of a ‘golden rain’ 60 06 21

1960 Barnwell station sends 30,000 tons of merchandise & minerals a year, including malt from Barnwell maltings & receives 27,000 tons annually; passenger fare to Cambridge station 6d, arriving 8.20 & no return till tea-time – a quiet country station [8]. Barnwell Junction seems the perfect model of a small Victorian railway station with its lacy wooden canopy and the initials of the Great Eastern Railway intertwined among the cast iron legs of its platform seats. It has two

passenger trans a day but handles 30,000 tons of merchandise and minerals a year including sugar beet, grain and potatoes, malt from Barnwell Maltings and scrap iron from the railway's own engineering depot. Its one porter, Mr Bidwell keeps the platform swept and is also gardener, handyman and weekly replenisher of the oil lamps in the semaphore signals. 60 09 03b

1960 The change from steam to diesel at the Cambridge railway depot has transformed train drivers' lives. The rattling, hissing, gritty foot-plate - where in cold weather they were frozen on one side and baked on the other - has been exchanged for the enclosed windowed cabin of the new engines with its upholstered driver's seat and armrests, its foot warmers, compact controls and ashtray. Driver William Creek who worked with steam for 40 years says it used to be rough - his insides were shaken up by the rattling. There was a wooden seat but it was more comfortable standing up. Fellow drivers William Thulborn and Sidney Hutton agree. - 60 05 13b

1960 The Cambridge to Colchester railway line becomes a single track beyond Shelford and winds down the river Stour into Suffolk through a series of little country stations which make it one of the prettiest railway journeys in East Anglia. The canopied platforms of Linton, Haverhill, Sturmer, Stoke, Clare and Cavendish fit picturesquely into the landscape. A four-horned Jacob ram journeyed in the luggage van on its way to Wales to be crossed with a mountain sheep. Labelled, it travelled alone as a parcel. It was joined at Stoke by a bicycle and by a baby in her pram accompanied by her parents. But the guard said it was not big enough to carry all the parcels. 60 09 01b

1960 'The Cambridge Late Arrivals' group was set up to co-ordinate the indignation rail travellers felt during the upheaval of electrification. Now the trains are much more comfortable and carriages have the air of a club-room. Men - some 200 of them - willingly pay £9 15s (£9.75) for a monthly season ticket and the privileged of leading a quieter family life in the province. It is still cheaper to make the daily journey and avoid the great expense of finding a house or flat in London. 60 12 09a

1961 Rail passengers had a narrow escape when a car was driven straight through Cambridge station booking hall and came to rest with its front wheels on the platform. Ticket collector Mr W. Franklin was standing in his booth by the barrier at the time and was taken to hospital suffering from shock. An undergraduate who had driven to meet a friend from the train failed to swing round in front of the booking hall and burst through the right-hand door smashing the indicator board and barrier gate before coming to a standstill. It is 12 years since a similar accident involving a taxi driver occurred at the station. 61 02 04 photo 61 02 06a

1961 Gerald Tweedie of Cherry Hinton Road has assured himself a place in the railway history of this country. He can now call himself Britain's Number One Train Spotter as he has seen, listed and made notes on every one of the 60,000 or so steam railway engines operated during the last 30 years - the first man ever to have completed such a mammoth task. Now the CDN has arranged for him to have a ride on the footplate of an A4 streamlined Pacific engine 61 03 14

1961 Gerald Tweedie, trainspotter has ride on footplate - 61 04 10

1961 A motorist who drove his car through the booking hall of Cambridge Railway Station and crashed into its exit gateway pleaded not guilty to careless driving and driving a vehicle with inefficient brakes. William Franklin said he was collecting tickets at the station barrier when he turned round and saw the car in the hall, one man buying a ticket was knocked down. The driver said he was going to meet a train but his brakes failed as he approached the station and he was placed in a terrible dilemma. He changed down to second gear but as there were people by the side of the entrance hall he decided to drive straight through. As it was a mechanical failure he was given an absolute discharge. 61 04 21b

The railway line between Cambridge and Mildenhall opened on Whit Monday 1884 with the Fordham to Mildenhall extension nine months later. The branch line was probably never self-supporting and today there are two trains daily. All the villages between Barnwell and Fordham

are well served by buses and it is only Mildenhall and Isleham that do not have a satisfactory alternative service. All existing parcel facilities would remain except at Isleham and Quy stations which would be reduced to unstaffed sidings. Even at Quy staff would be provided during the heavy sugar beet season to assist farmers loading traffic, an Inquiry heard. 61 12 20a & b

1962 Two local men were on the footplate of a B.1 class locomotive when it steamed out of Cambridge Railway Station to close an 80 years' period of railway history. Driver Bertram George and fireman Ivor Wilson were in charge of the 100-ton engine as it left the goods sidings with one carriage and a truck. It was the last train to leave Cambridge hauled by a steam engine. During the weekend a dozen other steam locomotives were driven or pulled to engine sheds in London as railwaymen finally severed their connections with the 'steamers'. Now all trains are being hauled by the new high-speed diesel locomotives 62 06 18 [2.13]

1962 Police are searching for a silver-grey American car which smashed down the level crossing gates in Milton Road. Crossing keeper, Edward Dyson, had just closed the gates ready for the train when a large American car coming from the Milton direction rammed them. It reversed and headed back the way it had come. Members of the Cambridge City Reserves football team returning from their evening match at King's Lynn left their coach and helped drag parts of the broken gates from the rails. Mr Dyson telephoned Chesterton Junction and had a goods train diverted through Ely. 62 04 01a

1962 Cambridge railway station will become the "Gateway to East Anglia" when a new high speed passenger service to Oxford is introduced. At present there is only one through train a day between the two University cities but now a further seven will speed the service, some taking only two hours for the journey. From Cambridge there is easy access to Norwich and resorts such as Hunstanton, Lowestoft and Yarmouth. 62 06 08b

1962 Two railway lines in Cambridgeshire are under threat following Dr Beeching's proposals. All lines transporting less than 10,000 people and 10,000 tons of freight a week may close. This includes the line from Cambridge through Histon and Oakington and the one to Mildenhall through Burwell. Fruit growers would be seriously affected and have to switch to road transport, putting up prices. Rural bus services are another failure of Government policy and had been cut because they were unprofitable, a Labour meeting was told 62 12 07c

1963 The Beeching report on the future of British Railways suggests the closing down of 19 stations in the Cambridge area – including three serving the main towns of Haverhill, Saffron Walden and St Ives. There would be the complete withdrawal of passenger services from branch lines, Cambridge-March, Gt Shelford-Marks Tey, Audley End & Bartlow lines. Amongst the village stations closed to passenger traffic would be Histon, Wimblington and Chatteris, Bartlow, Pampisford and Linton together with Soham and Fordham. Services from Black Bank would also cease 63 03 27 & a [2.14,4,14]

1963 Flying Scotsman arrives at Cambridge station en route to London where it will pull an enthusiasts' train 63 04 10

1963 Parcels which arrived at Cambridge railway station in a tremendous rush just before Easter have caused a bigger backlog on deliveries than they did at Christmas. The parcels, mainly for local shops changing and increasing their stock for the beginning of the University term, are lining the platforms in barrow loads. "We just can't cope with them. We hope people expecting parcels will come to the station and collect them themselves if they're in a hurry. It will be the end of next week before we clear them", a railway spokesman said. 63 04 13

1963 Railway workers ran along the main lines just outside Cambridge Railway Station to warn the driver of an oncoming passenger train when a 100-ton diesel locomotive was derailed and fell across the tracks near the end of the platforms. Two platforms were put out of action because of blocked lines and the points mechanism was damaged. Repair gangs using a heavy mobile steam crane worked through the night to get the engine back on the track but the incident

caused heavy delays to passenger traffic. Two other derailments occurred within 48 hours 63 07 31b, 63 08 01

1963 British Railways announced plans to close the Oxford to Cambridge line through Bletchley and Bedford, despite proposals in the Beeching Report for modified passenger services. A financial appraisal shows the line is losing money. MP Francis Pym says he has been approached by constituents in Gamlingay and Longstowe and will take every step to make local views known to the Minister of Transport. There will be a detailed examination and consultations before closure takes effect. 63 12 06

1964 16 village stations are axed [3.2]

1964 last train from Mildenhall to Cambridge [3.3]

1964 The Oxford to Cambridge railway line links the two important university cities and should remain open, a Reinvigoration Society says. It bisects the line from King's Cross to Peterborough at Sandy where the two sets of platforms are adjacent. But no attempt has been made to encourage interchange of passengers. Through trains could be run from Norwich to Bristol in five hours using inter-city diesel units with miniature buffet facilities. But the route is divided between three of British Railway's regions and an overlord – line manager should be appointed to co-ordinate services 64 01 11b

1964 Cambridge to Oxford railway line too important to be lost – feature – 64 02 17b

1964 With a shuddering roar, a diesel locomotive disturbed the sleepy silence of Mildenhall railway station and with four empty wagons trundled away on the last trip to Cambridge. The station's freight line, which opened in 1885, had fallen under the Beeching axe. The stationmaster, Mr N.S. Sykes, stood on the platform among weeds and wild flowers and waved as the train pulled out. Passenger services were withdrawn in 1961 and freight limited to coal, cattle seed and worn tyres which were sent to Harwich for export. 64 07 11

- 1971 Railway station new travel centre and entrance hall opened – 71 08 24
- 1972 The last five plots of the old Cambridge to Bedford railway were sold yesterday for a total of £137,250. The line was once the link between Cambridge and Bedford but those days went when Beeching axed the route. Since then British Rail have taken up the rails, and sold the land on which they stood to neighbouring farmers. Yesterday four of the stations and their accompanying yards came under the auctioneers hammer. The last plot was the Old North Road station at Longstowe. The buyer who paid £23,000 for it said he had no idea what would be done with the 1.25 acres site and the station house, booking office, waiting rooms and goods shed c72 12 18
- 1973 Hovertrain project scrapped [1.13]
- 1973 pay-train network launched [4.6]
- 1973 The possible reopening of the St Ives - Cambridge passenger rail service is a very real priority, said Mr Robert Gemell, the Chief Passenger Manager of British Rail. He gave an assurance that he was doing all he could to get the line reopened. But the future was really in the hands of local councils and the people living in the area to make their demands for this service heard in the right places, he said. The final decision was with the Government on the advice of British Rail. The recent estimated cost of re-opening the service was £100,000 but British Rail were trying to see if this could be reduced c73 07 13
- 1975 British Rail decided to blow up a redundant pumping station by the railway line near Teversham. But the building was more solid than expected: seven pounds of explosive was not enough. The pumping station, which stood over a 75 foot well, used to supply all the water for the steam engines in the Cambridge area. The site will now be bulldozed and earthed over c75 08 07
- 1976 A plan for building a £13,000 halt at Cherry Hinton on the main Cambridge-Ipswich railway line was rejected by the county highways committee. Cambridge city council had asked for the halt, saying it would be useful for commuters and people working in the expanding office development in Station Road. Councillor Charles Swift (Peterborough) who is a train driver said that halts usually consisted of just a few old railway sleepers by the side of the track and not the station and buildings proposed for Cherry Hinton c76 04 04
- 1978 Cambridge to Kings Cross through train axed, change to electric at Royston [4.7]
- 1979 The railway line between Swavesey and Cambridge will be used for a passenger service on March 31st for the first time since its closure in 1971. Trains will call at Longstanton, Oakington and Histon – at least for one day. A special train is being organised by the Railway Development Society in conjunction with British Rail. It will leave Swavesey at 1pm and arrive

at Cambridge an hour later, returning at 5.30 pm. The fare for adults will be about £1, children 75p and cycles free. c79 01 29

1979 around Cambridge railway trains smash through level crossing gates every 15 months on average. But unless forced to by death or injury British Rail never make known the facts. A News inquiry reveals that remote-controlled TV cameras may soon be used to take some of the danger out of busy level crossings like Granhams Road, Gt Shelford. It will be part of a programme of track improvements and re-signalling to be completed by 1983 and at the same time all level crossings will go over to automatic barrier operation. This is essential to any future electrification.79 08 02

1980 More details have been released of the amazing project to run a mono-rail between Girton College and Cambridge. The Swiss system employs a steel rail carried on concrete pillars about 20 feet above the ground. Electrically-powered trains carrying 100 people in two 50-seater cars would run five journeys each way at rush hour at a speed of 30 mph. It would do the journey in five minutes. The train would not be obtrusive and would make less noise than a motorcar. The scheme would cost about £500,000 and need a private Act of Parliament. 80 03 13

1980 Cambridge's railway electrification came a step nearer when contractors handed over the shell of the new power signal box near Hills Road bridge. It will take another 18 months to install the mass of circuitry which will enable a couple of men to control every train, point and signal for miles around. The plan includes floodlit carriage sidings with automatic washing plant for carriages. It is expected to come into operation in May 1982

80 09 02a

1980 The new High Speed Train accelerates quickly by railway standards (but not by those of a Mini). And it just keeps on accelerating. At around the 120 mph mark it felt fast. The railway men have padded armchairs but the ride at the guard's end is so bad that BR are contemplating putting the space over to parcels and putting the guards elsewhere. The drivers are dismissive of their skill: powerful engines, powerful brakes, an air-conditioned cab and unrestricted vision make it a bit of a doddle, they say, compared to driving a clapped-out diesel. 80 10 03c

1980 The Railway Development Society have hired British Rail's experimental railbus, a mustard-yellow Leyland Experimental Vehicle which looks like two buses bolted back to back for trips from Cambridge to Bury St Edmunds. It is an important step in the development of a new generation of cheap, light-weight railcars which could replace the present diesel multiple units. 80 10 10a

1980 Cambridge railway commuters said goodbye to their two most popular stewards with presents and champagne. British Rail is replacing the three buffet cars and replacing them with micro-buffets and stewards Colin Taylor and Robbie Davidson are resigning. Simon Spanswick of Newport, who fought to save the service, decorated the 20-year-old buffet car with black crepe and Ron Knowles of Horseheath produced a wreath in loving memory. The regulars gathered round the counter and got through quite a lot of drink. 80 12 06

1981 first High speed train - on excursion to Edinburgh [3.9]

1981 Services on the Cambridge to St Ives railway line stopped in October 1970 and researchers want to assess the effects of the closure. But they had difficulty tracking down former users, because of the mobility of the Ouse valley towns. The line closed because the populations they served were small and used trains infrequently; in winter they carried only 10 to 20 passengers, most for non-food shopping or visiting families. Most switched to buses which took between 35-79 minutes for the journey, compared to 27 minutes by train. 81 03 13

1981 Cambridge ecologists say a bus which can run on railway lines is the solution to transport problems in local villages. They plan to borrow a prototype and run it from the city centre to Huntingdon, using British Rail's tracks. It would stop at Mill Road, Chesterton and North Arbury

was well as the former stations en route to Swavesey. From this point the tracks have been removed but it would run along the trackbed to St Ives and the Hemingfords.

81 05 15a

1981 A revolutionary rail bus which would solve problems for villagers between Huntingdon and Cambridge is being promoted by the St Ives Ecology Party. It has flanged rail wheels which are lowered hydraulically when it leaves the road and would operate on the Cambridge to St Ives line as far as Swavesey and then by road to Huntingdon. The main stumbling block could be quarrels over who should operate the service: British Rail or a bus company will probably argue like mad over it and so it may not see the light of day.

81 08 17

1982 new power signal box controlling every point etc opens, part of £13.2 M project re-equip Cambridge station, has replaced signal gantries [3,8]

1983 Mill Rd bridge rebuilt to allow room for electrification cables [446.14.4] sprinter multiple unit to be phased-in between Cambridge & Peterborough [5.3]

1983 £650,000 facelift station, frontage bricks cleaned & restored; new telephone inquiry bureau etc [5.41]

1984 British Rail has bowed to public opinion and re-introduced famous name, The Fenman, for its 8.43 am train from Cambridge to London. The name was introduced by the LNER in the 1930s for its premier train on the London – Cambridge – King's Lynn line. It lost its headboards over 20 years ago when electrification came and BR feared drivers might be injured taking them on and off. But everyone went on calling it The Fenman. 84 10 01

1986 British Rail's new Sprinter multiple unit has uprated suspension, tinted windows and new livery. With their improved sound proofing, modern décor, heating systems and facilities for the disabled they are being introduced to replace existing units which are over 25 years old. The new service should encourage more people to use trains and ease pressure on the county's overloaded roads between Peterborough and Cambridge 86 02 06

1986 British Rail is considering reopening part of the disused Cambridge-Huntingdon railway to provide extra transport for the suggested new village in the Swavesey area. They would use the existing platforms at Swavesey, Longstanton and Oakington but would have to build a new one at Histon. Most of the line closed to passenger traffic some years ago but some is used for occasional freight trains to the Chivers factory and fruit orchard complexes 86 06 23

1986 The old St Ives railway may be dug up and part of the route turned into a new main road to provide direct access for people living in the proposed new village for 3,000 people near Swavesey. British Rail is unenthusiastic about reopening the line without county or private investment. But the County Council has already turned down the suggestion of financial involvement and says it would make more sense for the railway to be dug up and replaced with a main road. 86 06 26a

1986 British Rail may build new stations near Cambridge and Huntingdon as part of a modernisation scheme. A county transportation spokesman called for stations at Milton and at new villages near Waterbeach and Swavesey which are under consideration in the Structure Plan review. He'd also like to see the St Ives to Cambridge line re-opened and a stop at Milton would help to service the Science Park as well. This was endorsed by the Railway Development Society who also suggested stations at North Arbury and Cherry Hinton. 86 08 27

1987 History was made in Cambridge as the first electric trains arrived and departed at the station, although passengers travelling on the new-style trains seemed unaware of their historic first-day journey. The electrification has cost £10 million with a further £20 million being spent

on resigning and improvements, and the main line from Cambridge to London was completed four months ahead of schedule. The operations manager said electrification was not yet fully implemented and electric engines would not be introduced until May 87 01 19 [NS3.3]

1987 A new style electric train took just 47 minutes to travel from London to Cambridge breaking the previous speed record of 55 minutes set by a steam loco in the late 1950s. The train brought a group of VIPs to the city for a ceremony to mark the opening of a £650,000 revamp to the railway station. There are new offices and lavatories together with a telephone inquiry bureau while outside the forecourt paving has been extended and trees planted. It is part of a bid to improve train services, which includes electrification of the line to Royston 87 03 23

1987 Commuters are suffering from a culture shock say British Rail chiefs who have set out to defend their newly-electrified service between Cambridge and London. Since trial runs began in January, complaints have poured in. The electric trains have disappointed many passengers who are used to a spacious inter-city style service. They say the new carriages are cramped with little luggage space, small seats and no tables. Yet BR is faced with a surge in passengers – especially during the rush hour – and can only cope in this way, even if it means making the quality of the ride slightly less comfortable - 87 03 06 Electric trains speed service – 87 02 24b

1987 The Cambridge - St Ives railway line could be reopened to passengers and linked with Stansted as part of a major new project. The service, shut for nearly 20 years, would feature electric trains along the 14-mile line which is at present only used for freight. There would be three new stations at the Science Park, Coldham's Lane and Long Road. 87 09 18a
Electrification to Royston 6th May; also sprinter service cross-country

1987 The scene of carnage on the railway line at Swavesey was too much for one fireman who came to help release the dying and injured from the mangled carriages. He was physically sick at the sight of bodies littered around the burned out shell of the passenger train, but like a true professional he recovered quickly and carried on. Fortunately it was not for real, but part of a major exercise involving all the emergency services. But no-one had told those involved until they actually arrived. They thought they were heading for a major disaster. 87 09 21

1987 An overhead cable car system between St Ives and Cambridge has been suggested by the Willingham-based Alternative Transport Society as an alternative option to a rail link. There would be a lack of noise and fumes and cables would be high enough over level crossings, eliminating congestion. It would have simple platforms for alighting with cars slowed automatically by computer control and the total all-weather system would ensure safe and reliable transport. But opponents describe it as a non-starter and just pie in the sky. 87 10 27b

1988 Monorail system proposed [CEN 18.10.1988]

1988 A new railway station designed to ease Cambridge's worsening transport problems could be sited near the A10 at Milton, says British Rail. No costs for the 'Cambridge Parkway' halt have yet been worked out but BR would almost certainly look for cash from the community to build the new station and car park. Last year the City and County Councils provided £125,000 help pay for new crossing gates at Cherry Hinton 88 01 07c

1988 Three new railway stations at Cherry Hinton, Fulbourn and the Chittering area have been suggested in a County council report. But stations at Harston, Offord and Soham have been rejected on grounds of cost. British Rail plans to build a new 'parkway' station to the north of Cambridge to meet growing commuter passenger growth. However calls to re-open the Cambridge to St Ives freight line to passengers are firmly ruled out. It would cost £4.84 million, greatly outweighing potential income, consultants say 88 02 17

1989 rail electrification to Kings Lynn announced by end 1991 cCEN 8.2.89

1989 British Rail is planning a second Cambridge railway station, provisionally known as Cambridge Parkway, close to Milton and the A45 northern bypass. It is unlikely to be ready in time for the start of electrification services to King's Lynn in October 1991, but could follow

shortly afterwards. However the site needs much better access and provision of parking space. It would serve the high-tech Science Park and provide a way for commuters to join trains without having to struggle through the city. 89 04 24

1989 Seasoned commuters on the Cambridge line will go to almost any lengths to avoid catching the 'cattle-truck' electric 321 multiple-unit trains to London. Even being crammed on to the older locomotive-hauled trains is preferable. "There are just two carriages where you can smoke on the 8am train from Cambridge; every day I have to stand, nothing ever happens when you complain", said one regular traveller. Many will either work late or go for a drink at the end of the day to catch the 6.35pm locomotive-hauled train. Life will be only marginally better when the new electric units come into full operation, seating will still be cramped, there will be no tables for people to work, no buffer, no phones and not enough first class seats, some claim. 89 01 20a

1989 Jim Paice, MP, has launched a bid to reopen the Cambridge to St Ives branch railway and extend it to link with the East Coast main line at Huntingdon. He says it could reduce traffic on the heavily-congested A604. Enthusiasts packed British Rail 'specials' up and down the 14-mile line which is normally used by just one freight train a day carrying mineral workings from Fen Drayton; it is also used occasionally by Chivers jam company. 89 10 04b

1990 A major new railway station could be built behind Cambridge Business Park. It would become the main station for Cambridge with the original one becoming just a stop-over point– 90 03 12

1990 Hundreds of people swamped the first passenger train between Swavesey and Cambridge for 20 years and at least 200 were left standing. The special service, chartered by the Railway Development Society was overwhelmed. There were 500 waiting at Swavesey, 100 at Longstanton, 200 at Oakington and another 100 at Histon. The train arrived at Cambridge station more than 20 minutes late. 90 03 24b 90 03 26a

Dant, Cutter ferry history and account of barge traffic – 62 08 03b & c

headlines

Sir – I remember Ditton Docks some 70 years ago. It was then a small landing stage, long disused and out of repair. There was also a more pretentious one further down the river – Horningsea Pier we used to call it. - and I was told that in pre-railway days this had been extensively used. My father would speak of the times, before the present locks were installed, when strings of barges were kept waiting sometimes for several weeks for the river to rise sufficiently for them to come up. They carried coal and corn to Mill Lane or timber and sand to Walnut Tree Lane (now Avenue). Dant of Dant's Ferry had a fleet of barges at that time – A. Cox 37 02 13

1890s Dants owned Cutter, first steam tug to work on Cam; in 1890s the barge business. then in decline was auctioned [W.16]

1897 Fred Richardson, foreman of the second gangs of lighters belonging to Messrs Brown and Goodman, met with a serious accident which ultimately proved fatal. It appears one of the lighters ran aground at Littleport on the same side as the horse. To get the boat off again block and tackle were fixed on the opposite bank, and the rope from the boat to the through the pulley

to the horse. The rope got entangled around his neck, quite crushing the windpipe, and the poor fellow was taken more dead than alive up to the Globe Inn, Littleport where an operation was resorted to. We regret to learn that Mr Richardson died at three o'clock. The unfortunate victim was conscious when his friends visited him yesterday c1897 03 19

1898 Otter and Otter Hound advert CDN 1898 09 14, p3

1899 Logan boat builder creditors, 1899 06 13p3 * & 14th p3

1900 Sir -. I have hired boats at nearly every place in Cambridge and always found the boat-people most obliging. The charge has been 1s each person for a whole day. Today I hired a boat for one hour and was charged 1s 6d. I asked why the extra cost. "Well sir, bicycling is off, and the river is more in demand. We have had a bad season, so are now making up for it". Vacation is a strange time for raising the prices. It would be as well to arrange the prices before starting on a trip, as that would save a lot of wrangling when a party returns. – "A lover of the river" c00 08 18

1901 After the rowing races at Ditton Corner & when the crush of small boats was at its height, a steam launch crowded with people endeavoured to force its way through the block of boats. Frantic endeavours were made to get out of its way but the launch crashed into a boat which contained two men, who were thrown into the river. Shouts from bystanders eventually brought the launch to a standstill but no effort was made to render any assistance. What would have been the results had the boat contained ladies. All launches should have a look-out man on the bow as it is impossible to see from the stern what is happening in front CDN 1901 06 10

1904

A serious accident occurred following the 'Mays'. After the half-past six race there is usually a scramble from the course to the boat-yards and collisions are frequent. But when a steamer and pleasure craft collide the consequences are unpleasant for the occupants of the smaller boats. Two of these were overturned and their eight occupants, including ladies, were precipitated into the water but happily all were rescued. One lady excited admiration for her cool behaviour in a perilous position and managed to climb into one of the small craft. 1904 06 10

1904 The Rev N.W. Shelton, vicar of Old Chesterton and his party, half-a-dozen in all, met with an unpleasant experience at the 'Mays'. The party, in an ordinary rowing boat, had left the scene of the action and arrive, after the usual difficulty, at the Pike and Eel ferry where their progress was barred for a time. During the period of waiting a big houseboat, towed by a horse, 'crashed' into the boat which it sunk and precipitated the occupants into the water. After a short period of excitement the party, which included several ladies, were landed safely on the houseboat, which proceeded on its course. It is an abominable shame that these large houseboats are allowed to travel on the river when it is crowded with smaller craft. It was going at from six to seven miles an hour and was in charge of a small boy on a horse. 1904 06 13

1905 A number of fishermen and fireman had an enjoyable outing on board the 'Majesty'. On arriving at Upware they sat down to one of Host Peachey's liberal dinners after which the fishermen went fishing and the remainder had a trip to Ely, returning for tea and games. The return journey was enlivened by songs accompanied by Mr Sid Smith on his banjo. They reached home by 10 pm. 05 08 29d

1906 Herbert Charles Banham starts boat building, Riverside [1.1,2.1]

1906 Mr H.C. Banham has launched a motor boat service on the Cam. Last season he ran trips to Clayhithe with steam launches but now 'The Enterprise' has been specially built to carry 50 people. The body is of oak with a snug cabin with glass superstructure where one can retire when

winds are too boisterous. It is powered by a twelve horse power engine giving speeds of 7½ mph without any of the 'blacks' given off by a steam launch and an entire absence of smell. It glides through the water so smoothly one can forget there is any motive power on board. 06 05 08c & d 1906 On Thursday Messrs Bullen, boatbuilders of Magdalene Street started their first trip of the season with their steam launch and tender His Majesty and Queen Alexandra It was a free outing and 84 people availed themselves of the voyage to Ditton Plough when an enjoyable time was spent. 06 06 22b

1906 River trips, motor launch 'Victory' to Clayhithe – Pocock – 06 09 15b

1906 Traffic on the Cam – motor boats, byelaw – 06 11 30b & c

1907 Last year there was hardly a punt available, and before that such a thing was not known in Cambridge. Yet this summer every boatyard possessed quite a flotilla of these comfortable craft, which were in great demand. Like golf, punting seems to have contributed in great measure to the humour of the nation and funny spectacles have not been entirely absent from our local ditch. Every dog has his day, and it is pretty evident the 'Canader' canoe has almost had his 07 10 19 [1.5]

1907 Otter and Otter hound advert – 07 08 24

1908 At the bottom of Mill Lane there was a kind of wharf with steps to allow people to get down to the river. Recently Mr Scudamore had fastened a sort of wooden punt as a mooring for pleasure boats, now nobody in a boat could get to the steps without trespassing on it. But no loading of boats had been carried on for nine years, the water was only a foot deep and there had been no complaints. Anybody in a punt could use it, Scudamore claimed. However as the river was a navigable highway, this was an obstruction magistrates decided and fined him five shillings CWN 08 06 12 p2

1909 A petrol-driven motor boat owned by Mr John Scudamore, boat-builder of Mill Lane, and occupied by a party of five undergraduates caught fire when at the back of King's College and was burnt down to the water's edge. They had experienced difficulties with the 3½ horse-power engine and Mr Scudamore went to their assistance. He was examining it when it burst into flame. The cause is a mystery: nobody was smoking, the engine-bearings were not overheated and there was no escape of petrol. CWN 09 08 13

1909 The Directors of the Ouse Navigation Ltd have been unable to raise the necessary funds and deposits have been returned to those who subscribed for shares. They had offered £5,000 for the toll-rights and property belonging to the Navigation, which was declined. They expressed surprise at the indifference shown by people in Cambridgeshire. But few people knew about it. Looking through the Files of the C.D.N. and Cambridgeshire Weekly News we are unable to trace any reference to the enterprise. If the Directors did not take the trouble to explain their proposals to the public they can hardly blame the public for not being interested in them. CWN 09 08 13

1909 New bye-laws relating to the illumination of chain ferry boats and barges after dark were adopted. CWN 09 12 24

1910 Bargemen objected to proposed bylaws regarding lighting on barges saying they can travel more safely without them. Mr Charles Dyson of North Street Burwell said "My barges are required to carry oil, sedge, turf etc and the use of lights might prove dangerous. I have travelled on the river for 40 years and never seen any accident caused by not using lights". E.H. Godby of Littleport says he does a lot of hay and chaff work and cannot afford to have his cargo burnt while Colchester and Ball of Burwell says their boats do not travel at night and see no reason why they should show a light when stationery. Ferry boat owners also say it would be a serious expense to have to keep lights burning all night. 10 04 08 b & c

1910 George Fawcett Winter, the well-known boatbuilder, became the proprietor of the boatyard near Victoria Bridge in 1876, succeeding the late Edward Searle. Ten years later he was connected with the boat-building industry at Eton: he used to spend the summer there and the winter at Cambridge. In 1900 he decided to relinquish his Cambridge business which came into the hands of Mr F. Pocock who is now carrying it on. He was well-known amongst University and Town rowing men and took an interest in the affairs of Old Chesterton. 10 08 19h

1911 Viscountess Bury" started [2.12]

1911 A serious rival to sailing on the river Cam has now to be reckoned with. This is 'botoring' which to the uninitiated stands for motor boating. There are today about 80 of this type of craft of various sizes and power. Now owners have formed the Cambridge Motor Boat Club to work with other river users to make the waterways even more safe and pleasant. Already membership has reached 35 which is proof of the popularity of the sport 11 06 02a

1912 Dolby's build punt [1.3]

1913 boathouses guarded due to fear of Suffragette attack [1.8]

1913 Ebenezer Driver, an Isleham gravel and shingle merchant told the court he owned 16 lighters and a steam tug. He'd delivered eleven lighter loads of sand and gravel to Southery for the Methwold & Feltwell Drainage Board to use as concrete at the pumping station. Heber Martin, surveyor of Littleport said he'd measured the barges and worked out the amount supplied. Joseph Whitehead said he'd carted it from the lighters. But the Board disputed the quantity. The suggestion that being fenland it had acted as a quick-sand and swallowed up the materials could not be accepted since the ground was so hard people could not get a pick into it. It was possible more sand and gravel had been used in making the concrete than they'd allowed for. 13 05 30 p8 CIP

1913 Two undergraduates told the court they were coming up the Cam in light sculling boats when they met a tug towing a string of six barges belonging to Colchester and Ball of Burwell. The barges smashed their boat and threw them in the river. The bargee said the wind had blown the rear barges across the river and the scull had got nipped between them and the bank, despite attempts by two men with poles to avoid the accident. But a Met Office witness testified there had been little wind that day. The judge said were too many barges in the chain and the back ones would always swing. He spoke from personal experience as an old oarsman on the Cam 13 05 30 p10 CIP

1913 Cambridge Sea scouts opened their new riverside headquarters at Pocock's Boatyard. It consists of two capital rooms like cabins on board ship, one fitted up as a workshop, the other containing various games. They also launched their new boat, named The Albert, built of pine and elm with six oars and a mast, capable of carrying 10 boys. 13 06 06 p10 CIP

1913 William Harding testified he'd had charge of a tug and string of six barges belonging to Messrs Colchester and Ball. There were two men on the tug and two more on the hind lighter who were shoving with poles as hard as they could. He'd shouted to warn two undergraduates in a scull to stop, but they just rowed on and been struck. Walter Parr said he knew the 'Nancy'. At one time there had been as many as 20 barges in a string on the river. The keeper at Jesus Lock said he'd known a lot more than six barges in a string and three men were quiet sufficient. 13 06 27 p09 CIP

1913 Colchester and Ball barge collision undergrad rowers – judgement for the undergrads 13 07 25 CIP

1913 Motor Boat Club dinner – motor boats and May races; reflections on Conservators – difficult to work with; navigation for commercial interest now practically dead 13 12 19 p3 CIP

1914 Nancy steam barge laid up, used to bring timber Kings Lynn to Cambridge stopped running 30 Aug 1914, previous year takings £409 for 46 weeks work [W.15,NI.3.1] The Nancy was a fine steam tug, one of the largest to be used on the River Cam. She was about 70 feet long with a capacity of about 70 tons and was owned by the Eastern Counties' Navigation Company carrying coal, bricks and timber. The boat was laid up in 1914 because of the war and rotted at her moorings near the railway bridge at Ely until the river was widened in 1947. Then the rusting boat was buried on the Babylon marina site. Four years ago the remains were unearthed and now the stern has been given a permanent home at the Cambridge Museum of Technology in Cheddar Lane 85 11 01

1914 Lighters owned by West Norfolk Manure and Chemical Co had touched the lower sill at Baits Bite Lock. They were carrying about 42 tons but if this was reduced it would not be economical and they would abandon the river and take the materials by rail. The sills could not be lowered without putting in new doors. The uprights are practically decayed and the two ploughs are never used except in emergency. The keeper was fearful of opening the doors and if there were a flood the whole might go. Urgent repairs were needed, the Conservators heard – 14 02 13d

1914 The Conservators had written to the West Norfolk Chemical Company concerning damage done to the sills at the locks by their barges, owing to their bumping when heavy laden. The Company replied that if they lightened their barges to such an extent that they no longer bumped, it would become cheaper for them to transfer the residuals from the gasworks by rail, which would ruin the traffic on the Cam. They could not lighten the tugs, which were heavier than the barges. The barge Charles, which has been running on the Cam for more than 50 years, drew two inches more water than the present barges 14 05 08, b c

1914-18 Banham carries out Service contracts [1.1]

1915 Barges on Cam should have cask water for drinking – never made use of them – 1511 26 p7

1918 Boat proprietor sued an R.A.F. officer who hired a boat one Sunday afternoon and left it on the Granta to float where it would, with the result that the contents were taken possession of by someone else. They included sculls, three cushions, a tea basket, a flask and cups, saucers and plates 18 10 23 CIPof

1919 Banham buys rowing boat business near Victoria Bridge [1.1,2.1]

1922 Cam Conservancy Bill progresses [1.6]

1927 Nancy II, 70 foot motor barge makes maiden voyage, unloads at Pike & Eel Banhams bought large steel diesel-driven barge from Holland, really too large & had difficulty in passing through locks & navigate tidal sections; probably insufficient trade & taken out of service after 9 months [W.17,1.9]

1927 Nancy II steel barge built for Banham's – history 85 12 12b

1927 The Conservators of the River Cam considered a scheme to make the river navigable for cargo boats up to the Quayside near Magdalene Bridge. Mr Banham had recently bought a vessel for conveying cargo and at present it can only come as far as Jesus Lock. There had been no traffic for years and the state of the river was very bad. There was a possibility that the river could be dredged but the Commons Committee had taken a lot of trouble to make Jesus Green a beauty spot and would not sanction the deposit being placed on the Common.c27 07 09

1932 Cambridge Motor Boat Club decided to take over a new piece of land at Clayhithe to enlarge their present ground. Although some people thought the scheme too ambitious, they could provide tennis courts and bungalows which would be rented for £3 as well as providing a motor way and parking place. Mrs Banham said the Ladies' Committee would contribute £20 towards the costs. 32 11 04g

1933 last consignment of ammonia water sent by barge from Gas Works

1935 The new motor tug 'Sheldrake', which has been built for the Great Ouse Catchment Board for use in the Wash, took advantage of the seasonal rise in the water to travel from King's Lynn to St Ives towing a string of barges to collect osiers for the East Stone Bank contract. It is the first time for 20 years that a vessel of this kind has been seen as far up-river. The last vessel to carry a cargo through St Ives arrived in August 1915 with potatoes. 35 03 22a

1936 Friendly rivalry between the owners of two 50-years-old steamboats led to a unique race on the Cam. 'Kathleen' owned by Mr & Mrs Leach, performed so well that, although the older craft, she beat 'Sunbeam' owned by Mr Barlow of Jesus College by a quarter of a mile over the course from Pretoria Road bridge to Baitsbite and back. An old fire engine boiler was a big help to Mr Leach in the construction of 'Kathleen's' engine, which drives the boat at about eight knots 36 05 07 – photo

1936 A retired schoolmaster, F.J. Fuller, has built a large motor-boat in his back garden in Ascham Road with 'tips' from Mr H.C. Banham. He laid the keel in October and it was launched on August Bank Holiday. It has an engine from an Austin Seven car and features oak and spruce steamed to the required curves with mahogany lining. The craft has been named 'Butterfly', reviving that of a steam launch that his father had 50 years ago. 36 08 14a

1936 Model liners built by F.W. Thiem floated in tank in garden at corner Chesterton Hall Crescent – 36 11 07d

1938 Mr M.C. (Jack Scudamore) served his apprenticeship with Mr J. Stranger, boat builder of Chesterton and, after serving in the Boer War, started business as a boat and launch builder in Mill Lane about 1903. He had considerable success in building motor boats and his craft won prizes for motor boat racing. When the Thames punt became the vogue he turned his attention to the building of this type of boat and was the pioneer of their use on the Backs and Granta. Since the popularity of the punt in Cambridge he has supplied them to users all over the country. 38 09 05c

1939-45 Banham builds boats for Admiralty & Air Ministry; runs fire float throughout the War manned at his own expense [1.1]

1939 Mr. A. J. Scudamore was in business with his brother, the late Mr. J. C. Scudamore, who died about a year ago, assisting him in the carrying-on of the well-known business in Mill Lane and the Granta Boathouse. When motor launches were first introduced on the Cam, deceased built several of them, and they attained considerable success in the races promoted by the Motor Boat Club. He was also one of the first members of the club. In the summer months he was a well-known and genial figure in Mill Lane, being in charge of the new Granta boat houses which he'd helped to plan. 39 10 27 CIPof 39 10 23

1942 Punts and canoes placed on NFS reservoir on lawn in front of King's – photo – 42 09 17a

1947 Sir - May I join the protest against the excessive charges now being asked for the hire of a punt on the river. It is within easy memory that it was possible to hire a punt out for an afternoon and evening for five or six persons and still have 10s change from a pound note. I can

see nothing which warrants the present-day prices. Is it that the ordinary townsfolk are being slowly squeezed from the river in order to allow the varsity men and the more wealthy visitors to the town to enjoy "our" river? The Borough Council should either consider setting up a municipal boatyard for the hire of punts or investigate the charges with a view to softening the blow to the everyday working-class family of Cambridge - letter from "Constant User" c47 08 20

1947 Sir - a recent letter in defence of present punt charges prompts me to indulge in some mathematical calculation. At a large boathouse on the upper river I counted seventy punts recently. On any fine summer afternoon there is usually a queue waiting to hire them. Assume that each punt is hired for three hours only at 3s. per hour, and it must be clear that the weekly turn-over must be approximately £200. Deduct from this the wages of four men (say £25), allow £25 for running costs and there is a clear profit of £150 per week - J.A. Parkinson, Newnham Rd, Cambridge c47 08 26

1952 death of H.C.Banham [1.1] (CDN 1.1.53 p7)

1953 A recent decision by St Ives Council to break up and dispose of an historic Fenland lighter – presented last year – has had serious repercussions. Before donating it as a museum-piece Mr R. Cory of Brinkley had received several offers for its purchase from people wishing to convert it into a house-boat. The hatches were not perfect but it could easily have been repaired. There was a considerable ‘bash’ in the bow as a result of an accident on its last trip when carrying sugar beet. It had sunk because of heavy rain, strong winds and a lack of interest and attention. A half-hearted attempt had made to raise it at the worst possible time. The barge is at present a total wreck outside the Norris Museum c53 07 03

1954 death of F.J.Lincoln [1.2]

1955 The annual punting race between the Oxford University Charon Club and Cambridge Damper Club is a relay with the lady member of the team acting as baton and hastily jumping from punt to punt at the end of each ‘leg’. For the eight gentlemen on each side it was a perspiring afternoon; both wind, water and pole were playful and both of the ‘batons’ nearly suffered a ducking. Gradually it developed into a cross between a water-polo match and a life-saving exhibition. 55 05 09a

1957 The motor vessel ‘Phosphorous’ lazily riding at her moorings off the ‘New Spring’ pub is the perfect answer to Cambridge’s housing difficulties. It does have disadvantages: all the washing-up water must be pumped from the river and boiled while drinking water has to be obtained and conserved in a tank in the bows. But when the owners are cruising the river it is not an empty house that callers see, just a clear view of the opposite bank. 57 07 05a

1959 Houseboat sunk near Jesus Lock – 59 11 21b

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 Members of Chesterton Youth Club have made week-end canoe camping trips down the Granta, Rhee and Brandon Rivers using boats of their own making. No fewer than six two-seater canoes have been built in the Chesterton Evening Centre wood-work room and the finishing touches of paint and varnish are now being applied. The hobby is so popular they will shortly be starting canoe building classes 60 06 17

1961 Scudamore’s boat yard at Quayside is experimenting with a prototype fibreglass punt, the first of its kind in Cambridge. The red-and-blue punt with its yellow cushions is much livelier and

virtually impossible to overturn or sink. Built in Hull it costs £110, the same as a wooden punt, but the cost of maintenance is much lower. If it proves a success there will be a gradual take-over from the traditional mahogany boats. Scudamore's already have several fibreglass dinghies and other boat yards have similar canoes 61 07 26 (does not stand up to wear, change back to wood 1965) [2.3]

1961 Banhams become part of Pye group [2.6]

1962 H.C. Banham launch first fibre-glass hulled boat – 62 07 03a

1964 Punt owners say trade is bad with eighty per cent of those available for hire lying idle. Until 1950 students would take their books to the river in term time, but they don't do it nowadays. Some hirers use up their £1 deposits and leave the punts, then long-haired types jump in and smash them. Foreign visitors do much of the damage and the French treat the punts a lot rougher Scudamore's say. Their new fibreglass punts have been found too weak: they are too low and not really big or steady enough for hire work 64 08 21d

1965 T.S. Moyes of Peterborough navigates 75-foot barge from Cambridge to Lynn to see whether canal traffic can be revived – 65 07 31b

1965 64-year-old Houseboat at Jesus Lock home to generations of veterinary students since 1958 – 65 08 14c

1965 Scudamore's introduce fibre-glass punts – 65 08 19a

1969 Banham's Boatyard old premises being switched to new building to make way for Elizabeth Bridge – 69 03 05

1969 Steam punt with paddle wheel launched by student – 69 06 05

1970 Two Tees Boat Yard opened by Ernest Tyler and Mo Tyrrell, worked for Banham's – 70 04 03a

1971 Scudamores punts sold [2.14]

1971 Banhams boatyard transformed from home of traditional craftsmanship to an industrial production line of fibre-glass boats – 71 03 19

1973 Banhams executives buy back boat hire & chandlery parts [2.7]

1974 old wooden barge raised from river bed at Ely & brought to Museum of Technology [2.8]

1975 Chauffeurpunt' started [2.9]

1975 Mr Edwin Appleyard's partnership with a Shell oil barge has ended after 18 years. The 60-year old barge was first introduced to the fens from Holland about 1910 and was used for delivering tulip and daffodil bulbs growing in the fens to Ely station. It next became a cargo boat plying between King's Lynn and Cambridge before being bought by Shell in the 1920s. It was then used to supply pumping stations with gas oil. Now it has been sold to a canal and passenger boat operator of Manchester c75 03 17

1975 It looks like plain sailing from now on for one of Cambridge's best known sights, the Viscountess Bury pleasure boat. It was confirmed that a new site for her mooring near the gas works had been approved by Cambridge city council. It means the 87-year-old boat will still be plying the Cam next season. Earlier it looked like it may have had to leave Cambridge as Banham Marine, the firm who own the boat, have to move to a new site at Upware c75 11 20

1976 Banhams move business to Ely [2.10]

1976 Cambridge chauffeur-punt service on the Backs can go ahead again this summer. Third-year Law student at Trinity Hall, Mr Jeremy Nicholson ran the service for a limited period last year but his application for a new licence was refused by the city council because of complaints from fishermen. Now it has been renewed with conditions about insurance and the condition of the boats c76 06 12

1977 plans for marina Logan's way agreed despite protest (closed 1981 as unprofitable) [2.11]

1978 Baitsbite Lock most expensive in Kingdom through which take boat [3.17]

1980 The 'Viscountess Bury', best-known pleasure boat on the Cam is in danger of leaving the river – only eight years short of her centenary. Banham Marine have decided to advertise it for disposal on the Thames. It was launched as a battery-powered vessel at Chiswick in 1888 and was patronised by Edward VII. It was bought by H.C. Banham in 1910, fitted with a petrol engine and sailed up the North Sea to the Wash, narrowly escaping loss in a storm outside Wells. Since 1911 she has been regularly used for club outings and private festivities. 80 05 15a

1980 Viscountess Bury to go up for sale – 80 11 25

1981 The Viscountess Bury plopped into the Ouse with a new nose, a new right arm and a dud battery. The 93-year-old doyenne of pleasure boats was relaunched at Ely after a refit that included restoration of its figurehead, a well-upholstered Victorian lady. But she would not start and it took over an hour to get her under way. It should be available for hire by the end of April. 81 01 31

1981 The Viscountess Bury, one of the oldest pleasure boats in the world, has made a comeback after a £10,000 restoration. The 93-year-old boat began the new season with a 16-mile round cruise along the Ouse north from Ely. She originally ran on electricity but is now diesel-powered and ready to ply the rivers, 24-hours a day, for many years to come. 81 05 08

1981 Scudamore's has decided to close its motor boat marina at Logan's Way, Chesterton – just four years after its controversial plans were given the go-ahead by the city council. The marina was only open for a month last summer and was no longer considered to be profitable. They ran the marina on council-owned land and negotiations are now taking place to work out what to do with the site. 81 06 24c

1981 Excavation work on a new marina at Annesdale, Ely is unearthing remains of The Nancy, a steam-driven cargo barge which plied the River Ouse until she was laid up in 1914. It was then towed near the railway bridge to be cut up for scrap but the work proved too expensive and it was left to rot until the 1940's when the Ouse was widened. It was then in the way so Ted Appleyard dug a hole on the Babylon site, dragged it out of the water and dumped her in it. 81 10 09c

1987 Tyrells Marina began in the 1950s as a company hiring out punts on the river. Gradually business has increased and for 25 years it has operated from premises in Bermuda Road where they sell a range of boats including inflatables, skiboats, sailboats and canoes. 87 06 30

c.26.4 : horse traffic

started May 2011

Sir – way back in the 1890s I booked a seat with the Sawston carrier. The morning broke with a grey sky. I remember his suspicious look until I paid him the ninepence fare and threepence extra providing there was no 'scorching'. I also recollect his need of a shave. We made Stapleford in the first three hours, on to Shelford and rounded the Stone Bridge, Trumpington about noon, to

schedule. But then the offside-wheel came off. I alighted at Market Hill, walked down Petty Cury and boarded a horse tram. Then from the delightful rhythm and sway of that luxuriously-upholstered vehicle I drank in the scenery of the skyscraper buildings in Regent Street before returning home – ‘Blisters’ 37 08 20

1897 When you mention the name of Dr Harris to the head of the firm of Hunnybun and son, coachbuilders of Cambridge, his genial face beams. On 24th February Harris bought a governess car, neglecting, however to pay over the shekels. Within a week he came back with the cart and exchanged it for a phaeton. But Messrs Hunnybun are "canny" men. They sent a man with a polite note to the Doctor stating that the wheels of the phaeton they found were not altogether right in some small detail, would the Doctor allow them to rectify the fault. The faulty wheeled - and unpaid for – phaeton revolved on those wheels to Sidney Street, and never rolled back again c1897 09 09

1915` Burwell – Mr Knott the carrier will put up at the Ye Olde Castel Hotel Yard 15 12 02 p8 CIP

1962 An 80-year-old stage coach with a 78-year-old driver brought a breath of more leisurely days into Cambridge's busy streets. Drawn by four superb Dutch piebalds it is being used to draw attention to Gallaher's Park Drive cigarettes. The driver, Bob Smith, began driving in London in 1880 and continued until the horse buses went off the road. Since then he has driven for Bertram Mills in all sorts of places, including the great circus. The coaching tunes are sounded on a post horn by 15-year-old Albert Osmond. The four-in-hand is staying at the L&NER stable and will be here for a week 37 09 21a

The last day of the trams, 1914

149.81

c.26.44 : trams

- 1888 Tramways Company announce record profits [Sw.14]
- 1888 talk of steam tramway from Cambridge to Histon [P.10]

- 1890 Tramways Company dispute with Council over area of road they are to maintain [Sw.15]

- 1892 Tramways agree annual rental of £325 for 25 years for repair of road, confirmed in Cambridge Street Tramways Act [Sw.15]

- 1894 Tramways profits boosted by Royal Show held in Cambridge [Sw.15]

- 1895 Tramways propose viaduct road from Trumpington Road across meadows to Newnham [Sw.16]

- 1896 the Cambridge Omnibus Company introduce horse-buses on routes between Railway station, Chesterton Rd & Huntingdon Road; the Cambridge Street Tramway Company also start horse buses in opposition [S.1, Sw.17]

- 1897 horse flu epidemic hits both Tramways & horse buses [P.15]

- 1898 Tramways Company consider electrification of trams proposals by British Electric Traction Co., ask for new lease from Council who commission report [Sw.18,P16]]

1898 Sir - If it be true that the tramway company are anxious to adopt electric trams, I trust the council will be very careful not to allow our narrow and dangerous streets to be made still more dangerous by unsightly overhead wires and posts, or by the death-trap known as the underground current. In these days of motor cars, buses etc it is unnecessary to pull up our roads again as surely a good service of motor omnibuses would answer every need. If not, why not adopt the system of gas trams? – A Ratepayer CDN 1898 11 09

1899 valuable horse breaks leg because of tramrails, considerable problems caused by the lines in the road, further problems due to subsidence caused by new sewage works [Sw.17]

1899 Council apply for powers to municipalise Tramways Company, ratepayers reject proposal

1899 Next year the lease under which the Cambridge Tramways Company has the use of the streets expires. They have entered into negotiations with the British Electric Company for the sale of their undertakings. Subject to the Town Council giving its assent a sale has been arranged. They will introduce electric trams and considerably extend the present system of tram lines. 1899 03 02

1900 first fatal accident on tramway [Sw.19]

1900 The Cambridge Omnibus Company and the Tramways Company have entered into an arrangement whereby the Omnibus Company is to leave the whole of the trams route free for the Tramways Company. They in their turn will withdraw all their one-horse 'buses, thus leaving to the Omnibus Company all parts of the town not covered by the tram lines. The arrangement comes into operation on Monday next c00 09 14 [Sw.18]

1901 another fatal accident, great debate on safety [Sw.20]

1901 What say the shareholders of the Cambridge Tramways Company to the advent of a new service of motor buses working only from Market Hill to the Station – a penny service running from 8.30am to 9.30 pm. I have been assured by one of the promoters that the first of a batch of six new motor 'buses intended to be used on the new smooth road from the Post Office to the station will be tried in Cambridge within a month. It is certain such rivalry would destroy the present useful and satisfactory tram service – "A" CDN 1901 07 13

1902 At present owing to the long interval between the running of the trams thousands of people walk to and from Cambridge station who would gladly ride if they could do so without waiting longer than it would take to walk. Remarkable developments in electrical traction have been witnessed recently. The electric cars are speedy, clean and cheap but whether it would be possible to install in Cambridge a system of electric tramways depends upon a variety of considerations among which is the extreme narrowness of the streets and the appearance of wires to convey the current. The electric tram with its two minute service and low fares has improved conditions in London and it is to be hoped its advantages will be extended to Cambridge. CDN 1902 09 03

1904 British Electric Traction abandon scheme, sell their tramways shares to Cambridge Electric Traction Syndicate public meeting debates proposed electrification of trams with lines to Chesterton, Romsey, Silver Street & along Backs, opposed due to overhead power lines & price, people would prefer motor buses [2.19,3.2,Sw.20]

1904 support plans, Street Tramways Company try for Bill to allow electrification but Electric Traction Company unable to agree terms with Company [3.7]

1904 A poorly-attended council meeting considered an offer from the Cambridge Electric Tramways Syndicate to electrify and extend the present tramway system. The overhead trolley system for running the cars would not to be employed in King's Parade without the consent of the

council. But consultants say that the existing lines in Kings Parade should be abandoned & they cannot recommend new lines in the town centre because the narrowness of the streets would generate great opposition from residents. A new line should be laid in Silver Street but this is so narrow that the trams would take their turn with ordinary road traffic and keep to the left. There may be some objection to a track down Queen's Road which has the character of a boulevard but this would not be disturbed by the working of the tramways. The busiest section would be Hills Road where trams would run at about 2 ¾ minute intervals. 1904 09 15

1904 The apathetic manner with which the Cambridge public have received the important decision of the council in regard to tramways does not display that healthy interest in matters municipal which ought to prevail. The terms upon which the streets should be handed over to a private traction company were settled without keen controversy and public excitement. They were passed by a 'holiday' council and only one letter on the subject has since appeared in the press. This public indifference is difficult to explain. 1904 10 15

1904 Sir – while Cambridge is hesitating in what course should be adopted with regard to the tramway system two of the London bus companies have adopted motor traction. It is strange that after all the progress made by the petrol engine that one has adopted steam. The difficulties for a good petrol bus are many as frequent stopping and starting is required with much changing of gear. The steam bus has many advantages as any variation of speed is got by merely turning on more or less steam. Electric buses are out of the question as the batteries are too heavy and will only travel about 40 miles on one charge. The overhead electric trolley system disfigures the street by the overhead wires but can be relied upon and with ornamental trolley poles they do not look half as bad as it is made out – C. North, Cambridge. 04 11 09

1905 The arrival of the motor buses does not appear to be disturbing the Cambridge Tramway Company who are about to introduce a better service on the Post Office – Station Road route by constructing an extra loop line. So many made bus rides 'for the fun of the thing' that the trams gave many on business bent their only opportunity for quicker transit to and from the station. The conditions will change when 'abnormal' passengers on the buses have been reduced and those whose object is facility in travelling and not amusement will have unrestricted access to the automobiles. 05 04 17a

1905 Cambridge Street Tramways Company have determined to improve their service by constructing an extra passing loop in St Andrew's Street opposite Emmanuel College to enable them to double the number of trams on that route. But no cart would be able to pass if two trams were standing together and there was already a great deal of traffic at the dangerous corner with Downing Street. There was talk of some 20 motor 'buses and if so it was unlikely whether any other traffic would venture in the streets at all 05 04 20c

1907 When the hook attaching a horse to one of the Cambridge tram cars broke the animal dashed down the street at a furious pace, leaving the tram in the road. The horse, frightened by the clanking iron it was dragging, escaped a collision with a cart coming in the opposite direction, Near Sidney College it fell and before it could resume its career a scavenger had it in his grip and its period of liberty was at an end. No damage was done to anything except the prestige of the Tram Company. 07 02 16b

1907 Trinity Hall undergraduates have subscribed £6 3s. towards the fund for repairing the damage done to Mr Glasscock's cab on the night of the visit of Kier Hardy to Cambridge. It was smashed beyond repair but as vehicle was not covered by the Riot Damages Act he had no compensation for the loss sustained. At the commencement of term the News published the facts, calling the attention of undergraduates to the heavy loss they had caused and inviting them to put the matter right. 07 05 03

1908 One of the Cambridge Street Tramways Company's horses was injured in an accident. Walter Morley was driving towards the station when his horse fell down and swerved across the road. At the same time Robert Surtees was approaching in his motor car (no.Y826). He was unable to pull his car up successfully and inflicted a cut on the near side eye of the animal CWN 08 09 18 p5

1908 Cambridge Street Tramways' income from fares was down because of the competition from motor buses. If they had more passing places they could increase the number of trams. But the Corporation refused on the ground of excessive traffic and then granted four more licences to run great, unwieldy motor buses up and down the streets. But unlike their competitors the trams had to pay £325 a year towards the upkeep of the roads. CWN 08 09 25 p3

1909 completion of tram stop in St Andrews Street blocks traffic[3.9]

1912 Tramways Company in financial difficulties, defaults on payments to Council for maintenance of roads [Sw.23]

1912 Tramways company complain at costs of maintaining track – 12 09 27h

1913 Street Tramways meeting – decline 13 03 07 p9 CIP

1913 Cambridge Street Tramways Company has reported a loss of revenue. The reason is obvious: it is the terribly slow rate at which the trams travel - it is almost as quick to walk. Horse trams were all right years ago when there were no motor buses, but their day has long past. London has a new tram with a petrol-driven engine under the stairs connected with a dynamo which drives an electric motor. Its acceleration is slower and it cannot pull up so quickly but this would not concern us here in Cambridge. 13 09 05 p4 CIP

1913 Cambridge Street Tramways Company owed a considerable amount to the Council for the repair of the road. It was a large amount and was rising week by week. The only thing was to present a petition to wind-up the company 13 09 26 p7 CIP

1913 Cambridge Tramways future – long report 13 10 24 p10 CIP

1913 The existing horse tram service was absolutely obsolete and should be wound up, councillors were told. Under the Cambridge Tramways Act of 1879 the Corporation had laid out the roads with the tracks and expected to recover £325 a year from the Company. But they now had no money to pay and no balance in hand. The cost of taking up the rails and making good the road would not be less than £2,550. (Sensation). From this was to be deducted about £750, the value of the rails. But the moment the rails were up the road would become a main road and the County would have to pay for its maintenance. 13 12 19 p7 CIP

1914 Cambridge Street Tramways Company go into liquidation, last trams have notices urging people to let their children ride so they would remember them; last journey 18th February, undergraduates in mourning attire escort last tram to depot chanting funeral dirge; stock sold by auction, trams £10 each[3.4,3.5,6.1]

1914 Mr Ben Sharpe, who drove the last Cambridge horse tram, has died aged 86. It was on 18th February 1914 that he took a single-decker tram on its last ceremonial journey from its East Road depot to King's Parade. Within the year public transport was motorised and most of the men who had manned the horse trams were in France with the British Expeditionary Force. Mr Sharp served with the Cambridgeshire Regiment and was both wounded and gassed. Afterwards he worked for the Ortona Omnibus Company and later Eastern National operating between Cambridge and Bedford. 81 07 20

1914 Tramway Company's Stern Struggle.—When the Cambridge horse trams cease to run not a few of the town and county will lament the closing down of a Company which has for over 20 years struggled hard against overpowering opposition to maintain a service of conveyance. None will deny that the horse-drawn tram today is as out-of-date as it is rare, but it is well to recollect

that at the time of their introduction they were hailed as a "boon and a blessing" by all classes. Despite keen competition - they have seen the decease of three horse bus companies and one motor bus company - the Transport Co. have managed to survive until now and the management for 34 years have carried out their by no means easy task with commendable consideration for the interests of the shareholders and the convenience of the general public 14 01 09 CIPof 1914

The street tramway cars have ceased to run. Auctioneers have received instructions to sell the whole of the effects of the Company, which has been compulsorily wound up on the application of the Cambridge Corporation. The sale includes 24 draught horses, 8 tramway cars (4ft. gauge), including six-double-deck cars to carry 18 persons inside, and 22 to 25 outside, two single-deck cars to carry 18 persons inside, 10 sets of harness, a Crossley 2 h.p. engine and oat-crushing machines etc. 14 02 13 CIPof

1914 The Official Receiver's report on the Cambridge Street Tramways Company shows they were obliged to repair and maintain the road where the tramways were laid. In 1892 the Council had agreed to do this on payment of £367 per annum. But the company failed to pay in 1912 claiming their receipts had been greatly reduced by the motor omnibuses the council had licensed. They'd also prevented them employing mechanical traction in place of horses. 14 03 20i

1914 Tramways end litigation 14 12 18

1915 Tramways Company proceedings completed, assets paid Corporation; value of rails £2,316 but considerable cost making good roads 15 04 23 p4

1923 The Cambridge undergraduates have once more been the source of innocent amusement. The "rag" consisted in the purchase of one of the old 4- wheeled tram cars that used in bygone days to be both a convenience and an adornment to the streets of Cambridge. On Saturday when it was expected that the tram would be towed in state through Cambridge streets the authorities were alarmed by the appearance of numbers undergraduates outside the yard where the tram was stored. At this moment another tram made its appearance, a tram of Lilliputian dimensions, towed with steady ropes by a happy band of undergraduates. The miniature car was solemnly dragged into the centre of town and along old tram lines, which have for many years or so useless a feature in King's Parade c23 11 17

1924 Councillor Gentle raised the question of the removal of the tram rails along King's Parade and Trumpington Street, Cambridge. He had had complaints, and their removal would give employment. Alderman Stanley said that if one was cycling along the Parade the rails made it most dangerous. The reason they were not taken up was because King's Parade was a new round, and it would be a waste of money to do it now. They desired to wait until the road needed substantial repair and then do the work c24 01 21

c.26.46

Opposition to parking of buses in Drummer Street

64.05

c.26.46 : public transport - buses,

Background

In August 1851 the first horse buses appeared, double deckers drawn by four horses which ran between Cambridge & Shepreth where they connected with trains from Kings Cross; however in 1852 the railway line was extended to Cambridge & the buses withdrawn. 1878 plans for horse drawn trams announced, 2 companies each called Cambridge Tramways Co. submit schemes. 1879 The Cambridge Street Tramways Company was formed & in 1880 the service opened & enjoyed a monopoly of the public transport scene. Tramsheds were opened in East Road in 1881

John Leverington was Ortona bus driver in 1920s – memories – 86 07 10b

History of motor buses – feature article by Robin Cox – 65 06 04c

1896

The Cambridge Omnibus Company introduce horse-buses on routes between Railway station, Chesterton Rd & Huntingdon Road; the Cambridge Street Tramway Company also start horse buses in opposition [S.1, Sw.17]

1897

Horse flu epidemic hits both Tramways & horse buses [P.15]

1897 12 22

Cambridge Omnibus Company were sued for damages sustained in an accident of September 25th in Emmanuel Lane, Cambridge. The omnibus in question was licenced to carry 12 passengers inside and 14 outside. On the day in point there were no less than 23 outside, an excessive weight of more than half a ton and in consequence the vehicle swayed. In Emmanuel Lane there was a cart standing on the left side of the road causing the 'bus to move to the right when the hind off-wheel of the omnibus went sharply against the kerb and immediately collapsed like a pack of cards and all those unfortunate passengers were thrown to the ground. Some of the passengers were shot into a solicitor's office 1897 12 22

1898 08 13

At the general meeting of shareholders of the Cambridge Omnibus Company there was no exuberant spirit of jubilation. In fact, the company seems to have fallen on bad times. Trading for the year had resulted in a very considerable loss. In September an unfortunate accident occurred to one of the company's vehicles, injuring several persons more or less severely. They had the misfortune to lose by death nine horses. One thing that had swelled the amount of loss was the state of the roads. It must be patent to everyone that the roads were very destructive to the wheels, more particularly the main streets where there were tram lines c1898 08 13

1899 08 31

The annual meeting of the Cambridge Bus Company was told they had taken £500 more than last year, and £400 more in d. fares. Shareholders must bear in mind that the year before they had a loss of £1,563 of which about £1,100 was due to losses in consequence of accidents. All must admit that the Company had gained more of the confidence of the public, and the natural outcome would be increased prosperity in the future c1899 08 31

1900 09 14

The Cambridge Omnibus Company and the Tramways Company have entered into an arrangement whereby the Omnibus Company is to leave the whole of the trams route free for the Tramways Company. They in their turn will withdraw all their one-horse 'buses, thus leaving to the Omnibus Company all parts of the town not covered by the tram lines. The arrangement comes into operation on Monday next c00 09 14 [Sw.18]

1900 04 21

A serious bus accident happened in Mill Road, Cambridge. The omnibus was waiting for passengers opposite the Royal Standard public house and while the driver was talking on the path, the horses for some unknown reason bolted. The driver and conductor immediately ran after the horses, but were unable to catch them. Two passengers named Annie & Frances Scull, who were on the top of the 'bus jumped off. When the bus was about to pass the Durham Ox it collided with

a market cart belonging to Jonas Wilmott, carrier of Orwell and then another cart in charge of Eli Newman, a hawker, of Bottisham CDN 1900 04 21

1901 07 13

What say the shareholders of the Cambridge Tramways Company to the advent of a new service of motor buses working only from Market Hill to the Station – a penny service running from 8.30am to 9.30 pm. I have been assured by one of the promoters that the first of a batch of six new motor ‘buses intended to be used on the new smooth road from the Post Office to the station will be tried in Cambridge within a month. It is certain such rivalry would destroy the present useful and satisfactory tram service – “A” CDN 1901 07 13

1902

Cambridge Omnibus Company go out of business; depot on Chesterton Road (Frosts garage) closed [S.1]

1902 08 06

Popular Country Drives. The “Alexandra” and “Coronation” char-a-bancs will leave Cambridge Market Hill on Wednesday for Shelford, Newton and Whittlesford; return fare 1s. Thursday special drive to Royston, Friday Haslingfield and Saturday Earith bridge. Special Sunday drive to Whittlesford Bridge pleasure gardens. H. Buck, jobmaster, Crown Inn, Jesus Lane, Cambridge – advert CDN 1902 08 06

1902 09 16

The news that it has been decided to wind up the business of the Cambridge Omnibus Company will be received with a great deal of regret. If they cease running they will be very seriously missed. Many employees in shops and offices now live so far from their places of employment that without the benefit of the omnibuses it would be a serious tax on their strength to get to and from their homes in the hour usually allowed for dinner. The distance of the remoter parts of the town from the station will be a serious disadvantage to residents and lead to depreciation in the value of property. CDN 1902 09 16

1902 09 20

Sir – Many people have felt genuine concern at the announcement that the Cambridge Omnibus Company is to be “wound up”. Huntingdon Road, Old and New Chesterton, Mill Road and the rapidly growing suburb of New Cherryhinton have all benefited by its service. It is regretted that in spite of the hundred the Company has conveyed daily, the venture does not pay. Their difficulty is the Tram Company’s opportunity and they should arrange for a good suburban service of ‘buses to run in conjunction with their cars – New Cherryhinton c02 09 20

1902 10 01

It was a foregone conclusion that the business of the Cambridge Omnibus Company should be wound up. It was finally agreed to endeavour to dispose of it as a going concern and we are still convinced that under thoroughly effective management the business could be conducted at a profit. In the statement of company assets the horses were valued at £16 apiece but within three weeks their condition had changed considerably for the worse and the average is now about £6. The most valuable assets of the Company had been allowed to become seriously depreciated at a time when the Directors knew that to continue the business was impossible. This is one of the “glaring mistakes” which have been made CDN 1902 10 01

1902 11 20

Unfortunately the Cambridge Omnibus Company have been unable to find a purchaser for their business as a going concern and their horses, omnibuses etc had to be sold at their stables in Chesterton Road. A two-horse omnibus to carry 26 passengers fitted with garden seats on the top sold for 20 guineas. Buses by the 'Star Omnibus Company' were not in such good condition and realised £10 while others went for as low a sum as £4.10s. The one-horse 'buses did not sell for much but a four-horse charabanc, "The Cambridge Belle" sold for 62 guineas to Mr Ellis Merry. Prices for horses dropped to as low as three guineas. CDN 1902 11 20

1902 11 26

The new motor omnibuses which are being constructed for the London streets promise well. If they fulfil what is claimed for them they will beyond question be a great boon. They are capable of speeds up to fourteen miles an hour and Cambridge people will heartily wish some speculative philanthropists would put two or three such vehicles on our roads. The old omnibus company is being sorely missed, especially by people living in the suburbs; the old familiar vehicles, unsatisfactory as they were, were yet better than nothing CDN 1902 11 26

1902 12 13

A meeting of residents in St John's Ward, Cherry Hinton considered what support could be given to a scheme for running a line of omnibuses into Cambridge. Now buses had been taken off the road the value of their property would depreciate and the new houses being built would not be let readily as people would not come down that end of Cambridge if there were no buses. There was a possibility of their finding sufficient money to run a line of buses themselves if 15 people put £10 each into the concern CDN 1902 12 13

1904

British Electric Traction abandon scheme, sell their tramways shares to Cambridge Electric Traction Syndicate public meeting debates proposed electrification of trams with lines to Chesterton, Romsey, Silver Street & along Backs, opposed due to overhead power lines & price, people would prefer motor buses [2.19.3.2, Sw.20]

1904 03 16

A meeting of Cambridge Omnibus Company shareholders was convened to receive the Liquidator's accounts, showing the manner in which the winding up of the Company has been conducted. It had been impossible to sell the business as a going concern. The livestock and machinery were sold by auction for £768 but there was still a considerable deficiency. Not a single shareholder attended the meeting and the Board of Trade will be contacted to sanction the destruction of the company's books and the Liquidator's accounts. – 04 03 16

1904 09 15

A poorly-attended council meeting considered an offer from the Cambridge Electric Tramways Syndicate to electrify and extend the present tramway system. The overhead trolley system for running the cars would not to be employed in King's Parade without the consent of the council. But consultants say that the existing lines in Kings Parade should be abandoned & they cannot recommend new lines in the town centre because the narrowness of the streets would generate great opposition from residents. A new line should be laid in Silver Street but this is so narrow that the trams would take their turn with ordinary road traffic and keep to the left. There may be some objection to a track down Queen's Road which has the character of a boulevard but this would not be disturbed by the working of the tramways. The busiest section would be Hills Road where trams would run at about 2¾ minute intervals. 04 09 15

1904 11 10

Sir – while Cambridge is hesitating in what course should be adopted with regard to the tramway system two of the London bus companies have adopted motor traction. It is strange that after all the progress made by the petrol engine that one has adopted steam. The difficulties for a good petrol bus are many as frequent stopping and starting is required with much changing of gear. The steam bus has many advantages as any variation of speed is got by merely turning on more or less steam. Electric buses are out of the question as the batteries are too heavy and will only travel about 40 miles on one charge. The overhead electric trolley system disfigures the street by the overhead wires but can be relied upon and with ornamental trolley poles they do not look half as bad as it is made out – C. North, Cambridge. 04 11 10

1905 05 23

motor buses start : 2 companies formed to compete for passengers: Cambridge Motor Omnibus Company & Cambridge Town & University Motor Omnibus Company; 2,000 carried on first day but within week a postcard is issued depicting buses running over dogs & knocking down lampposts; Cambridge Town & University Company wound up [2.20, 2.21, S.4]

1905 02 16

Public interest in growing in the development of the motor omnibus service. The most recent improvements in construction largely obviate noise and other inconveniences. The cars travel smoothly, pick their way through traffic with ease and are amenable to all the controls essential in crowded streets. Unlike the tramways it involves no expense of electric installation, no overhead wires or underground conduit and may thread its way among vehicles of all sorts without led or hindrance. Village travellers may shortly see the carriers' carts which have laboured up the hill roads for generations replaced by a swift locomotion which will make the remotest hamlet seem no more than a suburb of the market town. 05 02 16

1905 03 10

A company is being formed to provide a service of motor 'buses for Cambridge. Eight 'buses will be put down at first by which it is hoped to run a 15 minutes' service from Chesterton, another from the Huntingdon road district to the centre of town and a seven minutes' service to the railway station. Should the venture prove successful the more outlying districts such as Newnham Croft and Cherry Hinton will be catered for 05 03 10

1905 04 08

The Cambridge Motor Omnibus Company has been formed. It is nowadays essential for the business of the town to have a convenient and quick means of transit and the omnibuses will be appreciated by the public and become a source of income to the shareholders. With eight vehicles it will be quite easy to maintain a 15-minute service from Chesterton and the Huntingdon Road to the centre of town and a seven-minute service to the railway station. Should these prove successful it will be extended to outlying districts such as Newnham Croft and Cherry Hinton. There is little doubt that horse traction for omnibuses and tramcars will shortly be superseded by petrol and electricity. 05 04 08a

1905 04 10

A keen struggle is to be witnessed in Cambridge for the privilege of conveying people by means of that modern convenience, the motor omnibus. On Saturday the prospectus of the Cambridge Motor Omnibus Company made its appearance and today we carry one for another company, the Cambridge University and Town Motor Omnibus Company. They hope to have their first bus on the streets soon. Owing to the boom in buses there is difficulty in securing these vehicles but they have five chassis (the working parts) and the coach work is being pushed forward as quickly as possible 05 04 10c

1905 04 14

The battle of the 'buses in Cambridge commences in real earnest. The 'bus armies are known as the Motor Omnibus Company Ltd and the Cambridge University and Town Motor Omnibus Company Ltd and will battle on practically even terms. They are of different manufacture, the first by Thorneycroft will accommodate 32 passengers, 14 inside and 18 out. Its body is dark blue with yellow decoration. The other is the Straker-Squire type, painted Cambridge blue. Both are driven by petrol, have non-slipping tyres and upholstered with spring cushions inside and seats like light garden chairs outside. 05 04 14d&e

1905 04 15

The rival Cambridge buses ran trial trips round the town to demonstrate the suitability of this form of traction and both were eminently successful. The Thorneycroft's hill-climbing capacities were tested on Castle Hill and seemed to present no difficulties except a decrease in speed; the Straker-Squire passed with the greatest ease. Both naturally created somewhat of a sensation in the streets and the way they threaded their way in and out of the busy traffic excited much admiration. They were under perfect control and could pass through traffic where a horsed vehicle would have to wait its turn. 05 04 15

1905 04 15

Both Cambridge buses started to ply for hire and the novelty induced people to make trips. Had several more 'buses been running they would have been crowded. The scene on Market Hill was unprecedented. Apart from those who lined one pavement in the hope of obtaining a seat it was alive with folk who were content with watching. As soon as a vehicle drew up a crowd swarmed around the steps, clutching the handrail and endeavouring to get a foothold on the step. Each time there were many left waiting on the pavement disappointed and most waited until it returned. 05 04 15 & a

1905 04 17

The new Cambridge buses have experienced their first small accident. The 'Light Blue' was slowing down in St Andrew's Street and drew up close to the kerb in order to take in a passenger. The incline of the road naturally caused a slight tilt of the bus and as the cradles of the street lamps project over the road the two met with the result that the top of the lamp was bent and a pane of glass smashed. 05 04 17a

1905 04 17

The arrival of the motor buses does not appear to be disturbing the Cambridge Tramway Company who are about to introduce a better service on the Post Office – Station Road route by constructing an extra loop line. So many made bus rides 'for the fun of the thing' that the trams gave many on business bent their only opportunity for quicker transit to and from the station. The conditions will change when 'abnormal' passengers on the buses have been reduced and those whose object is facility in travelling and not amusement will have unrestricted access to the automobiles. 05 04 17a

1905 05 26

Chesterton residents will be glad to see the inauguration of a new motor 'bus service by the 'Light Blue' company. Special arrangements have been made for the convenience of residents intending to travel to London by the early morning train. The 'bus will leave Old Chesterton Green at 8.25 and run through to the station in time for the 8.53 train. It will also run as frequently as possible between one and two-thirty for the convenience of residents employed in Cambridge who go to the suburbs for their midday meal 05 05 26

1905 06 15

Almost before Cambridge has had time to recover from the shock of the Fen Ditton ferry tragedy another sad fatality has occurred. A conductor employed by the Cambridge Motor Omnibus Company was on the front of the vehicle talking to the driver when another bus passed. He leant out to shout something to it, hanging on to the handrail when his head struck a lamppost. He was thrown underneath the 'bus and one of the hind wheels crashed over his head, which was battered out of recognition. 05 06 15a (& others)

1905 06 16

Sir – whilst regretting the shocking death of the bus conductor it must be said that my company, the Cambridge University and Town Motor Omnibus Company (the 'Light Blue') have carried 68,000 passengers in the last two months without a single accident having been reported to me – James Hammond, Manager. 05 06 16

1905 07 01

The 'Light Blue' bus was chartered to take 20 King's College men to Hunstanton and back. The driver sent telegrams reporting their progress. The bus departed at 6.40 and reached at Ely at 7.50 where the party breakfasted before finally arriving at 2.20 in the afternoon. The return journey commenced at 4 pm and the passengers were safely landed in Cambridge just before eleven. All agreed the trip was successful: the roads were perfect, the scenery appreciated and only one light shower fell. The bus pulled well and travelled the 120 miles without the slightest hitch. 05 07 01a

1905 07 25

A bus driver employed by the Cambridge Town and University Motor Omnibus Company was summoned after an accident with a tram. He had tried to overtake a trolley when one of his mudguards touched the tram's front handrail. The collision caused the tram to leave the line and go to the other side of the road. He claimed he could have got through but the tram horse had become frightened at the noise of the bus and quickened its pace; he had seen the horse 'dance about' on several occasions. But magistrates said the bus driver had been too anxious to pass; the state of the roads necessitated the greatest care and patience. 05 07 25a

1905 08 01

A Cambridge motorist was summoned for driving a motor omnibus without having a hackney carriage driver's licence. PC Wade said the bus, carrying passengers, was driven on to the pavement, damaging a lamp and flagstones. The driver said he lost control as it was not the same gear he was used to. It was the usual practice to try a man before applying for a licence and he was being taught to steer under the supervision of a qualified person. He was fined 5s. 05 08 01

1905 08 19

Sir – the present motor buses are exceedingly disappointing. They are far too cumbrous and top heavy; in the narrow streets people on the paths run the risk of being struck by the projecting bodies. In damp or frosty weather the top heaviness may cause the wheels to skid and one fears the consequences should one overturn. They are very noisy and the stench from the oil is intolerable – in fact the streets are contaminated all day long with the disgusting effluvia – 'Ratepayer' 05 08 19

1906

Magistrates refuse to relicence buses, the experiment ends. Mr Buck of Chesterton operates horse-bus from Chesterton [S.8]

1906 05 07

The motor omnibus has now had a fair trial on the streets of London and has shown its worth despite more vibration, noise and smell than the electric tramcar. It is quicker and subject to less obstruction than a vehicle on rails. The liability to fire, the unpleasant smell and noise are receiving the attention of engineers and the future prospect is that the 'Mobus' will become assistants and feeders to all classes of rail vehicles. 06 05 07a

1906 09 05

PC Wright said he was in Regent Street when he saw the Cambridge Motor Omnibus Company's bus discharging a great quantity of black smoke, it was filling the street as it went along and was the worst he had ever seen. The driver said they had just had a refill of oil and agreed to take it back to the garage, smoking all the way along Park Terrace. The company said there was nothing wrong but was fined £2. 06 09 05 & a

1906 10 10

A Cambridge bus driver appeared in court for dangerous driving in Hills Road. He said he was going 15 mph because he was obliged to pass another bus. It was not illegal as Parliament had fixed the maximum as 20 mph. The road was wide and there were no pedestrians about. The policeman admitted he had little experience of motors but had never seen one go faster. The driver had now been dismissed because of the complaint. 06 10 10

1907

Hills Road garage opens [RH]

1907 08 03

Four new motor buses (three single and one double-decker) will commence their careers of usefulness by running to the Mammoth Show. Regular routes will be arranged as soon as possible. They are as noiseless as it is possible for motor buses to be, free from obnoxious odours, do not drop oil over the streets and are very easily handled. They are the property of a private speculator who took over the late Cambridge Motor Omnibus Company and will be managed by Mr J. Berry Walford. Called 'Ortona' after name of a cruise ship 07 08 03

1908 08 22

The Ortona Motorbus Company, inaugurated a year ago, now possesses five double-deckers, a char-a-banc and a big 'bus'. They have two services from the railway station, one to De Freville and the other to Huntingdon Road. At the well-equipped garage on Hills Road there is always one car that can be despatched the instant a breakdown is reported and even replacing a broken axle can be carried out by their own mechanics. Now country people who used to disfavour these 'machinations of the evil one' patronise them with perfect confidence. CWN 08 08 22 p5

1909 12 03

The Ortona Motor Bus Company, whose enterprise has proved such a boon in Cambridge and Chesterton, intend to commence a service to Sawston via Trumpington, Shelford and Stapleford. A fine new Maudsley bus has been obtained which will do the full journey in 50 minutes. Parcels as well as passengers will be carried CWN 09 12 03

1910 02 04

Since the Ortona Bus Company was established in Cambridge they have done much towards linking up the station and the town with outlying suburbs. A few weeks ago they commenced a service of motor 'buses to Trumpington, Shelford and Sawston and have now inaugurated another to Histon and Cottenham which has been well patronised by passengers 10 02 04m

1912

Harry Bevan joined the Ortona Motor Company in 1912 and for seven years drove the bus to Sawston, for which he was allowed 50 minutes each way. Carrying parcels as well as a steady stream of passengers he made five journeys a day and using the maximum speed of 12 mph always had time for a good smoke break at the end. The first double-decker ran from Station Road Corner to the Rock Hotel on Cherry Hinton Road and back via Blinco Grove. It was not allowed to go through the town because it was a menace to shop signs. 60 08 18a & b

1912 11 04

A serious collision in Silver Street between two motor buses was only averted by the skill of the drivers. A horse and cart were standing in the road near the Capital and Counties Bank, opposite the Automobile Garage where alterations are taking place. The bus to Chesterton made a sharp angle to clear the cart but the on-coming heavily laden bus had approached a little too far. The mudguards came in contact and the front wheels were inter-locked. The passengers were much alarmed but little damage was done. Ortona have not had a single serious accident since they have been established in Cambridge. 12 11 04d

1913 04 18

The enterprising Newmarket and District 'Bus Company plans a motor bus service for Soham on market days departing from the Crown Hotel at 12.30 on Tuesdays and arriving at Newmarket an hour later. On Thursdays they leave from the Market Square for Ely. The vehicles, supplied by the London General 'Bus Companies, present an exceedingly smart appearance, being painted yellow picked out with dark blue. They have electric light and are exceptionally quiet running. The company has already started a service of buses between Burwell and Newmarket, doing three journeys a day 13 04 18 p11 CIP

1914

Cambridge Street Tramways Company go into liquidation, last trams have notices urging people to let their children ride so they would remember them; last journey 18th February, undergraduates in mourning attire escort last tram to depot chanting funeral dirge; stock sold by auction, trams £10 each[3.4,3.5,6.1]

1914 04 24

Motor Bus Service between Cambridge and Royston was commenced. At present the buses are making three journeys each way, calling at the intermediate villages. 14 04 24 CIPof

1914 07 17

The Ortona Motor Bus Company agreed to make payment to the council for every mile their buses travelled on their roads to cover wear and tear. This meant where traffic was very heavy the motor buses would pay for all expense and something over. Both recognised that the council had no real legal claim but Mr Walford was most anxious to meet them. However the Motor Bus Company was not prepared to give them anything whatever. The huge 'buses running in an almost continuous stream every six or seven minutes were sufficient for public service but their speed should be regulated 14 07 17 p7

1914 11 27

Ortona buses requisitioned for war 14 11 27

1915 01 29

Walter Gilbert told the court he was travelling in an Ortona motor bus towards the station. Since the war began there had been a considerable demand for motor buses for purposes connected with the war and the company was running a very antiquated vehicle of very faulty condition. The wheel base was short, making a tendency for the bus to swerve round with great force and made it very unwieldy. The conductor might become accustomed to these acrobatic feats but it was not safe for passengers. On most buses there was a bell at the back which could be pulled when one wanted to get off and another at the top. But on this one passengers had to go downstairs or wait for the conductor to come up 15 01 29

1915 03 26

The Ortona Motor Company had agreed to pay Cambridge Corporation £100 a year for the right to erect posts advertising the running of the buses. As the Corporation had no power to charge mileage for the use of the road this was a substantial income. With the outbreak of war the military had commandeered nine of the vehicles but they would agree to the terms after the conclusion of the war. But the council had really granted them a monopoly: the trams used to pay £100 per annum and they were paying nothing 15 03 26

1915 08 13

Covers on Bus Seats.—The attention of the Cambridge Watch Committee has been called to the fact that the Ortona Motor Bus Company has not provided covers for the seats of the omnibuses and it was agreed that the Town Clerk write to the Company requesting them to provide waterproof aprons for the seats on top of the buses. 15 08 13 CIPof

Burwell & District Motor Services ltd formed [S.16]

1925 08

proposals to create a bus station at Drummer Street cause great protest; 3,000 sign petition, 1,000 march to Mayor's house to demand another Council meeting, August [2.4]

1925 08 09

The Corporation seems to have stirred up a good deal of indignation by their proposals with regard to the Drummer Street "motor park". In a town like Cambridge it certainly seems unwise to do anything that may detract from its attractiveness. A suggestion has been put that the 'park' should be established on Butt's Green and not at Drummer Street at all. A petition has been presented to the Mayor asking her to call at Town's meeting and it is hoped that the request will be acceded to c25 08 09

1925 08 23

As the result of an open-air meeting on Parker's Piece efforts are being made to form a Ratepayers' Association whose first business will be to contest the legality of the Cambridge Town Council's action in encroaching on Christ's Pieces for the purpose of providing a parking place for motor vehicles. This was absolutely illegal. Within twelve months the continual movement of vehicles on what was virtually a made-up bog the road would drop six inches. The Ortona Bus Company will be the first people to say they have been pushed into a rotten corner that is of no use to them c25 08 23

1925 11 28

Drummer Street proposals go ahead, opens in November & various country buses stop there rather than on Senate House Hill; later Ortona also use it, causing overcrowding & disputes [1.14]

1926

County Council squabble over whether they should pay for Drummer Street [1.15]

1926 02 27

Householders in Chesterton Road have petitioned Cambridge Borough Council to lodge protest against the speed at which vehicles of the Ortona Motor Omnibus Company are driven down the road. "The effect of the excessive speed at which these jolting juggernauts are driven is to produce an intermittent earthquake which is doing great damage to our houses". They should not be allowed to exceed 10 mph, increasing to 15 mph when pneumatic tyres are fitted. The present indulgence, which allows solid-tyred vehicles to bump along at 20 to 25 mph, is altogether unreasonable, they claim c26 02 27

1927 04 03

A small group had a very enjoyable trip to London on one of the new Varsity Pullman motor coaches which it proposed to run daily between the metropolis & Cambridge & Oxford. The handsome saloon coach provides plenty of elbow and leg room for 20 passengers, completely enclosed and protected from the weather. Small mahogany tables can be raised at will for dining and other purposes. Balloon tyres and four wheel brakes are fitted and at all speeds the coach travelled smoothly and steadily. The journey to the West End was accomplished in 2¼ hours. c27 04 03

1928 05 07

Cambridge Town Council granted licences to Messrs Brown Bros for a new Lancia saloon motor coach and the Westminster Coaching Services for three additional coaches. Coun. Doggett asked

if the vehicles were fitted with pneumatic tyres and if they would not licence any with solid tyres from the point of view of wear and tear of the roads and the comfort of travellers. It was only a matter of time before solid tyred vehicles would be barred from using the roads at all. There was a nuisance with regard to bus tickets being thrown down in the roads and the Ortona Motor Bus Co are to be asked to provide receptacles for bus tickets on the buses plying in Cambridge. c28 05 07

1928 09 30

Cambridge Watch Committee granted Messrs Brown Bros a further licence for a Lancia coach to ply for hire at Drummer Street on condition that only one of their buses is to stand there at any one time. But Ortona had six to 14 buses there at a time & Messrs Brown advertised fares at 6d to a shilling cheaper. Ortona paid the Council £250 towards the rates but if the public was being charged extra it was time this was dispensed with. A custom had grown up amongst police and other to give Ortona preference because they sent buses to various places, whilst the others went to only one. c28 09 30

1928 12 05

Ortona extend garage [4.12]

1929

1930

Six drivers arrested near Holy Trinity church after challenging police regulations [2.12]

1930 05 15

A councillor complained that in 1921 an agreement had been signed with the Ortona Bus Company allowing them a monopoly of buses on the streets of Cambridge for a payment of £250 a year. "They have had a jolly good picking. There are no workmen's tickets, no children's tickets, no cheap tickets, which you get in any other town". The Mayor said the streets were already so congested that it was not possible to have competitive services in operation. But Ortona had been issued with extra licences to run buses on those same narrow streets. 30 05 15 & a

1930 06 19

Since 1921 the Ortona Bus Company has paid Cambridge Corporation £250 annually; this was for permission to fix bus stop signs on lamppost but in practice constituted a monopoly. Much had been made of the problems of running buses owing to the narrowness of the streets but Ortona had increased its services from nine to 33 for which the Corporation received the wonderful sum of 14s. a day. A maximum number of licences should be fixed and granted between the other companies who could run buses at a cheaper rate and reduce fares. 30 06 19b

1930 06 21

Six Cambridge bus drivers involved in the 'battle' of Sidney Street on the first day of the May races appeared in court charged with obstruction. Only Ortona buses were allowed to stop there but a long line of coaches had filled the whole side of the road. The drivers said the monopoly was unfair. They also complained that Ortona had increased the price of a ticket to Fen Ditton from twopence halfpenny to sixpence a trip. 30 06 21aa & b

1930 08 14

Hubert Gautrey a Cottenham motor car agent claimed £60 from Messrs M. Mack, motor coach proprietors. They had advertised two Gilford 1929 sunlight saloon coaches for sale. They wanted £1,120 per coach or £2,240 for the two and agreed to pay him £40 per coach commission if he found a purchaser. This he had done, but Mack's claimed the buyer had only paid £1,850 and they had reduced the sum to £20. 30 08 14c

1930 09 09

An Ortona omnibus collided with a stationary Ford van at Old Chesterton and the impact was so great that the van was hurled twenty yards along the road. William Holmes was delivering meat when the bus crashed into the rear of his butcher's vehicle. He was taken completely by surprise and flung across the footpath but managed to save a 70-year-old lady, Mrs Mansfield, by pulling her away. The van's steering gear was smashed, the body splintered and meat to the value of £10 scattered on the road. 30 09 09

1930 11 28

A drastic reduction in Cambridge to London motor coach prices is the latest phase in an intensive 'war' between the two established 'outside' companies and local proprietors. There were two independent daily services provided by Westminster Coaches and the 'Varsity but then A. & H Brown of Lord Astor coaches started another at four shillings return. They have now allied with Royal Blue and Comfort coaches to reduce the fare by a shilling and increase services. Westminster and Varsity are now charging 2s 6d and Cambridge is awaiting the next move with interest 30 11 28

1930 12 06

Sir – we are a locally owned firm with its own garage, employing 57 people and we try to give a good service. Between October and March each year we lose a considerable amount of money and rely on summer business to get profits. We do not discharge staff because we overhaul and repaint our rolling stock. We stick to our own service and do not interfere with our competitors. But now our rivals have starting cutting fares. We have got to defend ourselves and the public will benefit from cheap rides until further notice. –Varsity Express Motors 30 12 06a

1931

Road Transport Act restricts number of buses [S.20]

1931 10 03

Ortona taken over by Eastern Counties, bus colour changes from green to red [1.17]; all routes have 100 added to their number - thus route 1(Chesterton to railway station) becomes 101 [1.16]

1931 12 19

Varsity Express coach refused licence for London to Bournemouth service [1.18]

1931

Drummer Street bus shelters erected [3.15]

1931 01 10

An Ortona conductor was summoned for allowing 60 passengers on to a single-decker bus licensed to carry 37. It was a very busy day just before Christmas. The bus had started from Sutton and the trouble arose at Denny End, Waterbeach where there were a number of passengers

wanting to go to Cambridge market. The bus had to pull up at the railway station to set down passengers and people waiting there wanted to get on. The conductor did his best to prevent them but was helpless. He tried to get them to transfer to a relief bus but they would not get off. 31 01 10b

1931 05 01

At Cambridge the railway companies have a financial interest and working agreement with the Ortona bus company. The time will come when co-ordination will be very close; already they have had two experiments when railway return tickets could be used on the buses and vice versa, the Ortona chairman told an inquiry. In both borough and county they worked routes which were good and bad and excursions and long-distance tours helped to pay for unremunerative town services. 31 05 01c

1931 07 24

Reliance Coach Services of Cottenham had three coaches and had contracted to purchase another vehicle for £1,500. They operated services from Cambridge to Cottenham and Willingham; their buses ran five minutes before Ortona's but usually they waited for the Ortona drivers to start up and then got away faster in their smaller vehicle. Now they planned a new service from Haddenham via the Twentypence Bridge 31 07 24b & c

1931 08 28

Passengers had a remarkable escape when a motor coach overturned in a field near the Granta bridge, Great Chesterford, making a double somersault before coming to rest on its side. Pandemonium reigned for a few minutes and the shrieks of the women and children rent the night air. The Greyhound public house was turned into a dressing station; there was hardly a passenger who escaped without a scratch of some kind and it was pitiful to hear the children crying from fright. Many had not been on a coach trip before. 31 08 28b

1931 10 02

Heydon bus operator – E.E. Weeden, Withers of Haverhill, Raynham of Saffron Walden – applications – 31 10 02 m & n

1931 11 06

The keenness of competition between omnibus operators in the March area was apparent when the Traffic Commissioners heard applications for bus licences. The March Motor Co. operated services to Chatteris carrying 1,826 passengers a week. But the Railway Company objected saying they were the only operator to keep to a timetable. Their Benwick service averaged 350 on the two days a week that it ran. It had begun in 1922, but lapsed for some years until resumed in October 1930. W. Spriggs of Parson Drove had one of his buses stopped by police for being overcrowded and it had twice broken down. 31 11 06c

1931 02 05

Premier Travel Ltd has been formed to take over the services of Royal Blue Coaches of Chesterton Road and the Harston and District Motor Services. Managing director, E.A. Lainson, says there is a definite need for a good independent transport company. They will offer special excursions to Hunstanton, Southend and Yarmouth, run motor tours to Europe all year round and also conduct a travel agency for steamship, motor coach and aeroplane services. 36 02 05

1932 05 09

The old Ortona bus company had a sort of family arrangement with the workers. But with the formation of Eastern Counties the men had suffered cuts in wages. A midnight meeting of 200

employees instructed the Transport and General Workers' Union to open negotiations for wages of 1s 4d (07p) an hour for drivers, 1s 2d (06p) for conductors, for a 48-hour week. On public holidays the pay should be double time. 32 05 09

1932 05 14

Ortona garage – line of men applying work as bus drivers and conductors – photo – 32 05 14

1932 07 08

Sir – since Eastern Counties Omnibus Company took over from Ortona the conditions of employment are far worse. Conductors now have to write numbers in tiny squares all day and only get 2s 6d a week extra for working a double-deck bus. The old firm granted a permanent pass for employees' wives, now they get none. Cleaners and fitters - the highly-skilled men who tend the fleet - earn over a pound a week less than before. – A Ratepayer 32 07 08c

1932

Fifty years ago (from 1982) a trip to London by coach did not take much longer than it does today. Gordon Carter, aged 72, who used to drive for Varsity coaches, remembers that it took about two and a half hours. It was a journey he did three times a day: "We would just have time for a cup of tea and then start off again". It cost seven shillings (35p) day return until a customer battle with the opposition, Browns based in Occupation Road, drove the fare down to half-a-crown (12p) 82 10 01

1932 10 07

Varsity Express Motors asked to be allowed to increase the average speed of their motor coaches on the Cambridge-London route to 25 mph – it would cut 15 minutes off the journey. The early morning coach leaving at 6.30 made very few pickups and it would be useful if it arrived in London before 9 o'clock as most of the coaches leave for the coast then. They manage to catch some by dropping passengers on their route but it was difficult to get to Regent Street in time for the Bournemouth coach. 32 10 07b

1932 10 28

Bus companies applied for an increase in fares due to the threepence a gallon rise in the cost of petrol. Buses averaged about nine miles per gallon. But there was no doubt the number of bus services now running were not justified. Before the Road Traffic Act of 1931 there had been a feverish rush of bus owners on to the road. Services were put in which did not pay, except by causing the extinction of rival operators. 32 10 28

1932 10 28

A Baroness complained that without buses it was impossible for people in Storey's Way to keep cooks – they are elderly people and cannot ride bicycles. Many households had reduced the number of servants. She herself had been obliged to give up her car and lower her expenditure considerably, consequently she was an ardent bus-rider. Lady Hope of Herschel Road said the buses ran irregularly and never in connection with one to the railway station. But very few Grange Road residents used them and some would even object to a service. 32 10 28d

1933

Varsity sell out to Eastern Counties [RH]

1933 01 17

The owner of Reliance Motors, Cottenham, sued Eastern Counties Omnibus Company for damages. They alleged he'd run two hackney carriage licensed cars between Cottenham and

Midsummer Fair, picking up and putting down passengers en route. To use private cars or taxis as motor coaches was misconduct of a very bad kind. He had four motor buses and two taxicabs which he'd used that day for private hire, charging four shillings return. He produced his order book – written on blotting paper – as proof. 33 01 17 & 17a

“Undergraduate Roadways” want route to Skegness – 33 03 16 [1.13]

1933 07 18

Two Cambridge bus drivers had their lives saved by the use of new equipment acquired by the Borough Ambulance. D.G. Boyd & R.A. Doe became overcome by exhaust fumes after doing duty on the starting gang at the Hills Road garage and were removed to hospital. Boyd was revived from a state of unconsciousness through the use of the Novox resuscitation apparatus and Doe also benefited by the oxygen mixture. A conductor was also slightly affected by fumes, but quickly recovered 33 07 18

1934

International Progressive Coaches started [RH]

1934 03 12

Who is the author of a manifesto issued at the Eastern Counties' Cambridge garage? Headed “The Cambridge Busmen” it alleges victimisation in the dismissal of George Proctor, secretary of the Busmen's Union. He has been made redundant after working as a turner for 12 years. The reasons for this are clear: our resistance to future wage cuts must be broken by getting rid of the man who has done most to build it up. If we let the Company get away with this they will get worse and worse, it claims 34 03 12

1934

Paddy Harris started Progressive Coaches in 1934 with one 28-seater Daimler coach and one hire car. By purchasing second-hand vehicles he built up a fleet of 16 and during the war ran them for the benefit of farmers who needed transport for the German prisoners-of-war who worked for them. In 1942 he bought Camtax, his greatest competitor, then Harvey's Coaches. Now nine new coaches have been bought. They have provision for small tables and the roofs have transparent panels so as to give the impression of riding inside a glass bubble. 59 04 02a

1934 10 04

Sir – since the Eastern Counties Company bought the Cambridge bus service the wages of conductors have started at nine pence and drivers ten pence per hour. Recently pressures have increased as buses are larger than formerly and faster times demanded from drivers. But now the Company have announced restrictions of the overtime which many of the men have always worked since they are buying homes. It does not seem right that more arduous service is rewarded by lower wages – R. Pascal, Cambridge. 34 10 04

1935

Premier Travel Services Ltd begins ("started 1936 with 6 buses- 2 undergraduate each provided £5 as capital; 'Undergraduate Roadways' with trips to Skegness 61 04 21 [9.7] [S.26]

1935 01 23

busmen's dispute with Eastern Counties – 35 01 23b

1936 12 10

Thick fog invaded Romsey Town hours before it reached Huntingdon Road. Once it settled it did so in earnest and visibility was practically nil. Buses were reduced to trailing through the streets on the heels of the conductors and even they could not see their way properly: one stopped himself just in time from leading a No.106 into the pit on Newmarket Road. Where conditions were not quite so bad drivers 'convoyed' and as many as six buses were seen in single file. One conductor walked from Cambridge to Ely, leading his bus – and did the journey in 4½ hours 36 12 10a

1937 02 23

New-constructed bus turning point Newnham route, Barton Rd – 32 02 23d

1937 03 24

When the Salvation Army first came to Cambridge Ellis Merry gave them what was then his wash-house in which to hold their meetings. He was one of the early sergeant-majors and associated himself with their work in the villages, using a concertina and violin to good effect. He was the first to run a penny bus, from Mill Road into town and also did the horse mail work. Until his retirement Mr Merry carried on the business of undertaker. 37 03 24c

1937 04 24

Hundreds of Cambridge people had to walk to work and home again, or to find lunch in the town, because the bus stoppage at the Eastern Counties Omnibus Company's depot was complete. Not a single bus left and two which arrived from March and Peterborough were met by pickets and not allowed to leave. There was no violence, but men surrounded one bus which attempted to leave on the Chesterton-Station service. No other efforts to take out buses were made. Premier Travel services are not affected. Meanwhile Herbert Robinson have taken delivery of 500 Raleigh bicycles. CDN issues stickers for car drivers willing to take passengers 37 04 24 & a. & c

1937 05 11

It came as something of a surprise to most Cambridge people to find buses on the streets again after a strike of 17 days. When the Eastern Counties Omnibus garage doors opened on Hills Road pedestrians and even motorists stopped to see what would happen. Then drivers and conductors appeared in uniform. Managers say the men have returned to work unconditionally and there would be no victimisation; every man would be reinstated except those who had caused wilful damage to buses. 37 05 11

1938 03 21

Eastern Counties Omnibus Company complained of difficulties manoeuvring their buses at the Drummer Street terminus. They suggested the Corporation reduce the width of the footpath. The Borough Surveyor disagreed. He suggested that the space reserved for the parking of cars should be reduced by 54 feet from the high kerb against the coffee stall. But the Watch Committee decided that the time was now approaching when Eastern Counties should cease to use Drummer Street and consider the provision elsewhere of their own bus station 38 03 21a

1938 03 25

Drummer Street park was made for private cars, and now they seemed to be letting the Bus Company monopolise it; they should find a parking place of their own, a councillor urged. But Ald Starr said it was opened not for private cars but for the benefit of the working men and women who came into Cambridge by bus. Now it was used as a car park by professional and business people who left their vehicles there all morning and afternoon. Coun Stubbs said they were at their wits' end to know what to do with the traffic. It was easy to talk about telling the Bus Company to find a new park, but where could they go? 38 03 25a

The naming ceremony of “The county of Cambridgeshire”, a new kind of luxury double-deck vehicle owned by Premier Travel Ltd was performed by the chairman of the County Council. Tearing an adhesive strip off the small nameplate Ald Frost wished good luck to everyone who drives it. Afterwards he and other guests went for a ride in the coach. It's smooth running, luxury seating and smart appearance drew favourable comment. An unusual safety feature is the fitting of a pneumatic door normally opened by the driver. The coach will carry 53 passengers on its two decks. It is designed for long-distance travel and will be used to carry private parties c50 04 18 [2.5]

1952 02 18

The first man to drive a bus from Cambridge station to Chesterton has died at Peterborough. He was Mr T. Aldham who had been employed by the old Ortona Company where he rose from the ranks to be a senior driver and subsequently traffic foreman. Shortly after the Eastern Counties Company took over in 1932 he transferred to Peterborough. At the funeral Mr A. Darby

represented Mr J.B. Walford, the original owner of Ortona and there were several of his old colleagues including Messrs R. Peat, A. January, W. Harding and H. Bullock CDN c 18.2.1952

1952 11 13

In swerving to avoid a dog in the road a 101 bus being driven along Green End Road, Cambridge on Sunday morning crashed into a house. The conductress, E. Chalker, who was taking an 11-year-old girl passenger's fare, was slightly injured. The girl, Marilyn Hall, was also injured when she was shot forward almost into the house. As she was being lifted into the ambulance Marilyn asked her mother "Can we have our fares back now? We didn't go anywhere". c 52 11 13

A travel-worn motor coach came to rest on Market Hill, Cambridge, after a 3,000-mile, seven week "Go to Clacton" tour of the Midlands. And Mr E.A. Lainson, Managing Director of Premier Travel Ltd hopes it will bring him £6,000 worth of business this summer. The 35-seater is no ordinary vehicle for the passengers cannot see through the windows. But as a mobile cinema it has taken the golden sands and sunshine of Clacton to hundreds of housewives and factory workers in industrial towns and cities far away from the sea, showing an eight-minute colour film 'Back to the Sun' c53 02 20

1953 07 15

Building operations are in progress to modernise the garages at the Hills Road depot of the Eastern Counties Omnibus Company and give appreciable increase in accommodation. A modern canteen and new offices and cycle racks are to be constructed. With commendable optimism, the Company are demolishing a bomb shelter which was installed during the war. Luckily it was never put to the test, but workmen are finding it a difficult assignment – an indication of the strength and protection it would have afforded. At present only one third of the garage space can be used. Buses which are now without a home are being parked in railway sidings nearby. c53 07 15 [2.11]

1953 11 14

Premier Travel and Percival Motors have applied to combine their express carriage services from Cambridge to Oxford. They have been competing on the route since 1951. During term time there was mostly University traffic and in summer a great deal of tourists. The University World Service, said the new service would be of great convenience to students from abroad, many of whom toured England after coming to Cambridge to study. The Eastern Counties, Associated Motorways and United Counties bus companies and the City of Oxford Motor Services opposed the application as did the Railway Executive who said the bulk of the Cambridge-Oxford traffic was moving by rail via Bletchley. c53 11 14

1954

only major items not approved in County Development Plan are site of bus station between Christ's college & Emmanuel

1954 02 26

The death of Mr John Berry Walford, founder of the Ortona Motor Company has recalled memories. He bought up the old Cambridge Motor Omnibus Company; its double-deck vehicles had swept down lamp-posts, been involved in several accidents and were continually breaking down. The Ortona service started in August 1907 with four single-deck buses, but ran at a

considerable loss because passengers felt safer in the old horse trams. When the First World War broke out a number of bus chassis were commandeered, the bodies were stored and later re-mounted on other chassis. In 1936 they became part of the Eastern Counties Omnibus Co. c54 02 26

1955 07 28

Patrick Conway told magistrates he was driving a bus on Newmarket Road, intending to turn right. He gave a hand signal and pulled into the centre of the road. A car behind began to overtake forcing a motorcyclist to swerve. The motorist said he thought the bus had stopped for passengers. Conductors in Cambridge buses should give hand signals from the rear of the bus to supplement those of the driver, as they did in London. 55 07 28

1980 03 13

Angry reaction to bus station plan [7.1]

1980 07 02

A former Burwell and District double-decker bus which was saved from the scrapyard near Lincoln has arrived back in the village. The Daimler Fleetline was driven the 120 miles by two former Burwell and District drivers, Jim Neale and Brian Camps. The bus ran faultlessly on the long journey home. Enthusiasts hope to restore it to its former glory so that it can be used for charity work. 80 07 02a

1981 05 15

Cambridge ecologists say a bus which can run on railway lines is the solution to transport problems in local villages. They plan to borrow a prototype and run it from the city centre to Huntingdon, using British Rail's tracks. It would stop at Mill Road, Chesterton and North Arbury as well as the former stations en route to Swavesey. From this point the tracks have been removed but it would run along the trackbed to St Ives and the Hemingfords. 81 05 15a

1981 08 12

Eastern Counties is in the international travel business, advertising trips to France or Sweden. But they have no brochure so people have to queue to ask a clerk. This means the staff are so busy that they do not have time to answer the telephone: it can take hours to get through to find times of local buses 81 08 12

1981 09 15

A park-and-ride bus service linking shops in the Burleigh Street area with the car park in Cherry Hinton Road has started disastrously. Nobody used the service for several hours. It is being funded with £400 from city lottery profits with Kite traders adding another £100. But councillors say the money should have been earmarked for charity 81 09 15a

1982 07 08

Chaotic Drummer Street is a nightmare for passengers and bus drivers during the busy rush hours. Nobody knows where their buses are and if you go to the information offices the queues are so long that by the time you get to the desk the bus will have gone anyway. Premier Travel driver Hedley Hammond said he was five minutes late already and couldn't get round to his bay. Dismal and dilapidated the worn-out bus station just can't cope with the traffic of the 1980s. 82 07 08a & b

1982 08 27

City councillors want a full-scale transport complex to give quick interchange for rail and bus passengers on long distance and local services to be sited at the railway station. There is plenty of parking with toilet and refreshment facilities already on hand. The County Council's controversial plans to spend £400,000 on rebuilding Drummer Street bus station would still leave it a cramped site with poor access. 82 08 27

Premier Travel history – 86 01 07b & c

1986 06 27

A new minibus shuttle service has been launched using 16-seater converted Transits running from the Railway Station to Chesterton. It stops at normal bus stops but can be hailed like a taxi between the Fen Estate, the Golden Hind and the Yorkshire Grey pub. The accent is on a fast, frequent, comfortable service and smoking in the nine new vehicles is banned. By increasing frequency the service becomes more convenient and more likely to attract customers, Cambus claim. A second minishuttle from Coldham's Lane to Teversham Drift may start later 86 06 27

1986 12 08

Cambus bought out by Management Team 1986 [5.7]

1987 12 01

Cambus has bought the entire coach operation of arch rivals Premier Travel. Premier, founded in 1936 has dominated the Cambridge travel scene in recent years and is expecting record profits. It has a fleet of 75 coaches based in Kings Hedges Road and all 129 employees in the coach division will become employees of Cambus. Earlier this year the two companies started a joint venture involving a travel centre at Drummer Street bus station. 87 12 01

1988 01 02

Premier Travel, one of Cambridge's biggest coach firms, has been bought out by its management after an earlier deal with Cambus fell through. Its founder, Arthur Lainson is delighted the company will be retaining its identity. Premier Travel, founded in 1936, has dominated the local travel scene with a fleet of 75 coaches based in King's Hedges Road. The travel part of the

business, which includes 14 travel agencies across East Anglia, is to be sold off separately. 88 01 02

1988 12 28

Foxton based Millers Coaches is taking over several major routes in Cambridge following revised legislation relating to bus services. The biggest impact on travellers has been the introduction of the popular 'Noddy Bus' with its low floors and wide doors making it popular with pensioners and young mums with children and pushchairs. Soon they will take delivery of a fleet of Leyland Lynx buses which each carry 51 passengers. 88 12 28c

145.19

c.26.47 : taxis & hansom cabs

1888 cabmens defence fund set up to pay fines incurred when summonsed for 'loitering about streets' - claim insufficient space on cab ranks [26.4.1.4]

1898 Cambridge town council was requested to consider permitting a cabmen's shelter to be placed on the Market Hill. Mr Darwin said that he received a petition asking for the provision of some place for them to warm themselves during the cold months in some central position in the town. At present there was only one cabmen's shelter in the town and that was very widely used. If they provided another the public would gain some advantage because the cabmen, instead of going to the public houses, as they now did, would go to the shelter. The only possible harm it would do was that perhaps it would make the neighbouring public houses sell less beer c1898 05 22

1903 cabmen find good business transporting people who want to see murderer conveyed from Cambridge gaol to the railway station en route to trial at Saffron Walden [26.4.1.3]

1904 A Cambridge cab proprietor was summonsed for not keeping his cab in a proper condition. A policeman said he found the near side window completely smashed, and the front seat saturated with water. He moved the cushion and found it was mouldy underneath so that it must have been in that condition for some time. The side panel had come away from the body and when it was washed water ran on to the cushions. Defendant said that the driver was responsible for the cleanliness of the cab but magistrates said he should know the state of his vehicles and fined him five shillings .c04 02 24

1904 An additional cabman's shelter was opened on the ground floor of Cambridge Guildhall in a room formerly used as a temporary police office. There is a stove where for a small payment a man will warm food brought by the cabmen and will also sell tea, coffee and light refreshments. It is comfortably furnished, a few pictures as well as flowers being among the adornments. All cabmen will welcome the shelter where they can dry their clothes in wet weather 04 10 18

1906 One evening the boots at the Castle Hotel, Cambridge, beckoned a cab from the nearby rank and a lady and gentleman in evening dress stepped in. 'The New Theatre' said the gentleman and the cabby quickly crossed the road to the theatre opposite. One shilling was tendered as the fare but the cabby demanded the full amount of 1s 6d. His actions over such a remarkably short drive were sharply criticised but it is only fair to remember that he lost his position on the rank. 06 06 01b

1907 Trinity Hall undergraduates have subscribed £6 3s. towards the fund for repairing the damage done to Mr Glasscock's cab on the night of the visit of Kier Hardy to Cambridge. It was smashed beyond repair but as vehicle was not covered by the Riot Damages Act he had no compensation for the loss sustained. At the commencement of term the News published the facts, calling the attention of undergraduates to the heavy loss they had caused and inviting them to put the matter right. 07 05 03

1908 introduction of motor taxis approved, 10 licences granted, become familiar sight [26.48.1.14]

1908 to meet the competition horse cab men work on Sundays, something not done before [4.9]

1908 Cambridge Watch Committee inspected a motorcab, one of twenty which a London firm wish to place for hire upon the Cambridge streets. It was a luxurious vehicle of the brougham class built to accommodate four passengers. It is proposed to put the cars on hire on the taximeter principal, the fares being threepence per quarter mile. We understand the cabmen will present a petition against the granting of the application 08 03 30

1908 Cambridge cabmen opposed plans for 20 motor cabs to be licenced: "Our living is a very precarious one. Most of us are married men with large families and it is as much as we can do to make ends meet as it is. It would mean semi-starvation for some families and ruination for the rest. Some have put all our savings into buying a horse and cab of our own. Motor cabs are unnecessary and would be a constant source of street accidents", they told magistrates 08 04 06a

1908 The Ortona Motorbus Company, inaugurated a year ago, now possesses five double-deckers, a char-a-banc and a big 'bus'. They have two services from the railway station, one to De Freville and the other to Huntingdon Road. At the well-equipped garage on Hills Road there is always one car that can be despatched the instant a breakdown is reported and even replacing a broken axle can be carried out by their own mechanics. Now country people who used to disfavour these 'machinations of the evil one' patronise them with perfect confidence. CWN 08 08 22 p5

1908 Smart taxi-cabs will soon be plying for hire in the streets of Cambridge. The Watch Committee have decided to licence ten vehicles of the Provincial Motor Cab Company and as soon as staff, garage and other matters have been arranged the local cabmen will have to face this formidable form of competition, although ten taxies cannot monopolise all the trade CWN 08 10 09

1908 Cambridge cabmen protested against the decision to licence ten motor taxi-cabs. Ellis Merry said that for weeks the cabmen had not averaged two fares a day and many were on duty 18 hours a day to get a living. If they ousted the hansoms from the streets what would they do during the busy times: when the undergraduates came up it took at least 100 men and cabs to

accommodate the railway company but at ordinary times six taxi-cabs could do the work required. CWN 08 10 16 p3

1908 It would be wrong to license motor taxis in Cambridge, councillor Wootten said. There were 120 hansom cabmen, probably married and with families who owned the cabs they drove and had spent money on renovating them. There were 500 people who were getting a livelihood out of the cabs including those supplying harness and fodder for the horses. It is just like other things in England, inviting foreigners to come in and make as much unemployment as they can CWN 08 10 23

1908 Councillors were told that they had no power to prevent anyone coming to Cambridge and running motor taxi-cabs, though they could refuse to licence them plying for hire or using the cab ranks. They could have a garage, be on the telephone and receive orders to drive people in their taxis, just as the hansom cab proprietors did. If they were to come it was better that they be licensed. They would create a new, long-distance trade as ordinary street traffic would not pay them. CWN 08 10 23

1908 William Cooking, Manager of the Taxi-meter Cab Company of Cambridge was summonsed for driving a taxi-cab at the dangerous speed of 23 miles an hour in Trumpington. He was liable to a penalty of £20 and to have his licence suspended but magistrates only fined him £3. They were determined to put down fast driving through the villages. CWN 08 11 13 p3

1908 A singular accident in which a taximeter cab played a singular part occurred in Peas Hill. The lamp of taxi cab number 214, driven by a man named Darby, caught the awning connecting a couple of stalls and there was a general upset. The stall of Mr Reynolds was practically demolished and the sweets strewn about with the result that a number of boys had a scramble and pocketed as much as they could. The adjoining drapery stall of Mr Nicholls fared better. The affair caused a great deal of commotion CWN 08 11 13

1909 are 213 licensed cabs but only 150 spaces on ranks; average number for hire is 50 during vacation, 70 term time [1.5]

1909 taxi driver fined £2 for driving at dangerous speed - 10 to 12mph [16]

1909 Col. Caldwell, Master of Corpus Christ College, was being driven in a taxi cab back from Milton when owing to the density of the fog, the driver, Charles Glasscock, made a miscalculation where the railway divides from the main road and ran his cab into a stout post. The Master was thrown violently forward and sustained cuts on his face, the driver was taken to hospital. The taxi, the forepart of which was damaged, was towed back during the night. CWN 09 01 29

1909 Hansom cabs now much more luxurious with rubber tyres, cabbies wear Top Hats; one has circus horse that sits on haunches & 'thank' for tips[1.6]

1910 A cab man blamed his failure on the change from horse cabs to taxi cabs. He had started as a cab proprietor in January 1905, paying £118 for the cab, horse and harness. He paid his way until after the taxi-cabs came to Cambridge and then became a taxi driver. But he lost that position when his employer gave up the business. He had sold his horse, harness and cab at a considerable loss and now had nothing but a small quantity of furniture which was not enough to meet the landlord's claim. 10 07 29a

1911 A Cambridge man, Mr H.P. Allin, has recently invented a novel and ingenious indicator for taxicabs. Hitherto it has been difficult at night to ascertain whether an approaching taxi is engaged or not. His device consists of a metal case in the front of which is fixed a glass panel bearing the words 'For Hire' and illuminated from behind with a suitable artificial light. A hinged flap is connected by rods to the flag of the meter. On the cab being hired, and the flag lowered, the flap falls and hides the sign. 12 02 16b

1912 Walter Mansfield (“Lame Walter”), best known of Cambridge cabmen, cab fails to pass inspection, friends open subscription to buy a new landau [4.8]

1913 Four Cabmen were summonsed for taking their cabs on to the Senate House rank when it was already fully occupied and leaving their horses and cabs unattended. Pc Pettitt said there were four unattended cabs standing two abreast facing the reverse way to the other five waiting for business. The rank was authorised for two cabs during the week and three extra on Saturday because the Market Hill rank could not be used then. One man said he’d gone to the lavatory on Market Hill and had asked others to look after his horse. More had been to the coffee shop or had gone to breakfast. They must obey the byelaws. 13 03 14 p8 CIP

1914 National Union of Vehicular Workers trade union meeting on Parker’s Piece heard many workers were underpaid and underfed. When taxis came to Cambridge the old cab-drivers should have been given the chance of learning the new trade. Instead the taxis were the property of private firms 14 07 24

1917 death of Phil Stocker cabman with slowest horse - had specialised at night, his ancient four-wheeler meeting late trains; now only ‘Lame Walter’ left [6.6]

1920 ‘Chariot of fire’ rag –cab soaked in petrol – Ch 20 11 17e, f

1925 “I cannot go out the backway or the front door without she throws some insult at me. I cannot knock a nail into the wall, she threw two pails of water over the taxi-sidecar that was standing in the road, and if a taxi is left there she goes for a policeman”, said Mrs Ellis Riseley of Russell Street, Cambridge, the wife of a taxi-sidecar owner in enumerating some of the failings of her neighbour. In reply the neighbour said they kept a couple of taxi-sidecars outside the house from early morning until late at night, she was simply throwing a pail of water over the pavement for the sake of cleanliness because of all the oil and petrol which came from the taxi c25 06 12

1926 motor-cycle taxis introduced carrying 2 passengers & a little luggage [26.48.4.7]

1927 Trojan motor taxis start, quickly oust motor-cycles[26.48.4.7]

1932 hansoms gone a long time ago but are still 2 4-wheelers on stands, driven by George Jolley & Arthur Carter [26.4.1.1]

1933 Sidney Wisbey, a hackney carriage taxi proprietor from Wellington Passage, told the court he started driving in 1908. He had bought an old Buick, VR 6151, because he wanted to use the chassis and had made one car out of two. He altered the body from a box van to a saloon and changed the colour to blue. He tried it out but the engine was no good so he put it back in the garage. 33 02 23

1934 George Gault of Blossom Street has been a horse and motor cab driver in Cambridge for 41 years – 18 years of taxi work and the remainder with a horse cab. During the past 18 years he has had two Ford cars – 16 years with one. He is a familiar figure on the rank at Hyde Park Corner and has carried many undergraduates who are now far across the seas. Now in his 63rd year he is a total abstainer and non-smoker 34 01 11

1938 ‘Luxicabs’, an entirely new fleet of taxis has begun operation in Cambridge, providing a handy and economical alternative to a private hire for driving to dances, shopping or trips into the country. Long or short journeys will cost eightpence per mile (about £1.80 at today’s prices). Luxicabs are saloons of the latest type, notable for their modern, streamlined bodywork, luxurious

riding comfort and swift, silent performance. They will be in the charge of courteous chauffeurs and the taximeters will be concealed from the outside public. In view of the difficulties of parking private cars such an attractive service will meet a wide need 38 03 25b

1939 Camtax one year old today – 39 02 14b

1947 Cambridge the first town in England with radio-controlled hire cars [26.48.3.7]

1947 United Taxis started end WWII [9.3]

1948 Sixty-four years service as a cab driver is a fact of which 79-year-old Mr George Clark of Gloucester Terrace, Cambridge, can be justly proud. It was one day in 1884 when the young George, at the age of 15 first drove a cab for his father. Finding he liked the occupation he continued with it and has driven for one firm, Easy's for the past 44 years. In his younger days he lived in that gay period at the end of the last century when there was no such thing a mechanised vehicles and the cabs were the old four-wheel horse-drawn type and there were only ten or eleven "cabbies" altogether. The only time he was not driving a hansom or a taxi was during the South African War and the 1914-18 war c23 10 07

1951 Two hundred London taxis took the road this morning under orders for the first time, over a short wave radio network system pioneered by Pye Radio technicians from Cambridge. In London, at a big party attended by top stage and screen stars to celebrate the inauguration of this new radiocab service was Mr Harry Woolgar, a director of Pye Telecommunications Ltd. He said: "This is the largest radio-telephone system taxi network in Europe and we are planning a larger system capable of directing 1,000 taxis". Pye got the job because it pioneered fitting radio telephones to police cars and ambulances and was the first to use short-wave radio for agricultural use c51 07 30

1952 Camtax, first to be radio-controlled, goes into voluntary liquidation; Camtax (1953) formed; followed amalgamation Airflow Taxis & Newnham Car Hire Service which first became A& N cabs [9.4] [26.48.5.18]

1968 taxi licence plates sell for over £1,000, by 1974 £3,000 [9.1,9.2]

1968 Walter Easy drives Cambridge taxis for 50 years; was provincial car company in 190 which started at old tram depot in East Road; father one of first to have motor transport – T-model Ford, later motor-cycle taxis – details – 68 12 09

1970 Taxis running on propane gas with United Taxis private gas tanks in Hills Road – 70 10 07a

1972 ABC Taxis of Cambridge, have taken over one of their biggest rivals, United Taxis Ltd, and now run one of the largest fleets of hire cars in the area. United were in the news two years ago when they decided to run all their cabs on petroleum gas which, they claimed, gave a considerable cost saving in spite of expensive conversions to the engines c72 05 26

1982 Two of Cambridge's best-known taxi firms are now under the same ownership. The Harris family, which owns the Camtax car-hire firm, has bought control of United Taxis from its owner, John Phillips for a 'considerable' sum. The deal, one of the best-kept Cambridge business secrets for years, came as a surprise to other operators in the competitive taxi and car-hire business. 82 03 12a

1986 fury over daytime ban taxis [9.6]

1988 Camtax revolutionised the Cambridge taxi service with the introduction of a 24-hour telephone link to their headquarters in 1938 and in 1947 they were granted the country's number one licence to operate radio-controlled cars, following experimental work with Pye. At first there were only 15 vehicles, all painted Cambridge blue with smartly-uniformed drivers. Now it has a fleet of 65 cars transporting 3,000 people every day. 88 03 25a

Regulations about carrying red flags in front of cars abolished [1.1]

1897

Hon C.S. Rolls brings first motor car to Cambridge, a 4-seater single cylinder Peugeot; supposed to have man with red flag but Charles would make 8-hour dash to London; after abolition of Red Flag Act Charles imported 2¼ h.p. De Dion tricycle with French mechanic, unfortunately dropped cylinder head & broke it; Charles had made acquaintance of Mt King & Mr Harper who specialised in making bicycles to order who repaired it. On test drive Mr King ended up driving. Built their own King motor cycle, exhibited 1902 Crystal Palace Motor show & awarded only gold medal for best motor tricycle of English manufacture fitted with a foreign engine 60 03 28 [15]

1898

in 1898 Rolls drove motorcycle inside Corn Exchange, King & Harper among spectators, had small cycle repair shop Sussex St; was De Dion tricycle with coach-built trailer attached. [11.1]

1899 04 01

An outcome of the exhibition of motors at the Corn Exchange is a new company under the title of the Cambridge and Eastern Counties Auto Mobile Company. The first instalment of the new vehicles have already arrived and they can be booked for parties. They are driven by the Daimler motors, and are in charge of qualified drivers from the manufactory - 1899 04 01

1900 09 03

The first summonses under the new Cambridge Bye-laws with regard to the lighting of vehicles were of sufficient number to make an effective demonstration in favour of the new order of things. The police court was more crowded than it has been for many a day and of the 38 people who were called upon to appear none had been in that predicament before. The Chief Constable advised magistrates that as the new bye-laws were not generally known the defendants should be dismissed with a caution. Of course this leniency will not be repeated but they have secured, free of cost, a capital advertisement for the new bye-law c00 09 03

In 1902 Crystal Palace exhibition King & Harper awarded Gold Medal...

1902 02 25

The Cycle and Motor Show at the Cambridge Corn Exchange has undoubtedly “caught on”; those who do not cycle are a steadily decreasing minority, while motorists are daily increasing in number. Messrs Macintosh are exhibiting a Sunbeam Mabley Motor Car which is a very handsome-looking vehicle with several distinctive features. The riders are in a position to face each other, although occupying different ends of the motor. The car is not of extraordinary width and can be manipulated with the greatest ease; a small exhibition run was made even on the limited floor space of the now-crowded Corn Exchange CDN 1902 02 25

1903 03 05

Joshua Taylor are making a special show of all kinds of leather and rubber motor clothing for drivers of cars and cycles. The exhibit includes the latest styles of long-thigh motor leggings, leather & tweed motor caps, gauntlet gloves, wind cuffs and foot muffs. They also specialise in mechanics' clothing including waterproof, wooden-soled clogs for washing down cars. – Advert c03 03 05

1903 09 30

Coun Morley said the Cambridge Borough Surveyor had met with an accident when driving in the Corporation trap. It was time they should come more up to date and go in for a motor. (Laughter). The Corporation had laughed at this before – they generally did at any matter that was up to date. It was said that motors were not reliable but he had one that had travelled 3,000 miles in six months and never had a breakdown. Motor traction cost considerably less than a pony and trap - £20 a year including petrol and everything else. He proposed that they buy a motor tandem tricycle which would cost £75. c03 09 30

1904

Mr King won Motor Cycling Club competition for Albert Brown -Trophy on an all-British 'King' machine. 2nd car to reach Cambridge belonged to Dr Arthur Cooke & third to Prof Inglis

1904 01 16

Some London people having an artistic sense come to Cambridge for identification marks for motor cars. Under the new Act motor cars may be registered in any county; each has one or more letters of the alphabet allotted to it and underneath are printed the number of the car. London has but one letter, 'A', and as the registered cars there already number over a thousand the one letter perched over four numbers looks awkward. Cambridgeshire is endowed with two letters 'C.E.' and has presently only two numerals beneath, making a nicely-balanced identification mark. But the demand may not continue as the number of motor cars, as well as of drivers in this county, rapidly approaches the hundred. c04 01 16 [7.4]

1904 04 22

Cambridge Paving Committee received a memorial from a number of residents in the Hobson Street area calling attention to the present state of the carriage-way. They directed the Surveyor to report the cost of paving the street with wood blocks, together with the portion of St Andrew's Street from the tramway terminus. But Hobson Street was used by very few people; traffic was not half what it used to be and as the trams were likely to be electrified it would be better to wait. However a great amount of traffic came from Newmarket Road to the centre of town down King Street; very often there was a great block of traffic in Sussex Street because it was dangerous to go down Hobson Street where the pebbles were very uneven. Traffic went on dropping, and business went on dropping, simply because the street was so badly paved. c04 04 22

1904 06 25

"A few years ago the problem was bikes, now the real terror is the motor car & motor bike scorching by at 30-40 mph [8.5]

1904 09 10

Number of cars increasing, 30 motorcycles, 27 cars licensed up to January, 113 & 42 by April; are 202 licensed drivers [8.6]

1905 03 11

The Hon C.S. Rolls lectured on 'The History of the Motor Car' to the University Engineering Society. He told them he owned the first motor car ever seen in Cambridge and frequently got

into trouble through getting back late at night after a breakdown, but he squared numerous Dons by taken them out in the car. Many of these runs ended in pushing the car home with the assistance of his venerable passengers. 05 03 11a-c

1905 05 20

It is doubtful if any town the size of Cambridge has as many motors and motor-cycles running about the streets as are to be seen in term time. All day long the 'pouf-pouf' of panting engines is to be heard in our streets and we are becoming quite accustomed to having an undergraduate motorist fly by within a foot on one's elbows. Some are expert drivers, some are not, but there is no class determined to get more pace out of his machine. Numerous small accidents occur; within a week a couple of motor-cyclists smashed into a couple of cows. 05 05 20b [8.8]

1905 07 14

"Sir – the motor-car has come to stay, and some day everyone will wonder how people could ever have done without it. The dust nuisance is very serious, but this will soon come off the road, the noise is objectionable and so is the smell but they are not unbearable. But the terror is the sight of an approaching car coming at the rate of 30 or 40 miles an hour. Recently an increasing number of cars have been taking the road between Cambridge and St Neots. Near the village of Croxton there are two cross roads and several cottages and the village school stand on the high road. Past these the motors dash by at such a furious rate that the numbers at the back cannot be read. There would certainly be much rejoicing if the police 'happened' on one of these offending cars as it was racing past the school" 05 07 14

1905 08 05

Jesse Boot chauffeurs speed trap – 05 08 05a

1905 09 09

The absurdity of the system by which the Government issues licences to drivers of motor cars has again been illustrated. Last year a licence was secured for a blind man, now Hertfordshire County Council has issued one to an inmate of Leavesden Asylum. A driving licence should be a certificate of competence to undertake certain duties or what use is it? 05 09 09b

1905 09 23

The Motor Car Act of 1903 lays down that a horse rider can indicate to a motorist that he must stop. A driver told Buntingford magistrates that saw the signal but his single brake would not act as he was going down a fairly steep hill and he could not stop until he reached the bottom. He did his best to avoid the horse but it was a timid animal ridden by a boy and it swerved into his car sustaining injury. He was fined. The law says a motorist must be prepared to stop and the defects of his brake will not excuse him 05 09 23b

1905 09 30

Buntingford magistrates, after inflicting a number of fines on too-speedy motorists, now admit that milestones are not legal evidence of distance. They cannot be sure that they are accurate to within a quarter-of-a-mile. Police should employ a professional land surveyor to measure the distance and give evidence on oath on each charge, which will add tremendously to the cost of prosecution. If this ruling is upheld it will have an impact far beyond the motor-driving world as county surveyors use them to calculate road maintenance costs. 05 09 30a

1906 06 14

The junction of Castle Street and Northampton Street, Cambridge, was continually congested and the corner ought to be improved. The council wanted to demolish a cottage and widen the road,

but the owner wanted £260 for a property that a few years ago was worth £120: that was too great an increase 06 06 14a-c

1906 06 16

H.R. Pope beats C.S. Rolls' motor car record for trip from Monte Carlo to London – 06 06 16c

1906 07 28

A Cambridgeshire Automobile Club was formed at a meeting of motor car owners at the University Arms Hotel. It would discourage reckless and inconsiderate driving, which brought motoring into disrepute, organise social and sporting events such as hill climbs and gymkhanas and see that roads were properly looked after. It was decided to admit ladies as members. 06 07 28a

1906 09 08

Many residents have been plagued by the clouds of dust raised by motor cars and other traffic. Dust-destroying measures have usually involved evil-smelling solutions but now Cambridge is to experiment by pouring boiling tar over the surface of Hills Road and sprinkling it with granite chips. The section chosen where the wood paving ends near Brooklands Avenue, but it carries heavy traffic and is constantly watered so the new surface may peel off. 06 09 08c [8.11]

1906 11 22

The corporation steam roller was employed in Bradmore Street when there was a slight subsidence owing to the bursting of a water main near an old brick sewer. The heavy weight of the engine caused a further drop and one wheel became firmly embedded, the roller lying at a dangerous angle on its side. Means are being taken by council employees to remove it and their efforts are being watched with interest by a crowd of people 06 11 22b

1907 02 12

A Chinese undergraduate of St Catharine's college was summoned for driving a motor car in Jesus Lane at a furious rate. Frederick Siggers, a college porter, said he was wheeling a plate basket when the car passed within two feet of the wall on the wrong side of the road at 18 miles an hour. The student said it would be a wonderful car that could get up to that speed after a sharp corner. But he was convicted and his licence endorsed. 07 02 12

1907 05 22

Cambridge Union Society discussed the regulation of motor traffic. Motorists rushed about the country and to remedy the dust nuisance they should be taxed, the money being spent to improve the condition of the roads. There should also be a 'smell limit'. But village boys ran out, cap in hand after a car to get the sweet, sweet smell. Noise was the only guarantee of safety, yet some would like a car to steal along like a robber in the night. In France there were no speed limits and the percentage of accidents was smaller. 07 05 22b

1907 09 24

Cambridge Automobile Company applied for a licence to store 1,000 gallons of petroleum and 200 lbs of carbide of calcium on their premises in Hobson Street. The petrol would be stored in an underground chamber, brick-built and lined with concrete. The Inspector of Explosives is satisfied so the council will recommend approval. 07 09 24a

1908

Undergraduates forbidden to keep vehicles without permission [8.12]

1908 03 12

Cambridgeshire Motor-Cycle Club has been formed to organise club runs, hill climbs, speed judging and petrol consumption trials. It will also provide legal information and touring facilities. Officers include W. King, H.H. Harper, A.R. Marshall and Col. Harding of Madingley Hall. It is intended for motor-cycles – cycles and tri-cars, not car owners 08 03 12d

1908 03 30

Cambridge Watch Committee inspected a motorcab, one of twenty which a London firm wish to place for hire upon the Cambridge streets. It was a luxurious vehicle of the brougham class built to accommodate four passengers. It is proposed to put the cars on hire on the taximeter principal, the fares being threepence per quarter mile. We understand the cabmen will present a petition against the granting of the application 08 03 30

1908 04 06

Cambridge cabmen opposed plans for 20 motor cabs to be licenced: “Our living is a very precarious one. Most of us are married men with large families and it is as much as we can do to make ends meet as it is. It would mean semi-starvation for some families and ruination for the rest. Some have put all our savings into buying a horse and cab of our own. Motorcabs are unnecessary and would be a constant source of street accidents”, they told magistrates 08 04 06a

1908 10 09

Smart taxi-cabs will soon be plying for hire in the streets of Cambridge. The Watch Committee have decided to licence ten vehicles of the Provincial Motor Cab Company and as soon as staff, garage and other matters have been arranged the local cabmen will have to face this formidable form of competition, although ten taxis cannot monopolise all the trade CWN 08 10 09

1909

Taxi driver fined £2 for driving at dangerous speed - 10 to 12mph 60 08 02 [16]

1909

Marshall's founded [12.1]

1909 01 15

Albert Watts came to Cambridge as a shoeblack at Downing College where part of his duty was to clean undergraduates' bicycles. One possessed a motor cycle and he became smitten with the motor fever, mastered the mechanism and was allowed to take a ride upon it. When the first motor bus company was formed in Cambridge he forsook the college and ultimately became a driver. He subsequently secured a position in a London garage and then became a private chauffeur. Now his picture has appeared in an illustrated paper as the chauffeur who has attained notoriety in the Missing Lady Mystery 09 01 15

1909 01 29

Col. Caldwell, Master of Corpus Christ College, was being driven in a taxi cab back from Milton when owing to the density of the fog, the driver, Charles Glasscock, made a miscalculation where the railway divides from the main road and ran his cab into a stout post. The Master was thrown violently forward and sustained cuts on his face, the driver was taken to hospital. The taxi, the forepart of which was damaged, was towed back during the night. CWN 09 01 29

1909 09 03

The advent of the motor has thrown upon the highway authority the burden of maintaining roads at a much higher pitch of efficiency with the result that county rates have increased by leaps and

bounds. It is manifestly unfair that the average ratepayer should pay through the nose for the benefit of the wealthy motor car owner or that the motorist should defray the entire cost of improvements which benefit the whole community. Something must be done. Cycling for pleasure has become quite impossible for people of nervous temperament and even the pedestrian is attended by danger. Now the Government proposes new roads for the exclusive use of motorists to scorch along and the imposition of a ten mile an hour speed limit on the others.
CWN 09 09 03

1910

Bill Walton joined the staff of King and Harper at their Thompson's Lane garage in 1910. In his early days he was concerned with the extremely temperamental racing car 'Chitty-Bang-Bang II'. This powerful monster consisted mainly of an ex-Zeppelin airship engine mounted on a Mercedes chassis. Another of his charges was a 'Prince Henry' Metallurique which in 1912 was the fastest car ever seen in Cambridge. He once went to a customer's house to collect a car only to find it could only be moved in reverse. He drove it backwards to the Bridge Street garage through Saturday afternoon traffic. 60 09 01

1911

Motorists petition about notoriously bad egress from Silver Street into Trumpington St [1.16]

1911 06 09

The bursting of a motor tyre caused considerable consternation in Trumpington Street on Sunday morning. The car's tyres were filled with a kind of solution used to fill the tube instead of air which is supposed to increase the resiliency. Through being too tightly filled, or having expanded with the great heat of the sun, one burst and the solution was scattered far and wide with great force. The pavement was covered along the whole frontage of Peterhouse but most heart-breaking damage was the adhesion of the sticky reddish solution to ladies' dresses; ten were spoiled 11 06 09

Cambridge Automobile & Engineering Company, Sidney St action against George Dash, motor and garage proprietor, Jesus Lane for work done - 12 05 24b

1912 05 31

Cambridge police are dealing with the question of dangerous driving in the town. Our narrow and crowded streets are ill-fitted for fast traffic, yet motorists and motor-cyclists tear about them as though they were on a racing track. A speed that is safe on the open road may be dangerous in narrow streets. Indeed it is questionable whether any speed over eight miles an hour is ever safe in Cambridge. There have been several prosecutions this week, including that of a chauffeur fined for driving at 12mph who knocked over an old man who was crossing the road. Undergraduate motorists frequently career up and down the town with no apparent purpose than personal amusement. The University might do something to stop this nuisance 12 05 31c

1912 07 19

A motor mechanic told the Receiver he had taken the management of the University Automobile Club in Jesus Lane. Finding that the membership of the club was not large enough the garage had been given up by them and he opened it on his own four years ago. He had no money but some of the members of the club continued to use the garage and paid deposits. He had entered into partnership and paid the first instalment on a motor landaulette. But they'd had a row and he'd continued on his own. 12 07 19h

1920 01 28

Motoring Boom. The great revival which has occurred in British motoring is disclosed by the records of new members joining the Automobile Association. During the first week of the new year 1,015 new members were enrolled; the full significance of this figure will be realised when it will be remembered that during the winter motor vehicles are used less than at any other season of the year. During the first week of 1914, when motor vehicles were easily obtainable at a pre-war cost, and were considerably less expensive to run and maintain, new A.A. members numbered 288. The 1,015 motorists have joined in the corresponding week in 1920, when cars and motor cycles are realising abnormal prices, and are difficult to obtain, augurs well for the growth of motoring in Great Britain, especially when the vexed problems of "production" are solved 20 01 28 CIPof

Royal Show reveals how much motors are a part of life, people now go home rather than stay overnight in Cambridge [9.3]

1922 04 23

Every years sees an increase in the number of people killed and injured on the roads, and the proposed abolition of the speed limit for private cars will not lessen the dangers of the highways. Although the speed limit of 20 miles an hour is habitually disregarded, it has some effect as a check on reckless driving, which will disappear when the evidence of the stopwatch can be ignored. It is the hired driver who has to suffer the penalties, but not infrequently the real offender is the owner of the car sitting inside. The majority of road motor accidents are due to excessive speed and it will be purely a matter of opinion what is excessive speed - Table Talk CDN c 23.4.1922

1924

King & Harper garage built on open fields Hills Rd [446.13.5]

1924 04 27

The new showroom of Messrs Herbert Robinson Ltd, Regent Street, Cambridge was formally opened. There is room for the display of 15 cars at a time, and those at present on view include such well known makes as Vauxhall, Fiat, Hillman, Citroen, Daimler and Calthorpe, all of the latest type. Demonstration runs will be given, with no obligation to buy. They will take your present motor car in part exchange for a new one, and arrange deferred payments if you wish c24 04 27

1925 01 13

Petty Cury and Market Street, Cambridge, today commenced their career as one-way streets with the object of relieving congestion in these streets whose narrowness has ever been the subject of discussion. Petty Cury will only be used for vehicular traffic towards Market Hill. At present these regulations do not apply to bicycles. A policeman agreed that someone was bound to make a mistake – “It wouldn’t be Cambridge if they didn’t”, he said c25 01 13 [1.19, 1.20, 1.21]

1925 02 10

Cambridge University Senate agreed that no member of the University shall be allowed to keep or use a motor car unless he obtained a licence through his college. If any tradesman or keeper of motor garage shall let out any motor car or motor cycle for hire to any person in statu pupillari he shall be liable to be discommuned. Anyone who houses upon his premises a motor vehicle on behalf of a member of the University must furnish a written description to the Junior Proctor c25 02 10

1925 04 05

To celebrate the 25th anniversary of the well-known motor firm of King & Harper, nearly 200 people attended a reception and dance at the New Rendezvous. Mr King, the senior partner said: “In 1897 or 1898 I saw a motor for the first time. It was a De Dion tricycle brought from Paris by the Hon C.S. Rolls who was then up at college; he also brought a French mechanic to take care of it. He lent me his tricycle and mechanic and we drove it to Ely and back without a breakdown. This made me anxious to learn more about motors c25 04 05

1925 05 16

The minds of motoring undergraduates in the University are greatly perturbed over certain proposals which have been made for the total prohibition of motor vehicles by junior members. The proctors state that “a few undergraduates use their cars and motor cycles after dark to drive undesirable young women into the country and they consider it their duty to prevent them”. It is

ridiculous for them to walk the streets after dark chasing pedestrian undergraduates for having no caps whilst boisterous merry-markers rush by in cars c25 05 16

1925 06 10

Proctors debate prohibition of University motors, from next term Freshmen unable to use motor cars or motorbikes & forbid any undergraduate to use motors before 12.30 & after 10pm in May term, 8.30 others [4.9]

1925 06 29

A very important addition to the garage accommodation of Cambridge is the new depot just opened by the enterprising firm of Messrs King & Harper in Hills Road. It is situated just off the busy centre of the town so that people who are timid can drive up without much trouble and receive attention without being hustled by the police. King & Harper sell so many cars that it is quite impossible for them to give the service at Bridge Street to all the people who wish to come to them. In front of the garage is a petrol filling station from which four different kinds of petrol can be obtained at a moment's notice. Two large wash-downs have been provided which owner-drivers may use for the purpose of washing their cars c25 06 29

1925 07 06

The Ministry of Transport inquiry into the one-way vehicular traffic scheme in Petty Cury & Market Street, Cambridge, was held in the Guildhall. There was a very small attendance. Cambridge suffered, in common with other old towns, from the traffic problem. There had always been a great deal of traffic in these streets and the congestion was very serious. Both streets were used by motor buses. There were no objections but a great body of people wanted the regulation to cover bicycles as well as other vehicles 25 07 06 c

1925 10 19

During the last few days undergraduates have been busy taking out licences for motor cars and motor cycles under the new regulations made with a view to decreasing the traffic in our narrow streets. Undergraduates are not allowed to use any motor vehicle before 12.30 in the morning or after 8.30 at night. An amusing rumour is that proctors are to patrol the streets in a motor car, followed by 'bulldogs' on motor cycles, but there is no necessity for such 'flying squad' methods as garages are to report any undergraduate who has his car out during the prohibited period c25 10 19

1925 12 12

Council considers 10 mph limit [1.22]

Motorist told it 'irresponsible' to leave car parked for 25minutes [1.24]

1926

Opening of Coe Fen Road; Mayor & co arrived on bus, 'project of relieving Silver Street traffic & making better communication between Newnham & town started as long ago as 1904 (though report of opening Victoria Ave in 1889 records a plea for a bridge to carry traffic from Lensfield Road to Newnham). In 19223 plans approved, had been 9 different proposals, 'if not for urgency of the unemployment question we should be in the same position today only instead of 9 there would have been 19 scheme (built as 'employment job', 90 unemployed men had been found work on scheme). Public enquiry held Feb 1924, work started May 1924. Had been considerable opposition - 'ugly & spoil amenities of Coe Fen & Sheep's Green but this some monstrosity they had conjured up"

1927

Improvement at corner of New Square & Fair Street by demolition of house & rebuilding with rounded corner

1927 01 02

At the annual dinner of the Cambridge Motor Club Mr King said that 32 years ago there was only one motor car in Cambridge, the owner being the Hon C.S. Rolls, then a student at Trinity College. He had seen him riding in the car with a friend with another man walking in front with a red flag. The speed was two miles an hour in the town and four miles per hour in the country. He did not know what some of them would do if that regulation came in force again. c27 01 02

1927 01 31

Police motorcycle patrols report lorries which are slower now [1.27]

1927 03 02

Proposal to use New Square as parking place, CDN refuses to lead protest: "most people smile when they think of tremendous agitation worked up against Drummer Street ... nobody one penny the worse ... only fault is that Drummer Street not big enough hence need for New Square" [1.25]

1927 03 05

The chief engineering feature of regional planning will be a new ring road all around Cambridge about two miles from the centre of the town. One length would be a road running north and south joining the Hills Road with the Newmarket Road, a length of about three miles. Certain roads and bridges were contemplated to obtain an inner ring road around the central portion of the town. Mr C.H. Tebbitt said that what had been done haphazard in the villages was the joy of the countryside and he wondered what would have happened to these beauty spots if they had been regional planned. CDN c5.3.1927

1927 05 03

A demonstration of a new British invention which insures motorists against tyre trouble was given at Messrs Saints' garage, Newmarket Road, Cambridge. The Otomatic Service is a powder composed of particles of raw rubber and cork and flakes of mica which is inserted into the inner tube of a tyre through the valve hole with a small quantity of liquid formalin and water. When the tyre is inflated and the car put in motion a thin film is distributed inside the tread which automatically seals any puncture which may occur. In event of a burst the inner tubes will be repaired free of charge for 12 months, no matter how numerous the bursts, provided they are not over three inches in length. c27 05 03

1927 07 23

Council debate Huntingdon Road / Histon road junction [7.6]

1927 07 29

A remarkable demonstration of the new "Bibendum Comfort" tyres was given at "The Backs", Queen's Road, Cambridge. The test consisted of driving a car along the road at about 38 mph and bursting the inner tube of the back tyre by means of a special device. The car was driven to the same spot at about 30 mph with the tyre half deflated and then purposely skidded and again with the tyre fully deflated. These tests were particularly severe, the car skidding right round, leaving skid marks 25 feet long, but the tyre never budged from the rim. c27 07 29

1927 09

First traffic lights installed, bottom Castle Hill required extra police - half to keep crowds back, half to attend to accidents" [3.21, 5.16]

1927 09 23

Petrol caused quite an explosion at a meeting of the Cambridge Town Council. For some time the Corporation has been obtaining petrol at the rate of 11d. per gallon and the Public Works committee now recommend that 200 gallons be obtained at 1s. 1d. Some members objected to paying more and suggested the change had been made because the cheaper grade was of Russian origin. Were the housing committee going to stipulate that no Russian wood should be put in houses they are building? The cheaper petrol was known as Power petrol and used by all the large firms in Cambridge. 27 09 23

1927 09 25

Damage estimated at £2,000 was caused by a fire which broke out at the Cambridge Motor Service Co. Hobson Street. The night watchman found that motor cycle department, which also stored several cars, was alight and among the vehicles which were badly burned were a Bugatti racing car, an Austin Seven, a Trojan van and a number of motor cycles and bicycles. Some people returning from the New Theatre were attracted down Hobson Street and watched the Fire Brigade at work. c27 09 25

1927 12 24

Concern that car registration CE may run out, next letters will be VE [7.9]

1927 12 29

Some of the best-known makes of motor cars are to be seen at Cox's Motor Company, Cambridge, the firm being agents for Armstrong-Siddeley, Riley and Vulcan. Their showroom windows always attract the person interested in cars and accessories and just now they are making a special feature of Riley models, including the San Remo saloon at £265 and the Monaco model at £285. They also specialise in the Lea-Francis cars. c27 12 29

1929 01 07

Too much time is now taken up by the police in traffic management, which is not a primary police duty; it could be controlled by the RAC and AA patrols, County Councillors argued. They were better than the police because they had motors. It would be difficult to make arrangements with the associations and would probably mean the motor scouts becoming special constables. Others felt traffic control should be dealt with by a special police, though the time was not ripe for them to increase the numbers. But Col Tebbutt said he would not like to see two sorts of police in the country. c29 01 07

1929 01 29

Sir – It is extraordinary that in an age when the importance of fresh air is being recognised the open motor car body should be apparently on the verge of extinction. Few saloon cars are adequately ventilated and on a long journey the choice is between a draught and a headache caused by fumes from the engine percolating into the body. To people advanced in years the closed car is probably wise but to young people taking so freely to such an enervating mode of transport is pitiable. The excuse is that our climate is so uncertain that a closed car is necessary

but I motor for hours every day of the year and rarely find it necessary to put the hood up –
'Saloonatic' 29 01 29

1929 03 22

Cambridge council is to introduce automatic traffic signals at the crossroads at Northampton Street and Chesterton Lane for a three-month trial. The present cost of a policeman on point duty was about £400 a year and the signals, with purchase, would be about £200 with about £25 a year maintenance and repairs. But Coun Stubbs described it as "robot policemen"; a friend in Liverpool had had to wait ten minutes with a clear road before he could get a move on. He did not see how traffic could be controlled as well as by human means: "I can see myself telling it to mind its own business" (Laughter). It was at the wrong place, being at the bottom of a steep hill; it would be better at the East Road – Mill Road crossing. 29 03 22

1929 09 04

Cambridge traffic lights start – CDN 4.9.1929

1929 11 01

The R.A.C. has decided to extend the benefits of its 'Get You Home' service to members of the Club whilst flying. It has hitherto provided a relief car free of charge for their members who have broken down on the road but a considerable number are now either owners of light aeroplanes or are members of flying clubs. Should any of them whilst flying be compelled to make a forced landing they will be able to send for an R.A.C. relief car and be conveyed to the nearest railway station. If the plane is of the folding wing type that can be towed on a public road the R.A.C. is prepared to pay for its conveyance to any town within the limits of the scheme. 29 11 01

1930

Notice issued to Undergraduates in 6 colleges that motorcar & motorbikes are to be banned [6.15]

1930 01 15

An application was made for the winding up of the Cambridge Service Motor Company of Hobson Street. It had been incorporated as a private company in 1923, taking over the Service Motor Company engineering business. Their account was considerably overdrawn for much of its existence and it now had an overdraft of £6,744. The assets consisted of a number of used motor-cars of no great value. It was unable to pay its debts and should be wound up. 30 01 15 & 15a

1930 02 25

Sir – we Cambridge market traders notice that Councillor Longley wants to move our stalls into the Corn Exchange but we challenge him to produce a transferred market that has been a success. He wants to replace the stalls with car parking spaces. Cannot he see the utter foolishness of congesting the very centre of a town with cars. Those on Market Hill consist of business townsmen, clerics and travellers who sit in their expensive car, eat bread and cheese, but do little business. The Market Hill and Peas Hill are open-air markets. An arcade was tried years ago. The building stands today, a sorry sight, in St Andrew's Hill. The stallholders all failed – W.J. Sambridge. 30 02 25

1930 03 27

Cambridge Motor Service Company had taken over a firm of motor engineers and garage proprietors in Hobson Street and hoped to acquire the business of Hunnybun and Son, coachbuilders and painters. Then in 1927 they spent £2,000 to purchase a large stock of electric lamps which were being retailed at a considerable profit. But the British Thompson-Houston Company issued a writ and the present stock of lamps was now valueless. In addition the depression in the motor trade for used cars and dealings in sports cars for which there was at one time a good demand among undergraduates had contributed to their failure. 30 03 27a & b

1930 04 07

The new electric traffic signals are generally working well but it seems that the average motorist accelerates when the green light is showing in order to get through before it changes. This is particularly evident at the Northampton Street – Castle Hill crossing in Cambridge as a driver going towards Huntingdon seeing a stiff climb directly ahead naturally tries to get through and up the hill. But a driver coming down often finds his car has a tendency to accelerate of its own and tries to get into Chesterton Lane a little too fast, swinging out into the standard erected in the centre of the road. 30 04 07

1930 04 23

A series of events contributed to an 'extra special' in traffic jams, even for Cambridge. Deadlock resulted after a motor bus, endeavouring to pass a brewer's dray in Bridge Street fouled a trolley used in cable laying operations. An outsize in motor lorries added to the general melee which took P.C. Lilley fully ten minutes to sort out. The first day of term also brought with usual 'crop' of taxis and cars which added to the jam. Altogether one of the narrowest and busiest parts of the town provided for the greater part of the afternoon something like a slow motion traffic scene. 30 04 23f

1930 05 09

The Chief Constable said he was unable to effectively enforce the new 30 mph speed limit in Cambridge. He needs two more constables to carry out motor patrol work, bringing the total up to four, and a Ford V8 30 hp motor car should be purchased for £210 to replace the solo motor cycle. The combination machine should be retained. 30 05 09 [1.5]

1930 05 19

Cambridge has found dealing with motor traffic increasingly difficult in recent years, Counsel told an inquiry. He emphasised the inconvenience to motorists when no central parking places were available but now the council had made an agreement with Jesus College for the use of New Square as a car park in exchange for Butt Green and a piece of Midsummer Common. It would mean the surrender of 2 ½ acres of Common Land, but it would remain undeveloped & would allow the college to make a new entrance. The scheme was approved. 30 05 19 & b

1930 06 12

An attempt was made by private bus owners to run buses to the May Races from the Ortona Company's stop at Holy Trinity Church. Six coaches blocked the bus-stop; they refused to move when ordered by police and a number of the drivers were arrested. But when the police attempted to move the coaches they found the magneto brushes had been removed. The traffic disorganisation which followed lasted for over an hour 30 06 12b-d

1930 07 12

General regulations affecting the use of motor vehicles first-year men are already in force but in view of the numerous road fatalities last term much more stringent bans will be in operation next year. Clare College says that the possession of motor cars and motor bicycles prevent

undergraduates from making the best use of their residence in Cambridge and none of its students will be allowed to bring or drive a motor vehicle. Cars must be kept in a public garage or in one of the college garages on Castle Hill. 30 07 12a

1930 08 21

'Ethyl', as every motorist knows, is a super motor spirit with remarkable properties. It causes engines to run more smoothly, delivers more power and eliminates the 'knock' without retarding the spark. A few years back it was obtainable at petrol filling stations almost everywhere and many motorists cheerfully paid the extra penny a gallon. But sinister rumours circulated that the lead tetra-ethyl it contained was injurious to health and gradually it disappeared. Now following tests it will shortly be on sale again at the Olde Castle Hotel garage in Cambridge. 30 08 21 & a

1930 08 23

One of the new Willys-Manchester 35 cwt lorries arrived in Cambridge as part of its 10,000-mile demonstration run. The lorry, which is fully laden & fitted with a special publicity body, toured the town attracting considerable attention. It carried 60 pennants of agents which have been visited and the proprietors of the Queens' Garage, Newnham Road added theirs before it left for Hitchin. The garage is to be shortly extended, provision being made for a showroom and toilet rooms. 30 08 23

1930 11 15

Messrs Windover's disused motor carriage works in George Street, Huntingdon have been sold. For years the firm employed hundreds of skilled workers until they acquired more extensive works in London. It was a sad sight to see the great works standing idle but now Chivers are to establish a factory for canning vegetables, the most up-to-date of its kind in the country. Already local vegetable growers are alive to the fact that a regular output for their produce will be available close at hand. 30 11 15

1930 12 06

Under the Road Traffic Act Cambridgeshire has been allotted one motor car and three motor cycles to deal with the enormous growth of motor traffic. Such a force should be recruited from men best suited for the job but there is a limit to the number of tasks they can perform. This is another example of the Government forcing local authorities to make the new law work somehow. 30 12 06d

1930 12 27

The booking hall at Cambridge railway station was the scene on Christmas Eve of one of the most extraordinary happenings ever witnessed. As a taxicab was being driven back to the station rank its driver suffered a seizure; the vehicle careered through the booking hall entrance and crashed into the collapsible iron gates near the ticket collector's box. If the barrier had been wide open it would have gone right on to the track, and a train was just due. 30 12 27

For years King and Harper have been striving to secure an alternative entry at their Bridge Street garage for the convenience of their valued customers. Now three houses have been acquired and members of staff gave a rousing cheer when a Morris Oxford Isis Six Saloon became the first car to enter at Bridge Street and leave in Jesus Lane. 31 03 06l

1931 04 10

Under the new Road Traffic Act the speed limit for ordinary motor cars has been abolished. But it is now an offence to drive a motor coach at over 30 miles an hour and invalid carriages must not exceed 20 mph. Goods vehicles can be driven at 30 mph, if fitted with pneumatic tyres and not drawing a trailer, but heavy vehicles with solid tyres must not exceed eight miles an hour when drawing a trailer. Drivers must not remain on duty for more than 5½ hours. It is also an offence to drive while under the influence of drink or drugs. 31 04 10 I

1931 05 22

Messrs Murkett Bros, the well-known garage proprietors and motor agents, are now installed in their imposing new premises on the Huntingdon Road, Cambridge. They were pioneers in the motor industry and their extensive new motor showrooms and repair shops will provide the best of sales and service. If all garages installed such up-to-date machinery and gave such service then insurance companies could bring down their premiums 31 05 22 e f g

1931 09 25

The biggest demonstration ever held of anti-dazzle devices for motor car headlights was held on Midsummer Common. The crowds were dense, however, in more senses than one: drivers had to pick out a route marked with white stakes but these were constantly obstructed and some got completely misled and finished up on the south side of the common. Amongst those attending were Ministry of Transport and Scotland Yard officials, chief constables and scientific experts who carried out technical measurements. 31 09 25f & g

1931 12 04

A Trinity Hall undergraduate appeared in court following a collision. Students were not allowed to have motorcars and he was endeavouring to leave Cambridge without being seen, but had an accident in Coleridge Road and failed to stop. A number plate was knocked from his car and by that means the driver was traced. As a result he had been sent down for good. He did not think the penalty would have been so severe. 31 12 04d

1932 03 23

After all the controversy and heated arguments of a few years ago, there was no excitement at the opening of the New Square parking place. The council turned up in force and from under the shelter of umbrellas watched the Mayoress drive her car through the pale blue ribbon that had been knotted across the opening. At last motorists have a place where they can leave their cars and not come into the police courts. The Master of Jesus suggested that path inside the trees should be known as Coleridge Walk. 32 03 23b 188 use it [1.12, 1.13]

1932 04 09

Sir – as motorists do not appear to need the new New Square car park I suggest something useful should be done with it. It could be turned into tennis courts or used as a model yacht pond, a skating rink or the site for the new Guildhall. Meanwhile the surface should be coloured an

appropriate shade of green as the white grey of the desolate expanse of concrete hurts my eyes. And could passers-by spare a few books for the attendant to read while he is waiting for the customers who never come – Ratepayer 32 04 09

1932 05 16

Flames reached the roof of King and Harper's garage in Jesus Lane when a taxi-cab caught fire as it was being filled with petrol. Cars in the garage were pushed out and the blaze extinguished. The cab was taken to the Thompson's Lane depot but some part of it still smouldered for at four in the morning it again blazed up. This time it was totally destroyed. 32 05 16

1932 05 20

Fire broke out in three lock-up garages owned by S.B. Wallis of St Barnabas Road, Cambridge. An Austin 'Seven' was completely burnt out - so fierce was the heat that the wheels collapsed, leaving the car resting on its frame. The fire spread to a 1932 Morris Major; its petrol tank exploded and before the flames subdued a Fiat had been reduced to a charred and twisted wreck of wood and metal work. But the Morris' instruction booklet was practically unscorched. 32 05 20c

George Gault of Blossom Street has been a horse and motor cab driver in Cambridge for 41 years – 18 years of taxi work and the remainder with a horse cab. During the past 18 years he has had two Ford cars – 16 years with one. He is a familiar figure on the rank at Hyde Park Corner and has carried many undergraduates who are now far across the seas. Now in his 63rd year he is a total abstainer and non-smoker 34 01 11

1934 01 29

The Queen paid another visit to Cambridge when she inspected two antique shops and called at a café on King's Parade. The large crowd who had been waiting was surprised when a small blue car drew up and she stepped out. The Royal limousine had broken down on the Ely Road and Mr Percy Titmous, a brewer's manager, had stopped to offer assistance. He then drove her to Cambridge. The Queen was intensely amused at the somewhat unexpectedness of her arrival and at the little adventure which had befallen her, he said. Another interesting part in the Queen's visit to Cambridge was played by Mr Walter Riddy, proprietor of the St Andrew's Road Garage, Chesterton. After the Royal car had broken down and the Queen had been driven by Mr Percy Titmous, he received a telephone message requesting the hire of a Daimler saloon at short notice. He changed out of his working clothes and drove to Mr Roe's shop in St Andrew's Street to take the Queen to the Copper Kettle Café and then on to Exning. There she invited him to remain for lunch but he had another engagement and could not accept. 34 01 29, 59 01 30

1934 02 15

A blindfolded motorist drove through Cambridge at the height of the rush hour as people made their way home to lunch. Professor Popjie's claims that he has 'second sight' enabling him to sense anything in the way was tested when a pedal-propelled invalid chair caused him to slow somewhat abruptly. He threaded his way through traffic down Petty Cury, round the Market and back to the New Theatre where he is appearing with his electrical figure 'Radiana' 34 02 15 [1.4]

1935 01 19

On one of the finest main roads of Cambridge has arisen a new garage that has been named 'Riley House'. No hastily conceived building this with its rows of pumps and oil cans bedecked in signs and colours. Here is a garage of dignity and restraint, logical in planning and design, fitted to be the new local headquarters of 'the Finest Light Car in the World'. Here one can fill up with petrol completely under cover while the workshop is equipped with the latest pressure greasing plant. Tom Cox Motor Co., Chesterton Road, Cambridge – Advert 35 01 19

1935 03 14

The New Traffic Signals. Traffic signs announcing the 30 mph restrictions, which comes into force next Monday are being erected on the approaches to all 'built-up areas'. (Thursday). New Traffic Signs Disappear. Several of the new 30 mph signs on the outskirts of Cambridge were unofficially removed during the weekend, but have since been replaced. (Monday). Missing Speed Limit Signs. A Trinity College undergraduate appeared in court charged with the theft of three of the new speed limit signs. (Thursday) 35 03 14, 35 03 21c

1935 04 02

There are 4,000 road haulage contractors in the area today and 1,000 will be out of it in the next two or three years. They will lose their jobs, licences, vehicles and livelihoods. The Government was railway minded. Legislation never seemed to stop and it always seemed to favour the railways rather than the roads. But the whole transport world cannot be swept out at the pleasure of the railway companies. Somebody has got to carry on the road service of this country. Membership of the Cambridgeshire Road Haulage Association had jumped to 120. More would follow as even a haulage contractor had a flash of intelligence sometimes! Instead of being caned by successive government they should go to the Minister and speak with one voice, a meeting was told 35 04 02 & a

30 mph speed limit brought back after 4 years due to number of accidents [1.5]

1935 05 21

According to the recent census taken for military purposes, Cambridge has a horse population of 779, excluding railway and military animals. This is abnormally high, being roughly twice as many as any other town of its size. In the riding horse and hunter class Cambridge takes fourth place in the country but the town is poorly supplied with carriage and trap horses. People have forsaken the horse for wheeled outings though there are still a few residents who prefer to sit behind a horse instead of a petrol engine. It seems that the motor salesmen of Cambridge are extraordinarily efficient. 35 05 21

1935 07 27

Belisha Beacons have now been installed in Cambridge, whether we like them or not. They are on Market Street corner near Sainsbury's, between Christ's college and St Andrew's church, near the Midland Bank in Petty Cury, the 'Jolly Waterman' on Victoria Avenue and between Christ's Pieces and New Square. It is just as well the undergraduates are not here to see their erection. Perhaps we shall all have become thoroughly accustomed to them where our young friends come up 35 07 27b

1913 Four Cabmen were summonsed for taking their cabs on to the Senate House rank when it was already fully occupied and leaving their horses and cabs unattended. Pc Pettitt said there were four unattended cabs standing two abreast facing the reverse way to the other five waiting for business. The rank was authorised for two cabs during the week and three extra on Saturday because the Market Hill rank could not be used then. One man said he'd gone to the lavatory on Market Hill and had asked others to look after his horse. More had been to the coffee shop or had gone to breakfast. They must obey the byelaws. 13 03 14 p8 CIP 1935 10 12

Roundabouts proposed for Cherry Hinton Road/Hills Road, Cherry Hinton Road/Perne Road [2.16]

1936 03 21

Many people have wondered about the object of the black and white poles which have sprung up along St Andrew's Street and Hills Road. The Ministry of Transport have finally given permission to the system of unilateral parking and the posts will be adorned with notices warning motorists not to park on the wrong side of the road on the wrong day. There is also some reason for believing that the new 'one-way' streets will also be brought into operation before very long. 36 03 21a

1936 03 23

Unilateral parking came into force in Cambridge on Saturday. Between Regent Street and the Old Post Office parking is now allowed for 15 minutes in any one hour on one side of the road on even dates and on the other side on odd. There is one short stretch against Emmanuel Street in which no parking is allowed, owing to the difficulty of traffic coming in and out of the town through this narrow street. Readers should remember they cannot now leave their cars for any longer than 15 minutes as this is the limit. 36 03 23b

1936 03 27

Cambridge Police had a busy time when the new system of one-way traffic came into being. They were based at the end of all the affected streets and strangers must have wondered at the cordon thrown round the town. But it was necessary for despite all the notices many motorists attempted to make their way along the street from the wrong end and were stopped. And, by the way, the new restrictions apply equally to cyclists who will not be allowed to walk with their machines against the streams of traffic – 36 03 27

1936 03 28

Under new restrictions Cambridge motorists may not travel from Market Hill towards Trinity Street or into Bene't Street from King's Parade. You may not drive into Sussex Street from Hobson Street or into Corn Exchange Street from Downing Street, nor turn at Burton's Corner, Petty Cury to go to the Victoria Cinema or from Wheeler Street into Peas Hill to get to the Arts Theatre. But cyclists may walk with their bicycles either way as they do at present in Petty Cury and Market Street. Restaurants will have to speed up their service if they wish to cater for those

who leave their cars outside, for only a quarter of an hour is permitted. Travellers who do not want to get indigestion had better make use of a parking space! 36 03 28b

1936 07 15

James Street was the scene of one of the most serious blazes Cambridge has experienced in years. It started when a Ford van caught fire at the premises of William Scott, house decorators, builders, motor and coach painters. It spread to their motor-body room where a number of cars were in for renovation. The place was soon a veritable inferno as drums of paint and oil exploded. Flames engulfed ladders and handcarts belonging to the Cambridge Window Cleaning Company then Messrs Pate's builders workshops which were reduced to ashes or scrap. The damage must run to many thousands of pounds 36 07 15 & a

1936 10 09

King & Harper open new garage Hills Road [10.2]

1936 12 10

Murkett Brothers, automobile engineers, who have large garages in Huntingdon, Peterborough and Bedford, opened their new premises on the corner of Huntingdon & Histon Road in May 1931. Owing to the satisfactory service they have given business has developed to such an extent that an additional garage is shortly to be built. This will cater for commercial vehicles and heavy repairs, whilst the Huntingdon Road depot will be for new and second-hand cars, with light repairs and service facilities 36 12 10i

1937 02 06

Although rebuilt as recently as 1935, Robinson's garage in St Andrew's Street has again been enlarged to meet ever-increasing business. This has enabled them to enlarge their radio department which is quite distinct from the motoring side of the business. It is staffed by men who have made radio their special study and offers hundreds of brand-new sets (some in their original cases) at pounds below list prices. The radio service department is one of the finest in the entire country with engineers from Marconi, H.M.V. and Pye factories. 37 02 06c & d

1937 02 10

Roy Fox, the famous band leader who is appearing at the Theatre-Cinema, toured Cambridge businesses. He travelled in his own Rolls Royce to the main showrooms of Cambridgeshire Motors in Cherry Hinton Road. He always likes to visit the showrooms of the main Ford dealers because so many of his boys use this make of car. "I like Fords. They are a fine job and Cambridgeshire Motors have a wonderful range of them. Their service department struck me as being O.K. Being an American I like this town of yours. It is a great change to find such a wonderful shopping centre in such a beautiful setting", he told our reporter before continuing his tour. 37 02 10a

1937 02 27

The Cambridge Light Car Company opened premises in Hills Road about six years ago as Used Car Showrooms. The business rapidly increased and within two years the management found it necessary to take larger garage premises in Norwich Street for car storage and repairs. They were appointed distributors for the now famous High-class Triumph cars that have come rapidly to the fore during the last four seasons. They are also Morris deals and stock Standard, Austin and other popular makes of car 37 02 27

1937 03 15

Ministry of Transport proposals to minimise street parking have called forth dissention from many motorists. We in Cambridge know there has been a steady increase in our shops by the more modern method of road transport. A large proportion of those who come from outlying districts to buy the week's commodities are private car owners. To refuse to allow cars to be parked for a reasonable period outside the place of purchase would cause many to give Cambridge a wide berth. Motorists are already taxed up to the hilt and police courts would be more than ever congested with these trivial offences. 37 03 15

Council discuss acquiring Lion Hotel yard for car park at cost of £44,665 [3.6]

1947 07 30

Sir - When will something be done about the disgraceful state of the traffic in Petty Cury, Cambridge. I understood some time ago that steps were being taken to stop the parking of cars on the left side of this narrow thoroughfare. Far from this being done, it is now worse than ever. Saturday, with the exception of the entrance to the Lion Hotel there were 15 large cars parked from Sidney Street to Guildhall Street, and as prams and mail carts can only use the sidewalks, pedestrians who venture on the street are taking serious risks of getting knocked down. Truly a street only fit for the quick or the dead - letter from W.M.F., Gt Shelford c47 07 30

1947 09 30

The Chief Constable (B.N.Bebbington) told Cambridge Rotary Club that he would like to see a scheme whereby traffic was banned - at least buses and heavy traffic - in the centre of Cambridge. "In Petty Cury on Saturdays there is insufficient room for traffic, let alone pedestrians. It would be more satisfactory if that central part of the town was for pedestrian traffic only. That is a sweeping thing to say and will not find favour in all quarters". Referring to criticism that the one-way traffic scheme soon to be introduced in the centre of town was "the wrong way round" he explained that it diverted from the town centre the large amount of traffic going to the station from the Chesterton direction and would encourage lorry drivers passing through Cambridge to take the route through the Backs. More car parks in the centre of the town were obviously a need, and there were plans in existence to provide them c47 09 30

1947 12 08

One thing I found out on making a tour of the Regional Petroleum Office in Chaucer Road, Cambridge was that stories of endless delay and general chaos in dealing with applications for

petrol coupons are quite unfounded. I went into the hut in the garden where the coupons are prepared for despatch - an envy-evoking sight for petrol-thirsty motorists. A score of men were counting, rubber stamping and recording the issue of hundreds of coupons of all kinds. Each one deals with between 150 and 200 applications at day; the quickest worker in the room, a woman, has dealt with 300 a day, She seemed to stamp coupons almost as quickly as you can flick over the pages of a book 47 12 08

The latest car being offered for sale by Brian Lister Light Engineering of Cambridge is a Lister-Bristol which costs £2,150. They are sold as chassis or complete vehicles and fitted with disc brakes. Already more than a dozen are running in the hands of private owners. Meanwhile a racing car has been rebuilt at Parkside from an original 'Iota' chassis by Tony Crosse and Jim Denholm. It is intended for sprints and speed trials and has a maximum speed of 105 mph. 55 06 03a 55 06 03b

1955 12 13

Current trends in two-wheeled transport seem to be moving in favour of the motor-scooter. Now Hallen's have opened a new showroom in Fitzroy Street, Cambridge devoted solely to scooters and 'mopeds' (known to the uninitiated as auto-cycles) which illustrates the increased public demand for this form of transport. 55 12 13

1956

Birches garage started, moved Milton road 1970 [12.4]

1956 03 01

A fire-eating gargantuan of a bygone era made its last journey when a steam-powered 'Super Sentinel Wagon' completed its last run at the end of a degrading tow from another vehicle. For the monster, which started service with the Gas Company in 1928, is no longer able to run on its own steam. It carried coal from Coldham's Lane sidings to the works but today stands in Messrs Silverman's scrapyards in Ditton Walk awaiting the oxy-acetylene cutters which will render it a heap of metal. 56 03 01f

1956 03 30

If the number of cars increases motorists won't be able to get in to Cambridge very easily because of all the stationary cars cluttering up the streets and the whole problem of parking is extremely frustrating. It is time to get tough. If we must set up car parks outside the city and run the people in by special buses then we mustn't hesitate. But the land once occupied by the old Shire Hall courts on Castle Hill would make a good site for a multi-deck car park. 56 03 30b

1956 06 18

Herbert Robinson's contemporary-style filling and service station has opened on the London Road at Trumpington. It is one of the most up-to-date in the country. All groups of Shell petrols are supplied from the latest type pumps and an Avery Hardoll 'Petroiler' for two-stroke motor-cycles is also available while the latest type Weaver auto-wash equipment will clean any car in 15 minutes. 56 06 18a

1956 10 16

Councillors say that multi-storey car parks should be provided at Lion Yard, Saxon Street, Park Street and New Square and 170 cars should be parked on the site of the existing police flats at Parkside. But traffic congestion in Cambridge has become so acute that 'No Waiting' restrictions should be imposed in the central area and King Street made one-way. 56 10 16a

1956 10 20

Cartoon – Cambridge parking – car on spike – 56 10 20d

1956 10 20

Suggestion for car parks outside centre rather than in Lion Yard [6.23]

1956 11 23

A Sentinel steam wagon has been recommissioned at the Cambridge Gas Works as a means of conserving petrol. It has been out of action since May when it was taken off the road because of its age. It is the only vehicle of its type now working in the country and will be used for conveying coal from the Coldham's Lane sidings to the Gas Works. 56 11 23

1956 11 23

A 15-minute car washing service is a feature of the new car valeting station opened by King and Harper in Cherry Hinton Road. Now the farmer who arrives at the Cattle Market with a muddy car will have little excuse for returning home with it dirty. The new station has been growing rapidly; the latest island type petrol pumps provide a full range of fuels and an up-to-date greasing bay can cope with lubricating problems. 56 11 23a

1956 11 29

Preparation for petrol rationing began in mid-November and thousands of applications for supplementary rations are arriving at the Ministry of Fuel and Power at Brooklands Avenue. Local garages say there has been little panic buying as most motorists already have their tanks full and merely call in for the odd gallon to remain topped up. But when rationing is introduced garages will only be able to obtain supplies on production of coupons handed to them by customers. Should a garage run out of petrol they will have to go without for as long as the rationing continues. 56 11 29 a & b

1956 12 03

This is a bad time for motorists. Not only are we faced with a meagre petrol ration but it is likely to cost more as (because of the Suez conflict) every gallon of Middle East oil has to be brought by the long route via the Cape. The Chancellor should reduce the tax on petrol to keep the price the same. Many people depend on a motor car for their livelihood and why should they have to use their allowance of 200 gallons a month to travel to work. But Marshall's report a good response to their economy tune-up service. 56 12 03b

1957

Parking meters suggested [7.12]

1957 02 16

At long last there is a street in Cambridge where cars can be parked during the hours of darkness without lights. Eleven lamp-posts in Station Road bear a special sign that mean motorists can park without even switching on the new 'clip-on' parking lights. Police say this is for the convenience of car owners who wish to travel by train and live some distance from the station. 57 02 16

The opening of Herbert Robinson's new Sales and Service department on Newmarket Road, equipped with every aid to modern truck servicing techniques, marks another important step in the development of the company who are Rootes Group dealers for Cambridgeshire. From a cycle shop bought in 1905 has grown the present concern embracing the motor, cycle and radio industries. 57 04 03

1957 04 06

New traffic lights, Lensfield Rd [6.30]

1957 05 15

A revolutionary – even fantastic – scheme has been put forward to use Cambridge Castle Mound as a multi-deck car park. Tunnels would be driven into it to provide space for hundreds of cars with be entrances from Chesterton Lane, Huntingdon Road and Magrath Avenue. The dirt excavated could be used for filling in Coldham's Lane pit, providing more parking spaces or building land. There will no doubt be many objections. 57 05 15

1957 05 17

Proposals have been announced for an underground car park at Parker's Piece capable of accommodating about 5,000 vehicles. When complete it would be unaltered on the surface but beneath would be many acres of car parking space with four sloping entrances. It will take two years to build and be cheaper the present scheme for a multi-deck park on Lion Yard a councillor claims 57 05 17a [6.25, 6.30]

1957 05 23

Messrs C. Holland won their appeal to erect a petrol filling station on the corner of Ross Street and Mill Road. The site is at present occupied by a house and garden, the surrounding area is predominately residential but with some schools, shops, social clubs and industry. In such areas motorists prefer to fill their tanks locally at the start of the day & it would not increase traffic risks to children. 57 05 23

1957 06 18

It could cost less than £400,000 to build a car park for 800 vehicles under Parker's Piece. This is less than a multi-deck on the Lion Yard site that could only take 500 cars. The charge would be 1s 3d (07p) a session, whereas Lion Yard would be at least twice that sum. If motorists are going to be charged half-a-crown (12p) a time for the 'honour' of parking in the centre they will leave their cars outside the city or not even come at all. Then local trade would suffer, councillors claim. 57 06 18 [7.1, 7.2]

1957 07 23

Plans for a new car park at Parkside should be deferred until the proposed underground park at Parker's Piece is debated, councillors say. But they would deplore anything which would affect its amenities. The ground would take three years to be 'reinstated' ready for playing and there would be an area of the Piece which would be permanently sterilised by the construction of entrance and exit ramps, emergency escapes and ventilation apparatus. 57 07 23

1957 08 24

National Benzole want to open a three-pump filling station on Newmarket Road opposite the junction the Coldham's Lane. The property belonged to Mr West and was used for the maintenance and storage of motor vehicles with three pumps behind a screen wall. They would knock down two adjoining properties to widen the frontage. But planners say the city fire station was across the road and it would hold up the flow of traffic. There were eight other petrol stations on the left-hand side of the road as far as Bottisham. 52 08 24 & a & b

1957 09 05

R.W. Suttle has been connected with the motor industry since serving his apprenticeship with Cambridge Automobile Engineering Company. In 1912 he drove an army staff car when Lord Roberts took the salute during the Army manoeuvres. He later moved to Detroit where he worked on Henry Ford's Model 'T' on which he had his first driving lesson. Now he is in charge of the Cambridge branch of the British School of Motoring. 57 09 05b

1957 10 14

Proposals for an 800-space car park under Parker's Piece are technically impossible, opponents say. There are 'certain unsound features', it would be detrimental to the area and it would take years for the ground to be reinstated. The cost would probably be as great as that of the planned scheme in Lion Yard, though no car park of this nature has yet been constructed. But Labour councillors want it carried out as a matter of urgency. 57 10 14

1957 10 18

In 20 years' time Lion Yard car park will be outdated as the centre of the City will eventually have to be roped off from traffic, Canon Mervyn Stockwood told the council. He had frequently been up to the top of Great St Mary's and seen the appalling havoc of the central area in recent years. Now they proposed to put up a 'cheap and efficient sort of skyscraper'. He continued: "We are custodians of one of the most famous cities in the world. That sort of building cannot add to the dignity and loveliness of Cambridge" 57 10 18c

Park street plan approved, Mar [7.13]

1958 05 12

Radar trap meters have been in action in Cambridge during a speed checking programme. Results showed the majority of motorists were travelling at 36 mph with 276 vehicles going 40 mph or over and the highest recorded was 52 mph. The police say the use of the radar instrument was not publicised so speeds were what was normally experienced. They have no intention of using it to bring offenders to court at present 58 05 12

1958 09 27

Parking facilities in Cambridge were inadequate, said the Chief Constable. With more than 600 vehicles passing over Magdalene Bridge each hour, Park Street was a convenient site for a car park. Saxon Street park had been finished last week, work on King Street had not started and the Parkside car park was only a small one. Park Street was the one that should have first priority as a surface and multi-deck car park. But a thatched house in Clement Street built about 1700 should not be destroyed by 'this cement desert' 58 09 27 b c d

council drop Butts Green plan [7.21]

1960 04 26

Parking meters may be installed in Cambridge. It would cost sixpence to park for half-an-hour in an inner zone. When the time has expired a yellow flag flicks up and a patrolling parking attendant will place a yellow excess charge notice on the car. It can then stay for a further period when a red flag flicks up. This makes the motorist subject to prosecution in the courts. Two hours later and the car can be towed away. Councillors expect a certain amount of objections from shop-keepers and think yellow lines on the roads will injure the town's appearance. 60 04 26a [7.22]

1960 07 01

For more than a year now, Cambridgeshire police patrol cars have been fitted with 35mm cameras mounted behind the windscreen. The photographs of road offenders in action have been used to obtain several convictions of careless drivers. Far more pictures are taken than actually used in prosecutions and constables are encouraged to use the cameras on every possible occasion. It also saves time waiting for a photographer to be sent out from Cambridge to record details of a road accident 60 07 01d

1960 09 01

Bill Walton joined the staff of King and Harper at their Thompson's Lane garage in 1910. In his early days he was concerned with the extremely temperamental racing car 'Chitty-Bang-Bang II'. This powerful monster consisted mainly of an ex-Zeppelin airship engine mounted on a Mercedes chassis. Another of his charges was a 'Prince Henry' Metallurique which in 1912 was the fastest car ever seen in Cambridge. He once went to a customer's house to collect a car only to find it could only be moved in reverse. He drove it backwards to the Bridge Street garage through Saturday afternoon traffic. 60 09 01

1960 09 07

Sidney Street widened to ease traffic flow [7.23a]

1960 10 10

Harold H. Harper was one of the outstanding men of the motor world. Born in 1878, the son of the village blacksmith at Therfield, he had an early enthusiasm for things mechanical, taking an interest in pedal cycles. In 1897, whilst the academic quiet of Cambridge was being disturbed by its first motor car, he started working in a small Cambridge cycle shop with another enthusiastic young man, W. King. It was the start of a business association which developed into King and Harper. He was a founder member of the Cambridge Rotary Club and took a keen interest in the Air Training Corps. 60 10 10a

1960 10 12

Sir – plans to make the centre of Cambridge a 'Pink Zone' with parking meters will have serious implications. Whereas currently 50 cars are parked in Jesus Lane, only 30 can be accommodated at meters. The result will be chaos with cars milling round in vain trying to find a parking space. Can anyone imagine a motorist being prepared to pay sixpence or a shilling to leave his car for three minutes while he takes his suit to the cleaners? Lion Yard is often full by 9.30 am and if the city is to prosper we must have space for vehicles. The only answer is to provide some very large multi-deck parks, then make motorists use them by restricting waiting on the street – 'Fair Play' 60 10 12

1960 12 09

"Parking problem continues to grow" feature [7.23]

1961

Traffic 25 years ago – 86 01 23a & b

1961 01 20

New Square was a very good site for a multi-deck car park, councillors were told. But Coun P.J. Warren said that when the site was conveyed to the Corporation in 1923 they'd given an undertaking that no building would ever be erected there. Even now they were spoiling the best example of domestic lay-out in Cambridge. People who lived in New Square already had enough to put up with without such a suggestion. It should never be raised again in their lifetime, the Traffic Committee agreed 61 01 20

1961 01 25

Corner at Northampton St traffic lights being widened [19.8]

1961 02 04

There are battered wrecks of old bangers at the Coldham's Lane scrap yard. Doors are missing, wheels stripped of their tyres, bonnet reveal nothing but hanging wires and windows have either been broken or removed. "When we turn vehicles upside down we can see what a state the rusty chassis, worn steering and braking systems are really in," said Mr Les Rich who runs the yard. Business has increased since the roadworthiness tests were introduced for vehicles made before 1937 and hundreds more will now find their way to the breakers' yards 61 02 04a

1961 05 04

Cambridge garages will be affected by new regulations designed to reduce the number of swinging arm type petrol pumps which serve petrol through a hose extending over the footpath to reach the vehicle. Some garages say they expect a reduction of 50 per cent in their sales as people will not drive into the garage building to get their petrol and will go elsewhere. But serving petrol in the street, as opposed to a forecourt, causes traffic jams 61 05 04b

1961 07 20

Herbert Robinson's premises in Regent Street were erected in the early 1930s to the design of George Banyard, a well-known architect responsible for a number of Cambridge's principal buildings. They comprise extensive showrooms, garages and workshops together with substantial office premises known as Llandaff Chambers. Now they are transferring to spacious new premises on Newmarket Road and the property is being offered for sale. The firm are retaining the electrical showrooms at 14 Regent Street 61 07 20 [12.8]

1961 10 20

We're giving away petrol! To mark the opening of our new garage in Newnham Road, Cambridge, we will give each customer on the opening day one gallon of Shell petrol completely free of charge. We are open every day from 8 to 8 offering a Super Service and the kind of attention that makes so much difference to your motoring. B.E. Cocks & Co. – Advert. 61 10 20c

1962 02 02

The city council want a three-storey car park in King Street, between Malcolm Street and Manor Street. There would be space for 260 cars together with a filling station and a maximum of nine shops. It would form part of the pattern of perimeter car parks with another in Park Street. There would be an inner 'control zone' and an outer area for car parking administered by meters. This would accommodate over 400 more vehicles and relieve congestion. Motorists were reluctant to use parks away from the city centre as they wanted to get as near as possible to their places of work, an Inquiry was told. 62 02 20 & a 62 03 22a [7.24]

1962 04 17

Parking meters approved [7.25]

1962 05 29

Fuel cells may soon provide power for motor cars, writes Rodney Tibbs, News motoring correspondent. The cells, which were developed by Mr Bacon of Great Shelford, have an ability to produce electric current. I remember that at the original demonstration in Cambridge the cell was shown operating a fork lift truck. Now the Chrysler Corporation say they may take the place of conventional car power units within the next ten years. The immediate goal is to produce a cell which will use a simple hydrocarbon fuel such as petrol mixed with air in place of dangerous gases 62 05 29

1962 06 05

Traffic speed limit outskirts now 40 [19.11]

1962 06 09

"Leave all cars at city boundary & travel by bus" [19.12]

1962 09 15

Herbert Robinson's electrical premises with a large double frontage in Regent Street have been sold to a Messrs Skertchley, the cleaners and dyers for a price in the region of £100,000 (c£1.7m today). The firm has been selling the remaining electrical equipment at reduced prices with two-year old television sets down to £15 (£263 now). On two occasions the shop together with the adjacent garage and Llandaff Chambers have failed to reach the reserve price at auction 62 09 15

1962 09 28

The last resting place of many Cambridge vehicles is Rich's yard off Coldham's Lane. To this graveyard of motor vehicles come hundreds of cars and lorries worn out with old age or cut off in the prime of life through accidents. If they are of a type still running on the highway they are stripped of anything that might be transferred to a similar vehicle. So the yard is a mass of broken bodies and skeleton parts, old shafts, old springs and old engines. The bodies are broken up further and sent away for export, mainly to Japan where they are crushed and melted down. 62 09 28

1963

Minister criticised over delays King St multi-storey which would supplement Park St, waiting 13½ months [16.6]

1963

Proposed 750 vehicle underground car park between central lamp standard & Regent Terrace [4.3]

Logie scheme for underground loop road & car parks from Emmanuel Road to Jesus Lane to give traffic access but unspoilt centre [7.26]

1963 04 03

The new car park at the rear of Queen Anne Terrace has now been completed and is open for public use, free of charge. It adjoins the car park at the new swimming pool which can accommodate 67 cars and has been constructed as part of the council's policy for traffic control in anticipation of the Minister's approval of the parking meter scheme. The multi-storey car park in Park Street should be in use by the middle of the year and a decision is awaited on an application for another in King Street 63 04 03

1963 04 20

Ministry receive 53 objections to meters, Apr; charges would be 1/- hour inner zone, 1/- 2 hours outer zone; would be profit of £10,000 pa on controlled scheme, income from meters would pay for themselves within 3 years [8.2, 16.6]

1963 07 16

The introduction of parking meters will cure Cambridge's traffic problems, say councillors. There will be sufficient off-street parking for motorists staying for any length of time. At present people move police 'No Waiting' signs and hope they will not be caught. When they drive away others pull into the gap without bothering to check whether they are in a restricted zone. Although police decorate them with pink tickets, the cars still obstruct a length of street until they are eventually moved. But many of the new parks are a considerable distance from the centre and motorists will just not park in Saxon Street or Queen Anne Terrace and walk in. Rooftop parking will have to be employed, perhaps at the former Herbert Robinson property. 63 07 16

1972 02 01

Petty Cury closed to traffic February, councillor celebrates with lunch in street, reopens end of month but closed & Corn Exchange Street opened June [12.13] [3.10]

1972 06 05

Petty Cury, Cambridge, was closed to all vehicle traffic today and handed back to pedestrians for the second time this year. It is likely to stay closed to traffic for at least two years and perhaps permanently. The same city centre street was closed to traffic for a month's experiment in February which was rated highly successful. The whole of the southern side of Petty Cury will be

demolished in the next three months and a new central library will appear within the next three years c72 06 05

1972 06 02

A free parking bonus will be given to motorists using Cambridge's show-piece Lion Yard car park during its first weeks operation after the opening date on July 24 The city's Traffic and Parking Committee decided to cut parking charges by 5p during the working day for the first week, which means one hour's free parking during each parking period. If a motorist leaves his car at Lion Yard for one hour or less it will be completely free c72 06 02

1972 07 15

For simple country folk, such as myself, living to the north of Cambridge, the Elizabeth Bridge is a godsend. For a year now it has enabled me to leave my home, 17 miles from the city, at a civilised hour and be at my office desk within 30 minutes. And in the evenings all I have to do is find my lane and with minimal traffic hold-ups be out on the A10 to Ely again. It now seems hard to remember than once one allowed at least 20 minutes for the Newmarket road- Arbury road run at either peak hour: that to be stuck interminably at Mitcham's Corner was a commonplace. Today my only wish is that more and more improvements are allowed by the planners so that everyone can enjoy a quality of life freed as much as possible from traffic pollution c72 07 15

1972 12 07

Network of cycleways urged [17.8]

1973 01 26

Petty Cury & Guildhall St to be blocked Market Hill end, extend Petty Cury pedestrian scheme [17.9]

1973 01 29

I hope it will not have escaped notice that in the absence of any signals, traffic is now flowing through the Trumpington Road / Lensfield Road / Fen Causeway junction nearly as quickly as it did a year ago, when there was a power strike and the lights were not working. I am an everyday user of this particular junction and have noticed that traffic will always be clear, and on no account is there any traffic jam, when the lights are not working. As soon as the council turns them on there is chaos everywhere. When will they ever learn the more they do to that particular junction the worse they make it - letter G.D.Mills c73 01 29 [16.3]

1973 03 09

Council adopt Travers Morgan report to cut central spine route but Government refuse ban traffic Kings Parade [17.10]

1973 03 17

Cambridge's notorious Trumpington Road - Lensfield Road junction was back to its old bunged-up state last night, with queues of smoking traffic and frustrated drivers paralysed by £3,000 worth of new, improved, traffic lights. Having been out of action for the best part of two months the lights came on again having been retimed, moved and the traffic flow redesignated by the traffic experts of the Department of the Environment's Bedford-based traffic unit. The junction's real test came at teatime and by 5.40 p.m. mutinous drivers were breathing imprecations through their exhaust fumes. Drivers were saying that 15 minutes had been added to their travelling time c73 03 17

1975 01 19

Until Sainsbury's opened their new filling station alongside the supermarket in Coldham's Lane, Holland Motors at the end of Mill Road provided the cheapest petrol in Cambridge. Sainsbury's station opened this week offering 4-star petrol only and no other forecourt services. Their price of 68p a gallon is regarded as something of an opening offer. Holland motors comes second with 4-star at 71p a gallon. The dearest is Oliver Rix at 74p c75 01 19

1975 02 13

1976 06 11

Pound a gallon petrol, now a nightmarish possibility, would not only present problems to the motorist but to petrol companies as well. National Benzole gave a demonstration of futurist forecourt equipment, including a petrol pump head which could not only cope with metric measurements – litres instead of gallons – but which was also geared up for prices of a pound a gallon or more. If prices were to rise to 85p a gallon then most existing blender pumps would not be able to cope with it. Originally pumps were designed for prices like 33p per gallon c76 06 11

1976 07 31

The garage business of B.E. Cocks and Co. at Newmarket Road, Cambridge, has been bought by Marshall of Cambridge, and is to become a Leyland car centre. The purchase includes almost four acres of prime garage site next to the main A45 road, modern showrooms and repair facilities and the goodwill of a business which has been running in the city for almost half a century. This and the capturing of the Daimler, Jaguar, Rover and Triumph franchises from Wallis and Sons means the Marshall group is a real force against the big garage chains operating in the region c76 07 31

1976 08 02

An experimental free bus service for the Fitzroy Street area of Cambridge commenced at the weekend, providing the public with the first buses in the area for almost three years. 67 people made use of the first bus run at 10am on Saturday. The owner of the Talk of the Town shopping arcade, Mr Carl Owen, has hired one bus from the Eastern Counties Bus Company at a cost of £30 per day. He said he will hire more for a four-week period to prove the company were wrong to stop the service c76 08 02

Traffic ban made permanent by Government [18.5]

1976 08 05

Bus lane Victoria Ave starts [18.6]

1976 11 06

Cambridge's experimental "Park-and-ride" scheme got off to a slow start today. The first bus left from the Cattle Market at 10 am and carried only 10 passengers. The scheme is designed to relieve the normal pre-Christmas traffic congestion by allowing motorists to park free of charge and then buy a 15p return ticket to the city centre. It will operate each Saturday until January 8th with buses leaving every 15 minutes. The first passengers were enthusiastic about the acres of parking space available. "Its marvellous being able to park so easily" said Mr John Blackman, who had driven in from Sawston c76 11 06

1977 03 13

The experimental mini-roundabout at the junction of Newmarket Road and Coldham's Lane, Cambridge was working well on the first morning of its operation. Even at the height of the rush hour traffic was flowing smoothly. It has been put in temporarily while the traffic lights at the junction are being taken down; they will eventually be replaced with more up-to date lights as part of the Newmarket Road improvement scheme. Police Chief Inspector Maurice Murden said: "To think our problems have been solved by an old tractor tyre! It is something we have advocated for years, and now we just hope that it will become permanent". One driver said his driving time to his home in Chesterton had been cut from 20 minutes to five. c77 03 13

1978 09 08

RAC say profit of £134,293 on meters over 12 years, '... to show big deficit this year' [19.2]

1978 12 03

Experimental mini-roundabouts at the Lensfield Road – Trumpington Road junction in Cambridge have been approved by the Government and will be made permanent. They replaced traffic lights which for years caused long delays and have speeded-up traffic at the once-notorious bottleneck. In addition a pelican crossing is to be built at Fen Causeway at the entrance to the

Engineering Laboratories with another at Trumpington Road. There will also be one over Brooks Road when the new and controversial link with Newmarket Road is opened shortly. c78 12 03

1978 12 22

The northern bypass, described as a 'Christmas present to Cambridge' was officially opened at noon and then closed after police expressed reservations about the state of the nine-mile road and its interchanges. But as dusk was falling the barriers were pushed back and it was opened to the public. It includes one of the longest straight stretches of dual carriageway in the country and police asked drivers to get used to the road slowly. With the completion of the interchanges next year and the opening of the M11 Cambridge will have a road system surrounding it for which many other cities would give their eye-teeth c78 12 22

1979 01 16

Charges at Cambridge car parks and parking meters are to rise. Prices will increase from 25p to 30p for an hour at Lion Yard and a day's parking at Queen Anne Terrace will now cost 30p. Park Street will remain unchanged. Parking meter charges have not gone up since 1976 and will double to 10p, with the excess charge rising to £5. Increased use of the three central car parks is expected to bring an extra £15,000 next year but because of the rates forecast an extra £45,000 needs to be raised. CEN c 16.1.1979

Wallis' garage, which has been on the same site in Cambridge for 40 years, is to close in July. The managing director said the decision stemmed from adverse trading conditions and that he had already cut the price of second-hand cars on sale. The garage also sells new Lancias. The premises at Mitcham's Corner are up for sale. The garage has show rooms, petrol pumps and an accessory shop together with a repair side which is thriving in spite of other problems with the car trade. 80 05 13a

1980 06 26

Four people were taken to hospital after a car careered across a corner of Cambridge Market Square. It ploughed across the Barclays Bank edge of the market, striking a flower stall, scattering fruit and vegetables and hitting two shoppers before ending up four feet from the railings of Gt St Mary's church. A Girton lady working on the flower stall said: "I just saw the car out of the corner of my eye and ran for it. The stall just folded up with its legs in the air" 80 06 26

1980 09 18

Anyone who has sat in a traffic queue tailing back into Downing Street from the Lion Yard car park will know the frustration of arriving in Cambridge at peak times. The tourist office says

parking is atrocious and directs visitors to Saxon Street where you can stay all day for 30p. The County Structure Plan foresees a need for three new multi-storey car parks to cope with future demand. But rising petrol prices or decreasing oil supplies could mean fewer cars on the road in the future. 80 09 18b & c

1981 02 18

Cambridge councillors have thrown out the idea of ever building a multi-storey car park anywhere near the Backs. They condemned as 'barbaric' suggestions from senior officials that such a park, either above or below ground, could be built on college gardens, playing fields or open spaces along Queen's Road. "It is even more ridiculous than the plan to put a major road cross Grantchester Meadows", said Councillor Rosenstiel. 81 02 18a

Hallen's of Cambridge is celebrating its golden jubilee. It was founded in 1933 as a used motor-cycle dealership soon moved to premises in Chapel Street, Chesterton which it shared with a haulage business, fish and chip shop and furniture removal firm. Today these premises still house the motorcycle service and parts centre. It then moved into a former dance hall in Union Lane which became the first car workshop and stores. During the war it was requisitioned with a new workshop and an air raid shelter underneath 83 04 25 supp p10

1983 04 26

The County Council has been urging Cambridge councillors to provide more city centre parking space. They say 1,000 extra parking spaces are needed. Now they have suggested six sites: a 250-space extension to the present Lion Yard multi-deck, land behind Telephone House in Regent Street-Park Terrace (220 spaces on a four-deck park), the old Addenbrooke's Hospital site (250 spaces), land behind Shire Hall (450 spaces on a three-deck park), Saxon Street (480) and Adam and Eve Street (460 spaces) 83 04 26 p5

1983 06 20

Cambridge computer wizard Clive Sinclair may buy the factory of the failed Northern Ireland sports car company De Lorean to manufacture his electric car. His Sinclair Vehicle Project is developing what is hoped to be the first mass-produced electric vehicle for some years. Intended for city travellers it is due for release in 1985. The technology was developed by the Norfolk based Lotus Company, which Sir Clive has also shown an interest in buying 86 06 20 p3

1983 07 06

Petrol prices caused chaos and confusion amongst motorists as charges ranged between £1.75 and £1.86 a gallon. Frustrated garage owners cursed their suppliers as they took down the new prices they had been asked to put up last night. Frank Holland of Mill Road said that yesterday prices started at £1.77, later he was told to raise them to £1.86.9 from midnight, then in the morning told to bring them down to £1.85.7. Meanwhile motorists used up petrol as they searched for the best bargains The cheapest price in Cambridge is at Sainsbury's which has kept its prices at 1.75p a gallon 83 07 06 p6

1983 12 29

More than £1 million has been collected from Cambridge parking meters since they were first introduced in 1964. Motorists have put £1,065,574 in the meters but the operating costs have been £849,480 leaving a profit of £216,094. This goes towards helping the councils provide more off-street car parks 83 12 29 p8 [19.6]

Computer lights installed 6 months ago reduce delays by up to one-fifth [20.1]

1985 02 11

More than 5,000 Sinclair C5 electric vehicles have been sold during the first four weeks of production. At the moment it is sold by mail order but they are already talking to a number of High Street retailers who would sell the £400 machine direct to the public. Interest has come from as far away as the Outer Hebrides and Cornwall and from both teenagers and old age pensioners. In Cambridge the Eastern Electricity showrooms on Market Hill report continued interest in the machine they have on display and have distributed over 2,000 order forms 85 02 11

1985 05 16

The history of Wills and Thompson Ltd runs parallel with the history of the motor car since it was founded 50 years ago. It was bought by William Skeels in 1958 whose son Tom now runs the family business and their mechanics, Gerry Flack and Nick Wright, service any make or car or light commercial vehicles. When the firm start there were very few cars on the road, now their premises in George IV Street are packed and parking is a nightmare. But the site is right where people need the services of a garage. 85 05 16

1985 12 18

Robert Sitton and Alfred Mothersole commenced business on the Newmarket Road in 1945 for the repairing and refurbishing of motor vehicles. They moved to Abbey Street in 1952 and from there to premises at the corner of Coldham's Lane and Henley Road in 1973. They were the first in Cambridgeshire to install a stoving oven for the refinishing of car paintwork and further up-to-date equipment is being installed. 85 12 18a

1987

“Cambridge is doomed as major shopping centre unless it can cure parking problems” [20.7]

1987 03 13

A new purpose-built car park providing 67 long-stay spaces has opened in Castle Hill, with another 57 places coming in a few months; time. City councillors say the park, near the junction with Victoria Road, will offer convenient access to shops and businesses in the north of Cambridge. It will have a park-and-display system charging 50p for any period on weekdays, doubling to £1 on April 1st. But there will be free parking in evenings and Sundays 87 03 13a

1987 03 13

Cambridge’s traditional transport, the bicycle, will be deliberately used to slow down city centre traffic. The medieval central streets will be made even narrower which will make it even more difficult to overtake bikes. Traffic restrictions will also be introduced, including the banning of taxis. The streets have been reshaped and cleaned up with York stone used in areas considered ‘visually sensitive’. But workmen in Trinity Street have been delayed by having to remove hundreds of wooden blocks dating back to the days of horse-drawn vehicles 87 03 13b

1987 11 02

Churchill Service Station, on the corner of Huntingdon and Victoria Roads, has been sold to oil giant Texaco and will be renamed Star Cambridge. They plan to turn the garage workshop area into a supermarket, expanding the grocery section which has been serving the local community for several years. Its founder, Tom Sharpley, moved to Cambridge from Benfleet in 1976, initially selling Chevron fuel. He has mixed feelings: “I have met some horrible creatures in the business but also some first-class people while I’ve been here”. 87 11 02a

1988 10 18

Hallens have converted their Shell garage at Mitcham’s Corner to become self-service with the latest electronic pumps. There has been a petrol station on the site for many years. Previously it was operated by Oliver Rix and sold Texaco fuel. Hallens has sold petrol since the 1930s and until now has maintained the traditional attended service. This will continue at its garage in Union Lane for customers who value the personal service. 88 10 18e

91.38

Headlines

1925 Drummer street station established for buses & cars; one-way traffic starts in Market Street & Petty Cury, cyclists are allowed against the flow [1.19,1.20,1.21]

1926 motorist told it 'irresponsible' to leave car parked for 25 minutes [1.24]

1927 proposal to use New Square as parking place, CDN refuses to lead protest : "most people smile when they think of tremendous agitation worked up against Drummer Street ... nobody one penny the worse ... only fault is that Drummer Street not big enough hence need for New Square" [1.25]

1928 New Square : converted from grass to car park [IC.7.17]

1930 Sir – we Cambridge market traders notice that Councillor Longley wants to move our stalls into the Corn Exchange but we challenge him to produce a transferred market that has been a success. He wants to replace the stalls with car parking spaces. Can not he see the utter foolishness of congesting the very centre of a town with cars. Those on Market Hill consist of business townsmen, clerics and travellers who sit in their expensive car, eat bread and cheese, beg an onion to go with it but do little business. The Market Hill and Peas Hill are open-air markets. An arcade was tried years ago. The building stands today, a sorry sight, in St Andrew's Hill. The stallholders all failed – W.J. Sambridge. 30 02 25

1930 Cambridge has found dealing with motor traffic increasingly difficult in recent years, Counsel told an inquiry. He emphasised the inconvenience to motorists when no central parking places were available but now the council had made an agreement with Jesus College for the use of New Square as a car park in exchange for Butt Green and a piece of Midsummer Common. It would mean the surrender of 2 ½ acres of Common Land, but it would remain undeveloped & would allow the college to make a new entrance. The scheme was approved. 30 05 19 & b

1930 General regulations affecting the use of motor vehicles first-year men are already in force but in view of the numerous road fatalities last term much more stringent bans will be in operation next year. Clare College says that the possession of motor cars and motor bicycles prevent undergraduates from making the best use of their residence in Cambridge and none of its students will be allowed to bring or drive a motor vehicle. Cars must be kept in a public garage or in one of the college garages on Castle Hill. 30 07 12a

1932 After all the controversy and heated arguments of a few years ago, there was no excitement at the opening of the New Square parking place. The council turned up in force and from under the shelter of umbrellas watched the Mayoress drive her car through the pale blue ribbon that had been knotted across the opening. At last motorists have a place where they can leave their cars and not come into the police courts. The Master of Jesus suggested that path inside the trees should be known as Coleridge Walk. 32 03 23b 188 use it [1.12,1.13]

1932 Sir – as motorists do not appear to need the new New Square car park I suggest something useful should be done with it. It could be turned into tennis courts or used as a model yacht pond, a skating rink or the site for the new Guildhall. Meanwhile the surface should be coloured an appropriate shade of green as the white grey of the desolate expanse of concrete hurts my eyes. And could passers-by spare a few books for the attendant to read while he is waiting for the customers who never come – Ratepayer 32 04 09

1934 parking controls urged "sometimes cars & bikes parked so closely in line in Petty Cury & Sidney Street that pedestrians cannot find space to cross over" [2.8]

1935 "if we have cars we must be prepared to make parks for them, using portions of common lands" - S.C.Roberts [3.20]

1936 one-way systems introduced in St Mary's Street, Bene't St, Market Hill, Peas Hill, Sussex St & Corn Exchange St; waiting restrictions introduced - 15 minutes, park different sides of street on odd or even days [2.17,2.18]

1936 Unilateral parking came into force in Cambridge on Saturday. Between Regent Street and the Old Post Office parking is now allowed for 15 minutes in any one hour on one side of the road on even dates and on the other side on odd. There is one short stretch against Emmanuel Street in which no parking is allowed, owing to the difficulty of traffic coming in and out of the town through this narrow street. Readers should remember they cannot now leave their cars for any longer than 15 minutes as this is the limit. 36 03 23b

1936 Under new restrictions Cambridge motorists may not travel from Market Hill towards Trinity Street or into Bene't Street from King's Parade. You may not drive into Sussex Street from Hobson Street or into Corn Exchange Street from Downing Street, nor turn at Burton's Corner, Petty Cury to go to the Victoria Cinema or from Wheeler Street into Peas Hill to get to the Arts Theatre. But cyclists may walk with their bicycles either way as they do at present in Petty Cury and Market Street. Restaurants will have to speed up their service if they wish to cater for those who leave their cars outside, for only a quarter of an hour is permitted. Travellers who do not want to get indigestion had better make use of a parking space! 36 03 28b

1936 Many people have wondered about the object of the black and white poles which have sprung up along St Andrew's Street and Hills Road. The Ministry of Transport have finally given permission to the system of unilateral parking and the posts will be adorned with notices warning motorists not to park on the wrong side of the road on the wrong day. There is also some reason for believing that the new 'one-way' streets will also be brought into operation before very long. 36 03 21a

1937 Ministry of Transport proposals to minimise street parking have called forth dissention from many motorists. We in Cambridge know there has been a steady increase in our shops by the more modern method of road transport. A large proportion of those who come from outlying districts to buy the week's commodities are private car owners. To refuse to allow cars to be parked for a reasonable period outside the place of purchase would cause many to give Cambridge a wide berth. Motorists are already taxed up to the hilt and police courts would be more than ever congested with these trivial offences. 37 03 15

1938 underground car park on Market Hill proposed [6.20]

1939 Butts Green parking place debated [1.26]

1941 car parking prohibited Drummer Street, January [3.2]

1947 Council discuss acquiring Lion Hotel yard for car park at cost of £44,665 [3.6]

1947 Sir - When will something be done about the disgraceful state of the traffic in Petty Cury, Cambridge. I understood some time ago that steps were being taken to stop the parking of cars on the left side of this narrow thoroughfare. Far from this being done, it is now worse than ever. Saturday, with the exception of the entrance to the Lion Hotel there were 15 large cars parked from Sidney Street to Guildhall Street, and as prams and mail carts can only use the sidewalks, pedestrians who venture on the street are taking serious risks of getting knocked down. Truly a street only fit for the quick or the dead - letter from W.M.F., Gt Shelford c47 07 30

1947 The Chief Constable (B.N.Bebbington) told Cambridge Rotary Club that he would like to see a scheme whereby traffic was banned - at least buses and heavy traffic - in the centre of Cambridge. "In Petty Cury on Saturdays there is insufficient room for traffic, let alone pedestrians. It would be more satisfactory if that central part of the town was for pedestrian traffic only. That is a sweeping thing to say and will not find favour in all quarters". Referring to criticism that the one-way traffic scheme soon to be introduced in the centre of town was "the wrong way round" he explained that it diverted from the town centre the large amount of traffic going to the station from the Chesterton direction and would encourage lorry drivers passing

through Cambridge to take the route through the Backs. More car parks in the centre of the town were obviously a need, and there were plans in existence to provide them c47 09 30

1948 council announce intention to acquire Lion Yard [3.8]

1949 Sir - None of our streets in Cambridge is wide enough to allow vehicles to be parked all down one side, as they do now. Petty Cury, on a Saturday especially, is almost a death-trap. The pavements are not wide enough for people to walk more than two abreast; therefore they walk on the road, thus giving bus drivers in particular a nightmare. This could be relieved to a certain extent if there were no vehicles parked all down one side. I suggest a big improvement would be the abolishing of all street parking and a municipal car park made on Midsummer common – Frederick Prior c49 09 06

1950 survey of parking shows 59,257 cars parked on Market Hill 43,582 on New Square 80,585 on Lion Yard during 1949-50 [5.7]

1951 Lion Yard : car park plans [3.6] [1.12]

1951 council consider ramped car park, Lion Yard, to have space for 180 cars but would be scaled down to 325 if Holford plans were approved [5.3,5.6]

1951 “more central space needed for parking ... people shop in other towns” (29.1.1951) [5.5]

1951 Regent Terrace park proposed April, complaints May, deferred June [5.9,5.12]

1951 Trades Council call for car parks on outskirts & all waiting in Cambridge abolished [5.13]

1951 Cambridge council agreed to a proposal that Mr Liddiard's garage on St Andrew's Hill should be pulled down and the space used as a private car park at £12 per annum. Ald Priest said: “Here is a simple scheme whereby anybody who likes to pay £1 a month can be reasonably assured of his car park any time of the day he likes”. Ald James opposed saying those who started their business at 9am had no difficulty in finding parking spaces c51 01 25

1951 “Utmost vigilance” on the part of the Cambridge Trades Council was needed to make sure the city council does not “pull a fast one” in its proposals to reserve a slice of Parker's Piece for car parking facilities. “I think the City council have put this back for six months and will bring it up again when they think it has all died down”, said the chairman. “We don't want to lose even a piece of one of the city's cherished beauty spots”. There was no need for a parking site in Regent Terrace as the accommodation of other parking places was not being overtaxed c51 07 20

1954 propose to demolish properties Corn Exchange Street to enlarge Lion Yard

1956 suggestion for parks outside centre rather than in Lion Yard [6.23]

1956 If the number of cars increases motorists won't be able to get in to Cambridge very easily because of all the stationary cars cluttering up the streets and the whole problem of parking is extremely frustrating. It is time to get tough. If we must set up car parks outside the city and run the people in by special buses then we mustn't hesitate. But the land once occupied by the old Shire Hall courts on Castle Hill would make a good site for a multi-deck car park. 56 03 30b

1956 Cambridge is beginning to taste the bogey of a serious traffic problem for the first time. The council has tried roundabouts, one-way street and traffic lights but the situation will worsen unless some drastic is done soon. It takes so long looking for a parking space that it would be quicker to leave the car a mile away and walk. It is better to ban all traffic from the city centre than to knock down buildings to accommodate new relief roads. Maybe this answer is too easy and not costly enough for our planners. 56 07 16b

1956 Councillors say that multi-storey car parks should be provided at Lion Yard, Saxon Street, Park Street and New Square and 170 cars should be parked on the site of the existing police flats at Parkside. But traffic congestion in Cambridge has become so acute that 'No Waiting' restrictions should be imposed in the central area and King Street made one-way. 56 10 16a

1956 Cartoon – Cambridge parking – car on spike – 56 10 20d

1957 street parking payment envisaged, Feb

1957 Park street site agreed for multi-storey car park, Apr.

1957 Parking meters suggested [7.2]

1957 Motorists should be charged for parking on the road as a way of reducing traffic chaos in the centre of Cambridge. People who wanted to pay visits to shops or offices could park for short periods but a car park would be cheaper for stays of more than one hour. At present motorists take little notice of the 15-minute only restrictions, many staying for two hours. People will not walk a quarter of a mile if they can find a space closer to the centre, planners claim. 57 02 05 & 05a

1957 At long last there is a street in Cambridge where cars can be parked during the hours of darkness without lights. Eleven lamp-posts in Station Road bear a special sign that mean motorists can park without even switching on the new 'clip-on' parking lights. Police say this is for the convenience of car owners who wish to travel by train and live some distance from the station. 57 02 16

1957 A revolutionary – even fantastic – scheme has been put forward to use Cambridge Castle Mound as a multi-deck car park. Tunnels would be driven into it to provide space for hundreds of cars with be entrances from Chesterton Lane, Huntingdon Road and Magrath Avenue. The dirt excavated could be used for filling in Coldham's Lane pit, providing more parking spaces or building land. There will no doubt be many objections. 57 05 15

1957 Proposals have been announced for an underground car park at Parker's Piece capable of accommodating about 5,000 vehicles. When complete it would be unaltered on the surface but beneath would be many acres of car parking space with four sloping entrances. It will take two years to build and be cheaper the present scheme for a multi-deck park on Lion Yard a councillor claims 57 05 17a [6.25, 6.30]

1957 It could cost less than £400,000 to build a car park for 800 vehicles under Parker's Piece. This is less than a multi-deck on the Lion Yard site that could only take 500 cars. The charge would be 1s 3d (07p) a session, whereas Lion Yard would be at least twice that sum. If motorists are going to be charged half-a-crown (12p) a time for the 'honour' of parking in the centre they will leave their cars outside the city or not even come at all. Then local trade would suffer, councillors claim. 57 06 18 [7.1, 7.2]

1957 Plans for a new car park at Parkside should be deferred until the proposed underground park at Parker's Piece is debated, councillors say. But they would deplore anything which would affect its amenities. The ground would take three years to be 'reinstated' ready for playing and there would be an area of the Piece which would be permanently sterilised by the construction of entrance and exit ramps, emergency escapes and ventilation apparatus. 77 07 23

1957 Proposals for an 800-space car park under Parker's Piece are technically impossible, opponents say. There are 'certain unsound features', it would be detrimental to the area and it would take years for the ground to be reinstated. The cost would probably be as great as that of the planned scheme in Lion Yard, though no car park of this nature has yet been constructed. But Labour councillors want it carried out as a matter of urgency. 57 10 14

1957 In 20 years time Lion Yard car park will be outdated as the centre of the City will eventually have to be roped off from traffic, Canon Mervyn Stockwood told the council. He had frequently been up to the top of Great St Mary's and seen the appalling havoc of the central area

in recent years. Now they proposed to put up a 'cheap and efficient sort of skyscraper'. He continued: "We are custodians of one of the most famous cities in the world. That sort of building cannot add to the dignity and loveliness of Cambridge" 57 10 18c

1957 Parker's Piece scheme rejected – 57 10 18b

1958 Park street plan approved, Mar [7.13]

1958 houses in Gothic street & Doric street demolished for new car park, Oct. [7.14] - pic 58 10 09a

1958 proposal to take part of Parkers Piece for car park, Nov [7.15]

1958 Parking facilities in Cambridge were inadequate, said the Chief Constable. With more than 600 vehicles passing over Magdalene Bridge each hour, Park Street was a convenient site for a car park. Saxon Street park had been finished last week, work on King Street had not started and the Parkside car park was only a small one. Park Street was the one that should have first priority as a surface and multi-deck car park. But a thatched house in Clement Street built about 1700 should not be destroyed by 'this cement desert' 58 09 27 b c d

1959 Parkers Piece reprieved, consider Donkey common, Apr [7.18]

1959 Lion Yard underground car park suggested, Apr [7.19]

1959 park & ride suggested, Jun. [7.20]

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 City councillors decided to drop proposals to use Butts Green as a car park for two years - even with the Lion Yard car park finished and new car parks in King Street and Park Street, there would still not be enough parking and it would never be reinstated. The income would never meet expenditure. Eventually Cambridge would have a city centre park charging about one shilling an hour. If Butt Green was to be charged at sixpence nobody would use Lion Yard and the council would be sabotaging their own scheme. 60 01 21

1960 parking meters suggested, Mar [7.22]

1960 Parking meters may be installed in Cambridge. It would cost sixpence to park for half-an-hour in an inner zone. When the time has expired a yellow flag flicks up and a patrolling parking attendant will place a yellow excess charge notice on the car. It can then stay for a further period when a red flag flicks up. This makes the motorist subject to prosecution in the courts. Two hours later and the car can be towed away. Councillors expect a certain amount of objections from shop-keepers and think yellow lines on the roads will injure the town's appearance. 60 04 26a [7.22]

1960 Sir – plans to make the centre of Cambridge a 'Pink Zone' with parking meters will have serious implications. Whereas currently 50 cars are parked in Jesus Lane, only 30 can be accommodated at meters. The result will be chaos with cars milling round in vain trying to find a parking space. Can anyone imagine a motorist being prepared to pay sixpence or a shilling to leave his car for three minutes while he takes his suit to the cleaners? Lion Yard is often full by 9.30 am and if the city is to prosper we must have space for vehicles. The only answer is to provide some very large multi-deck parks, then make motorists use them by restricting waiting on the street – 'Fair Play' 60 10 12

1960 "parking problem continues to grow" feature, Sept [7.23]

1961 The proposed King Street car park would have to earn three shillings and three pence per car space per day. But apart from Saturdays the car park would not be filled by members of the public. The Lion Yard only took three shillings – though councillors and employees parked there free. However they would also put in parking meters and with car parking meters there would be

no worries about the multi-storey car park. But a shop and filling station were an important part of the project 61 06 30a

1961 New Square was a very good site for a multi-deck car park, councillors were told. But Coun P.J. Warren said that when the site was conveyed to the Corporation in 1923 they'd given an undertaking that no building would ever be erected there. Even now they were spoiling the best example of domestic lay-out in Cambridge. People who lived in New Square already had enough to put up with without such a suggestion. It should never be raised again in their lifetime, the Traffic Committee agreed 61 01 20

1961 Traffic and parking 25 years ago – 86 01 23a & b

1962 parking meters approved, Apr [7.25]

1962 King Street car park proposed, Jul [7.24]

1962 “leave all cars at city boundary & travel by bus [19.12]

1962 The city council want a three-storey car park in King Street, between Malcolm Street and Manor Street. There would be space for 260 cars together with a filling station and a maximum of nine shops. It would form part of the pattern of perimeter car parks with another in Park Street. There would be an inner ‘control zone’ and an outer area for car parking administered by meters. This would accommodate over 400 more vehicles and relieve congestion. Motorists were reluctant to use parks away from the city centre as they wanted to get as near as possible to their places of work, an Inquiry was told. 62 02 20 & a 62 03 22a [7.24]

1962 Sir – the subject of traffic problems is perennially popular. I suggest building an orbital road around Cambridge with a number of tiered car parks. All cars would be required to park and the journey would be completed by bus. Since everyone would use them the service would be well patronised. It would spare Cambridge from being a mere island set amid roads and car parks, bathed in swirling mists of exhaust, serenaded by that odious sound of creeping, choking traffic – R. Hennessey, Brookside. 62 06 08c

1962 Bulldozers and heavy earth-moving machinery have been followed by a fleet of lorries as clearance work starts on the site of the new multi-deck car park in Park Street. It should be completed within nine months and will form an integral part of the new parking meter system for which the City Council is to seek Ministry approval. Councillors are still waiting a decision on their earlier application for another multi-storey car park about 200 yards away in King Street 62 09 05

1963 Ministry receive 53 objections to meters, Apr; charges would be 1/- hour inner zone, 1/- 2 hours outer zone; would be profit of £10,000 pa on controlled scheme, income from meters would pay for themselves within 3 years [8.2,16.6]

1963 Park street multi-storey car park opens, Oct, thatched cottage to come down if extensions [8.4,44.6,15.6]

1963 Minister criticised over delays King St multi-storey which would supplement Park St, waiting 13 months [16.6]

1963 Logie scheme for underground loop road & car parks from Emmanuel Road to Jesus Lane to give traffic access but unspoilt centre [7.26]

1963 proposed 750 vehicle underground car park between central lamp standard & Regent Terrace [4.3]

1963 Editorial : “They come thick & fast - plans for the University’s New Museums Site, plans for underground car parks with an attendant underground road, plans for parking meters, plans for a new surface water sewer, plans for a design policy for the control of the visual appearance of Cambridge. Indeed never in the history of Cambridge has there been such a paradisaical period for planners. And now ... County’s turn with a scheme for a new village to the North of Cambridge” 28.3.63 [2.14]

1963 The new car park at the rear of Queen Anne Terrace has now been completed and is open for public use, free of charge. It adjoins the car park at the new swimming pool which can accommodate 67 cars and has been constructed as part of the council's policy for traffic control in anticipation of the Minister's approval of the parking meter scheme. The multi-storey car park in Park Street should be in use by the middle of the year and a decision is awaited on an application for another in King Street 63 04 03

1963 Ministry receive 53 objections to meters, Apr; charges would be 1/- hour inner zone, 1/- 2 hours outer zone; would be profit of £10,000 pa on controlled scheme, income from meters would pay for themselves within 3 years [8.2,16.6]

1963 The Government rejected the City Council's scheme to build a multi-storey car park together with shops and a petrol filling station on land near the Malcolm Street junction at King Street. The site is obscurely located in a residential area and the roads leading to it are narrow, awkward and unsatisfactory. It would cause serious detriment to adjoining properties and initiate a substantial commercial encroachment to the detriment of the special qualities of the cultural and central area of the city. An alternative site should be found, the Minister says 63 05 15, 63 05 11

1963 The introduction of parking meters will cure Cambridge's traffic problems, say councillors. There will be sufficient off-street parking for motorists staying for any length of time. At present people move police 'No Waiting' signs and hope they will not be caught. When they drive away others pull into the gap without bothering to check whether they are in a restricted zone. Although police decorate them with pink tickets, the cars still obstruct a length of street until they are eventually moved. But many of the new parks are a considerable distance from the centre and motorists will just not park in Saxon Street or Queen Anne Terrace and walk in. Rooftop parking will have to be employed, perhaps at the former Herbert Robinson property. 63 07 16

1963 Park street multi-storey car park opens, Oct, thatched cottage to come down if extensions [8.4,446.15.6]

1963 Minister criticised over delays King St multi-storey which would supplement Park St, waiting 13 months [16.6]

1963 Logie scheme for underground loop road & car parks from Emmanuel Road to Jesus Lane to give traffic access but unspoilt centre [7.26]

1963 editorial re planning [8.1]

1963 proposed 750 vehicle underground car park between central lamp standard & Regent Terrace [4.3]

1964 first parking meters empties streets, queues for car parks which fill & not enough meters; traders say meters upset sales, one reports 78% dip [12.9,16.7]

1964 "we must take action over parking", off-street parks near perimeter town centre [16.9]

1964 Logie wants traffic-free centre, traffic conditions frightful in centre on Saturday afternoons [19.15]

1964 Gordon Logie, the City Architect spoke of his desire to see the central area of Cambridge used for pedestrians only. Traffic conditions were 'frightful', especially on Saturday afternoons. "It will be impossible for everyone to drive into the centre in the future. I am afraid that most people will have to walk in from the outer fringe car parks or travel by shuttle-service public transport", he told the Trades Council. He would like to see a new city hall and central library to replace some out-of-date shops in an attempt to make the central area more pleasant. 64 01 16

1964 Lion Yard car park as traffic meters come into operation – 64 04 01

1964 The Mayor of Cambridge fed a parking meter on Peas Hill with a shilling "to make them hungry and ready to bite" as one official put it, and set the new parking scheme in motion. Long queues of traffic soon formed in streets leading to the Lion Yard car park and motorists had some acid remarks about the meters. A moped rider complained about finding a ticket stuck to his bike

with thirteen inches of sticky tape. From the number of excess charges shown on the meters the city coffers will soon begin to bulge 64 04 02b

1964` A Regent Street trader has lost 78 per cent of his usual turnover since parking meters were introduced, Cambridge Chamber of Commerce was told. A survey of over 30 shops showed the average loss in turnover as 45%. There should be a reduction in rateable values and compensation for businesses which are forced to close. Meters should be closed down and a return made to unilateral parking supervised by wardens. But the Parking Committee chairman said that if motorists used the meters to the full they would get most of their customers back 64 04 30

1964 A car park was needed on the West side of the river to help clear Queen's Road and they should consider an underground car park at the Backs, councillors heard. Park Street was a mistake because it was too near the city centre but Coe Fen was one of the best places for a surface car park. Queen Anne Terrace was a marvellous site as it could have a basement, three or four storeys of flats and a roof garden restaurant. There would be a mini-bus to get shoppers into the centre which meant the Lion Yard would be used more by people who came to park for the day. 64 06 30

1965 double-yellow lines introduced, began painting March, 16 miles [16.10]

1965 Shire Hall car park not to be opened to public – 65 10 15b

1966 "Shopping Growth" plan includes Christ's Pieces with underground car park, Kite favoured [494.5.5]

1968 Parker's Piece plan to be re-examined, shelved 10 years ago, scrapped [4.4]

1969 cars stopped parking market hill [12.7]

1969 double parking meter charges [16.11]

1969 Christmas traffic kos police, streets blocked by cars en route Lion Yard, close Downing St from St Andrews St end, open outer parks; police use emergency powers [17.3]

1970 park & ride suggestion [17.4]

1970 one-way scheme around Lion Yard car park experiment, causes one of biggest jams ever [17.5]

1971 proposal 400 sq yds entrance Queen Anne car park, petition, DOE inquiry, postponed [4.5]

1971 100 more meters [16.12]

1972 Petty Cury closed to traffic February, councillor celebrates with lunch in street, reopens end of month but closed & Corn Exchange Street opened June [12.13] [3.10]

1972 A free parking bonus will be given to motorists using Cambridge's show-piece Lion Yard car park during its first weeks operation after the opening date on July 24 The city's Traffic and Parking Committee decided to cut parking charges by 5p during the working day for the first week, which means one hour's free parking during each parking period. If a motorist leaves his car at Lion Yard for one hour or less it will be completely free c72 06 02

1972 The Lion Yard multi-deck car park opens on Monday proving another 500 car spaces within a stone's throw of the centre of Cambridge. The completion marks the first stage of the city council's multi million redevelopment project for the area - which was first proposed nearly 25 years ago. The new park, which aims to cater for the shopper and the shortstay motorist, is the second major car park to open in the city in less than a year. The other is at Queen Anne Terrace, which opened last October. The usual parking fees will be 5p for the first hour, 15p for two hours, 25p for three hours, up to a maximum of 75p for 10 hours. The council hope the prices will

encourage people who work in the city centre to leave their cars in the parks away from the centre, like New Square and Prospect Row, where the charges are considerably less. c.72 07 24

1973 The Market Square ends of Guildhall street and Peas Hill, Cambridge, were closed to traffic today as part of city council's plans eventually to make much of the central area into a pedestrian precinct. It is now possible to walk from Sidney Street to King's Parade without crossing a road. City surveyor, Mr Geoffrey Cresswell said that some motorists were still driving round Market Square attempting to get into Peas Hill. The present closure is officially regarded as only "temporary" - although it will last for possibly another two years - while rebuilding of the adjacent Lion Yard site is under way c73 04 09 [17.9]

1975 parking chaos at Christmas - 400 cars going round & round looking for parking places [19.1]

1975 1960s Spine relief road moved further out & called Inner Relief Road; since then been eroded section by section & Cross Town route abandoned. Present position (1974) is relief will be provided by outer area link roads & by bypasses. After 25 years the Eastern by-pass from Brooks Road to Milton Rd, the New West Rd from Huntingdon Rd to Trumpington Rd & stage one of Inner relief road are all that remain of Holford unchanged in centre over last 10 years stead move towards reducing intensity of traffic & parking in centre by controlling non-essential traffic & getting high turnover of parking places in central area first proposals put forward by R Travers Morgan 1963-4, further developed in City Surveyors report 1967 which also proposed pedestrianisation some central areas, 1972 Transportation Plan endorsed proposals [10]

1976 Cambridge's experimental "Park-and-ride" scheme got off to a slow start today. The first bus left from the Cattle Market at 10 am and carried only 10 passengers. The scheme is designed to relive the normal pre-Christmas traffic congestion by allowing motorists to park free of charge and then buy a 15p return ticket to the city centre. It will operate each Saturday until January 8th with buses leaving every 15 minutes. The first passengers were enthusiastic about the acres of parking space available. "Its marvellous being able to park so easily" said Mr John Blackman, who had driven in from Sawston c76 11 06

1978 RAC say profit of £134,293 on meters over 12 years, '... to show big deficit this year' [19.2]

1978 "parking is so easy on the Kite" advertising feature [494.7.6]

1979 meter fees to increase 33% computer lights opposed [18.8]

1979 Charges at Cambridge car parks and parking meters are to rise. Prices will increase from 25p to 30p for an hour at Lion Yard and a day's parking at Queen Anne Terrace will now cost 30p. Park Street will remain unchanged. Parking meter charges have not gone up since 1976 and will double to 10p, with the excess charge rising to £5. Increased use of the three central car parks is expected to bring an extra £15,000 next year but because of the rates forecast an extra £45,000 needs to be raised. CEN c 16.1.1979

1980 RAC survey wrong, city meters lost £12,000 since 1974 [19.4]

1980 Anyone who has sat in a traffic queue tailing back into Downing Street from the Lion Yard car park will know the frustration of arriving in Cambridge at peak times. The tourist office says parking is atrocious and directs visitors to Saxon Street where you can stay all day for 30p. The County Structure Plan foresees a need for three new multi-storey car parks to cope with future demand. But rising petrol prices or decreasing oil supplies could mean fewer cars on the road in the future. 80 09 18b & c

1981 park & ride suggested [19.5]

1981 Kite : car parks close [494.7. M11 reduces traffic volume, heavy lorries down 60%; 35-% Newmarket Rd, 30%, Huntingdon & Madingley Road, 26% Trumpington Rd [4.10]

1981 chaos – Kite Parks lost & protests about parking on commons [18.12]

1981 Cambridge councillors have thrown out the idea of ever building a multi-storey car park anywhere near the Backs. They condemned as ‘barbaric’ suggestions from senior officials that such a park, either above or below ground, could be built on college gardens, playing fields or open spaces along Queen’s Road. “It is even more ridiculous than the plan to put a major road cross Grantchester Meadows”, said Councillor Rosenstiel. 81 02 18a

1981 A park-and-ride bus service linking shops in the Burleigh Street area with the car park in Cherry Hinton Road has started disastrously. Nobody used the service for several hours. It is being funded with £400 from city lottery profits with Kite traders adding another £100. But councillors say the money should have been earmarked for charity 81 09 15a

1981 A startling £3.5 million plan to tunnel under The Backs has been prepared secretly by county road engineers. It would be 20 feet wide and run under Queen’s Road from the Madingley junction right up to Silver Street. Meter controlled parking would then be allowed up to Garret Hostel Lane and the area to West Road would be grassed over to give an uninterrupted view of King’s College chapel. The plan is certain to raise a violent storm of controversy. 81 11 25 & 26b

1983 park & ride resurfaces [18.15]

1983 county plan to enforce traffic restricted zone Sidney St, reduce number cars in triangle & reverse central one-way flow [18.16]

1983 The County Council has been urging Cambridge councillors to provide more city centre parking space. They say 1,000 extra parking spaces are needed. Now they have suggested six sites: a 250-space extension to the present Lion Yard multi-deck, land behind Telephone House in Regent Street-Park Terrace (220 spaces on a four-deck park), the old Addenbrooke’s Hospital site (250 spaces), land behind Shire Hall (450 spaces on a three-deck park), Saxon Street (480) and Adam and Eve Street (460 spaces) 83 04 26 p5

1983 More than £1 million has been collected from Cambridge parking meters since they were first introduced in 1964. Motorists have put £1,065,574 in the meters but the operating costs have been £849,480 leaving a profit of £216,094. This goes towards helping the councils provide more off-street car parks 83 12 29 p8 [19.6]

1984 The County Council chairman condemned councillors for their ‘pathetic attempts’ to sort out the Cambridge traffic problem. “There is no doubt whatever that what we do in Cambridge is pathetic compared to what is done elsewhere. We really do not know what we are doing in this city”, he said adding that the county must keep up pressure on the city council to provide more parking facilities in Cambridge. 84 09 07

1985 A major shake-up to cope with the forecast massive increase in Cambridge traffic has been unveiled by the County Council. It suggests an underground car park at the Butts Green end of Midsummer Common and a new road following the main railway line with a new bridge over the Cam. There could be reconstruction of a number of major road junctions including East Road - Newmarket Road and at Hyde Park Corner with widening of dual carriageways and new cycleways. A park-and-ride system of new car parks linked to the centre by frequent buses is also proposed 85 03 11

1985 A furious political row has erupted over the sudden and unexpected publication by the Labour-controlled City Council of its new roads and traffic plan just before the County Council issued their proposals. It envisages a park and ride system, converting long-term city centre parking spaces to short-term shoppers’ parks, an extension of Lion Yard car park, road closures,

pedestrian areas and a special coach-bus interchange near the railway station. The Liberals describe it as a waste of paper. It has been produced without any councillors or officials being told about it before its release to the press 85 03 11a

1986 meters may rise by 33% despite £31,000 profit pa [19.7]

1987 "Cambridge is doomed as major shopping centre unless it can cure parking problems" [20.7]

1987 A new purpose-built car park providing 67 long-stay spaces has opened in Castle Hill, with another 57 places coming in a few months time. City councillors say the park, near the junction with Victoria Road, will offer convenient access to shops and businesses in the north of Cambridge. It will have a park-and-display system charging 50p for any period on weekdays, doubling to £1 on April 1st. But there will be free parking in evenings and Sundays 87 03 13a

1989 park & ride costs treble to £15M ¢CEN 26.1.89

1989 Queen Anne car park to switch to short-term - charges per day up from £1 to £10 ¢CEN 89 03 01

1989 to introduce resident parking for fee ¢CEN 89 03 01, 3.3.89

1989 Traffic chaos in Cambridgeshire is growing so severe that in five year's time drivers may have to set off at 7 am to be in work by nine. A massive upsurge in traffic has already extended the rush hour. Congestion is choking Cambridge city centre and deepening the parking nightmare, a report says. Action must be taken with new roads around the outskirts and controversial park-and-ride schemes or it will grind to a halt over the next ten years. 89 03 22

1989 parking charges cause slump sales small shops ¢CEN 89 04 25

1989/1989 Grafton centre price rise for car park leads to 25% drop in number using it ¢CEN 89 06 08

1989 Cambridgeshire's new traffic chief has vowed to end Cambridge's traffic and parking chaos within four years. He wants a better road system to serve the industrial quarters, a new light railway system linked to a park-and-ride scheme and a possible car park under Midsummer Common. A 'grand traffic management plan' will be drafted by officials and meetings arranged with business bosses.. 89 06 09

1989 The £15 million park-and-ride scheme planned for Cambridge is now officially buried. County Conservatives had promised during the election campaign that the plan would be dropped if they took control and have told officials to stop work on the joint scheme with the city council. And a plan for an interchange where Madingley Road meets the M11 has been delayed. Work was due to start in 1990 but now the M11 is to be widened into a three lane carriageway between Cambridge and Stansted Airport. The council is now looking for alternative road schemes to spend the money on. 89 06 10

1989 city advertise car park prices to attract shoppers back ¢CEN 89 07 13

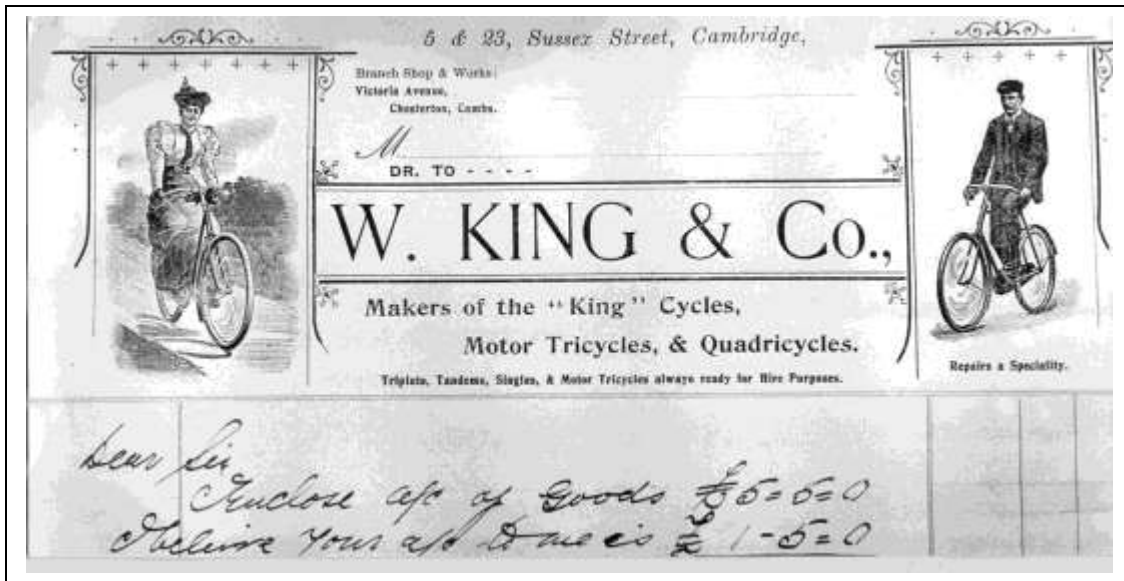

1989 The controversial Cambridge park and ride scheme has started with a whimper. At peak commuter time there were 17 cars at the 400-space Cowley Road and even fewer at the 150-space car park on Clifton Road. Users were enthusiastic: Sophy Moxley of Willingham, a sales assistant, said "It will save me money because it only costs 50p which is cheaper than parking in the city centre though Steve Field from Stretham says it is inconvenient as you don't have access to our car during the day. Councillor Andrew Duff said the area around Castle Hill, where residents-only zones have been introduced, was 'almost pastoral' though Canterbury and Benson Street were packed with cars. 89 10 01

Cambridge Liberal cycling club history – 33 01 14a & b

King motorcycle history 60 03 28

The appeal for pioneer women cyclists heard from Dorothea Conybeare. Her father, Rev Edward Conybeare of Barrington, had bought her sister a bike on 28 July 1893. By 1894 women's bicycles still rather unusual and fellow Perseans were much impressed when they'd cycled in from Barrington to be present at an examination for which the train would have been too late. She does not remember seeing any Cambridge women or girls bicycling before 1893 but saw two during a visit to Leicestershire in 1892 and was agreeably surprised by their grace and dignity 37 07 31a

1847 “in 1847 Cambridge had giant tricycle with 12 foot wheelbase” [6.24]

1863 first bike made & ridden in Cambridge (“73 years ago from 1934) TT 17.11.34 [2.8]

1868 Robert Taylor of Soham made bike, biked to London 1870 & his was first bike seen there[2.10]

1868 one of first bicycles seen in Long Road [9.10]

1868 ??? Cambridge blacksmith invented ‘suspension wheel’ - thin iron spoke for bike wheels [2.1]

1890 John Howes made own 'Granta' cycles[27.2.8.12] {26.485}

1897 A trades and cycle exhibition was opened at the Cambridge Corn Exchange yesterday. A large part of the exhibition is devoted to the cycling trade and local firms are showing cycles of the finest and best patterns. At the stand of the Cycle Supply Co, (whose place of business is 23 Sussex-street) can be seen some fine specimens of the King, Granville, Ensign and Vanguard Cycles. The King cycles are made by the firm and three of the machines exhibited have been made to order for Cambridge people. The machines are a remarkably neat and well-finished lot. Ladies' machines can be obtained from £9 and gents' from £8 c1897 07 04

1897 A company has been formed to acquire the rights of an invention for automatically securing and holding cycles upon the principles of the penny in the slot. The public cycle racks will be placed in convenient centre, and, by putting his penny in the slot and thereby unlocking a lid which closes over the wheel, the owner can place his machine in perfectly safe custody, and take away with him a key, by which key alone the locker can be undone. To get his machine out the cyclist opens the lid, replaces his key, turns it and lets the lid down; the wheel is released by the falling of the lid, the penny drops into a receiver, the key is secured and the apparatus closed. 1897 11 09

1897 At the Cambridge Wanderers Cycle club annual dinner Mr G. Edwards, the Captain, said he did not say all cyclists were angels, because they were not. There were men who went tearing about, whistling down the street, ringing their bells and expecting to have the whole street cleared for them. There was another class who went for a ride in the country and had a sort of liking for riding on the path. Had the chief constable put a constable in the road in proper uniform no one would have complained. But he had to go and put a man in plain clothes to capture the people. The speaker was sure that the chief constable had a rise in his salary for the smart capture of cyclists 1897 12 14 CDN

1898 Cycle traders of Cambridge have put on one side petty jealousy, and uniting under the title of the Cambridge City Traders' Association have prepared an exhibition in the Corn Exchange. Every description of cycle is here, from the child's small machine and the slim one of the fair sex to the stout roadster of the hardy, touring, record-making male. The latest novelties find a place, and motor cycles and tricycles tempt those to whom ease and novelty are more than exercise. In this connection we may mention that it is proposed to have a motor car running during the week about the town in connection with the show. Special railway facilities have been granted and the exhibition should be an immense success. To all we would say "Go", whether a wheeler or not.

CDN 1898 02 07

1898 After a considerable period of immunity from serious fire outbreak, Cambridge was visited with a fire which, but for the prompt measures taken for its suppression, must have caused widespread destruction of property in the vicinity. The conflagration occurred at Mr Varty's cycle stores in Bridge Street. The cause is supposed to have been a large lamp which was hanging up in the shop falling to the floor and igniting. The building is a very old one and contains an enormous amount of timber and this, upon being seized by the flames, burnt rapidly and fiercely. A large number of bottles of lubricating and lamp oils in stock added to the conflagration. Some 60 bicycles which were stored at the back of the house, belonging chiefly to University men, were rescued, together with some horses stabled in a shed at the side of the house CDN 1898 02 14

1899 There was a special temptation to the members of the Cambridge Wanderer's Cycling Club yesterday. It was "photo day"! We went away slowly for were we not mindful of the fact that a perspiring group would not make the best of photos? Moustaches shining in all the glory of a recent application of cosmetic had also to be studied. Our destination was Ditton Plough and when we arrived there was a general "spruce up", so anxious were we that such a "galaxy of beauty" should not be lost to posterity. Mr Lord placed us in position, endeavouring to look pleasant, keeping our heads on high and remaining perfectly still all at the same time. Three plates were used. That photo should be a good one - 1899 06 26

1901 The other day on a road outside Cambridge I met the Vice Chancellor of the University. Mr Chawner was not walking – he was not driving – he was riding a bicycle. I was not surprised. Were the Chancellor himself to take to bicycle riding, or the Bishop of Ely, there would be no comment to be made, except, perhaps on their style of riding. I would remark that on a bicycle the Vice-Chancellor carries himself with the grace and dignity becoming his office c01 06 26

1902 Sir – Allow me to warn cyclists using Hills Road that if the large patches of stones on the road tempt them to save their tyres by riding on the footpath they will probably be taken by constables in plain clothes. I am told they use a convenient post for observation, where they can watch the progress of cyclists along the footpath. Their action can be expected to yield a good crop of cases before the magistrates and fines of five or even ten shillings. Authorities who set constables to pounce on cyclists have devised a mean and contemptible means of employing a set of honourable men. This is against the spirit by which the law is meant to be administered – G.F. Searle. CDN 1902 02 03

1902 How often is the extremely low-priced machine a pitfall and a snare to the unwary novice. Glittering plate and enamel make it as attractive as the more reliable cycle, but also serve to hide a crowd of defects. The sensible cyclist knows that good value can only be obtained in one way and Messrs J. Howes and son of Regent Street, Cambridge have proved that good value is the foundation of good business. Their own bicycle, the Granta, is a fine piece of workmanship constructed with the greatest care. Now that the free wheel has come to stay, brakes have become absolutely essential. CDN 1902 02 26

1903 The Cambridge Corn Exchange exhibition of cycles and motors has become an annual event. Motors and motor cycles are as yet in their infancy and each year sees great strides taken towards perfection. There are on view some fine, up-to-date specimens of motor cars. The Mayor said he was a cyclist of some years' standing but his experiences of motor cars was very limited. He had been for a ride on a motor car, and thoroughly enjoyed it. Manufacturers were handicapped by stringent laws as to the pace motors might travel over public roads. While so many horses were about it was startling for them to find a vehicle coming at 20 miles and hour and making rather a peculiar noise. c03 02 25

1903 A large number of ladies interested in cycling met for the purpose of forming a cycling club for the benefit of those ladies engaged in business during the day in order to provide some recreation in their evening and leisure time. Runs and picnics will be arranged during the summer with socials and dances in winter. No opposition was aroused until the question of colours was arrived at and light blue and pink were decided upon. There was a little more discussion as to how they were to be worn but it was decided to leave it to the discretion of the members. c03 03 18

1903 At a meeting held at the Horse and Groom Hotel, Cambridge, it was resolved to form a new cycling club to be named the "Belmont Cycling and Motoring Club". Mr Lawrence, of the Belmont Cycle Works, who is the founder of the club promised members a very substantial

reduction on all goods and repairs at the Works and also offered a 10-guinea challenge cup to be competed for yearly. The club promises to become very popular c03 04 22

1904 cycle dealer hides medallion, finder gets bicycle - will lend bikes to people looking for it [7.5]

1904 cyclists now allowed on more paths over commons [8.7]

1904 "a few years ago the bicycle was a real terror, accidents were frequent, now regarded as one of the ordinary dangers & lookout for the 'wheeler' going at 20 mph ..." [8.5]

1904 Professor Darwin was summonsed for riding a bicycle on the footpath on Coe Fen. Pc Ridgewell said he had got off when he spoke to him but then mounted his bicycle and rode off. The Professor said he thought he had better get off the common as quickly as possible and it never occurred to him that he should walk. He had ridden the path for ten or twelve years and had never been spoken before. He was fined five shillings. 1904 06 10

1904 The Official Receiver examining the affairs of a cycle dealer in King Street, Cambridge heard that he had begun business in 1895 and made a fair income until two years ago. The causes of his failure were bad trade, loss on a motor car and the illness of his wife and family. Since the receiving order had been made he had kept two men on the premises at work doing repairs to keep the business going. The New Hudson people had written asking what he would take for the whole thing and Mr Ison had also been after it. The Receiver said 'A man who would work would do very well. Of course when a man stands outside for an admiring crowd to gaze at you cannot wonder ...' Among his creditors were Macintosh and Sons, J.F. Amps, Enfield Cycle Co, The Cycle Exchange and H. Swainland. CDN 14.9.1904

1905 'Cyclist' writes that he started on a long ride into the fen districts and distinctly remembers placing a repair outfit in his saddlebag. When in one of the most benighted parts of the fen he discovered a puncture he turned his machine in readiness to repair it. To his disgust he found his repair outfit had been abstracted from his bag. The theft is one of those paltry offences that only an excessively mean nature would cause a man to commit. 05 07 08c

1905 Mr S.W. Lack, the Histon cyclist has just completed another season during which his successes have firmly established him in the front rank of cyclist athletes. Since he began racing five years ago he has won prizes worth more than £2,000 which are now on display at Joshua Taylor's. They include the Ely Challenge Cup which he won outright in 1903, despite fierce competition from London cyclists. They have all been won on a 'New Chesterton' manufactured by W.J. Ison of Cambridge. 05 09 27a & b

1905 Cambridge possesses a road-racing cyclist of repute in Mr A.G. Markham one of the most prominent of the North Road Club. Road-racing is not extensively advertised and his achievements are not widely-known. Last Saturday he took part in the Club's 12 hours' unpaced time trial when he covered 193 miles including a ride to King's Lynn against a stiff breeze. Earlier he covered 100 miles in the good time of five hours, 23 seconds. He rides a 'Belmont' Cycle made in King Street 05 09 27c

1906 cat punctures new pneumatic tyres [8.9]

1906 Isaac Wilderspin, implement maker of Elsworth won first prize in an international competition for the best non-skid tyre for bicycles. The trial lasted five days with machines tested on a slanting asphalt track, besmeared with Thames mud and soft soap before being sent on a 300 mile run on the high road. It was ridden by W. Tolliday of the firm of Parker and Son, cycle makers of St Ives. Now he has invented a similar tyre for motor cars. 06 06 30a

1906 Cyclists are petitioning Cambridge town council against the use of flints in the streets during wet or frosty weather. Something must be done to stop the spreading of these puncture traps. Surely some other material can be found. The flints are also driven into the wooden paving

blocks by heavy traffic and must damage them. Cambridge is not such a hilly town as to present unusual difficulties in this respect. We trust everybody will sign the memorial of protest. 06 11 06a

1907 Arthur Markham held world cycling records - 307 miles in 24 hours, also 50 miles in 2 hours & 100 miles in 5 hours [38.3.3]

1907 Messrs King and Co are displaying a number of cycles and motor cycles at Cambridge Corn Exchange. There is with a 'Rex' motorcycle which can be bought for 24 guineas, one of the cheapest on the market, and the 'King' bicycle with Crabbe brakes, Warwick tyres, Hyde free-wheel, Perry chain and Brooke's saddle, costs six guineas. Standardisation of parts has indeed wrought a revolution in the cycle industry. 07 07 16

1908 consider banning cyclists from Senate House Passage [1.15]

1908 Herbert Robinson bicycle showrooms expansion - 08 04 17b

1908 Cambridge Ladies' Social Cycling Club held 30 runs last year which were not so well attended as before, owing to the unsettled weather. Three invitation runs were arranged to get other cycle clubs to join, and they were well patronised. Successful picnics were given at the Swan House Tea Gardens, Harston and at Whittlesford. A prize will be awarded to the lady who attended the most runs during the season. 08 05 12

1908 Quinsee, cycle dealer and repairer, factory case - 08 05 09

1910 "bicycles a nuisance, pavements full of parked machines whilst college courts empty - it will be 20-50 years before the problem is solved" [8.16]

1910 "bikes needs as working people cannot afford to live in Cambridge" [8.18]

1910 cycle dealer invited by De Freville resident to offer price for second-hand bike, she wants £3, he offers 35/- (£1.75) & at that price woman sells it to neighbour [9.1]

1910 complaint that chipped flints put on roads to provide footholds for horses during snow destroy cycle tyres [9.2]

1910 Two London youths were charged with stealing and receiving cycles. A clerk in the booking office at Shelford station said one lad had come in with a cycle which he had sent to London by the 2.14 train. It had been collected from St Pancras station next morning and taken to a pawnbroker who was suspicious and informed a detective. The lad confessed: "Me and Wilson went to Cambridge on Saturday and stole two. We rode over to Shelford and booked them to London then walked back to Cambridge and I got another one" 10 03 25c [8.17]

1910 Through the enterprise of Mr W.J. Ison, the Cambridge public is able to see the latest developments in bicycles as exhibited at the great cycle exhibition at Olympia, London. In the windows of his depots in Chesterton Road and St John's Street are to be seen samples of the all-steel Raleigh cycles which attained such wide fame. Doubtless many local cyclists will take the opportunity of inspecting these latest models of all that is best and most modern in the bicycle - 10 02 09c

1911 Robinsons do large business hiring bikes to undergraduates, lost 20 bikes in a year, bikes so plentiful & left in such a reckless way that remarkable so few lost [9.16]

1911 "bicycles have solved the housing problem - people have to go so far from centre to find houses to rent [9.19]

1912 Ben Hayward cycle & electric shop opened [NS2.13]

1912 pranksters replace bicycle light oil with cold tea [9.4]

1912 Belmont Cycle and Motor Club is in a very flourishing condition with an increased membership and improving balance sheet. It will continue to support amalgamation of other clubs to promote the social side of cycling and to arrange the club fixture cards to fit in with

amalgamated club runs for the coming season. This would foster friendly feeling and attract fresh members, members were told. 12 03 01c

1912 Mr A.G. Markam, the ex-holder of the 100 miles' world's tricycle record and present holder of the 24 hours' Eastern Counties tricycle record, covered the splendid distance of 192 miles in twelve hours. For over 60 miles he had to struggle with a dead head wind which blew with tremendous strength across the open fenland. To make things worse, at 140 miles his stomach went wrong and he went all to pieces. Four times he gave up the ride as hopeless but his followers would not let him rest and after dosing him with brandy and bathing his head they managed to keep him at it. It is doubtful if any other man of his age – he is 44 and has been taking part in violent athletics for 26 years – would have done such a ride. 12 08 02aa

1913 cycleways suggested [9.13]

1913 Some astonishment was caused in Histon one evening by the appearance in the village of two cyclists, mounted not upon the ordinary 'safety' so common nowadays, but astride the high velocipede, with the large and smaller wheels, which were much in vogue some two decades ago. 13 07 04 p12 CIP

1915 Mr A.G. Markham, the well-known Cambridge cyclist, met with a serious accident. He was riding a cycle along Victoria Road and was about to pass some horses ridden by soldiers, when one of the animals shied and, backing into Mr Markham, knocked him on to the kerbstone. The result was he was badly thrown, dislocating his shoulder. 15 04 02

1919 Hallen's demonstrate power tricycle at Mammoth show [12.3]

1920s "bicycle standard transport, dons had machines of more than ordinary height & unusual construction, a Regent Street cellist had one with tyres twice normal diameter to protect cello from shock" - Acres [4.3]

1920 Cycle Locks.—For a good many years Cambridge has suffered from the depredations of the cycle thief, despite the vigilance of the police and numerous convictions of offenders. At a time when a bicycle is such an expensive item, and thieves are as active as ever, the invention of a simple lock has come as a great boon to cyclists and motor cyclists. A well known Cambridge scientific engineer—Mr. O. W. Hallen, of 58a Bridge Street—gave some thought to the matter, and he has devised a simple invention which will readily command itself to owners of bicycles and which should effectively reduce the number of thefts of machines from the streets. The lock is a permanent attachment to the cycle or motor-cycle, and when it is thrown into action it prevents the rotation of the wheels. The device consists of a clip to fix on the forks of a bicycle, and a moving lever secured by a padlock. When the bicycle is left unattended the lever is pushed inwards towards the wheel and locked. It is then impossible to ride the machine, as the lever obstructs the spoke of the wheel. When the lever is withdrawn by the rider it does not interfere with the free movement of the spokes. Small and unobtrusive, Mr. Hallen's device weighs but a few-ounces, and is practically stamped from one piece of metal. A thief could neither unscrew it nor break it without the use of extreme force, and as the lever will probably be case hardened when produced on a larger scale, it will be almost impossible to file through it. The device should not prove expensive, and the largest item will lie in the cost of the padlock selected by the cyclist himself. Mr. Hallen is at present negotiating with several large firms of cycle accessory makers for mass production of the device on a large scale. 20 04 14 CIPof

1920 Method of disposal of bicycles stolen from streets disclosed at court – taken to Shelford station and sent to London - Ch 20 10 27

1923 Sir - During the time that Silver Street, Cambridge, has been closed for traffic, some hundreds of persons have used Mill Lane, Sheep's Green to Newnham mill path. This opens a solution of the problems of relieving Silver Street of a great number of bicycles, especially during the dinner hour. I would like the Corporation to consider widening the wooden bridges, lessening the gradients, covering in the outlets of Newnham mill, and improving the cobble stones in Mill Lane, in order to encourage cycle riders to use this way. The one drawback to this scheme is the sharp turn at the King's mill corner, but this might also be overcome – "Newnhamite" c23 09 18

1925 cyclists allowed to go against stream of traffic when Market St & Petty Cury made one-way [1.20]

1926 of 1996 bikes found by police 1,709 reclaimed [6.26]

1927 appeal for bike parking places [7.8]

1927 There was a good deal of grouching before the inhabitants of Chesterton had a footbridge over the Cam at Dant's Ferry. Now they have got one they have found something else to grouse about. At five minutes to eight every morning the instrument workers at Pye's are hurrying to work from the other side of the river. They curse and groan, trip and stagger under the burden of carrying their bicycles up and down a steep double flight of steps. Sooner or later some panting person carrying a bicycle will fall backwards or pitch into the river. The bridge was not made for cyclists who should get up earlier and ride up Victoria Avenue. [CDN 23rd July 1927].

1929 Cycle paths proposed CDN 13.5.1929

1930 There are a five-seater, a quad, a triplet and a tandem bicycle to be found at the Belmont Cycle and Motor Works, King Street, Cambridge. They were formerly part of the fleet of pacing multicycles used by the famous Dunlop racing teams at the old Herne Hill track. Owing to the amount of motor traffic nowadays it is not advisable to ride the 'quint', a lengthy machine, but the others are still available for use. 30 80 30b & c

1931 William James Ison started as a cycle dealer in Chesterton Road in 1897; his business prospered and at one time he had four shops selling and repairing cycles. He also put one of his own machines on the market. The 'New Chesterton' has become deservedly popular and a special racing model won over 100 prizes in 1908. His late wife was sister of Fred Lawrence of the Belmont Cycle Works in King Street. 31 04 03f [6.16]

1935 Sir – while I was at the Theatre Cinema some kind individual stole the dynamo from the back wheel of my bicycle which was in the theatre cycle shed. It could only have been undone with the aid of a screwdriver and whether the lamp-snatcher is an amateur or professional, he certainly made a good job. Some people seem to have a mania for collecting, pumps and lamps and should by now be able to set up a retail store. I hope something will soon be done about these thefts which are happening every night by the dozen. – R.H. Stanton 35 10 18

1936 The Christian Science Monitor observes: 'In Cambridge, Saturday afternoon shoppers parked their bicycles along the street and left all sorts of packages unmolested in open baskets on the handlebars. Other cycles were left in racks beside the college buildings. If one missed his machine, we were told, he had only to wait till the morrow; someone had taken it by mistake and

would return it to its place'. Evidently our American friend has not heard of our undergraduates and their 'taking little ways'. Their 'mistakes' are more frequent than some of us like and both pumps and lights also have a habit of disappearing 36 08 15a

1937 Cycle history lecture – 37 03 01a

1937 More ladies have come forward in the search for Britain's oldest women cyclists. Mrs Cross of Toft (81) still rides her ordinary lady's bike regularly while Annie Long of Withersfield (75) has a machine she bought in 1898. Mrs N. Plint of Gt Shelford rides into Cambridge each day to deliver fruit grown in her garden & Mrs H. Ball of Staploe (68) also bikes five miles a day to work. Mrs L.M. Mortimer (63) of Chedworth Street is one of the most consistent riders, having done thousands of miles since she was ten years of age. 37 08 14a

1938 Herbert Robinson takes delivery of 500 bikes just before bus strike [6.18]

1938 "cyclists want cars banned" cartoon [6.19]

1938 Ronald Searle cartoon of cycling problems, 1938 – 90 03 22d

1938 Councillors refused the erection of a small cycle shelter in the front garden of a house in Scroope Terrace. There were already two such shelters and it was hard to refuse another. But they had to stop somewhere. This was one of the loveliest terraces in Cambridge and should be preserved. They hoped to get the other shelters removed. There were a great number of front gardens where people would like to have sheds but would never dream of asking the council for permission. They would have many applications if they acceded to this one. 38 02 04b

1939 A feature of the newly-finished ring road between Ditton Walk and Newmarket Road in Cambridge is a special track for cyclists, which is an innovation in this district – 39 05 27

1939 Police are dragging the river for two local cyclists who disappeared during the black-out after they had set out to cycle to their homes. Following a report that what appeared to be two cycles had been seen lying on the bed of the river near Dant's Bridge police commenced dragging and recovered a lady's machine. Later a man's cycle was brought to the surface. They have been identified as belonging to the missing couple. The man could swim but had a disabled leg due to a football injury. The girl is the daughter of a stone mason and worked at a local factory. 39 12 18 & a

1943 Cyclist killed in collision with tank, one of a number in a big convoy in a Polish unit in Lime Kiln Road – 43 08 03

1948 There must have been many conjectures as to how many cycles do pass up and down St Andrew's street, Cambridge, in the course of a day. A special cable apparatus used by Cambridge Borough Police yesterday recorded an average of 1,400 cycles per hour. During the peak period from 12.30 to 1.30 pm nearly 2,000 cyclists were clocked. Motor traffic figures are negligible by comparison only 460 vehicles an hour being "clocked" regularly over the whole day. The census was organised in connection with the one-way traffic system which will shortly be brought into operation c48 05 08

1949 Cycling history was made when the Cambridgeshire Road Club promoted its first open time trial on roads west of Cambridge. It is believed that this is the first open road event ever to be organised by a Cambridge cycling club, and the experiment proved to be an unqualified success. An entry of 183 was received from clubs but only 120 could be accepted. The Cambridgeshire Road Club team of B. Curtis, F. Krebs and V. Avis came second in the team race c49 05 17

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 The 'Grand Old Man' of Cambridge cycling, Mr C.M. Woods, was secretary of the New Chesterton Cycling Club for 35 years. He arranged ten motor and cycle race meetings on the Amalgamation Ground in Queen's Road and was sports secretary for the Mammoth Show on Jesus Green which included the famous rodeo which attracted a record 'gate' of 35,000 people. During his career he came into contact with many famous cyclists including Albert White, Jack Sibbit, Ernie Payne and Reg Player. 61 01 03 #

1962 Bicycles. Battered ones, shiny ones. Fiery racers and aged trundlers with baskets. Bicycles for traffic weaving in town or gentle rolling down country lanes. All have seen better days. They have laid at the police station unclaimed and yesterday were sold off by auction with prices ranging from ten shillings for boneshakers to £8 for superior machines. 62 02 24a

1964 blind-folded student cycles rush hour traffic [369.21.16]

1965 Ward's move to new premises in Burleigh Street marks another stage in the long history of a firm which started when Jonas Ward made a living mending bicycles in East Road. For some time they made the famous Crown cycles, one of which was ridden from Cambridge to Monte Carlo in 1930. They also supplied carrier cycles and box tricycles. Later they diversified into wireless, gramophones, washing machines and baby carriages and became one of the first to stock televisions in 1938. – 65 03 11a, b

1971 anti-car demonstration, 450 cyclists take part [11.3]

1971 John Howes move Regent St, founded 1840, 1869 turned velocipede, 1890 made own 'Granta' cycles move into new showrooms, Regent Street – 71 08 26

1974 anti-car demonstration, 250 cyclists take part, call for bus & cycle lanes [11.4]

1975 7,000 petition for cycleways, proposals announced for route from Arbury to centre & for cycle lanes [11.5,11.7]

1976 Cambridge's first bus and bicycles lane comes into operation along Victoria Avenue after the Government approved the city council's experimental plan to put down a special lane from the Four Lamps junction to Victoria Bridge. The plan also bans all parking along the Midsummer Common side; this means the hundreds of motorists who leave their cars there will have to find somewhere else. The aim is to speed up the substantial number of buses using Victoria Avenue, particularly during the evening peak period when traffic congestion causes extensive delays c76 08 06

1979 another petition for cycle lanes; 4-wheel 'cyclomobiles' hired to tourists[11.9,11.10]

1979 The Mayor of Cambridge, Coun Alec Molt, faced 300 chanting cyclists outside the Guildhall and signed their petition demanding better provision for cyclists. The demonstration began with a lecture on road safety and bike maintenance by the police, then led by a Panda car, they took at 15-minute tour of the city centre streets before returning to Peas Hill to hear councillors' views. Their priorities include cycle lanes on the Huntingdon & Madingley Roads and a contra-flow cycle lane in Downing Street. CEN c 9.3.1979

1979 What is claimed to be the largest cycle shop in Cambridge, with a stock of thousands of new and used machines has opened on the corner of East Road and Norfolk Street. The new shop – 'Thakes – the Cycle King' – is the fourth in a rapidly-growing string owned by Nick Thake who calls himself 'the 27-year-old work maniac'. His other shops are in the London suburban and

Southend areas. It will offer discounts of up to 50 per cent with a guarantee of rapid service and total satisfaction and also specialise in finding parts for very old cycles or obscure foreign makes. CEN c 3.5.1979

1980 Downing street contra-flow starts amidst protests re safety , Arbury cycle route opened [11.11,11.12]

1980 There are twice as many bicycles in Cambridge than in other towns, but there are three times as many bike shops. The proprietor of University Cycles of King Street says the overheads are high but with hard work it is possible to make a comfortable living. Second-hand bike sales peak at the start of a university term and winter is a good time for repairs as with ice and snow there are frequent breakages. But Cedar Cycles of Cottenham say people travel out to them because they are the cheapest in the area. 80 09 24b-c

1981 cycling on footpaths experiment starts [11.13]

1981 Townsends in business almost 100 years (unsure date), c1895 Norfolk st making 'Cycleries' bikes[9.11]

1985 Clive Sinclair launches C5 electric trike [3.11]

1987 Cambridge's traditional transport, the bicycle, will be deliberately used to slow down city centre traffic. The medieval central streets will be made even narrower which will make it even more difficult to overtake bikes. Traffic restrictions will also be introduced, including the banning of taxis. The streets have been reshaped and cleaned up with York stone used in areas considered 'visually sensitive'. But workmen in Trinity Street have been delayed by having to remove hundreds of wooden blocks dating back to the days of horse-drawn vehicles 87 03 13b amount of traffic using central roads drops, cars from 252 to 17[NS3.14]

1987 Major moves to curb cyclist and pedestrian accidents in traffic-choked Cambridge are now under way. New pavements have been laid and roads have been narrowed with the aim of using bikes as 'traffic regulators'. This has made it very unpleasant for cyclists who have to choose either to ride in the middle of the road and be harassed by impatient drivers or at the side and have pedestrians stepping out in front of them and cars squeezing dangerously by. Motorists drive menacingly close so that the cyclist in panic pedals even faster like a frightened hen. 87 04 23

1987 Ben Hayward opened a small bicycle and electrical business in Cambridge in 1912. Today it is still going strong as a bicycle specialist in Trumpington Street maintaining a tradition of good service and friendliness. They can build a bicycle especially for you, assembling the whole machine to create something unique and if necessary a frame can be made by a company in Leeds. Customers also get a free first service done by the firm's own workshop in Laundress Lane 87 05 21b

1989 Townsend's take over Ison's cycles which was started by W.J. Ison in 1893 and made the New Chesterton cycle. Albert Townsend started in 1890s making Cambridge Light Blue Cycles in Norfolk Street, moving to Burleigh Street in early 1960s 89 06 30 Townsend's history – profile – 89 07 06

Motor cycle and sidecar in Herbert Robinson garage during reliability trial, 1930s 105.10

c.26.4855 – motor cycles

King motorcycle history 60 03 28

1903 The Cambridge Corn Exchange exhibition of cycles and motors has become an annual event. Motors and motor cycles are as yet in their infancy and each year sees great strides taken towards perfection. There are on view some fine, up-to-date specimens of motor cars. The Mayor said he was a cyclist of some years' standing but his experiences of motor cars was very limited. He had been for a ride on a motor car, and thoroughly enjoyed it. Manufacturers were handicapped by stringent laws as to the pace motors might travel over public roads. While so many horses were about it was startling for them to find a vehicle coming at 20 miles and hour and making rather a peculiar noise. c03 02 25

1903 Motor cycle reliability trials are taking place at the Crystal Palace. One Cambridge competitor, Mr W. King, of Messrs King and Co, Bridge Street, has been holding his own on a 'King' machine manufactured by the firm. The machine is 2 ¾ hp which took a gold medal for the best motor cycle of its class in February 1902. Journeys of about 150 miles are being made daily and then the machines go back to the Palace and are locked up. Next morning the competitor is allowed time to fill up and then set off on another journey. The 'King' machine is doing well and all interesting in motoring in Cambridge will wish it continued success. c03 09 03

1904 The 'King' machine manufactured by the Cambridge firm of Messrs W. King and Co. of Bridge Street has been awarded a silver medal in the motor-cycle reliability trials. This is not the first success the motor-cycle has achieved and the reliability of this high-class machine has been amply demonstrated. It was ridden by Mr King, a member of the firm, but during a stop for

luncheon at the Lamb Hotel Ely a certain meddlesome individual removed the trembler spring from the induction coil of the machine. This piece of wanton mischief has resulted in an award of £100 being offered by the Star Cycle Company. CDN 29.8.1904

1907 Messrs King and Co are displaying a number of cycles and motor cycles at Cambridge Corn Exchange. There is with a 'Rex' motorcycle which can be bought for 24 guineas, one of the cheapest on the market, and the 'King' bicycle with Crabbe brakes, Warwick tyres, Hyde free-wheel, Perry chain and Brooke's saddle, costs six guineas. Standardisation of parts has indeed wrought a revolution in the cycle industry. 07 07 16

1908 Cambridgeshire Motor-Cycle Club has been formed to organise club runs, hill climbs, speed judging and petrol consumption trials. It will also provide legal information and touring facilities. Officers include W. King, H.H. Harper, A.R. Marshall and Col. Harding of Madingley Hall. It is intended for motor-cycles – cycles and tri-cars, not car owners 08 03 12d

1914 Even the casual observer cannot fail to have noticed the remarkable increase in the number and variety of motor cycles and their greatly increased popularity not only among the young bloods of the Varsity but among staid and sober individuals of maturer ages and less agility. At Robinson's Motor Cycle Garage in Green Street one can have one's machine stored, cleaned and kept in tune and where, should occasion unfortunately arise, have it repaired by workmen who are not mere 'bodgers' but really skilled in this class of work 14 05 01c

1915 Mr A.G. Markham, the well-known Cambridge cyclist, met with a serious accident. He was riding a cycle along Victoria Road and was about to pass some horses ridden by soldiers, when one of the animals shied and, backing into Mr Markham, knocked him on to the kerbstone. The result was he was badly thrown, dislocating his shoulder 15 04 02 p4

1952 Ever since he was a young lad "Shorty" Hallen has been fascinated by motor cycles. Some 20 years ago he started a business of his own in a small shed in Chesterton. Then in 1936 he opened his showrooms at Chesterton Road, Cambridge. Now he has opened another shop at the Bridge Garage, St Ives. Who could have visualised that the rather tumbled-down buildings could have been turned into the magnificent premises they now are? Instead of a musty-looking building it is a brightly painted, well set out and amply stocked showroom with everything for the motor cyclist. It will add to the usefulness, drawing capacity and charm of the town. c52 06 06

1953 An ever-increasing number of Vespa Clubs is being formed as more and more people from all walks of life decide to solve their transport problems by becoming owners of Vespa two-wheel runabouts. The latest in this international league is the Cambridge Branch. A large number of onlookers was attracted by the sight of a fleet of Vespas parked outside The Anchor, Silver Street while the owners met. The first outing will be a run to the Ferry Boat Inn on Sunday. c53 08 26

1954 Mr L.W. Hallen started his motor cycle trading 21 years ago in a low-roomed malting shed opposite Union Lane corner and shortly afterwards acquired premises in Hawthorn Way. During the war Government contracts for repair work on RAF vehicles helped the firm to expand and premises which were a dance hall were converted to the use of the business. They have now opened a spacious new showroom on the site of former almshouses that jutted on to Union Lane. Their empire now occupies an extensive stretch of Chesterton High Street. CDN c 9.3.1954

1956 Hallen's presented a feast of films to suit the taste of motor cyclists. Most were manufacturer's promotions but it was the film produced locally which aroused the most interest. It presented an entertaining picture of local scramble scenes with shots of local characters and

celebrities. Those attending can also inspect the improvements to the workshops with special stands for the repair of the increasingly popular auto-cycle and scooter forms of transport. 56 03 20a

1956 A Lambretta Service Station has been opened by King and Harper at their Milton Road branch. It features all the necessary service tools and equipment. Now routine checks can be completed in a matter of minutes with even the most extensive overhaul carried out within a week. Cambridge people have been quick to adapt to this modern form of transport and already own many hundreds of machines. For many housewives, typists and office workers the scooter is here to stay. 56 11 02b

1961 The Cambridge Scooter Club is a new 'all-makes' club which also caters for three-wheelers. It will organise social activities, displays and film shows. However the Cambridge Lambretta Club specialises on topics such as scooter care and maintenance. Its members have completely dismantled and reassembled a machine to gain a better insight of its works and electrics. Members average 120 miles a week with almost all using their machines every day. 61 11 21

1983 Hallen's of Cambridge is celebrating its golden jubilee. It was founded in 1933 as a used motor-cycle dealership soon moved to premises in Chapel Street, Chesterton which it shared with a haulage business, fish and chip shop and furniture removal firm. Today these premises still house the motorcycle service and parts centre. It then moved into a former dance hall in Union Lane which became the first car workshop and stores. During the war it was requisitioned with a new workshop and an air raid shelter underneath 83 04 25 supp p10

headlines

1889 ice-cream vendor knocked out by falling branch [2.5]

1892 University Typewriting office established [10.8]

1898 A meeting in connection with the proposed Cambridge Ice and Cold Storage Company was held at the University Arms Hotel. A central site had been secured at Petty Cury and they had customers both for ice and cold storage. The two biggest firms in Cambridge had agreed to have cold storage, beside many other gentlemen, and they would have orders for eleven hundred tons of ice for the first weeks working. Some hundreds of shares were taken up before the meeting ended - CDN 1898 07 26

1900 The extensive Portland Cement Works which are being erected in the neighbourhood of Coldham's Lane and Mill Road are now assuming enormous dimensions; in fact the buildings already completed are ample evidence that one of the largest and most modern cement works in England will be

situated near Cambridge. The celebrated gun-makers, Messrs Krupp of Essen, are supplying most of the extensive machinery for the company and a cement will be manufactured that conforms to the specifications of the Board of Admiralty and the London County Council CDN 1900 05 14
1900 For some years the manufacture of Portland cement had been carried on in the district, but it is today that the new Saxon Portland Company is seriously undertaking the scientific manufacture of the product on a large commercial scale. One of the largest and most modern cement works in the kingdom is being erected on the Coldham Lane, Cambridge. Sidings have been connected with the railway capable of holding three trains of 20 trucks each. The buildings, rapidly approaching completion, include eight large cement kilns & an enormous building will provide storage for the manufactured cement. The works will be open by night and by day. The electric light will be extensively used and the current will be generated at the works c00 07 20

1901 Messrs Pink Brothers new 'Knackery' in Coldham's Lane, Cambridge, stands in an isolated spot and is constructed on the most hygienic principles. In one corner is a large dissecting table and there are two huge coppers for boiling down the carcasses, the remains of which are subsequently sent away by rail. Some distance away is a tank ventilated with a shaft considerably higher than the top of the passenger carriages that may pass on the railway. The possibility of any offensive odour reaching travellers is thus quite obviated and the same care has been exhibited in regard to any unpleasantness that may arise from the boiling operations c01 08 20

1901 A number of Cambridge gentlemen interested in the cement industry have formed the Cambs Cement Chamber of Commerce to further in every possible way the interests of cement manufacturing in the county. To them Mr W. Abbott is prepared to make over by deed of gift fifteen acres of the Poplar Hall Estate, simply asking that the land shall be efficiently worked and from time to time reports published. He is convinced it would put beyond all question that there is money in Cambridgeshire cement c01 10 10

1901 Cambridgeshire enjoys the reputation of being an agricultural and fruit-growing county but now must be added the reputation of manufacturing centre. There are several factories within a few miles of Cambridge and another on a large scale no further away than Fen Ditton is promised. The Poplar Hall Estate has been purchased where the beds of limestone and clay marl contain every natural ingredient for the manufacture of the highest class Portland cement. In addition blue gault or brick earth underlies the estate and this should make the best white bricks. It has a frontage of nearly half a mile to the Cam on which is already erected a wharf or loading dock which would put the works in direct touch with the steamboat companies running into Lynn docks CDN 1901 08 29

1902 A Cambridge butcher was charged with obtaining money from Caius College. A system of frauds had been in operation since 1886 in reference to the supply of meat to various colleges. He had been asked to produce his books but said they had been burnt on the bonfire on Ladysmith night. A detective visited the shop and found some ledgers in the safe. There were more in the stoke hole of the conservatory and in a large meat basket tied up with rope CDN 1902 04 22

1902 Outside Cambridge police court there was an air of suppressed excitement. As soon as the doors of the court were opened the space allotted to the public quickly filled. Hundreds were unable to obtain admission and eagerly waited outside for the chance of catching some details. A butcher from Petty Cury was accused of cheating and defrauding Caius College since January 1888. It was alleged that meat was constantly booked to the college which was not delivered at all and the cook was supplied his own meat gratis. CDN c 30.4.1902

1902 The problem of the general servant is with us always. The tyranny of the domestic, her varying moods and fluctuating caprices seemingly know no end. Her demands have gradually become more peremptory and extensive for some years past and housekeepers have become painfully familiar with Sundays off, evenings out, cycles in the kitchen and swains in constant evidence. The Cambridge autocrats of the kitchen are now going a step further; the very latest

request is a week's holiday at the Coronation. It is not stated whether the majority of them propose attending the Abbey CDN 1902 07 22

1902 Under proper conditions Cambridge cement is equal to the finest the world produces. The up-to-date methods of the Saxon Cement Company has resulted in it commanding a considerable advance per ton in the open market. The Admiralty, after protracted tests, has placed a contract for Cambridge Portland Cement which will extend over a considerable period, proving beyond doubt that the local deposit is in every way suited for producing a perfect natural cement CDN 1902 09 15

1902 The Atlas Stone Company was established in 1902 alongside the Portland cement works in Coldham's Lane (the present Sainsbury's site). It moved to Meldreth where during the Second World War they worked round the clock producing asbestos-reinforced concrete sheeting to repair bomb-damaged cities. Then in 1984 with concern over the use of asbestos they switched to other fibres. Today the works are the UK headquarters of Eternit TAC which has a workforce of over 400 89 10 19

1903 Messrs Simpson and Co's bakery in Cherry Hinton Road Cambridge is as up-to-date and hygienic as any in the Kingdom. It is the only steam and machine bakery, a substantially constructed building fitted with machinery of a strange appearance. Electricity supplies the light and driving power but exquisite cleanliness is the feature which most strikes the visitors. The public have not yet realised the importance of insisting on such conditions though they send a whole-hearted grumble at finding a cremated insect, stray pieces of the miller's sack or unusual traces of potato in their bread. c03 06 18

1903 The new bakery of Mr G.P. Hawkins in Parsonage Street, Cambridge is a substantially built erection with deep foundations. The visitor passes through an artistic lobby covered with green and white newelike tiles of white glass which fit tightly together so no dirt or insect can attach itself to the walls. The floors are of granolithic and the electric light is installed in every compartment The bread is produced by up-to-date machinery. In a short time a continuous electric current and an automatic kneader will be installed. There is a glass roof in the yard so the carts can be loaded comfortably, irrespective of the vagaries of the weather. c03 12 17

1904 boot repairers business hit by invention of rubber heel protectors [2.4]

1904 Messrs. Church and King's establishment in Sidney Street is the first business in Cambridge to be cleaned by the Eastern Vacuum Cleaning Company. The settees in the showroom were a fair test of the process. In thick upholstery dust must necessarily accumulate but after the cleaner had been applied no amount of beating could raise a speck of dust. The carpet also was cleaned effectually and the colours brightened. Mr King said: "It takes absolutely all the dust out" CDN c 12.2.1904

1904 Cement making has already become a very important Cambridge industry. Extensive new works are rapidly approaching completion and have made a great change in the landscape of Cherry Hinton. The pleasant path through the fields from the end of Mill Road is hardly recognisable now. It has been diverted to make room for a huge collection of buildings from which a new siding leads to the railway line close at hand. These are the Norman Cement Company's works. 1904 11 11

1905 The oldest industry in Britain, the manufactory of gun and tinder-box flints is still carried on in the village of Brandon. The work is done in little sheds at the back of the cottages where those engaged in this almost out-of-date occupation dwell. They are sent to Spain and Italy where the tinder box still holds its ground in rural region and travellers in remote areas find flint and steel a veritable boom. Flints are also used in ingenious little mechanical devices for lighting pipes and cigars which one sees in tobacco shop windows. 05 07 08a

1906 The recent hot weather and absence of rain has resulted in a scarcity of milk through the scorching of the pasture and some dealers have been compelled to buy from rival tradesmen and sell at the price at which they bought, merely to retain their customers. One has already increased his price from twopence to threepence a pint but larger dairymen have retained their customary charge of fourpence a quart 06 09 12a

Cambridge has its own manufactory – the Castle Soap Company – which opposes the Trust - has seen its sales rise. But if customers continue to ask for Sunlight brand then the monopoly will refuse to supply the retailer who stocks the ‘free’ soaps. 06 10 27 abc

1906 Soap Trust collapse – impact locally on Soap Company – 06 11 26a & b

1906 Kleno liquid cleanser – advertisement – 06 10 12

1907 One of the most flourishing of Cambridge’s small industries is the confectionery factory of Pollard and Co. in Garden Walk, Victoria Road. From this delightfully-situated establishment some tons of pure boiled sweets are exported to various parts of the country. Not even with the recent extensions to the factory can they cope with the demand. One of their specialities are honey and butter balls and the marzipan for the centre of their satin pralines is made of the finest almonds. 07 01 03 & 03a

1907 Castle Soap Company – detailed article – 07 01 11 & 11a

1907 The Stetchworth Dairy Company delivered milk in cans stamped with their name and round number. Percy Atkins, one of their roundsmen noticed the Babraham Dairy Company using a can which had the words ‘St’ and ‘Dairy’ on it; the rest of the name had been soldered over. But they said it was old and rusty, so they thought it had been abandoned. The diary could have it back if they wanted. Magistrates said that obliterating the name was ill advised, but the charge of theft was dismissed. 07 03 20 & a

1907 The University bought all kinds of foreign meat as cheap as they could, never mind the quality – from Argentina where they bought mutton at three ha’pence a pound - butchers were told. Then there was the poultry. Years ago they bought poultry from the farmers, nowadays they got it from Russia, frozen, as they got their eggs. The public should know what they were buying and foreign and English meat should be marked as such. (Applause) 07 04 10

1907 The old-time bakery was a low-roofed, gloomy compartment, reeking with a variety of odours, lighted by the flat flame gas burners, inhabited by perspiring men and lads working in temperatures suggestive of an inferno. Compare that with the conditions of Mr G.P. Hawkins’ Model Bakery in Parsonage Street where unlimited supplies of pure air and natural light are obtainable and the most modern electrical appliances are installed with three ovens baking 160 loaves every hour. 07 05 20 & a

1907 The Stetchworth Dairies vans supply 400 gallons a milk daily to 18 colleges and 1,800 families in Cambridge and three tons of butter and 8,000 eggs are sent out each week from their depot in King Street. People may have sterilised milk if they wish but the aim is to get good milk at the consumer’s door within two hours of it being taken from the cow. Milking takes place at four in the morning and one in the afternoon so it is fresh for afternoon tea. 07 11 27 & a

1908 For years bachelor Harris Norman lived the life of a miser in Romsey Town. He was endowed with a positive genius for accumulating money but never spent more than would suffice to keep soul and body together. He laid the foundations of his fortune as a hawker of cheap jewellery, then speculated in stocks and shares. In his will he bequeathed the whole of his property to be divided between Addenbrooke’s Hospital and the London Jewish Synagogue. 08 01 31b – details 08 02 07 & a

1908 Sir – I have traced the history of Blackmoor Head Yard, Bridge Street, for nearly 100 years, and find it has been the custom for occupants to hang their washing across the yard.

Laundresses have lived there and dried everything in the same way. Dr Dennis Adams had the stables at the bottom of the yard and when our King was up at Cambridge he often used to come there and hold the linen up with his stick to pass under it without making any fuss at all. Where must we dry them now? In the bedrooms? – S. Collingwood 08 05 02b

1908 Mrs Briggs' First-class registry office, Regent Street, Cambridge, has all classes of superior, reliable town and country servants. Ladies requiring to be quickly and well suited should apply now. Includes: Cook-General, tall, superior country girl, good worker, 2½ [TWO AND A HALF] years reference; £16. House-parlourmaid, tall, superior country servant, carve, valet, good waitress and needlewoman, £21. Twenty young country servants, requiring first situations as nurses, housemaids, generals, between maids and kitchen maids, small wages, to be trained. – advert 08 05 04

1908 Great blocks of glittering, iridescent ice are manufactured on the site of the Falcon Inn, Petty Cury, every hot midsummer morning. Mr J.V. Pryor, the fish-monger has installed plant for this modern miracle and the shrill insistent note of the dynamo is joined by the plunk-plunk of the gas engine exhaust. Like the flying machine, the ice factory is at present only in its infancy and the plant is expensive but the method of manufacture is simplicity itself, taking 50 hours to produce slabs weighing two cwt apiece and makes more than Mr Pryor needs for his ordinary fish business CEN 08 08 28 p3

1908 Butchers had no means of knowing whether meat was from an animal infected with tuberculosis. Now they would insist on a warranty from the farmer who is in a queer fix. If farmers who sell in Cambridge market refuse to give the warranty then local butchers will buy London-killed meat. If they give a warranty they risk having to pay compensation for any meat found to be tuberculous. CWN 08 09 18

1910 F. Winton-Smith set up, Mill Rd butchers, opens food production factory, East Rd 1919 closes pork sausage & Royal Cambridge pork pies start production Cheshire 1973 [1.9,10.9]

1910 The annual dinner of the Saxon Cement Works, the Norman Cement Works and the Atlas Stone Company took place at the Lion Hotel, Petty Cury. The cement industry was important for Cambridge. They had started with 128 men, today they employ over 300 with a permanent staff of 70 clerks and supervisors. They'd spent over £150,000 in coal and coke, another £150,000 in materials from machinery to stationery. Close on £200,000 had paid in wages, most in Cambridge, and the railway companies had received more than £300,000 over the last seven years. CWN 10 01 14i & j

1910 Leon Rothschild, a Russian tailor's cutter and Israel Schnitzer a tailor of Prospect Row appeared in court. Leon said he worked from 8am to 8pm and earned two guineas a week, but had then been given the sack. Israel however said he gave Leon work when there was any for him to do and he was paid at the rate of seven pence an hour. He had lent Rothschild money for his wedding expenses, paying for a ring and a pair of ear-rings. An IOU was produced but there was dispute as to whether a Russian word on the document meant 'received' or not so an interpreter was called in. 10 01 218f

1910 Norman Cement works timekeeper threatened 10 03 11d

1910 Residents from Cherry Hinton Road complained that if linen were hung out to dry in the garden 'smuts' caused by smoke from the chimney of the Swiss Laundry made it so dirty that it had to be taken in and washed again. The air ought not to be polluted by this offensive smell and dirt and they suggested the chimney be carried up another 50 feet and the manager of the laundry be requested to use different fuel. 10 05 20a

1910 The proprietor of the Swiss Laundry, Cherry Hinton was summonsed for allowing the chimney to send forth black smoke, causing a nuisance to residents. Complaints went back to 1903 but had stopped when they put in a new boiler in 1908 and started burning Welsh coal. Since then it had started again. It was impossible to hang clothes out to dry. Mrs Robjent said

she'd washed a tablecloth three times and eventually had to send it to the laundry. The fruit in the garden got covered with black smuts and those who worked there looked like sweeps. 10 07 15a
1910 The Cambridge Cooperative Bakery in James Street is now the best-equipped and most up-to-date in the country. The yard used for loading vans has been built upon and the old bread-room demolished and replaced with a spacious new model bakery. A large rotary mixer can covert four sacks of flour into perfectly mixed dough in ten minutes and an ingenious piece of machinery turns out 2,000 loaves an hour. After the opening a procession of the Society's 30 vans and carts preceded by a brass band paraded the principal streets 10 07 29d

1910 The late Mr Alfred Simper was a well-known rope-maker who formerly carried on business at Great Shelford. For the past 21 years he lived at Rope Walk, New Street and visited all the markets around Cambridge. He had a stall in the Corn Exchange for 20 years and was highly respected by all with whom he came in contact. Mr Simper was a prominent Cambridge Christadelphian and the funeral service was conducted according to the custom of the Christadelphian community by Dr W.J. Young of Harston. 10 11 25f

1911 The Saxon and Norman Portland Cement Company, whose works form a well-known landmark near Cambridge, is to sell its local factories to the British Portland Cement Manufacturers Ltd which has been formed to control most of the important cement works in Britain. It is gratifying to note that Mr A.C. Davis, to whose energy and business acumen the Saxon Works owe so much of its success, is to be the Managing Director of the new Company 11 12 29c

1912 D. MacKay set up [9.8]

1912 Dr Waldstein of Newton Hall says Cambridge is a place where there should be some industry where people who are often idle might be employed. There are women who work - bedmakers for instance - who have husbands who do not. Some years ago he tried a scheme for wood carving but it fell through and the local clay is not right for pottery. Now he proposed the establishment of a heraldic bureau to become a centre of inquiries from architects and provide private individuals with authoritative information on family coats of arms. 12 01 26f &g

1912 A serious accident occurred to an employee of Messrs Watts and Son, timber merchants, on Newmarket Road. He was working at his tile machine when he caught his right hand in the gault knives, which drew his arm into the machine. His fellow worker was able to stop the machine at once. Drs Naish and Pain were called and it was found necessary to chloroform him and take the machine to pieces before the arm could be extricated. He was taken to Addenbrooke's Hospital where the arm was amputated speedily. He is doing as well as can be expected 12 04 26e

1912 The Medical Officer's report on pure milk supplies includes excellent photographs showing the good caused by pulling down old cow sheds and their replacement with up-to-date buildings. There are 305 milch cows in Cambridge, kept by 30 cowkeepers, but a large number of purveyors buy supplies from Huntingdon, Norfolk and Buckingham while cream is brought from as far away as Wiltshire or Somerset. The average consumption is less than half-a-pint per head per day. Amongst the poorest milk is a luxury and used chiefly in tea. The practice of ladling out milk from a deep can is a source of contamination: the milkman's hand may enter it or rain and dust get in when the lid is removed. 12 07 19

1912 The Meldreth Portland Cement Company works have been purchased by the Standard Cement Company Ltd and will be reopened for the manufacture of Portland Cement. It is proposed to put down suction gas plant, new kilns and grinding machinery and generally overhaul the works. The old machinery has been adapted for the manufacture of ground lias lime which the company is now marketing. The reopening of these works after two years closure has naturally affected favourably the employment of workers and mechanics in the district. 12 12 20aa

1913 Kate Betsy Cleverley carried on business as a practical watchmaker and jeweller for 24 years. She came from a family of watchmakers and jewellers named Hayward who formerly owned a flourishing business at Norwich and gained a certificate in the craft, becoming one of the first ladies to enter upon such a career. On her marriage she and her husband opened a business at 25 City Road in which she practically assisted until her death. Women watchmakers are not common and she showed herself to be a highly-skilled worker. 13 07 18 p6 CIP

1915 W.K.Bird & son vinegar works Magdalene street closes after 108years (founded 1807), premises sold Magdalene college [2.11]

1916 Local Chamber of Commerce formed [2.12]

1916 Tailors Busy. — We understand that the result of the agitation carried on some months ago to secure work, for Cambridge has been the placing of a large order for officers' uniforms with Cambridge tailors. An order for at least 800 uniforms has been distributed between the tailors of the town. No doubt a little difficulty is being experienced in getting labour at the present time, so many tailors having long since patriotically responded to the call 16 05 31 CIP of

1916 glove making – a new industry; when undergraduates left there was grave unemployment and Rutherford & Clothier of King's Parade introduced glove making, now producing 600 pairs a week by women working at home on machines provided by the firm; are difficulties obtaining fabric – 16 11 01b

1919 F. Winton Smith's new food factory, Wellington House, East Road – detailed feature article – 19 11 19a ; formally opened – 19 11 26b [1.9]

1920 Cambridge Town Planning inquiry considers objections of cement manufacturers about land Cherry Hinton Road; proposes new road from Cherry Hinton Road to Fen Ditton Road across Coldham's Common; had been excavation for coprolites and foundations were bad, brick pits. Was good supply for Cement works but this meant noise, dust and smoke – Ch 20 03 03a

1922 Cambridge & district butchers association formed [2.8]

1927 Sir – I wish to protest against the almost intolerable nuisance caused by the beating of college carpets on “The Backs”, which is robbing not a few of us of all possibility of quiet thought and study. A vast number of visitors can hardly carry away an agreeable impression of a place where their ears have been so persistently assailed and affronted. Why cannot the Colleges do what is done by all the great hotels. The resources of modern science and ingenuity lie equally open to them. Why then these means of barbarism? – Thomas Thornely. c27 09 02

1927 Cambridge Co-operative Society opened its new model dairy at Sleaford Street. The manager, Mr J. Quincey said they were now retailing nearly 400 gallons a day. They served the purest and cleanest milk possible. “People say they want milk straight from the cow. But if they only saw the cleaning machine when it was taken to pieces it would surprise and probably stagger them to know the filth and dirt which came from the milk, even though they were getting the best milk from clean producers”. c27 10 24

1929 A meeting of the creditors of Messrs Headley and Edwards of Corn Exchange Street, Cambridge, in voluntary liquidation, was told they had been trading under difficulties for some time. They experienced a period of prosperity just after the war but the last account to show a profit was 1923 and they had got into financial difficulty. A buyer had been found to take over the assets as a going concern and a new Company would be formed to carry on the business. CDN 19.11.1929.

1930 Two bottles of dead flies were produced at Cambridge council meeting in support of the contention that a rabbit skin factory in York Terrace was still a public nuisance. They had been caught in neighbouring houses. Residents said life was unbearable on many occasions and a man suffering from tuberculosis had to sleep with his windows shut because of the obnoxious smells which were worse at night. But the Medical Officer said that in spite of careful inspection no smells, flies or bugs were found. 30 02 28-

1930 Cambridge Co-operative Society opened a new bakery in Sleaford Street equipped with the most modern machinery. 500 sacks of flour a week arrive from their own private railway siding close by. They are lifted to the third floor and the flour passes through a series of automatic machines which mix and knead it into dough that is baked in steam-heated ovens. The confectionery department has a wonderful machine turning out a wide range of cake mixtures 30 11 22a-c

1930 Co-op Sleaford Street bakery opening – 30 11 24

1930 A.E. Clothier, tailor, death – 30 11 22d

1931 Residents of York Terrace protested about the rabbit-skin warehouse in Sturton Street. They had large blue-bottles in their homes and maggots had been seen crawling on the pavement within a few inches of their doors. The proprietor had put in different machinery but had not obviated the nuisance. It should be moved from that crowded area so people could live free from the smells, maggots and flies. 31 10 23c & d

1932 Complaints have been received about the rabbit skin warehouse in Sturton Street. Inhabitants of York Terrace say it caused effluvia and was a nuisance injurious to their health due to abominable smells which prevented them opening their windows and because of the maggots which escaped from the works and entered their houses. 32 01 18

1932 The Bankruptcy Court was told that the Autoservice Company based at Haig Road, Cambridge offered an automatic vending service using machines supplied by Pelpas and Uneeda Automatics of Edgeware. When the debtor was ill the manager of the Uneeda Company, feeling the illness was a bluff, interviewed him in bed. He immediately got up, against doctor's orders. The proprietor had previously invented his own penny-in-the-slot machines but never gained patents for them. 32 02 04 & 04a

1932 Sturton Street Rabbit Skin warehouse complaint – 32 01 18, 32 01 22b

1932 King Street shoe repairer – John Motley – bankruptcy – 32 01 21a

1932 An 'automatic laundry' has been opened in Hartington Grove Cambridge. Dignitaries inspected the Forum Cleaning and Dyeing Company machines where several garments were cleaned and dried before their eyes in less than ten minutes. After cleaning clothes pass to a dusting wheel where they are tumbled and dried in a current of cold air before passing the eagle eye of a 'spotter' to the pressing room so that obstinate stains can be removed 32 06 16a

1932 The Deck family has played an important part in pharmacy and public life in Cambridge for 130 years. Isaiah introduced the custom observed for 80 years of firing rockets on New Year's Eve, Arthur made balloon ascents with his friend Henry Coxall, while Alderman Deck was chemist to the Prince of Wales while a student at Trinity. He presented his Royal Arms to the Corporation and these are now in the Cambridge police court. The business continues to thrive under Reginald, with a new optical department. 32 02 16b

32 02 16b

1932 York Street residents signed a petition complaining about the Sturton Street rabbit skin factory. It had started in 1928 and the skins were stored and dried on the premises. The smell was very offensive and unhealthy, like old bones burning, there were maggots in the streets and blow flies as big as small bees. It was very bad in August – but the factory was only open from September to March. 32 02 19 & 19a

1932 New Cambridge Industry (employing only local men). Same day dry-cleaning service by the new British wonder machine which cleans and actually strengthens fabrics leaving no smell. Special opening offer: suit, costume, coat or dress, dry cleaned, hand pressed, collected and delivered for three shillings. The Forum Cleaners and Dyers, Market Hill, Cambridge (Advert) 32 02 22

1932 Rabbit skin factory, Sturton Street now improved – 32 05 20

1932 The Stokesay Laundry of Histon Road is a happy hive of industry where women and girls work under ideal conditions in a healthy atmosphere. They have installed a wonderful ironing machine which is the last word in efficiency. The extensive drying grounds in a very large garden ensure final cleanliness and sweetness. 32 06 18 & 18a

1932 Ebenezer Haynes, shoe maker – 32 06 15

1933 The annual domestics staff ball at the Dorothy attracted 450 servants. Although the ballroom became on the crowded side, everybody was happy. Nothing is nicer than a good servant's ball and it was good to see so many heads of households present. Percy Cowell and his band was in a particularly bright mood and led a 'merry dance' with a varied programme. The great attraction was the fancy dress parade. 33 02 02

1933 Augustine Crossman started as a tailor in King's Parade over 40 years ago. There he installed a novelty in the shape of a tie-knitting machine and this developed to such an extent that he came out of the outfitting business and started the A.R.C. Knitting Company with a factory at St Tibb's Row. From there it moved to Eden Street, Norfolk Street and then Abbey Walk. 33 05 20b

1933 Finch's Walk name and ironfounders – 33 05 27 & 33 06 03a

1933 George Bolton, furniture remover, death – 33 06 14

1934 Robert Brown sold two million gallons 'Somerlite' lamp oil a year around Cambridge. He got oil from various sources, mixed it together and told the public that it had no equal. So when his sister-in-law, an oil and hardware merchant at Fordham, started selling oil that did not come from him under the 'Somerlite' name he took the case to court. Their vans both carried that name and there was a danger that people might assume the two were the same, he claimed. But the case was dismissed. 34 01 23 & 26

1934 H.J. Gray, the Cambridge sports manufacturers are flourishing and announced plans to extend their Playfair Works into which they moved from Searle Street 25 years ago. Now a new mill and motor engine would be introduced to keep up with demand. Henry John Gray started his career in a racquets court on the site of the present University Arms Hotel nearly 90 years ago. He became champion racquets player of England – a title that had stayed in the family for 22 years - and two his brothers became champions of the world. 34 01 12

1934 One of the best-known Cambridge hairdressers Alexander Joseph Priziborsky was born in Cambridge 54 years ago. It was his father who founded the hairdressing establishment in Round Church Street about 1856 and on his death in 1905 his son took it over. He shaved his first customer when nine years old and built up a first class reputation, the majority of his customers coming from outside the town 34 05 29

1935 We felt customers would like to know something about our dairy. Our cows graze on our fields at Chesterton, Trumpington, Cherry Hinton and Shelford Bottom, the finest pasture in the county. They are thoroughly groomed and their udders washed before being milked using electrical apparatus at our Abbey Street premises. The milk is cooled and bottled without being touched by hand, then kept in a cold storage chamber before delivery. The cream is separated daily. We guarantee early delivery twice daily to all parts of town. Arnold Brothers (established over 75 years), Abbey Street, Cambridge –advertisement. 35 01 12a & b

1935 S.A. Rolfe's wholesale confectioners and tobacconists business started 25 years ago in a very small way on East Road. Now it is the largest of its kind in the Eastern Counties with nine full-time travellers and 15 motor vans. New premises in Newmarket Road house an enormous variety of brands including chocolates from R.S. Murray and 'Classic' bottle sweets made by Messrs Parkes. Mr Rolfe was hailed as a hard-working and keen young business man who by sheer determination and grit had made his mark in his chosen trade. 35 03 07, 35 03 09 & a

1935 Messrs H.J. Gray of Cambridge, who manufacture sports requisites at the Playfair Works is to establish a new company in Ireland where the Government has imposed Customs duty on finished racquets, hockey sticks and cricket bats. Suitable wood is available and the quality of the goods made will compare favourably with those previously imported 35 09 24

1935 John Whitehead, 65, has been in the fruit and vegetable trade all his life. He started hawking goods on a barrow and then with a horse and cart. About 40 years ago he took a shop in Fitzroy Street and struggled to bring up a big family – he had 13 sons. It was difficult to obtain goods during the Great War but afterwards got a motor lorry and in 1933 went to London for goods for the Christmas trade. They were brought to a garage in Cambridge from which they were stolen. Then a run-away horse smashed up his van and the lorry ran into a lamp post. 35 12 05b

1935 Walter Nicholas told the court he'd started as a confectioner at Little Downham. He knew nothing about the business and only took £8 a week of which thirty shillings was profit. So he added a little vegetable round, buying from neighbouring farmers. He had a motor van and later a lorry for £75, paying by instalments. As business was poor he came to Cambridge in September 1934 and started in the wholesale vegetable business, but lost more money. He disposed of his lorry for £10 and paid off some of his debts. Then he was refused a potato licence, which was a major reason for his failure. 35 12 05c

1936 Benjamin Rayment was first apprenticed to the shoemaking trade at a shop in Trumpington Street but decided to try his fortune elsewhere. He walked to Birmingham for work before entering the hat industry in Luton when the first hat-blocking machine was introduced from America. He returned to Cambridge and carried on business in Burleigh Street as a straw and felt hat maker for close on 70 years. When the straw hat industry was in its prime he used to supply 'boaters' to most of the University shops in the town. He had a wonderful memory with recollections of the Crimean War, the Chartist Riots and the great exhibition in Hyde Park and died in his 100th year. 36 01 30

1936 John Whitaker, the well-known Cambridge antique dealer who has died in his 92nd year, was a craftsman of skill and taste, a carver of wood and stone and many buildings were enriched by his work. He had travelled extensively in India, the Cape, America and the Continent and also had a great knowledge of local history. The business of a dealer in antiques never ceased to appeal to him and he could discuss items with shrewdness and judgment. He was Bohemian in appearance, whimsical and entertaining and with an optimism unbounded. 36 04 30

1936 Much regret will be felt at the death of John Morris Bull, the dairyman. Born in Landbeach, he assisted his father who was village smith before buying a dairy business from Mr Thompson of Russell Street, Cambridge in 1891. During the War he was one of the organisers of the Dairyman's Association that ensured a regular supply of milk. A life-long Liberal, he had a good record of public service on the Board of Guardians and County Council. He leaves a widow and three sons 36 07 09a

1936 A tapestry showing a panoramic view of Windsor Castle that was produced as a personal Silver Jubilee gift for the late King George V and Queen Mary is now on view in London. It represents the very finest modern English weaving and was designed and woven by the Cambridge Tapestry Company in their workshops at Thomson's Lane. The weavers were Ellen Nichols, Sylvia Corby, Ethel Lander, Dorothy Pettit, Elsie Blunt and Alice Haylett working under the direction of Hilda Lister. 36 07 28a

1936 Messrs W.T. Thrussell and Sons, the well-known Cambridge firm of shoemakers, held a dinner in honour of Mr F.H. Lucchesi's 70th birthday. 'Fred' has been with the firm for 56 years and recalled many amusing incidents connected with the 'good old days' of shoemaking. Mr E.W. Brett, an employee of 38 years' service also spoke of the early days of the firm. The speeches were interspersed with musical entertainment 36 11 07

1936 Chesterton Gravel Pits have been transformed into a flourishing business working from dawn to dusk. A Prestman dragline gets the gravel out of the ground, grabbing a third of a ton in its great steel jaws and depositing it in a truck which a patient horse drags to a narrow-gauge railway. It needs no driver but stands still while the load is emptied, then lumbers slowly back to fetch more. An ever-moving belt feeds a constant stream of raw gavel into the washing and grading machine from which it pours into appropriate heaps where a fleet of lorries cart it to its destination. 36 12 24a

1937 Annual Business review: description of activities:

1937 Wm Scott and Son, art decorators and painting opened their new premises in James Street. On the site of the disastrous fire which gutted the old site in July last has arisen one of the most up-to-date works equipped with the very latest plant and materials for high quality motor-body and van repairs, cellulose spraying, painting, lettering, joinery work etc. They are specialists in glass & sign writing, plumbing and repairs to residential and business property and have achieved distinction for the high quality of all work. – Advert. 37 04 23e

1937 Remarkably fine silken embroideries have been prepared for the embellishment of the thrones to be used at the Coronation of their Majesties King George VI and Queen Elizabeth. The King's throne is adorned with the Royal Arms while the Queen's also carried her newly-granted Bowes Lyon arms. The Cambridge Tapestry Company was entrusted with the work of embroidering the backs of the thrones. All the preliminary drawings on linen were made in Cambridge and the work was completed at the company's premises at Ickleford, near Hitchin 37 05 10

1937 Bull's diary has cowsheds behind shop in Hills Road – advertisers – 37 05 29a

1937 Matthew's new bakery in Cherry Hinton Road has a complete absence of machinery in the confectionary department as it was staffed by excellent craftsmen trained specially for the job. Night bakers work from 10pm to 5am when the confectionary bakers and delivery men start.

There is a special oven for making Vienna bread with a thermospray boiler operated by gas which manufactures wet or dry steam that is introduced under pressure into the dough, ensuring a crisp crust. An ultra-violet ray lamp, similar to those used in hospital, floods the flour before mixing and the dough before baking, From the ovens the bread is loaded into racks which are placed bodily into electric delivery vehicles 37 10 08b

1937 A.W. Morlin, ironmongers and builders' merchants started 1909 – 37 10 23

1937 Cambridge was a prosperous town but much of the trade depended upon the students and members of the University. The colleges are becoming self-contained so the need for lodgings was drying up. On Sunday it is like walking along the streets of a lost city with the shop fronts in darkness. Cambridge should appoint a publicity agent to attract visitors and conferences, said Mayor, Ald Briggs. A great deal of progress is due to the two or three large light industries who have made their home here and it needs more 37 12 04 & a

1938 S.A. Rolfe's wholesale tobacconist and confectioners business began in a very small way in East Road, in 1911. Now it is the largest in the Eastern Counties employing nine full-time travellers. In March 1935 they moved to Newmarket Road where the stock is kept in perfect condition and its 20 motor vans can be loaded completely under cover. They cover a territory reaching as far as Clacton, Frinton-on-Sea, Peterborough and Luton conveying tons of tobacco every day. All leading brands are stocked including R.S. Murray (chocolates and confectionary) and Messrs Parkes 'Classic' boiled sweets – Advert. 38 05 30b

1939 The packing room of the Forum Cleaning Works, Hartington Grove was destroyed by fire that started in a machine in one of the cleaning rooms. This was put out with the aid of a fire extinguisher. The clothing was then put in one of the tanks and was run through a press room. When some of the staff reached the door, however, the handles of the tank burst, and the whole lot went up in flames; there was some danger of the fire spreading to a 500-gallon tank of white spirit. 39 05 26 CIPof

1939 Horace George Gray was managing director of Messrs. H. J. Gray and Sons Ltd., the sports goods manufacturers. The early premises were off Grange Road and later had a factory in Searle Street before moving to Benson St 39 11 17 CIPof 39 11 16

1939 British Portland Cement has constructed an emergency headquarters at the disused Saxon Cement Works in Coldham's Lane. Built by William Sindall it includes a complete set of offices with bombproof shelters and all A.R.P. necessities. There are two decontamination rooms with gas proof windows and splinter-proof steel shutters. Seven bomb-proof dugouts covered with eight inches of reinforced ferro-concrete and two feet of earth can each accommodate 30 people. It has an air-filtration plant, central heating and electricity supplied from an accumulator driven by a crude oil engine 39 04 19b & c

1942 Simper, rope and tarpauling maker, New Street – was one of few people who could spin hemp two-handed – 42 03 26

1943 Beales tailors & robemakers, Sidney St : association ends after 143 years with retirement of B.W.Beales [1.7]

1949 Cambridge Trades Fair Association hold Festival, 66,000 visit[1.10]

1950 The biggest trades show under canvas organised in England opened in Cambridge today. The value of the exhibits displayed is estimated at nearly £1m. and the show can be regarded as the first big demonstration of the many industrial activities and specialised trades for which Cambridge has been famous for so hundreds of years c50 08 25 76,722 visit, "will be the memory of 1950"[1.10,1.12]

1950 Cambridge's own Olympia-in-miniature opened on Midsummer Common. The Cambridge Trades Fair Summer Festival attracted over 15,000 people on one day alone. In opening the fair the mayor said: "We in Cambridge know that at one period anything in the way of localised industry was frowned upon. Today I am thankful to say that old spirit has died and we can be proud of the industries which have crept up over a long period of years" c50 09 03

1951 Cambridge Plate Glass Mutual Insurance Company centenary [1.15]

1951 The Associated British Portland Cement Company sought sanction to develop new marl pits in the Coldham's Lane area and chalk quarrying at Lime Kiln Road, Cambridge, to ensure supply of raw materials to their Norman Works for the next 65 years. They were appealing against the County Council's refusal of their applications. It had been estimated it would be possible to work the present Lime Kiln Road quarry to a further depth of 40 feet. This would allow for an extra 71 years working. The residents of the Orchard Estate were very apprehensive about development planned to come up to their back gardens c51 01 11

1951 Modern machinery has already done much to revolutionise food manufacture, and the tremendous advances it has brought to bread-making – from the old days when a baker kneaded dough all night in a hot, often unhygienic bakehouse, to today when bread can be made between mid-day and midnight, entirely by machine and practically untouched by hand, was demonstrated by Mr George Hawkins at the new automatic plant for bread making installed at the Model Bakery, Parsonage Street, Cambridge c51 03 12

1951 Messrs Spillers celebrated the official opening of the Company's new Central Laboratories in Station Road, Cambridge, built to replace a laboratory destroyed in a bombing raid in London four days after the outbreak of the last war. Work went on at Birkenhead and then in 1947 it was decided to build and erect a new building at Cambridge, started in 1949. The mill has been renewed and remodelled on the very latest lines, designed primarily for milling home-grown wheats c51 95 91

1952 Trades Fair held, visitors are down, at 78,000 [1.17]

1952 With a fanfare from six scarlet-suited trumpeters Cambridge's third Trades Fair on Midsummer Common was opened. Immediately afterwards the Mayor went to the Interflora stand and sent a basket of roses by air to the Mayor of Cambridge, Massachusetts. Three local firms, Messrs Biggs of Peas Hill, Messrs J. Rogers of Newnham and Messrs Ridgeon's of Sussex Street, pooled their dollar allocations to provide the roses for America. In the first six hours 12,642 people paid for admission c57 08 30

1952 The Cambridge Co-operative Society's new bakery in Sleaford Street, Cambridge was opened and more than 100 people were shown round by Mr V. Grimes, the bakery manager. It is possible to turn out 1,200 loaves an hour. At no point is a draught, the enemy of good bread, allowed to enter the building, doors being surrounded by hygienic glass brick screens. It is the fourth bakery; the first was built in 1872, the next in 1888 and then in 1930 a "model bakery" was built in Sleaford Street. But the Society grew at such a rapid pace a new building became necessary with the latest machinery to turn out the bread c52 09 09

1953 A Cambridge brush manufacturer was ordered to disclose a 'secret formula' for dressing hair for brushes, which had been used by his father. He had started business on his own in School House Lane in 1947, making brushes for one wholesale firm on terms which proved unprofitable. He became insolvent, but had kept no books. He'd been offered £1,500 for the 'secret formula' and should reveal it to the Bankruptcy Court as there must be some value in it c53 11 24

1955 Cambridge abattoir suggested – 55 08 09b

1955 The world-renowned firm of Grays of Cambridge was founded 100 years ago by H.J. Gray who, with four other brothers, held the racquets championship of the world for several

years. They started as boys in the racquets courts of St John's college where they strung the racquet hoops, which led to the founding of the firm years before the game of lawn tennis started. Afterwards they produced cricket bats. 55 12 16a&b

1955 Employees of Messrs R. Buttress & co, shirt makers, tailors and robe makers, gathered in their workroom for a presentation to Mr J. Hewish who is retiring at the age of 83. He has been a tailor for 65 years; he was apprenticed at Newmarket where he helped to make riding breeches and started in Cambridge for fivepence an hour. 55 12 21

1956 W. Holliman and Sons, the well-known Cambridge firm of removal contractors have again chosen a Morris vehicle for their fleet of pantechnicons. Every vehicle since 1926 has been a Morris, proof of their faith in this make. They are also house furnishers and their showrooms, the King Street Furniture Galleries, were the first 'Walk Round Showrooms' in Cambridge, dating back to 1923 when they moved from Mill Road. 56 11 02

1957 The National Industrial Fuel Efficiency Service at Brooklands Avenue has doubled its strength since 1954 and has now moved to Queen Anne Terrace. It was set up to investigate the tremendous amount of waste of fuel through faulty plants, poorly insulated buildings or by untrained stokers. They help bring industrial plants up to high standards of fuel utilisation enabling savings of 15 per cent during 1955-56. 57 02 08

1957 A Cambridge Christmas card publisher told the Bankruptcy Court that he went into business in 1951, designing cards that proved very popular. Next year the cards were despatched by the printer direct to his customers. But some were sub-standard and he lost orders. In 1955 he hired a printing works in Baldock but the press broke down. Then the bank restricted his overdraft. His skill as an artist exceeded his ability as a businessman. 57 01 10a

1958 Percy John Todd was apprenticed to the scale and weighing machine trade at the firm of Headley and Edwards. In 1931 he started Todd's Scale Work on East Road and was the senior partner until his death. In his younger days he played for the Cambridge Victoria and Cambridge Hotspurs Football Clubs and ran with the Albert Institute Harriers. 58 01 16a

1958 W.J. Adkins, butchers and provision merchants announce the opening of their new modern abattoir at Cherry Hinton with stunning pens, humane slaughter, mechanical handling of carcasses and hygienic condition. Adkins will purchase and collect animals from farmers at market prices, accept commissions from butchers and sell direct to retailers. (Full-page advert with photos of slaughter hall and carcasses) 58 01 24

1958 Two former employees of the Hide and Skin Market Company of Cambridge appeared in court accused of the theft of 'sheep runners' (intestines used for making sausage skins. They had taken 10 sacks of runners, hidden them under the seat of their lorry and sold them in Letchworth for ten shillings. One said he was short of money, he felt envious when other friends went for drinks and had cigarettes and he could not afford them. The other said his wife had recently had a baby and this had 'gone to his head'. 58 06 14b

1958 Cantabrian Athletics equipment made by the London Instrument Company of Newnham Mill will be used at the British Empire Games at Cardiff. It includes pole vault standards, hammers, javelins and gauges for the high jump. Much of it was designed by Henry Rottenburg, the owner of the firm which moved to Cambridge in 1910. They have also supplied the Olympic Games and European Championships. 58 07 09a

1958 Mr Walter Pearson was one of the first milk roundsmen to be employed by the Cambridge Co-operative Society and took out the first load of milk after the dairy was opened in 1927. In those days it was quite a small affair comprising seven or eight rounds, now it has 51 rounds and an annual gallonage of 2,100,000. He likes the modern electric vehicles but says the

old horse-drawn ones would follow him down the street whilst he made his deliveries. He was presented with a set of pipes, pouch and tobacco. 58 07 22a

1958 Cambridge milk bottling works washes 65,000 bottles every day. Out of the empties come notes, thimbles, teaspoons, dead flowers and even bicycle brake blocks and dead mice. People use them as containers for paraffin, paint brushes, home perm solutions and creosote. Another tiresome business is the punching in of foil tops, squashing them down into the bottle. Some people hoard them: 672 were found in a house in Chesterton High Street and dozens are found down wells. 58 07 25

1959 To progress from a back kitchen near the Rex to a cowshed in Abbey Road is not a very great step, but finally to settle in a brand new building in Occupation Road is indeed a larger stride. This is what the Homewash Laundry had done and this was the cause of wonderment expressed by the many trade and press journalists from London at the opening of the Laundry by the Mayoress of Cambridge, who was a long-standing customer in its less contemporary days. 59 03 12

1959 The Wellbrook Laundry on Girton Road was originally opened for the benefit of Girton College in the days when they sent the clothes by horse and carts, so it was fitting that the Mistress performed the formal opening ceremony of the new dry cleaning department. Afterwards visitors viewed the laundry which included the sorting of customers' work by tape recording and sheets automatically folded by machine. 59 03 23c

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Cambridge Steam Laundry on Cherry Hinton Road was founded in 1880 making it the oldest in Cambridge. Coldham Model Laundry purchased a motor van in 1910 becoming the first with motor transport. Ely and District Laundry is housed in a modern, spacious building and employs 85 personnel handling 52,000 garments a week. It has canteen facilities with free tea twice a day and 'Music While You Work' – a great favourite with younger employees. Homewash is the 'bouncing baby' of local laundries, starting very humbly on V.J. Day 1945 when two recently-demobbed ex-Servicemen started to 'take in washing'. 60 09 05a b

1961 Last summer's bad weather was the culmination of the vicissitudes faced by an Italian ex-prisoner of war. Gaetano Risitano, who traded as 'Guys', bought an ice cream business on Mill Road but problems started when he became involved in litigation with the previous owner. This was followed by a bad season in 1960 and profits were not big enough to support his outgoings so he put it up for sale. 61 08 10

1961 Miss M. Pate began learning shorthand in the 1880s by taking down family conversations and sermons. Then she got a job copying manuscripts at Downing College which is where she first saw a typewriter. She joined an office for typewriting and shorthand, taking over the business in 1900. After 1918 every member of the University wanted his work typed including Rupert Brooke who cycled in from Grantchester each morning with the next chapter of his dissertation for King's College. She was awarded an Honorary Cambridge MA and now spends many hours preparing an enormous scrapbook of material. 61 08 30

1961 Prziborsky's barbers shop in Ram Yard is to be swept away by demolition and redevelopment. The site is to be incorporated into a new road leading to Park Street car park. It was founded in 1879 by Count Prziborsky after he left his position as barber at the Imperial Austrian court. The family connection elapsed in 1934 when the Count's son died and Mr Frederick Osborne took over the business. A ladies' hairdressing side catered for Girton and Newnham girls but was discontinued during the war. 61 08 31a

1961 Austin Beales and Coote and Warren opened their new fuel oil terminal and solid fuel depot in Clarendon Road, the most modern in Europe. Oil arrives from Mobil's refinery chiefly by rail and is discharged into three main storage tanks before being sent by road tanker over a wide area. Solid fuel deliveries are concentrated in Cambridge itself. Each year 45,000 tons is unloaded from rail wagons by two cranes with 65 wagons of solid fuel arriving each week. 61 10 04b & c

1962 The new slaughterhouse in Cheddar Lane, originally a two-storey builder's store, can deal with 60 to 80 cattle units and will be used for the wholesaling of fresh and chilled meat. The premises, provided by Mr R.S. Speechley, a wholesale butcher and slaughterer, replace one built by his father 60 years ago which has fallen behind modern standards. The business was taken over by the Ministry of Food from September 1940 to July 1954. 62 04 05b

1962 Mackay engineering firm celebrate 50-year jubilee – 62 06 04

1962 Shipowners' Refrigerated Cargo Research Association new research lab opened, Newmarket Rd 62 06 07

1962 The Cam Foundry in Thompson's Lane once had 20 men making cast iron, lamp posts, grating and road ironworks. Friday was the usual day for mould filling. The fire could be kindled in the cupola early in the morning and loaded up with hard furnace coke. The furnaceman was a real 'character'. A labourer, tough and very strong he would swing a 32 lb hammer to break up the scrap and pig iron. He distained the use of gloves or goggles, his bare hands and unprotected eyes in constant danger from molten splashes and sparks. It closed in 1923 and Messrs Macintosh transferred the business to the old Romsey Town cement works at Mill Road 62 08 16a & b

1962 Pratt, Manning and Co of Trinity Street, Cambridge's oldest bespoke tailoring firm, is to close. It was established in 1865 by Thomas Pratt and acquired by Ald H.T. Wing in 1897. Until the First World War about 80% of the trade was from undergraduates who ordered three or four suits at a time. Today students on grants cannot afford high prices for hand-made clothes and they rely on professional and business men for their trade. Customer's patterns and records will be transferred to their London office and a cutter will visit Cambridge at regular intervals. 62 10 13a

1962 "It's a dying trade this. I can remember the days when there used to be 15 of us down here and we never used to go home until eight in the evening", recalled Arthur Starr, a tailor. "We used to do a lot of undergraduate trade: we worked hard for about seven months, then we'd have the rest of the year free. The only thing I do now is jackets. I won't touch trousers and waistcoats. I've been doing it for 50 years. I always sit cross-legged. It's the only way to do it. I rest sitting like this, you now. I even sit in bed like it" 62 11 30

1963 J.G. Horne is no ordinary garment manufacturing business. Tucked away in a building at the top of a wooden staircase, amidst brightly-coloured materials and the clatter of sewing machines, 20 girls are employed making articles which range from college scarves to rowing shorts, academic gowns to schoolboys' blazers. Since it was established in 1927 it has concentrated on the club and colours trade, producing 7,000 scarves each year. Many are made by 'out-workers' and each stripe is individually added. But gowns, blazers and sportswear are made in the premises in St Barnabas Road. 63 01 07a

1963 London Instrument Company manufactures athletics equipment in the Old Mill, Newnham Pond. It employs 30 people annually producing 5,000 hurdles, 1,500 javelins as well as starting blocks and shots. It was founded by Henry Rottenburg in 1911, Fellow of Kings and lecturer in the University Engineering Laboratories. In collaboration with the University Athletic Club they developed a long jump measuring device, scoreboards and an ill-fated starting gate which nearly strangled a competitor. 63 01 22c

1963 Simpers rope works in New Street was established 200 years ago to meet the demand for tow-ropes for horse-drawn barges which plied along the Cam. They were made by hand on the Ropewalk which once marked the borough boundary. Today, with the coming of machinery, they

are among the biggest rope and fibre merchants in the country making canvas covers for lorries, marquees, tents & flags. Since the war tremendous development has taken place in the agricultural ironmongery department where farmers can find cattle-troughs, shovels or forks and builders buy barrows, water-proof clothing and nuts.63 02 01a

1963 Miss Minnie Pate, University Typewriting and Secretarial Service – appreciation – 63 06 11a

1964 Duke of Edinburgh opens Churchill, visits Pye Telecom & Airport [02.4.6]

1964 The Cambridgeshire Deep Freeze Company was formed in 1952 in adapted buildings on Pound Hill, then extended into pre-fabricated cold rooms nearby. Soon however the whole of the Pound Hill area became part of a redevelopment plan and they moved to a new site at Girton during the severe winter of 1962-63. It accommodates bulk quantities of raw materials such as raspberries and blackcurrants for national processors but one cold room is sub-divided into lockers which can be hired to private individuals for the storage of game or garden produce. 64 04 13b & c

1964 London Co-operative Society are to close their creamery at Ditton Walk because they have not got sufficient milk in the area to keep it going since Cambridge Co-op now want an extra 1,000 gallons to mean increasing population. The creamery supplied milk only to London areas. Many of the staff of 22 have been there for 30 years 64 06 27a

1969 Baldry's move to new factory in Harvest Way from Gold St; started in 1923, first to use all-automatic crown cork sealed bottles; took over Cambridge Soda Works and in 1925 acquired important contract for mineral waters with a local brewery; began bottling cider in 1930 and in 1935 extended range to confectionary, cocktail sausages, pickles and groceries. Bought Sawston Aerated Water Company – 69 05 17a, b, c

1970 15a scrap pit, Coldham's Lane to be developed for commercial use [446.11.1]

1970 Moore Pianos yet another victim fast-dying family firms, lack skilled craftsmen [9.6]

1971 Harry Cooper opened furniture shop in Newmarket Road about 50 years ago; would pull down shutters for fear bullocks would get in – 71 07 26

1971 Cambridge Microfilm Services a success story, set up two years ago – 71 09 13

1971 Mackay plans to extend engineering factory and build more shops and offices on East Road blocked – 71 12 07a

1976 A storm of protest followed the building of a line of office blocks in Hills Road, Cambridge, about three years ago. Public meetings were organised and people claimed the character of the area was being ruined, good housing lost and small shops demolished or forced out of business. Most of the offices replaced large terraced houses of little architectural interest. But the busy main road was not an ideal site for housing and several were no longer private homes. The new buildings are individually of quite a high standard, but they appear completely isolated and out of character with the shopping area. They need something to break up their long facades and link them with the variety and bustle of the shopping area. But the offices have injected a new source of life into the area; already a bank and several eating places have opened up, presumably to catch the lunch time trade from the offices c76 12 20

1977 Every one of four generations of the Reynolds family is a past, present or future "rock king". They are Mr James Robert Reynolds, aged 85, his son Jack, his grandson John and his great grandson James Robert, seven. Jack still makes old-fashioned brown rock – square, not lettered - in a tiny plant at the back of his shop in Newmarket Road, Cambridge which he mans seven days a week.. He joined his father when he left school at the age of 14. There have been

“rock kings” in the family for at least six generations. “It would be nice to see it go on – and every one of them a ‘J’” he said. CDN c 8.2.1977

1977 A Cambridge tailors, James Neal Ltd, which has been in Cambridge for 107 years, has been taken over by another tailors which is even older. The firm which has bought out the Trumpington Street business is Ede and Ravenscroft which started trading in 1689. It specialises in ceremonial and academic robes and is a leading manufacturer of wigs and legal wear. c77 11 15

1977 At 2.00 am while Cambridge slept a solitary light shines in Belgrave Road. Master baker Roy Markillie has arrived at the family bakery. His aim – to turn out 4,000 loaves in time for the bread queues that inevitably form outside his shop at 9 am. All his working life he has been an independent baker and so isn’t affected by the strike that has crippled the big bread firms. He doesn’t relish the thought of tripling his normal production rate – it simply means he will have to work flat out for the next eight hours. At 9 am the bread goes on sale – rationed to one loaf for each person c77 09 18

1979 The closure of the Allied Bakeries’ plant in Sleaford Street, Cambridge with the loss of 200 jobs means the end of bread making on a site which was poised to celebrate its golden anniversary. For a long time it was owned by the Cambridge Wholesale Society until it sold its interest in the sixties to F.W. French. In 1971 it became part of Spillers but last April they sold off this side of their business and Allied British Foods moved in. They gave a guarantee of a year’s employment provided there were no disruptions but when the bakers went on strike the plant stood idle for many weeks. It has operated at a loss from then on. CEN c 8.3.1979

1981 The crack of blazing shotguns was heard for the last time at Madingley as Gallyons closed their shooting ground after 70 years. Ernie Johnson has spent his entire working life there and so after 44 years of teaching, advising and correcting the technique of sporting gunmen from all walks of life he is facing his first change of job. The site is surrounded by roads and cannot expand to stage big shoots. 81 06 19

1981 The first privately-owned British company specialising in biotechnology has been formed by a consortium of leading scientists and businessmen. CLEAR – Cambridge Laboratories for Energy and Resources Ltd – will use genetically engineered organisms for processes ranging from obtaining energy from waste to combating Legionnaires Disease in hotels. It has leased laboratories from Cambridge University and will offer a full technical service to industry for the commercial applications of biotechnology. 81 07 17

1982 The final phase of the Coral Park development in Coldham’s Lane is now complete. Work began in December 1973 with the demolition of a 160-ft high chimney which had been part of the Cambridge landscape for more than a century. The first warehouse was let to E. Laxton, a national cash and carry operation, and other tenants include W.H. Smith (Wholesale), Pye Telecommunications and Linfood. 82 08 25

1983 George Webb was one of Cambridge’s best-known personalities. He introduced all-in-wrestling, indoor roller skating, 3-D movies and cups of tea during the intervals at the cinema. In his later years he built up one of the largest heavy haulage and public works contracting businesses in East Anglia. His bald head, the huge cigars which he chain-smoked and the large American cars he loved to drive became his accepted ‘trade-marks’ during his colourful business career. 83 01 31

1983 Les Neal is retiring after half-a-century of dedicated, devoted and skilful service as a gentleman’s hairdresser. Apprenticed at the age of 14 in 1932 to Walter George Ambrose, he served with the Priziborsky business in Round Church Street before moving to Watson’s in Mill

Road. He is a dedicated supporter and leader of the Scout movement and an enthusiastic and expert player of the bagpipes. – Frank Matthews. 83 04 23

1984 Foreign competition is forcing Grays to stop volume production of wooden squash racquets early next year due to the difference between the cost of labour and overheads in Cambridge and Taiwan. But production of a limited range of top-quality specialist racquets will continue as will its cricket bat and ball factories in Sussex and Kent. The 129-year-old company, which has its headquarters at the Playfair Works in Benson Street and a sports shop in Sidney Street, employs around 110 people locally 84 12 14

1985 Spillers flour mill one of most sophisticated in Europe, transformed during last 5 years
çEAM 3.1985

1985 office rents soared 35% in year, shops and industrial rents also up çCEN 12.12.88

1985 Spillers' new flour packing factory in Station Road is a model of modern efficiency. Combined with the existing Homepride mill it will be capable of producing 20 million packets of flour annually, making it their main processing plant in Britain and enabling cost increases to be kept to a minimum. It is part of a major centralisation plan by Spillers Homepride which is moving its headquarters into Cambridge. 85 09 26 - CEN 13.12.88

1985 For 50 years the name of F.H. Fry has been associated with scales and scale-making in Cambridge. It was started by Frederic Fry in East Road in 1935 and moved to Perowne Street in 1962. Now they have branched out to include cash registers, gravity-feed slicers and sausage fillers. Modern scales are so clever they can not only weigh and automatically calculate the price but they also check themselves to see they are in working order. Yet despite all this progress a brass weight is used to check they are accurate. 85 06 26b

1985 Pigott's, the family ironmongers which has traded in Cambridge for more than a century, is up for sale. It was in 1863 that John Pigott, son of a Landbeach farmer, opened an ironmongers shop in Sidney Street and a chain of shops were set up in Market Hill, Mill Road, Norfolk Street, Bridge Street and Hills Road. The Sussex Street branch, an established feature of the street since the late 1930s, shut down last September. The business, now in Victoria Road, includes two shops, a warehouse, stores and office. 85 10 15a

1987 The Blue Circle Cement Works in Coldham's Lane is to shut in June with the loss of 22 jobs. The news comes less than three years after a decision to reduce the 70-acre site from a quarry to simply a grinding and distribution depot. Workers have been worried about their future ever since the 1983 decision to wind down the operation with the loss of 91 jobs. The manager said it hadn't come as a total surprise and people had resigned themselves to it. It means that a prime development site could soon be on the market. 87 01 24

1987 Donald Mackay reviews firm's history – 87 06 12d

1987 Tansley Typewriter Company celebrates 65 years - 87 10 08

1987 Jack Reynolds, rock maker and confectioner, is to retire after 40 years in the rock business. His father, James, was known as 'The Rock King' whose stall at the fairs on Midsummer Common was a familiar sight. Jack opened a shop on Newmarket Road about 1947 and has lived in the area all his life. The road has changed a lot; when he came there were houses in Occupation Road and several businesses have disappeared. He no longer makes his own rock but his son and grandson are carrying on the family name. 87 10 14a

1988 The chimney of the Blue Circle cement works on Coldham's Lane is the last remnant of more than 75 years of cement production in Cambridge. It stands alone on the 70-acre site which ceased production in 1984. It opened in 1908 as the Norman cement works and was frequently modernised with a new kiln installed in 1948. It finally closed in June after being a grinding and

distribution plant for its last three years. Mystery still surrounds the future of the site which is still partly used as a waste dumping ground in a former quarry 88 01 27

1988 One of Cambridge's best-known landmarks was removed from the skyline as the chimney at the 70-acre Blue Circle cement works in Coldham's Lane went out in style. The surrounding roads were full of cars before a sudden and extremely loud bang rang out. In a few seconds the old chimney took a clean dive to the ground and was reduced to a pile of rubble. The Norman cement works had opened in 1908 and frequently modernised, finally closing last June. For the last three years it was used as a grinding and distribution plant 88 02 01a

c.27.1 : industry

headlines

1891 hosiery manufacturer makes 20 dozen pairs of hose per week [NI.3.3]

1895 Cambridge Instrument Company formally registered, (established 1881) [1.13]

1896 W.G.Pye started & after 1918 specialised in wireless, Pye Radio formed 1929; by 1952 was largest manufacturer of tv sets in Britain [1.14]

1903 The recent completion of the Atlas Stone Company works at Coldham's Lane will add to the industrial importance of the Romsey Town and Cherry Hinton districts of Cambridge. A complete plant for the manufacture of artificial paving slabs on the most up-to-date principles has been installed with a hydraulic press capable of 500 slabs per day worked by electric power. The chief market is in London and the Eastern Counties where the value of artificial flags for footways has been firmly established. c03 11 06

1904 Norman Portland Cement works built, by 1963 produce 2000 tons concrete weekly [446.11.1]

1904 Cement making has already become a very important Cambridge industry. Extensive new works are rapidly approaching completion and have made a great change in the landscape of Cherry Hinton. The pleasant path through the fields from the end of Mill Road is hardly recognisable now. It has been diverted to make room for a huge collection of buildings from

which a new siding leads to the railway line close at hand. These are the Norman Cement Company's works. CDN 14.11.1904

1906 'Kleno' is a liquid cleanser for domestic and industrial use manufactured in Broad Street, Cambridge. Chemical changes take place in a locked room before it is refined in a series of vats from which it emerges clear and bright. The bottle washing apparatus is worked by steam and the factory has its own warehouses making packing cases ready for despatch. It is a matter of satisfaction that the factory has been established here, for it involves the employment of more labour and all the benefits of a growing industry. 06 05 21a b c

1907 When Dew Smith and Horace Darwin commenced the manufacture of certain scientific instruments for physiological work at the University Laboratory it was more as a hobby and not financially profitable. But it grew and in 1895 was turned into a limited liability company which is now flourishing at its pleasantly situated works off Chesterton Road. Among its important products is a kite used in meteorological observations and a machine for standardising small screws which has been supplied to the Japanese government. 07 01 18

1911 London Instrument Co founded, make athletic equipment (used every Olympic games since 1948; change name to 'Cantabrian' 1974) [6.2]

1913 W.G.Pye & Co new scientific Instrument works opened by Prof Thomson [2.2]

1913 A blaze broke out at Messrs Macintosh's foundry in Thompson's Lane. After the days work is done the men draw the furnace to allow the fire to die out. When this is done huge sparks fly up, giving the impression that the place is on fire. But one of these sparks was blown on to the roof and set light to a beam. Had it been left the entire premises would have burnt down. But firemen, aided by undergraduates, put it out. 13 05 30 p11 CIP

1913 Ivett & Reed stonemasons noisy stone-cutting machine 13 05 30 p10 CIP

1913 The prosperity of Cambridge is so much bound up with the success of the two large wage-paying undertakings, the Saxon and Norman Cement Works that it is good news to hear that British Portland Manufacturers have announced a dividend of seven per cent for their first year's working. It was registered in November 1911 to acquire several undertakings, including the Cambridge works. The profits for the year amount to £306,092 (about £30m at today's prices) 13 07 18 p12

1919 Cambridge industries: what firms have done during the war; how to encourage factories; address by H.S. Whipple. Includes: Chivers for jam and food stuffs, W. Saint made heavy crates and repaired ammunition boxes; Coulson & Lofts – locker cabinets for munitions; C. Kerridge – crates for jam and doors for huts; H.J. Gray – signal flag poles; P.H. Allin = Stokes shells and Mills grenades; Engineering Labs – high-explosive shells and gauges for manufacture other war equipment' Gas Light Company – benzol for high explosive and ammonical liquor for agriculture, tar for distilling for navy; CUP printed 1.6M copies of New Testament for troops; Suttle made chevrons and badges, part of 15,000 officers' uniforms; Mackintosh made gas chambers for treatment of those gassed in France, includes order from American army; King & Harper controlled all the mechanical tractors and implements within 15 miles which ploughed 16,000 acres in 1918; first two had been intended for hauling Russian guns but ploughed eight furrows at time; W.G. Pye made height finders for aeroplanes, special telescopes, sights for guns, electrical instruments etc; Cambridge Scientific Instrument Co made pyrometers for controlling temperature in manufacturing of war materials such as cartridge brass, manufacture of cordite etc; optical pyrometers formerly only made in Germany; special workshop for thermometers for aircraft ensuring water did not freeze in high-flying planes as well as instruments to determine height and special experimental work. Also considers future industries, need for housing etc – 19 04 02a

- 1921 Cambridge Scientific Instrument Company big blaze [1.5]
1921 Pye Ltd changed to radio 1921 when lapse in demand for instruments; 210 ft aerial mast put up at start war to help develop defence systems & once used very low power experimental tv programmes [446.17.1]
1921 Frederick Woor, Master Tailor, Sidney St, paid less than minimum wage to his women – 21 04 06c
- 1922 “Cambridge a splendid site for industry ... university can look after itself” [2.1]
- 1923 Baldry starts (46 years ago 1969), take over Barker & Wadsworth 65, move new factory 69 when started were 32 competitors, move Sawston as no site big enough 79, shock liquidation, restart production under new company 82 [8.2]
- 1931 The question of the development of the industrial side of Cambridge has cropped up periodically over a good many years. Hitherto works and factories have not been encouraged - the serene, academic atmosphere should be maintained at all cost. But economic pressure, the diminution in the spending power of the undergraduates, depression of agriculture and trade have hit the town very hard. Cloistered calm is all very well, but people must live. 31 11 27b & c
- 1932 Corona start Cambridge production, 30,000 bottles daily (by 19..) [6.3]
1932 Cambridge Metal Stamping Company applied for permission to erect a modern factory at the rear of St Andrew’s Road. This was an area zoned for residential use but was nearly opposite the Gasworks, which was not entirely a thing of beauty and the Corporation’s pumping station, which was not quite as attractive as the gasworks. Pye’s works close to the river were not at all objectionable, nor was Banham’s boat building establishment. Despite reservations it was agreed. 32 03 21, 23 & a
1932 Cambridge Metal Stamping Company’s plans for the erection of a factory on land off St Andrew’s Road, Chesterton would endanger the beautiful prospect from the river. Alderman Starr said he had viewed the site and been surprised to see a very large building for Pye’s Radio Works had already been erected on the opposite side of the road. Factories were being built without consent of the council but this one could be blocked under the town planning scheme. There were other places it could go. 32 05 03 & a
1932 Metal stamping factory turned down – 32 05 05
- 1944 Pye Telecom founded [446.15.3]
- 1947 Cambridge Instrument Company plans for research laboratory and office block in Carlyle Road referred for further consideration; area primarily residential and fear will destroy view – 47 12 11
- 1949 Pye warehouse fire - 3-400 tv sets destroyed [1.6]
- 1950 Cambridge Instrument Company erect factory Finchley, 200 workers leave Cambridge as blocked by planning [1.7]
1950 worlds smallest milking machine made by H.E.M. Ltd, Ditton Walk [1.13]
1950 Cambridge Council is considering purchasing sites for industrial purposes at Brooklands Farm, between Cromwell Road and the railway and at Union Lane. The committee recommends the Union Lane site is more suitable for housing, Brooklands Farm is unsuitable for industry owing to drainage difficulties and that the Allotments Committee’s views be sought on the Cromwell Road site. They also reject proposals for a site off Clarendon Road for the University

Press printing works owing to traffic difficulties and the need to preserve the existing green wedge c50 07 25

1952 Mr Lloyd Stokes, owner of land at Trinity Hall Farm, Milton, said there were 140 armoured vehicles on the land waiting to be shipped. He wanted an access from Green Park because he had a number of tanks coming through the back and wished to enlarge the front entrance on to Milton Road. It was dangerous and an agricultural machine such as a 12-foot combine could not get through. The County council suggested the city should buy this piece of land and put there light industry, not likely to cause any nuisance. c52 06 25

1954 Minister announces decision on County Development Plan, to discourage the establishment of large industries of the mass-production type within the count (certain sites may be compulsorily purchased for purpose of rehousing those industries within city which require to be moved from existing sites)

1954 Pye take 1st tv Middle East [1.8]

1955 Grays celebrate centenary [2.2]

1955 Unicam Instruments celebrated its 21st birthday; it had started in a stables on St Andrew's Hill, Cambridge. Despite setbacks, when paying the staff became a problem, the firm thrived. At the outbreak of war, after a skirmish with the Ministry of Aircraft Production, they acquired Riley House opposite the Tivoli Cinema. Finance problems arose again and they established a relationship with Pye Ltd. 55 12 17a

1956 Councillors want to acquire land at Coldham's Lane to resite existing industry from the East Road and Lion Yard area. Previously the land's only use was agricultural but there would be no difficulty in selling the land for industry. There had been plans for housing development on the north side of Church End but would probably now never take place. The present houses in Rosemary Lane were on cesspools and the council put in a foul sewer. 56 03 21a-d

1958 Pye demonstrate stereo sound [1.9]

1958 Spillers new Central Laboratory Station Rd [2.17]

1959 Marshall's develop Bacon fuel cell [1.10]

1959 Cambridge Instrument Co open Chesterton Rd HQ [1.11]

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 Cathodeon Crystals open at Linton after being told cannot build factory in Cambridge [6.1]

1960 Cambridge Consultants formed; expand 60% pa till move to first Bar Hill factory 1968, first commercially established contract research & development company in country, move Science Park79; Minto left CC to form Domino [7.6,8.4]

1960 Light industries already accommodated in Cambridge may be moved to a site to the east of Milton Road. S.G.B. have applied for eight plots for workshops on land used for breaking up Army vehicles. Part is used by the Cambridge Pre-Cast Stone Company and is within the proposed Green Belt. It is an area of no great beauty, is primarily derelict and very little use for anything else, an Inquiry was told. 60 05 03b

1961 The warehouses of Radio and Television Services Ltd, Gloucester Street, were gutted by fire. Scores of people living nearby went into their gardens as showers of sparks and splinters

from exploding radio valves and television tubes showered down on their premises and residents of Clare Street used garden hoses to prevent the fire endangering their garden sheds. Arthur Brett (80) said the blaze and noise was just like the battle of the Somme. Employees will be moved to other buildings in the Pye group and there will be no serious interruption in the repair and servicing facilities operated by the company. The two-storey high building also houses a technical school for overseas radio experts. 61 01 02c

1961 At the Lister works in Abbey Road they like to take on smaller, unique, prototype jobs. Men were making parts for the Emeryson racing car, parts to go into the focussing mechanism of television cameras and gear-rings of enormous diameter for some special task which would have required too much disruption for a great factory to undertake. Elsewhere others were making a mysterious stainless steel tent for one of the University laboratories while in the drawing office a draughtsman was working out production details for a machine which nuns will use to cut and bake the very thin altar-breads for the Catholic Mass. 61 04 07d

1961 Edward Bowles has been a saddler for 65 years. When he started, at one shilling per week as an apprentice, he had to wear a clean collar and clean shoes to work every day – otherwise there would have been trouble from his employer. The work then was much heavier: large horses and agricultural harnesses were commonplace. Now light pony harnesses and stacks and stacks of suitcases are his lot. He operates his firm – the only pure saddlers left in Cambridge – with his son and finds there is ample work to carry them through the day. In fact he has not had a holiday for over five years 61 06 16b

1962 Unicam & W.G.Pye York street labs opened [1.12]

1962 Trinity Hall Farm Industrial estate designated; bought compulsory by city but Whitehall limit use to firms displaced by council redevelopment [13.2]

1962 Unicam Instruments & W.G.Pye & co open new Scientific Instrument Centre; marks stage in development which widens horizons for collaboration of science & industry; could be equally fruitful for both [19]

1962 Mr E.J. Wesley Coe was a glass-blower for one of the University laboratories who practiced his craft at home, making quaint little animals and glass pipettes for artificial insemination. In 1952 he formed his own company making electronic valve components for the radio industry and apparatus for the semi-conductor field. Soon he was employing a dozen people and now supplies the needs of the most recent Nobel prize-winners, the Admiralty, Air Ministry, atomic energy and radio industry at home and abroad 62 12 14a

1963 Princess Margaret visits Pye [02.4.7]

1963 Atlas Stone works make 100 tons concrete daily [446.10.9]

1964 Cambridge Consultants set up 4 years ago in back streets, now has 21 staff [3.1]

1964 Cam Controls of Ainsworth Place, are a small company in what is a virtually new electrical industry. They specialise in control equipment for heating, ventilating and air conditioning and have fulfilled a contract for a New Delhi college and an aircraft testing building at Farnborough where the Concord is undergoing trials. They train their own staff as it is impossible to find men experienced in this kind of work and take a pride in their maintenance service. 64 07 21a

1964 Unicam blacklisted by Russia because of dealings with Greville Wynne who sentenced for spying – 64 09 26a

1965 A great deal of money is spent on training scientists at the university and village colleges. If light industrial firms were encouraged to come to Cambridge and set up small factories employing 50 people, there would be a ready supply of skilled technicians, creating better employment prospects, says Coun. Ron Thulborn of Fulbourn. He is against heavy industry. The

city council has been pressing county planners to lift their ban on industrial development. But they say it would alter the whole concept of Cambridge as a university town and allow it to grow in size out of hand 65 02 08b

1965 Metals Research Ltd to close sites at King Street and Milton and open at Melbourn. The firm, which has a world lead in the production of metal single crystals was formed in 1957 and now employs 120 workers – 65 05 27

1966 Sinclair launches smallest tv [4.8]

1966 300a Science Park proposed by University [4.9]

1966 Cambridge Computer Services set up, taken over Geest 76 [8.3]

1966 Cambridge Consultants form new company Aim Electronics, into liquidation 71 [8.4]

1966 Edward Bowles makes saddles and leather goods at his Glisson Road shop for 70 years – profile – 66 04 01a

1966 Pye incur large losses in radio and television side of group – 66 04 04

1966 Pye respond to report of resignations following large losses – 66 04 19, 19b

1966 Jack Pointer ice-cream factory – feature – 66 08 19

1966 Jim Reynolds ‘Rock King’ profile; firm trading 120 years – 66 09 05

1966 Pye Telecommunications and Unicam Instruments granted Queen’s Award for Industry – 66 04 21b

1966 Sinclair Radionics mini-tv shown at Television and Radio Show at Earl’s Court – 66 08 22

1966 George Lister engineering moves from Abbey Road to Coldham’s Lane, been there since 1890 – feature – 66 09 03a

1966 Pye pocket radio-telephone exhibited – 66 09 07

1966 Louis Sylvester has been making ice cream for 60 years; used to have barrows in Fitzroy Street – profile – 66 10 31

1966 Whirlaclean brand new automatic dry-cleaning centre opens in All Saint’s Passage – 66 11 24b

1966 Pye urged to appoint Receiver following losses if to remain independent – 66 11 11; J.O. Stanley voted off Pye’s Board – 66 11 17, 61 11 18

1966 Pye shares rise as big international take-over battle develops; bid from Philips – 66 11 24a, c

1967 Philips win take-over battle, set up Pye Holdings Hovertrain development work on city site, (linear motor test rig Ditton Walk 1970, reaches 106 mph but threatened cuts, scrapped 1973, confirmed 1974) [12.1]

1967 bright future for 26 year old; Sinclair Radionics established HQ Cambridge a year ago; announce miniature tv & digital watch [21]

1967 Pye chairman F.R. Duncan who took over from C.O. Stanley in May last year now hands over to Peter Thoneycroft, chairman of Pye Holdings, the Company set up by Philips to control Pye following their take-over – 67 10 02

1968?9 Mott report - chaired by Sir Nevill Mott, then head of Cavendish Laboratory, called for development of science-based industry; immediately after publication Trinity identified 130a site - former tank marshalling site during war - which became Science Park [3.4,4.4,4.3]

1968 “mini-estate may be erected” [3.3]

1968 Pye Unicam formed through merger W.G. Pye & Co. Ltd and Unicam Instruments – 68 07 01

1968 Prosser Scientific Instruments may move because of veto on industrial development – 68 10 14

- 1968 Aim Associates Cambridge Ltd, formerly Cambridge Consultants, form new company, AIM Physical Sciences – 68 09 11
- 1969 Pye want to develop on Trinity Milton Rd (Science Park) site
- 1969 Prosser may move Hadleigh due planning veto on industrial development Cambridge [9.9]
- 1969 industrialists asked to support University's fight to throw off Cambridge's restrictions on industrial growth [3.5]
- 1969 Applied Research of Cambridge set up by members of Centre Land Use & Built Form Studies, probably first such formed; 20 students put £100 each into company, by 1984 profits £©M; taken over by McDonnell Douglas 1985 [7.1]
- 1969 Laser Scan founded by 3 Cavendish Laboratory scientists, designed own equipment & finance from Technical Development Capital, first on Science Park, 73, move bigger premises Science Park 86 [9.5]
- 1969 Lloyd Stokes sells land at Trinity Hall industrial site; as farmland would be worth £130 an acres, now sold for £200,000 – 69 01 31
- 1969 Combined Electronic Services factory, part of Pye group, closes – 69 04 29
- 1970 City Electrical Factors join queue for development site [6.5]
- 1970 "Cambridge does not need more industry" - County councillor opposing Science Park [13.1]
- 1970 County to ease ban on city industry, approve science-based industry – 70 01 09, 09a [494.5.16]
- 1970 Trinity Plan 13a Science Park on land formerly military tank park & minor gravel excavation [494.5.17] - 70 04 25a
- 1970 Pye Unicam redundancies follow news sacking at Cambridge Scientific Instruments – 70 10 10
- 1970 Planners may ease band on industrial development; suggest land be earmarked for science industry park – 70 10 13a
- 1970 Trinity College plan 13-acre Science Park – 70 04 25a
- 1971 Sinclair move St Ives, mainly known for hi-fi equipment
- 1971 Pye sack 250 Cambridge area, rising costs [18]
- 1971 Cambridge Instrument Company sack 150; follows Pye redundancies earlier – 71 04 13
- 1971 Pye Group turnover £100M but profits down set up new computer bureau - Cambridge data processing – 71 04 16
- 1971 county dash city's hopes for more industry "heavy door of Cambridgeshire planning bureaucracy was slammed shut on ...hopes of attracting more industry [494.6.3]
- 1971 Science Park will not be stopped by Government, approved planners 1972 [494.6.5]
- 1971 Stokes plans develop 20a industrial estate opposite proposed Science Park, failed get permission 76 [10.1]
- 1972 Trinity Hall Farm Industrial estate designated 10 years ago, still only 2 firms with premises there; bought compulsory by city but Whitehall limit use to firms displaced by council redevelopment [13.2]
- 1972 first stage of industrial & warehouse development at Ditton Walk nears completion [3.7]
- 1972 Lloyd Stokes plans 21a industrial estate opposite Trinity Hall Farm Science Park; had laid roads before permission which rejected; (city backs 1978) [3.9]
- 1972 Cambridge Consultants sold to American Arthur D. Little organisation – 72 01 13

1973 industrial development on 16a Coldham's Lane to be launched by J. Coral Estates, (completed 1982); site bought 1948 for pence, mid 1960s attempt build shopping centre without success; 1963 bought by development co. 7 acres £100,000; Sept 1972 sold Coral £300,000 [3.7.4.1,6.4]

1973 Laser-Scan Ltd, who will become the first Cambridge company to move on to the Trinity College science park at Milton Road, are a typical science-based concern. Founded in 1969 the Company was the brainchild of three Cavendish Laboratory scientists. They could not afford the type of equipment which could do the work they wanted, so decided to design their own apparatus and get it made. Within two years they had established firmly the principles they wished to follow, within two further years they had built the necessary working equipment, known as a "sweepnik". However a firm cannot stand still and the firm hopes to be in their 5,000 square feet factory on the Science Park by the end of the summer. As a high-technology business Laser-Scan are precisely what the planners have in mind for the science Park. Work on laying the spine road and sewers began this month and developers hope to have the first phase completed by August. When fully developed the 13-acre site is planned to provide up to sixteen factory units. Trinity College expect the final development to provide jobs for up to 1,000 people c73 03 25

1973 Laser-Scan Laboratories Ltd, a science-based Cambridge firm set up four years ago, made history when they became the first tenants of the new Cambridge Science Park this week. The Trinity College scheme is being developed on land off Milton road. The Senior Bursar, Dr John Bradfield said they believed it was the first science park in England. "We are 99 per cent certain on signing a contract with a second tenant and we have two more in advanced stages of negotiation", he said. "The idea was first mooted four years ago by the Mott committee and I think we have done very well to get this far in four years". He said the college were looking for a commercial return on their venture, but not necessarily in the usual financial expectations of recovering costs in a given number of years c73 10 22

1974 city seek scrapping of 25 year industrial development ban[494.6.11]

1974 3-day week : most on Thursday-Saturday cycle of power cuts, some have power 5 days, get as much done as can with support of workers [3.8]

1974 warehouses developing due geographical location, price of land lower than nearer London or Midlands, rentals 75p sq ft year[12.3]

1974 Cambridgeshire planning department may be asked to scrap the ban imposed 25 years ago on industrial development in Cambridge, & they may also be asked to allocate up to 100 acres of land in Cambridge for industrial use. At present less than 30 acres are earmarked for this. The Holford report which was published in 1949 recommended that no new industry employing more than five people should be allowed to develop in the city. In 1965 the planners raised the limit of employees to 12. Repeated requests by the city council for the ban to be removed were all refused c74 19 20

1975 Science Park opened, built following recommendations University committee 1969; Mott report recommended expansion science-based industry in close proximity Cambridge; Trinity Hall 140a block land, Jan 1970 College give ok [13.4]

1975 Cambridge Science Park was officially opened by Sir Alan Hodgkin, President of the Royal Society and Fellow of Trinity College. The park came from an idea by Sir Neville Mott, who led a committee which first proposed the setting up of a Science Park in Cambridge to further scientific industrial development in the city. Trinity College has spent £650,000 to date on developing the centre. The site has four tenants so far c75 06 26

1975 H.J.Gray celebrate 120th anniversary - founded was England champion at Rackets for 3 years [14.1]

1976 Sinclair : National Enterprise Board put in £650,000, ends 3- year quest for new capital

1978 Pye open new Telecom works one week after flood at least 4 important science-based manufacturing firms started by Trinity men - Cambridge Scientific Instruments & Metals Research (now combined as Cambridge Instrument Company), Aero Research (CIBA-Geigy) & Torvac [3.10]

1978 Cambridge Interactive Systems founded (5 years ago 12.83);sold American company for £ Millions 1982 [7.8]

1979 Philips Group complete take-over; had 60.7% from 1967 when Pye in financial trouble but offered rest British investors; but with increasing competition from Japan & USA arrangement looked shaky. Even sale to Philips 2 years ago of consumer division - tv, radio electrical did little to help & take over the only answer; 4 years ago put some top financial men into Pye to shake-up management; likely to continue Pye name [18]

1979 Prince Charles opens Cambridge Consultants building [02.4.20]

1979 Acorn launched by Chris Curry; "Can Acorn become an oak tree overnight" - Guardian 1981, link with BBC 81, buy Torch & Queens Award 84; crisis pulls out of US market, hit by micro-war, rescued by Olivetti (twice), shares suspended 85, fights back with new machines, Curry quits & founds new company 86 [8.1]

1979 Prime Minister Thatcher says "Cambridge a scientific and industrial gold mine, a place where brains & talents of those in University can be harmonised & developed by industry so that new products can be made and new jobs created" - when visiting HH Electronics(which goes into Receivership Jan 1984)[14.4]

1979 lost £2M, sack 160; Sinclair leaves groups, starts Sinclair Research in Cambridge

1980 Sinclair launched ZX80 personal computer, smaller & 4 x as cheap

1980 Structure Plan encourages growth of small new enterprises whose initial development dependent on use of locally-based skills & expertise [3.11]

1980 Cambridge Electronic Industries - smaller Pye companies set up management company after Philips take over, sold off 1981 prospers, Philips sell last of stake 1986 [7.9]

1980 Cambridge Consultants are breaking new frontiers with technology which can print words in 22-carat gold on egg shells or in edible ink on biscuits. They are pioneering a process known as ink jet printing and have just opened a purpose-built laboratory to develop specialist inks. Commercial applications include textile printing, letters and labelling and a line printer can produce an incredible 10 miles of text an hour. 80 10 03b

1981 Anglia Business Computers set up [7.2]

1982 Acorn computers has hardly had time to catch its breath since it won an agreement with the BBC to supply microcomputers suitable for use alongside a television series. But the broadcasts to schools began with only 200 of the 500 schools which wanted to take part having received their computers and programmes for the general public were postponed. Now 6,000 have been despatched with an order for 15,000 from Western Australia. 82 04 02c

1982 Work is continuing on the Clifton industrial estate, a joint development between the City Council and Dencora Securities on the site of the former of cattle market. There will be 31 units providing 225 jobs in light industry and warehousing with the first opening shortly. Much emphasis is being placed on a good quality of construction and landscaping to ensure a good working environment. 82 07 19

1982 Torch Computers was formed last year and has already produced a powerful business computer, opened a factory in Wales to manufacture it, opened offices in America and Canada and seen production climb above 250 a month. Now it's new research and development centre at

Abberley House, Great Shelford has been officially opened by the Technology Minister, Kenneth Baker. 82 11 16a

1983 Grundy Business systems crashes, Science Park first failure; Britain's first home computer failure, based on New Brain designed by Sinclair before left Radionics, overtaken by new designs etc [6.7]

1983 Jupiter Cantab small computer company into liquidation, 2nd in 3 months, set up by ex-Sinclair designer [9.4]

1983 Torch Computers to become most powerfully backed computer company, take-over by GEC but deal crashed; bought by Acorn 1984 [10.4]

1983 Toltec liquidation, 4th city computer business in 6 months previously Grundy, Jupiter & HH Electronics Bar Hill [10.5]

1983 company valued at £136M making Sinclair who owns 95% worth £129.2M; Timex strike; to set up Metalab £2 research centre; invests £12.9M in electric car; buys Milton Hall for Metalab; Sinclair knighted

1983 Kent Industrial Measurements is to end its century-old Cambridge link with the closure of its works in Rosemary Lane. The firm, which makes gas monitoring equipment, is transferring production as part of a restructuring plan. Most of the 82 staff are being offered jobs at other Kent sites at Eaton Socon and Stonehouse in Gloucestershire. Originally it was part of Cambridge Instruments but have been totally separate for many years 83 05 05 p6

1984 Cambridge Business Park to open opposite Science Park with no restriction on manufacturing [13.6]

1984 Napp opens on Science Park, site is as big as rest of Park put together [15.2]

1984 Norman Portland Cement works closes, in production since 1904, reserves of Marl almost worked out, dust was problem; continues to grind cement on site but shuts completely 1987[15.3]

1984 The pharmaceutical industry is not a large employer with just 75,000 people in the UK. In mid 1983 Napp employed 225 which will have risen to 265 by the end of 1984. It opened its Cambridge office in June 1980 when 70 employees relocated from its locations in Aberdeen, Watford and West Drayton and moved into the Science Park last June. The modern air conditioned environment is unique; the atmosphere is hard working but informal with widespread use of Christian names 84 04 02

1984 Acorn Computers has been presented with the Queen's Award for Technological Achievement for the innovating design of the BBC Microcomputer system. It was presented to Chris Curry, joint managing director at their offices in Fulbourn Road. He praised the company's research team who have produced a computer of such elegance of design that three years after its introduction it still knocks spots off the competition. The ceremony comes three weeks after Acorn won a four-year renewal of its important BBC contract 84 08 01 p3

1984 Darwin Instruments, the Cambridge educational supply company which two years ago won a £37 million Mexican export order, has opened its new headquarters. It has completely refurbished the Old Paper Mills on the corner of Newmarket Road and Ditton Walk which two years ago was completely derelict 84 10 03

1984 St John's College is to go ahead with plans to develop its 22-acre science park site in North Cambridge, even though part of it has been rejected by planners. The college has owned the land since 1530 but it has been semi-derelict since 1945. The site, sometimes known as 'the teardrop' lies between the new and old A10 roads at Milton and has been split by the building of the Northern by-pass with its raised interception. The Government says part lies in the Green Belt and should remain undeveloped. 84 12 28

1985 massive development Cowley Road - D & H site [4.2]

1985 H.J.Gray stop volume production of wooden squash rackets in Cambridge by December have 30 staff compared to 150 year ago[14.2]

1985 Sinclair electric trike launched but fails & calls in receiver; in tight financial difficulties as is Acorn during dramatic price-war to overcome competition & dealer stocks; Acorn sold Olivetti [23]

1985 Sinclair leaves Willis road in cost-cutting exercise sells marketing rights computers to Amstrad

1985 Skilled technicians, computer programmers and systems analysts are now at a premium in Cambridge and are being bought and sold like footballers between firms who pay transfer fees to get the staff they want. The Itec centre in Hooper Street is making a small dent in the problem by taking youngsters with no formal qualifications and training them on technical subjects. Of 28 taken on so far, all but one have got good jobs. 85 01 21a

1985 Acorn route into future – 85 01 23

1985 Acorn's future following the Olivetti rescue – 85 02 21

1985 King's Court, four research and development blocks on the site of Solus Electronics in Kirkwood Road, is a further step in the creation of a silicon belt near Trinity College's Science Park. Others are St John's Innovation Centre and a 20-acre Cambridge Business Park. Plans which have failed to gain permission are for a 60-acre Cambridge Technology Centre off King's Hedges Road and St John's 'teardrop' site on Milton Road. There is a tremendous demand for high-tech property with half the new development under offer before it has been advertised. 85 03 11d

1985 Castle Park, the £10 million high-tech development on County Council land next to Shire Hall has been inaugurated. It offers 'thinking space' to scientists and academics involved in research and development of high-technology ideas. The project will be fully self-contained with its own conference facilities, restaurant, gymnasium, squash courts and overnight accommodation as well as centrally available office equipment and secretarial support. A key attribute is its location in the heart of the city close to many of the University's colleges. 85 05 29b

1986 Sinclair launches Anamartic - superchip & company Moduliser -portable micro-computer

1986 Grays of Cambridge, the 130-years-old sports firm, has reached the end of an era with the closure of its Benson Street headquarters. The only remaining presence locally is a small racquet-making factory at Coton on the site of their former sawmill. The last 18 months have seen the workforce dwindle from 150 to just six. The main reasons for decline have been increased competition from Taiwan and a change away from wooden frames towards graphite and metal racquets and. Now they produce them for the small market of real tennis and rackets players 86 06 17a (others Sussex & Kent) [14.3]

1986 St John's innovation centre opposite Science Park to stimulate ideas [4.5]

1986 "much of area economic success due low employment in traditional manufacturing industry [4.6]

1986 Anarmartic set up by Sinclair [7.3]

1986 Pye Ltd move to Croydon - departure of original radio works from which other Pye group companies have grown [14]

1986 Clifton Industrial Estate started in 1982 with the City Council leasing the old cattle market site to Dencora Securities Ltd who built the industrial units. Now they are constructing a modern hi-tech research and office complex on the Cherry Hinton Road frontage with considerable emphasis on landscaping to provide an attractive working environment. From specialist electronics to every day motor parts, car valeting services to furniture upholstery it has a wide range of industries providing several hundred jobs for a large variety of skills. 86 02 17a & b

1986 Cambridge Innovation Centre, designed to provide facilities and support services essential to small companies during their initial development, was opened by the Duke of

Edinburgh at the Science Park. For three companies, Cambridge Robotics, Torus Systems and Prelude Technology Investments it represents expansion from previous Science Park premises. Altek Automation and Data Analysis and Research have come from outside Cambridge while Synoptics, which is involved in image processing, has been established by two Cambridge University academics. 86 02 11a

1986 Employment at Cambridge's booming Science Park has gone up 30 per cent in a year and now stands at around 1,940 jobs. And this does not take account of the growing army of temporary and ancillary staff who keep the park cleaned, fed, serviced and patrolled. Four companies have left over the past year, but 17 new ones arrived. The biggest growth has been shown by Cambridge Life Sciences where staffing has risen from 28 to 50, LKB Biochrom, Napp Laboratories and Torus Systems. Further growth will come by GEC's Marconi Underwater Applied Research Laboratory and the London International Group which is building a research laboratory. 86 04 24a

1986 At Logica's smart Cambridge offices a strange clipped voice rises above the human chatter. By the end of the decade it may well become commonplace. For the firm is devising a computer which can talk to train travellers on the telephone. They are also working on a computer which will help Shell devise formulae for lubricating oils. The company, which has 2,400 staff working in 3 countries, opened its Cambridge offices two years ago but has difficulty recruiting staff because of a national shortage of trained workers. 86 11 17

1987 Government ends distinction office use & research & development, city has used it to restrict firms wanting come Cambridge because of status etc [NS2.15]

1987 Pye Telecom changes name to Philips Telecom & other moves to remove last uses of name [NS.1.2]

1987 MacKay celebrates 75 years [NS.1.3]

1987 Aim Technology high-tech firm shuts, 50 jobs go; 9 year growth to staff of 60 [7.4] 87 06 04

1987 The ink jet printer can be traced back to 1971 when Graeme Minto was leader in a project at Cambridge Consultants. In 1978 he formed Domino whose first product, the Unijet was used in numbering lottery ticket books and in the food packaging industry. In 1982 they moved from Milton to large new premises at Bar Hill, joined forces with American Technologies Inc and gained the Queen's Award for Technological achievement in 1985. 87 05 12a

1987 A small Cambridge research and development company has beaten international giants to win a prestigious engineering award. W.A. Technology, based in French's Road has clinched the Finniston Award for designing and building the world's first commercial instrument for viewing the atomic structure on the surface of materials. The scanning tunnelling microscope emerged from research by two Nobel prizewinners in conjunction with scientists at Cambridge University. The company was founded in 1982 by Barry Ambrose and Dr Colin Wilson who met when they worked at the Cavendish Laboratory 87 06 09

1987 Domino Printing Sciences acquires US firm – 87 07 03

1988 Pye Unicam change name Philips Scientific; last of Pye Companies to keep name ¢CEN 5.1.88

1988 Lintech, Science Park collapses, auction ¢CEN 10.5.88,7.7.88

1988 IBM take more offices, had presence since 1984 ¢CEN 20.10.88

1988 Castle Park, Cambridge's showpiece research and development village was opened by the Duke of Edinburgh. Developed by Sheraton and financed by Royal Life, it was designed to provide 'thinking space' for scientists and academics involved in high-technology developments. The initiative came from the County Council who were faced with the need to provide more office accommodation for its staff and developed land adjoining Shire Hall. The first phase, Castle House, Babbage House and Sheraton House was completed last year 88 07 11b, c. d

- 1989 St Johns Innovation Centre to expand to business park ¢CEN 16.2.89
- 1989 CITS - county council computer buffs to close ¢CEN 21.2.89
- 1989 "Cambridge Phenomenon failing?" - many small firms reached plateau - lack of manufacturing why they stay small ¢CEN 17.3.89
- 1989 "boom city grinding to a halt" - part problem due Govt regulations allowing change of use from light industry to office development ¢CEN 22.3.89
- 1989 Labgear Cablevision, the television communications equipment company makes good profits but its business in the area of satellite dishes, aerals and cable TV distribution systems does not fit into CEI's new strategic plans. It employs 125 people on the Cambridgeshire Business Park at Ely with 100 more at its main base at Abbey Walk, a site being considered for redevelopment for housing. It is one of three that Cambridge Electronic Industries plan to sell, leaving Cathodeon Crystals at Nuffield Road, Newmarket Microsystems, PED & Varelco at Newmarket in the local area. Cambridge Interconnection Technology, which used to be on the Cambridge Science Park has moved to Scotland 89 05

- 1989 This is something new; only 2 - Cambridge Instrument Company & Pye go back in origins to closing years last century. Some such as Institute of Agricultural Botany & Low Temperature Research station grew out of needs made evident by WWI; other research units from inter-war years industrial research & science based industry chemicals & plastics CIBA, Fisons Pest control site chosen near Cambridge to keep in touch with university research - chemistry, biological screening, botany ... electronics & industry
- 1989 Cambridge Instrument Co dates back to 1881, founded by Sit Horace Darwin to design & make instruments for experimental research in the university & other laboratories; registered as company in 1895 ... collaboration with university establishments importance & many distinguished scientists co-operated in design of instruments; Research dept Chesterton Rd has 3 laboratories covering physics with electronics, chemistry & mechanical engineering
- 1990 Cambridge Electronic Industries was initially comprised of companies that did not fit into the Philips group. Today nearly half have been sold or have merged. Casualties include Pye RF Systems which sold equipment for the rapid drying of printed work, Cathodeon Crystals which merged with Newmarket Microsystems and Labgear Cablevision which has been sold to a Finnish company. But they have acquired seven American companies and exports represent half of CEI's total business - 90 01 08a
- 1990 Plans to develop the site of the old Cattle Market into a light industrial estate met an angry response. But now it has been transformed into the Clifton Road Industrial estate with 56 units providing jobs for several hundred people. There is ample car parking and good office accommodation. The estate is fronted by the attractive Clifton Court office complex. Situated alongside the railway station, close to the city centre with park and ride facilities on its doorstep it has good access to major roads. With its landscaping it provides an industrially useful estate and a pleasant working environment for employees 90 01 26c
- 1990 Trinity Hall Industrial Estate in Nuffield Road was developed in 1982 housing firms such as Cathodeon, Camlab, Serck Services, Allgoods and Andrew McCulloch. Now it includes Dan Morley Engineering, Platonoff and Harris and TeleTape Video which produces commercial videos. The estate is located on land formerly owned by Cambridge businessman, Mr Lloyd

Stokes, who also owned the site on which the adjacent Cambridge Business Park is still being developed. 90 02 26a

1990 Tadpole Technology formed in 1984, now Cambridge Phenomenon success, moves into new headquarters on Science Park – 90 04 09b

1990 Rabbit, the new cordless phone system based in Cambridge is to be launched in September. Based at Westbrook Centre. To install numerous base stations – 90 05 02

1990 Philips Scientific, York Street makes redundancies in manufacturing division, making analytical instruments. Sister company Philips Radio Communications axed 120 jobs St Andrew's Road – 90 05 12a

1990 George Lister engineering company celebrates centenary, built motor racing cars; set up in Abbey Road 1890 – feature – 90 05 29a

1991 Charles William Reynolds, member of the rock family took over business from his father, cooking and selling sweets for town and market fairs. He replaced the old wooden stalls, which had to be built and taken down every day, with smart mobile units and built a brightly coloured house in rock like colours named Rockfella House in Abbey Street. The business was taken over by one of his seven children, Trevor – 91 01 02a

1991 Sylvester & Sons ice cream makers; set up in East Road and had to fetch ice from MacFisheries. In 1940s show was modernised and freezers installed. Business closed in 1969 – 91 01 10b

1994 'Cambridge Phenomenon' – success for Tadpole Technology, Advanced Risk Machines, Xaar, Ethical Pharmaceuticals, Cantab Pharmaceuticals, [Rev]

1990 Sir Clive Sinclair's Cambridge Computer firm is moving to Scotland; meteoric rise and fall; started Sinclair Radionics in 1962, moving to Cambridge in 1967; produced digital watch and calculator, tv and computers. Won Queen's Award in 1975 and knighted 1983. But C5 flopped, marriage broke up and sold his house on Madingley Road in 1989 – 90 06 30a

1990 Acorn Computers backed by Apple Corporation to form Advanced Risc Machines – 90 11 28b

1990 Philips to axe 300 jobs including Philips Radio Communications Systems, St Andrews Road – 90 11 30

1998 Ionica, set up as a rival to BT, was placed in hands of administrators, Oct

commentaries

From Darby, Cambridge Region, 1938

Industries:

brick & cement works : brickworks are very active; clay mixed with chalk also provides material for cement works at British Portland Cement works at Coldham's Lane with a weekly output of about 2000 tons; then in addition are several concrete manufacturers such as Cambridge Concrete co of Milton, Cambridge Artificial Stone co, Atlas stone co ...

printing : a few of the old private firm remain without having shown much expansion with exception of Heffers who took over small jobbing section of The Independent Press & have one of the most up-to-date work in eastern Counties

instrument making : when Sir Michael Foster appointed to University Chair of Physiology in 1883 he found a startling lack of medical equipment of British & modern design, most imported from Germany.

Consequently he started to design & manufacture instruments on a small scale with assistance of two former pupils. soon co-operation Sir Horace Darwin obtained & this beginning Cambridge Instrument Co Granta works formed by W.G.Pye about 1897 in addition equipment for laboratories for teaching purposes also made apparatus for specific experiment, particular attention electrical instruments & wireless telegraphy. UNICAM started 1933 St Andrews Hill but recently moved Arbury Rd, Clifton instruments moved Cambridge from Bristol 1938 concerned with physiological instruments

paper making :

miscellaneous : famous firm manufacturing brushes - Cambridge Brush Company, Kleen-e-ze co & Premier Company; Cambridge Tapestry Company important for special study in repair of ancient fabrics & upholstery

Two years ago Financial Times reported that 41 computer-based high- technology firms had started in Cambridge over the previous decade & that this phenomenon would have considerable significance for British industry. Today [1982]... Barclays Bank estimates there are 250-300 such companies in the area. All but 2 or 3 of the original 41 companies have grown & are now well established, most have moved to new premises, employ more people & make a growing impact on foreign markets The main problem in Cambridge is space. The Cambridge Science Park now has 24 companies & has only 20 acres left for development. St John's is seeking planning permission for a similar development immediately opposite Cambridge Science Park. A number of established companies have had to move out to villages. An 8-acre site near Shire Hall is attracting considerable interest ... Financial Times 30.11.82 [5]

Cambridge council's industrial liaison officer : Councils overall strategy remains to encourage growth of small manufacturing business & maintain a fairly strict but flexible control on larger firms wishing to relocate into the city. Year ago council's first direct venture into provision of small workshops at Robert Davies Court, 15 units ... another planned; now in partnership with Dencora Securities constructing purpose-built factory units. Elsewhere Technopark at Newmarket rd & Henley rd. Council instrumental in establishment of Information technology Centre Hooper St to help unemployed young to obtain experience in field of new technology concerned with computers & micro-electronics ... CEN 21.9.83 [6]

"Chris Curry one of leaders of Cambridge industrial sci-tech, must be mentioned in histories" - South [1.1]

20 years ago Pye was Cambridge & diminution led to Cambridge Consultants & PA Technology; few years before those creating products came on scene University felt trade 'infra-dig' : useful to have route into talent of University; Curry broke Sinclair; small computers key note; transition from small to big companies cause difficulties [1.2]

Science Park 1960s concept officially opened 1975; now employs 700 in 24 firms, biggest Cambridge Consultants - 130. Napp will boost number to close to 1,000 ... not only significant development in recent years but most closely connected with concept for future [1.3]

Cambridge Instruments turned loss of £3M to profit of £1M in 2 years; was almost on verge of bankruptcy but rethink on 4 main products - scanning electron microscopes, image analysers, semi-conductors, crystal growing equipment & electron beam microfabricators. Things started when present chairman bought major shareholdings from Government-owned National Enterprise Board, initiative supported by Midland Bank & Industrial & Commercial Finance Corporation ... working capital £7M & sales up 21% in 18 months. A classic illustration of how old-established firm set up in 1881 by Darwin can be transformed into go-ahead centre well in line with Cambridge concept of developing businesses fit for harsh contemporary climate [1.4]

Cambridge Instrument Company works, 1920s

168.08

c.27.1 : Cambridge Instrument Company

1881 Cambridge Scientific Instrument Company founded by Horace Darwin, makes equipment University, develops electrocardiograph;

1895 Cambridge Instrument Company formally registered, (established 1881) [1.13]

1907 When Dew Smith and Horace Darwin commenced the manufacture of certain scientific instruments for physiological work at the University Laboratory it was more as a hobby and not financially profitable. But it grew and in 1895 was turned into a limited liability company which is now flourishing at its pleasantly situated works off Chesterton Road. Among its important products is a kite used in meteorological observations and a machine for standardising small screws which has been supplied to the Japanese government.

07 01 18

1914 Cambridge Scientific Instrument Company welcomed visitors to their workshops, test room, drawing office and stores. They were also shown the manufacture and operation of the various instruments made. Many are of great commercial value. The extension is the fourth addition since the works were moved from Panton Street to Chesterton Road. It is the chief of the few manufacturing concerns in Cambridge and now employs 180 hands 14 05 29d & e

1914 A mysterious illness, believed to be ptomaine poisoning, attacked 50 people who attended the Cambridge Scientific Instrument Company's dinner. A considerable number of the employees had to quit work and go home, several are still seriously ill. The dinner had been given to 300 employees and their wives and was attended by the Chairman, Horace Darwin and other directors. One of their wives is amongst the sufferers. Suspicion had fallen upon the salmon

served as the second dish at the dinner which included Ox-Tail soup, roast lamb, gooseberry tarts and ginger beer. 14 05 29f

1914 The presence of the military has greatly improved the trade prospects of Cambridge and there is no immediate fear of unemployment. The end of the Long Vacation is always a slack time but at the moment the town is busier than usual. It is not certain the town can rely on the continued presence of troops throughout the war and many firms are not sure how they can keep going. The printing trade has been hit by the stoppage of trade circulars and advertisements, builders say contracts have been postponed putting plasterers & stonemasons out of work and the position of college servants and is being considered. The problems of lodging house keepers may be overcome by the billeting of officers and the presence of relatives of the men in the hospitals. But they may not get the rent usually paid by undergraduates. In laundry work the hospitals and military have gone to the larger laundries and demand from ordinary householders has decreased due to motives of economy. Tailors have sufficient work owing to the army orders but women's outfitting department report a shortage of custom. Several jobbing gardeners are out of work & owners of unused plots should consider putting them into cultivation to grow vegetables. 14 09 04 p

1921 Cambridge Scientific Instrument Company big blaze [1.5]

1947 Cambridge Instrument Company plans for research laboratory and office block in Carlyle Road referred for further consideration; area primarily residential and fear will destroy view – 47 12 11

1950 Cambridge Instrument Company erect factory Finchley, 200 workers leave Cambridge as blocked by planning [1.7]

1959 Cambridge Instrument Company opened its new research headquarters in Chesterton Road. Its four floors comprise laboratories for the development of instruments for mechanical engineering, electronics and physical chemistry together with a spacious drawing office. It was a tribute to the unswerving devotion of the men who had worked there over the last 80 years, said Lord Adrian, University Vice-Chancellor. He had declined the use of a car and arrived on bicycle for the opening ceremony where he was presented with a compass 59 10 15c

1959 Cambridge Instrument Company new research laboratories – 59 10 15c

1962 Cambridge Instrument Company history feature – 62 08 10 & a

1964 Cambridge Instrument Company has developed the 'Stereoscan', the first commercial scanning electron microscope. It is a result of whole-hearted co-operation between university departments and a Cambridge firm with the ability to develop a proved commercial product. Work was begun in 1952 and now the first model has been bought by the Du Pont de Nemour and Company of America 64 12 04b

1968 Cambridge manufacturing operations of the Cambridge Instrument Company Ltd groups under a new subsidiary called Stretham Scientific Instruments Ltd – 68 01 01a

1968 Government's Industrial Reorganisation Corporation buys shares in Cambridge Instrument Company following bid by George Kent firm of instrument makers – 68 06 14, 68 07 09

1970 Kent Cambridge Scientific set up in USA to market electron probe made by Cambridge Scientific Instruments – 70 05 14

1971 develops stereoscan electron beam microscope, sack 150,
1971 Cambridge Instrument Company sack 150; follows Pye redundancies earlier – 71 04 13 #

1972 Medical division becomes separate company - Kent Cambridge Medical Ltd moves
Rustat road 1973

1975 taken over by Metals research, Cambridge Scientific & Cambridge Medical Instruments
merge into Cambridge Instrument Company; financial problems, Government back with £3M to
save 1000 jobs 1976, another £2M 1977, taken over by Government National Enterprise Board
1978, £3M loss, more NEB money, 150 jobs go, sold off majority interest, Clive Segal joins,
by 85 business increasing 1979, Cambridge Medical becomes part of Picker International 1981,
Instruments returns profit 1982 [11.1]

1976 More than 1,000 jobs in the Cambridge area have been saved with the supply of £3
million of public money to the Cambridge Instrument Company, following a £1.85 million
trading loss. The company has suffered serious financial troubles since it was set up after Metals
Research Ltd of Melbourn took over Cambridge Scientific Instruments Ltd 15 months ago. The
company is one of the leading British manufacturers of scientific instruments with opposition
coming from Japan, the USA and West Germany. It is to retain this technology in Britain that the
Government has put up the new money c76 12 10

1978 Pye open new Telecom works one week after flood at least 4 important science-based
manufacturing firms started by Trinity men - Cambridge Scientific Instruments & Metals
Research (now combined as Cambridge Instrument Company), Aero Research (CIBA-Geigy) &
Torvac [3.10]

1978 The Cambridge Instrument Company is being taken over by the Government following a
trading year in which it lost £2.8 million. That's the effect of the National Enterprise Board's
decision to increase its shares to 80 per cent. The intention is to let the company go independent
again in three years time if it makes enough sales generating cash flow and profits by then. The
chairman of the Company said: "This is the best thing for us in the short and medium term. Now
we can go forward with confidence and have a lot more scope and room in which to manoeuvre"
c78 04 11

1983 Kent Industrial Measurements is to end its century-old Cambridge link with the closure
of its works in Rosemary Lane. The firm, which makes gas monitoring equipment, is transferring
production as part of a restructuring plan. Most of the 82 staff are being offered jobs at other Kent
sites at Eaton Socon and Stonehouse in Gloucestershire. Originally it was part of Cambridge
Instruments but have been totally separate for many years 83 05 05 p6

1989 Cambridge Instrument Company taken over by Leitz cCEN 11.7.89

1989 This is something new; only 2 - Cambridge Instrument Company & Pye go back in
origins to closing years last century. Some such as Institute of Agricultural Botany & Low
Temperature Research station grew out of needs made evident by WWI; other research units from
inter-war years industrial research & science based industry chemicals & plastics CIBA, Fisons
Pest control site chosen near Cambridge to keep in touch with university research - chemistry,
biological screening, botany ... electronics & industry

1989 Cambridge Instrument Co dates back to 1881, founded by Sir Horace Darwin to design &
make instruments for experimental research in the university & other laboratories; registered as
company in 1895 ... collaboration with university establishments importance & many
distinguished scientists co-operated in design of instruments; Research dept Chesterton Rd has 3

Marshall's hangars, 1960s

158.16

c.27.1 : **Marshall's** –

headlines

1909 D.G.Marshall set up Brunswick Gardens 1909 [12.1]

1912 moved King St & Jesus Lane 1912

1929 Cambridge air pageant for opening Marshall's - CDN 10.6.29

1929 F.A. Ridgeon, the Cambridge Town Football Club's inside left, travelled by aeroplane to Sussex for the F.A. Amateur Cup tie with Southwick. There was some doubt whether he could make the match owing to duties in Stamford preventing him from travelling by train. Hearing of his difficulty Mr D.G. Marshall of Aviation Hall generously placed his Moth aeroplane at his disposal. His son, Arthur Marshall, would have piloted the machine but he had gone on an air trip to Austria so a de Havilland pilot was engaged for the journey. This is, we believe, the first time an amateur footballer has travelled to a match by air. Cambridge won 2-0. CDN 14.12.1929

1930s Stirlingaires, Cambridge best known war-time band formed early 1930s by employees of Marshall's & Shorts [10.9]

1930 By the courtesy of A.G. Marshall of the Newmarket Road Aerodrome, who placed a plane at the disposal of the C.D.N., our representative was able to secure a bird's eye view of the bumping races. "I could hear nothing of the general buzz which must be going on by the river, only the roar of the engine and the voice of my companion through the speaking tube. He tells me

he is regulating his height so that we are well in gliding distance of a landing place all the time. I am very comforted – I should hate to drop on Jesus or a crew just making a bump”, he writes. 30 06 16 & 16a

1930 The ‘Westland Wessex’ three-engined six-seater cabin monoplane de luxe arrived at Marshall’s aerodrome. A CDN representative, seated in a padded brown leather seat with arm and head rests found it glided so smoothly that he could scrawl down his experiences in his best hand. From the air the new estate at Milton Road gave the appearance of a toy town, King’s College chapel was a landmark and the white-fronted Central Cinema very prominent. There is no vibration and the businessman can take his secretary, for letters and notes are typed with ease. 30 10 20

1931 An aerobattist was killed at the University air pageant. He was flying an Avro, looping the loop, rolling and spiral diving when the machine appeared to break and crashed to the earth. Mr Honour, ground engineer at Marshall’s Flying School, said that tools were kept at the aerodrome for extricating pilots but some delay was caused as the machine was made of metal, not wood. He obtained a hacksaw to cut part of the wreckage and within 20 minutes the pilot was taken to Hospital, terribly injured. 31 06 19b

1931 A thrill of romance marked the departure from Marshall’s Aerodrome of a gleaming silver Puss Moth monoplane bearing its bridegroom pilot, Mr A.G. Marshall, and his bride on the first stage of their honeymoon. He took his seat at the controls, the propeller whirled and the graceful machine glided forward. In the next few seconds it was rising steeply into the wind, while rain fell from a heavy cloud. The bridal couple however were quite cosy in the saloon cockpit. 31 04 24e

1932 The Prince of Wales landed in his red Puss Moth monoplane at Marshall’s aerodrome. He jumped hatless from the plane, then donned a boater and drove to the Leys School where he opened the new squash courts and sports ground. On his return he was assisted into his raincoat in preparation for a lofty flight in search of a favourable wind before he stepped into his monoplane, soared gracefully aloft and headed for London. 32 06 22a [2.3]

1932 Cambridge town councillors saw their constituencies from a new angle when they took the air in Sir Alan Cobham’s big liner. He was visiting Marshall’s aerodrome with his fleet of planes and many gathered to see his display. The Mayor was unable to be present and the deputy mayor preferred solid ground. When the party was about to take off it was discovered to number 13, so the County Chief Constable stepped into the breach and the plane both ascended and descended safely. They made a comprehensive survey of the town with its ring of new housing estates though the new County Hall looked more impressive than the huddled roofs of the Guildhall. 32 10 14a

1933 Sir Alan Cobham’s great air display at Marshall’s Aerodrome showed all kinds of flying and many were the thrills his pilots provided. During a demonstration aerobatic flight with a passenger the plane dived and looped, twisted and turned and did everything a plane could do. But at the end the hardy individual who had decided to take the flight actually managed to walk without assistance and appeared to have enjoyed his literally hair-raising trip immensely. 33 06 01 33 05 26f

1933 A Newnham College student was summoned for dangerous flying. Mary Barnard said she had taken off from Marshall’s flying school on a solo flight and descended to 1,000 feet over her College. But Dr John Bury, who had flown for five years, said she had descended rather

rapidly, then flattened out and crossed Corpus Christi gardens at about 600 feet, he could read the letters on the plane quite clearly. As it was the first prosecution of its kind the magistrates decided to dismiss the case with a caution. 33 06 08a

1934 Marshall's Flying School had offered to buy Elfleda Farm, Fen Ditton for a public aerodrome, county councillors were told. Financially it would be a very good deal, giving them a profit of £3,000 for land they'd earmarked for smallholdings. But it was a very growing neighbourhood and the aerodrome would be a source of great annoyance to residents who didn't want these noisy things coming at all hours of the day and night. Mr Marshall would be getting a thunderingly good deal, others argued. The sale was agreed 34 03 03

1934 Marshall's Flying School propose to carry out improvements to their aerodrome and had purchased Elfleda Farm through which the proposed Ring Road would run. They asked the Council to move the route slightly east. But the Surveyor said this was not possible. The whole of the land is zoned for dwelling houses and this would be have to be borne in mind if any proposals were made to them for further developing this aerodrome 34 05 15

1935 special Council meeting to discuss Marshall's proposals for airfield at Teversham corner (1.20]

1938 Marshall's airport formally opened [1,2}3,6]

1939-45 repair & overhaul operational RAF bombers & fighters, including Whitley bombers with women workers; for time was operational squadron of Lysanders & Newmarket Road closed for security with traffic diverted through Fen Ditton, Teversham Lane closed civilian traffic, also Mosquito, Typhoons & Dakotas [15.1]

1944 Marshall's Flying School strike - 44 10 26a

1946 If an aircraft brought to Marshalls and found to be unusable it was certified to be broken up; certain parts had to be salvaged if in order, if not a hammer put through them and put on salvage dump; one workman had taken clock from Dakota; during war he had won B.E.M. for putting out fire in main hangar – 46 10 19

1948 Mrs Richarda Murrow-Tait~ a housewife leaves Marshall's to become first Woman to fly around the world in a light aircraft; took: 366 days [2,1]

1953 The possibility that Marshall's airfield might be used by jets and other high-powered aircraft provoked a vigorous debate at Cambridge City Council. Coun Warren protested at the construction of a hard landing strip: "The town is going to be menaced by high-powered aircraft which we know nothing about". But Coun Collins suggested that more powerful aircraft must come in time and added "The aircraft now landing there will soon be obsolete". Ald James asked: "If it is essential should the ground have not been moved further out into the country?" c53 12 08

1955 King Feisal of Iraq paid a private visit to Cambridge as the guest of the Vice-Chancellor of the University. He arrived late because of fog and after lunching at Christ's College visited the Wren Library at Trinity and the Fitzwilliam Museum. He then travelled to Marshall's airfield where he displayed keen interest in a Venom IV jet aircraft and the Comet jet and Viscount turboprop airliners. In the Royal party was Mr Tariq Al Askari who was at Cambridge as a student 55 10 12b

1956 Marshall's Flying School were granted permission to double the width of the 'hard land strip' on the airfield and extend it from the boundary of Coldham's Lane to the boundary of Teversham Road provided they erect suitable fences to prevent the possibility of jet slipstreams from reaching the roads. However planners feel the aerodrome is wrongly sited adjoining a residential area and that no further development should be given approval. 56 03 13a

1959 bus division started 1959 [14.6]

1959 Marshall's develop Bacon fuel cell [1.10]

1965 on knife-edge due Government cut P1154 jump jet [14.6]

1965 TR-2 men at Marshall's sacked following Government cancellation project – 65 04 13a

1965 design interiors of luxury jets [14.6]

1966 build buses for all parts of world [14.6]

1966 start to service Hercules aircraft (modify 1973 & 1978, convert for in-flight refuelling for Falklands, work day & night, stretch Hercules (1982) [15.1]

1968 move into extension Airport Garage [14.6]

1968 to divert road for runway extension [15.1]

1971 1st Vulcan bomber [15.1]

1972 Concorde research & development on nose done by Marshall's (goes elsewhere) [15.1]

1973 CEN, Marshall & Pye set up consortium commercial radio [3.14]

1978 A major aircraft building job is being given to Marshall's of Cambridge by the Ministry of Defence. It involves the stretching of the fuselages of 29 Hercules aircraft to allow it to carry extra cargo. The conversion will be fitted into the normal overhaul and serving work which the firm carries on. Sir Arthur Marshall said: "At the moment we are on various major contracts for the Hercules – replacement of wing centre sections and outer wings – as well as work on military and civil aircraft from all over the world". c78 08 12

1982 giant hanger plan [15.1]

1982 Lockheed Tristar to be basis RAF flying tankers to be converted, 1st 130 ton Tristar arrives 1983 [15.1]

1982 The revolutionary government of Iran tried to buy spare parts for military aircraft from Marshall of Cambridge, despite the Western arms embargo. The order was hidden in a web of false documentation but Marshall had immediate doubts as only a limited number of countries could need spares for the giant C-130 Hercules. They discovered the parts were to be shipped to Libya after arriving in Italy and contact the anti-terrorist squad. 82 02 26

1983 A 130-ton TriStar airliner, the largest ever to land at Marshall's, marks the start of a six-plane conversion programme that will keep the firm's 800-strong aero-engineering staff in work for the next four years. The £50 million contract is to convert four into 37,500-gallon tankers for flight refuelling duties and the others to freighters with big cargo doors. 83 02 17

1984 The Cambridge-based Marshall Group celebrated its 75th birthday as early examples of motorised transport of all kinds were on show at the Motoring Milestones Pageant at the East of England Showground. They included cars from the humblest Austin Chummy to the most

magnificent Rolls-Royce, lorries, buses, vans a motor-cycles. There was also a display of the latest vehicles sold by the group. Sir Arthur and Lady Marshall cut an anniversary cake

a combination of aircraft work, shipping container manufacture,
commercial bodies & research & development work on ministry vehicles
project (1969) [15.1]

1990 UFO hovers over Marshall's [7,3]

Pye employees leaving Radio works 1930s

147.57

c.27.1 : Pye
headlines

Pye in 1896 William George Pte left Cavendish Laboratory & began to design scientific instruments for university students; WWI expanded, made gun sights; Pye radio formed 1929, experimented with tv & in early 1930 able to receive a 30-line picture, by 1936 405-line sets in production; with WWII turned to radar; Pye telecom devised first infantry walkie-talkie & large numbers made 1947 mobile television transmission station, printed circuits incorporated 1956. 1961 first convertible 405/625 sets 1947 installed 2-way radios in fleet of Cambridge taxis; electronic stethoscope ... now upwards of 100 individual companies of Pye group majority in Cambridge or East Anglia Techne

1896 W.G.Pye started & after 1918 specialised in wireless, Pye Radio formed 1929; by 1952 was largest manufacturer of tv sets in Britain [1.14]

1913 W.G.Pye & Co new scientific Instrument works opened by Prof Thomson [2.2]

1921 Pye Ltd changed to radio 1921 when lapse in demand for instruments; 210 ft aerial mast put up at start war to help develop defence systems & once used very low power experimental tv programmes [446.17.1]

1932 Pye Radio invited people to inspect their works and queues five or six deep stretched halfway up Haig Road. It is amazing that a non-industrial town should have such fine works and few realised that we in Cambridge had such an important and highly organised industry in our midst. In these times of depression it is a novelty to find a works which is really flourishing. Despite making 4,000 sets a week, demand is greater than supply and they are planning to increase the size of the works by 50 percent. 32 01 22c & d

1932 H.R.H. Prince George toured the Pye Radio Works where 1,500 hands produce 4,000 radio receivers a week. This is the first time a factory engaged in Britain's newest and most progressive industry has been honoured by a Royal visit. The operatives gave him a rousing reception – the girls were especially enthusiastic: it was a wonderful study to observe their varying expressions as he passed through the workshops. "Oh, he's lovely" was the general verdict and every detail of his dress, appearance and manner have furnished a fruitful topic of conversation in Cambridge homes 32 11 18a

c1939 build 210 foot mast St Andrews Rd at beginning war to help develop defence systems; once used for very low power tv programmes during war to help Pye develop receivers [27]

1944 Pye Telecom founded [446.15.3]

1945 Revolutionary new television system demonstrated by Pye Ltd in their television theatre – would allow production receivers for £40 – CDN 1945 11 01

1949 Pye warehouse fire - 3-400 tv sets destroyed [1.6]

1949 A story of high-pressure work since last March under a top-secret cloak lies behind the announcement that Pye Ltd of Cambridge will give the first successful demonstration of colour television in this country at Radiolympia. Research into colour television has proceeded for a long time, but it was only in March that the decision was made to produce the intricate equipment required. The secrecy with which this work proceeded is indicated by the fact that Pye's employees themselves have not yet seen a demonstration. The firm say that colour television is still many years off c49 09 27

1949 Damage believed approaching £900,000 was done when fire destroyed several thousand of finished wireless sets, 300-400 television sets and numerous components stored in a hangar rented by Pye Ltd at the former stereo works in Madingey Road. A director said: "Many of the sets were for export. Included in the stock destroyed were several thousand television cabinets. Some of our telecommunication equipment was also stored there, including a complete set of blind landing equipment due to be shipped today" c49 11 29

1953 On Coronation Day Pye Ltd of Cambridge operated the first colour television outside broadcast ever done in this country. It was seen in a well-known Children's Hospital and several other selected places. Three colour cameras used in transmission were sited on top of Government buildings facing Parliament Square and Whitehall. Hundreds of people assembled in Cambridge Guildhall to watch the ceremony on television. The latest television screens were used. The picture was clear and precise but there was, of course, no control over the usual interference from electrical appliances which all TV owners are forced to suffer in silence. Six domestic TV sets were installed in the Corn Exchange and because of the bright light, shields were fitted around the screens c53 06 03

1954 Pye take 1st tv Middle East [1.8]

1955 Unicam Instruments celebrated its 21st birthday; it had started in a stables on St Andrew's Hill, Cambridge. Despite setbacks, when paying the staff became a problem, the firm thrived. At

the outbreak of war, after a skirmish with the Ministry of Aircraft Production, they acquired Riley House opposite the Tivoli Cinema. Finance problems arose again and they established a relationship with Pye Ltd. 55 12 17a

1956 New equipment developed by Pye of Cambridge means that six times as many people can use radio communications and foreshadows immense developments. Telephones for the use of the travelling public in aeroplanes, railways and road services are now a possibility and a radio-telephone could become a standard fitting in all road vehicles, C.O. Stanley predicted. 56 12 01b

1957 Pye has designed a special camera to enable engineers at Calder Hall to carry out an extremely complicated inspection inside a nuclear reactor. It has been reduced to under 24 inches in length so it can form part of a mechanical grab which will be lowered into the fuel channels of the graphite core to remove obstructions 57 01 05 & 05a

1958 A portable short-range guided missile intended to be used against armoured vehicles has been produced by Pye Limited. It incorporates rocket motors with a new jet steering system and is guided to its target by thin wires which carry signals from a controller's "joystick". It can be fitted with periscopic binoculars which switch from low to high-powered magnification as the missile travels away from the launcher. Many successful test firings have taken place and it can go into production on receipt of orders. 58 08 22c

1958 Pye demonstrate stereo sound [1.9]

1959 Thousands of new Anglia Television viewers are unaware that almost every piece of equipment that goes into the transmitting of the programmes was built in the Cambridge factories of Pye Limited. The Norwich studios are equipped with their cameras and control gear and 'remote' programmes use Pye mobile outside broadcast units. This is the latest version of the most successful unit ever produced and over 50 have been sold to television networks all over the world. 59 10 28b

1959 Did you ever build a television station, or a radio-telephone, or equipment for an atomic reactor? And have you ever been involved in helping ships at sea, providing entertainment for the home – or bouncing speech off the moon? Thousands of people who live in East Anglia are doing this sort of thing every day at W.G. Pye. It is one of 60 companies which make up the Pye Group whose name is respected all over the world for achievements in radio, television, telecommunications, nucleonics and electronics generally. 59 11 06c & d

1959 Pye Instrument Group engineers have designed a remarkable new piece of medical equipment, the Barnet Ventilator, to assist polio sufferers. Polio causes paralysis of the respiratory muscles and patients have had to be put in an iron lung. But now they can be linked to the ventilator by two plastic tubes and breathing is precisely kept within physiological limits. The machine has built-in batteries from which its transistorised circuit will run up to twenty hours allowing patients to be moved without difficulty. It can also be used in operating theatres for the administration of anaesthetics 59 11 05a

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Pye-Ekco merger [27]

1960 Pye engineers envisage vastly improved overseas telecommunications by the use of space satellites and the moon, complete newspapers transmitted during the night through existing television sets and the establishment of more than 100 local broadcasting stations. Active relay equipment to be carried in a space vehicle is practicable now. Their design requires a single valve operated from solar cells and could be easily launched by the Blue Streak missile. It would bring

undreamed-of improvements in world-wide communications, J.R. Brinkley of Pye Telecommunications told a conference. 60 06 13

1960 The first full-size completely portable television is made by Pye of Cambridge. It has a 14-inch screen, covers all the usual BBC & ITA channels and includes a built-in aerial. It can be operated entirely from a built-in battery or connected to a car-battery system. It uses super modern transistors which are spreading rapidly through the development laboratories and production lines. One day there may be 'all-round' tv sets in 3D and colour, the company predicts 60 10 14a

1961 launch domestic equipment

1962 develop instruments first UK satellite master-slave manipulators for radio-active material featured in 'Dr No' made by Pye

1962 Pye TVT build tv station [19]

1962 The new Scientific Instrument Centre comprising laboratories and factories of Unicam Instruments and W.G. Pye in York Street were opened. The two small companies, both members of the Pye Group, have won international renown. Unicam is one of the leading manufacturers in the world of photo-electric spectroscopic instruments while W.G. Pye is making a major contribution towards improved accuracy of physical measurements and in the field of chemical analysis. They have more than 1,000 employees with exports exceeding £1m during the last financial year. 62 04 14 marks stage in development which widens horizons for collaboration of science & industry; could be equally fruitful for both [19] [1.12]

1962 Pye T.V.T. has helped Leeds Transport Department to introduce a new system of closed-circuit television to watch bus queues and traffic in crowded streets. Three small cameras mounted on police at City Square Briggate and the Corn Exchange send pictures via a special underground cable to separate screens in the control room at transport headquarters. Here operators can turn each camera to see how many people are queuing at each stop and direct buses accordingly. The Pye system is to help in a survey of Leeds traffic problems during the next two years – 61 01 13

1962 Pye components on first space research satellite – 62 04 07

1962 Jerzy Kazimierz Starnecki, the chief engineer and head of development at W.G. Pye, York Street, was born in Poland and served with their armed forces during the war. In 1947 he joined Pye as leader of a small team engaged in problems encountered in armoured fighting vehicles. He was responsible for the design of a complete new optical system used in the gunsight of the Conqueror tank, servo-controlled automatic stabilising gear and the C 42 Army V.H.F. communications set. His far-sighted thinking and sound engineering knowledge influenced the design of many instruments, one of his latest products being a multi-way rotary switch 62 05 22

1962 A familiar landmark of the Cambridge skyline is being taken down. The Pye mast was built at the start of the war to help them develop defence systems and also broadcast very low power experimental television programmes. It was originally 185 feet tall but extra aerials were added. At the top is a small cabin used to house experimental equipment and large enough for a man to work in. The mast will be replaced with a later type suitable for newest television techniques. 62 09 08a

1963 625 line demonstration, make mobile transmitter

1963 develop television telephone

1963 1963 Princess Margaret and the Earl of Snowdon came to Cambridge to watch television cameras and electronic equipment being made at the Pye factory, St Andrews Road. A small industrial closed circuit television camera was trained on them when Lord Snowdon asked to have a go. The Princess then focussed it on a group of press photographers. A great burst of cheering went up when Lord Snowdon went over to attractive Mrs Jean Keeble who was working

on a television assembly line. "I was absolutely thrilled", she said. Later they took a voyage on the Cam on Viscountess Bury 63 07 24 & a [4.7]

1963 Plans by the Pye Group to tour the country with their new mobile 625-line television transmitter and studio have been blocked by the Post Office who says they do not have a licence. It was launched in Cambridge when the Mayor, Ald Hickson, became the first public figure to appear on the system. The whole of the television industry has been devoted to the development of the new equipment which was featured at the last Radio Show. Pye has called for the ban to be immediately reversed 63 05 22

1963 Pye Printed Motors Ltd formed to manufacture electric servo motors - 63 09 27

1964 Pye equipment used in 1st commercial radio station on Isle of Man, closed down

1964 A transistorised nuclear reactor developed by Pye Ltd is cheap yet provides immense opportunities in the field of research. It will produce short-lived isotopes for medical diagnosis and neutron activation. The reactor was built under licence to an American company and modified to raise the power to 100 kilowatts. In the event of overheating, boiling water within the reactor shuts down the output of the pile. Accidentally-dropped radio-active material is far more likely to bring the warning system into use than uncontrolled goings-on within the system. 64 08 07 64 07 30

1964 Pye Thermal Bonders formed - 64 09 16a

1964 Pye Electrical is to go into the twin tub washing machine market with a model that will sell for 49 guineas (about £910 at today's prices). The specification is very similar to that of the Rolls washing machine which went out of production when John Bloom's company collapsed. It is finished in white enamel and fitted with twin tubs and aluminium lids. Simple controls are fitted to the top, right hand corner of the front panel and a table top is available as an extra. 64 11 02a

1965 Pye hi-fi stereoscopic record projection system flourishes 65 02 22b

1965 Pye to delay work on colour tv until Government decides - 65 10 14a

1966 huge slump in profits, Government squeeze hits sales of tvs, sackings; new chairman appointed lay-off 800 at Southend tv factory

1966 demonstrate first mass-produced colour tv set withdraw from rental connection disputes

1966 Pye record label sold ATV [20]

1966 Pye incur large losses in radio and television side of group - 66 04 04

1966 Pye respond to report of resignations following large losses - 66 04 19, 19b

1966 Pye Telecommunications and Unicam Instruments granted Queen's Award for Industry - 66 04 21b

1966 Pye pocket radio-telephone exhibited - 66 09 07

1966 £1m dive in Pye share value; dissatisfaction with new management - 66 10 25

1966 Pye urged to appoint Receiver following losses if to remain independent - 66 11 11; J.O. Stanley voted off Pye's Board - 66 11 17, 61 11 18

1966 Pye shares rise as big international take-over battle develops; bid from Philips - 66 11 24a, c

1967 Philips win take-over battle, set up Pye Holdings 30 separate Pye group companies classified A & B, the As being larger & producing finished goods - Pye - Telecom (mobile radio equipment), Unicam (scientific instrumentation), TVT (broadcast equipment) TMC (telephone equipment) & Business communications (intercoms, pa, security surveillance cameras etc. B include Cathodeon, Cathodeon Crystals, Labgear, ye Electro-devices, Thermal Bonders & Varelco. A companies report direct Philips London, B to have new Cambridge HQ [20]

1967 Pye chairman F.R. Duncan who took over from C.O. Stanley in May last year now hands over to Peter Thoneycroft, chairman of Pye Holdings, the Company set up by Philips to control Pye following their take-over – 67 10 02

1968 Pye Unicam formed through merger W.G. Pye & Co. Ltd and Unicam Instruments – 68 07 01

1969 want to develop on Trinity Milton Rd (Science Park) site

1969 Pye Telecom develop pocket phones [19]

1969 Combined Electronic Services factory, part of Pye group, closes – 69 04 29

1970 go back profit

1970 have 10% share colour tv market

1971 Pye plan new complex for production, storage and offices in St Andrew's Road – 71 01 21

1971 close avionics operations Southend, 500 laid off, sack 250 Cambridge area, rising costs [18]

1971 turnover £100M but profits down

1971 set up new computer bureau - Cambridge data processing

1971 Pye sack 260 works, rising costs blamed – 71 02 26

1971 Pye Unicam close Kings Lynn factory, 168 redundant

1971 Pye Group to set up new computer bureau, Cambridge Data Processing – 71 04 16

1973 Pye become first company granted armorial bearings recognition contribution nation

1974 record £18.5M profit

1974 profits drop by 50% due consumer credit restrictions

1974 About 7,000 men and women in the Cambridge area work for the Pye Group of Companies. More than 1,000 employees travel daily to work by Pye bus. The first of the 40 buses in daily use sets out from Wisbech in time to make the Cambridge works by 8am. Almost 30 per cent of the workers get to and from work by the buses. A special crèche has allowed the mothers of some 40 youngest children to return to work. Without a firm commitment to planned industrial expansion Cambridge could well fall behind more dynamic centres within commuting distance, and, in time, become a quaint but declining tourist backwater in the fens, say the company c74 10 07

1975

The finance director of the Pye Group, Cambridge's largest employer, is a worried man. Not that the group is going to the wall or even likely to run into the red in the current year – but the fact is that the group's profits are going to be less than 1974. Already this year it has cut out 2,000 of its 21,000 UK jobs and is making expensive efforts to sell goods. The problem is that the recession in Britain and Western Europe shows no signs of ending c75 08 24

1976 sell off tv rental side

1976 For the first time in two years Pye is going to see its television and radio division make money, but final details of the deal in which Philips Industries will take it over have still to be settled. Jobs are reasonably safe despite the selling off of the radio, television and audio side of its activities: Philips will take on those still working at factories at Lowestoft and King's Lynn. It is prepared to pay hard cash for companies whose losses were running at about £2 million last year because of the commercial benefits of expansion. Both have been busy on research and

development work on radio, televisions and hi-fi equipment. Elimination of half the work brings an immediate saving. The Pye group will in future concentrate its efforts on scientific and technical “professional” equipment c76 12 14

1978 open new Telecom works one week after flood

1979 celebrate 50 years radio

1979 Pye Engineering Services to close with loss 200 jobs sold to Amin

1979 Philips Group complete take-over; had 60.7% from 1967 when Pye in financial trouble but offered rest British investors; but with increasing competition from Japan & USA arrangement looked shaky. Even sale to Philips 2 years ago of consumer division - tv, radio electrical did little to help & take-over the only answer; 4 years ago put some top financial men into Pye to shake-up management; likely to continue Pye name [18]

1980 90 jobs to go as Unicam cut back

1980 Cambridge Electronic Industries - smaller Pye companies set up management company after Philips take over, sold off 1981 prospers, Philips sell last of stake 1986 [7.9]

1981 Pye TVT win Queens Award to Industry for Export achievement [19]

1981 Pye Telecom old Ditton Walk works empty since Sept;

1983 win £10M contract

1983 Pye Ltd move St Andrews Rd from Ditton Walk

1984 Telecom lose £3M Philips strong men in TVT in battle long-term commercial survival Philips battle to stay a world leader

1984 A telephone in one's car must represent one-upmanship. Pye Telecom has just introduced its new radiophone. Electricians are using them, so are plumbers. Not only is it a boon, it is also the most infuriating device ever invented by man. It costs around £2,350 to buy and a further £100 to have it fitted. Then there is a maintenance contract and British Telecom fees of £105 a quarter. For this it is theoretically possible to send and receive ordinary telephone calls to and from your car. In practice they are patchy in the Cambridge area 84 05 15 p16

1985 Pye has been in consumer electrical goods since 1922 when W.G. Pye and Co began selling wireless kits. Now from its headquarters in St Andrew's Road, Chesterton it sells a wide range of televisions and radios under the Pye brand name though they are not made in Cambridge and have Philips internals. People have a very strong loyalty to the name 'Pye', so now they are moving back into areas which have been abandoned to the Japanese. Video cassette recorders have been selling since July and hi-fi music-centres will be launched this year. 85 01 23a

1985 Pye TVT profits 85 03 15a

1985 Pye TVT, the Cambridge television equipment company is to close its studio systems plant which employs 230 people – 85 11 29

1986 200 sacked Pye TVT, Philips set up new tv studios system Germany

1986 Pye Ltd management team move Croydon; end of connection Cambridge

1986 Pye Ltd move to Croydon - departure of original radio works from which other Pye group companies have grown [14]

1987 An era in Cambridge business will end when Pye Telecom changes its name to Philips Telecom. Pye has been part of Philips since 1966. The former name has been on the retreat elsewhere. Pye TVT has been sold to the American company Varian and Pye Unicam uses the

name Philips Analytical. The last reminder of the old firm, which began when W.G. Pye set up an instrument company in 1896 is the Pye TV and radio business which has now moved to Croydon. 87 06 08c Pye Telecom changes name to Philips Telecom & other moves to remove last uses of name [NS.1.2]

1988 Pye Unicam, direct descendant of the original W.G. Pye instrument company founded in 1896 has now changed its name to Philips Scientific. It was formed from the merger of W.F. Pye and Unicam in 1947 and was the last of the Cambridge companies to keep the name Pye in its title. It has now been recognised as a group with four divisions including the once separate Philips Communications and Security in Cromwell Road. It specialises in making analytical instruments for laboratory use, much of which is sold to Eastern Europe and the Far East 88 01 05 history of company – 88 01 05a, 88 01 06 & a

1990 Philips Scientific, York Street makes redundancies in manufacturing division, making analytical instruments. Sister company Philips Radio Communications axed 120 jobs St Andrew's Road – 90 05 12a

1990 Philips to axe 300 jobs including Philips Radio Communications Systems, St Andrews Road – 90 11 30

1991 Philips Scientific, which employs 525 people at its York Street plant may be bought by Analytical Technology Inc; was formerly Pye Unicam – 91 02 26a

W.H. Smith's computer shop with display of Sinclair computers, December 1983

143.51

c.27.1 : Sinclair

- 1962 founded; "started by miniature radio sets,
- 1966 Sinclair Radionics mini-tv shown at Television and Radio Show at Earl's Court – 66 08 22 [4.8]
- 1967 bright future for 26 year old; Sinclair Radionics established HQ Cambridge a year ago; announce miniature tv & digital watch - 67 01 14 [21]
- 1971 move St Ives, mainly known for hi-fi equipment
- 1971 turnover £100M but profits down set up new computer bureau - Cambridge data processing
- 1972 new electronic calculator, pocket size
- 1973 still dominate market, add to range
- 1975 send out over 100,000 month

- 1976 National Enterprise Board put in £650,000, ends 3-year quest for new capital
- 1977 worlds smallest tv unveiled
- 1978 loses £1.3M, axe 56 jobs due US dollar fall value
- 1979 lost £2M, sack 160; Sinclair leaves groups, starts Sinclair Research in Cambridge
- 1980 launched ZX80 personal computer, smaller & 4 x as cheap
- 1980 Sinclair Research, the company founded by Mr Clive Sinclair who pioneered the world's first pocket calculators and micro-televisions wants to buy the church of St Andrew the Great and turn it into a laboratory. They are currently researching computers and electrically-powered vehicles and are looking for premises in central Cambridge. But the church say he is unlikely to get permission because schemes for offices, shops, a language school and a mosque had already been rejected. 80 07 08g
- 1981 launches flat-screen tv & ZX 81; start cut-price war Acorn over microcomputers
secondary schools Sinclair Radionics renamed Thander Electronics, is almost wholly owned
National Enterprise Board invades Japan
- 1981 Microelectronics have caused some major shake-ups in the way we live and work;
Cambridge's electronics wizard, Clive Sinclair brought us the first pocket calculator and pocket television and now launches Britain's first complete personal computer, the ZX-80. It plugs into the aerial socket of your television and is tuned in like a video-game. But then you have to type in a program from the 128-page instruction manual. The computer is not really all that bright and must be given a clear list of instructions before it can do even the simplest sums. 81 01 26a & b
- 1981 Cambridge electronics wizard, Clive Sinclair, has launched the world's first flat-screen television. Working with Timex he hopes to produce a million tubes in 1982. The first will be a 6 x 4 x 1-inch pocket television costing £50 able to pick up transmissions anywhere. It may eventually lead to a large screen which can be hung on a wall 81 02 18c
- 1982 set up deal Timex
- 1982 open space-age HQ Willis Rd using hot water from deep bore hole
- 1982 Clive Sinclair, managing director of Sinclair Research Ltd of Cambridge has been chosen as Personality of the Year in a new series of awards for achievements in technical innovation. It follows the success of his ZX 81 personal computer of which some 40,000 are now being sold every month in this country. Production of the model, which has been a major force in bringing computers into everyday use, is now greater than any other computer in the world 82 01 29
- 1982 Electronics wizard Clive Sinclair unveiled his new Cambridge headquarters. The building is based on a soft-drinks works with a futuristic new wing added. Sunlight coming through the glass roof of the new wing and water from a spring under the original building will be used to control air temperatures. Telephone and security systems will be heavily computerised. The reception area includes the largest polished bronze sculpture in the work by Helaine Blumenfeld who lives in Grantchester. 82 10 02
- 1983 Grundy Business systems crashes, Science Park first failure; Britain's first home computer failure, based on New Brain designed by Sinclair before left Radionics, overtaken by new designs etc [6.7]
- 1983 Timex strike
- 1983 invests £12.9M in electric car
- 1983 buys Milton Hall for Metalab

- 1983 Sinclair knighted
- 1983 launches flat-screen tv seeks BBC contract
- 1983 Cambridge computer wizard Clive Sinclair may buy the factory of the failed Northern Ireland sports car company De Lorean to manufacture his electric car. His Sinclair Vehicle Project is developing what is hoped to be the first mass-produced electric vehicle for some years. Intended for city travellers it is due for release in 1985. The technology was developed by the Norfolk based Lotus Company, which Sir Clive has also shown an interest in buying 86 06 20 p3
- 1983 The Cambridge computer industry has suffered its first casualty. Grundy Business Systems, based on the Science Park, launched its NewBrain microcomputer in May last year, based on a design by Sir Clive Sinclair. It became one of the best-selling in the UK but an unexpected decline in sales and a failure to meet deadlines led to cash difficulties 83 08 31 p1
- 1983 Jupiter Cantab small computer company into liquidation, 2nd in 3 months, set up by ex-Sinclair designer [9.4]
- 1983 company valued at £136M making Sinclair who owns 95% worth £129.2M; Timex strike; to set up Metalab £2 research centre; invests £12.9M in electric car; buys Milton Hall for Metalab; Sinclair knighted
- 1984 launches QL
- 1984 hit by US price war, production delays China deal
- 1985 electric trike launched but fails & calls in receiver in tight financial difficulties as is Acorn during dramatic price-war to overcome competition & dealer stocks; Acorn sold Olivetti [23]
- 1985 Sinclair Research is selling its award-winning headquarters at Willis Road, Cambridge. The class and stainless-steel conversion of a Victorian bottling plant has been in use since 1982. Now the company's activities are to be concentrated at Milton Hall where their advanced research centre, Metalab is already operating. It is part of a restructuring programme to slim the company in the face of an estimated £15 million debt. 85 09 20
- 1985 sells marketing rights computers to Amstrad
- 1985 to sell Milton Hall
- 1985 Sir Clive Sinclair's new electric car is quite unlike anything else on the road. It is shaped like a plastic torpedo and equipped with handlebars beneath the driver's knee and a set of large bicycle pedals. Top speed is around 15mph on the level and the range on a single battery is around 20 miles. It can be recharged in eight hours and has a space for a reserve battery. The price is right: at just under £400 on the road it represents another highly-successful gamble on the part of the Cambridge-based millionaire 85 01 10a & b & c
- 1985 More than 5,000 Sinclair C5 electric vehicles have been sold during the first four weeks of production. At the moment it is sold by mail order but they are already talking to a number of High Street retailers who would sell the £400 machine direct to the public. Interest has come from as far away as the Outer Hebrides and Cornwall and from both teenagers and old age pensioners. In Cambridge the Eastern Electricity showrooms on Market Hill report continued interest in the machine they have on display and have distributed over 2,000 order forms 85 02 11
- 1985 Sir Clive Sinclair is taking a £3 million high-tech centre as part of a major expansion of his Cambridge-based research company. The present headquarters at Willis Road is bursting at the seams so he is moving to the Camtec Centre off Rustat Road. Other high-tech companies in the area include Cambridge Electronic Industries, Acornsoft and Logica. Sinclair this week launched a big advertising campaign for its £100 pocket TV and hopes to sell 200,000 units of their QL computers in 1985. 85 03 01a
- 1985 Clive Sinclair offered four-acre site for 'superchip' plant – 85 03 26

1985 Sinclair production C5 suspended – 85 03 29a 1985 Cambridge computer company
Sinclair Research needs to raise up to £15 million and is also looking for a new chief executive officer. – 85 05 28

1986 Sinclair launches Anamartic - superchip & company Moduliser -portable micro-computer

1986 “Sinclair has become a legend as one of most prestigious inventors since Leonardo. 1st pocket calculator, one of first digital watches, first sub-£100 home computer & first pocket tv set ... thanks Spectrum his name as familiar to generation of under-18s as Superman .. few products emerged without serious teething troubles & major delays 2 separate companies : Sinclair research makes computers & flat screen tv; he sold some shares to group institutions 2 years ago Sinclair Vehicles founded on back of that money to make C5 but problems at each company simultaneously - Vehicles lack sales Research hit by lack sales, dealers left with surplus & not reordering & home computer market saturated mini-tv not in High St but selling in USA

1986 Clive Sinclair ups and downs – 86 04 08a

1989 Electronics wizard and Cambridge tycoon Sir Clive Sinclair has been hailed as a visionary – and castigated as a mere marketeer. In his career he has reflected the best in British enterprise but also suffered the embarrassment of failure. He has seen the field of electronics change out of all recognition in his lifetime. He formed his first company, Sinclair Radionics in 1962 and moved to Cambridge five years later where he produced an early digital watch, then began the calculator craze and made a miniature television. But it was when he made personal computers that his business took off. But he will still be remembered for the ill-fated C5. 89 06 09bb

1990 Sir Clive Sinclair’s Cambridge Computer firm is moving to Scotland; meteoric rise and fall; started Sinclair Radionics in 1962, moving to Cambridge in 1967; produced digital watch and calculator, tv and computers. Won Queen’s Award in 1975 and knighted 1983. But C5 flopped, marriage broke up and sold his house on Madingley Road in 1989 – 90 06 30a

headline

Mill Rd 'often compared to Portobello Rd; wide range of speciality & local shops ... in 1890s could buy anything from pianos to tombstones [446.14.4] [446.14.4]

1882 Rock Kings started Staffordshire St; 1st shop Newmarket Rd c1882 [446.15.3]

1879 Priziborsky's to be demolished 1961; founded 1879 by Count Priziborsky after he left as barber Imperial Austrian Court; patronised by undergraduates; family connection elapsed 1934 when Count's son died, then Fred G. Osborne [446.16.8]

1882 Samuel Ballard & Son carried on fashion business in Petty Cury for 40 years on corner Alexandra Street; hit by rise of Co-operative Society 1882 09 30

1883 Laurie & McConnal open [446.12.1]

1888 bankruptcy of J.L.Bacon tobacconist [2.16]

1888 ice-cream vendor knocked out by falling branch [2.5]

1888 agitation for covered market [273.1.17]

1889 Joshua Taylor's premises in Sidney Street rebuilt in 3 months, now finest block in Cambridge [2.17]

1891 Hallack & Bond sketch of new building [NI.1.14]

1896 Heffers moved into centre [446.16.3]

1897 Hallack & Bond new premises Petty Cury [NI.1.14]

1898 The site in Sturton Street, Cambridge on which the new buildings of the Co-operative Society have been erected has a frontage of exactly a hundred feet. To the East are erected substantial houses, to be occupied by servants of the society - who are to have the care of the dairy department, and on the North is a shop with plate glass front, fitted with marble top counters. Behind this has been erected a dairy and slaughter-house. There is a space for washing and cleaning the carts, vans and horses. Pens for sheep, pigs and cattle are also provided CDN 1898 09 19

1898 In vacation time Cambridge shopkeepers have early closing on Thursday afternoons. But so soon as term opens early closing ceases. With the shop assistants in their desire to have a half-holiday once a week our sympathy must go out. The work of serving in a shop from morning to night from Monday to Saturday is a heavy strain even on those who are robust. The only way to secure this half-holiday is to get the shopkeepers to consent to it. That is easy in the case of most of them. The difficulty is with those who refuse to fall in with the majority. One man who refuses to close may deprive all the assistants in a town of their holiday c1898 11 12 [1.3]

1899 early closing movement formed [1.14]

1899 A fatality occurred today. The scene of the accident was the new stores being erected in Burleigh Street, Cambridge for the Co-operative Company. The outer walls have been built up and the workmen are engaged on the interior. One scaffolder, named Thomas Filby, aged 60, was engaged on the scaffolding erected above the top floor. He fell sheer into the basement on to a heap of broken brick. Before he lapsed into a state of utter insensibility he was heard to murmur, "It's all up" - 1899 07 17

1900 The Cambridge Co-operative Society has erected spacious new premises in Burleigh street. The building is imposing and by contrast with the other not very ornate premises in Burleigh street is rendered all the more conspicuous. On the ground floor are spaces for the butchery, drapery and boot and shoe department. The first floor is well laid out for other branches with a ready-made clothes emporium and on the top floor is a really fine meeting room. The old building in Fitzroy street will be retained for the grocery portion of the business CDN 1900 01 25

1900 The shopkeepers of Cambridge who have agreed to close early on Thursday afternoons during the May term have shown a consideration for their employees which is deserving of the highest praise. There is much to be said for early closing all the year round but the next best thing is that throughout the summer months, while the attractions of the open air hold out, shop assistants should have a few hours of breathing space every week. The shopkeepers will gain a good deal. Their assistants will serve them all the better because they are considerately treated, and the approval of the general public will be theirs also CDN 1900 04 07

1903 Laurie & McConnal's shop catches fire on Friday the 13th & is destroyed. Temporary shop opened in Fair Street in the garden of the house where Mr McConnal lodged. Accept £22,650 and whole of salvage as insurance claim & quickly build magnificent new building [1.6,2.1,2.3,2.15]

1903 Cambridge tradesmen complain bitterly of the tipping system in vogue by the 'Varsity men by which they are compelled to pay blackmail on a very extensive scale. There is quite an army of college servants clamouring for tips and all must be satisfied if the tradesmen wishes to keep his University clients. The college porter 'farms' for Freshmen's lists. The minimum price for a list is 1s. Then there are the bedmakers, gyps and shoeblacks, all of whom expect to receive presents from the shops where 'their gentlemen' give orders. c03 01 09

1903 Messrs Laurie and McConnal are almost universal providers, for their extensive premises, nos.121-124 Fitzroy Street, contained many departments. Today they are no more. In their place is a great gap, a space which instead of containing the thousand and one articles wherewith to furnish the homes of Cambridge has nothing to show but heaps of charred timber, twisted iron girders and dismembered masses of masonry. The whole premises have been destroyed as completely as fire can destroy. In less than three hours they licked up goods and buildings valued at up to £100,000 c03 02 17

1903 Many thousands of Cambridge people witnessed the spectacle of the fire at Laurie and McConnal's in Fitzroy Street. The crowd increased to gigantic proportions and to keep them in check it was necessary to stretch ropes across on either side. The Mayor, Aldermen and members of the Fire Brigade Committee watched the progress of the fire and the unremitting efforts of the firemen. The interested crowd did not let the firemen work without encouragement and the fireman with the nozzle working in clouds of smoke was cheered heartily when he commenced his task. As soon as the hopelessness of saving Lauries was recognised special attention was turned to defending the adjoining premises of Messrs Sturton and Mumford. c03 02 19

1903 After the great fire in Fitzroy Street, Cambridge, public opinion was strongly expressed in favour of the Volunteer Fire Brigade being in possession of a steam fire engine. It would require, with driver and stoker, eight men to work the engine and, with reliefs of the same number, would necessitate 16 men being engaged. But with only one engine they would have been able to play four jets on either the front or back of the fire, and one side would be entirely unprovided for. The engines and paid brigade would be so expensive that the town authorities would not be justified in incurring the outlay for protecting the few buildings at which they might be necessary. c03 02 20

1903 The Great Fire. Laurie & McConnal, Ltd., Universal stores, Fitzroy Street, Cambridge, will open their temporary premises in Fair Street with brand new stock of furnishing, general ironmongery, stationery, haberdashery, china and glass. Business usual in the Boot and Tool department, right opposite the destroyed building. – Advert c03 02 20

1903 Cambridge councillors discussed plans for the erection of new premises for Laurie and McConnal, Fitzroy Street. The bye-laws said there should be a certain amount of air-space behind domestic buildings – house, office or shop - and these had no such space. There was no doubt the plans were in contravention of the bye-laws, the question was whether the Council would refuse them. If they were passed it would be an illegal act. They should not alter the bye-laws to suit the convenience of any class of people. c03 05 23

1903 Laurie and McConnal applied for permission to erect a bridge over Fitzroy Lane to connect the two buildings which they propose to erect on either side of the lane. It would be 33 feet above the level of the street in the centre and 28 ft 6 inches at each end. They also desired to lay an iron pipe under the roadway from one portion of the premises to the other for heating purposes. The application was approved on payment of a rent of 5s. per annum c03 09 04

1903 One of the events of the year was the great fire which swept away the extensive premises of Messrs Laurie & McConnal in Fitzroy Street, Cambridge. Now within nine months the ruins have been replaced by more convenient, commodious and up-to-date premises and the business is in full swing in its new home. They are the first entirely steel-frame buildings erected in this country. Those who remember the former premises cannot but be struck with the immense improvement effected, with lifts, driven by an electric motor, at the service of customers any time of the day. c03 11 25

1903 Christmas Day happening to fall on a Friday means that trade generally will be at a standstill for three days in succession. Housewives must either purchase their stocks of meat, bread, fish and vegetables on the Thursday or dealers in these goods must open on Saturday. Opinion is divided. Some bakers say they cannot make enough bread on Thursday for the three following days but others say they sell practically no bread on Boxing Day as people do not each so much at Christmas. Butchers are inclined to close on the Saturday but fishmongers, where the supply of ice is an item of the trade, will open for a few hours only. Unless united action is taken some persons engaged in the four trades will have their holidays considerably cut into. c03 12 11

1904 “tradesmen commission people to recommend services to undergraduates & supply items to bedders for which give commission if sold” - claim [3.4]

1904 boot repairers business hit by invention of rubber heel protectors [2.4]

1904 A fire destroyed Mrs Cornell’s fishmonger’s shop on Mill Road, Cambridge. It was caused through the ignition of some fat used for the purpose of frying fish. Although the shop was sparsely stocked there was sufficient inflammable material in it to make it impossible to arrest the fire in its early stages, and soon the interior was a mass of flames which rapidly penetrated through the ceiling and attacked the contents of the front room on the first floor. The alarm was given by means of the Thoday Street fire alarm and the firemen arrived within twelve minutes with the horsed fire escape and tender and prevented the flames attacking adjoining premises. 1904 05 18

1905 Belfast Linen warehouse opened, Regent St [7.11]

1905 An outbreak of fire occurred at the premises of Messrs Hallack and Bond, wholesale grocers, Petty Cury, Cambridge. About 11.18 pm smoke and flames were discovered issuing from a store room. The alarm was at once given and the horsed fire escape, tender and hose cart were soon on the scene. With the aid of one hydrant, the inmates of the building and the firemen succeeded in extinguishing the outbreak just in time to prevent a serious conflagration 05 05 02b

1905 Tea dealers have been running down their stock prior to the reduction in tax announced by the Budget. Last night there was a tremendous rush to get tea out of bond to replenish supplies. At Cambridge the stores of the four railway companies have been converted into bonded warehouses where tea has been accumulating and by Friday they had 245 chests ready for delivery. At six o’clock this morning about 23 tons was taken away to the shops so customers can be supplied. 05 07 01

1906 ‘Cambridge for Cantabrigians’ was a sentiment voiced by two prominent men. W.B. Redfern objected to looking outside the county when appointing a new council surveyor while Mr A.S. Campkin said Cambridge tradesmen were being ousted by large combinations of non-resident traders. Money spent in the shops of genuine local tradesmen remains in the town; already many find it hard work to keep their heads above water. 06 04 19a

1906 Money lending allegations – Cambridge tradesmen and students – 06 11 17d

1907 National Union of Shop Assistants establish branch [3.7]

1908 Careless wholesale confectionary, Burleigh St, bankrupt – 08 02 15e

1908 The confidence trickster has been active in Cambridge. Three jewellers received telephone messages purporting to come from well-known residents, asking for a selection of gold chains to be sent to their houses on approval. Messrs Reed sent an employee for confirmation, who found no order had been given. But Otto Wehrle sent a messenger with several chains to Mr Verrinder of the Avenue. He met a gentleman on the steps of the house who promised to select one and return the remainder. Nothing has been heard from him since. 08 04 20

1909 Mitcham's shop opens [2.23]

1900 "please don't shop on Bank holiday" written in tar on shop that opened [3.9]

1909 Hallack and Bond can trace their association with Cambridge back over 100 years: it was there that Elizabeth Woodcock purchased her groceries before being lost in the snow in 1799. Tea was a luxury then, now it is a necessity and their delicate Katharata blend produces pleasing results. A visit to their tea room is a revelation: upon a tea-tasting day fragrant bouquets from the Far East assail the nostrils and the palate including one with a beautiful peach-like perfume 09 02 12

1910 Joshua Taylor's centenary [3.1]

1911 day after Bank Holiday is busiest of year for pawnbrokers due to the loss of 3 days wages - Good Friday, Saturday & Monday [3.18]

1911 hot-cross buns sellers start shouting their wares at 5.30am [3.19]

1911 market stalls reduced by 62, from 250 & roads around Square widened [273.1.24]

1911 Two daring swindlers victimised a number of University tradesmen by representing themselves as 'Varsitymen and ordering goods to a small amount to be sent to their rooms. They paid with cheques for £5 'from their father' which they got the shopkeeper to cash. The swindlers looked typical undergraduates in grey flannel trousers and tweed jackets, one of them had a gown over his arm. They gave Magdalene as their college and their names were found on the University register. 11 11 10g

1911 John Stanley, poulterer of Peas Hill sued the G.E.R. Company for damages sustained in the carriage of 84 ducklings and three geese from Liverpool Street to Cambridge. They were to have been sent by passenger train the same day. But instead they were taken on to Doncaster. He made numerous inquiries but it was not until 9pm that the birds arrived at the station but the GER could not deliver them until Monday, by which time they would have been bad. But he had an old contract that said the goods were sent at his risk and he lost his case. 11 11 24f

1912 The new Shops Acts means all workers in shops are secured one legal half-holiday in the working week. This has been the case locally for several years with the majority of shops closing voluntarily. Now the others must fall into line whether they like it or not. Certain businesses are exempt such as licensed premises, railway refreshment rooms, cycle shops and purveyors of milk, flowers and similar articles of a perishable character. It is desirable that the University traders should close on the same day and a petition is being signed asking for Congregation Day to be moved from Thursday. 12 05 03c & d Shops Act brings Thursday early closing [3.11]

1912 butchers sell less meat at Christmas - people go for poultry [3.10]

1912 Cambridge tobacconists are organising a petition in favour of compulsory closing. Many wish to close but a tobacconist in St Andrew's Street complains that although he would be glad of a rest on Thursday afternoons he cannot afford to do so as shops on either side of him are doing a good trade and his regular customers would desert him. College kitchens have stores of tobacco which they will sell to members of the University and this will have to be fought out in the future. Amongst the signatures are John Kitteridge, A.J. Ransom, Albert Maile, S.P. Ora and Bacon Bros. 12 05 17

- 1913 Winton Smith convicted for selling ham on half-day, had claimed it was perishable [3.12]
- 1913 J.S.Banyard produces pipe & cigarettes using tobacco grown in Suffolk [3.13]
- 1913 Death William Eaden Lilley 13 05 16 p6 & p7 CIP [1.4]
- 1913 The Mayor of Cambridge was asked by the National Union of Shop Assistants to recommend that shops should not open on the Saturday following Christmas so that the assistants' holiday might extend over the weekend. But he declined to do so. However a large number of traders, representing every firm of importance, including grocers and provision dealers have said they will definitely close. They include Joshua Taylor, W. Heffer, Eaden Lilley, Belfast Linen, the Co-operative Society, Barrett and Son, Alphonso Smith and the London Rubber Company 13 12 12 p7 CIP
- 1913 Charles Dixon said he came to Cambridge 50 years ago as a journeyman tailor and worked from three in the morning till eleven at night. Then he learnt the 'cotton' and took a manager's place in a large firm opposite St Johns after which he opened a business for himself in Downing Street. He worked hard for 40 years and built up a big trade. He built a little mission room in Victoria Street uplifting the fallen, acquired the Hoop Hotel to do away with the licence and plunged into house property. But this went wrong and he'd lost everything 13 12 19 p9
- 1914 fishmonger summoned for crying his wares, discharged [3.23]
- 1914 The unhappy conjunction of the name Sadd and Greef on King's Parade has been a well-worn joke. Now it is about to be broken. Mr Sadd is soon to move to premises in St Edward's Passage while Mr Greef is moving further up the Parade. The Sadds began business last century as dealer in antiques and a hairdresser in one of a row of old-fashioned houses standing in front of King's College. When the cottages were pulled down they moved opposite. His son made a sketch of the old houses 14 04 17g
- 1914 Sadd, Antique dealer, fell roof Kings Chapel 14.1914 Rev Yr
- 1915 Tradesmen in distress: French polisher said tradesmen could not to have their shop fronts polished, lodging house keepers said rooms empty – rates relieved 15 05 07 p7
- 1915 Friebourgh & Treyer, tobacconists, to prevent further misrepresentation, will carry on business under the name of the present partners, G & W. Evens (both Englishmen by birth and descent) in whose family the business has been for the last 125 years. The name will in future be Evans and Evans, 12 Market Hill, Cambridge 15 05 21 p1
- 1916 Chamber of Commerce to be formed following meeting of traders; had been accustomed to give very long credit ... would have to shorten terms– 16 10 08c
- 1916 growing popularity of King's Parade as a shopping centre; a war-time evolution; traders have to adapt to loss of undergraduates and impression of high-price goods; notes on traders: A.R. Crossman, Ryder & Amies, Rutherford & Clothier, A.W. Smith, Lily Masters, Tredgett – 16 12 06c, d
- 1917 Queues in Perry Cury assume alarming dimensions, one fainted. Margarine chief commodity sought and traders transfer stocks to Corn Exchange, 1,000 transactions took place – 17 12 26a
- 1918 introduction of motor bus services after 1918 greatly enhances Cambridge as a county shopping centre [3.6]
- 1918 Ald. George Stace came to Cambridge in 1872, and was for some years with Mr. J. O. Pain in a drapery business. When Mr. Pain retired, Mr. Stace set up the business in Petty Cury with which his name has for so long been associated 18 11 27 CIPof

1919 Winton Smith opens food production factory, East rd [1.9,3.16]

1921 MacFisheries opened, sells bulk ice for hospitals etc [446.16.]

1922 Cambridge & district butchers association formed [2.8]

1922 Fitzbillies established [1.13]

1922 “50 years ago Cambridge was notorious for its trading exclusiveness & backwardness, it was self-centred, localised, jealous of intruders & generally stuck in the mud. A vastly different state of affairs exists today... due in part to the introduction of multiple shops & up-to-date proprietors but even old concerns have changed. For 3 months of the year Cambridge is almost a deserted city & trade dwindles to a mere trickle, yet might be made a most attractive holiday centre & also splendid site for factories” c22 05 20 [3.8]

1925 Sainsbury opening [4.2]

1927 Sir – I read of the sale of the old-established grocery and provision business of Hallack and Bond. It is regrettable that the ownership of another great business passes away from Cambridge. To many the name has been a by-word and a guarantee of quality and good service through the personal supervision of people resident in Cambridge. This must become a serious menace to the welfare of the town and all good citizens should avail themselves of the service ably rendered by locally owned firms - Loyal Citizen CDN c4.3.1927

1927 An outstanding feature in the reconstruction of our new premises at 2, Market Hill, Cambridge, are the windows which are unique for a grocery business and compare in style with a London west-end store. We welcome an opportunity of showing you a store fitted and stocked in the most complete and scientific manner and where prized traditions inherited from our predecessors (Messrs Hallack and Bond) are upheld and carried forward with modern equipment. Shoppers may actually see their coffee roasted and ground. International Stores, the greatest grocers in the world. Advert. c27 08 20

1928 market stallholders petition re increase in rents [1.26]

1928 At the diamond jubilee celebrations of the Cambridge Co-operative Society the Chairman, Mr G.J. Golding, said he wondered what the people concerned with the little business in City Road, Cambridge, sixty years ago would think of the Society today with annual sales of £190,000, a membership of 16,000, 20 branches and 370 employees. Half the population of Great Britain, directly or indirectly, was now within the Co-operative movement c28 04 25

1929 Moons shop taken over by Joshua Taylor [27.9.7]

1929 Woolworth's buy the adjoining premises of Mr Pain [2.5]

1929 Coads shop opens [3.14] – CDN 9.5.1929

1929 Joseph Ashworth Sturton, principal director of Messrs Sturton Ltd of Fitzroy Street and a former Mayor of Cambridge has died at Bournemouth. The son of Joseph Sturton, the founder of the business 100 years ago who developed the land now known as Sturton Town, he was born above the shop and proved an industrious business man, opening branches throughout the region. In 1919 he purchased Thurston's bakers and confectioners and soon added a café. Mr Sturton was one of the first in Cambridge to interest himself in the motor car and took up the commercial car in connection with his business. He was a prominent nonconformist and founded the flourishing New Street Men's Bible Class. CDN c 15.1.1929

1929 An interesting improvement scheme will shortly be undertaken in Petty Cury and Sidney Street. Messrs Boots the Chemist have acquired extensive property with a view to re-housing their old establishment which has grown during some 30 years. Now the time is ripe to erect an emporium to provide an attractive shopping centre for patrons of all classes. The architect is Mr

Percy J. Bartlett of Nottingham and his primary consideration is an external appearance that will harmonise with Cambridge's noble architectural traditions and raise the standard of commercial architecture. Building operations will commence early in the New Year CDN 2.12.1929

1930 Co-op opens new premises of central building in Burleigh Street & new bakery in Sleaford Street "with exultation of spirit akin to moral fervour"[2.9,3.15]

1930 Theophilus Percy Gallyon, the well-known gunsmith, has died. He was head of one of the oldest Cambridge businesses, established by his great-grandfather 150 years ago. Born at the very address in Bridge Street where his shop still stands, he took over the business from his brother & will be succeeded by his eldest son. Deceased was recognised as a master of his craft and at one time indulged in shooting, a sport for which he turned out some first-class guns. 30 02 24

1930 Mrs Elizabeth Haslop has been described as a woman possessed of splendid business acumen. She carried on her late husband's butcher's business in Silver Street Cambridge and was the last link with the well-known firm which has been in existence for nearly 100 years and will be carried on. In her earlier life she was well-known in the Mill Road district where a small shop near Tension Road was run in her name. 30 07 24

1931 Mr J. Sainsbury, head of the famous provision firm, opened a new residential club that will accommodate 15 young men. In a place like Cambridge it is difficult for a young man to get lodgings and this large house in Brookland's Avenue has been modernised and redecorated and is a model of its kind. The bedrooms, which have two beds, have a wardrobe and cupboard for each occupant; it has a room with facilities for games and reading and dispels any gloomy feeling about what used to be called 'living in'. There were few local firms who had made such provision for their staff. Many firms had a contributory pension scheme but they had decided against such a scheme. 30 04 03k

1932 death of Mr A.H. Miller of music firm [2.10]

1932 Gordon Thoday fabrics start Sussex St [10.2]

1932 John Yeomans came to Cambridge at the age of 19 in 1857 and purchased the shop at the corner of Petty Cury and Sidney Street from Mr Lyons where he carried on business as a chemist for 40 years. He had a vivid recollection of events: he knew George Stephenson personally and was a passenger in the first railway engine to run in England. 32 10 28e

1933 Cambridge has lost an old-established tailor by the death of Mr Byron Thomas Wait of Mill Road. His father was a tailor at St Ives but Byron came to Cambridge 52 years ago and opened the shop in Hills Road. Thirty-five years ago he extended the business to the shop at 28 Mill Road and four years later to 100 Regent Street. Two of his sons are carrying on the business. 33 02 09b

1933 W.D. Nicholes, Mill Road store refurbishment – 33 06 03

1933 Millers Music shop, Sidney Street – 33 08 26

1933 Joel Smart was the son of a Gloucestershire cloth manufacturer. Coming to Cambridge shortly after the battle of Waterloo he commenced business at 59 Bridge Street in 1826, removing in 1840 to Petty Cury and in 1853 to 11 Market Street. Here he purchased the clothing business of Watson Taylor who had been trading from early in the century. He took his son, Charles, into partnership, in whose family the business still remains. Such is the history of one of the oldest firms in Cambridge where customers will find all the latest materials and the most fashionable styles at keen prices. 33 11 27

1934 Marks and Spencer's new shop will be opened on Friday morning. The premises have a frontage to Sidney Street. The ground floor space is devoted entirely to sales while the first and second floors contain stock rooms, offices and other accommodation for the staff of 60 assistants

who have been mainly recruited locally. There is a dining room where staff can obtain lunch at a cost of sixpence. There will be no 'stunt' lines at opening and 90 per cent of the goods sold are of British manufacture 34 05 15 [1.2]

1934 After a history of 100 years it is hardly surprising that there is a thorough tobacco atmosphere about the shop of Messrs Bacon Bros which has stood on Market Hill since 1805 and the news that it is to be pulled down with cause regret to many. A number of ledgers over 100 years old, containing fascinating information about the smokers have come to light including the original accounts sent to C.S. Calverley whose 'Ode to Tobacco' appears on the outer wall of the shop. A new shop will be built on almost the same spot. 34 08 01

1934 Messrs George Stace's new windows in his Petty Cury Arcade are absolutely the latest idea. They curve inwards to reduce reflections making the glass invisible. Spotlights inside, which can be given any colour, provide the perfect finish and one feels one has only to reach out and touch the articles. Showrooms upstairs have been reconstructed and one of the workrooms moved to make space room for the new arcade 34 09 21

1934 Hot Bargains at the great re-building sale at the Peas Hill Cash Drapery Stores. Household linens, blankets, dress and underwear fabrics at knock-out prices including Wigan sheeting, Jaspe bedspreads, Gent's fancy socks, Ladies artificial silk knickers (slightly fleeced) and interlock woven pyjamas. From college hire, 50 pairs of single bed sheets, once used and laundered, from 3/6 each. Six dozen heavy white Turkish Towels (one used and laundered) nine-pence three-farthings each. – Advertisement 34 09 27

1934 The old-established business of Messrs Robert Sayle has been acquired by Selfridge's Provincial Stores but the name remains, the General Manager remains and the staff remains – "I like the look of them and the merchandise is tastefully displayed", said H.G. Selfridge, junior. He studied at Trinity and was treasure of the Boat Club Ball in 1920-21 when it was held for the first time in a marquee at the college, instead of in the Corn Exchange. 34 11 24

1934 Barratt shoes have just opened their 126th branch at 6 Market Street Cambridge. When you consider that ten years ago they had fewer than 20 you must allow that they'd progressed. Some of the lines are stocked in no fewer than fifty alternative fittings. They are made in Barratt's own factory and sold only through their branches. From start to finish every detail is under their control and there are no middleman's profits – advert 34 12 07

1934 Arthur Colin Lunn was born over his tobacconist's shop premises in Bridge Street in 1896 and assumed control of his father's business founded nearly a century ago. His brother carried on the same trade in Oxford. When the business was turned into a limited liability company seven years ago he became governing director. Although one of the best-known business men in Cambridge he did not take a prominent part in either public or social life. 34 12 17

1935 A number of shoppers at Messrs Robert Sayle's new store accepted the invitation of Mr J.W. Pretty to take morning coffee in the library, in celebration of the opening of the store after the improvements which have been carried out. These have made conditions very much better for shoppers: there is now twice as much sales room as before and the whole store has been opened up. The fact that it is now one of a chain means that values are better than ever before, and will remain so 35 05 03

1935 Joshua Taylor six reigns of service – 35 05 07h

1935 The opening of Bacon Bros' new premises on Market Hill will forge a new link in a unique chain of tradition. Old ledgers record the names of customer who became famous in every walk of life including the Prince of Wales, the future Baron Rothschild and both Alfred and Charles Tennyson. The new interior fittings are made of cedar so that the shop is like a giant cigar box with many relics of bygone days. Verses from the 'Ode to Tobacco' by Charles Stuart Calverley which featured on the wall of the old building in Rose Crescent until its demolition last year are to make their reappearance in the form of a bronze tablet. 35 09 27b & 28a

1936 Peaks founded, Fitzroy St (1961 take Bradwell's Court, move out 1974) [9.9]

1936 With the enlargement of the drapery section, the Co-operative Society's premises in Burleigh Street comprise the finest Departmental Store in Cambridge. On the ground floor, the Butchery has finest home-killed and imported meat, Grocery sells bread and confectionary, Outfitting has made-to-measure suits while Furnishing has three-piece suites and mirrors. Every Department is equipped in the most modern manner with lifts to all parts of the building. 36 01 03d & e

1936 Roger Roe carried on the antique business in St Andrew's Street in succession to his father and many times had the honour of waiting upon royalty, dies – 36 03 25c

1936 Modern living with its flats, bungalows and almost stream-lined houses, can no longer accommodate the fine old heavy furniture of our ancestors. Today the cult is for comfort and utility in limited space so Robert Sayle has equipped their basement to show this new furniture. Here you can see complete rooms set out with wallpaper decoration, carpets, curtains, lamps and all the etceteras which make a house a home. There is even a little nursery that is wallpapered with a new type of American cloth which is washable and most hygienic. What home-proud woman will want to refuse such advice? – Advert 36 03 26

1936 Important Notice. Peak's furnishers, King Street, Cambridge have built up the name and reputation for selling reliable goods. We give an expert furnishing service with 150 bedroom, dining and drawing room suites always on show. Don't be misled. We have no branch shop and no connection with any other furniture store. – Advert 36 04 09b

1936 Marks & Spencer tender £26,000 for 10-11 Sidney Street as a general stores – 36 05 12a

1936 When John Brown took charge of Freeman, Hardy & Willis shop on Market Hill in 1897 boots were cheap, and needed to be: "I can remember country women coming in with a dozen children and saying their husbands only earned twelve shillings a week". When he started brown boots were so scarce that people stopped and gazed at someone who sported a pair in Peterborough. Most had hob nails in the sole – even those for infants - and women wore elastic-sided boots – it didn't matter what they wore, because you never saw their feet. The shop was enlarged into premises next door in 1905 36 09 03a

1936 Two old Churchwardens pipes over the string course of the parapet of Messrs Almond's shop at 11 Sidney Street, now being demolished, are a reminder that it was once used by Joshua Lee for the making of clay pipes. Mr A.T. Potter recalls that there had once been a large kiln in the centre of the shop in which the pipes were baked. There is also a very fine old lead head to the down pipe which has cross clay pipes embossed on it. 36 10 17b

1936 A. Mackintosh, ironmongers – advertisers feature – 36 11 06a

1936 Bacon's tobacconist history – 'Advertisers' series – 36 12 05

1937 Peaks Furnishers of King Street was commenced in 1924 by Mr W.H. Peak and by dealing in reliable goods, together with a sound service, he has rapidly built up business. The premises have been extended and improved from time to time and a very large floor space is now devoted to the display of floor coverings and furniture. Consistent advertising in the CDN for a number of years has helped considerably to make this firm so widely known. 37 01 30f

1937 Mr G.H. Jacob specialises in his tailoring for ladies and gentlemen and holds Gold, Silver and Bronze medals in addition to thirteen trade diplomas. He offers a complete gentlemen's outfitting service. The shop at 34 and 35 Burleigh Street was established in 1859 by Mr P.S. Stevenson and taken over by Mr Jacob in 1912. In 1926 the business was extended by the opening of a branch shop at 23 St Andrew's Street where extensive enlargements and alterations have just been completed. 37 02 12

1937 G.H. Jacob, tailors, silver jubilee – 37 02 24b

1937 Messrs J. Johnson and Son's premises at 51 Sidney Street, usually referred to as 'Johnson's Shirt Shop' is probably one of the oldest outfitters in Cambridge, the premises being

first opened in 1880. In 1922 the business was acquired by Mr A.G. Mole and is now under the sole charge of his son, Cecil. Much of the success of this specialised Men's Outfitting business has been due to consistent advertising in the C.D.N. 37 07 24

1937 Cambridge Co-operative Society's new store on corner of Histon and Windsor Road serves the needs of this new and populous district. The attractive up-to-date building has been designed with a dignity worthy of its position; the elevations are faced with Portland Stone and multi-coloured red bricks, forming a frame for the blue and gold mosaic panels incorporating the Society's name. The shop fronts are of bronze with oak entrance doors and polished granite stall board risers. The floor of the butchery shop is covered with marble mosaic and the grocery shop with rubber flooring 37 11 04a

1938 The Health Foods and Herbal Store of Green Street has been established several years and specialises in non-fresh foods of many kinds; unrefined cereals, wholemeal flour, biscuits and cake; choice fruits, nuts, honey & oils – in fact everything nearest to nature and consequently the cheapest for man, woman and child. Now they have bought a speedy little delivery van to distribute their goods to customers. Some of their products however travel by post almost to the ends of the earth 38 03 04e

1938 Sussex Street is the most striking of the many improvements made in Cambridge during the past few years. Those who recall the dark, narrow lane of bygone days, with its overhanging roofs on either side and its small ill-lit shops, will hardly recognise the imposing street that has emerged from the builders' hands with its line of modern shops and shop-fronts. It is now Cambridge's latest shopping centre. 38 07 22

Mannequins displayed a collection of the loveliest prevailing fashions comprising a galaxy of dresses grave and gay, day and evening gowns, tailored suits and winter coats. They will supply only exclusive models with special attention to smart styles for the fuller figure. 38 11 29

1939 Ben Mills was one of the pioneer workers of the Cambridge Co-operative Society. He joined in 1873 & appointed part-time secretary in 1882. He served as secretary until 1910 39 08 11 CIPof

1939 No.7 Petty Cury, comprising a double-fronted shop in the occupation of Messrs Lipton, the upper floors providing part of the bedroom accommodation of the Lion Hotel was offered for sale by auction. Shop property in the heart of the shopping centre of Cambridge seldom came to market by public auction and formed an excellent purchase for occupation, speculation or investment. It would be very difficult to find a much better investment. Demand was especially keen in Cambridge where the best shopping area was limited owing the centre being 'horseshoed' by college buildings. But it failed to reach its reserve and was withdrawn at £11,750 (about £650,000 today) 39 02 23a

1942 A.E. Stearn started as grocer in East Road in Jan 1893; in 1908 wholesale side transferred to Fitzroy Street where carried on by sons. – 42 09 24

1943 Beales tailors & robemakers, Sidney St : association ends after 143 years with retirement of B.W.Beales [1.7]

1947 Flack & Judge grocers for 50 years passes to Matthew & Son [1.7]

1948 death of Harry Davenport last of Cambridge's Victorian & Edwardian tailors, worked for Thurlbourns, Trinity Street [1.8]

1950 Lilley 200th anniversary [14.1]

1950 The news that Mr Douglas Nicholes is disposing of his well-known drapery and outfitting business in Mill Road will be received with regret by local people who admire the pioneer spirit and enterprise of a family concern. There are still people who can remember the early days of what was then a small lock-up shop surrounded by fields – known as Feke's Meadows - on both sides of the roads on the town side. It is 68 years since Mr W.D. Nicholes founded the business. In those early days they were the largest wholesalers of foreign goods in East Anglia. 1951 The announcement of the closing down of Messrs George Stace Ltd's Petty Cury store marks the closing of yet one more old established firm that has filled a special niche in the local fashion trade for many years. The name had come to stand for a good, solid, middle class trade. It was not necessarily a smart one, but it met the needs of a definite section of the community. It catered for the matron, and for the essentially well-to-do family of both town and county C51 07 02

1952 "East Road traders face bankruptcy" - 91% of properties are in short life or no life categories - 100 years old & poorly constructed. Propose using Norfolk Street as local shopping centre & keep East Road for traffic route [2.6]

1952 discuss possible shopping centre Fitzroy Street. Co-op have acquired Hawkins & may take opportunity to move from Burleigh Street into centre [2.7]

1952 While 26 assistants searched for smoke they could smell in their living quarters above the premises of Messrs Robert Sayle in St Andrew's Street, Cambridge, a thick pall poured out of one of the windows on the top floor. When the alarm was raised a score of them dashed downstairs and through the shop carrying their belongings with them. One assistant, Miss Ann Todd, said: "I thought of all of my clothes and I struggled down from my room with masses of them. I wasn't going to leave them behind". As it was Thursday afternoon there were only about 30 people in the premises at the time. Staff organised a chain of buckets until the arrival of the Fire Brigade. c52 06 07

1952 The familiar voice of Ellis Powell – of Mrs Dale's Diary fame – was heard coming over a loudspeaker instead of a radio by a large crowd waiting outside the new branch of the Co-op on the housing estate at Whitehill Road, Cambridge. Mrs Dale, hatless, but looking warm in a fur coat over her royal blue dress, declared the new store open. She was then the first customer of this modern self-serving grocery store which also has butchery and fish departments attached. People flooded in under the neon strip-lighting and, picking up baskets, made their way round the well-packed shelves, which seem to include every grocery imaginable. c52 12 11

1953 Albert Butler, proprietor of Messrs Haslop & Co, butchers of Silver Street, Cambridge, retired after 53 years in the butchery business. He recalled going to market to buy his first bullock

– the dearest one he ever bought - & remembered when families ordered 8 lb joints and rump steak was 1s 2d a pound. He prophesied the end of meat rationing within a year but thinks the trade would find itself in a serious position: while boys were not entering the business as they used to, even those who did received no slaughtering experience. “I don’t know where our slaughtermen of the future are coming from”, he said. c53 05 30

1954 A tenancy variation of a shop on King’s Parade, Cambridge, is a rare occurrence and rarer indeed is the appearance of a new trade to this world-renowned street. From being used as premises for University outfitters A.R. Crossman, no.12a will become K.P. Camera Shop and promises to become as well-known as its parent, Campkins of Cambridge. The firm was established in 1800 and has remained in its present premises at Rose Crescent since 1867 CDN c 23.1.1954

1954 The old-established department store of Laurie and McConnal of Fitzroy Street, Cambridge has been purchased by the London firm of Shirley Bros, but they say the public will not notice the changes. The store was opened by Mr James Laurie in 1901 and in recognition of advice given by his friend Mr McConnal he decided to use both names as a trading title, though only members of the Laurie family actually held shares. It prospered as an ironmongers shop but following a major fire in 1902 was rebuilt as one of the biggest departmental stores in East Anglia, increasing its scope to include almost everything for the home and garden. CDN 7.7.1954

1954 Miller’s music shop has transformed its Sidney Street Cambridge premises with an up-to-date, spacious and extremely attractive front of an entirely unique design. The windows are non-reflective and the lower ground floor, which is so popular with record lovers but previously almost completely hidden way, now has a mirrored view from the street. You can now pause in your shopping and look in the window, whether it be the television set your husband has promised the family for Christmas or one of the many different instruments on display. CDN 1.11.1954

1955 Peaks open showroom in King Street [2.8]

1955 Grays celebrate centenary [2.2]

1955 The Belfast Linen shop is celebrating its jubilee. 50 years ago a young man of 23 cycled into Cambridge with £100 in his pocket and an ambition to start his own business. He was Harry Nichols. He took an empty shop in Regent Street and Belfast Linen Warehouses had begun. It was not all easy going and there were times when he could not even afford to buy a new suit. It is still a family concern. Royalty, famous hotels and colleges are among his patrons and the R.101 airship on its ill-fated flight had sheets and towels supplied by the firm. 55 03 16a

1955 In opening their enormous new showrooms in King Street Cambridge the firm of H.W. Peak have passed another milestone. Everything for furnishing a home is here in astonishing array. Apart from furniture there is electrical equipment such as vacuum cleaners and washing machines together with televisions and Hi-Fi sound equipment. They started just under 50 years ago selling second-hand furniture and opened a large branch at King’s Lynn in 1937 55 09 02b

1955 Fireworks and flying saucers celebrated the opening of the new showrooms of H.W. Peak in King Street, Cambridge. Giant rockets were released from the roof of the floodlit and gaily decorated building and the city was ‘bombed’ with balloons released from aircraft. Each contained a numbered card and winners will share in the distribution of £200 worth of furniture. 55 09 03

1955 Two bothers, both of whom carry on house furnishing business in Cambridge, brought their fourth High Court action against each other. A woman customer had gone to buy a refrigerator, saw a shop named Peak’s in King Street and assumed it was the same as Peak’s Furnishers of Fitzroy Street where she had an account. It was delivered to her house but then she went to Fitzroy Street to pay for it. The judge said this was a case of the utmost triviality and it was surprising it had not happened many times before. 55 10 15

1956 Laurie & McConnal's warehouse catches fire [2.12]

1956 The lease of 'The Spindle', a little shop selling scarves, woollen items and glass animals in Downing Street, Cambridge has been extended. But the rent will increase from £150 to £260 a year. Miss Maud Pattinson said she took the premises in 1935 and converted storage space above the shop into living accommodation. During the war years – 'the American invasion' – she made a good profit. But it was a 'poky little place and Downing Street was a 'dead street' for shopping 56 03 08

1956 Miller's Music Shop began a 100 years ago when Mr A.T. Miller opened a workshop in Hobson Street as an organ builder and piano repairer. The family home was above his wife's millinery shop in Sidney Street and one of the rooms was opened as a pianoforte showroom. His son introduced the sale of instruments and sheet music and later came harmoniums, gramophones, radio and television and now electronic organs and tape recorders. 56 03 24d [2.13]

1956 Mr Stanley Woolston has removed his antiques business to Pembroke Street. It is a wrench to leave his former premises in St Andrew's Street after 30 years where he has been honoured by the gracious patronage of members of the Royal Family. But the buildings have been affected by the redevelopment of Emmanuel Street and plans to link Drummer Street with a shopping arcade. He will retain his warehouse at the end of Bradwell's Yard until the area is ripe for rebuilding. 56 07 14

1956 Millers music shop has been reshaped, redecorated and reorganised from top to bottom. There are spaces where walls used to be and the radio department is where the pianos were. Frank Chacksfield, the television and recording star, was the first person to make use of the special record booths built into the record departments downstairs. There is now a 'browsery' where 'discophiles' may browse through records. Long playing records are played over high fidelity equipment and there is a section for 45 rpm records with remote control. 56 09 19 & a

Fine Fare has a policy of opening until eight o'clock on Friday nights for the convenience of the public and the shop was full of people. But the Union of Shop, Distributive and Allied Workers see this as leading to a return to the twelve-hour days shop assistants used to have to work. 57 11 31c [2.18]

1958 Suttle, Tailor, closed following death Dec 1958 [446.11.5]

1958 Boots start extensions [5.3]

1958 The owner of Searle's Stores in Searle Street told the bankruptcy court he was making a profit of £8 a week until July 1956. Then the business started to decline. People moved from the area to council estates and he could not compete with the prices of cut-price shops. In addition his rates had increased from £5.6s.3d to £20. 58 03 06a

1958 Should there be shops on the corner of Coldham's Lane and Vinery Road? Two local shopkeepers, H. Wilson and H. Sykes, said there was no room for more shops in the area. Mill Road, East, is quite a substantial shopping centre; there are 80 to 90 shops at present with more planned. The houses in the area were built between 1928 and 1940 and that site was bought in 1924 for possible development as a public house. The owners had tried for shops, houses, flats and garages. Now they wanted a chemist's shop, fish shop and newsagents. 58 07 24 & a

1958 Messrs Coads' department store in Sidney Street will cease trading on September 27th with a special feature sale prior to closure. It is intended to replace the Cambridge store, which has limited accommodation, by the acquisition of premises nearer London. The site has been

acquired by F.W. Woolworth as an extension to their existing store which adjoins it. 58 08 09a [2.19]

1958 Millers may be the oldest music shop in Cambridge. They started trading as music and musical instrument dealers about 1886 when the late A.H. Miller joined the firm. Now they have taken over the business of Messrs Murdoch. In the 1920s Murdoch took over Leavis and Bedwells who had a retail shop on the corner of Glisson Road before moving to Regent Street. 58 10 18

1958 Miss Lake's toy shop closes – history of shops – 58 11 15

1959 Work has begun on greatly increasing the area of Messrs Boots the Chemist's premises in Sidney Street by the demolition of the old Essex and Suffolk Assurance Company buildings. It will double the width of the frontage and the shopping area behind and provide twin entrances on to the street. The staff accommodation will be more than doubled and the facilities vastly improved. Boots believe that the staff cannot be expected to look after customers properly unless their own interests are properly served by the company: contented staff means contented customers. 59 02 12b & c

1959 Gordon Thoday has specialised in fabrics for over a quarter of a century. At the new contemporary shop in St Andrew's Street modern display counters give the advantage of self selection, or if you prefer our staff will be happy to serve you from the immense and exciting variety of the newest British and Continental fabrics. Our Sussex Street shop continues as usual – Advertisement 59 02 26

1959 Exclusive shoemakers for over a century – that is the proud tradition of A. Jones and Sons who came to Cambridge as successors to Thrussells of St Andrew's Street – a name known for courtesy, quality and value. Their fine new shop is the latest of 35 Jones branches and stocks Airborne, Joyce, Rayne, Scandies and Van-Dal shoes for ladies – advertisement 59 07 02

1959 Mitchams Golden Jubilee Celebration celebrating 50 years at Mitchams Corner, 1909-1959. To mark this occasion we have had extensive alterations and decorations to our fashion showroom where you will find 'up to the minute' fashion ranges of coats, suits, dresses and separates. We will present two-shilling 'Jubilee Celebration Cheque' on all purchases of £1. Bring the children – there will be a balloon for them. Advert 59 10 01b [2.3]

1959 In the past few years the Fitzroy/Burleigh Street area, with its easy access, ample car-parking facilities and huge variety of shops, has become increasingly popular as Cambridge's most convenient shopping centre. Many of the shops were formerly in ramshackle buildings, combining timber and corrugated iron with a minimum of brickwork, often built over the front gardens of houses which had their ground floors converted. But now these have made way for up-to-the-minute shopping premises and improvements are constantly going on. 59 11 04 & a

1959 John Line new wallpaper showroom – 59 10 30c

1959 Co-op new self-service super food store, Burleigh St - 59 11 17

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 The first escalator to be installed in a Cambridge shop is in position at the extension of F.W. Woolworth and Co. Ltd. and is all ready to go into operation when the new premises are opened at the end of June. It will convey customers up to the sales floors relieving congestion on the stairs which will remain for energetic customers and 'down' passengers. It is among a number of innovations in the building which will include a shed for 120 cycles on the roof and an unloading bay in the building itself so that lorries can drive in and unload directly on to lifts. There will also be an air conditioning plant, deep freeze and delicatessen counters, Formica walls and an asbestos-lined ceiling. 60 02 18 [5.2]

1960 Joshua Taylor 150th birthday with production at Arts Theatre, started 1810 at Ely [14.6]

1960 Supermarkets are undercutting smaller shops – an identical tin of coffee varies by as much as sixpence. But Mr L.C. Cherry of Milton Road has banded together with several other grocers to buy goods in bulk, enabling him to give customers special offers. A high percentage of orders are now taken over the telephone, credit is given and goods delivered. At Sutton Mr L.F. Lindsell has seen no decline since the opening of a supermarket at Ely: the customer saves a bus fare, get good service and can always come back and complain. Several housewives praised the supermarket but others said it tempted them to buy rather more than they first intended 60 01 20

1960 Bradwell's Court, the new public footway linking St Andrew's Street with Drummer Street, was opened for the first time this week. At the same time Christ's Lane, the old cobbled pathway, was closed. With an arcade at each end and an 'open style' court in the centre, the new thoroughfare is flanked by 13 shops 60 01 23c

1960 Macintosh and Sons, the long-establish firm of ironmongers have moved their showrooms from Cambridge Market Hill to Mill Road owing to the congestion in the town centre. "The days have gone when farmers could pull up with their horse and trap to purchase instruments", they say. From the new warehouse and instrument shed they sell anything from a hand tool to a combine harvester costing over £2,000. Nearby stands the foundry that was in use until 30 years ago where they made lamp standards and ploughshares for the Town Council. 60 04 01a

1960 Joshua Taylor is taking over the Arts Theatre to celebrate their 150 years of business. The production of a play telling their story has been put in the hands of Mr Gabor Cossa, the antique dealer and dramatic critic. It is in the nature of an undergraduate revue, not unduly concerned with advertising the merits of the firm. There will also be window displays with contemporary costumes showing the range of clothes they have sold over the years 60 06 30a

1960 A Cambridge tailor recalled that in the mid-1920s undergraduates wore sports jackets and grey flannel trousers with 27-30 inch bottom, now the average was 18. Some 80 per cent of undergraduates today are studying on grants and wear duffle coats and sloppy-joes, tartan windcheaters and jeans. But the demand for suits, although much reduced is still steady. A man in his third year will buy a dark grey suit to mark the start of his career. 60 05 05

1960 Joshua Taylor story at Arts Theatre – 60 05 11

1960 Peak's Furnishers Ltd of Fitzroy Street have opened large premises in the new covered shopping arcade in Bradwell's Court. The electrical appliances section is well-stocked with the leading makes of washing machines, spin-dryers; demonstrations are a daily event and prompt delivery guaranteed. It also has a number of model kitchens fitted right down to the last detail and attractive displays of bedroom, lounge and dining furniture are beautifully displayed in room settings. 60 06 17a & b

1960 Romsey has gained new shopping facilities with the opening of the Co-operative Society's Supermarket in Mill Road. It occupies practically the whole block between Catharine Street and Thoday Street and is a complete transformation of their former grocery, butchery, pharmacy and cottage property. The shop front features anodised aluminium metal work while the four check-out stations are finished in an attractive shade of plastic. 60 10 14b

1960 New Co-op supermarket, Mill Road – 60 10 21aa

1961 Lion purchased July 1961 by Jack Cotton & Chas Clore for City Centre properties; largest single property transaction in Cambridge; by 1964 hotel closed & just bars open [446.16.3]

1961 Roe Antique shop Christ's Lane closed due Bradwell's Court, moves Downing St [5.5]

1961 The whole of 'The Broadway' on Mill Road is being put up for sale. It runs from Cavendish Road to Sedgwick Street and is the largest shopping area in the eastern half of Cambridge. It was built 23 years ago and consists of 14 shops with eight flats above. The London company that owns the site says it is a good investment: the properties currently realise £2,848 a year in rents which will increase to more than £4,000 in three years time. 61 05 09

1961 The Broadway, Mill Road sold for £35,000 – 61 05 16 #

1961 The Roe family has been well known in Cambridge since Joseph Roe started in the antiques trade in Petty Cury in 1826. Now one more facet of the old times will disappear with the demolition of their shop on the corner of Christ's Lane and St Andrew's Street. It has been in existence since 1882, having been rebuilt in 1897. New buildings will rise on the site in keeping with the contemporary Bradwell's Court. The business has relocated to Downing Street where it will be continued by Owen Roe. 61 07 01a

1961 Stanley Rose's old-established butchers is one of the few properties in Petty Cury remaining in private hands. He acquired the premises in the early 1930s, moving from a site in Market Hill which was then being demolished for make way for the new Guildhall where the family firm had been established for three generations. He is now retiring and the business will be transferred to W.J. Adkins, the local firm of butchers. The premises have been acquired by Messrs Peter Lord, the shoe specialists. 61 07 03d

1961 We never swank. But we are proud to know that during our 64 years of trading we have acquired the reputation for being the suppliers of the finest quality home-killed meat and imported lamb in Cambridge and district. Years ago we displayed meat outside our shop, today the interior counters and shelves are stocked with everything that is good in meat, groceries and provisions. Our prices are right & we give a free and regular delivery service. A.E. Page, 62 Cherry Hinton Road – Advertisement 61 08 02

1962 Macintosh and Sons of Market Hill, Cambridge, one of the oldest ironmongery firms in the country, has been sold to an unknown purchaser. The firm's earliest records date back to 1688 when the business was sold to the Finch family. They kept it going for 200 years before it was taken over by William Macintosh who'd been in business in Sidney Street. A major redevelopment scheme is proposed for the site after their retail premises close in September. The wholesale, agricultural and workshop departments will continue to trade from 349 Mill Road 63 02 01a [3.2,5.6]

1962 Fitzroy Street endorsed as a shopping centre [3.3]

1962 Millers music shop opening [4.3]

1962 Pratt, Manning & co, oldest bespoke tailors close, established 1865, due 80% drop in undergraduate trade, 30 years ago were proud of their dress & bought 4 suits at time, now shuffle around in jeans & sweaters; are on Government grant & do not have two halfpennies to rub together [5.7]

1962 In 1851 Mr Alfred Bodger, 'Hosier, Glover and Shirtmaker', founded his Gentlemen's Outfitting shop opposite Holy Trinity Church. As business grew he added a tailoring shop and in 1934 moved to the present site on the corner of Sidney Street and Green Street. In 1946 the ready-to-wear site was enlarged. More expansion followed in 1954 and now internal alterations are complete allowing a full range of goods to be shown. But friendly and personal attention is always available – Advert 62 04 27b

1962 Bradwell's Court arcade and shop development has been a joint venture between Jesus and Christ's Colleges and Ravenseft Properties. It stretches from St Andrew's Street through to Drummer Street bus station and provides a continuous covered route to the city centre. Work on demolishing the out-of-date shops and buildings started as long ago as October 1957 but was held up by difficulties over leases. The last tenant to go was the well-known antique dealer, Mr K.A. Rowe. By the time the University term begins again the development will be complete and all the 20 new shops and showrooms fully occupied. 62 08 11a

1962 Herbert Robinson's electrical premises with a large double frontage in Regent Street have been sold to a Messrs Skertchley, the cleaners and dyers for a price in the region of £100,000 (c£1.7m today). The firm has been selling the remaining electrical equipment at reduced prices with two-year old television sets down to £15 (£263 now). On two occasions the shop together

with the adjacent garage and Llandaff Chambers have failed to reach the reserve price at auction
62 09 15

1962 Adkins Corner. For the convenience of those who prefer out-of-town shopping with good parking facilities, W.J. Adkins have opened a self-service store by the Perne Road island in Cherry Hinton Road where you will find the same quality – the best – which has made Adkins famous for English and Scottish meat, sausages, pies, cooked meats and other provisions. You pay less for the best – and you get Green Shield Stamps as well – Advert 62 12 17c

1963 Weatherheads taken over by W.H.Smith after 93 years [5.8,10.9]

1963 Co-op supermarket Milton Rd is largest suburban one in county [5.9]

1964 first parking meters empties streets, queues for car parks which fill & not enough meters; traders say meters upset sales [12.9,16.7]

1964 A Regent Street trader has lost 78 per cent of his usual turnover since parking meters were introduced, Cambridge Chamber of Commerce was told. A survey of over 30 shops showed the average loss in turnover as 45%. There should be a reduction in rateable values and compensation for businesses which are forced to close. Meters should be closed down and a return made to unilateral parking supervised by wardens. But the Parking Committee chairman said that if motorists used the meters to the full they would get most of their customers back 64 04 30

1964 Peaks new carpet centre, Fitzroy St – 64 05 22

1964 threatened demolition for shopping centre, City Rd people worried about their future [446.10.7]

1964 parking problems in centre have encouraged people to do everyday shopping

1970 Co-op increase Burleigh Street floor area by 50%, introduce divi stamps [13.4]

1971 Chamber of Commerce strongly disapprove of shops giving discounts to students, but 'students could retaliate by taking their business to London & leave some city shops with hardly any customers' [26.3, 369.23.6]

1971 Thrussell & son 131 year-old boot firm closes, one of last firms in bespoke shoemaking trade, undergraduates stayed with them [27.10.7]

1971 Sunday opening rejected by City council [5.16]

1971 Co-op drive coach & horses through local government policies with Beehive One 1969 asked for discount warehouse for people wishing to purchase in bulk, opened Oct 1970 & becomes retail - Beehive One; wins public inquiry to continue 1972; apply for another site 1974 which approved after inquiry 1977) [13.4] [6.6]

1971 Problems of where to put extra shops – reflections on last eight years – 71 12 07, 71 12 08, 71 12 09, 71 12 10b

1972 Sainsbury's new shop opens on Matthews site sell old shop for £615,000 [4.4,14.2]

1972 Dorothy sold for £800,000 [14.4]

1972 1st sex shop, Go-Go, (closed by police after 6 months 1973) [8.14]

1972 Arcade opened East Rd - 6 days a week enclosed market, 100 stalls (destroyed fire 1975) [9.6]

1972 Sainsburys are planning a major supermarket development on a four-acre site at the corner of Coldham's Lane and Brooks Road, Cambridge. The group seeks either to build a supermarket with a petrol filling station, four shops and parking for 355 cars, or a supermarket with four shops and space for 390 cars Sainsburys, whose city centre supermarket is expected to open in July, describe their new proposed development as a "district shopping facility". "We

believe that edge of town developments are the thing of the future" said a company spokesman. "Cambridge needs two Sainsburys, one to serve the centre needs and one to serve the district shopper. This one must have plenty of parking. We would sub-let the shops and filling station and the parking development would serve adequately the whole development" c72 03 10

1973 latest small shop quit Hills Rd, squeezed out when rent shot up £1,000 pa [446.13.5]

1973 Trinity Hall raise University Camera rent £600-£3,500, Colin Lunn £500-£4,700 - 'do not gross that much in year; "college Rackmans"; but sale empty shops in block for £130,000 & £150,000 & seek fair rent of 5% market value [446.14.1]

1973 plans for several 'out of town' shopping complexes : Marshall's want 10 acre complex Newmarket Rd, Tesco apply hypermarket Milton Road (rejected) but Government overrule city to allow Sainsbury's appeal for Coldham's Lane [6.1]

1973 huge rent rises shock Cambridge shopkeepers, Trinity Hall & Corpus raise rents by up to 9 times [6.2]

1973 Parry Lewis report suggests Trumpington as site new shopping centre [7.4]

1973 The scheme to build a hypermarket for Tesco on the outskirts of Cambridge has been rejected by the city council. The scheme was put forward on behalf of Tesco by Stokes of Cambridge Ltd. They asked permission to build a 100,000 square foot hypermarket with a car park for 900 cars on land off Milton Road next to the railway line. The store would have been one of the largest in Cambridge. In turning it down the planning committee said it was outside the area allocated for development, would encourage extra traffic on a fast trunk route and was against the shopping policy for Cambridge in which large scale development is aimed at the Fitzroy Street - Burleigh Street area c73 04 27

1973 The government has overruled the Cambridge city planners and given Sainsbury's the go ahead to build a large supermarket and shopping complex in Cambridge. Last autumn planners rejected an application to build on what used to be a precast concrete factory site at the Brooks Road - Coldham's Lane corner. Now the Department of the Environment has granted permission. There is little doubt that city planning officials are embarrassed by it - because it cuts sharply across their own proposals to safeguard the council's Burleigh Street shopping re-development project c73 05 05

1973 The second oldest business in Cambridge, G.P. Jones, the grocer of Trumpington Street closed down at the weekend. They were established in 1623, three years after the oldest business in the city, Bowes and Bowes. Now the old-world grocery shop, famous for their blends of teas and statuesque tea jars, will become a fine art shop. Mr Sidney Jones looks back with resignation to the days when the shop had its own tea blending room before the war and produced over 20 blends. He said, "It was inevitable that the grocery had to close as our regular customers became fewer and fewer. More people have come in to try and buy the jars and old furniture of the shop but I'm not parting with it for the moment c73 08 28 [8.10]

1973 Like some great suicidal spider Cambridge will have eaten its heart out by the turn of the century. Such is the dramatic prophecy of Professor John Parry Lewis who has been making a complete study of its future. Specifically he is saying is that if Cambridge proceeds with the scheme to build a twin shopping centre in the Fitzroy Street - Burleigh street area it will be signing the death knell of the present Market Square area. He concludes that a new focus for commercial activity must be developed on the edge of the city either in the Trumpington area or to the east near Marshall's airport. This cannot be done if the Fitzroy-Burleigh scheme proceeds, as the indications now are that it will c73 09 22

1974 Seven generation of Barretts have been supplying the citizens of Cambridge with pottery and glass since the C18. This week the family business is virtually "coming home to roost" in opening up new premises in Gt St Mary's Passage – only a stone's throw from the spot where

Simon Barrett opened up his first shop nearly 200 years ago. The long-established premises in St Andrew's Street will still remain in business c74 07 19 [7.13]

1974 Millers Music centre moves Sussex st (founded 1856, moved Sidney St 1966) [9.3]

1974 Traffic came almost to a standstill in Coldham's Lane, Cambridge, as queues built up for the newly-opened Sainsbury's supermarket and freezer centre. By 9.15 the car park, which holds nearly 400 cars, was almost full and queues had formed outside the door. After Mr John Sainsbury had opened the store the eager shoppers converged on the packed shelves and crowds formed round the plentiful supply of sugar c74 12 01 [14.3]

1975 experimental closure in centre, close Kings Parade, Sidney st, St Andrews St; tea-party marks closure KP [17.11]

1975 2nd stage - one way Emmanuel Rd, Parkside, Parker St brings chaos & abandoned [17.14]

1975 Advert: An open letter to the citizens of Cambridge. We, the traders in the centre of Cambridge, have served you for many years. Thanks to ill-considered action by our elected representatives in stopping the free and unrestricted flow of traffic through the city centre we find that our livelihood is being threatened. It is a fact that without a city centre which is alive and throbbing the city will die. By taking trade away from the centre the city fathers have betrayed the trust we have placed in them. Let us make 1975 Cambridge Conservation Year and protest against the creeping paralysis which is being forced upon us by these out-of-date idiots – Cambridge City Centre Action Group c75 07 19 [17.15]

1975 Andys records shop opened [7.15]

1975 Stallholders at the Marcade, East Road, Cambridge, were today counting the cost of a blaze which gutted the indoor market on Saturday night, destroying more than £100,000 worth of stock. The fire was first spotted at about 11.45pm and within half an hour the market was a raging inferno as clothes, antiques, records and household goods went up in flames and asphalt and glass sections of the roof began to cave in. The Marcade was opened two and a half years ago and many of the stallholders were just beginning to build up a profitable livelihood c75 09 03

1976 'city traders who have lost business as result of traffic restrictions ... will just have to accept it' [26.48.18.4]1

1976 When Texas open the door of their new super-store at Coldham's Lane on Saturday, Cambridge will have the largest Do-It-Yourself centre in East Anglia. Spurred on by the success of their year-old store which took over from Peaks Furnishers in Fitzroy Street, Texas are sure that Cambridge shoppers will make extensive use of the new premises, which are packed with all kinds of goods for the handyman c76 02 26 [10.4]

1976 Co-op appeal for second site "Fitzroy Burleigh no nearer solution than in 1952 13.5]

1976 doubts over Kingsbury on Coral Park Estate - problems parking [27.9.2]

1976 A new store, the Talk of the Town, is to open in Fitzroy Street, Cambridge in the building formerly occupied by Peaks Furnishers. The store is divided into individual sections, some let to local traders & some rented to national companies. An Elizabethan Tea Room complete with period furniture and fittings and a wedding dress section are on the top floor. The store has special design features such as log cabins for changing rooms in the fashion section and thatched roofing for the farm produce section c76 03 13

1977 "Lion Yard rents jumped enormously with result that most small local concerns were priced out of the market leaving the brigade of high mark-up multiples - Golden Egg, Dixon's, Van Allen, Chelsea Girl et al to take the units paying between £3,000 & £18,000 pa rent ... the variety of shops reduced; if Kite ... then identical effect could occur. Leader of city council Powley feels best rate of return is one of commercial facts of life ... believes influx of national multiple stores into Cambridge will be only short term growth ... [15]

1977 “small city traders under siege” [6.4]

1977 Laurie & McConnell to close, 100 jobs go - “indecision over Kite redevelopment” was too big to heat etc, passing trade dropped dramatically due to Kite demolition etc [13.9]

1977 Mitchams closes (opened 1909), cannot afford modernisation [9.2]

1977 Dorothy continental delicatessen closes, last part Dorothy restaurant, Dorothy taken over Co-op 1952 [8.4]

1977 Tesco opened Bar Hill, doubles in size 1983 [14.7]

1977 What kind of shopping facilities will we see in Cambridge in the future? If recent events are pointers then the small operator will be replaced – just as quaint non-conformist Petty Cury was replaced with the corporate dullness of Lion Yard. The rents jumped enormously leaving the high mark-up multitudes – Golden Egg, Dixons, Van Allen, Etam, Chelsea Girl et al to take the units paying between £3,000 and £18,000 a year in rent. It meant that the variety of shops was reduced. If the Kite complex proposals were to see the light of day then an identical effect could occur. CDN c18.2.1977

1977 Cambridge & District Co-operative Society’s plan to expand the Beehive complex, which was turned down by the county planners, has been given the go-ahead by the Department of the Environment. The scheme, using the former Cadbury-Schweppes warehouse near Coldham’s Lane will provide an extended shopping space, a garden centre and leisure goods sales centre. The Inspector said that as there were still no definite plans for the Fitzroy/Burleigh Street redevelopment the Beehive scheme would meet some of the shopping need without detriment to the city centre. CDN c25.3.1977

1977 The Cambridge department store Laurie and McConnal in Fitzroy Street is to close in December. Indecision over plans for the Kite area redevelopment is the reason, said Mr Anthony Frais. “We have tried everything we know to get something moving in the Kite, and while the council is now at last seeing sense we cannot afford to wait the two years before anything actually happens. As a small family company are paying penal rates.” The business was established nearly 100 years ago. c77 10 07

1977 The sudden news of Laurie’s closure has come as a shock to the City Council team involved in drawing up the Kite plans. Council leader, John Powley, said he was “very sorry indeed” and could well understand their frustration at the indecision. “Gradual renewal of the area, as some people want, just will not happen and will lead to a speedy decline of the whole area. A satisfactory scheme must be produced as speedily as possible. Constant delays are not good for the area, for the people of the city, or for Cambridge as a whole”. c77 10 08

1977 The news that Laurie and McConnal’s department store is closing will have come as a surprise to most people. But to anyone who regularly used the store it was only a question of time before they succumbed to the inevitable. Even at the height of the shopping day you could be the only potential customer in any one department. It had 50,000 sq ft of selling space, spread over five floors to service, heat, decorate and keep full of merchandise and the passing trade had dropped off dramatically as so many houses have been knocked down and food shops have disappeared from the Kite area. c77 10 09

1977 More shops in the Kite area will be forced to close unless something is done quickly to rejuvenate the area. A number of stores have been teetering on the brink for some time and could go out of business. This has been caused by all the little ginger groups, all pushing for their own things. They hack and maul among themselves and all they succeed in doing is to cause the sort of intolerable position that Lauries found itself in. It is all very well saying the Kite should stay exactly as it is. But it cannot. It has changed markedly over the years and is still changing. It either has to be redeveloped in some fashion, or it dies. c77 10 16

1977 Mitchams, the Cambridge department store, is to close after 68 years. Mr Charles Mitcham converted a house in 1909 and opened up the store. It spread into adjoining buildings and today sells almost everything but furniture. The shop was sold when Mr Mitcham died during

the war and was taken over two months ago by a Manchester-based insurance group. The manager said: "It is more than just a shop closing. It is part of the city about to vanish" c77 10 17

1978 Laurie & McConnal's auction - last sale [1.9]

1978 Boots close Mill Road branch [7.8]

1978 Loker & co, started East Rd 1861 to close, concentrate on wholesale side business [8.8]

1978 Laura Ashley, one of the fastest rising fashion and fabric business in the world is coming to Cambridge. They are taking over the ground floor of what was the Turk's Head restaurant. The rest will become separate eating areas. The Granary in the cellar will offer international cuisine, the first floor restaurant will be based on English cuisine and the Pasta Kitchen on the top floor will feature an a la carte menu. It will be one of the few English businesses to offer hot foods late at night in Cambridge. c78 07 31

1978 Laurie & McConnal's department store in Fitzroy Street, Cambridge, opened its doors for the last time as the auctioneers moved in, just over a month after closing. Between 200-300 people milled around the five floors as the left-overs of almost 100 years of trading went under the hammer. Most of the faces were strangers, but a few of the old employees called in just to pay their respects. The sale will strip the building down to its last box of light bulbs – even part of a tin of toilet soap was in the catalogue. According the agents the building itself has attracted a few offers around the asking price of £250,000, but no-one has signed anything yet. c78 01 22

1978 The new Beehive home interiors centre opened in Cambridge by the Co-operative Society is unique in Britain. With more than 25,000 square feet of space, home interiors are laid out in authentic room settings and the Co-op has gone up-market. There is a four-piece suite which costs a cool £1,000. They hope to supply all the goods on show from the stock carried in the ground-floor warehouse and people will be able to hire roof racks or vans to get it home if their cars won't take it. It has a children's cinema so that parents can leave their children occupied while they discuss furniture with the sales staff. c78 03 28

1978 Cambridge Co-operative Society was fined for Sunday trading at the Beehive Shopping Centre. The Society, which has opened its garden centre every Sunday since spring said: "Our competitors will still be trading just outside the city; all we have done is over the same service other garden centres do, and other councils turn a blind eye." It had opened after consultations with planners who welcomed the prospect of a garden centre occupying this then derelict piece of land; if it was stopped a great deal of harmless leisure activity would be spoiled for thousands of people. c78 12 18

1980 Rose Crescent new shops 'best planning gain for long time' [446.16.7]

1980 J.Ward & sons close Burleigh st to concentrate on Bradwell's Court; opened East Rd 1890s, made bikes, 1930s produced own wireless 'Wards three-valve', late 30s became one first country sell black & white tvs [10.12]

1980 Customers at Cherry's Stores in Norwich Street, Cambridge, have said goodbye to the couple who have run the shop for 34 years. Lionel Cherry and his wife Kathleen took over in 1946 and built up a business which, in days when petrol was cheaper, offered a free delivery service to Newnham and Arbury. The shop was the place where Robert Sayle started as a draper and has been a grocers for more than 100 years, owned in all that time by just three shopkeepers. It will be the end of a long family connection with the trade. Mr Cherry's uncle had a shop on the junction of Arbury and Milton Roads which became known as Cherry's Corner c80 01 13

1980 The age of the microchip has taken all of us by surprise but now sons and daughters crave for the latest computer game, digital watch or radio-controlled car. Since Tandy came to Cambridge five years ago they have found rapidly-increasing demand in the home electronics field and have now divided their Emmanuel Street operation into two shops. One will house a veritable treasure trove of hi-fis, tv games and intercoms appealing to the young 80 12 04b

1981 Wards go into voluntary liquidation, Jack Carter (opened 1937) finishes due trebling of rent, Johnsons menswear after 150 years following death : reasons for closure generally given as rates, rents, increased costs, decline in business, competition from larger multiples & general recession [6.8]

1981 Alley boutique Lion Yard closes due rent increase; started 1966 in Falcon Yard & moved Lion Yard 1975 [8.3]

1981 Marks & Spencer extension, 3rd floor (moved Cambridge 1934, extended 1937 & 1938, 6,000 square foot extension 1968, buy Victoria cinema for new store 1985) [9.5]

1981 Laurie & McConnell site sold Grosvenor Estates [13.10]

1981 Percy Wing's shop has been in business in Clarendon Street, Cambridge, since 1912. A grocer's and off-licence, it sells all sorts of things from Chelsea buns and bundles of firewood to apricot wine and John Smith's beer. It's the sort of shop where customers can still hold weekly or monthly accounts and have their orders made up and delivered. One customer has had an account there since 1914. Young customers ask for advice and recipes, elderly customers come in for a quarter of a pound of butter or a couple of rashers of bacon. On occasions they have sold a single egg at a time. 81 02 18b

1981 You might suppose that the Cambridge Pianola Company is a dusty relic of the 19th century, but it was started less than five years ago. Pianolas are those 'magic' pianos that play all by themselves, the keys go up and down, prompted by machinery. They are in demand from pubs, clubs and hotels and the company stocks the world's largest range of pianola rolls. It also sells nickelodeons, player organs and pianocorders and helps people trying to restore their own pianolas with materials and spare parts. 81 04 10a & b

1981 Mainstop, a subsidiary of the giant British American Tobacco Industries, has its eye on the Cambridge Cattle Market site with an outline planning application for a £5 million scheme providing more than twice the space of Sainsbury's in Coldham's Lane. Mainstop already have a superstore in the new Orton 'township' being built outside Peterborough, an area quite different from the site in Cherry Hinton Road which is currently scheduled for light industrial development 81 05 07

1981 A £5 million plan for a superstore with space for nearly 600 cars on the old Cambridge cattle market has been scrapped. City councillors who were not consulted in advance laughed at the idea saying it was against their policy of only small-scale industrial development on the site. It also provoked fierce criticism from residents who felt the massive traffic it would generate could make life intolerable. The London-based development company has now withdrawn its application. 81 05 16

1981 The crack of blazing shotguns was heard for the last time at Madingley as Gallyons closed their shooting ground after 70 years. Ernie Johnson has spent his entire working life there and so after 44 years of teaching, advising and correcting the technique of sporting gunmen from all walks of life he is facing his first change of job. The site is surrounded by roads and cannot expand to stage big shoots. 81 06 19

1981 Johnsons, the menswear shop in Sidney Street has closed down after 150 years' trading in Cambridge. It started on its present site in the 1830s; the founder Octavius Johnson handed the business to his son and it passed down the family until Alfred Mole bought it. Cecil Mole who took over in 1930, said the shop's three employees had all found other work. 81 08 08

1981 Marks and Spencer's newly-extended Cambridge store includes a roof garden for staff. A three-course lunch in the staff canteen (with flowers on the table), costs 10p. A shampoo and set is £1.25 and a visit to the chiropodist costs 50p. There is a staff medical room and a dentist calls every six months to check teeth. Wages are not high – though the £64.50 a week gross pay for a full-time sales assistant is above the average - but there is a pension and profit-sharing scheme 81 09 03

1981 Jack Carter, the Portugal Place outfitters which has been hiring gowns, tails and dinner suits to students and townsfolk since 1937 is to close. Their lease, owned by Jesus College, has

run out and the rent has trebled. The business has been hit in other ways – last year they sold just six gowns because colleges now buy their own supplies, and there are not as many formal functions as previously. 81 09 22

1981 Wards have been in Cambridge for more than 70 years, originally making and selling cycles. By the 1930s they were involved in electronics, making their own wireless receiver, the Wards Three Valve. In the 1950s they expanded into communications, selling televisions and other electronic equipment, moving from East Road to a new shop in Burleigh Street in 1965 with another in Bradwell's Court. At its peak in the 1970s they won contracts with Iraq and the Defence Ministry. Now it will close for the last time. 81 10 09d

1981 The closure of Wards, means another long-established name will disappear from the streets of Cambridge. Recently Jack Carter, the outfitters in Portugal Place announced it was to close, before that Johnsons menswear shop in Sidney Street decided to end 150 years of trading and last year Walker Wallpapers, a family firm for nearly 60 years also called it a day. Reasons vary from rising rates and rent bills to increased competition or simply that the old family has run out of members. 81 10 09e

1981 Shocked traders at Cambridge's Beaumont Centre in East Road have been given notice to quit, just weeks before Christmas. The indoor market, which was gutted by fire six years ago and reopened after a £100,000 facelift, is to be closed down and demolished. Now they are desperately searching for new premises to try and keep their businesses going. 81 11 05a

1982 traders deserting Magdalene street in face of rent rises up to 4 times present level [446.14.2]

1982 Boots open extended shop, Petty Cury [7.9]

1982 Gallyons close Cambridge shop after 198 years, closed Madingley shooting ground (est 1911 to improve shooting) in 1981) [8.15]

1982 W.Thompson & son, Fitzroy St, furniture closes after 150 years, started 1832, retirement, sons uninterested [10.1]

1982 Alkit, the Cambridge menswear shop in Regent Terrace is shutting after 35 years as the lease has run out. Staff who have been given two weeks' notice say trade has fallen off recently. The Citizens' Advice Bureau offices and a flat used by University Arms Hotel staff may also be affected because they are sublet from Alkit. 82 02 19

1982 Friar House gift shop – 82 02 11

1982 Traders are deserting Magdalene Street in the face of rent rises up to four times the present level, imposed by their college landlords. Several shops already have whitewashed windows and locked doors. Within a year, less than one-third of the original row could remain. Magdalene College says they want to keep it a specialist shopping area but have to get the market rent. 82 03 23 & 23a

1982 One of Cambridge's first self-service grocery stores, Traylen's of Newmarket Road, is to concentrate on the butchery side of its business. Before the War the shop had its own slaughterhouse on the premises and cattle were driven along the streets from the market. But the opening of Elizabeth Way, increasing traffic and parking restrictions mean customers have found it hard to get to the store 82 05 27 went self-service 22 years ago but now Beehive kills trade [9.10]

1982 W. Thompson and Son, the Fitzroy Street furniture firm, is closing after 150 years' trading in Cambridge. It started as a cabinet makers in Willow Place in 1832 and a fully-fledged furniture makers and sellers had been established by 1881. They had an undertakers' business for years, as well as selling china wholesale. But Peter Thompson says their style of business was becoming outdated: customers were now more conscious of price than quality with big warehouses changing the way furniture is sold. 82 08 24

1983 “Goodbye to the little stores” : faced with massive increases in overhead costs they can no longer continue to trade; as the family shops close with them goes part of Cambridge’s inheritance, atmosphere & charm. The goods they sold & the services they offered are often not obtainable elsewhere & are usually replaced by fashion, jewellery or shoe shops, all branches of national concerns [11]

1983 Bacons closes, came Cambridge 1810, moved Rose Crescent 1830 [7.14]

1983 Grays bookbinders sold - latest in long line small specialist shops - Bacon Bros, Ora tobacconists, Gallyon & sons, F.O.Sennitt, 3 ‘r’s - rent, rates, recession [6.9]

1983 W.Stockbridge & sons to close (centenary 1970, moved Cambridge 1874 in Sidney St, moved Bridge St c1854) [10.6]

1982 “Kite scheme will see some of the best known names in the chain store world doing battle with family firms which monopolise city centre” [1.15]

1982 Laurie & McConnell site taken by Habitat, closed 5 years [13.1]

1982 Tesco double size Bar Hill, close Cambridge “left behind by developments in supermarket design & lack of parking [14.7]

1983 The closure of Stockbridge’s 113-year-old antique shop in Bridge Street follows closely on that of another shop bearing the same name. C.P. Stockbridge of Histon set up two years ago when the other branch of the family left its prime site on King’s Parade. The main reason for closure is that the antique trade is depressed and the new shop never took off. 83 07 06 p5

1983 Tesco is to close its Cambridge Regent Street supermarket. The store, which opened in 1964, has been left behind by developments in supermarket design. Managers now consider it too small – it is 11,000 square feet as compared to 30,000 at Bar Hill – and there is no provision for car parking. It would need a major refit to bring it up to modern standards and this could not be justified. 83 09 21 p16 83 09 22 p5

1983 Gray’s the bookbinders of Green Street has been sold, the latest of a long line of small Cambridge specialist shops which are rapidly disappearing.. Victims in recent years have included Bacon Brothers cigar merchants, S.P. Ora tobacconists, Gallyon the gun and fishing tackle dealers, F.O. Sennitt, fish, game and poultry merchants and Jack Carter, University robes. They are forced out by the three R’s – rent, rates and recession. As the family shops close with them goes part of Cambridge’s inheritance, atmosphere and charm 83 09 29 p16

1983 The new Grafton Centre, the biggest shake-up in Cambridge retailing for a century, is only medium sized in terms of city centre redevelopments but is enough to upset the balance of trade in Cambridge. “No one would pretend that it is linked to the existing shopping centre to the extent that people can use both on the same day”, said the man in charge of the project for Grosvenor Estates. The next six months trading will be keenly watched by shops in the historic centre. The attractiveness of the Grafton Centre will depend on easy access and whether it offers value for money and diversity. They have accepted lower rents in order to get shopkeepers which cannot afford big overheads. 83 10 11 p11

1983 Shopkeepers in Burleigh Street feel they will be crippled by the opening of the Grafton Centre. Trade has been disastrous since the road was dug up five weeks ago and left with piles of sand, rubble and deep, wide holes. Now some are refusing to pay their rates bills. They feel developers want to make the area look like a tip so customers would stay in the Grafton Centre. But the City Surveyor says the road is going to be pedestrianised and will be completed on time 83 10 20 p16

1983 A quarter of a century of planning wrangles ended today when the £27 million Grafton shopping centre development opened. Part is still unfinished but there was a general sense of relief that the Kite at last had its new prestigious shopping development. It looks slightly bare as many of the shop units were still unfilled however shoppers seemed happy as they walked through the new arcade of the main concourse. 83 10 20 p1

1983 The new Presto supermarket in the Grafton Centre caters for a wide range of customers with its instore bakery, fresh meat, wet fish and delicatessen counters offering an up-market choice alongside a wide range of Red Dot bargain lines and specially-packaged basics. What its competitors want to know is what kind of shoppers it will attract, and how many. It will offer a cheque-cashing service where customers can withdraw £50 at a time 83 11 06 p5

1983 An old Cambridge family business which closed 20 years ago is being 'revived'. Matthew and Son was once a prosperous department store founded in the 1830s in Trinity Street with its own tea rooms and restaurant. It closed in 1963 because of high rents but now the great-great-nephew of the founder, Michael Matthew, has started up the tea and coffee business again in much humbler surroundings of a market stall 83 12 13 p12

1983 Vogue, one of Cambridge's most distinctive fashion shops is closing but for them a closing-down sale does not mean a wild scrimmage as customers fight over coats and dresses. Instead a locked door keeps the bargain-hunters out on the pavement while staff deal with two or three clients at a time. Vogue first opened in 1934 when Mark Harris set out to build a high-class trade which today means dresses of up to £500 in price. They are the top fashion house in East Anglia but soon the old shop and its garden will disappear. His father opened Modiste in a former public house further down St Andrews Street in the 1920s and all of his six brothers and sister were in business in Cambridge. 83 12 19 p5 [13.3]

1984 Colin Lunn tobacconist, opened 1899, 50 years ago Cambridge boasted 40 tobacconists, with demise Bacons this only one [8.9]

1984 Own Roe, the St Andrew's Street antiques dealer, is the latest in a line of specialist private shops owners to be driven out of the centre of Cambridge by massive rent rises. His great-grandfather started in business at the corner of Christ's Lane in 1822 but that shop was pulled down to make way for Bradwell's Court in the 1960s. Recently E.J. Pigott (tools) left Sussex Street after nearly 50 years and now the Granta Wool Shop is concerned about a rent review. Model Mania in King Street has also moved 84 11 02 p8 [7.2]

1984 The redevelopment of the huge Co-op site in Burleigh Street has been beset with problems ever since the first report on Cambridge shopping in the fifties. Now it has transformed its flagship store inside and out, demonstrating its faith in the twin shopping centre concept. It says much for the Co-op's business acumen that it has kept pace with the latest trends, adapting to the needs of the times and retaining a hard core of loyal support from its members. 84 11 14 suppl6 [13.6]

1984 "late night shopping is here to stay" [7.3]

1984 Cobblers Yard 'forgotten courtyard' [446.15.2]

1984 It is exactly 50 years since Marks and Spencer moved into Cambridge at a time when there were major alterations in the narrow Sidney Street which attracted several major stores. It quickly established itself, extending to 10,000 feet in 1937 and doubling its space in 1966. There was further development four years ago when a third floor was added. In 1965 the firm established a warehouse in a former garage in Occupation Road previously owned by Progressive Coaches. Now they are appealing for memories from previous members of staff for a special display 84 03 30 p24

1984 The Queen gave her royal seal of approval to Cambridge's multi-million pound Grafton Centre when she unveiled a plaque to mark its official opening. Cheering crowds queued for hours to glimpse her. A fanfare performed by the 20-piece orchestra from the Manor School greeted the royal party. After the opening the queen spoke to many of the children and shop staff. 84 05 16 p12 [1.10]

1984 Cambridge's oldest greengrocer's business, Naylor's of Mill Road which has been trading since January 1900 has closed. It was founded by William Thomas Naylor who moved from his family's farm at Duck End, Guilden Morden. Before long he had opened a second shop, now a delicatessen and a greengrocer's in Norfolk Street. The Mill Road shop had a better clientele in

those days. Many of the houses were owned by fairly wealthy families. Now they are let as bed-sitters and most of the custom has been from students. Doctors and maternity hospital staff were good customers but the hospital has now closed. Courgettes, kiwi fruit and aubergines have joined traditional English products in recent years 84 09 28 [7.1]

1984 Ninety years ago a shrewd and enterprising woman was born, Mrs Catherine Holland. Her first husband died young and she needed to make a living by supplying yeast which was much in demand among the many local bakers. Although vital it was only used in minute amounts so Mr Holland was able to cycle around making his deliveries. The yeast was supplied in huge sacks and the secret was to keep it fresh by selling it in small amounts at regular intervals. For a long time the business was continued in the family home in Sedgwick Street but during the First World war they got the sole agency for a major brand and moved to Mill Road. After that the business prospered 84 10 01 p15

1984 Pigott's, the Cambridge hardware chain has closed its central branch in Sussex Street. They have been in the street since the 1930s and always did a good trade but had increasingly severe problems with parking and with wholesalers getting to the shop. Then a rent review was the final thing, the manager said.

84 10 08 p7 (celebrated centenary 1963) [9.8]

1984 Salisbury's newly-restyled store in Petty Cury is just what Cambridge needs. It is one of their latest generation, combining fashion, function and fun. For many years the Salisbury name stood for leather handbags but perhaps mother and grandmother didn't carry so much around as girls today – maybe she didn't go out to work, read so much, do aerobics, jog, drive or make herself up as frequently! Now there are casual bags, executive cases and travel bags as well as umbrellas, hats and knitwear. From the moment the doors opened customers have been pouring in. 84 12 14a & b

1985 Millers Yard £3M courtyard office & shop development [446.14.3]

1985 Mill Road once one of city's largest & thriving shopping centres ... shops closing & take-always springing up [446.14.4]

1985 Bodgers founded 1851, moved Sidney St 1934, sold as going concern, freehold worth £800,000 (which affects rents chargeable elsewhere) [7.10] Bodger's, one of Cambridge's oldest-established university menswear shops which has been on the corner of Green Street and Sidney Street since 1922, is up for sale as a going concern. It is a very prosperous business employing ten full-time staff but the most valuable part of the concern is the freehold of the shop. It includes sales areas on two floors, a cutting room and canteen together with an attached doctor's surgery with a separate entrance and is valued at £800,000. 85 10 02

1985 Bays & son, hatters Kings Parade, 200 year old firm, rents tripled, taken over by New & Lingwood [7.12]

1985 Eight years after Laurie's doors closed forever, the tiers of galleries round the central well which gave the old store such a distinctive character will be alive with shoppers once again. On the official opening a band will once again occupy the bandstand on top of the building in Fitzroy Street. Traders are hoping that the arrival of Habitat will bring an influx of new shoppers to boost the whole area. Sofas are their best-selling furniture line in a range which includes lighting, self-assembly kitchens and fabrics. 85 10 23 Habitat opens in old Lauries shop [8.13]

1985 D.Muncey jewellers centenary [9.1]

1985 Mr Douglas Winton-Smith who headed the Cambridge sausage and pie-making firm of Winton-Smith Ltd, has died aged 72. The company was set up by his father and taken over by a London businessman in the 1960s. Production continue at Winton Smith (Foods) Ltd until the Cambridge works closed 11 years ago and moved to Cheshire 85 01 03

1985 The closing down a Scurfield's shop must bring a sense of loss to anyone who has brought up a family in Cambridge. It catered for all the basic essential of kitchen life – a little brown teapot, storage jars and black casseroles like benign witches' cauldrons. Then there were

the mugs from the earthy pottery mugs to the bold primary colours of 1984. Another joy were the cookery books from the original George Scurfield's basic primer on the baking of bread to the classics of today – Ken Lo and Madhur Jaffrey 85 02 01a

1985 Pipe smokers and cigar lovers will welcome a specialist shop which will fill the gap left by the closure of Bacons in 1983. Harrison and Simmonds, which was founded in Bedford in 1928, is taking the shop at 17 St John's Street, Cambridge. The fixtures and fittings have the traditional look offering a standard of service that matches the timeless quality such a store should have. Customers will be able to try tobacco from all over the world labelled with Dickensian names such as Barnaby Rudge and Pickwick and the shop offers hand-blending to give the pipe smoker optimum choice and also stock a wide range of fine pens. 85 03 21b

1985 Cambridge could soon get a third new superstore competing with Tesco at Bar Hill, Sainsburys in Coldham's Lane and the Beehive complex off Newmarket Road. Asda plans to build a huge new complex on Milton Road opposite the Arbury and King's Hedges housing estates. It would take up almost half of the Cambridge Business Park and include a 750-space car park 85 08 08

1985 One of Cambridge's oldest family butcher's is closing. Derek Traylen's grandfather opened the first shop in Newmarket Road 113 years ago. They had their own slaughterhouse until 1937 and ran three butcher's vans that toured the villages. Derek started in 1938 and is one of the few people in the business who can rear animals, slaughter them, dress them, cut and prepare them, advise people about them and cook them. But people now buy pre-packed meat in supermarkets 85 08 21

1985 For almost 200 years every gentleman of Cambridge popped in to the little King's Parade shop of Bays and Sons, the hatters. It was started in 1787 and the present shop was built in 1825. It was a traditional firm and never followed fashions. Each time the demand for hats dropped they added another line and eventually sold more blazers, trousers and boaters than gowns and hats. But rents tripled and the premises were taken over by New and Lingwood, shirtmakers. Now with the retirement of Jimmy Bays, the family link has been broken. 85 10 28

1985 Sally Ann's, Cambridge Salvation Army's highly successful charity shop set up five years ago is now open for business at its new home on the site of the former Fine Fare supermarket in Mill Road, having moved from the Tesco shop in Regent Street. It sells everything from bric-a-brac to books but also has second-hand furniture such as wardrobes, dressers, beds and three-piece suites. These can be used to assist 'distress cases' where a family urgently needs furniture. About 100 volunteers price the items, launder and iron the clothes and operate a delivery service but more are desperately needed to keep up with all the jobs that need doing. 85 11 22b

1986 Plans for Trumpington shopping centre revived, Marks & Spencer & Tesco propose double superstore [7.4,7.5]

1986 Tesco propose store at Milton, Asda propose Milton Rd [7.5,7.6]

1986 5th superstore plan in 10 months - Arbury camp [7.6]

1986 plans convert Gt St Andrews into shops [7.7]

1986 Woolworths close 5 weeks for facelift [10.10]

1986 Co-op plan £6.5M superstore Beehive site approved [13.7]

1986 Sainsbury to expand Coldham's Lane [14.5]

1986 The Cambridge Plate-glass Mutual Insurance Society which has helped traders for 135 years is to be wound up. Membership has shrunk to less than 30 as many local shopkeepers have given up trading and the large chain stores do not insure at all. It was formed in 1851 when plate glass was replacing small paned windows of the Georgian days. Then the most frequent cause of breakages was by a gas light but lately traffic accidents and vandalism have been the main problems. 86 03 14a

1986 The newly-extended Marks and Spencer store in Cambridge includes a staff canteen with flowers on the table, where a three-course lunch costs 10p. A shampoo and set in the staff hairdressing salon costs £1.25 and a visit to the chiropodist is priced at 50p. A Doctor attends the staff medical room weekly with a dentist each six months. Wages are above average at £64.50 for a 38-hour week with a profit-sharing scheme. The store has no difficulty recruiting staff with 800 applicants for 90 new positions. 86 09 03

1986 Jack Carter, the Portugal Place outfitters which has been hiring gowns, tails and dinner suits since 1937 is to close. The shop's lease, owned by Jesus College, has run out and the rent has been trebled. The business has been hit in other ways: last year they sold just six gowns because colleges now buy their own supplies and there are not as many formal functions as previously. The remaining stock will be sold off at the start of the new university term. 86 09 22b

1986 Cambridge Toy Shop, which has been trading for almost 20 years, is planning to close at Christmas. They blame rent increases 86 11 05a

1986 Cambridge Co-op's new Beehive Centre is the first step in a major redevelopment scheme which is going to give the city a shopping complex for the 21st century. They have obtained additional frontage on to Coldham's Lane including the former Eastern Gas Social Club and will construct a roundabout to ease traffic congestion. The shop has been given a bright new image with additional departments and specialist services including the Kauffman Hair Salon, G & H Kitchens and BMB Windows. 86 11 18

1987 Barretts leave Cambridge (started 1782), one reason parking [7.13]

1987 3 superstore plans - Sainsbury at Arbury Camp, Tesco at Milton, Asda at Milton Rd business park [NS2.5]

1987 "Cambridge is doomed as major shopping centre unless it can cure parking problems" [20.7]

1987 A vast new shopping complex, described as the largest and most exciting of its kind for many years, has been approved by planners. The joint Co-op and Texas Homecare development on the Beehive site of Coldham's Lane will enable Cambridge to compete with other major shopping cities like Peterborough and Bedford. It will comprise a large supermarket and extensive do-it-yourself store with parking for 1,100 cars. The existing Home Interiors building and garden centre are already being enlarged. Texas will leave its building at the nearby Coral Park trading centre when the new one is ready 87 10 07

1987 Joshua Taylor, the 127-year-old Cambridge department store is up for sale. The Taylor family say they can no longer carry on in the face of fierce competition from national shop chains. The sale is expected to excite nationwide interest. Three factors have brought about the decision: the need to refit the two shops, a rent review due in 1990 and pending changes in the rating system. The retail market is fast changing and premises must be constantly upgraded. Ironically the present year has been the best they have ever had 87 10 27 & a

1987 Joshua Taylor history – 87 10 28a & b

1987 A multi-million-pound shopping, hotel, cinema and parking project planned for south Trumpington by Marks and Spencer and Tesco has been scrapped. The vast hypermarket-type development attracted more complaints than any other single planning application ever made in Cambridge. It would have been on green belt land, where building was banned, and the city had shown no support. Residents say this is a wonderful day and there will be great rejoicing in the Trumpington area. 87 10 27 Trumpington multi-million shops complex called off

1987 Barrett's China and Glass shop in St Mary's Street is to close after 200 years in Cambridge with the business transferred to Newmarket. The owner says that the appalling parking problems are one factor for the move. In January a city centre gift shop and a doctor's surgery both moved out for the same reason. The Parsley Pot shop in Lion Yard has also closed. The Managing Director of Eaden Lilley has warned the parking crisis in traffic-choked Cambridge could only get worse. 87 03 14

1987 A new-look Co-op has come to Cambridge with the refurbishment of the old premises in Burleigh Street producing the latest of the Society's Homemaker stores. Although it now occupies only the ground floor it has a more modern look and concentrates on electrical goods bringing it more in tune with the Grafton Centre. None of the staff have been made redundant though some have moved to the Beehive site. 87 09 29a, b & c

1987 Your new Debenhams is here at the Grafton Centre! Step into a new shopping experience and discover the delights of Debenhams. Floor upon floor of fashion and home furnishing to please both eye and pocket. And to celebrate our opening we've some really special offers including a range of fondues, Meyer Tensi Cookware, Oneida 44-piece stainless steel canteen (£149), Royal Doulton 'Delphi bone china 18-piece tea set (£75). Late night shopping Wednesdays till 8pm. (Advertisement) 87 11 03b

1988 Joshua Taylor, one of Cambridge's most prestigious department stores has been sold. The new owner, London property developers Arlington Security plans to retain the name and upmarket image. Each of the 160 staff have their jobs guaranteed and will get an average loyalty bonus of £1,500. Included in the deal are the main Sidney Street shop, the Bridge Street houseware shop and the Taylor family's academic robe-making business. The deal ends three months of doubt over the 128-year-old store's future following the Taylor family's decision to sell up in the face of fierce competition from national chains 88 01 26

1988 Major refurbishment work has been completed at Cambridge's long-established department store. Joshua Taylor opened his first shop in Ely in 1810 which continued until 1923. His son started in Sidney Street Cambridge in 1860, spreading to Bridge Street in 1955. It became a household name to shoppers, symbolising a traditional way of life. This will continue say the new owners Arlington Securities who plan 'an exciting future' for the shop. They have retained the elegant sweeping central staircase and now with expansion and financial backing, the future looks rosy. 88 04 21c & d

1988 Eaden Lilley history feature – 88 05 26

1988 A.A. Roper's traditional tailor's shop in Trinity Street is closing after nearly 80 years and three generations of trading. Stanley Roper, son of the founder Arthur, is retiring as is 77-year-old

cloth-cutter Fred Bland who is irreplaceable – his is a dying craft outside London. David Roper is sad to close the shop but says “It is not like before the war, when we used to make suits for five guineas – today the same suit would cost £300” 88 07 23a

Bodgers to close after 138 years - founded 1851 - due soaring interest rates & difficulty recruiting staff; was bought out by Shepherd & Woodward 1985 ¢CEN 27.6.89

1989 Ede and Ravenscroft is a firm where you can still find tailors leaning over tables, hand-cutting and hand-stitching gowns and suits. They are the only bespoke tailors who make garments on the premises in Cambridge. There is even a sports coat they made in the 1950s which a client brought back to be repaired. This is the reason top professionals, the wealthy and the peerage are willing to pay upwards of £500 for one suit. Quite simply, they last and you still get your own name tag carefully stitched into a pocket. There has been a tailors shop on the site for more than 200 years. Part of the original opaque glass door of James Neal’s – the shop they took over 10 years ago – is still displayed 89 06 16 & a

1989 Bodgers the outfitters founded its reputation on old-fashioned courtesy and service, specialising in the sale of traditional clothes for traditional gentlemen. For 138 years generations of both town and gown have visited its respectable Sidney Street premises. But the shop, founded in 1851 is to close because of soaring interest rates, four years after it was bought by rival company Shepherd and Woodward of Oxford. The site is one of the only central freeholds not in college hands and is a prime site for speculators. 89 06 27

1989 city advertises car park prices to entice shoppers back ¢CEN 13.7.89

1989 planners approve phase 2 expansion Grafton Centre ¢CEN 18.7.89

1989 Co-op chiefs have been forced to sell off the freehold of their Burleigh Street store to fend off a cash crisis. The Victorian building has been sold to a London Investment Company and they will lease back the premises. The Co-op began trading in Burleigh Street in 1908 but has been hit by soaring interest rates on loans taken out to cover major projects such as the massive Beehive Centre. It has already put branches up for sale in Mill Road, Milton Road, Waterbeach, Duxford & Cherry Hinton. 89 11 21

1989 W & G Taylor of Trinity Street, one of Cambridge’s oldest family menswear shops, is closing after 809 years of business. The firm started when George and Walter Taylor (no relation) who both worked at Ryder and Amies, decided to set up in business together but now a threefold increase in the lease is simply beyond their means. The shop describes itself as a gentleman’s outfitters and specialises in hats. Bowlers for Cambridge colleges have been a regular line of business. 89 12 14

1989 The closure of W & G. Taylor is the latest in a line of small stores squeezed from the city centre by rocketing rents. Two other men’s outfitters, Ropers and Bodgers closed this summer.

Another famous shop which closed six years ago in the face of mounting rent and rates was Bacons in Market Street. The Parsley Pot in Lion Yard, Cambridge Fine Jewels of Emmanuel Street and upmarket furnishers, Johns, left their Bridge Street premises for Histon Road last year blaming the traffic chaos and high parking charges 89 12 15

1885 new Cattle Market opened [NI.1.6]

1885 Cambridge Cattle Market opened 100 years ago. Before 1885 it was held at Castle End but the stalls were inadequate for the number of beasts. Then Jesus College provided land near the railway station. Cattle docks from all four railways were within two minutes' walk and there were direct railway links to Scotland and Ireland. There are still weekly sales of stock, with horse sales every five weeks, but the area nearby that was used for grazing is now the Clifton Industrial Estate. It is filled with large corrugated boxes housing a wide variety of light industry and a 'Park and Ride' site 85 09 27

1888 agitation for covered market at Cambridge [1.17]

1889 Royal Commission on Market Rates & Tolls enquiry [1.18]

1897 A memorial from certain inhabitants of the Cambridge in favour of covering the Market Hill with a permanent covering of iron and glass was read by the Town Clerk. Coun Nichols

thought the state of their present market was a disgrace to civilisation. They were paying at least L400 a year for putting up and taking down those wretched wooden structures and the cloths that covered them were of no use whatever. Mr F. Morley did not believe in the Corporation entering into competition with the shopkeepers of the town and driving the trade into the hand of people who paid no rates. Mr Campkin felt the question of a covered market elsewhere was too serious a matter for them to consider for many years to come. (The council voted against the proposal CDN c 15.4.1897

1897 Cambridge Market Committee recommended that a new form of market stall known as the "Diamond Stall" be erected on Market Hill. Mr Nichols remarked that the long vexed question of covering in the market was the objection to a permanent structure being erected on Market Hill. They were paying now £850 per year for putting up and taking down all those wretched stalls and their repairs. At some length he described the advantages to the town that the scheme would bring about, amid some manifestations of impatience on the part of the Council c1897 12 11

1900 In 1885 a large cattle market was erected & shortly after some buildings were erected for providing refreshment for those who required it. These were very small & now the Star Brewery wished to erect a commodious hotel with 10 bedrooms which would be used to put up those who came to the market to buy cattle. At the present there was no accommodation for Irishmen attending the market. Many come on Friday night with their stock & it was necessary for them to be constantly attending to them. It would be put a considerable way back from the road and have space for 50 to 70 horses. The nearest hotel was the Great Northern but it had only a few beds so they had to go to the Red Lion in Petty Cury. CDN 1900 08 22

1901 The Star Brewery renewed its application for a proposed new hotel on the Hills Road, adjacent to Cambridge Cattle Market. There were farmers, dealers in cattle coming from Norwich and Essex who regularly attended the market, coming by train. It was desirable that they should sleep on the spot and take care of the cattle. Mr Grain said there was opposition from Homerton College, a ladies college. What on earth they opposed for he did not know. None of those young ladies, he was sure, would go near a public house. CDN 1901 08 21

1908 A singular accident in which a taximeter cab played a singular part occurred in Peas Hill. The lamp of taxi cab number 214, driven by a man named Darby, caught the awning connecting a couple of stalls and there was a general upset. The stall of Mr Reynolds was practically demolished and the sweets strewn about with the result that a number of boys had a scramble and pocketed as much as they could. The adjoining drapery stall of Mr Nicholls fared better. The affair caused a great deal of commotion CWN 08 11 13

1909 There had been an outcry after Cambridge Corporation destroyed eight tenements when improving Northampton Street. Now they wanted to erect houses for persons of the working class on land in Albion Row, Lady Margaret Road and the Haymarket. Some would be on the site of the old cattle market. This had previously been moved to St Andrew's Hill, then in 1842 to Pound Hill and in 1887 to its present site near the railway station, an Inspector was told CWN 09 07 09

1909 Councillors considered a police report on the auctioneers or cheap-jacks who visit Cambridge Market Hill on Saturday evenings and the Peas Hill in daytime with 'mock' jewellery. It was agreed such persons be not allowed and that in future 'Hoop-la' stalls be not allowed on Market Hill. A suggestion from the Cambridge University Automobile Club as to the placing of mirrors at the Bridge Street end of Jesus Lane was rejected. Drains in City Road and Eden Street were a nuisance and injurious to health, owners should do the necessary work or it will be done by the Surveyor and charged to them CWN 09 11 26

1911 number of stalls reduced by 62 from 250 & roads around square widened [1.24]

1911 Stall holders on Cambridge Market have been troubled by repeated small thefts. The elusive genius of the pilfering urchin is well known but Cambridge boys have resorted to other devices. One favourite plan is for two boys to walk past and for one to throw the other's cap on the stall. In recovering the cap the boy generally manages to get an orange or two underneath it. Another is for a boy to have a piece of wood with a nail on the end and to spike an apple or other fruit with it. The police have been keeping a sharp look-out with the result that a lad of 14 was arrested for stealing nougat from Mr Careless's sweet stall. 11 01 13g

1919 Open mart for sale of fruit and vegetables under auspices of Cambs Fruit and Vegetable Society in Bridge Street; first auction – 19 08 20h

1919 Sale of army horses at Cattle Market. The present shed was erected in 1908; Grain & Son increasing their horse sale but object to them allowing purchasers to try horses and mules in harness on Sundays – 19 09 03a

1926 Cambridge Borough Surveyor submitted four schemes for the lay-out of land at the Cattle Market. The site comprised 11½ acres and was purchased about 1884 from Jesus College. The west side was used for vehicles of those attending the market, the east side was partly used for allotments and the question had arisen of developing part for conveniences, a free library and an abattoir, which was most important. The Railway Company wanted to provide up and down platforms at the station. It was unlikely the bridge would be widened for railway traffic was decreasing c26 11 96

1928 An inquiry was held into proposals to alter the charges for stalls on Cambridge market. There were 112 stalls, 64 of which were interior stalls but some, particularly those at the four corners of the market were more valuable than others. The present charge was 2s. 6d. per day and it was proposed to increase it to 6s. 10s for corner stalls, with frontage stalls increased to 4s.8d and the interior stalls raised to 3s. 4d. But the proposals had not been received with enthusiasm by the traders. c28 01 22 [1.26]

1930 Sir – we Cambridge market traders notice that Councillor Longley wants to move our stalls into the Corn Exchange but we challenge him to produce a transferred market that has been a success. He wants to replace the stalls with car parking spaces. Can not he see the utter foolishness of congesting the very centre of a town with cars. Those on Market Hill consist of business townsmen, clerics and travellers who sit in their expensive car, eat bread and cheese, beg an onion to go with it but do little business. The Market Hill and Peas Hill are open-air markets. An arcade was tried years ago. The building stands today, a sorry sight, in St Andrew's Hill. The stallholders all failed – W.J. Sambridge. 30 02 25 [1.3]

1934 Merchants at Cambridge Corn Exchange traditionally end the year by throwing about samples of their wares. The signal for the commencement of the battle was the explosion of a cracker near the door. The 'firer' was immediately bombarded and soon covered with flour, wheat and artificial manure. Crackers banged merrily, bags burst with marked effect and very soon all the dignified corn-merchants were life-like imitations of snowmen. Even the rather grim-looking statue of Jonas Webb looked comical with the flour-bag headgear that was placed on it. After 30 minutes the ammunition ran out and combat ceased, though the debris-covered floor was witness of the fight that had been in progress. 34 12 17a

1936 Cattle Market needed modern facilities and expansion – 36 07 30d

1942 agricultural machinery sales begin at Cattle Market ; livestock market started Hills Road about 1884-87 (=1886), started Castle Hill, moved behind Hills Road & to Cherry Hinton Road; pre war scheme to rebuild whole centre but war stopped [3.16,4.8]

1948 The death occurred on Monday of Fred Markham, familiarly known as "Cuthbert". He will be missed by many stallholders in Cambridge Market Place where from early morning till evening he could be seen, either pushing his barrow or at times helping to hold down stalls in squally weather. Farmers, cattle dealers, auctioneers too, will miss him both at the Cattle Market in Cambridge and throughout East Anglia. "A very sociable man and a good mixer" would describe his personality. He was an ex-cavalry man, and had much foreign service to his credit. He was 56 c48 05 07

1950 Cambridge's chief sanitary inspector says the stalls on Market Square are unnecessary. "We don't like these open-air stalls at all, and I don't see that in 1950 we need them at all. I think it is an anachronism". Questioned about dogs that 'wet and sniff all over the place' he said he had spoken to stallholders and asked if they did not realise that people had to eat vegetable which had been fouled by dogs c50 01 13

1951 Cambridge councillors heard that the cattle market has become one of the most important cattle centres in the country as a result of the great increase in the amount of business transacted since the war. Problems had arisen because of the serious congestion of traffic in Hills Road when large sales are held and the need for better facilities for traders and customers. It was not designed for holding large sales of agricultural machines nor for the provision of parking accommodation for upwards of 1,200 motor vehicles c51 06 15

1952 Within the last 60 years Cambridge Cattle Market, once one of the smallest in the country, has become one of the largest. When the Mayor opens the latest addition – the new store cattle sale yard with its covered-in accommodation for about 500 people and penning facilities for upwards of 1,000 head of cattle – it will mark the beginning of a new era in which the Cattle Market may well become a national centre for livestock sales. The present market was opened in 1885 and until 1912 was small; by 1939 it was handling 200-300 fat cattle, 1,000 sheep and 500 pigs a week. c52 11 01

1952 The Mayor of Cambridge auctioned ten first-cross blue and white store pigs for the good price of £7 5s. He was opening the new sales yard at Cambridge Cattle Market. They were 12 months overdue due to difficulty in getting steel because of the Government's re-armament policy but were part of the council's plans to make it one of the best in the country. "We hope these extensions will make producers send more cattle and livestock and thus attract buyers from all over the country", he said. They were awaiting Government policy on the question of an abattoir and there was a move to start a wool market. c52 11 05

1955 At the last two sales of machinery at Cambridge Cattle Market there has been considerable congestion in all the main roads and residents complained that nearly 600 cars had been parked in the streets in addition to more than 1,000 in the market car parks. The City Surveyor suggested demolishing loose boxes and a Nissen hut to provide 250 more spaces. The machinery sales were probably the largest in the world attracting buyers from overseas. About 250 tractors were refused for sale owing to the lack of space. 55 04 26

1959 David moves his Saturday stall from Peas Hill too Market Place, most of others went some time before War [2.3]

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Market stall holders are among Cambridge's most colourful characters. Many have taken over the stalls from their fathers or grandfathers, often reaching back five or six generations. There are a handful of names which provide the nucleus of the traders – Whitehead, David, Sharp. Reynolds, Simpkins and several others. Charles Whitehead has stood at his greengrocery stall since he was 14, Messrs Miller and Beresford are in charge of the pets stall and Mrs Sharp has been selling old silver and brasses for 52 years. They believe that as long as they are straight and fair in their dealings, competition cannot harm them – 60 12 30b

1961 A new car park attendant's hut has been installed on Cambridge Market Square. The original hut was badly damaged by fire during the Guy Fawkes celebrations two years ago and replaced by a temporary one. It is expected to be in use later this week 61 07 12

1961 Claude Kirkup became manager of Cambridge cattle market in 1936 and has seen tremendous changes. He can remember the days when sheep and pigs were brought to the market in tumbrel carts or by horse and cart. With the advent of motor traffic the market increased ten-fold and animals now come from a very wide radius. Many Continental buyers attend the Monday agricultural machinery sales. 61 11 23

1962 King Street poultry & produce mart to close after nearly 50 years due to rent increase [3.17]

1962 Sir - Cambridge fruit costs more on Cambridge market than in London since most cannot be sold locally at any price and is sent to larger towns. Good apples from Histon sold in Manchester for a shilling per half bushel. But expenses consumed 10d and the grower got only 2d. In his own market the grower tries to sell at remunerative prices. The only people who can sell cheaper than market traders are the hawkers. There are dozens of large lorries that hawk all over Cambridge and pay not one penny towards the expenses of the town. Yet market stallholders have to pay a very heavy toll – John Hall 12 09 13f

1964 produce market now open Cattle Market, for nearly year without market after King St closed [3.18]

1964 At 84, Harry Capon is the oldest stallholder on the Cambridge market. He sells the same type of fancy goods as when he first set up the stall at 16. "Every Monday and Saturday I get up at 5.30 and load up the trolley with the goods and pull it from my house in Coronation Street. I set the stuff out on the stall then it's sell, sell, sell until 6pm when I start to pack up. Again another hour or so to load the trolley and then back home to bed about 9 pm. Two days a week I go up the London and the warehouses; I often get a lift with a fruitier and he leaves me at Hyde Park Corner on the way to Covent Garden", he says., adding "The market is slowly dying ... fewer people and fewer stalls" 64 01 24

1965 The new corn market building on the Cattle Market site will replace the old Saturday corn market held in the Corn Exchange. Merchants have been advocating a move for 10 years and now it is hoped the market will revive. An encouraging number of people want to take stalls. The cost of desk or box in the new building is £10 a year. People who attend to buy or sell are charged £3 for an annual ticket. Visitors are admitted free. It will also provide a small new hall for the Cherry Hinton Road – Hills Road district 65 03 27a

1965 new £8,000 corn market opened Cattle Market, marks end of trading in Corn Exchange , trade sinks to zero, a white elephant [4.1.4.3]

1965 Fruit and vegetables for Cambridge brought from London markets by Whitehead and Pordage – feature – 65 09 16a

1967 plans to move Cattle Market to Milton Road [4.2]
1967 tubular stalls proposed for Market which removable for weekend car parking [4.4]
1967 Trading at Cambridge Corn Market on the Cattle Market site has sunk almost to zero and the specially designed £8,000 hall launched two years ago is tottering towards its doom. Council was under legal obligation to provide a new corn market once they decided the old one was not viable. 47 merchants said they wanted a stand, it opened with 32 but this has dwindled to 22; on Mondays it is often empty – 68 11 02

1968 Cambridge Cattle Market flourishing but farmers find Bury more convenient – 68 01 11a

1969 Market holders discontent over plans for Market Square – 69 09 24; plans delayed – 69 09 25; plans outlined – 69 10 01, 01a

1969 proposal to cut Market Place in half five days for car parking, in Oct 43 cars parked when under new scheme would be space for 36; stallholders protest, 6000 petition, plans delayed; experimental parking ban with every stall occupied 6 days a week - at present only half occupied Monday-Friday; new stalls introduced [4.5]

1969 horse sales revived after 15 years [4.5]

1972 Sunday market plans rejected [4.6]

1972 Arcade opens - indoor Market, East Road; "shop in comfort, undercover in warm, 48 varied stalls" - 6 days a week enclosed market, 100 stalls (destroyed fire 1975) [27.2.9.6]

1972 An estimated 2,000 people turned up for the first day's trading at the Arcade, Cambridge's first indoor market. The Arcade is the brainchild of two city businessmen, one of whom said "We have spoken to every trader today and most of them have said they have taken as much in five hours today as they usually take in a week" There are 48 stands in the market, which is in the old Eastern Electricity buildings in East Road and they hope to have a total of 100 by January. "The whole idea is to make it a good market where someone can buy anything at competitive prices and of good quality". They were aiming at a market where a customer could buy everything from a kitchen sink to a fur coat, said Mr Smith c72 12 11

1973 It was the Second World War which boosted the trade in used agricultural machinery at Cambridge cattle market. Now, after 30 years on the Hills Road site, it is hoped that the move to the new sales area down Milton Road will give a similar fillip to what is generally regarded as one of Europe's outstanding second-hand implements market. The cattle market developed over the years and continued unchanged until 1966 when the advent of an £8,000 new corn market proved more or less a flop from the start and received negligible support from farmers and auctioneers. There have been frequent prophecies that the cattle market will eventually go the same way. Obstinate though, it refuses to die c73 11 23

1974 traditional Easter Monday market, Cattle Market [4.9]

1975 new machinery market opened Cowley Road [4.5]

1976 with move of implements is fall off at Cattle Market which also hit by swine vesicular disease, closure recommended as costs £11,000 subsidies per year [5.1, 4.6]

1977 The Cambridge cattle market, which has stood at Cherryhinton Road for almost 100 years, should be closed on its present site as soon as possible, the city council decided, because the ratepayers receive no benefit from the thousands of pounds spent on subsidising it each year. It is the only sizeable market in the whole of the county and played an important part in the city's life. Its closure did not exclude the possibility of its re-opening elsewhere. In the meantime the

market should be accommodated on a smaller part of the site, thus releasing an amount of valuable land for industrial development. CDN c17.1.1977

1978 Sunday market proposals vetoed on Market Hill & Cattle Market[5.2]

1979 Cattle Market to be laid out for industry [5.3]

1980 Sunday Market City Football club starts May, closed June [5.4]

1980 Four people were taken to hospital after a car careered across a corner of Cambridge Market Square. It ploughed across the Barclays Bank edge of the market, striking a flower stall, scattering fruit and vegetables and hitting two shoppers before ending up four feet from the railings of Gt St Mary's church. A Girton lady working on the flower stall said: "I just saw the car out of the corner of my eye and ran for it. The stall just folded up with its legs in the air" 80 06 26

1981 City Football club Thursday market starts, moves Cowley Rd 1984 [5.5]

1981 Beaumont centre - indoor market, gutted 6 years ago & reopened after £100,000 facelift to be demolished [5.6]

1982 Sunday market plans Cowley road scrapped after months waiting [5.7]

1982 Market announces worst months trading for 30 years due to parking problems [5.8]

1982 Andy Gray decided 13 years ago to move his collection of 500 second-hand singles from Bury market to serve the more discerning musical tastes of Cambridge. He can still be found in the market square today, though now he has eight shops in the region. He puts his success down to undercutting the traditional record retailers as well as offering the obscure stuff you just couldn't buy elsewhere. Rather like John Peel he has kept abreast of changes, opening 'The Beat Goes On' to cater for new trends. 82 02 03b

1982 Work is continuing on the Clifton industrial estate, a joint development between the City Council and Dencora Securities on the site of the former of cattle market. There will be 31 units providing 225 jobs in light industry and warehousing with the first opening shortly. Much emphasis is being placed on a good quality of construction and landscaping to ensure a good working environment. 82 07 19

1985 Hundreds of farmers and traders flocked to Milton Road sale ground for the biggest traction auction in the country. Yilmaz Alademir had come all the way from Farmagusta, Cyprus looking for a tractor he could ship home as they were much cheaper in England. A more typical buyer was Gavin Hamilton of Manor Farm, Great Chesterford. He was looking for wheels and rollers among the dozens of machines and implements at the back of the saleground. The sale was started in the early 1940s by Mr Henry Grain & Cambridge auctioneers Cheffins, Grain and Chalk have been pulling the crowds ever since

85 01 23b

1985 Cambridge Cattle Market opened 100 years ago. Before 1885 it was held at Castle End but the stalls were inadequate for the number of beasts. Then Jesus College provided land near the railway station. Cattle docks from all four railways were within two minutes' walk and there were direct railway links to Scotland and Ireland. There are still weekly sales of stock, with horse sales every five weeks, but the area nearby that was used for grazing is now the Clifton Industrial Estate. It is filled with large corrugated boxes housing a wide variety of light industry and a 'Park and Ride' site 85 09 27

1987 Traders are blaming Cambridge's parking problems for turning the market into a 'morgue' and 'cutting trade by up to 50 per cent'. They say shoppers are going elsewhere and the centre is dying simply because there is nowhere to park. There are too few car parks, too high

parking fees, a loss of meter spaces and cuts in bus services. A Consultant's report commissioned by leading retailers and hotel bosses has also said that poor parking facilities are costing shops lost trade and a pressure group has called for a 1,000-space underground car park 87 01 08a
1987 Chirpy market trader Bill Gray has gone to extreme lengths to keep his customers happy. He even skinned a rabbit for one person who stopped to buy some fruit and veg. His beaming smile and friendly small-talk has been a big boost for business. And the smile does not fade when the rain lashes down. Bill, of Gt Shelford, has been a familiar face during the past 31 years. But now he is calling it a day and will hand the business over to his son and daughter-in-law. But his regulars – who include the wife of the former Master of Trinity - will be pleased to know that he will still help out sometimes. 87 03 36

1988 The future of Cambridge market could be in doubt due to parking problems, stallholders say. Until 1969 drivers could park their cars in the middle of the market area – an attendant collected the fees – while stallholders occupied all the outside area. Then the council came up with a proposal that the area be divided into two – half stalls, half cars. But this provoked indignation and all parking was banned with new metal-framed plastic-covered stalls instead of wood and canvas set out over whole area. – 88 07 21

1990 Market traders put forward plan to pedestrianise the square with a quarter left free for stalls – 90 08 15a

1990 Market Hill revamp plans include new fountain – 90 09 26a

Proclamation of Midsummer Fair, 1956

123.63

c.27.31 fairs

headlines

“Midsummer probably best known fair in world ... Henry Thurston born 1847 son of Cambridge brickmaker worked in brickyard & 1868 acquired children’s street roundabout ... 1887 purchased four-abreast set of gallopers ... painted on the rounding boards scenes from Oxford & Cambridge Boat Race (other details) [6]

Did you know that coconut shies had their origin at the Cambridge Fair? A Showman’s Guild official says: “These old fairground games are a traditional part of England. They have been in existence for centuries. At the old Cambridge fair they used to shy at live cockerels; then an Act was passed forbidding it because of the cruelty. So the showmen substituted lead dummies and these were the origin of the coconut shies” 36 08 29a

1897 Stourbridge Fair lasts for 3 days only & apart from “Ossferdye” deals with nothing but toys, confectionery & amusements [1.23]

1897 At Cambridge’s ancient Stourbridge Fair there is no lack of “local colour”. Mongrel dogs lurch around after cross- eyed men and towsy-headed women; a maudlin old tippler recites,

stuttering, the composition of one of the great unknowns of long ago, to a blear-eyed little nosed party, whose only comment is "Ugh", and females of substance offer curious visitors sticks of doubtful looking toffy, wherewith to wage war upon their digestions. There is no lack of that kind of amusement usual to such gatherings. You can shy at cocoa nuts, ring the bell with a rifle shot, mount an electric lighted roundabout or submit to a ha'porth of grey "ice", just according to the state of your finances c1897 09 30

1899 An accident having a fatal termination occurred on Midsummer Common Cambridge. During the day there had been an open-air fete, the amusement consisting chiefly of a steam roundabout, swings and the like. The bulk of the paraphernalia was the property of Messrs Thurston. Business ceased about eleven o'clock and in preparation for an early departure the work of packing was commenced immediately. The steam circus was in course of demolition when a covered van capsized and the unfortunate man was thrown to the ground. - 1899 05 23

1899 Midsummer Fair with its unmelodious music, its stertorous roundabouts, shooting galleries, crockery ware, linoleum, pea soup, fried fish and its brave show of tinsel is out of keeping with the genius of classic Cambridge. It is a link with the England of long ago, when there were no steam roundabouts and no cinematographs. If there are any who would like to do away with it they are in a miserable minority. Young Cambridge would be up in arms at once if such a proposal were to be seriously made - 1899 06 27

1899 During the tempestuous weather a hot pea stall, belonging to James Gerald, of Wilton terrace, East Road, Cambridge, which had been erected at the corner of Garlic Row in readiness for Stourbridge horse fair, was blown away bodily and carried by the boisterous wind across the road on to a piece of land forty yards away, used by Mr Robert Lee as a market garden. Another booth belonging to David Odell was also overthrown by the storm - 1899 09 22

1899 Cambridge's Stourbridge Fair has scarcely so strong a hold on the people as it exercised a decade ago. The vendor of hot peas, sweet stuffs, trashy toys and nut brown ale, to say nothing of the fishmonger and other salesmen, all seem to receive a certain amount of public patronage. The only monstrosity on view this year is a cow with six legs. There are coconut shies, swings and shooting galleries in plenty. At the "Oyster House" there is dancing and conviviality reigns supreme 1899 09 26

1900 Midsummer four days' fair was opened this morning. Of roundabouts there are plenty and there are two resplendent switchbacks. Half-a-dozen shows include a menagerie and cinematograph exhibition and the remainder of the fair is made up of shooting galleries, coconut shies, toy and sweet meat stalls, cheapjack wares and drinking booths. There are no less than 15 refreshment saloons, some of which serve a double purpose in supplying thirsty ones and providing accommodation for dancers. CDN 1900 06 22

1900 Business transactions at Midsummer Horse Fair were carried out under uncomfortable conditions. Horses of all sizes were put through their paces on the sodden grass. Business however was brisk, cart horses and nags forming the major portion of the stock. Buyers from many part of the country were at the fair and quite an average amount of buying and selling was done CDN 1900 06 25

1900 Those who now assemble to witness the ancient ceremony of proclaiming Stourbridge Fair can guess to what extent its glory has departed. The fair has dwindled down to almost the level of the village feast. At one time business and pleasure stalls extended from the railway bridge to East Road and down to the rivers edge on Stourbridge common. The custom of proclaiming the different portions of the fair is still religiously observed – the leather fair, the hop fair, the wood fair and so on, when no such exist or are likely to be revived. The Toll Collector broke down a portion of the fence dividing Newmarket road from what was in years gone by part of the fairground, and hurled the portion of broken fence on to the now cultivated ground thereby signifying the right of the Corporation to that ground for six weeks. This concluded the ceremony and the Mayor and town officers departed CDN 1900 09 04

1901 Midsummer Fair, the delight of children and the pleasure of not a few adults was formally opened. On reaching an open space councillors in their carriages commenced throwing the coppers. A spirit of mischief seemed to be present in the first carriage for the coins fell thickest in close proximity to the crockery-ware stalls, one or two even finding a resting place amongst plates. The children pushed and hustled with such energy that a few of the articles were damaged, much to the disgust of the proprietor CDN 1901 06 22

1902 All that is now left to the trader at Stourbridge Fair is the horse fair. This survives and flourishes where other branches of trade have declined. Buyers were in fair number and trading was brisk. Cart horses, hackneys and hunters, foals and ponies were offered for sale. One dealer, Mr Titchmarsh of Barrington got rid of about 40 carthorses during the morning. The pleasure fair consists largely of refreshment saloons and stalls from which pungent odours proclaim, even at a distance, the nature of the edibles on sale. Some roundabouts, swing boats and one peep show, in Garlic Row, complete the fair CDN 1902 09 26

1904 The Midsummer Fair brought its usual amusements but the cinematograph held undisputed sway: it is the autocrat which swallows hundreds of 'tuppences' and is always ready for more. It was patronised liberally and showed some very excellent representations of national and local life. War pictures form no inconsiderable part of the programme and among the turns of local interest were views of the May Races and the boiler explosion at Linton. In other respects it was much as other times. A food deal of space was occupied by stalls filled with souvenirs of gaudy hue, swing boats, coca-nit shies, vending machines of more or less domestic utility and a long array of refreshment saloons. CDN 24.6.1904 [1.19]

1904 Now Midsummer Fair is over again it is appropriate to consider how much the carnival costs Cambridge. The switchback, roundabout and show proprietors were taking money as quickly as they could. One machine carried an average of 60 persons and as it travelled for a minute at intervals of half a minute the takings must have averaged £10 an hour, multiplied by five to give the total for one evening. The thirteen coconut shies were in charge of impulsive maidens whose invitation, "Ave a shy, my dear" must have been almost irresistible. There were 20 drinking booths on Horse Fair Day when an immense amount of drink was consumed. Adding it all together it comes to £645 an evening to say nothing of the amount expended during the afternoons. 1904 07

1904 Sir – why was it necessary to have 20 drinking booths at Midsummer Fair? No reasonable person can contend they were all required. The licences have to be applied for and the magistrates appear to be too faint-hearted to deny one applicant what they grant to another. I am concerned that either through their negligence or the apathy of temperance people the annual pleasure fair should become a drinking debauch. There was practically a whole street of drinking saloons. Apart from their presence being a strong incentive to a serious amount of unnecessary drinking this is unfair to the public houses in the vicinity who would have done an increased trade in a legitimate way for a few days. – Disappointed - 1904 06 20

1904 This week the once famous Stourbridge fair has been held and the question arises, how much does the Borough of Cambridge benefit by allowing its ground to be used for trading purposes. Last year £30 10s. was paid in tolls but council expenditure was £18 17s. including wages for the collectors of tolls, carriages in which the Civic Fathers rode to the proclamation and printing bills. Then there is 'new copper'. That is the shining pence our benevolent Borough rules have the privileged of hurling to crowds of children. That cost 18s. But in the case of Reach fair we have actually to pay in hard cash for the privilege of exercising jurisdiction over the village merry-making and horse-dealing transactions. CDN 1.10.1904 [1.21]

1905 Sir – is it not about time that the annual Bacchanalian orgy known as Midsummer Fair was abolished? On Saturday night men, women and even children intoxicated by drink were behaving like maniacs. There were 14 tents for the supply of intoxicating liquors whilst behaviour in the dancing tents is indescribable. In one booth I saw two tiny mites whose mothers had given them too much to drink, for they were quite intoxicated and outside another I saw five perambulators standing unattended – A.J.L.B. 05 06 27a & b

1905 Sir – may I protest against the needless pandemonium Chesterton residents are forced to endure during the Midsummer Fair by the hideous orchestrations attached to shows and merry-go-rounds, grinding out harsh and discordant sounds which make day and night a time of torture. No sane people can find pleasure in the ear-splitting metallic sounds emanating from these machines. Such a noise, coupled with the hooting of horns and the screeching of steam whistles render rest an impossibility – Nerves 05 06 27e

1905 Sir – every year our Midsummer Fair is visited by a number of itinerant merchants selling pots, pans, linoleum, furs, drapery and various oddments. They pay little rent and no rates and taxes and yet they take away hundreds of pounds which our to be spent in local shops. In many cases people actually pay more for the goods at these mock auctions than they would in a proper shop – Tradesman 05 06 27c

1906 Stourbridge Fair was once very important but now was of very small dimension. The council took a toll of 4d for each horse, 2d for each pony and 1d for a cow. They also got money from the roundabouts and shows, making £33. But they had the expense of opening the fair, which meant a couple of carriages. Most of the fair was held on the side of Garlic Row but now there was a scheme for bringing a road right through from the Newmarket Road. Mr Banyard had started to erect some house and wanted to stop fair people putting their vans upon his ground. 06 05 12c & d

1906 An alarm of fire was raised at one of the cinematograph shows at Midsummer Fair. A film and various odds and ends near the operating box became ignited and flames shot up above the front staging. Some alarm was shown by the audience who were assured there was not the slightest danger but all the exits were opened and those who wished were enabled to leave without difficulty. The flames were quickly extinguished and the entertainment proceeded as usual. 06 06 23a & b

1906 Midsummer Fair visited and described – 06 06 23a & b

1906 Stourbridge Fair has, with the exception of the horse fair, become the shrine of gaiety. Its centre is a lonely house whose gable windows are decorated with fairy lights. Inside the stairs are carved and wide like those of a prosperous mansion and lead to an extensive room with bare floor and white-washed walls. A harpist can be dimly seen through the haze of tobacco smoke and a concertina joins in the melody, dancers swirl around: girls with girls and youths with youths with no conventions of the ball-room. 06 09 26a

1907 This year's Midsummer Fair is the biggest for many years with large shows, roundabouts and switchbacks. A special feature is Charles Thurston's "Helter Skelter" and Canadian sport of Mat – tobogganing – should prove popular. Another attractive feature is Baker and Thurston's motor cars which race over a specially-prepared track at a speed of 50 miles an hour 07 06 22 Time was when the visitor to Midsummer Fair had to risk a miniature shower bath in the form of 'squirts' wielded by girls and youths. These were officially banned and this year also the throwing of confetti has been put a stop to. While this no doubt curtails the enjoyment of the young and frivolous, it is a boon to more sedate visitors and the harmless 'ticklers' which the law allows did not appear to be in very great request 07 06 24a

1907 One hundred years ago all kinds of goods from furniture to cheese were sold at Stourbridge Fair. But it is now only a shadow of what it used to be. When the Mayor proclaimed it on 4th September the only sign of anything unusual was one solitary gipsy brush van. It

continues until October 16th but only about the 26th does anything in the nature of a fair take place. The railway has probably had more than anything to do with the dying out of these ancient marts 07 09 07

1907 Extra fair on Midsummer Common – too many – 07 10 19

1908 Dealers spoke very pessimistically of trade at the Horse Fair on Midsummer Common. There are periodic shows of horses at Cambridge and St Ives and that is where most of the good local horses go. Added to the scarcity of horses in the country, the trade on the Common is decreasing year by year and in a few years this old-established sale will be no more CWN 08 06 26 p7

1908 Last year Cambridge magistrates granted eleven occasional licences for the period of Stourbridge Fair. But this year they have been reduced to just six, three for the horse fair and three for the pleasure fair. They are to the landlords of the Dog and Pheasant, Birdbolt and Burleigh Arms on Newmarket Road, The Ship in Princess Street, Empress on Thoday Street and City Arms, Sturton Street. CWN 08 09 18 p3

1910 There are again no drinking booths at Midsummer Fair after magistrates refused permission. Up to 1874 certain people had the right to sell intoxicating liquor without an occasional licence and before 1908 the lowest number of licences had been 15. A large number of people – sometimes 10,000 – came from a distance and wanted a glass of beer and a sandwich in the evening. It was impossible for the nearest pubs to cater for them. Then there were the proprietors of shows & stallholders. Messrs Thurston and Barker employed no less than 100 hands with the roundabouts and they should be able to get food on the fairground. 10 0 24 & a 1910 Cambridge Bank Holiday Mammoth Show in aid of Addenbrooke's Hospital. 620 dog entries. The Horticultural Section is tremendous. Splendid array of cats. Fine bee and honey show. Wonderful sports entry. 17 motor riders including Martin the world's record holder and Dayrell the flying kilometre and mile champion at Brooklands. Exhibition of the 'Wallbro' Aeroplane fitted with engine complete but owing to lack of space and possible danger to the public a flight cannot be permitted. Thurston's electric bioscope. Firework Display – advert 10 07 29b & 29d

1910 The attendance at the Mammoth Show on Bank Holiday was a record one. The triple ring of seats around the sports ground was occupied by a close-packed mass of humanity and behind them spectators stood six or seven deep. The grand stands by the river, capable of accommodating 2,000 persons, were filled to capacity while the sloping bank near the Victoria Bridge was also black with people. And outside the ring the exhibition tents, refreshment booths, band enclosure and the fair ground, where the great roundabouts whirled and spun, were crowded with sightseers. 10 08 05 & a & b 10 07 29e

1911 Stourbridge Fair proclaimed – 11 09 08

1912 For the first time in Cambridge a service under the auspice of the Showman's Guild was held at Midsummer Fair when about 650 people assembled in Mr Charles Thurston's tent. The Rev T. Horner, preacher, began life as a showman and after taking Holy Orders his heart was still with the showmen and he had given himself to the work. At the Midsummer Horse Fair trade was none too brisk. Mr Pink had a drove of 80 unbroken Welsh cobs and ponies, there were a few cart horses, half-a-dozen mares and a good number of nondescript cart and nag horses 12 06 21f

1913 Reach fair proclaimed; Corporation spend £17 to collect £1.18.9d 13 05 02 p9 CIP

1913 The Church of England's service on Midsummer Common was about to begin and the clergy and choir had taken their places when one side of the platform gave way and those standing on it were thrown down. The people on the other side were about to go to their assistant

when that side also collapsed and they disappeared from view. The Rev F.B. Gwinn had one leg caught between two boards and Councillor Hawkin's face was cut. The service was proceeded with as soon as possible. The platform had only been put up during the day and insufficient props had been placed under it 13 06 27 p11 CIP

1913 Mrs Elizabeth Pont and her late husband were familiar figures at fairs and feasts for miles around where their stall of feast rock etc was always to be found. For over 40 years she took her stall on Histon village green at exactly the same place where her goods were always sought by a large number of visitors 13 06 27 p12 CIP

1913 Historic Stourbridge fair was the cause of many disputes between the University and the Town. Now there is nothing left to fight over. The Town Clerk, accompanied by the Mayor and ten members of the Corporation read the proclamation to an audience consisting mainly of urchins at the Leper Chapel. Standing on a carriage he commanded silence 'under pain of imprisonment', a penalty to which only a horse and a motor cycle laid themselves open. The procession then drove back to Garlic Row where, beside some old houses which must have seen the Fair in its flourishing state, the same formality was gone through. A single caravan was the only sign of the forthcoming fair. 13 09 05 p8 CIP

1913 Stourbridge fair horse sales were up to the average but the amusements consisted of a dozen swing boats, two coconut shies, a shooting gallery and a few stalls laden with gaudy trifles. Doubtful-looking sweetmeats attracted the younger generation who predominated after the horse fair was over. Any 'grown-ups' came from curiosity rather than a desire for amusement. One burly policeman said he has seen more attractions at village flower shows than at this fair, which was once one of the largest in Europe. 13 09 26 p12 CIP

1913 The tolls at Reach fair have been steadily diminishing but the cost of proclaiming it and collecting the money were increasing. The time had come to discontinue it or for members of the Council to throw away their own coppers. But the deficit was trivial for such a historically important event that dated back to the time of King John. What would Americans think if they recklessly dispensed with such an interesting custom for the sake of a few pounds? 13 12 19 p7 CIP

1914 Reach fair proclamation – new arrangements mean no more free carriage rides for councillors – 14 05 08l

1914 Reach fair procession made by motor car, councillors paid own expenses in view small amount raised from tolls – 14 05 22d, 14 05 22h

1914 Stourbridge Fair & horse fair – few booths. Regular horse sales have diminished the importance of the horse fair and with no other attractions than gazing on stalls displaying doubtful-looking sweetmeats, trying to knock cocoanuts off a stand and taking a swing or a roundabout, very few are likely to go for pleasure 14 10 02

1915 Midsummer Fair proclaimed but no extravagant lights, closes earlier and hooter to warn of air raid & p3; application extension refused 15 06 21 p2

1915 Proclaiming Stourbridge Fair - Stourbridge Fair was proclaimed on Saturday, six members of the Corporation, with the Town Clerk (Mr. J. E. L. Whitehead), the Town Crier and the mace bearers attending the ceremony. . . . The civic procession left the Guildhall about 10.30 in three motor cars. Coppers were distributed en Road. On arrival at the fair ground the usual proclamation was read by the Town Clerk – no stalls or booths, audience just band of urchins who had chased the motor cars in hope of pennies 15 09 10 CIPof

1916 Storubridge Fair one of the has beens: some memories of its busy days 16 19 11b

1917 Stourbridge Fair : only horse fair remains [1.23]

1918 Stourbridge horse fair was deserted, first time in 50 years Ch 1918 Oct 2 p3

1922 Midsummer Fair was proclaimed this morning by the Mayor (Councillor G.P. Hawkins) when crowds of people attended to witness the time-honoured ceremony. The old cry of "Biggest fair I've seen for years" suggests that the Fair is still growing. Thurston's roundabout are again present and number about six in all. They include their famous golden dragons, gondolas and motor scenic railways. Three circuses and numerous "laugh and grow fat" shows make up a good square mile of pleasure ground. There are the usual crockery and sweet stalls, rock kings, cheap jacks, fortune tellers and the like in unusual profusion. An objectionable feature this year is a diabolical engine that emits a banshee-like wail at frequent intervals. It ought to be smothered c22 06 22

1922 Monday morning Cambridge saw the performance of a very ancient ceremony - but a showy relic of more palmy days - the proclamation of "Ye Ancient Faire of Sturbridge". Shortly before mid-day the Mayor, accompanied by the Town Clark, the Bailiffs, the Mace-bearer and councillors proceeded to Barnwell Bridge for the first proclamation. Both side of Newmarket Road bore a sprinkling of small boys and others curious to see the ancient ceremony. Arrived at the bridge the party alighted from their cars and the Clark read the customary proclamation and new bright coins freely distributed, resulting in a wild scramble. The party next proceeded on to the Common by way of Garlic-row, turned round and repeated the proclamation at the old oyster house. The Fair will commence on September 25th c22 09 02

1922 Sir- I was interested to read your article about donkeys at Midsummer Fair. The rides are no doubt appreciated by the kiddies, but it is surely going too far when "kiddies" of 18 and 25 are seen mounting on the backs of our four-footed friends. The ponies are started off on a run of 100 yards, and tear backwards and forwards, sweating and blowing, without a minute's rest, beaten with sticks and sundry kicks, yells and curses. The police should look into the matter for there is nothing more painful to watch than the ill-treatment of a dumb animal and if a young man of 18 cares to make an ass of himself to ride on something intended for a child, it will be easy to discover the bigger donkey of the two. - A Lover of Animals c23 06 19

1923 With the proclamation of the ancient Cambridge fair of Stourbridge there is the prospect of a six weeks fair in that locality, though it is not likely to reach the magnitude of more balmy days. This morning there was not a caravan in sight, but kiddies with a few pennies need not give up; something is sure to turn up, even if it's only a rock stall. Spectators were but small in number, consisting mainly of youths and babies. According to the proclamation no unlawful disturbances should be made, and "all idle and disorderly persons" should depart forthwith. Apparently none of the spectators were offenders in these respects for no one made a move until they had scrambled for the coppers thrown to them by the mayor, neither did the rain-soaked constable on duty have to assist any ill-disposed individual in search for pastures new c23 09 04

1923 Stourbridge fair, Cambridge, has been for the last few years dwindling in size and seemed likely to become nothing more than a custom. This year it has taken a new lease of life through the enterprise of Messrs Thurston and Sons. The amusements are of the usual varied type, the most noticeable absentee being the once popular Hoop-la. One may however indulge in the excitement of "Housey, Housey". Thurston's scenic railway, Manning's flying horses and the swing boats provide the thrill of the rush through space. Need we add that the whelk stall occupies the place of honour c23 09 24

1924 In accordance with the age-old custom the Fair of Stourbridge was official proclaimed by the Mayor. Also in accordance with custom, within recent years at any rate, there was no outward signs of a fair. The spectators consisted of little knots of "idle persons" but far from being ordered

to depart their presence was encouraged by showers of golden-coloured coins thrown by the Mayor c24 09 06

1925 steps taken to abolish Stourbridge Fair [1.5]

1925 Yet another precedent was created by the Mayor (Councillor Mrs Hartree) when under Midsummer Fair was officially opened in the presence of a good crowd. This is the first time in its long history that the Fair has been opened by a lady. There followed a liberal scattering of shining coppers and children, their elders as well as Fair hands pushed and scrambled in the dust to secure the coveted coins. The roundabout horses were soon laden with merry-makers while housewives, for a more serious purpose, haunted the innumerable crockery stalls in search of bargains in china c25 06 26

1925 Five donkeys and two horses composed Stourbridge Horse Fair. Year by year this once famous animal sale had dwindled. Twenty years ago there were about 100 animals brought to the Fair. As far as the main fair is concerned there are a few more booths than there were last year. The licence allows the Fair to last six weeks. Actually it goes on for three days c25 09 27

1926 Midsummer Fair shows no sign of declining popularity. The increase in motor travelling facilities has tended to swell the number of visitors. The crockery and curtain stalls seemed more numerous and attracted large crowds nightly. One feature which appears open to criticism is the increasing number of gambling devices. A good deal of effort has been taken to put down such devices in public houses and some of the things at the fair are at least as dangerous. They place temptation in the way of young children who do not go to public houses and are not likely to meet it in any other way c26 07 02

1928 large fair Midsummer Common 4,000 attend by train [1.14]

1930 A fortune-teller arrested at Cambridge Midsummer Fair appeared in court for palmistry. Two policewomen told how they had visited the 'Royal Gypsy Reader'. They were told that the face was character and the charge 1s.6d., the hands palmistry and the cost 2s.6d. One was assured that her worst financial worries were over and she would not go to the grave single; "You have not met the man yet, but he will come". Amelia Hazelhurst admitted the charge and was fined £1. 30 06 26a

1931 Midsummer Fair is to be held this year on Stourbridge Common; money had been spent reseeding Midsummer Common and would be wasted if heavy traction engines and other fair equipment were allowed on it. The fair was getting bigger and bigger with complaints about the noise and it is extremely unlikely it will ever return there. But showmen objected; the music could be reduced but most of the noise came from the 'Walls of Death' which ought to be banned. 31 05 08 g-I

1931 The last vans, trains of tractors and heavy wagons have made their way from the Showman's Guild fair ground, Newmarket Road, bearing the dismantled remains of the devices which have thrilled thousands during the week. The Guild have eliminated the undesirables and shown Cambridge that travelling folk are as sober and industrious as the rest. Midsummer Common was more central but the only complaints were about the bus fares to the ground. 31 07 03a

1931 Midsummer Fair counterblast – rival show near Barnwell junction – 31 06 19c

1931 Midsummer Fair banished to Stourbridge Common - a fiasco; Showman's Guild retaliates by arranging another at Arnolds Meadow nearby [1.15]

1931 It is easier to kill a man than to kill a custom so every year on Sept 25th the Mayor, Town Clerk, Bailiffs and Town Crier form a solemn procession which proceeds to Stourbridge Common to open the Fair. But this year not even schoolchildren were there to greet them and a

News reporter was the sole representative of the public until a solitary figure strolled up. There were no roundabouts, swings or stalls, not even the traction engine that last year was the final relic of a dying fair, puffed and snorted in welcome. 31 10 02d

1932 Midsummer Fair returns to Midsummer Common [1.3]

1932 There were three horses for sale on Midsummer Common – which is three more than last year. A group of bored-looking men watched the animals being put through their paces. An elderly man dressed in country clothes patted one of them and looked critically at its teeth. A young man in oil-stained overalls walked over, a pail in each hand. “What’s going on”, he asked. “The Horse Fair” I replied. “Never heard of it”. So pass out ancient institutions. 32 06 24

1932 Midsummer Fair returns to original site, opening – 32 06 22b

1933 Stourbridge fair proclaimed – 33 09 25

1934 Stourbridge Fair abolished by order of Secretary of State, Home Department confirming council resolution [1.7]

1934 mayor proclaims Wood Fair open in Newmarket Road before going onto Midsummer Fair

1936 Undergraduates, tired of their boring existence at the University, found a new way of letting off their spirits. A party ‘invaded’ the fair on Midsummer Common and obtained permission from the proprietor of the Wall of Death to give a display. Two mounted on motor cycles and the others on bicycles then gave a short show with plenty of impromptu thrills and spills. Fortunately no proctors appeared on the scene. 36 05 05a

1936 Midsummer Fair showmen were in a state of indignation after police banned games and competitions for which prizes are offered, practically paralysing the fair. “They stopped everything, including darts and hoop-la, but these are games of skill or where the element of gambling is of a trivia nature” showmen complained. The games were for amusement, not to encourage gambling and the Home Secretary had said no objections would be raised to people playing for prizes or money not exceeding one shilling in value 36 06 23a

1936 Clara Harris, the grand old lady of showland, celebrated her 100th birthday in her caravan at Haslingfield. She was the daughter of a showman, Larry Shaw, who was the first steam roundabout proprietor. In 1869 she married Moe Harris of Gamlingay and assisted him at fairgrounds around England. Clara worked until she was 93; the last fair was at Royston where she sat behind her stall selling sweets she’d made herself. Two of her five daughters carry on the tradition. 36 12 03b

1939 The fair folk at the May Fair had a day of celebration on Tuesday, when a granddaughter of old Harry Bailey, of Barnum and Bailey's circus, was married at Fen Ditton Church. Show people came from all over the country. The bride was Miss Maud Amey Bell, and her bridegroom Mr. Charles Baron Prestney. Both of them are on the shooting galleries, and they are busy at work today. At the ceremony were a hundred friends. Among them were members of the celebrated Thurston family. In the evening there was dancing on the Plough lawn 39 06 09 CIPof

1939 There was only a solitary sweet stall on the green which is usually well-filled with swings and roundabouts when the Mayor of Cambridge came to open Reach Fair. After lunch two or three side-shows had arrived, but they were unrepresentative of the noise and excitement traditionally associated with the event. But the ceremony followed its time-honoured procedure, pennies were thrown and the Town Clerk read the proclamation. Though it seems a little decrepit, the fair may flower again, the Master of Magdalene predicted 39 05 16 & a

1940 Reach fair consisted of one sweet stall. Owing to the petrol restrictions, the Mayoral party was much smaller than usual, and the lunch in the village schoolroom was also cancelled. Apart from these differences, the procedure followed the usual lines. The Town Clerk (Mr. C. H. Kemp) read the proclamation at two places in the village and: new pennies were distributed in the villages en route. Several of the visitors made purchases at the "fair" and went up on to the bank before returning home 40 05 03 CIPof [1.1]

1940 Midsummer fair cancelled. Considering what has happened recently it would be unwise to hold it following an address from residents in the vicinity 40 06 221 CIPof [MMC.36]

1941 Reach Fair proclaimed, but no fair – 41 05 20

1942 Midsummer Fair not to be held – 42 01 30a

1943 Midsummer Fair held despite danger - first wartime fair [1.10]

1945 Reach Fair. — Even though we are in the midst of world-shaking events, the old tradition of proclaiming the opening of the Reach Fair was not neglected on Monday morning. The Mayor of Cambridge (Mr. G. Wilding), together with the Town Clerk (Mr. C. H. Kemp) and the Sergeant-at-Mace (Mr. W. H. Ingle), made the journey out to the village for the formal proclamation, which is the only remaining feature of the Fair, but though much of the old glory has gone, the children were still able to scramble for halfpennies. For the youngsters, at least, Reach Fair still means something 45 05 11 CIPof

1946 Biggest-ever Midsummer Fair opened, includes Wall of Death, Big Wheel, new Dodgem and the Moonrocket – 46 06 22

1951 Ten minutes after Friday's funeral service of Mrs Grace Thurston, wife of the well-known amusement contractor was due to start, the cars containing mourners were still pulling up in front of Christ Church, Newmarket Road, Cambridge. In all there were 20 cars bringing mourners and 30 additional cars parked near the church, which was crowded for the service. At one time the funeral procession, which was headed to the church by three flower-decked cars before the actual hearse itself, caused a traffic jam more than a quarter of a mile long, and it took the efforts of two police officers to get Newmarket Road normal again c51 02 16

1951 As a nearby loudspeaker blared out the song, "My heart cries for you", 200 fairground attendants at Thurston's fair, parked on Midsummer Common, Cambridge, watched anxiously for a break in the weather on Easter Monday and the crowds that normally throng the common for the opening of the fairground season. The break in the weather did not come; neither did the crowds, and Bank Holiday Monday became, for the showmen, Black Monday. Takings were at an all-time low, total receipt amounted to only £9. A brand new £17,000 dodg'em car ride's taking amounted to only a few shillings – a fraction of the running costs c51 03 30

1953 A miniature town of tents, side-shows and enormous gaily-coloured structures housing a thousand thrills for the venturesome has made its annual appearance on Midsummer Common. But this year the Fair seems to be bigger and brighter than ever; it offers a more animated scene than in the past and there is an air of friendly gaiety, shared by showmen and their patrons which suggests the influence of Coronation year. The Town Clerk read the proclamation then all members of the Mayoral party threw handfuls of half-pennies among the crowd. The many children present were in their element and scrambling amongst the feet of the adults made a fair harvest of this welcome crop of shining coins. The Fair is the biggest in the Eastern Counties and can boast no fewer than 24 roundabouts. The 'Dodgems' are a special feature, reputedly amongst the best of any fair in England. c53 06 26

1955 Hundreds of excited youngsters crowded round one of the large 'jollity farm' roundabouts for the traditional proclamation of Cambridge Midsummer Fair after which out came the blue paper bags full of brand new halfpennies and up went the youngsters' hand as the coins were tossed into the crowd. Then it was free rides for everybody. All the old favourites are back again – the 'Moon Rocket', 'Octopus' and 'Galloping Horses'. "'Ere only a tanner a bash, keep all yer knock down" yelled the man at the coconut shy while the carpet and lino sellers competed to see who could shout the loudest 55 06 23

1956 Crowds swarmed around the 'Jollity Farm' for the traditional opening of Midsummer Fair by the Mayor. Excitement rose as Mr S. Thurston announced that all rides on the 'Dodgems' would be free. The music started and 'Davy Crocket' blended happily with 'Sugar Bush' from the other side of the fairground. Space rockets and high-powered machines have been introduced but they will never outdo the old favourites such as the ghost house, the mat and the horses. 56 06 23a

1957 The Oyster House in Garlic Row was named after hundreds of oyster shells found in the garden. It dates from 1707 and was originally known as the Tiled Booth in which the Mayor and Vice Chancellor would feast at the traditional opening of Stourbridge Fair. The house was bought for a small amount by John Lee, a coprolite digger, whose initials can be seen on a plaque on the building. Now it is scheduled for demolition. 57 01 10

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Oyster House pulled down [1.11]

1960 It is an unsettling life with a fair and you have to be born and bred within the sound of the roundabout to be able to dwell peacefully with a community which is virtually a small world on its own. Many have grown up through a sequence of homes on wheels. They have seen the pack horse and tents, the two wheeled tilted cart with canvas covering, the four-wheeled wagon, the 'whoopie' which introduced the modern luxurious caravans complete with running water, sink units, kitchen stoves and television. If owners do not have a bath sunk into they floor they go to public baths or even knock on the door of a private house and request one for a small fee. 60 07 01

1964 Reach fair opened by ringing a bell for first time – 64 05 04

1966 City of Cambridge order 1966 enacts that Midsummer Fair starts on 3rd Wed June (or 4th if 3rd 15,16,17) & continue for 4 days [MMC.9]

1966 Midsummer Fair to last 4½ days under new decision by Minister – 66 04 13b

1966 Stanley Thurston fairground memories – 66 05 20a

1969 Midsummer Fair china seller feature – 69 09 24a

1975 Strawberry Fair [5.10]

1981 Midsummer Fair may be called off if the Showmen's Guild and Cambridge City Council can't reach agreement over proposed rent increases or proposals for more attractions. It has been described as the second largest fair in Britain but this includes many market traders who take stalls; in terms of fairground rides there are many larger. "The fair is quite honestly not that good – its large, but not well-attended" one showman said. 81 05 13

1981 Cambridge Midsummer Fair may be reduced to a small handful of trade stalls because of a squabble between councillors and showmen. The showmen's guild has decided to boycott the fair because its members are refusing to pay a 25 per-cent rent increase. It would mean large machines like the 'jollity farm' would be charged £125 for the four-day period. Sideshows would have to pay about £4 more a day. But commercial traders still want to take space on the common and hope there will be 'some sort of fair'. 81 06 03a

1981 Master showman, Stanley Thurston, who never missed a Midsummer Fair in his life, has died aged 83. He ran his travelling fair for many years before turning it over to his twin sons and daughter eight years ago. He was born in a caravan and later had one of the best vans ever built – solid mahogany throughout. He believed that British fairs were the best in the world and just as popular now as they ever were 81 07 08a

1981 Funeral of Stanley Thurston, fair proprietor. 81 07 15b

1981 Move to save Midsummer Fair – 81 06 06

1981 Midsummer fair set to go ahead – 81 06 10

1985 Cambridge Midsummer Fair passed off without incident. Councillors are pleased with their £20,000 security operation which involved blocking the entrances to all council-owned land in the city and hiring strong security patrols to roam the streets and protect commons against unwanted caravan dwelling itinerants. For years previously they had cut a swathe of trouble and destruction during their visit. But it is likely to take at least a month, given good weather, to get the churned-up parts of Midsummer Common back to its former lush state following the week-long deluge that soaked the grass 85 06 26

1986 Midsummer common – feature on families – 86 06 18 & a

1987 Strawberry fair – 87 06 08a

1989 council ban Easter fair from Midsummer Common - "provided for 45 years" - to protect common ¶CEN 11.2.89

1989 May have May Day fair if Midsummer Common not waterlogged; Easter fair banned – "traditional for 50 years" ¶CEN 3.4.89

1989 1st May Day fair - no Easter fair for 2nd year due weather - itself scuppered ¶CEN 27

1990 Cambridge's Easter fair has been banned for the third year running. The Showmen's Guild has been told they cannot set up their rides on Midsummer Common because the grass needs time to recover from the winter. But the fair has been held for 50 years or so and damage was minimal. Its loss causes hardship to showmen and deprives citizens of the opportunity to enjoy the sights and sounds. Last year what should have been the city's first May Day fair was cancelled because the common was waterlogged. 90 01 25b

Cambridge Pubs and Breweries: a Scrapbook 1897 to 1990

Facts, Features and (occasional) Fallacies
reported in Cambridge Newspapers

summarised by

Mike Petty

Many of these stories were featured in my 'Looking Back' column in the Cambridge News from 1996-2014. They are supplemented by some selections 'From our Old Files' published in the Cambridge Independent Press and other notes.

The complete 'Cambridgeshire Scrapbook' of which this is a small section is published online at bit.ly/CambsCollection

I have digital and other copies of most of the stories summarised.
I hope to publish these online one day. If you would like them in the meantime then please get in touch.

The original volumes are housed in the Cambridgeshire Collection at Cambridge Central Library where there are many other indexes dating back to 1770.

They also have detailed newspaper cuttings files on over 750 topics that have been compiled since the 1960s.

Newspapers sometimes get things wrong. I copy things out incorrectly. Do check

There are a multitude of spelling and layout errors. Please forgive or correct them

News never stops but this file was finished on 31 August 2016.

I will maintain supplements and corrections – contact me for anything you need

Please make what use of these notes that you may. Kindly remember where they came from

See my website – www.mikepetty.org.uk for further notes.

Cambridge Pubs and Breweries 1888-1990

1888

Wrestlers Inn, Petty Cury demolished [2.13]

1889 c

Sir – my father, J.R. Bennett, a master builder, constructed a chimney for the Star Brewery at Newmarket Road, Cambridge. Boy-like I used to play round the site and one day about 1889, when the work was almost complete, he made me climb the ladders up the scaffolding and stand on the extreme summit, saying 'You will be the only one who will ever stand there' – G.A. Bennett, Wisbech. 56 08 20

1889 04 19

Frederick Bailey sells Star brewery to Charles Armstrong, late of Scarsdale brewery, Chesterfield. Bailey built up concern, managed it for 50 years & made it the largest of its kind in the county [3.5]

1895

When Mr Plumb became landlord of The Prince of Wales pub, Gwydir Street in 1895 the tailors and shoemakers always used to observe 'Saint Monday' and never worked that day. It was common for them to spend the whole time in the bar from early morning until 11 pm. And unless they had two or three sing-songs a week a house was 'not in it'. During the Great War when beer was rationed he had to go out during the day to avoid the crowds who wanted the beer he could not supply them with. When the brewers' drays arrived with fresh supplies they were besieged 36 12 10j

1897 03 04

Mr B.W. Beales has the pleasure to announce that he has disposed of the business carried on for many years by him as a brewer and wine and spirit merchant at the Panton Brewery in this town, to Messrs Harold Barber Bailey (son of the late Mr Frederick Bailey, of Burleigh House, Newmarket Road) and Herbert Hazeldine Tebbutt, the continuing partner in the late firm of Robinson & Tebbutt, and the business will in future be carried on by these gentlemen under the style of Bailey & Tebbutt CDN c 4.3.1897

1897 07 23

The Red Cow public house and premises adjoining in Guildhall-street, Cambridge, belonging to Mrs Charles Armstrong and forming three frontages are to be rebuilt in red brick and stone from

designs by Messrs Rowe & Scott, architects. Mr Armstrong is about to sell to the Corporation a piece of the site to widen Guildhall-street, which will be a public advantage and the erection of these buildings will greatly improve the neighbourhood c1897 07 23

1897 08 02

Messrs Gain, Moyes and Wisbey offered for sale the Shakespeare Brewery, Newmarket-road, Cambridge and 15 freehold licensed inns, public houses and beerhouses. Lots commenced at £500 and rose rapidly - in the case of the Red Bull, Barton Road to £2,050. Other prices included The Shakespeare Brewery and Inn (£2,000), The Greyhound, Lt Wilbraham (£800), The Bakers' Arms, Fulbourn (£950), The Railway Inn, Harlton (£725) and The Cherry Tree beerhouse, Swaffham Fen (£600) 1897 08 02 CDN

1898 07 11

Messrs Green, Moyes and Wisbey attended the Lion Hotel, Cambridge, and offered by auction several beerhouses. The Lion and Lamb at Denver sold for £765. The Queen's Head at Hilgay realised £510. Lot three was the freehold beer house known as the Volunteer, Mildenhall which, together with a cottage, realised £710. The Swan beerhouse Isleham realised £460. The last lot was the fully licensed freehold public house in East Road, Cambridge known by the sign of the Red Lion. The bidding started at £600, and ultimately reached £975 at which figure it was disposed of. The prices realised are considered very satisfactory by the vendors CDB 1898 07 11

1898 09 23

Rose, Rose Crescent licence not renewed CDN 1898 09 23 & 24th

1899 08 23

Albert Hart applied for a licence for 'The Sirdar', Market St, Cambridge. The place had been largely patronised but he laboured under a disadvantage of not being able to provide his customers with spirits or beers. The fashion of drinking wine in the middle of the day had been discountenanced for many years past by doctors and everybody that went to a place for lunch required spirits or soda water. He had to send out for such drinks to some public house in the vicinity. The money had to be extracted from the customer who had to wait until his refreshments were brought to him through the street. That was not an advantage to the liquor itself, especially with the dust flying about and the intense heat of the sun 1899 08 23

1899 12 08

New Hotel, "Fleur-de-Lis", Humberstone road, Chesterton. This first-class hotel is now open and replete with every comfort. Billiards room in course of erection. Gentlemen visiting the hotel will find the Smoke Room fitted with every comfort – advert 1899 12 08

1900 09 02

Cambridge magistrates received a petition against renewal of the licence of the Windmill public house in Mill Road. Frederick Hodson considered the neighbourhood was overcrowded with them. Mr Papworth said he had visited the house on many occasions but never seen more than two people at the bar at a time. Freeman & Sons, brewers and owners said the house was in a bad state and had been closed for repairs, not because there was no trade. They had no right to take away the licence even if the tenant only sold a barrel of beer a week. Albert Brand, the new tenant said business had trebled, 60 people patronised the house every day and last Saturday he had upwards of 100 customers. The licence was not renewed c00 09 29

1900 10 19

An appeal was heard against the refusal to grant a licence to the Windmill public house in Mill Road, Cambridge. It had good stabling and in fact was the only public house with stabling. It had been licensed since 1835 and had been thoroughly renovated. It was a labourer's house in a neighbourhood of labourers. A petition signed by 112 residents was opposed to the licence but another signed by 230 was in favour. The decision was reversed and the licence renewed c00 10 19

1901 03 19

A shocking accident occurred at the Panton Brewery, Cambridge, when one of the brewery employees lost his life. The man fell into the copper which contained a large quantity of boiling liquid and was frightfully scalded. He scrambled out as speedily as possible but even then it was seen that his injuries were so awful as to leave little hope of recovery. He died from shock the following morning. c01 03 19

1901 06 17

Messrs Sutton and Phillips, brewers' chemists of Stowmarket claimed £10 3s.6d. from the Rodney Brewery, Cambridge. They make Burton spring liquor and ask for a sample of the customer's brewing water which they analyse and make up a mixture to make it as near as Burton water as possible. If they did not subsequently receive an order they were to be paid for the analysis. Mr Swan for the brewery said they had never used the liquor and did not like trying those sorts of things. When he said the traveller could have a sample of water he had no idea he was to be charged with the analysis of it c01 06 17

1902

Anchor Brewery Quayside closed [16]

1902 01 20

That brewery has now been closed. On the whole the accounts were extremely satisfactory. Going back to the first report of the company in 1892 the assets had been increased by nearly £18,000 CDN 1902 01 20

1902 10 03

Earl Grey's Public House Trust movement is spreading to Cambridgeshire. Moderate temperance advocates see in a public house specially organised to push the sale of food and non-intoxicants, but supplying drink to those who desire it, one of the best and most certain means of lessening the terrible amount of excessive drinking which unhappily prevails in this country. The managers have absolutely no financial interest in the sale of drink which strikes at the root of an abuse which goes on far too extensively – the supplying with drink of men, who if not absolutely drunk, have obviously had more than is good for them. CDN 1902 10 03

1902 11 29

The well-known fully-licensed Hoop Hotel, Bridge Street, Cambridge was offered to public auction. The establishment has had a long career, having been established in 1729, and was referred to by Wordsworth – "And at 'The Hoop' alighted, Famous Inn". Bidding commenced at £2,000 and rose to £4,000 at which figure the property was withdrawn. c02 11 29

1903 08 11

Falcon Inn Yard, Petty Cury demolished Our attention has been drawn to the fact that another link with the fascinating past of Cambridge is being severed by the almost entire demolition of

the one-time famous 'Falcon Inn'. Many years ago the front of the building, with its fine old gables facing Petty Cury, disappeared and about eight years ago the buildings on the left side of the Falcon Yard were demolished to make way for business extensions. Now the rooms on the right side are in process of demolition for extra accommodation for the Lion Hotel. The back part possessing a small specimen of the open gallery remains – CDN 11.8.03

1903 04 16

Magistrates considered the renewal of the licence of the Unicorn Inn, Trumpington. The accommodation consisted of three bedrooms, two were furnished and used by those living in the house. The third, the guest chamber, was at present bare. The Chairman: Poor guest. Mr Ralkes: He would be a very poor guest who came there. There was no stabling; the landlord did keep a pony and trap, but whether he kept them in the unfurnished room he did not know. (Laughter). It was difficult for a man to make a living there; the actual consumption of beer in the house per week was half a barrel. c03 04 16

1903 12 03

Some 20 years ago premises in Gwydir Street Cambridge were used as a brewery; they became dismantled but now through the enterprise of Mr Frederick Dale it has been converted to an up-to-date brewery where beer made from pure malt and hops will be manufactured. Its speciality will be family pale ales and nourishing or invalid stout, an article a small brewer seldom undertakes to manufacture. Messrs Adlam of Bristol have installed the most improved machinery and the most up-to-date methods are employed. 03 12 03

1904

death of William Warboys, brewer, Sturton St [3.23]

1904 02 05

Samuel Bell of the Brookfield beer house, Cambridge, applied for a full licence. It was in a growing neighbourhood, near the Saxon and Norman Cement Works where 300 men were employed. It was doing a good beer trade and he had received numerous applications for spirits. The nearest full licensed house was the Royal Standard, a quarter of a mile away. Two petitions had been extensively signed, some by people who were teetotallers. CDN c 5.2.1904

1904 02 17

The Cambridgeshire Public House Trust Association was registered in 1903 and has taken over the Tharp Arms Inn at Chippenham, the Duncombe Arms at Waresley with the George Inn, Babraham soon to follow. The movement was a commercial undertaking with a philanthropic end. They wanted to raise the tone of the public house and promote temperance. The managers obtain no benefit from the sale of alcoholic liquors but make a profit on non-intoxicants; hot soup is supplied and villagers seem to appreciate the change as more and more public houses are ready to supply non-alcoholic refreshments. CDN c 17.2.1904

1904 03 26

Cambridge Licensed Victuallers' Protection Association was started 14 years ago with 15 members and now they have 260. People must have drink in the shape of alcohol and they must have persons who would supply it. It was not always their fault if they got into trouble because it was impossible to see what every individual did who came into their house. But they failed to see why the persons who sat on the Bench and were known to be teetotallers should exercise their jurisdiction in dealing with licensed houses. There were people connected with the Trade quite as

competent to act as magistrates who would not be so biased in favour of the Trade as the teetotalers were against it. CDN c 26.3.1904

1904 06 20

Sir – why was it necessary to have 20 drinking booths at Midsummer Fair? No reasonable person can contend they were all required. The licences have to be applied for and the magistrates appear to be too faint-hearted to deny one applicant what they grant to another. I am concerned that either through their negligence or the apathy of temperance people the annual pleasure fair should become a drinking debauch. There was practically a whole street of drinking saloons. Apart from their presence being a strong incentive to a serious amount of unnecessary drinking this is unfair to the public houses in the vicinity who would have done an increased trade in a legitimate way for a few days. – Disappointed - 1904 06 20

1905 03 13

Cambridge magistrates were told there were about 440 houses on the Rock Estate with one full-licenced house, the Rock Hotel and one off-licence. Either of these sent out beer to houses as ordered. There are also at least four brewers' vans to deliver beer in gallon jars and bottles, and grocers from Cambridge send up pint bottles. If they granted a new licence to William Conder of Marshall Road, which was a new and fairly populous district, it would lead to secret drinking, more especially by women at their homes. The licence was refused. 05 03 13a-c

1905 06 27

Sir – is it not about time that the annual Bacchanalian orgy known as Midsummer Fair was abolished? On Saturday night men, women and even children intoxicated by drink were behaving like maniacs. There were 14 tents for the supply of intoxicating liquors whilst behaviour in the dancing tents is indescribable. In one booth I saw two tiny mites whose mothers had given them too much to drink, for they were quite intoxicated and outside another I saw five perambulators standing unattended – A.J.L.B. 05 06 27a & b

1906 03 08

The Beehive public house, Honey Hill, Cambridge had four rooms on the ground floor, including a parlour and a taproom for the use of customers. There was a front entrance from Honey Hill and a side entrance which also gave access to four cottages. It was therefore impossible for the police to maintain proper supervision as a constable would be seen going down there and people could slip out. There were 15 other public houses within 200 yards. Also: Golden Cross, Suffolk Hotel Grafton St, White Horse Coronation St, Sun in Sun St - The Beehive public house, Honey Hill, Cambridge had four rooms on the ground floor, including a parlour and a taproom for the use of customers. There was a front entrance from Honey Hill and a side entrance which also gave access to four cottages. It was therefore impossible for the police to maintain proper supervision as a constable would be seen going down there and people could slip out. There were 15 other public houses within 200 yards, Star in Castle St, Boot in King St 06 03 08c & d

1906 03 27

When Cambridgeshire magistrates started the task of extinguishing licences of public houses thought to be superfluous the offers of compensation were accepted in all but three cases. These were the Wait for the Bus at Bottisham, the Sir Harry Smith at Swavesey and the King's Head, Oakington, all owned by Hudson's Brewery of Pampisford. Now the Inland Revenue Commissioners have awarded larger sums for two, but reduced the amount offered for the Wait for the 'Bus from £355 down to £120. Now the brewery may appeal 06 03 27a

1906 06 30

Fourteen public houses have been closed under the Licensing Act of 1904. They include a beer house at Heath Road Litlington, which sold one barrel a week, including stout, and a gallon of ginger wine. All their beer was made from pure malt and hops and it was a better house than the two nearest to it. There were four fully-licensed houses, four beer houses and one off-licence in the village. The Dolphin at Stapleford had been shut up for six weeks as the former landlord had run away and the village appeared to do well without it. The present tenant was a cycle agent and taxidermist as well, 'So you stuff people first and put them on wheels afterwards?' Also Cambridge: Jolly Butchers, Star, Sun; Bassingbourn: Crown; Bottisham: Plough; Comberton: Plough; Fordham: Six Bells, Landbeach: Red Cow; Lt Shelford: Carrier's Cart; Stapleford: Dolphin; Steeple Morden: beer house; Waterbeach: Haunch of Mutton, Plough and Horses; Willingham: William IV, Rose and Crown 06 06 30d,e, f

1906 The Compensation Authority considered claims for premises closed under the Licensing Act. They included a beerhouse at North Brook End, Steeple Morden, The Plough at Comberton, the Red Cow, Landbeach and Carrier's Cart at Lt Shelford. Potton Brewery said they would lose £275 if the licence of a beerhouse at Heath Road, Litlington was taken away but accepted £240 as compensation. However Benskin's Watford Brewery refused £251 for the Sun in Newmarket Road, Cambridge. also Stapleford Dolphin, Waterbeach Haunch of Mutton & Plough & Horses, Sawston – Flower Pot, Willingham – King William IV, Bottisham Plough, Soham Queen's Arms and Old Brewery, 06 11 16a & b

1906 11 17

Licensing compensation – Sawston Flower Pot, Cambridge: Newmarket Road Sun, Honey Hill Beehive; Willingham King William IV – 06 11 17 a & b & c

1906 12 29

Hudson's brewery applied for the transfer of the licence of the Golden Fleece, Ram Yard, an old beer-house attached to Brown's billiard rooms, which years ago was a celebrated resort of University billiard players. The house had been closed for eight months but now there was a new tenant. Some days ago it was refused, but now it was granted. Are 14 ale houses in Barnwell. 06 12 29a

1907 12 29

A London newspaper describes Barnwell as a slum area of Cambridge chiefly inhabited by brickmakers; it claims there is little traffic along the road but within four minutes walking one passes 14 alehouses, some positively next door to each other. However in recent years the area has undergone a great improvement with the building of the Abbey Estate, and the amount of traffic has increased. But no one will gainsay the comments on the number of superfluous public houses. 06 12 29d

1907 02 23

Cambridge Fire Brigade received news that a fire had broken out at Rhadegund Brewery, James Street, occupied by F.J. Swann. Fortunately the services of the steam engine were not required. The fall of live coal on a rug left the room full of smoke but Mr Swann threw buckets of water towards the grate while furniture was removed from the room below. 07 02 23

1907 03 07

The White Swan in Castle Street, Cambridge, was in a dilapidated condition. There were large rat holes in the bar floor, the parlour floor seemed shaky and the whole place was permeated by a very unwholesome smell. It was impossible to open the windows, the plaster work of the ceilings

was poor and occupants of bedrooms on the second floor had no proper means of exit. The licence was renewed provided an outside iron staircase was constructed and structural deficiencies rectified. Also the Spotted Cow, Thatched House, Red House, Claremont, Woodman's Arms, Golden Fleece, Marquis of Granby 07 03 07a & b

1907 10 15

Temperance Societies have every reason to rejoice: the Cambridge of today is far more sober than 50 years ago and far less money is now spent on intoxicants. The first society was the Independent Order of Rechabites in 1841 but this closed after the 'Illegal Assemblies' Act. It was revived in 1905. Now 3,300 adults and children pledged to total abstinence paraded on Parker's Piece. 07 10 15

1907 10 07

Fire mineral water works, Hobson Street – 07 10 31

1907 11 05

A brewer's drayman was fined for hawking beer. An Inland Revenue officer said he saw a boy stop a cart belonging to William Pegg, brewer of Newmarket Road, and say "They want you over there", pointing to some men engaged in harvesting. The man had taken them a gallon jar off the cart for which he received one shilling. It was extremely unfair to sell beer that way as it took away from the custom of those who were legally entitled to sell it. The brewer said he had told the drayman not to sell beer without an order; the brewing business was a hobby of his and he would not be intentionally guilty of an illegal practice. 07 11 05 & a

1907 11 29

The Licensing Compensation Authority considered nine public houses including the Pike & Eel at Fen Ditton, Green Man Harston, Three Horse Shoes at Lt Shelford and Duke of Cumberland in Over. The Bell at Isleham, owned by Treadway and Percy brewers of Soham was awarded £100. In Cambridge they discussed the Marquis of Granby in Staffordshire Street, Claremont in Ainsworth Street, Woodman's Arms on Newmarket Road and the Golden Fleece in Ram Yard, a beerhouse owned by Hudson's of Pampisford. 07 11 29

1908

Great Temperance activity due to proposed Licencing Bill [3.27]

1908 01 24

The owner of the Cow and Calf public house in Shelley Row has told councillors that if they will surrender the licences for the Nag's Head and Baker's Arms pubs – which they own – then he will give up land to allow for the widening of Albion Row. If they agreed to extend his lease he'd also give land for the construction of more cottages and a backway to the Pound in St Peter's Street. 08 01 24a & b

1908 03 05

The Waggon and Horses on the corner of Burleigh Street and East already held a music licence. They had a commodious room capable of holding 50 people which they wished to use for public dancing once a week. But the Chief Constable said it was in an awkward part of Cambridge. A lot of people visited the house and it would not be well to offer further facilities. The licensee had his hands full in looking after the pub as it was at present. also Nags Head, Albion Row; Spotted Cow, Northampton St; Carpenter's Arms, King Street 08 03 05 a & b

1908 03 09

The Long Reach public house stands on the river bank a quarter of a mile from Old Chesterton. The landlord paid no rent and was allowed five shillings a week to keep the house open. The trade was about 21 barrels of beer and 12 gallons of spirit a year. It should be closed together with the Jolly Waterman in Waterbeach Fen. It had no road leading to it and the nearby Jolly Anglers was more convenient and had a ferry attached 08 03 09 & a

1908 07 31

Twenty-six licensed houses are to close, magistrates decided. They include the Robin Hood at Litlington, Chesterton Long Reach, Swaffham Prior's Uncle Tom's Cabin and the Three Jolly Watermen in Waterbeach Fen. But the Fox in the Wood at Soham and the Cock at Isleham were spared after Police Superintendent Winter failed to appear to give evidence. The licence of the Black Horse at Over was renewed after the Star Brewery appealed. Also Barrington Boot & Shoe, Bassingbourn Yew Tree, Steeple Morden Lion, Swaffham Prior John Bull, Bottisham Rose & Crown, Cottenham Six Bells, Oakington Lion and Lamb, Stapleford Hammer & Anvil, Swavesey Chequers, Willingham Little Rose, Castle Camps George, Balsham Ram, Linton White Hart, Cambridge Yorkshire Grey, Old Red Lion, Nine Pines, Thatched House, Baker's Arms, Red Lion, Brewery Tap & Carpenters' Arms CWN 08 07 31

Tenancy of Nag's Head – to close, Albion Row houses – 08 09 25 p6

1908 10 02

Three hundred Cambridge men journeyed to London to protest against the Government's Licensing Bill. They joined a procession of 2,000 men from King's Cross station in front of a band from Hull which did much to enliven the long and tedious walk. But the main London arteries were so choked with traffic that they were late in arriving at Hyde Park. It was a sober and serious protest with not one drunken man in sight. 33 10 02

1909 03 05

The Rose and Crown, Pound Hill, was damp with paper peeling from the wall. There were seven other licenced premises nearby which all did better trade. But the landlord said he exercised great discretion in the customers he encouraged. Other pubs were frequented by the lower class. If it were closed it would be an inducement to the others not to cater for the better and quieter class

but to draw a larger number just so they could boost their sales of beer, Magistrates renewed the licence. Also Traveller's Rest Huntingdon Road, White Horse in Coronation Street, Prince of Wales in Church St, Fox & Duck South Street, Oxford in Crispin Street, Johnny Gilpin in Gold Street & Prince Albert Castle Street CWN 09 03 05

1909 07 02

A number of village public houses are no longer economic and should close, magistrates were told. They included the Bell at Meldreth, Melbourn's Old Elm Tree, The Royal Oak Fulbourn, The Lamb and Lord Nelson at Cottenham, British Queen Chesterton, Queen's Head Dry Drayton, Over's Hare and Hounds, Balsham Five Awls and Soham's Fox-in-Wood. But the licensee of the Green Man at Swavesey said he did not want to leave it. also the Prince of Wales, Church Street and White Horse in Coronation Street, Cambridge CWN 09 07 02 – includes Cambridge Prince of Wales & White Horse – CWN 09 07 02

1909 12 03

Lacon's brewery should receive £143 in compensation for the closure of the Red Lion public house at Orwell, the tenant, George Everitt, £16 and the Lord of the Manor £5, councillors decided. They awarded £200 compensation for the Fox and Duck in South Street Cambridge and £325 for the White Horse in Coronation Street. Agreement was also reached on The Bell at Meldreth, The Old Elm Tree Melbourn and the British Queen and Prince of Wales in Chesterton CWN 09 12 03

1911 02 24

The Cambridgeshire Public House Trust Association says that inns that are well conducted have to bear a much heavier burden of taxation than pubs which merely serve alcoholic liquors. To add refreshment rooms or bedrooms to existing houses is now impossible but improvements have been made to the Hardwicke Arms at Arrington and the Bell Inn, Kennett. Others including the Tharp Arms, Chippenham, George and Dragon Snailwell and the Spread Eagle at Croxton have been maintained in good condition though profits are down again 11 02 24

1911 07 14

The Crystal Palace pub in Mill Road Cambridge was difficult to supervise, police reported. The only way to get to the back was down a narrow passage at the side, the door of which was always locked. The Bell in Northampton Street was in bad repair with terrible accommodation, the house was damp and the only cooking facilities were in an underground kitchen. The landlady of the Chequers Impington said it was the only place to get a good glass of beer and if it closed many a man would become a teetotaler. The Gravel Diggers was right down in Cottenham fen but there

was a considerable amount of labour at certain seasons. The tenant had held the licence for 30 years. It was renewed 11 07 14

1911 07 21

The Little Rose in Trumpington Street was close to Addenbrooke's Hospital and the landlord believed that no matter what time of the day it was on a Sunday, if anybody came and said they had been to the Hospital he was perfectly justified in serving them liquor. If they had come from a longer distance than that required by law this was quite right. But a policeman said he had watched two men who neither came from or went to the Hospital and had been served with a drink. Next time anybody was brought to court they would be severely dealt with. 11 07 21

1911 10 20

Dale's Brewery of Cambridge has been awarded the world's championship (and a 50-guinea cup) for the best bottled beer at the Brewers' International Exhibition held in London. The championship beer is selected from those entries winning first prizes in the various bottled beer classes. The first prize won by Dale's was for the best pale ale and this was unanimously judged as champion. They also won an award for their draught beer. Considering the firm is hardly 12 years old this is a remarkable achievement. 11 10 20b (also wins Brewers Journal Silver Challenge Cup & 20 medals for best beer [1.23]

1911 10 27

The 1904 Licensing Act gave justices power to close pubs with compensation on grounds of redundancy. Then Cambridgeshire had 675 'on' licences, Cambridge 241; in six years 115 houses had closed, of which 35 were in Cambridge. The 1908 bill had suggested formula for the number of licenses. Under it Cambridge would have had entitlement of 82, a loss of 124 pubs. In Fen Ditton three of the existing pubs would have been closed and customers concentrated into the remaining two. But there was no evidence that a reduction in the number of pubs meant less drunkenness. Some people thought it was a crime for a working man visit to a pub to get a glass of beer but the drink is not the chief attraction: it is the social intercourse. 11 10 27a-c

1912

1912

Two Swans, Clarendon St closed & becomes grocery & off-licence (plans to reopen in 1987 blocked) [13.5]

1912 04 19

One of the ancient University privileges is the power to grant licences for the sale of foreign wines. Licences have been granted to Bursars or stewards of colleges, college butlers or managers of college kitchens and to the custodian of Fitzwilliam Hall. Hotel keepers, grocers, chemists, confectioners, restaurant keepers, the manager of the refreshment room at the railway station and wine merchants also have a Vice-Chancellor's licence which is free. But a wine-dealers licence cost ten guineas annually. Now this last relic of University control over the market and sale of provisions in Cambridge may be abolished 12 04 19b & c

Hawes, had a narrow escape, for, although knocked down by the force of the explosion, he escaped injury. The cause of the explosion was apparently a leakage of gas, but exactly how it occurred is unknown. The gas meter was blown from its position, and three large windows and a quantity of glass in the bar were broken. The floor boards became ignited, and although the licensee took prompt action, he found it impossible to extinguish the flames with buckets of water, and so gave the alarm to the Fire Station. The firemen, with motor tender and escape, were speedily on the scene, and the fire was soon extinguished. An examination of the gas pipes failed to reveal from where the gas escaped 17 02 14 CIPof

Hotel sold,—Considerable interest was taken in the sale conducted by Messrs. Chalk at the Lion Hotel, Cambridge, on Saturday afternoon, when the auctioneers offered for disposal the valuable freehold hotel, known as "The Rock Hotel," Cherry Hinton Road, Cambridge. The "Rock" is the only fully-licensed house in the district the nearest on the Cambridge side being three-quarters of a mile away and on the Cherry Hinton side a mile distant. The house was built 24 years ago, and is let to Messrs. Lacon and Co. (whose tenancy expires on October Inn next) at the annual rent of £175. The bidding was keen, offers coming from many parts of the room. The property was put in at £3,000 (offered by 'a well-known. local tradesman'), and rapidly rose by bids of £50 to over £4,000. £25 bids carried the amount to approaching £5,000 and £20 bids to the final figure of £5,040. For this sum the property was bought by Mr. H. Ambrose, the licensee of "The Panton Arms" Cambridge. He said the trade in beer of the Bird in Hand, Newmarket Road, was better than that of the Hare & Hounds which was 107 yards away. The next nearest house was the Crown in Wellington-street. Charles Byatt, the tenant, said he had held the licence for about 20 years. He was quite satisfied with the living he was making. Arthur E.W. 1925 01 18

The well-known Cambridge brewery business which has been carried on for 28 years in Panton Street by Messrs Bailey & Tebbutt is to change hands. They acquired the brewery in 1897. At that time they were carrying on the Granta Brewery under the name of "Robinson & Tebbutt". Mr Bailey's late father was owner of the Star Brewery. The business has now been acquired by Messrs Greene, King & Son c25 01 18 [1.20]

1926

Scales King Street brewery taken over by Barclay (later sold Wells & Winch & Greene King [4.21])

1926 07 17

The Star Brewery applied for the renewal of the licence of the Crown beerhouse in Wellington Street, Cambridge. There were seven fully-licensed houses and three beerhouses within 260 yards. They had lost the licenses of the Woodman's Arms & Crown and Anchor in Newmarket Road in 1907 & 1910, the Oxford, Crispin Street in 1916 and the Priory Tap in 1911. The brewery had rebuilt and brought the Crown up to date in 1914 but as the tenant's family increased the trade was neglected: It was not a good thing for a house of this kind when there was a lot of children running about c26 07 17

1926 07 18

Trade at the George the Fourth public house in East Road, a beer drinking, working-class residential neighbourhood, had been carried on for years without complaint. There were about 20 persons living there every night of whom 16 had been there from one to 12 years; one old man, aged 83, had been living there for ten. Housing conditions in Cambridge are very bad, there were 700 or 800 applications for houses at the present time. It was difficult to see what was going to happen to these people if the license was withdrawn and the pub closed down c26 07 18

1927 12 23

Thousands of bottles of old ale, specially brewed for Trinity College and matured in the college cellars, have been sent this Christmas to Cambridge men all over the country. Trinity Audit Ale is

declared by brewers to be the finest known. Every year there is a big demand for it, but not a bottle is allowed to be sold to the public and only present and past members of the college are allowed to buy it. The ale is matured for two years before it is sold and treated with all the care of an old wine. The recipe of the drink, which until fairly recently was brewed in the college itself, is kept a secret. c27 12 23

1928 02 12

Justices turned down an application for the removal of the licence of the Elm Tree, Orchard Street, Cambridge to premises proposed to be erected at the junction of Milton Road and Green End Road. The Elm Tree was redundant and not necessary for the needs of the locality and there were over 100 people in favour of the new site. Large numbers of houses were being erected in that area which would be inhabited by people who would not be able to afford a wine cellar of their own and have to go to a public house for their bottle of beer. But the residents were people who had been taken from the slums; their incomes were very small and there was no margin for drink in their budget. c28 02 12

1928 07 22

The future of the Bell public house, Botolph Lane and the Plume and Feathers, Park Street, Cambridge was considered by the Licensing Committee. The Bell was difficult for police to supervise. It had no downstairs accommodation for the tenant and meals had to be taken in the smoke room during closing hours. The renewal was refused. The Plume and Feathers had little accommodation and was frequently congested with a few customers. It had been done up and the yards had been covered over. The trade had gone up and was better than the Maypole. c28 07 22

1929 11 20

The Royal Institute of British Architects has presented a bronze medal to be awarded annually for a building of outstanding merit erected in Essex, Cambridgeshire and Hertfordshire. One of the conditions is that it must front to a street, road, square or court to which the public has access. Its first award is for the Rose and Crown public house on Newmarket Road, Cambridge designed by Basil Oliver and built by W. Sindall for Greene, King & Sons. A suitable tablet will be fixed to the building CDN 20.11.1929

1929 12 27

Cambridge has also lost a popular figure in Mr Frederick Dale, head of the brewery that bears his name. He started it 25 years ago and it rapidly became one of the largest in the district. He took a keen interest in the affairs of many local clubs and many forms of sport enjoyed his patronage, but he shunned political life. One of his chief hobbies was the collection of antiques and he had an extraordinarily fine collection of old English silver CDN 27.12.1929

1930 02 01

Architects, brewers and builders gathered outside the Rose and Crown public house on Newmarket Road, Cambridge, to witness the unveiling of a plaque proclaiming it one of the best buildings erected in East Anglia during 1928. They then adjourned to the very attractive club room for speeches. The Vice Chancellor said that Cambridge had a good tradition for good beer. When he was an undergraduate there was a college servant who sang: "I likes a glass of good beer, I does. It does you no harm, and does you a lot of good" 30 02 01

1930 10 23

Herbert Robinson, the motor engineer told the court he had purchased the leasehold of ‘The Fountain’ pub, Regent Street, Cambridge from the Star Brewery intending to add the site to his business premises. He granted the lease to a landlord for five years with a provision that he could regain possession earlier and now wanted it back 30 10 23a-c

1931 02 13

Cambridge justices heard that the Crown and Sceptre in Clarendon Street was only open from Monday to Saturday and closed at nine o’clock instead of ten, which was the ordinary time for licenced houses. It was a comfortable house and the company was good but customers found early closing irksome and went to other pubs of which there were five within 200 yards. A full licence was granted subject to improvement in the sanitary arrangements. 31 02 13c-d

1931 02 13

The Robin Hood at Cherry Hinton was the only licensed house on the main Cambridge-Fulbourn Road but only had a beer licence. The brewery had spent a good deal of money improving the amenities and the introduction of motor buses and charabancs had made a great difference in trade. During the summer people came in almost every day for teas and meals like bread and cheese. It was much used by walkers including ladies who asked for port. 30 02 13e-f

1931 03 13

Hudson’s brewery had closed six public houses in Cambridge: the Brewery Tap in Bridge Street, the White Swan and Prince Albert in Castle Street, the Beehive on Honey Hill, Spotted Cow in Northampton Street and Golden Fleece in Ram Yard. But they wanted to renew the licence for the Baron of Beef. The application was supported by a petition from the Sick Benefit Society and was granted. Also Cow & Calf & Crown & Sceptre 31 03 13f

1931 10 23

Prompt action averted a serious fire at the Panton Brewery, Cambridge. The premises were deserted at the time of the outbreak as the mechanics and other employees were away at breakfast but as soon as the alarm was given many hastened to the spot with chemical extinguishers, but flames spread to the roof and loft of a small workshop. The fire brigade arrived in under five minutes and prevented a big fire. 31 10 23b

1932

Baron of Beef rebuilt [1.6]

1932 03 05

Magistrates refused to relicence the Bowling Green public house, High Street, Chesterton. The landlord said a billiard room had been re-decorated, he had regular customers and it had become

more or less an institution. But there had been a decrease in trade, despite the growing estate nearby. The Maypole in Portugal Place was the headquarters of the Whippet Club; the tenant was 70 years of age and his only means of support would be the old-age pension. This together with the Alhambra in East Road, the Eagle Tavern beerhouse in Victoria Road and the Clarendon Arms was relicensed. 32 03 05 & a

1932 03 05

Justices approved a licence for the Vine Hotel proposed at the corner of Vinery Road and Coldham's Lane. 1933 03 08

British Queen, Histon Road newly built [2.23]

1933 03 04

Licencing – Maypole, Alhambra, Carlton - 33 03 04

1933 07 03

Councillors agreed to renew the licence of the Three Tuns, Castle Street, Cambridge on the understanding that a new public house would be erected on the adjoining site of the old White Swan, which is also the property of the Corporation. This would avoid the demolition of the Three Tuns, which has a definite local history and connections to Dick Turpin, but is structurally unsound. 33 07 03 p6

1933 07 07

The Carlton public house in Lensfield Road owned by Lacons brewery had seen an increase in trade following the Budget decrease. There had been no complaints about the tenant, Edward Bettesworth, who was getting a living and wanted to retain it. Its licence was renewed but not those of the Coach and Horses on Newnham Road or the Alhambra on East Road where there were five other pubs within 220 yards and the trade was decreasing. 33 07 07 p12

1933 10 06

The Baron of Beef public house in Bridge Street was partially destroyed by fire. Firemen found flames shooting half-way across the Blackmoor Head Yard and people living at the Mitre pub began to get alarmed. It is one of the fire danger zones in Cambridge, congested with plenty of old property. The Baron was almost entirely rebuilt in 1932 which involved the demolition of four old cottages and three others were destroyed to make room for the new garages. 33 10 04 [1.6,2.21]

1935 07 05

The tenant of the Red Lion at Trumpington had been there since 1916. If the licence was taken away he would be deprived of his livelihood & the Red Lion Self-Help Club would be broken up, magistrates heard. There were 34 allotment holders on ground belonging to the pub and half the allotment land in the village had already been lost on account of building. It was an old-fashioned house, very quiet and homely and the Feast was held in a field at the rear. They served teas to anybody who asked for them, but not much beer. 1935 07 05

The Five Bells was one of five fully-licensed houses in Cherry Hinton. In 1920 the Hop Bine, next door, was done away with and the Russian Arms had been closed in 1912. Lacons the brewers said the extra penny on beer had hit sales. The Five Bells had been ringing harmoniously for a good many years to the comfort and convenience of the inhabitants and should be allowed to continue to ring a little longer. The licence was renewed – 35 07 05b

1935 09 12

The White Horse Inn at the foot of Castle Hill is a 15th-century building surrounded with mystery. Between the two chimney stacks is said to exist a small secret room once used by Royalists as a hiding place from their enemies. The entrance was probably by way of the chimney but as the wide fireplaces have been bricked up there is no means of ascertaining whether there were iron rungs on one side. But inside a cupboard on the first floor landing is an iron door built a few years ago to enable a sweep to enter. The mystery may be solved if and when the building is demolished, as it may be in the near future for road widening purposes. 35 09 12a

1935 10 26

The Three Tuns public house at Castle Hill was a picturesque building and there were too few of that sort remaining. Dick Turpin was supposed to have stayed there at one time, but that was purely legendary. Mr Northfield had restored it some years ago so as to make people think it was really an ancient building but it had just been painted to look like a half-timbered house. It was not fit for human habitation and the Cambridge Preservation Society could not appeal for its retention 35 10 26a

1935 12 07

A map entitled 'A plain delineation of ... Cambridge setting for the inns and taverns thereof' and drawn in the eighteenth-century style has just been produced by Ian Cox. Together with two of his University friends he has been making a tour of the aforesaid inns, sampling the ales sold and the pastimes which customers amuse themselves. There is a list of 199 places where beer and ale can be obtained and notes on the 15 brewers whose products are sold, as well as the Audit Ale. 1936 02 08

Two new pubs in Coldham's Lane were considered. The Star Brewery's 'Haven Hotel' at the junction of Vinery Way would be like an Elizabethan Manor in red brick with stone dressing and red tiled roof. Greene King planned the 'Merry Monarch' opposite Brooks Road as a plain up-to-

date pub with a Cumberland turf bowling green attached – far more appropriate than the ‘Brewers Jacobean’ proposal. But this was a new housing area in which many people were starting out in life and taking of a narcotic drug like alcohol was subversive to the economic, moral and spiritual welfare. Both applications were refused 36 02 08 & a

1936 02 13

Wells and Winch Ltd, brewers of Biggleswade, announce the opening of the new ‘Yorkshire Grey’ Chesterton. This house has been designed to ensure the comfort of its patrons, both new and old, and is the latest endeavour of Messrs Wells and Winch to make licensed premises clean, healthy and attractive. A spacious clubroom is available for parties – this room having a private entrance and conveniences. Tenant Thomas Evans. Architect E.H.C. Inskip & Son, Bedford 36 02 13

1936 03 06

The Star Brewery want a new pub, The Golden Hind, on Milton Road, an area of 1,010 houses of which the majority had been built since 1927. It was not ribbon development but housing estates on each side and practically built up to the railway gates. King’s Hedges Road would form part of the new Ring Road so further development might be expected there. If granted the brewery would surrender the licence of the ‘Racehorse’ on Newmarket Road and the ‘Plume of Feathers’. The Women’s Total Abstinence Union opposed the application. Licence applications Elm Tree, Hare and Hounds & Dog & Pheasant. Licence of Bowling Green Chesterton transfer to new Golden Hind 36 03 06 Golden Hind application granted – 36 03 07b & c

1936 03 27

Alfred Scales carried on his father’s business as wine and spirit merchants, formerly well-known as Scales Brewery. He retired in 1925 when the estate was disposed of and the business taken over by Messrs Barclay, Perkins & Co. During the war he arranged sports and entertainments for the patients at the 1st Eastern General Hospital and took special interest in the bath ward where wounded soldiers used to lie continually in baths of warm water. 36 03 27c

1936 08 28

Ye Olde Three Tuns, Castle Street demolished [1.2]

1937 07 08

The publican of the Prince of Wales, Histon Road, Cambridge became licensee in May 1914. His wife ran it while he served in the army during the war and afterwards he made 25 per cent profit on beer and a third on spirits. 1937 02 04

Magistrates received an application from the Star Brewery for the removal of the licence of the Garden Gate at Little Wilbraham to premises to be erected on Newmarket Road to be known as the Airport Hotel. However Lacons Albion Brewery asked for the removal of the licence of the Cow and Hare at Lode to a new pub to be known as the King George, also on Newmarket Road near the borough boundary. 1937 02 06

The Star Brewery applied for the transfer of a licence from the Crown and Compasses in Coronation Street to a new 'Vine' pub in Vinery Way. There had been 817 new houses nearby and many residents supported the application. But several residents thought it would devalue their property and Mr Skeel, who has an off-licence in Vinery Road, opposed it. Greene King also wanted to erect 'The Running Footman' in Coldham's Lane opposite Brooks Road. It would be open at all times for the sale of teas and would have a Cumberland turf bowling green. Both were refused. 37 02 06b

1937 03 05

Magistrates heard that the Old Guinea public house in Russell Street was owned by the Star Brewery who had redecorated it and fitted a new fire and sink. There were seven fully-licensed houses and two off-licences within 400 yards. The Burleigh Arms in Burleigh Street was a beerhouse which provided a living for the tenant who found great difficulty in getting any work. The Rabbit in Gold Street was a comfortable little house; it had two extremely nice trade rooms and Green King had put in new windows. The residents of East Road might be 'scared off' a big place. The Cross Keys in Saxon Street was the only beer house in the neighbourhood which had five fully-licences housed within 400 yards. Beer was drawn straight from the wood, which was an attraction and trade was good. 37 03 05j

1937 03 05

Proposed Weathervane on Perne Road refused – 37 03 05n

1937 07 02

Magistrates heard that the Old Guinea public house in Russell Street was redundant: it sold a little over two barrels of beer a week and there were nine other premises within 400 yards. The Star Brewery was happy for it to close. But brewers Greene King opposed the closure of the The Rabbit in Gold Street. It was a nice clean little house and they had recently made alterations and repairs. It was close to the Burleigh Arms in Burleigh Street and they would not oppose closing that instead. This was agreed. 37 07 02 & a

1937 07 02

Dales brewery modernised with new bottling units and pure air plant; group photo – 37 07 02c

1937 07 30

The historic 'Ye Olde Castel Hotel', which dates back to pre-Cromwell days, enters another phase as Messrs Barclay, Perkins and Co. open a new and modern building. The old character of the house, from the time when its stables were filled with horses and latterly its garage with cars, has disappeared and upon the site has risen the Regal Cinema and a smaller, but more modern 'Castle'. 37 07 30

1938 02 05

Greene King wanted a new pub, 'The Running Footman' on Coldham's Lane, opposite Brooks Road. It would cater for people needing non-alcoholic drinks and keep open outside licensing hours. There were 1,700 residents within a quarter-of-a-mile with more coming soon when the ring road opened. But the licensee of the Brookfield Tavern said it would hit his trade while the Temperance Council claimed alcohol was a narcotic drug and dangerous to motoring – that was why insurance companies offered a rebate to drivers who abstained. It was refused as was another on Perne Road to be called 'The Weathervane' 38 02 05 & a

1938 03 04

The White Swan was one of four pubs in Norfolk Street; in five years the sale of beer had doubled but spirits had gone down.- working classes could not afford spirits. The licensee had been barman at the New Theatre for 37 years but had to leave when it was converted to a cinema. The Tailors Arms nearby was a beerhouse and it would be better to cut down methyated spirits licences rather than beerhouse licences. Trade at the Gwydir Arms had declined as the licensee, Mrs Newman had got old so the brewery had offered her ten shillings a week for life to give it up. It was one of the 'nicest little houses in Cambridge' and they would add a bathroom if the license was renewed 38 03 04a & b

1938 08 01

The Gwydir Arms was a fully licensed house. Within a radius of 400 yards there were seven fully-licensed houses, two beer houses and one beer-off. The area was fully developed and did not need this number. Its trade was small and declining. But Greene King had spent money on improvements since they bought it in 1925 and would put in a bathroom and private lavatory. There was an atmosphere in the building which puts it in a street by itself. The licence was renewed. But that of the Tailors Arms beerhouse in Norfolk Street was refused. 38 08 01 & a

1939 06 30

The Red Bull in New Street was redundant, magistrates said. It was in a poor state. There were twelve other licensed premises within 400 yards and the population had reduced following slum clearance schemes. The licensee had another job and his wife did most of the work at the pub. But the Star Brewery said it was doing a trade of barrels a week and other pubs did less. They had already re-built the Fives Bells and the Star, nearby, and had plans for rebuilding it when cash became available 39 06 30a

1940 07 12

Drink Curfew. — Cambridge licensees are not to serve soldiers with drinks after 9.30 p.m. on the instructions of the military authorities. Local Defence Volunteers are not affected 40 07 12 CIPof

1949

Vice Chancellor found to have no powers over licences to sell British wine [11.7]

1950 02 03

"I feel that beerhouses are an anachronism" said the Cambridge chief constable at the Borough licensing meeting. "They were invented in the days when spirits were very cheap and was done to prevent people from imbibing too much gin. Nowadays people can't afford too much spirits. I now see little difference between a full licence and a beer licence". The committee considered an application for a full licence by the licensee of the "Dew Drop" beer house, Gwydir Street. He said members of visiting darts teams asked for "shorts" c50 02 03

1951 03 21

Cambridge has some 150 inn signs hanging outside licensed premises. It is probable that Cambridge was the first place where public house signs were made compulsory by law. An Act passed in 1430 laid down "whoever shall brew ale in the town of Cambridge with intention of selling it must hang out a sign, otherwise he shall forfeit his ale. The Eagle and Child in Bene't Street was called by irreverent undergraduates "The Bird and Baby". There was also a "Swan and Sugarloaf", (now the Still and Sugarloaf) which was nicknamed the Duck and Acid Drop c51 03 21

1951 12 13

Reminiscences of the First World War when the Star Brewery, Cambridge, was manned almost entirely by women were shared by Major Freeman at the celebration of the firm's diamond jubilee anniversary. When he joined in 1903 there were 30 public houses on the Newmarket Road. It had come into being in 1891; in 1935 it became a subsidiary of the Tollemache Company and recently the firm of Messrs Whitmore, in St Andrew's Hill, had been acquired. The brewery had stabling for 25 horses up to 1935 when motor transport was first introduced. It had been a great success and was now considered to be the county's "star" brewery c51 12 13

1952 09 16

Fire caused thousands of pounds worth of damage at Jack N. Baldry's Mineral Water Works at Gold Street, Cambridge. It broke out in the first floor of the factory where corks, labels and bottles were kept & ran the whole length of the roof of one wing, most of which was destroyed. Firemen were hampered by extremely dense smoke, melting lead from the valleys of the roof and by many of the mineral water bottles exploding c57 09 16

1953

Plume of Feathers, Park Street demolished [2.19]

1954 02 09

The landlord of the Baron of Beef does not mind how much money he spends to make it the brightest public house in Cambridge. Music is the order of the day and this certainly suits his customers, many of whom are American servicemen. A large white organ arrived on Monday but was too big to go through the door and had to be taken away. His latest brainwave is to install an electric Hammond organ worth £2,000 and an experience man, formerly a cinema organist, has been engaged to play it. CDN 9.2.1954

1954 07 03

Huntingdon will probably lose one of its oldest industries with the cessation of the brewing of beer. For more than 300 years the brewery in the High Street has been active. Now it will stop. The score of women in the bottling department and the men on the brewery staff will be found other employment. None of the office staff will be affected and the off-licence premises will carry on as usual. Malting will also be continued and the dozen lorry drivers and loaders will not be affected. It will be used as a distribution centre for the Ely produced beers. Throughout the century many amalgamations have taken place but in 1950 they culminated in the combination between the Huntingdon Brewery and Messrs Hall, Cutlack and Harlock of Ely to form the East Anglian Breweries Ltd – CDN 3.7.1954

1955 01 08

Dales brewery no longer brew draught beer, taken over by 1954 Whitbreads [2.1,4.20]

1956 03 23

Globe public house restructured 56 03 23

1956 12 03

Fire severely damaged a workshop at the Star Brewery in Auckland Road but the prompt arrival of the Fire Brigade prevented the outbreak from spreading to adjoining garages. Mr Harold Jones, a mechanic, was welding when the fire started and raised the alarm. Young art students who were sketching nearby buildings when the fire started were able to make drawings of the damage. 56 12 03

1957 03 02

A new public house, 'The Weathervane' can be built on Perne Road but the Star brewery must transfer the licence from The Crown and Compasses in George IV Street and will close the Crown, Wellington Street and the Star on Newmarket Road. People living in the new houses in the area objected, one lady saying she'd saved her money to buy a house there to be away from pubs. 1957 03 02

Plans were agreed for a new public house, 'The Robin Hood and Little John' to be built on land adjoining a pub of the same name at Cherry Hinton. Designs originally submitted two years ago had been revised and a small smoke room omitted. There was also a large car park. 57 03 02a

1957 04 01

Despite a vigorous protest, magistrates agreed the erection of a new public house, 'The Weathervane' on Perne Road. There was a definite need; since 1936 around 2,500 new houses had gone up in the area with about 9,500 professional and working people. It was a respectable middle-class area and scholars would not be tempted to enter it. 57 04 01b & c

1958 02 14

Greene King's Panton Brewery is no more. The modern machinery at Bury St Edmund's is capable of meeting requirements so the premises in Panton Street will be used as a storage and dispersal depot. It was a small brewery but had been producing very good beer for more than 60 years, latterly turning out 15,000 barrels a year. Greene King acquired it in 1925. It is a pity that such long-standing traditions must be broken and the beer connoisseur will mourn its loss. 58 02 14a [3.10]

1958 03 10

"Every issue of the CDN reveals on every page the heartbreak and suffering caused by alcohol", said Dr Rattray in objecting to plans for a new public house on the corner of Alex Wood Road. It would be close to two new secondary schools and exactly opposite the Church. Nearby houses would suffer the noise of car doors and shouting and laughing outside. But residents said it was almost a mile to the nearest pub on Milton Road. 58 03 10

1958 03 27

1959 11 13

The Weathervane, a new public house at Perne Road, is the first to be built to serve new Cambridge housing estates. The site was purchased by Tollemache Breweries in 1937 but has been delayed for 22 years because of the war and building restrictions. Today it is uneconomic to build palatial mansions but this house is just as comfortable, the sort of place one can bring a family for a pleasant drink with its bright contemporary decorations, skirting heating and low fireplaces. "You may ask why the name 'Weathervane' was chosen, but I cannot give you any reason at all", Lord Tollemache told guests at the opening. 59 11 13c, 12 [3.12, 13.4]

1959 12 16

The Arbury Estate gained its second public house within 12 days with the opening of the Carlton Arms. It is unique in that it is sponsored, owned and run by two breweries, Wells and Winch and Whitbread's. Designed in a conventional fashion, it has a brightly-decorated public bar and a saloon bar that can be separated into a lounge bar by means of a Bolton gate. The new landlords, Mr & Mrs Alan Davis were previously at the Still and Sugar Loaf on the Market Square. 59 12 16b [3.13,12.8]

1960 02 03
The picturesque 'Free Press' public house in Prospect Row stands in an area which the City Council wish to clear for redevelopment and is likely to be demolished one day. It once catered for printers from the old University Press in Brandon Place and consists of two cottages knocked into one. The licensee, Geoffrey Nichols, has been in occupation since 1927. When he first came it was 'an old spittoon sort of place' but now businessmen like its smoke room, workmen and their wives enjoy a drink in the public bar, and the snug, the slip and the bottle and jug department each cater for a public of their own. The walls are covered with photographs of actors and variety artists who used to lodge nearby while appearing at the New Theatre. 60 02 03

Tollemache and Cobbold Breweries announce the opening of The Racehorse, Newmarket Road, Cambridge. This house has been designed for maximum comfort and service. There are three well-appointed and furnished bars and decoration is tasteful and modern. Sandwiches and snacks will always be obtainable. One of the rooms will be available for clubs and private parties. Apply to the manager, Arthur Shatford. – Advert 61 12 21b [13.14]

1961 12 14
Queen Edith public house opens, Wulfstan Way – 61 12 14 [14.1]

1961 04 21
Lacon's the brewers want to knock down the Travellers Rest public house in Huntingdon Road, Cambridge and erect another one further back. A petrol filling station would then be built on the site with no major repair facilities, just a routine check of oils, tyre pressures and sparking plugs. There was no filling station on that side of the road until passing the Lolworth Transport Café. But planners say there is already a petrol station opposite. There is heavy traffic visiting the nearby Cattle Breeders Association and Messrs French's Flour Mills and many coach parties

would continue to use the public house. A lighted cigarette end thrown from an open coach window by a passenger would land near the petrol pumps. 61 04 21a

The massive square building of the Cambridge Maltings on Newmarket Road is where barley is converted into malt for malted food and beverages but mainly for brewing into light ale. The loading room holds row upon row of sacks bulging with fat, glossy barley grains which has to be dried in a huge perforated drum. It is carried to bins where it is rested for six weeks and then conveyed to the square brick tower which rises higher than the main malt-house roof. When the process is complete it is hauled by electric elevators on to lorries to be taken to the leading breweries. 62 04 23 & a

1962 05 12

Renovations being carried out at the Green Dragon Public House in Chesterton have led to the discovery of coins and business cards over 100 years old. They were found by the licensee, John Harrison, after a mantle shelf was taken down over the fireplace in the public bar. The coins include a Rochdale halfpenny from the 1790s showing a spinner at a weaving loom while one of the cards relate to a General Election of 1835. The pub itself is of considerable age, having been granted an inn licence in 1630 when it afforded 'sufficient entertainment for 20 men and horses in bedding and stable rooms' 62 05 12

1973 10 06

Tolly, the East Anglia brewers may sell off their £1 million Star Brewery site in Newmarket Road, Cambridge within the next three years. The 4½acre site includes the brewery buildings and the Burleigh Arms public house. The old Star Brewery stopped production last year and the buildings have been used as a storage depot. It is understood the directors have been considering various possibilities for the Newmarket Road site, which is bounded roughly by Auckland Road, Midsummer Common and Parsonage Street. One includes building luxury flats, a hotel and public house on the site. "There is no possibility of us leaving Cambridge. It is a very important place for us", said Tolly's managing director c73 10 06

1974

Red Cow rebuilt [4.5]

1974 02 01

Since the traditional bar in Alexandra Street was closed down for the Lion Yard development, the name of Henekeys has been missing from the city scene. The Henekey Tavern, which has just been completed under the former Dorothy Restaurant has brought it back in style. The Alexandra Bar keeps a link with the past and adjoining it is a farmhouse-style chop bar. In the contrasting Squires Bar a more substantial meal can be eaten in plush surroundings c74 02 01

1974 05 19

Residents of the north Arbury estate did not need a heat wave to remind them of their need for another pub and the opening of The Ship will meet with eager response. Campaigners for real ale will be pleased to find that Wells of Bedford are making this their fourth Cambridge pub, providing beer connoisseurs with their prize-winning bitter as well as a wide range of other beers, wines and spirits in spacious new premises c74 05 19

Panton Arms refurbished in old Panton Brewery demolished 10 years ago s [14.7]

1976 06 15

The first 1000 pints were on the house as friends of traditional British draught beer packed the Salisbury Arms, Tenison Road, Cambridge for its reopening under the ownership of CAMRA Investments Ltd. The pub was bought from Whitbread last year for £22,000 and has been renovated from top to bottom. It is their first pub in East Anglia c76 06 15 had closed 1973; celebrates centenary 1986 [13.8]

1977 06 14

One of Cambridge's best-known characters, Trevor Hughes, clocked up his 100th recorded conviction at the city magistrates' court when he admitted being drunk and disorderly in the Market Square. As he came into court, Mr Hughes, looking thinner and without his famous bobble hat or bushy beard said: "Good afternoon everybody". In court he said: "I won't deny it, but I can't remember. I like a little drop of tiddly, but I'm not abusive. But people say: 'look at that dirty old so and so', and I lose my temper". He was sent to prison for a month. c77 06 14

1978

Christ's college granted full beer licence for its college bar; previously they had operated under Vice Chancellor's wine licence which felt not to cover beer or spirits, licensing means have to follow normal pub closing times which students oppose. Emmanuel college advised that Vice Chancellor's licence does cover them [11.7]

1978

"Wine bars will make city pubs redundant" fear [11.8]

1978 02 20

The battle for the Free Press has been won and this celebrated Kite survivor was officially reopened in all its renovated glory. It is a small street corner public house, originally on the end of a terrace of cottages. In 1964 it was purchased by Cambridge City Council as part of a clearance area and the cottages were demolished. But the pub was leased back to Greene King so it could continue to trade until required for demolition. The challenge has been to preserve and enhance the original character, retaining all the interesting features while enlarging the premises. It was reopened by Miss Brenda Nichols whose family ran the pub for 48 years. c78 02 20 [12.3]

1978 05 06

Cambridge Magistrates may have acted outside their powers in seeking to license college bars. Cambridge colleges have operated student bars in the past, arguing that the Vice Chancellor has the right to issue licences within the university to authorise the sale of all alcoholic liquors, including wine. But while the right to authorise wine-selling has not been challenged, the sale of beer has come under official scrutiny. At King's College students fear the grant of a licence would affect many social events; it would become a criminal offence for a student to be drunk at his college bar and the police would have the right to enter without warrant or invitation. c78 05 06

1979 10 31

Pickarel alterations [14.5]

1980 04 10

Major alterations have been made to the Cambridge Arms in King Street ensuring the conservation of the old Cambridge Brewery building which has stood semi-derelict since brewing ceased in 1925. It was established by George Scales in 1866 and then supplied 13 public houses. The new Scales Bar extends beneath the old brewing floor and features brick arches which

supports the heavy coppers and chimney on the upper level. Various items of brewing equipment that were removed for safe keeping have now been returned and are displayed. 80 04 10 [12.9]

1980 11 05

Rose & Crown, Northampton St reopened [13.9]

1980 12 20

One of the oldest pubs in Cambridge, the Rose in Rose Crescent, may soon be just a memory. The brewery, Whitbread, is to sell the premises and it is likely to be converted into student accommodation. Landlord Alf Barnett said it was a place where a man in gumboots and work clothes could stand alongside a businessman with brolly and bowler hat and get along together. Sons of the gentry, over late-night cups of coffee, would ask to borrow the phone to ring 'Mum' and he used to vet their girlfriends. 80 12 20

1981

Old Spring pub reopens [11.10]

1981 01 20

Cambridge's newest pub, The Lord Byron is part of a facelift at Cambridge railway station. It has been created in space that was once part of the cab entrance beneath its distinctive colonnade. The original bar faced the platform and could only be reached by buying a platform ticket, the new one can only be entered from the street. Already regulars have formed darts and crib teams and draught ale should be on sale from next week. 81 01 20a [14.15]

1981 04 29

Rose, Rose Crescent (ancient site) closes, converted to accommodation, shops & wine bar [13.10]

1981 05 27

Milton Arms refurbished, including restaurants [14.11]

1981 09 08

Amid much music and good cheer, the Ancient Druids closed – the last of nine pubs in Fitzroy Street. Soon the 200-year-old rafters will collapse under the developer's sledge-hammers to make way for the multi-million pound Kite shopping development. But last night they rang to the rollicking rhythm of Irish ceilidh music from Ted Stacey's melodeon, accompanied by guitars, penny whistles, banjo and drums. The wake ended when it ran out of beer. The brewers, Charles Wells, are building another when the development is completed. 81 09 08 [12.6]

1982 02 13

Baldry's soft drinks firm has shut down. It was founded by Jack Baldry in 1928 in the face of stiff competition from 32 other soft drinks firms in Cambridge. They moved to Sawston from premises in Harvest Way in 1979 because it needed more storage space. Two firms are interested in buying the assets and maintaining the Baldry name. 82 02 13

1982 05 06

The Travellers Rest, the 100th Beefeater Steak House, has opened at Girton. Weathered bricks and dark wood have come from an old mill in Lancashire to give the former Whitbread pub a warmth and intimacy. Hundreds of plants with an unusual water feature add both colour and life but the over-riding ingredient for success is value for money with no extra costs hidden within the menu. 82 05 06

1982 07 20

The Alma Brewery in Russell Court is reopening as a free house under the control of CAMRA. The pub, which dates back to 1835, was one of the first buildings to be erected in the former Balls Folly Field. It took its name from the Battle of the Alma in the Crimean War. Brewing stopped in 1909 but it continued to be run as a pub until it closed in March. 82 07 20a [13.2]

1983

Racehorse, Newmarket Rd reopens as Hoofers - young persons pub with flashing lights, music etc [11.14]

1983 02 11

Weathervane refitted, becomes Master Mariner [14.13]

1983 06 16

British Queen reopens as Bumpers, fun pub (closed for lack of custom 1984 & reopens with nautical flavour 1986) [12.10]

1983 12 08

Beer at 1930s prices attracted drinkers when the Burleigh Arms, Newmarket Road, re-opened. It had been closed for six months while the front wall was rebuilt and the two bars redecorated. It now has a 1930s theme deliberately chosen in an attempt to go up-market and attract shoppers from the new Grafton Centre. The Zebra and the Bird in Hand have also been revamped. The sparkling image of the roaring twenties has been revived in the evocative décor of a Cambridge public house which has just reopened after a complete face-lift. The Burleigh Arms in Newmarket Road is making a complete break with its history with no pains spared to develop surroundings which are unique to the Cambridge area. Music from the past will form part of the repertoire of a pianist performing four nights a week. Its profusion of potted plants gives a further touch of atmosphere 83 12 08 p6 83 12 12

1983 12 29

Britain has about 75,000 pubs but experts say the number will have dropped by 10,000 by the end of the century. Six Cambridge pubs have closed in the last ten years and most were knocked down and redeveloped. The Rose in Rose Crescent is the only one still standing with its basement now housing Flambards wine bar. The Bun Shop went after years spent in splendid isolation as the Lion Yard was built, The King William IV in Newmarket was flattened as was the Prince Albert in Chesterton. The Ancient Druids and Old English Gentleman were demolished as part of the Kite clearance. 83 12 29 p12

1984 05 06

Pinks Wine bar opens in old Rhadegund premises; closes again 1984 08 15 [13.12]

1984 06 21

A Victorian atmosphere will be the theme for the Dobblers Inn, Sturton Street, the former City Arms. Older residents can just remember a colourful and eccentric character called Dobbler, who kept a large yard renowned for the unusual items which could be obtained there. Now a whole range of bric-a-brac from stone jars to old prints and plants will enhance the period flavour 84 06 21 p18 [12.6]

1984 07 13

The Rock in Cherry Hinton Road has been shaken to its foundations and put back together as a bright inviting pub offering real ale, good food and music. The bars have been reconstructed and

the snug has made way for spacious through bars with split level floors and a swirling glass faceted container which sends rainbow beams over customers. Saturday night sing-alongs to suit all age groups will return and modern jazz may be featured. The new kitchens will offer dishes like chilli con carne and spare ribs 84 07 13 [13.11]

1984 09 27

A bar 'unique to Cambridge' is the claim made for J. Millars on Newnham Road. It is not a wine bar or a cocktail bar. When the Chinese beer ran out they tracked down an alternative in Brighton. Apart from tsing tsio they have beers from Germany, Czechoslovakia and Holland and claim to offer the widest range of import beers, liquors and spirits outside London. They offer all-day faculties for business conferences and hold wedding receptions 84 09 27

1984 11 30

The Champion of the Thames pub in King Street has just been completely refurbished with an Edwardian atmosphere featuring reinstated oak panelling matched up with new boarding bars, ceilings and floors. The familiar 'Champion' emblem of a sculler has been superbly etched on the new glass but the Landlord would like to know something more about him so that he can add to a selection of old rowing and sculling prints which now adorn the walls. He thinks the name may have come from either a lodger or resident who was a Thames sculling champion. 84 11 30c

1984 12 08

The very new Ancient Druids pub has opened its doors for the first time – but not without a slight delay. The pub brews their own ale on the premises but when Cambridge's mayor pulled the pump for the first pint all he got was an eggful of the new Charles Wells brew, Kite Bitter, and a lot of home-brewed air. However, after a rapid change of pump, a glass was drawn to be sampled by Ale Conner Alfie Howard from Lambeth, who revives the centuries-old tradition of testing the beer before a pub can start serving. Dressed in his 17th-century costume he passed it as fit and hoisted aloft an ale garland signifying the new brew was ready for drinking. The old Ancient Druids, remembered as an old-fashioned boozier with its own particular charm, was one of nine to go under the developers' bulldozer. 84 12 08

1985

Hopbind restyled & reopened [11.13]

1985 07 23

The Little Rose in Trumpington Street, believed to be one of the oldest pubs in Cambridge dating back to 14th century has been totally refurbished. Soon the 200-year-old rafters will collapse under the developers' sledge-hammers to make way for the Kite shopping development. The brewers, Charles Wells, are building a new pub when the development is complete. 86 09 08

1986 12 13

In most pubs the air is thick with cigarette fumes but now sections of the Free Press and Cambridge Blue have been turned into non-smoking zones at lunchtimes. Some drinkers approve as it makes the atmosphere much nicer. One Cambridge music lecturer said: "I don't approve of smoking. I think it should be banned. It's much more serious than taking drugs." Breweries are also waking up to the idea that clean air is important with improved air conditioning and smoking bans in food areas. It's not very common at present but may become so in the medium term. 86 12 13a

1987 05 08

The Little Rose in Trumpington Street, a 17th-century listed building, may be converted into a restaurant by its owners, Peterhouse. The Campaign for Real Ale say it is extremely popular and one of the few Bass Charrington pubs in the area. The brewery is disappointed. It is one of the oldest licensed premises in Cambridge and they thought there was a strong case for retaining it, extending the eating facilities in line with demand 87 05 08

1987 07 15

The historic Eagle Inn, one of the oldest pubs in Cambridge which became a meeting place for the American forces during the Second World War is to close for two years. Corpus Christi College, the owners, are refurbishing adjacent buildings and hope to concentrate student accommodation in the area. They say the site would be too dangerous and dirty to allow it to stay open. Greene King, the brewers, are appalled by the news but the pub, with its famous gallery, will certainly not be closed permanently. 87 07 15

1987 11 17

One of Cambridge's most picturesque pubs, the Fort St George, has been completely renovated and revitalised. But it has not lost its charm now the old photographs and oars have been rehung and the old hearth is lit by a roaring fire on cold evenings. Until the 1830s it was surrounded by water with the river on one side and a toll house on the other. Now it is encircled by bicycle trails and there is parking for motorists just across the footbridge. 87 11 17

1987 12 02

Eagle planned renovation delays ¢CEN 2.12.87

1987 12 16

The Sir Isaac Newton, once a tiny street corner pub in Castle Street, has undergone a complete transformation by Greene King. Only the façade of the building remains the same as it is listed. The pub, which fronts the new Castle Park Research & Redevelopment Village, is now three times its original size with a futuristic Perspex sculpture reflecting the life of the famous scientist. Its impressive transformation incorporates one continuous bar with cleverly designed seating areas to retain the cosy, intimate nature of the original. 87 12 16a

1988 01 10

De Vere buy University Arms ¢CEN 10.1.89

1988 04 18

Regulars at the Free Press in Prospect Row are toasting success after it was named one of Britain's 100 classic pubs in the new CAMRA guide. The little pub, packed with settles, panelled walls and memorabilia was first licensed in 1834 when a home brewer named Sarah Horne turned her cottages into a commercial establishment. It takes its name from a local temperance paper named the Free Press which railed unsuccessfully against the evils of alcohol. The bar carries a

notice warning of the 'degradation of drunkenness' but is a jolly, uninhibited place, the haunt of students, cricket and rowing enthusiasts. 88 04 18a

1988 05 19

The Merton Arms pub in Northampton Street, which belongs to St John's College, will closed at the end of September. It is one of the few pubs in the city centre which provide bed and breakfast. Now it may be converted into student accommodation 88 05 19

1988 05 23

Dobblers Inn in Sturton Street used to be called the City Arms but was renamed after a rag-and-bone man who lived nearby. It has a varied collection of old pictures and a fascinating assortment of bric-a-brac quite in keeping with his interest in junk and knick-knacks. It is a traditional pub but has an entertainment time on Friday evenings with everything from a magician to a piano player. It sells Steam Beer, a very strong brew from Newcastle, and wines by the glass 88 05 23

1988 06 07

The Little Rose in Trumpington Street, until recently one of Cambridge's oldest pubs, has reopened as a restaurant. The building dates back to the 14th century and boasts rare examples of domestic Tudor architecture. Now the interior has been refurbished and many of the old timbers are exposed for the first time. A cocktail bar has been installed and a spacious new conservatory added. 88 06 07a

1988 09 23

The Merton Arms in Northampton Street is closing because the owners, St John's College, has not released the lease held by Greene King. 88 09 23a

1988 12 15

The former Tivoli cinema building which opened on Chesterton Road in 1925 has been converted into 'The Exchange' with two large cocktail bars and a 120-seater restaurant. Later will come a basement gym, a punt landing stage and a roof garden restaurant with panoramic views over Jesus Green. Entertainment facilities include a huge electronic roll-down screen, the latest audio equipment and closed circuit television relaying film of the dance hall, But great care has been taken to preserve the distinctive atmosphere with plaster ceiling mouldings and a combination of rich dark and red wood 88 12 15a

1988 12 19

Mill pub refurbished & renamed Tap & Spile CEN 19.12.89

1989 08 18

The Rock pub has changed a lot since it opened in 1923. Now its biggest transformation brings an almost nightclub type of appeal. In the public bar a pool table has been removed but there is an area for dart playing. A discmonitor (compact disc jukebox) has been installed together with a new stage, enhancing its reputation for live music three nights a week. This is usually rhythm and blues though Thursdays are free for local bands and other types of music. 89 08 18

1992

Eagle pub reopened after four-year shutdown [Rev]

see R.G. Wilson. *Greene King: a business ... history.* 1973 – S10

Bailey & Tebbutt history – 87 09 03a

1889 c Sir – my father, J.R. Bennett, a master builder, constructed a chimney for the Star Brewery at Newmarket Road, Cambridge. Boy-like I used to play round the site and one day about 1889, when the work was almost complete, he made me climb the ladders up the scaffolding and stand on the extreme summit, saying ‘You will be the only one who will ever stand there’ – G.A. Bennett, Wisbech. 56 08 20

1889 Frederick Bailey sells Star brewery to Charles Armstrong, late of Scarsdale brewery, Chesterfield. Bailey built up concern, managed it for 50 years & made it the largest of its kind in the county [3.5]

1897 Mr B.W. Beales has the pleasure to announce that he has disposed of the business carried on for many years by him as a brewer and wine and spirit merchant at the Panton Brewery in this town, to Messrs Harold Barber Bailey (son of the late Mr Frederick Bailey, of Burleigh House, Newmarket Road) and Herbert Hazeldine Tebbutt, the continuing partner in the late firm of Robinson & Tebbutt, and the business will in future be carried on by these gentlemen under the style of Bailey & Tebbutt 1897 03 01 CDN

1897 Messrs Gain, Moyes and Wisbey offered for sale the Shakespeare Brewery, Newmarket-road, Cambridge and 15 freehold licensed inns, public houses and beerhouses. Lots commenced at £500 and rose rapidly - in the case of the Red Bull, Barton Road to £2,050. Other prices included The Shakespeare Brewery and Inn (£2,000), The Greyhound, Lt Wilbraham (£800), The Bakers' Arms, Fulbourn (£950), The Railway Inn, Harlton (£725) and The Cherry Tree beerhouse, Swaffham Fen (£600) 1897 08 02 CDN

1901 A shocking accident occurred at the Panton Brewery, Cambridge, when one of the brewery employees lost his life. The man fell into the copper which contained a large quantity of boiling liquid and was frightfully scalded. He scrambled out as speedily as possible but even then it was seen that his injuries were so awful as to leave little hope of recovery. He died from shock the following morning. c01 03 19

1901 Messrs Sutton and Phillips, brewers' chemists of Stowmarket claimed £10 3s.6d. from the Rodney Brewery, Cambridge. They make Burton spring liquor and ask for a sample of the customer's brewing water which they analyse and make up a mixture to make it as near as Burton water as possible. If they did not subsequently receive an order they were to be paid for the analysis. Mr Swan for the brewery said they had never used the liquor and did not like trying those sorts of things. When he said the traveller could have a sample of water he had no idea he was to be charged with the analysis of it c01 06 17

1902 Anchor Brewery Quayside closed [16]

1902 Cambridge Star Brewery shareholders were told that the Directors had purchased the Fenstanton Brewery together with licensed premises and sundry private houses & cottages. That brewery has now been closed. On the whole the accounts were extremely satisfactory. Going back to the first report of the company in 1892 the assets had been increased by nearly £18,000 CDN c21.1.1902

1903 Some 20 years ago premises in Gwydir Street Cambridge were used as a brewery; they became dismantled but now through the enterprise of Mr Frederick Dale it has been converted to an up-to-date brewery where beer made from pure malt and hops will be manufactured. Its speciality will be family pale ales and nourishing or invalid stout, an article a small brewer seldom undertakes to manufacture. Messrs Adlam of Bristol have installed the most improved machinery and the most up-to-date methods are employed. c03 12 05

1904 death of William Warboys, brewer, Sturton St [3.23]

1905 Death E.A. Wadsworth, mineral water manufacturer – 05 12 16a

1907 A brewer's drayman was fined for hawking beer. An Inland Revenue officer said he saw a boy stop a cart belonging to William Pegg, brewer of Newmarket Road, and say "They want you over there", pointing to some men engaged in harvesting. The man had taken them a gallon jar off the cart for which he received one shilling. It was extremely unfair to sell beer that way as it took away from the custom of those who were legally entitled to sell it. The brewer said he had told the drayman not to sell beer without an order; the brewing business was a hobby of his and he would not be intentionally guilty of an illegal practice. 07 11 05 & a

1911 Dale's Brewery of Cambridge has been awarded the world's championship (and a 50-guinea cup) for the best bottled beer at the Brewers' International Exhibition held in London. The championship beer is selected from those entries winning first prizes in the various bottled beer classes. The first prize won by Dale's was for the best pale ale and this was unanimously judged as champion. They also won an award for their draught beer. Considering the firm is hardly 12

years old this is a remarkable achievement. 11 10 20b (also wins Brewers Journal Silver Challenge Cup & 20 medals for best beer [1.23]

1913 Gt Chesterford Brewery, successfully carried on by Messrs Pilgrim for over half a century, has been acquired by Dales Brewery of Cambridge. They intended carrying it on as before. There was no better barley-growing district and with good barley they could ensure good beers such as those brewed by Dale which won the championship gold cup for bottled beers at the International Brewers Exhibition in 1911. 13 10 17 p10 CIP 13 11 14 p12 CIP

1914 death of P.L.Hudson of Pampisford Brewery [1.17]

1914 Death W.H. Apthorpe, brewer 14 07 17 p5

1914 Dale brewery award 14 11 06

1914 Dale Brewery medals – wins silver medals for best stout & best bottled ale at Brewers' Exhibition; has acquired a maltings and brewery stores at Gt Chesterford & improved machinery 14 11 13

1914-18 during War Star brewery manned almost entirely by women

1925 The well-known Cambridge brewery business which has been carried on for 28 years in Panton Street by Messrs Bailey & Tebbutt is to change hands. They acquired the brewery in 1897. At that time they were carrying on the Granta Brewery under the name of "Robinson & Tebbutt". Mr Bailey's late father was owner of the Star Brewery. The business has now been acquired by Messrs Greene, King & Son c25 01 18 [1.20]

1925 Panton brewery taken over by Greene King, stops brewing [1.7,12.9]

1926 Scales King Street brewery taken over by Barclay (later sold Wells & winch & Greene king [4.21]

1927 Thousands of bottles of old ale, specially brewed for Trinity College and matured in the college cellars, have been sent this Christmas to Cambridge men all over the country. Trinity Audit Ale is declared by brewers to be the finest known. Every year there is a big demand for it, but not a bottle is allowed to be sold to the public and only present and past members of the college are allowed to buy it. The ale is matured for two years before it is sold and treated with all the care of an old wine. The recipe of the drink, which until fairly recently was brewed in the college itself, is kept a secret. c27 12 23

1930 Hudsons brewery sold [1.18]

1930 Ogdens brewery sold [1.18]

1931 Hudson's brewery had closed six public houses in Cambridge: the Brewery Tap in Bridge Street, the White Swan and Prince Albert in Castle Street, the Beehive on Honey Hill, Spotted Cow in Northampton Street and Golden Fleece in Ram Yard. But they wanted to renew the licence for the Baron of Beef. The application was supported by a petition from the Sick Benefit Society and was granted. Also Cow & Calf & Crown & Sceptre 31 03 13f

1931 Prompt action averted a serious fire at the Panton Brewery, Cambridge. The premises were deserted at the time of the outbreak as the mechanics and other employees were away at breakfast but as soon as the alarm was given many hastened to the spot with chemical extinguishers, but flames spread to the roof and loft of a small workshop. The fire brigade arrived in under five minutes and prevented a big fire. 31 10 23b

1932 The record success of Dale's Brewery at the Brewery Exhibition was celebrated at the Dorothy Café when the cups and medals won were on show. It was a local firm, founded by Frederick Dale in 1903, their capital was all local, the majority of their barley was grown within a radius of 20 miles of Cambridge and malted locally at Barnwell. Eight of their tenants have over 20 years' with the firm. If they were Britain's best brewery then Mr Hawkes was the best brewer 32 03 11 & a

1934 Star brewery acquired by Tollemache [1.4]

1936 Alfred Scales carried on his father's business as wine and spirit merchants, formerly well-known as Scales Brewery. He retired in 1925 when the estate was disposed of and the business taken over by Messrs Barclay, Perkins & Co. During the war he arranged sports and entertainments for the patients at the 1st Eastern General Hospital and took special interest in the bath ward where wounded soldiers used to lie continually in baths of warm water. 36 03 27c

1937 Dales brewery modernised with new bottling units and pure air plant; group photo – 37 07 02c

1951 Reminiscences of the First World War when the Star Brewery, Cambridge, was manned almost entirely by women were shared by Major Freeman at the celebration of the firm's diamond jubilee anniversary. When he joined in 1903 there were 30 public houses on the Newmarket Road. It had come into being in 1891; in 1935 it became a subsidiary of the Tollemache Company and recently the firm of Messrs Whitmore, in St Andrew's Hill, had been acquired. The brewery had stabling for 25 horses up to 1935 when motor transport was first introduced. It had been a great success and was now considered to be the county's "star" brewery c51 12 13

1954 Huntingdon will probably lose one of its oldest industries with the cessation of the brewing of beer. For more than 300 years the brewery in the High Street has been active. Now it will stop. The score of women in the bottling department and the men on the brewery staff will be found other employment. None of the office staff will be affected and the off-licence premises will carry on as usual. Malting will also be continued and the dozen lorry drivers and loaders will not be affected. It will be used as a distribution centre for the Ely produced beers. Throughout the century many amalgamations have taken place but in 1950 they culminated in the combination between the Huntingdon Brewery and Messrs Hall, Cutlack and Harlock of Ely to form the East Anglian Breweries Ltd – CDN 3.7.1954

1954 Dales brewery taken over by 1954 Whitbreads, no longer brew draught beer, 1955 [2.1,4.20]

1956 Fire severely damaged a workshop at the Star Brewery in Auckland Road but the prompt arrival of the Fire Brigade prevented the outbreak from spreading to adjoining garages. Mr Harold Jones, a mechanic, was welding when the fire started and raised the alarm. Young art students who were sketching nearby buildings when the fire started were able to make drawings of the damage. 56 12 03

1958 Greene King's Panton Brewery is no more. The modern machinery at Bury St Edmund's is capable of meeting requirements so the premises in Panton Street will be used as a storage and dispersal depot. It was a small brewery but had been producing very good beer for more than 60 years, latterly turning out 15,000 barrels a year. Greene King acquired it in 1925. It is a pity that

such long-standing traditions must be broken and the beer connoisseur will mourn its loss. 58 02 14a [3.10]

1961 cup over Dales brewery taken down [446.12.7]

1962 The massive square building of the Cambridge Maltings on Newmarket Road is where barley is converted into malt for malted food and beverages but mainly for brewing into light ale. The loading room holds row upon row of sacks bulging with fat, glossy barley grains which has to be dried in a huge perforated drum. It is carried to bins where it is rested for six weeks and then conveyed to the square brick tower which rises higher than the main malt-house roof. When the process is complete it is hauled by electric elevators on to lorries to be taken to the leading breweries. 62 04 23 & a
